# Foreword

## 1 CONTENT

- 1.1 *CAA Monthly Statistics* is prepared by the Civil Aviation Authority with the co-operation of the United Kingdom airport and airline operators; some of this information is required by the Civil Aviation Act, 1971. Statistics for the Channel Islands airports are provided by the Commandant for Jersey Airport and the Office of the Lieutenant Governor for Guernsey and Alderney Airports. The assistance from all these authorities is gratefully acknowledged.
- 1.2 Some of the figures included in *CAA Monthly Statistics* are provisional only and may be revised in later issues. Figures contained in monthly and quarterly tables have not been seasonally adjusted, but figures are given, in the tables covering past years, for the most recent six months and the corresponding six months one year earlier.

## 2 CONVENTIONS

- 2.1 **Symbols and Abbreviations** The following are used throughout:

+	=	UK Customs airport
—	=	nil or less than half the final digit shown
..	=	not available
n.e.i.	=	not elsewhere included
a.t-km	=	available tonne-kilometres

A.T. Movements = Air Transport Movements

- 2.2 **Rounding of Figures** In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

- 2.3 **Units of Measurement** Metric measurements are used throughout *CAA Monthly Statistics*
- |                  |   |   |
|------------------|---|---|
| Tonne            | = | 1000 kilogrammes  |
| Tonne-kilometres | = | The product obtained by multiplying the number of tonnes carried by the distance flown measured in kilometres |

Conversion factors (foot/pound system to metric system)

1 short ton (2000 lbs)	=	0.9072 tonnes
1 ton (2240 lbs)	=	1.0160 tonnes
1 statute mile (5280 feet)	=	1.6093 kilometres
1 short ton-mile	=	1.4600 tonne-kilometres

The explanations of other terms used throughout the Tables are contained in the section on Definitions immediately following the Tables.

## 3 ENQUIRIES

- 3.1 **Statistics** Enquiries concerning the information in *CAA Monthly Statistics* should be addressed, according to the subject, as follows:

Airport and Air Passenger Statistics:	Civil Aviation Authority Room 209 Shell Mex House Strand London WC2R 0DP Tel. 01 217 3638
--	--

Airline Statistics:	Civil Aviation Authority Room 622 Aviation House 129 Kingsway London WC2B 6NN Tel. 01 405 6922 Ext. 244
---------------------	--

**3.2 Distribution** Enquiries concerning orders and subscriptions should be addressed to:

Civil Aviation Authority  
Printing and Publication Services  
Greville House  
37 Gratton Road  
Cheltenham  
Glos GL50 2BN

**4 CIVIL AVIATION STATISTICS FOR EARLIER YEARS** Statistics for the period from January 1968 to December 1972 were published in the Civil Aviation Series of the Department of Trade & Industry's *Business Monitors*.

The series comprise:

CA. 1	<i>Airport activity</i>	(Monthly)
CA. 2	<i>Air passengers</i>	"
CA. 3	<i>Air freight &amp; mail</i>	"
CA. 4	<i>Airline operations</i>	"
CA. 5	<i>Airline operations</i>	(Quarterly)
CA. 6	<i>Domestic passenger traffic</i>	"
CA. 7	<i>Air passengers – international and cabotage</i>	"
CA. 8	<i>Airline financial statistics</i>	(Annually – 1968 to 1971 only)

Annual versions of CA. 1 to CA. 7 were also published.

