Cheltenham
Glos GL50 2BN

Civil Aviation Statistics for earlier years Statistics for the period from January 1968 to December 1972 were published in the Civil Aviation Series of the Department of Trade & Industry's *Business Monitors*. The series comprise:

CA. 1	<i>Airport activity</i>	(Monthly)
CA. 2	<i>Air passengers</i>	"
CA. 3	<i>Air freight & mail</i>	"
CA. 4	<i>Airline operations</i>	"
CA. 5	<i>Airline operations</i>	(Quarterly)
CA. 6	<i>Domestic passenger traffic</i>	"
CA. 7	<i>Air passengers – international and cabotage</i>	"
CA. 8	<i>Airline financial statistics</i>	(Annually – 1968 to 1971 only)

Annual versions of CA. 1 to CA. 7 were also published

Foreword

1 CONTENT

- 1.1 *CAA Monthly Statistics* is prepared by the Civil Aviation Authority with the co-operation of the United Kingdom airport and airline operators; some of this information is required by the Civil Aviation Act, 1971. Statistics for the Channel Islands airports are provided by the Commandant for Jersey Airport and the Office of the Lieutenant Governor for Guernsey and Alderney Airports. The assistance from all these authorities is gratefully acknowledged.
- 1.2 Some of the figures included in *CAA Monthly Statistics* are provisional only and may be revised in later issues. Figures contained in monthly and quarterly tables have not been seasonally adjusted, but figures are given, in the tables covering past years, for the most recent six months and the corresponding six months one year earlier.

2 CONVENTIONS

- 2.1 **Symbols and Abbreviations** The following are used throughout:

+	=	UK Customs airport
..	=	not available
—	=	nil or less than half the final digit shown
n.e.i.	=	not elsewhere included
a.t-km	=	available tonne-kilometres

A.T. Movements = Air Transport Movements

- 2.2 **Rounding of Figures** In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

- 2.3 **Units of Measurement** Metric measurements are used throughout *CAA Monthly Statistics*.

Tonne	=	1000 kilogrammes
Tonne-kilometres	=	The product obtained by multiplying the number of tonnes carried by the distance flown measured in kilometres

Conversion factors (foot/pound system to metric system)

1 short ton (2000 lbs)	=	0.9072 tonnes
1 ton (2240 lbs)	=	1.0160 tonnes
1 statute mile (5280 feet)	=	1.6093 kilometres
1 short ton-mile	=	1.4600 tonne-kilometres

The explanations of other terms used throughout the Tables are contained in the section on Definitions immediately following the Tables.

3 ENQUIRIES

- 3.1 **Statistics** Enquiries concerning the information in *CAA Monthly Statistics* should be addressed, according to the subject, as follows:

Airport and Air Passenger Statistics:	Civil Aviation Authority Room 209 Shell Mex House Strand London WC2R 0DP Tel. 01 217 3638
Airline Statistics:	Civil Aviation Authority Room 622 Aviation House 129 Kingsway London WC2B 6NN Tel. 01 405 6922 Ext. 244

3.2 **Distribution** Enquiries concerning orders and subscriptions should be addressed to:

Civil Aviation Authority
Printing and Publication Services
Greville House
37 Gratton Road
Cheltenham
Glos GL50 2BN

4 **CIVIL AVIATION STATISTICS FOR EARLIER YEARS** Statistics for the period from January 1968 to December 1972 were published in the Civil Aviation Series of the Department of Trade & Industry's *Business Monitors*.

The series comprise:

CA. 1	<i>Airport activity</i>	(Monthly)
CA. 2	<i>Air passengers</i>	"
CA. 3	<i>Air freight & mail</i>	"
CA. 4	<i>Airline operations</i>	"
CA. 5	<i>Airline operations</i>	(Quarterly)
CA. 6	<i>Domestic passenger traffic</i>	"
CA. 7	<i>Air passengers – international and cabotage</i>	"
CA. 8	<i>Airline financial statistics</i>	(Annually – 1968 to 1971 only)

Annual versions of CA. 1 to CA. 7 were also published.

