

Removing all traces

Open up Internet Explorer (IE) and click on “Tools” in the menu bar and then on “Internet Options” - this should be the last item in the menu.

Under the “Content” tab at the top look under “Personal Information”. Under this heading you will see a button for “AutoComplete”. Click on this and you will be able to choose between deleting everything you’ve entered on webforms (*Clear Forms*) or all passwords (*Clear Passwords*).
