A consultation on the CAA's process for developing economic regulation for RP2 under SES II

Dear Mike,

We welcome this opportunity to comment on the process for developing economic regulation for RP2 under the Single European Sky II.

We note that the consultation does not set out any proposals at this stage, but we look forward to engaging with the CAA on this subject during 2013. Gatwick would encourage the CAA to ensure that any proposals adhere to the principles of better regulation and do not prevent the further development of airport or ANSP competition. This is of particular concern to Gatwick, given its unique operating characteristics as the busiest single runway airport in the world.

Yours Sincerely

Andrew Williams-Fry
Chief Economist &
Head of Regulatory Strategy