Civil Aviation Statistics—April 1974

Activity at UK Airports

In April 1974 air transport movements were almost 60 000, a decline on the previous year of 1·5 per cent. Comparison of the three month periods ending April 1973 and April 1974 shows a similar decline of 1·7 per cent. In the London area the decline for the month of April 1974 compared with April 1973 was 5·1 per cent, and that for the three month period was 3·9 per cent. Each airport in the London area except Stansted reported a decline in the three month period ending April 1974 compared with a year earlier. Airports elsewhere in the U.K. showed an increase of 3·3 per cent in both the movements in April 1974 compared with April 1973 and the monthly average for the three month period ending April 1974 compared with a year earlier. Aberdeen reported an increase of 779 movements per month between the two three month periods (143·2 per cent) and Sumburgh an increase of 447 movements per month (169·3 per cent).

The monthly average of just over 2½ million passengers handled at U.K. airports in the period February to April 1974 was 4·5 per cent lower than in the corresponding period in 1973, London airports reporting a decline of 3·8 per cent and other airports a decline of 6·3 per cent. Heathrow handled nearly 10 000 more passengers a month (0·7 per cent growth) and Stansted just over 2 000 more (19·7 per cent growth). Luton reported over 51 000 fewer passengers a month, a decline of 23·5 per cent. Of airports elsewhere in the UK, Aberdeen handled over 10 000 (57·1 per cent) more passengers a month and Sumburgh over 4 500 (104·0 per cent) more. Manchester reported nearly 14 000 (8·0 per cent) fewer passengers a month, Birmingham nearly 12 500 (16·1 per cent) and Bristol over 10 500 (45·4 per cent). Many other airports also reported declines. Terminal passengers carried by scheduled services were 0·9 per cent higher in the three month period ending April 1974 than a year earlier while those carried by charter services declined by 19·3 per cent. The UK operators' share of scheduled and charter service passengers declined: from 69·2 to 68·3 per cent and from 88·6 to 87·6 per cent respectively.

Of the monthly average of over 2½ million terminal passengers handled at UK airports in the three months ending April 1974 over 1·9 million travelled on international services and over 0·8 million on domestic services, declines of 5·7 and 1·4 per cent respectively compared with a year earlier.

In this three month period a monthly average of nearly 1·3 million international passengers travelled by sched-

uled services and almost 600 000 by charter services: the former was an increase of 0·9 per cent on the previous year, the latter a decrease of 20·7 per cent. The two largest scheduled service markets continued to be France and the USA, with shares of 13·4 and 11·7 per cent respectively. The most important charter service market was again Spain with 39·2 per cent of total charter passengers, but the number of passengers continued to decline (26·5 per cent). Charter services to Germany and Italy remained the next most important with 10·4 and 10·3 per cent respectively of total charter passengers.

The monthly average number of passengers flying on domestic routes in the period February to April 1974 was 0·8 per cent less than a year earlier. However, on the routes between London and the Channel Islands there was an increase of over 1 per cent and on other routes to and from the Channel Islands an increase of over 12 per cent.

The tonnage of cargo handled at UK airports during April 1974 was 9·5 per cent higher than in April 1973 and the monthly average for the three month period ending April 1974 was 7·8 per cent higher than a year earlier. London airports reported a growth of 11·2 per cent in this three month period while airports elsewhere in the UK reported a decrease of 3·0 per cent. Heathrow and Gatwick both reported increases of 10·7 per cent, Stansted one of 67·5 per cent, Glasgow an increase of 20·0 per cent and Bournemouth one of 179·6 per cent. Edinburgh and Belfast showed declines of 48·9 and 26·9 per cent respectively. The UK operators' share of cargo carried on scheduled services during the three month period was 50·6 per cent (compared with 53·4 per cent a year earlier) while their share of cargo carried on charter services was 69·5 per cent (73·9 per cent a year earlier).

Output of UK Airlines

The output of UK airlines for all services in April 1974 was 668·4 available tonne-kilometres, a decline of 4 per cent on April 1973.

