INTRODUCTORY NOTES

- 1 These figures are compiled by the Civil Aviation Authority with the co-operation of airports and Airport Coordination Ltd.
- 2 The figures cover both arrivals and departures aggregated, except in the case of the Full Analysis with Arrival – Departure Split. In this table, arrivals and departures are stated separately.
- 3 Actual times of operation are derived from the flight by flight air transport movement returns made by airports to the CAA. The planned times supplied by Airport Coordination Ltd include changes made up to 30 minutes before operation.
- 4 Only obvious mismatches between the two sources have been reconciled.
- 5 When the two sets of data are matched, if an airline appears to operate a series of flights significantly “off slot”, the Data Collection-Flight Data Team will substitute information from published timetables (where such are available) in place of the ACL slot data.
- 6 Prior to April 1998, Luton planned times of operation were taken from daily flight plans provided by the airport. These were completed before the week in question and, therefore, did not reflect any changes to the plan made at short notice.
- 7 Because the planned time of operation relates to the arrival/departure at the stand, whilst the actual time of operation relates to wheels on/off the runway, the following taxi time assumptions have been built in following information provided by Airport Coordination Ltd or the airport.

		Until end 2008	From 2009		Until end 2008	From 2009
Heathrow	Arrivals Departures	10 minutes (i) 20 minutes (i)	10 minutes (i) 25 minutes (i)	Birmingham	0 Arrivals (iii) 0 Departures (iii)	0 Arrivals (iii) 0 Departures (iii)
Gatwick	Arrivals Departures	10 minutes (i) 15 minutes (ii)	10 minutes (i) 17 minutes (i), (ii)	Glasgow	5 Arrivals 10 Departures	7 Arrivals 10 Departures
Stansted	Arrivals Departures	5 minutes 10 minutes	10 minutes 13 minutes	Edinburgh	5 Arrivals 10 Departures	8 Arrivals 10 Departures

Doncaster Sheffield	Arrivals Departures	7 minutes 7 minutes	Southampton	Arrivals Departures	7 minutes 9 minutes

- (i) No account is taken of the different taxi-ing times associated with the terminal building used.
- (ii) Prior to October 2003 Gatwick recorded the departure time from the stand.
- (iii) Birmingham Airport and Belfast International record actual time of operation as arrival/departure at the stand.
- (iv) A general review of the taxi times was undertaken during 2008, and the amendment values were implemented wef January 2009 (see table above). For comparison purpose 2008 data shown in 2009 tables have been re-calculated using this new taxi-times.

- 8 The number of unmatched actual flights represented those air transport movements which actually took place at the airport but for which no corresponding planned flight was found. The reason for this would normally be:
- (a) the flight was a diversion from another airport;

- (b) the flight was not recorded with Airport Coordination Ltd or airport (see notes 4 and 5);
 - (c) the flight was a short-haul more than one hour before the planned time;
 - (d) the flight was planned to take place in the previous month;
 - (e) the planned time or the air transport movement record contained an incorrectly reported item data causing the flight not to match.
- 9 The number of unmatched planned flights represents those Airport Coordination Ltd or airport flights planned (see notes 4 and 5) for which a corresponding Air Transport Movement return has been found. The reason for those would normally be;
- (a) the flight was diverted to another airport;
 - (b) the flight was cancelled;
 - (c) planned time was for a short haul flight more than one hour after flight;
 - (d) the flight took place in the following month;
 - (e) either the planned time or the air transport movement record contained an incorrectly reported item of data causing it not to match.
- 10 With effect from January 2000 data month, early flights are set to zero delay. Prior to this, an early flight will show a negative delay. This will affect the 'average delay' column. Average delays from January 2000 onwards should not be compared to average delays prior to January 2000. Tables for January to December 2000 inclusive do not include columns relating to the corresponding month the previous year for this season. These tables should also not be compared with previously published tables.
- 11 Route - airline combinations are only shown where there is more than one match flight. However, lines omitted for this reason will still be included in total figures. For this reason, the totals shown may not always exactly match the data in the table.
- 12 All-cargo services and air taxi services are excluded from the analysis.
- 13 Positioning, private, corporate, military, local and other non air transport movements are excluded from the analysis.
- 14 Figures for domestic shuttle services should be treated with caution. Only the main flights are notified to Airport Coordination Ltd. Back-up flights are not and are therefore recorded as unmatched actual flights.

- 15 Flight are allocated to airlines according to the flight prefix of the service. Therefore, in the case of a sub-charter service, the flight is shown against the airline commercially responsible for the eservice. In the case of franchise operations, the service is recorded against the operating carrier.
- 16 The aircraft origin/destination represents the final point on the service. An aircraft serving more than one point on the route is therefore shown once only in the tables.
- 17 Some domestic routes listed in this publication may be domestic sectors of the international service.
- 18 Flights between any two of the ten airports (e.g. Heathrow-Manchester) are counted twice.
- 19 Care should be taken in comparing the average delays during the current year, with the average delays during the previous year. The number of flights may change from one year to the next, and the average may also be calculated on a small number of flights in either year.
