

To add to your Favorites

Once you have the address for the site you want in the address bar, click on "**Favorites**" in the topmost tool bar (ie, the one that has *File, Edit, View, Tools, Help*)

and then on "**Add to Favorites**". In the "**Name**" field you can type whatever you like, eg something that'll help you remember what page it is.

Then you can simply add it in to the main Favorites folder or whichever one you prefer.

Alternatively, you may wish to create a specific folder for such web pages, so click on "**New Folder...**". You will now be given the option to create a folder with a title of your choosing.

Click "**OK**"