The scheduled service output of over 462 million available tonne-kilometres was nearly 1 per cent higher than a year earlier and the over-all load factor of 52·9 per cent was slightly lower than the 53·3 per cent achieved in April 1973. Seat kilometres used were 53·9 per cent of those available against 57·0 per cent in April 1973. Seat factors on domestic and international services were 54·7 and 52·7 per cent respectively compared with 57·2 and 53·0 in the previous April.

The non-scheduled service output in April 1974 was 206·3 million available tonne-kilometres a decline of 13·5 per cent on April 1973. Advance Booking Charters accounted for 17·2 million available tonne-kilometres and Inclusive Tour Charters for 93·8 million compared with 10·8 million and 107·6 million respectively a year earlier.

NOTE: Statistics of airport activity, passengers and cargo are derived from data supplied by airports. Airline statistics are based on data supplied by airlines. Data from these two sources are not strictly comparable. There are small differences in timing and more significant differences arise because airlines are not asked to report non-revenue passengers and cargo.

Size Structure of UK Airports and Airlines Year ended 31 March 1974

London includes Heathrow, Gatwick and Stansted.

S.E. England includes Ashford, London, Luton, Lydd, Manston and Southend.

N. England comprises the airports in England north of a line from the Mersey to the Humber (Manchester, Liverpool, Blackpool, Newcastle, Leeds/Bradford and Tees-side).

Glasgow includes Prestwick and Abbotsinch.

(a) N. France comprises the airports north of the line of 49° latitude.

(b) Soviet Union and Eastern Europe includes the United Soviet Socialist Republics, Bulgaria, Czechoslovakia, Hungary, Poland, Roumania and the Eastern Zone of Germany but excluding Berlin.

(c) North Africa includes Algeria, Libya, Morocco and Tunisia.

(d) Commonwealth countries only.

(e) Commonwealth countries including Rhodesia.

(f) Middle East includes Iraq, Iran, Israel, Jordan, Lebanon, Persian Gulf States, Saudi Arabia, Sudan and the United Arab Republic.

(g) Total is in respect of charter passengers only. Passengers on scheduled flights included in London – Other Italy.

(h) Total is in respect of charter passengers only. Passengers on scheduled flights included in other routes to Italy.

The figures show the uplift and discharge of passengers at United Kingdom airports on services operated there according to their immediate destination or last point of embarkation overseas on those services. These may not, in all cases, be the origin or destination of passenger journeys: they may be places at which a journey was broken or a connection made with another air service. The figures in this table include all passengers carried on scheduled and charter services excluding those carried on aircraft chartered by Government Departments.

Domestic Passengers by Main Routes

Table 19

(a) Heathrow, Gatwick and Stansted.
Traffic counted in either direction.

The figures show the uplift and discharge of passengers according to the destination and origin of the route. Because of the method of collection of this information there are discrepancies between the reports received from airports on a route, particularly in the case of multi-sector flights. In most cases, however, the discrepancies are small, but in a few cases the figures include an estimated component.

Exempt Services	16 336	9 984	1 558	8 423	61.1
TOTAL	18 583	11 307	2 695	8 609	60.8
GRAND TOTAL	668 053	387 614	109 687	277 925	58.0

[†] Variable charges can be made only against those licences issued under the revised system that came into effect on 1 January 1974; immediate conversion to the revised system did not take place in all cases. In the table above activities that continued under old style licences have been included under the equivalent revised licence classes; for example, activity under Class A licences has been listed under Class 1 but were not in fact chargeable.

