Foreword

1 CONTENT

- 1.1 *CAA Monthly Statistics* is prepared by the Civil Aviation Authority with the co-operation of the United Kingdom airport and airline operators; some of this information is required by the Civil Aviation Act, 1971. Statistics for the Channel Islands airports are provided by the Commandant for Jersey Airport and the Office of the Lieutenant Governor for Guernsey and Alderney Airports. The assistance from all these authorities is gratefully acknowledged.
- 1.2 Some of the figures included in *CAA Monthly Statistics* are provisional only and may be revised in later issues. Figures contained in monthly and quarterly tables have not been seasonally adjusted, but figures are given, in the tables covering past years, for the most recent six months and the corresponding six months one year earlier.

2 CONVENTIONS

- 2.1 **Symbols and Abbreviations** The following are used throughout:

+	= UK Customs airport
..	= not available
—	= nil or less than half the final digit shown
n.e.i.	= not elsewhere included
a.t-km	= available tonne-kilometres

A.T. Movements = Air Transport Movements

- 2.2 **Rounding of Figures** In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

- 2.3 **Units of Measurement** Metric measurements are used throughout *CAA Monthly Statistics*.

Tonne	= 1000 kilograms
Tonne-kilometres	= The product obtained by multiplying the number of tonnes carried by the distance flown measured in kilometres

Conversion factors (foot/pound system to metric system)

1 short ton (2000 lbs)	= 0.9072 tonnes
1 ton (2240 lbs)	= 1.0160 tonnes
1 statute mile (5280 feet)	= 1.6093 kilometres
1 short ton-mile	= 1.4600 tonne-kilometres

The explanations of other terms used throughout the Tables are contained in the section on Definitions immediately following the Tables.

3 ENQUIRIES

- 3.1 **Statistics** Enquiries concerning the information in *CAA Monthly Statistics* should be addressed, according to the subject, as follows:

Airport and Air Passenger Statistics: Civil Aviation Authority
Room 209
Shell Mex House
Strand
London WC2R 0DP
Tel. 01 217 3638

Airline Statistics: Civil Aviation Authority
Room 622
Aviation House
129 Kingsway
London WC2B 6NN
Tel. 01 405 6922 Ext. 244

3.2 **Distribution** Enquiries concerning orders and subscriptions should be addressed to:

Civil Aviation Authority
Printing and Publication Services
Greville House
37 Gratton Road
Cheltenham
Glos GL50 2BN

4 **CIVIL AVIATION STATISTICS FOR EARLIER YEARS** Statistics for the period from January 1968 to December 1972 were published in the Civil Aviation Series of the Department of Trade & Industry's *Business Monitors*.

The series comprise:

CA. 1	<i>Airport activity</i>	(Monthly)
CA. 2	<i>Air passengers</i>	"
CA. 3	<i>Air freight & mail</i>	"
CA. 4	<i>Airline operations</i>	"
CA. 5	<i>Airline operations</i>	(Quarterly)
CA. 6	<i>Domestic passenger traffic</i>	"
CA. 7	<i>Air passengers – international and cabotage</i>	"
CA. 8	<i>Airline financial statistics</i>	(Annually – 1968 to 1971 only)

Annual versions of CA. 1 to CA. 7 were also published.

Civil Aviation Statistics—December 1974

Activity at UK Airports

At a total of nearly 50 000 air transport movements in December 1974 were 7·1 per cent higher than in December 1973. London area airports recorded an increase of 1·6 per cent and airports in the rest of the UK an increase of 14·2 per cent. Comparing the October–December quarter of 1974 with a year earlier London area airports showed a decline of 3·3 per cent and the rest of the UK showed an increase of 6·1 per cent, the national figure being an increase of 1·0 per cent. Air transport movements at Heathrow and Stansted during the fourth quarter of 1974 were slightly higher than a year earlier but those at Luton were 47·6 per cent lower and at Southend and Gatwick they were 18·9 and 5·9 per cent lower respectively. In the rest of the UK Aberdeen and Sumburgh again recorded large increases while Glasgow recorded the highest decline. The number of terminal passengers handled at UK airports in December 1974 was over 2·5 million – 6·0 per cent less than in December 1973. There were 7·1 fewer passengers handled at London area airports and 3·2 per cent fewer in the rest of the UK. In the fourth quarter of 1974 the decline nationally was 8·0 per cent compared with a year earlier, the London area airports handling 8·4 per cent fewer terminal passengers and airports in the rest of the UK 7·1 per cent fewer. All the London area airports except Stansted reported a decline; Luton 50·2 per cent, Southend 29·3 per cent, Gatwick 16·8 per cent and Heathrow 1·3 per cent. In the rest of the UK Aberdeen and Sumburgh again led those airports recording a higher number of terminal passengers, while Glasgow, Manchester, Birmingham and Belfast all recorded fewer terminal passengers. A monthly average of over 2·8 million passengers used UK airports in the fourth quarter of 1974, 8·0 per cent less than a year earlier. A little under 2 million travelled on international services and 850,000 on domestic services. France, the USA and the Netherlands were again the most important scheduled service markets – with 12·6, 12·1 and 8·5 per cent of the total respectively. Spain continued to be the most important charter market with 46·1 per cent of the total (but with a decline of 33·1 per cent in the number of passengers) followed by Italy and West Germany. Of domestic