# Civil Aviation Statistics—July 1974

## Activity at UK Airports

UK air transport movements during July 1974 reached a total of almost 74 000, 2.5 per cent less than in July 1973. Over the three month period May to July almost 69 000 movements were recorded, and this represents a 1.5 per cent decline against the corresponding period of 1973. Whilst the London area airports again reported an aggregate decline between these two periods (5.2 per cent) the rest of the UK airports reported a combined growth of 2.6 per cent. Each of the London area airports recorded a decline in actual movements, that at Luton being the largest (881 less movements per month; 27.4 per cent decline) followed by Heathrow (493 movements; 2.0 per cent decline), Southend (394 movements; 24.7 per cent decline), Gatwick (114 movements; 1.6 per cent decline) and Stansted (51 movements; 15.8 per cent decline). Aberdeen recorded the greatest growth in actual movements (1 066 additional movements per month; 144.8 per cent growth) and Sumburgh followed with 763 additional movements, a growth rate of nearly 200 per cent. Inverness reported the third greatest increase in actual movements (181 additional movements; 42.7 per cent growth) and Manchester the heaviest actual decline (377 movements less, 8.1 per cent decline). The 1.5 per cent decline in ATMs in the period May–July 1974 compared with 1973 comprised a marginal growth in scheduled movements against a 9.2 per cent decline in charter movements. The UK operators' share of scheduled traffic dropped marginally to 74.7 per cent whilst their share of charter traffic increased 2.4 percentage points to 86.2 per cent.

Almost 4.5 million terminal passengers used UK airports during July 1974 and a monthly average of just over 3.9 million over the three month period May–July. Both of these figures represent a decline on 1973, the former by 10 per cent and the latter by 8.9 per cent. Passengers handled both within the London area and over the rest of the UK declined by 10.0 per cent between July 1973 and July 1974. During the May–July period 1974 compared with a year earlier passengers at London area airports declined overall by 9.1 per cent, and with the exception of Stansted (11.3 per cent growth) each individual airport recorded a decline. Luton reported the greatest drop in actual passengers (122 205 less per month; 35.3 per cent decline) followed by Heathrow (75 800 less passengers; 3.9 per cent decline), Gatwick (56 656 less passengers; 9.8 per cent decline) and Southend (15 822 less passengers; 36.3 per cent decline). The aggregate decline over the rest of the UK was 8.3 per cent over the same period. Aberdeen reported the greatest actual increase in passengers (15 810 additional passengers per month; 64.2 per cent growth) and Sumburgh the greatest percentage growth (7 444 passengers; 102.3 per cent growth). The decline of 86.8 per cent at Coventry was the largest recorded during this period.

Over the May–July 1974 period scheduled service passengers declined by 3.6 per cent and charter passengers by 21.3 per cent compared with the same period in 1973. The UK operators' share of scheduled service passengers declined 1.6 percentage points to 66.4 per cent and their share of charter passengers increased marginally to 82.4 per cent.

Of the monthly average of 3.9 million passengers who travelled by air during the period May–July 1974 2.8 million flew on international routes (10.6 per cent less than over the corresponding period 1973) and 1.1 million on domestic routes (6.5 per cent less). Of the international passengers 1.8 million flew by scheduled services (3.6 per cent less than over the corresponding period 1973) and 1.0 million by charter services (22.2 per cent less). The most important routes, in terms of scheduled passengers carried, continued to be those to the USA with 14.0 per cent of total (12.5 per cent decline) followed by those to France with 13.0 per cent (10.0 per cent decline), those to the Irish Republic with 8.2 per cent (3.4 per cent decline). Routes to Spain again carried the highest proportion of charter passengers (41.4 per cent) but their number declined 21.8 per cent against the corresponding period of 1973. Services to Italy carried 11.1 per cent (25.0 per cent decline) followed by those to Canada with 6.6 per cent of total charter passengers (15.4 per cent decline). Between May and July a monthly average of just under 650 000 travelled on domestic routes – 3.9 per cent less than 1973. With the exception of Channel Island services (1.7 per cent growth) each of the main route groupings again experienced a decline in passengers; London routes by 4.1 per cent, Belfast routes by 7.5 per cent, Edinburgh routes by 2.2 per cent, Glasgow routes by 6.4 per cent, and Isle of Man routes by 13.7 per cent.