Appendix A Definitions

AIRPORT ACTIVITY

An air transport movement	is a landing or a take-off of an aircraft engaged on commercial air transport. The types of movement covered are all scheduled service movements, whether loaded or empty, and charter movements transporting passengers or cargo from one point to another. All other types of commercial flying are excluded (e.g. flights returning to the airport of take-off without landing elsewhere, empty charter positioning flights paid for by the charterer, ferrying of empty aircraft, etc.).
Empty charter positioning flights	are flights by chartered aircraft moving into position for transport flights or returning to base after such flights.
Other commercial flights	are miscellaneous non-transport charter flights (e.g. commercial delivery or ferry of empty aircraft and local flights for the Press, survey companies or farmers).
Test and training flights	are flights for the purpose of testing aircraft or airports, or for training flying crew or ground personnel. Also included in this category are demonstration flights by makers or sellers of aircraft and aviation equipment. Aero-club instructional flights are excluded from this category and shown under 'Aero-club'.
Other non-commercial flights	by air transport operators are flights by air transport operators for the sole purpose of moving their own aircraft, personnel or stores from one place to another, and air transport flights forced to return to base by bad weather, engine failure or other causes.
Private flights	are flights for purely private purposes by private owners or other private aircraft operators, excluding aero-club flights.
Aero-club flights	are flights operated by aero-club members for instruction or pleasure.
Official flights	are flights for official purposes by British or foreign civil Government Departments excluding air transport movements.
Military flights	are flights by British or foreign military personnel exclusively for military purposes.

AIR PASSENGERS

Passengers	includes all revenue and non-revenue passengers on air transport flights. Air crew being carried on such flights other than as members of the aircraft's complement are classified as non-revenue passengers.
Revenue passengers	are those who pay 25 per cent or more of the normal applicable fare.
A terminal passenger	is a passenger joining or leaving the aircraft flight at the reporting airport. A passenger travelling between two reporting airports is counted twice, once at each airport.
A transit passenger	is a passenger who arrives at and departs from a reporting airport on the same aircraft which is transitting the airport. Each transit passenger is counted once only and not once on arrival and once on departure.

International services	are services flown between the United Kingdom (including Great Britain, Isle of Man, Channel Islands and Northern Ireland) and places outside.
Domestic services	are services flown entirely within Great Britain, Isle of Man, Channel Islands and Northern Ireland.
Cabotage	is traffic carried between territories of the United Kingdom other than domestic services.
Scheduled services	are those performed according to a published timetable, including those supplementary thereto, and open to use by members of the public.
Non-scheduled services	include all air transport flights other than scheduled services.
Charter services	are those transporting passengers or cargo for hire or reward from one point to another, other than scheduled services.

AIR CARGO

Cargo	in airport statistics means the weight of cargo (including accompanied vehicles) picked up and set down by aircraft on air transport flights. Cargo in transit through the airport on the same aircraft is excluded as is mail, company stores, excess baggage and diplomatic bags picked up and set down. (See also definition below under 'Airline Operations').
Tonnes	are metric tonnes of 1 000 kilogrammes (2 204.62 lb).

AIRLINE OPERATIONS

Advance booking charters (ABC)	Charter flights operated under Class 2 licences between the UK and designated territories overseas in respect of which an operator has sold blocks of seats to one or more licensed travel organisers for resale to passengers. Details of the sales to travel organisers have to be notified to the Civil Aviation Authority 120 days before the date of the flight: details of the sales of seats to passengers which must be on a round trip basis have to be notified to the Authority 60 days before departure.
Aircraft-hour	an aircraft hour is performed when an aircraft flies for one hour: aircraft hours are measured on the basis of block-to-block time.
Aircraft-kilometre (Aircraft-km)	An aircraft-kilometre is performed when an aircraft flies one kilometre. Aircraft-kilometres equal the sum of the products obtained by multiplying the number of flights performed on each stage flight by the stage distance measured in kilometres.
Cargo	in airline statistics means the weight of any property carried on an aircraft, including the weight of vehicles carried, mail and diplomatic bags, but excluding passengers' baggage. (See also definition above for 'Air Cargo' statistics and definition below for 'Passenger tonne-kilometres').
Cargo tonne-km	means a metric tonne of cargo carried one kilometre. Cargo tonne-kilometres equal the sum of products obtained by multiplying the number of tonnes of cargo carried on each flight stage by the stage distance measured in kilometres.