routes the Channel Islands and Isle of Man routes showed increases of 12·7 per cent and 8·6 per cent respectively over 1973 while the London, Belfast and Glasgow routes all recorded fewer passengers.

The amount of cargo handled at UK airports in December 1974 – over 54 600 tonnes – was 6·3 per cent less than a year earlier. London area airports handled 3·0 per cent less and other airports 17·0 per cent less. Figures for the fourth quarter of 1974 revealed a national decline of 2·8 per cent comprising a 3·2 per cent decline at the London area airports and a 1·3 per cent decline elsewhere. Gatwick was the only London area airport recording an increase in this quarter. Elsewhere in the UK Belfast and Aberdeen were among the airports handling more cargo, and Prestwick and Manchester among those handling less.

Output of UK Airlines

The output of UK airlines for all services in December 1974 was 663 million available tonne-kilometres, a decrease of 2·5 per cent on December 1973.

The scheduled service output of nearly 490 million available tonne-kilometres was 2·9 higher than a year earlier. The overall load factor of 57·9 per cent compared with 61·0 per cent in December 1973. Seat kilometres used were 58·8 per cent of those available compared with 64·1 per cent the previous year. Seat factors on domestic and international scheduled services were 58·0 and 58·8 per cent respectively compared with 66·5 and 63·9 per cent in December 1973. The non-scheduled output of over 173 000 million available tonne-kilometres was 15·1 per cent less than a year earlier. Advance Booking Charters and Inclusive Tour Charters accounted for 10 and 44 million available tonne-kilometres respectively compared with 4 and 72 million in December 1973.

NOTE: Statistics of airport activity, passengers and cargo are derived from data supplied by airports. Airline statistics are based on data supplied by the airlines. Data from these two sources are not strictly comparable. There are small differences in timing and more significant differences arise because airlines are not asked to report non-revenue passengers and cargo.

Size Structure of UK Airports and Airlines Year ended 31 December 1974

The above figures are derived from airport statistics.

(a) Excluding passengers to and from the Irish Republic.

(b) Passengers to and from North Africa and Middle East countries have been attributed to the European continent and Mediterranean Sea area.

(c) Commonwealth countries only.

(d) Oil rigs not included.

London includes Heathrow, Gatwick and Stansted.

S.E. England includes Ashford, London, Luton, Lydd, Manston and Southend.

N. England comprises the airports in England north of a line from the Mersey to the Humber (Manchester, Liverpool, Blackpool, Newcastle, Leeds/Bradford and Tees-side).

Glasgow includes Prestwick and Abbotscinch.

- (a) N. France comprises the airports north of the line of 49° latitude.
- (b) Soviet Union and Eastern Europe includes the United Soviet Socialist Republics, Bulgaria, Czechoslovakia, Hungary, Poland, Roumania and the Eastern Zone of Germany but excluding Berlin.
- (c) North Africa includes Algeria, Libya, Morocco and Tunisia.
- (d) Commonwealth countries only.
- (e) Commonwealth countries including Rhodesia.
- (f) Middle East includes Iraq, Iran, Israel, Jordan, Lebanon, Persian Gulf States, Saudi Arabia, Sudan and the United Arab Republic.
- (g) Total is in respect of charter passengers only. Passengers on scheduled flights included in London — Other Italy.
- (h) Total is in respect of charter passengers only. Passengers on scheduled flights included in other routes to Italy.

The figures show the uplift and discharge of passengers at United Kingdom airports on services operated there according to their immediate destination or last point of embarkation overseas on those services. These may not, in all cases, be the origin or destination of passenger journeys: they may be places at which a journey was broken or a connection made with another air service. The figures in this table include all passengers carried on scheduled and charter services excluding those carried on aircraft chartered by Government Departments.

Domestic Passengers by Main Routes

(a) Heathrow, Gatwick and Stansted.

Traffic counted in either direction.