The volume of air cargo handled at UK airports during July 1974 was over 59 000 tonnes, 1.6 per cent more than in July 1973. Over the May–July period the monthly average number of tonnes handled was 62 000; a 6.9 per cent growth on 1973. London area airports reported a combined growth of 7.4 per cent over this period. Heathrow reported the greatest actual increase in tonnes handled (1972 additional tonnes per month; 5.1 per cent growth) followed by Gatwick (1 166 tonnes; 37.0 per cent growth) and Stansted (501 tonnes; 46.4 per cent growth). Southend was alone in recording a decline in tonnage handled of 16.1 per cent. Over the rest of the UK an aggregate growth of 5.1 per cent was achieved. Manchester handled the greatest increase in actual tonnage (412 additional tonnes per month; 11.9 per cent growth) followed by Bournemouth (165 tonnes; 75.8 per cent growth) and Aberdeen (150 tonnes; 162.9 per cent growth). The 6.9 per cent growth in freight at UK airports comprised a 3.0 per cent growth in carryings by scheduled operators and

46.8 per cent growth in carryings by charter operators. The UK operators' share of scheduled tonnage declined by 3.6 percentage points to 47.6 per cent and their share of charter tonnage by 16.2 per cent to 61.1 per cent.

#### **Output of UK Airlines**

The output of UK airlines for all services in July 1974 was 832 million available tonne-kilometres, a decline of nearly 4.5 per cent on July 1973.

The scheduled service output of 540 million available tonne-kilometres was 0.1 per cent less than a year earlier. The overall load factor of 54.7 was slightly less than the 54.9 per cent achieved in July 1973. Seat kilometres used were 60.1 per cent of those available compared with 61.7 per cent a year earlier. Seat factors on domestic and international scheduled services were

63.9 and 59.8 per cent respectively compared with 68.4 and 61.0 in July 1973.

The non-scheduled output in July 1974 was nearly 292 million available tonne-kilometres, a decline of nearly 12 per cent on July 1973. Advance Booking charters and Inclusive Tour charters accounted for 54.2 and 125.4 million available tonne-kilometres respectively, compared with 44.3 and 156.0 million in July 1973.

NOTE: Statistics of airport activity, passengers and cargo are derived from data supplied by airports. Airline statistics are based on data supplied by the airlines. Data from the two sources is not strictly comparable. There are small differences in timing and more significant differences arise because airlines are not asked to report non-revenue passengers and cargo.

# Size Structure of UK

**London** includes Heathrow, Gatwick and Stansted.

**S.E. England** includes Ashford, London, Luton, Lydd, Manston and Southend.

**N. England** comprises the airports in England north of a line from the Mersey to the Humber (Manchester, Liverpool, Blackpool, Newcastle, Leeds/Bradford and Tees-side).

**Glasgow** includes Prestwick and Abbotsinch.

(a) N. France comprises the airports north of the line of 49° latitude.

(b) Soviet Union and Eastern Europe includes the United Soviet Socialist Republics, Bulgaria, Czechoslovakia, Hungary, Poland, Roumania and the Eastern Zone of Germany but excluding Berlin.

(c) North Africa includes Algeria, Libya, Morocco and Tunisia.

(d) Commonwealth countries only.

(e) Commonwealth countries including Rhodesia.

(f) Middle East includes Iraq, Iran, Israel, Jordan, Lebanon, Persian Gulf States, Saudi Arabia, Sudan and the United Arab Republic.

(g) Total is in respect of charter passengers only. Passengers on scheduled flights included in London – Other Italy.

(h) Total is in respect of charter passengers only. Passengers on scheduled flights included in other routes to Italy.

The figures show the uplift and discharge of passengers at United Kingdom airports on services operated there according to their immediate destination or last point of embarkation overseas on those services. These may not, in all cases, be the origin or destination of passenger journeys: they may be places at which a journey was broken or a connection made with another air service. The figures in this table include all passengers carried on scheduled and charter services excluding those carried on aircraft chartered by Government Departments.