Cargo uplifted	means the number of tonnes of cargo which is obtained by counting each tonne of cargo on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight. The only exception to this is for cargo flown on both the international and domestic stages of the same flight which is considered in computation both as a domestic and an international shipment or despatch.
Daily utilisation per a/c (hrs)	is an average per aircraft measure computed by dividing the aircraft hours of use by the number of days on which the aircraft are available. This latter figure includes days required for maintenance and overhaul but it does not include days between the date of purchase and the date actually placed in service, days out of service due to major accidents or conversion, days when an aircraft is in the possession of others or is not available because of government action, such as grounding by government order.
Exempt operations	are operations for which a licence is not required. The Civil Aviation Authority in pursuance of its powers under paragraph (a) of Section 21(2) of the Civil Aviation Act 1971 has by an instrument dated 29 March 1972 and later instruments specified a number of types of flights for which a licence is not required. The specifications of such flights are published in the Authority's Official Record Series 1 but typical examples are ambulance flights, aircrew training and test flights, Government charters, helicopters carrying externally suspended loads, etc.
Inclusive tours (IT)	are separate fare charters where the cost to the passenger includes the cost of accommodation.
Licence	means an air transport licence granted under Section 22 of the Civil Aviation Act 1971.
Mail	covers only that handled by postal administrations and includes troop mail.
Mail tonne-km	are calculated using the same principle as when calculating cargo tonne-km.
Overall load factor	is an expression of tonne-km used as a percentage of tonne-km available.
Passengers	in airline statistics means revenue passengers only, i.e. passengers paying 25 per cent or more of the normal fare.
Passenger-km	means a passenger carried one kilometre. Calculation of passenger-kilometre equals the sum of the products obtained by multiplying the number of passengers carried on each flight stage by the stage distance measured in kilometres. The resultant figure is equal to the number of kilometres travelled by all passengers. Note.—Passenger-km is numerically equivalent to Seat-km used.
Passenger load factor	is an expression of seat-km used as a percentage of seat-km available.
Passengers uplifted and passengers carried	The number of passengers uplifted is obtained by counting each revenue passenger on a particular flight (with one flight number) once only and not repeatedly on each individual stage of flight.
Passenger tonne-kilometres	is deduced as the difference between the total tonne-kilometres used and tonne-kilometres used for cargo and/or mail; it includes the weight of passengers' free and excess baggage.

Seat-km available a seat-kilometre is available when a seat is flown one kilometre. Seat-kms available are equal to the sum of the products obtained by multiplying the number of passenger seats available for sale on each stage flight by the stage distance measured in kilometres.

Seat-km used a seat-kilometre is used when a seat occupied by a revenue passenger is flown for one kilometre. Seat-km used is equal to the sum of the products obtained by multiplying the number of revenue passengers carried on each stage flight by the stage distance measured in kilometres.

Separate fare charters are those where the charterer re-sells part of the capacity of the aircraft to the public at large; an organisation, etc.

Sole-use charters are those where the charterer has exclusive use of the whole capacity of the aircraft and does not dispose of any of it to third persons for reward.

Stage flights that part of the flight between two consecutive places, i.e. from take-off to the next landing, excluding technical stops, on the route.

Tonne-km available a metric tonne of payload space available flown one kilometre. Tonne-km available is equal to the sum of the products obtained by multiplying the number of tonnes available for the carriage of revenue load (passengers and cargo) on each stage flight by the distance measured in kilometres.

Tonne-km used a metric tonne of revenue load carried one kilometre. Tonne-km used is the sum of the products obtained by multiplying the number of tonnes of revenue load (passengers and cargo) carried on each stage flight by the distance measured in kilometres.

Appendix B Classes of Licence

NB These definitions are not intended as a comprehensive statement of each type of licence. They define the general purpose of the types of flights authorised by each class of licence. The specification for each class of licence is published in the Civil Aviation Authority Official Record Series 1.

Class 1 authorises scheduled service flights;

Class 2 authorises advance booking charter flights;

Class 3 authorises inclusive tour charter flights;

Class 4 authorises other charter flights for the carriage of passengers;

Class 5 authorises substitute charter flights;

Class 6 authorises charter flights for the carriage of cargo and attendants;

Class 7 authorises sole-use charter flights.