The figures show the uplift and discharge of passengers according to the destination and origin of the route. Because of the method of collection of this information there are discrepancies between the reports received from airports on a route, particularly in the case of multi-sector flights. In most cases, however, the discrepancies are small, but in a few cases the figures include an estimated component.

GRAND TOTAL	662 680	403 652	131 138	272 517	60·9

[†] Variable charges can be made against only those licences issued under the revised system that came into effect on 1 January 1974; immediate conversion to the revised system did not take place in all cases. In the table above activities that continued under old style licences have been included under the equivalent revised licence classes; for example, activity under Class A licences has been listed under Class 1 but was not in fact chargeable.

Appendix A Definitions

AIRPORT ACTIVITY

An air transport movement	is a landing or a take-off of an aircraft engaged on commercial air transport. The types of movement covered are all scheduled service movements, whether loaded or empty, and charter movements transporting passengers or cargo from one point to another. All other types of commercial flying are excluded (e.g. flights returning to the airport of take-off without landing elsewhere, empty charter positioning flights paid for by the charterer, ferrying of empty aircraft, etc.).
Empty charter positioning flights	are flights by chartered aircraft moving into position for transport flights or returning to base after such flights.
Other commercial flights	are miscellaneous non-transport charter flights (e.g. commercial delivery or ferry of empty aircraft and local flights for the Press, survey companies or farmers).
Test and training flights	are flights for the purpose of testing aircraft or airports, or for training flying crew or ground personnel. Also included in this category are demonstration flights by makers or sellers of aircraft and aviation equipment. Aero-club instructional flights are excluded from this category and shown under 'Aero-club'.
Other non-commercial flights	by air transport operators are flights by air transport operators for the sole purpose of moving their own aircraft, personnel or stores from one place to another, and air transport flights forced to return to base by bad weather, engine failure or other causes.
Private flights	are flights for purely private purposes by private owners or other private aircraft operators, excluding aero-club flights.
Aero-club flights	are flights operated by aero-club members for instruction or pleasure.
Official flights	are flights for official purposes by British or foreign civil Government Departments excluding air transport movements.
Military flights	are flights by British or foreign military personnel exclusively for military purposes.

AIR PASSENGERS

Passengers	includes all revenue and non-revenue passengers on air transport flights. Air crew being carried on such flights other than as members of the aircraft's complement are classified as non-revenue passengers.
Revenue passengers	are those who pay 25 per cent or more of the normal applicable fare.
A terminal passenger	is a passenger joining or leaving the aircraft flight at the reporting airport. A passenger travelling between two reporting airports is counted twice, once at each airport.
A transit passenger	is a passenger who arrives at and departs from a reporting airport on the same aircraft which is transiting the airport. Each transit passenger is counted once only and not once on arrival and once on departure.

International services	are services flown between the United Kingdom (including Great Britain, Isle of Man, Channel Islands and Northern Ireland) and places outside.
Domestic services	are services flown entirely within Great Britain, Isle of Man, Channel Islands and Northern Ireland.
Cabotage	is traffic carried between territories of the United Kingdom other than domestic services.
Scheduled services	are those performed according to a published timetable, including those supplementary thereto, and open to use by members of the public.
Non-scheduled services	include all air transport flights other than scheduled services.
Charter services	are those transporting passengers or cargo for hire or reward from one point to another, other than scheduled services.

AIR CARGO

Cargo	in airport statistics means the weight of cargo (including accompanied vehicles) picked up and set down by aircraft on air transport flights. Cargo in transit through the airport on the same aircraft is excluded as is mail, company stores, excess baggage and diplomatic bags picked up and set down. (See also definition below under 'Airline Operations').
Tonnes	are metric tonnes of 1 000 kilograms (2 204·62 lb).

AIRLINE OPERATIONS

Advance booking charters (ABC)	Charter flights operated under Class 2 licences between the UK and designated territories overseas in respect of which an operator has sold blocks of seats to one or more licensed travel organisers for resale to passengers. Details of the sales to travel organisers have to be notified to the Civil Aviation Authority 120 days before the date of the flight: details of the sales of seats to passengers which must be on a round trip basis have to be notified to the Authority 60 days before departure.
Aircraft-hour	an aircraft hour is performed when an aircraft flies for one hour: aircraft hours are measured on the basis of block-to-block time.
Aircraft-kilometre (Aircraft-km)	An aircraft-kilometre is performed when an aircraft flies one kilometre. Aircraft-kilometres equal the sum of the products obtained by multiplying the number of flights performed on each stage flight by the stage distance measured in kilometres.
Cargo	in airline statistics means the weight of any property carried on an aircraft, including the weight of vehicles carried, mail and diplomatic bags, but excluding passengers' baggage. (See also definition above for 'Air Cargo' statistics and definition below for 'Passenger tonne-kilometres'.)
Cargo tonne-km	means a metric tonne of cargo carried one kilometre. Cargo tonne-kilometres equal the sum of products obtained by multiplying the number of tonnes of cargo carried on each flight stage by the stage distance measured in kilometres.