# Domestic Passengers by Main Routes

(a) Heathrow, Gatwick and Stansted

(b) 'Glasgow' includes Prestwick and Abbotsinch.

Traffic counted in either direction.

The figures show the uplift and discharge of passengers according to the destination and origin of the route. Because of the method of collection of this information there are discrepancies between the reports received from airports on a route, particularly in the case of multi-sector flights. In most cases, however, the discrepancies are small, but in a few cases the figures include an estimated component.

Cargo by Type and Nationality of Operator July 1974

# Operations Subject to Variable Charge<sup>†</sup> by Type of Licence, and Non-chargeable Operations July 1974

**Table 32**

Type of Licence or Service	Tonne-km available (000)	Total (000)	Tonne-kilometres used Cargo (000)	Passengers (000)	As percentage of available
<b>Chargeable Operations (Own Aircraft)</b>					
Class 1	538 441	294 608	71 417	223 191	54.7
Class 2	54 193	37 774	—	37 774	69.7
Class 3	125 289	99 730	—	99 730	79.6
Class 4	34 096	25 333	—	25 333	74.3
Class 5	14 548	11 212	6 162	5 050	77.1
Class 6	24 364	16 105	16 105	—	66.1
Class 7	26 661	13 677	11 507	2 170	51.3
<b>TOTAL</b>	<b>817 592</b>	<b>498 439</b>	<b>105 191</b>	<b>393 248</b>	<b>60.9</b>
<b>Non-chargeable Operations</b>					
Aircraft hired from Foreign Operators	1 712	922	826	96	53.8
Exempt Services	12 438	7 539	1 101	6 438	60.6
<b>TOTAL</b>	<b>14 150</b>	<b>8 461</b>	<b>1 927</b>	<b>6 534</b>	<b>59.8</b>
<b>GRAND TOTAL</b>	<b>831 742</b>	<b>506 900</b>	<b>107 118</b>	<b>399 782</b>	<b>60.9</b>

<sup>†</sup> Variable charges can be made against only those licences issued under the revised system that came into effect on 1 January 1974; immediate conversion to the revised system did not take place in all cases. In the table above activities that continued under old-style licences have been included under the equivalent revised licence classes; for example, activity under Class A licences has been listed under Class 1, but were not in fact chargeable.

## Output by Type of Licence and Aircraft Ownership July 1974

# Definitions

## AIRPORT ACTIVITY

<b>An air transport movement</b>	is a landing or a take-off of an aircraft engaged on commercial air transport. The types of movement covered are all scheduled service movements, whether loaded or empty, and charter movements transporting passengers or cargo from one point to another. All other types of commercial flying are excluded (e.g. flights returning to the airport of take-off without landing elsewhere, empty charter positioning flights paid for by the charterer, ferrying of empty aircraft, etc.).
<b>Empty charter positioning flights</b>	are flights by chartered aircraft moving into position for transport flights or returning to base after such flights.
<b>Other commercial flights</b>	are miscellaneous non-transport charter flights (e.g. commercial delivery or ferry of empty aircraft and local flights for the Press, survey companies or farmers).
<b>Test and training flights</b>	are flights for the purpose of testing aircraft or airports, or for training flying crew or ground personnel. Also included in this category are demonstration flights by makers or sellers of aircraft and aviation equipment. Aero-club instructional flights are excluded from this category and shown under 'Aero-club'.
<b>Other non-commercial flights</b>	by air transport operators are flights by air transport operators for the sole purpose of moving their own aircraft, personnel or stores from one place to another, and air transport flights forced to return to base by bad weather, engine failure or other causes.
<b>Private flights</b>	are flights for purely private purposes by private owners or other private aircraft operators, excluding aero-club flights.
<b>Aero-club flights</b>	are flights operated by aero-club members for instruction or pleasure.
<b>Official flights</b>	are flights for official purposes by British or foreign civil Government Departments excluding air transport movements.
<b>Military flights</b>	are flights by British or foreign military personnel exclusively for military purposes.

