

Class 1/2 certification - Neuro-Cardiogenic Syncope

NOTES:

- 1) By a cardiological specialist
- 2) If possible neurological causes of syncope/loss of consciousness should have been excluded by appropriate history and clinical review.
- 3) Exercise ECG - Bruce protocol and symptom limited. See [UK CAA exercise ECG protocol](#). Requirements are at least 9 minutes and no significant ECG or blood pressure changes.
- 4) 24 hr ECG - No significant rhythm or conduction disturbance.
- 5) Echocardiogram - Structurally normal heart and normal LV and RV function.
- 6) Tilt test to a standard protocol. Drug provocation is not necessary.
- 7) The reports will be reviewed by the Authority Medical Section (AMS) for class 1 and by the AME for class 2. It may be necessary to see the investigations, in which case the actual tracings/films/videos will be requested. In difficult cases a secondary review panel will be convened. Cases with loss of consciousness without significant warning shall be assessed as unfit.
- 8) Shorter (or longer) periods may be accepted by the AMS according to the individual circumstances.