Cargo uplifted	means the number of tonnes of cargo which is obtained by counting each tonne of cargo on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight. The only exception to this is for cargo flown on both the international and domestic stages of the same flight which is considered in computation both as a domestic and an international shipment or despatch.
Daily utilisation per a/c (hrs)	is an average per aircraft measure computed by dividing the aircraft hours of use by the number of days on which the aircraft are available. This latter figure includes days required for maintenance and overhaul but it does not include days between the date of purchase and the date actually placed in service, days out of service due to major accidents or conversion, days when an aircraft is in the possession of others or is not available because of government action, such as grounding by government order.
Exempt operations	are operations for which a licence is not required. The Civil Aviation Authority in pursuance of its powers under paragraph (a) of Section 21(2) of the Civil Aviation Act 1971 has by an instrument dated 29 March 1972 and later instruments specified a number of types of flights for which a licence is not required. The specifications of such flights are published in the Authority's Official Record Series 1 but typical examples are ambulance flights, aircrew training and test flights, Government charters, helicopters carrying externally suspended loads, etc.
Inclusive tours (IT)	are separate fare charters where the cost to the passenger includes the cost of accommodation.
Licence	means an air transport licence granted under Section 22 of the Civil Aviation Act 1971.
Mail	covers only that handled by postal administrations and includes troop mail.
Mail tonne-km	are calculated using the same principle as when calculating cargo tonne-km.
Overall load factor	is an expression of tonne-km used as a percentage of tonne-km available.
Passengers	in airline statistics means revenue passengers only, i.e. passengers paying 25 per cent or more of the normal fare.
Passenger-km	means a passenger carried one kilometre. Calculation of passenger-kilometre equals the sum of the products obtained by multiplying the number of passengers carried on each flight stage by the stage distance measured in kilometres. The resultant figure is equal to the number of kilometres travelled by all passengers. Note.—Passenger-km is numerically equivalent to Seat-km used.
Passenger load factor	is an expression of seat-km used as a percentage of seat-km available.
Passengers uplifted and passengers carried	The number of passengers uplifted is obtained by counting each revenue passenger on a particular flight (with one flight number) once only and not repeatedly on each individual stage of flight.
Passenger tonne-kilometres	is deduced as the difference between the total tonne-kilometres used and tonne-kilometres used for cargo and/or mail; it includes the weight of passengers' free and excess baggage.

Seat-km available	a seat-kilometre is available when a seat is flown one kilometre. Seat-kms available are equal to the sum of the products obtained by multiplying the number of passenger seats available for sale on each stage flight by the stage distance measured in kilometres.
Seat-km used	a seat-kilometre is used when a seat occupied by a revenue passenger is flown for one kilometre. Seat-km used is equal to the sum of the products obtained by multiplying the number of revenue passengers carried on each stage flight by the stage distance measured in kilometres.
Separate fare charters	are those where the charterer re-sells part of the capacity of the aircraft to the public at large; an organisation, etc.
Sole-use charters	are those where the charterer has exclusive use of the whole capacity of the aircraft and does not dispose of any of it to third persons for reward.
Stage flights	that part of the flight between two consecutive places, i.e. from take-off to the next landing, excluding technical stops, on the route.
Tonne-km available	a metric tonne of payload space available flown one kilometre. Tonne-km available is equal to the sum of the products obtained by multiplying the number of tonnes available for the carriage of revenue load (passengers and cargo) on each stage flight by the distance measured in kilometres.
Tonne-km used	a metric tonne of revenue load carried one kilometre. Tonne-km used is the sum of the products obtained by multiplying the number of tonnes of revenue load (passengers and cargo) carried on each stage flight by the distance measured in kilometres.

Appendix B Classes of Licence

NB These definitions are not intended as a comprehensive statement of each type of licence. They define the general purpose of the types of flights authorised by each class of licence. The specification for each class of licence is published in the Civil Aviation Authority Official Record Series 1.

Class 1 authorises scheduled service flights;

Class 2 authorises advance booking charter flights;

Class 3 authorises inclusive tour charter flights;

Class 4 authorises other charter flights for the carriage of passengers;

Class 5 authorises substitute charter flights;

Class 6 authorises charter flights for the carriage of cargo and attendants;

Class 7 authorises sole-use charter flights.