## AIR PASSENGERS

<b>Passengers</b>	includes all revenue and non-revenue passengers on air transport flights. Air crew being carried on such flights other than as members of the aircraft's complement are classified as non-revenue passengers.
<b>Revenue passengers</b>	are those who pay 25 per cent or more of the normal applicable fare.
<b>A terminal passenger</b>	is a passenger joining or leaving the aircraft flight at the reporting airport. A passenger travelling between two reporting airports is counted twice, once at each airport.
<b>A transit passenger</b>	is a passenger who arrives at and departs from a reporting airport on the same aircraft which is transitting the airport. Each transit passenger is counted once only and not once on arrival and once on departure.

<b>International services</b>	are services flown between the United Kingdom (including Great Britain, Isle of Man, Channel Islands and Northern Ireland) and places outside.
<b>Domestic services</b>	are services flown entirely within Great Britain, Isle of Man, Channel Islands and Northern Ireland.
<b>Cabotage</b>	is traffic carried between territories of the United Kingdom other than domestic services.
<b>Scheduled services</b>	are those performed according to a published timetable, including those supplementary thereto, and open to use by members of the public.
<b>Non-scheduled services</b>	include all air transport flights other than scheduled services.
<b>Charter services</b>	are those transporting passengers or cargo for hire or reward from one point to another, other than scheduled services.

## AIR CARGO

**Cargo** in airport statistics means the weight of cargo (including accompanied vehicles) picked up and set down by aircraft on air transport flights. Cargo in transit through the airport on the same aircraft is excluded as is mail, company stores, excess baggage and diplomatic bags picked up and set down. (See also definition below under 'Airline Operations').

**Tonnes** are metric tonnes of 1 000 kilogrammes (2 204.62 lb).

## AIRLINE OPERATIONS

**Advance booking charters (ABC)** Charter flights operated under Class 2 licences between the UK and designated territories overseas in respect of which an operator has sold blocks of seats to one or more licensed travel organisers for resale to passengers. Details of the sales to travel organisers have to be notified to the Civil Aviation Authority 120 days before the date of the flight: details of the sales of seats to passengers which must be on a round trip basis have to be notified to the Authority 60 days before departure.

**Aircraft-hour** an aircraft hour is performed when an aircraft flies for one hour: aircraft hours are measured on the basis of block-to-block time.

**Aircraft-kilometre (Aircraft-km)** An aircraft-kilometre is performed when an aircraft flies one kilometre. Aircraft-kilometres equal the sum of the products obtained by multiplying the number of flights performed on each stage flight by the stage distance measured in kilometres.

**Cargo** in airline statistics means the weight of any property carried on an aircraft, including the weight of vehicles carried, mail and diplomatic bags, but excluding passengers' baggage. (See also definition above for 'Air Cargo' statistics and definition below for 'Passenger tonne-kilometres').

**Cargo tonne-km** means a metric tonne of cargo carried one kilometre. Cargo tonne-kilometres equal the sum of products obtained by multiplying the number of tonnes of cargo carried on each flight stage by the stage distance measured in kilometres.

<b>Cargo uplifted</b>	means the number of tonnes of cargo which is obtained by counting each tonne of cargo on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight. The only exception to this is for cargo flown on both the international and domestic stages of the same flight which is considered in computation both as a domestic and an international shipment or despatch.
<b>Daily utilisation per a/c (hrs)</b>	is an average per aircraft measure computed by dividing the aircraft hours of use by the number of days on which the aircraft are available. This latter figure includes days required for maintenance and overhaul but it does not include days between the date of purchase and the date actually placed in service, days out of service due to major accidents or conversion, days when an aircraft is in the possession of others or is not available because of government action, such as grounding by government order.
<b>Exempt operations</b>	are operations for which a licence is not required. The Civil Aviation Authority in pursuance of its powers under paragraph (a) of Section 21(2) of the Civil Aviation Act 1971 has by an instrument dated 29 March 1972 and later instruments specified a number of types of flights for which a licence is not required. The specifications of such flights are published in the Authority's Official Record Series 1 but typical examples are ambulance flights, aircrew training and test flights, Government charters, helicopters carrying externally suspended loads, etc.
<b>Inclusive tours (IT)</b>	are separate fare charters where the cost to the passenger includes the cost of accommodation.
<b>Licence</b>	means an air transport licence granted under Section 22 of the Civil Aviation Act 1971.
<b>Mail</b>	covers only that handled by postal administrations and includes troop mail.
<b>Mail tonne-km</b>	are calculated using the same principle as when calculating cargo tonne-km.
<b>Overall load factor</b>	is an expression of tonne-km used as a percentage of tonne-km available.
<b>Passengers</b>	in airline statistics means revenue passengers only, i.e. passengers paying 25 per cent or more of the normal fare.
<b>Passenger-km</b>	means a passenger carried one kilometre. Calculation of passenger-kilometre equals the sum of the products obtained by multiplying the number of passengers carried on each flight stage by the stage distance measured in kilometres. The resultant figure is equal to the number of kilometres travelled by all passengers. Note.—Passenger-km is numerically equivalent to Seat-km used.
<b>Passenger load factor</b>	is an expression of seat-km used as a percentage of seat-km available.
<b>Passengers uplifted and passengers carried</b>	The number of passengers uplifted is obtained by counting each revenue passenger on a particular flight (with one flight number) once only and not repeatedly on each individual stage of flight.
<b>Passenger tonne-kilometres</b>	is deduced as the difference between the total tonne-kilometres used and tonne-kilometres used for cargo and/or mail; it includes the weight of passengers' free and excess baggage.

<b>Seat-km available</b>	a seat-kilometre is available when a seat is flown one kilometre. Seat-kms available are equal to the sum of the products obtained by multiplying the number of passenger seats available for sale on each stage flight by the stage distance measured in kilometres.
<b>Seat-km used</b>	a seat-kilometre is used when a seat occupied by a revenue passenger is flown for one kilometre. Seat-km used is equal to the sum of the products obtained by multiplying the number of revenue passengers carried on each stage flight by the stage distance measured in kilometres.
<b>Separate fare charters</b>	are those where the charterer re-sells part of the capacity of the aircraft to the public at large; an organisation, etc.
<b>Sole-use charters</b>	are those where the charterer has exclusive use of the whole capacity of the aircraft and does not dispose of any of it to third persons for reward.
<b>Stage flights</b>	that part of the flight between two consecutive places, i.e. from take-off to the next landing, excluding technical stops, on the route.
<b>Tonne-km available</b>	a metric tonne of payload space available flown one kilometre. Tonne-km available is equal to the sum of the products obtained by multiplying the number of tonnes available for the carriage of revenue load (passengers and cargo) on each stage flight by the distance measured in kilometres.
<b>Tonne-km used</b>	a metric tonne of revenue load carried one kilometre. Tonne-km used is the sum of the products obtained by multiplying the number of tonnes of revenue load (passengers and cargo) carried on each stage flight by the distance measured in kilometres.

# Classes of Licence

**NB** These definitions are not intended as a comprehensive statement of each type of licence. They define the general purpose of the types of flights authorised by each class of licence. The specification for each class of licence is published in the Civil Aviation Authority Official Record Series 1.

**Class 1** authorises scheduled service flights;

**Class 2** authorises advance booking charter flights;

**Class 3** authorises inclusive tour charter flights;

**Class 4** authorises other charter flights for the carriage of passengers;

**Class 5** authorises substitute charter flights;

**Class 6** authorises charter flights for the carriage of cargo and attendants;

**Class 7** authorises sole-use charter flights.
