Foreword

1 CONTENT

- 1.1 *CAA Monthly Statistics* is prepared by the Civil Aviation Authority with the co-operation of the United Kingdom airport and airline operators; some of this information is required by the Civil Aviation Act, 1971. Statistics for the Channel Islands airports are provided by the Commandant for Jersey Airport and the Office of the Lieutenant Governor for Guernsey and Alderney Airports. The assistance from all these authorities is gratefully acknowledged.
- 1.2 Some of the figures included in *CAA Monthly Statistics* are provisional only and may be revised in later issues. Figures contained in monthly and quarterly tables have not been seasonally adjusted, but figures are given, in the tables covering past years, for the most recent six months and the corresponding six months one year earlier.

2 CONVENTIONS

- 2.1 **Symbols and Abbreviations** The following are used throughout:

+	=	UK Customs airport
..	=	not available
—	=	nil or less than half the final digit shown
n.e.i.	=	not elsewhere included
a.t.-km	=	available tonne-kilometres

A.T. Movements = Air Transport Movements

- 2.2 **Rounding of Figures** In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

- 2.3 **Units of Measurement** Metric measurements are used throughout *CAA Monthly Statistics*.

Tonne	=	1000 kilogrammes
Tonne-kilometres	=	The product obtained by multiplying the number of tonnes carried by the distance flown measured in kilometres

Conversion factors (foot/pound system to metric system)

1 short ton (2000 lbs)	=	0.9072 tonnes
1 ton (2240 lbs)	=	1.0160 tonnes
1 statute mile (5280 feet)	=	1.6093 kilometres
1 short ton-mile	=	1.4600 tonne-kilometres

The explanations of other terms used throughout the Tables are contained in the section on Definitions immediately following the Tables.

3 ENQUIRIES

- 3.1 **Statistics** Enquiries concerning the information in *CAA Monthly Statistics* should be addressed, according to the subject, as follows:

Airport and Air
Passenger Statistics: Civil Aviation Authority
Room T420
Space House
43/59 Kingsway
London WC2B 6TE
Tel. 01 379 7311 Ext. 2585

4 CIVIL AVIATION STATISTICS FOR EARLIER YEARS Statistics for the period from January 1968 to December 1972 were published in the Civil Aviation Series of the Department of Trade & Industry's *Business Monitors*.

The series comprise:

CA. 1	<i>Airport activity</i>	(Monthly)
CA. 2	<i>Air passengers</i>	"
CA. 3	<i>Air freight & mail</i>	"
CA. 4	<i>Airline operations</i>	"
CA. 5	<i>Airline operations</i>	(Quarterly)
CA. 6	<i>Domestic passenger traffic</i>	"
CA. 7	<i>Air passengers – international and cabotage</i>	"
CA. 8	<i>Airline financial statistics</i>	(Annually – 1968 to 1971 only)

Annual versions of CA. 1 to CA. 7 were also published.

Civil Aviation Statistics—December 1975

Activity at UK Airports

Over 49 000 air transport movements were reported during December 1975, and whilst these were greater in number than during December 1973 they represented a marginal decline on December 1974. Movements in the London area declined by 3.4 per cent during this month, compared with 1974, whilst those over the rest of the UK grew by 2.5 per cent against the previous year. Over the three month period October–December 1975 a similar marginal rate of decline was recorded, comprising a 2.8 per cent decline in the London area against a 2.0 per cent growth elsewhere in the UK. Heathrow was alone amongst London area airports in reporting a decline in movements (1389 fewer per month; 6.6 per cent decline). Southend reported the same level of activity as a year earlier, Stansted 4.5 per cent growth (11 additional movements), Gatwick 7.1 per cent growth (362 additional movements) and Luton 22.4 per cent growth (226 additional movements). Outside the London area Aberdeen reported the greatest increase in actual movements (1421 additional movements; 81.2 per cent growth) followed by Edinburgh (196 additional movements; 16.3 per cent growth) and Norwich (126 additional movements; 30.4 per cent growth). The growth rate at Lydd which, as a result of new traffic subsequent to the closure of Ashford airport at the end of October 1974, ran into three and four figures during the year, fell to 22.9 per cent over the October–December period. The highest growth rate during this period was that reported by Aberdeen, whilst the heaviest rate of decline was recorded at Coventry (–90.0 per cent). Despite the overall marginal decline in air transport movements (comprising a 4.8 per cent decline in scheduled movements and a 20.8 per cent growth in charter movements) the UK operators managed to marginally increase their share to 76.0 per cent. Their share of scheduled and charter movements increased similarly to 72.5 per cent and 88.7 per cent respectively. The number of diversions due to poor weather and industrial action continued to be high during December (a monthly total of 301).

Despite the fall in movements associated with the use of larger aircraft a 5.0 per cent growth in terminal passengers occurred during December 1975 resulting in 2.7 million people using UK airports. When comparing the final quarters for the years 1974 and 1975 a 6.8 per cent growth was achieved; 6.8 per cent aggregate growth in the London area and 6.9 per cent growth elsewhere in the UK. Of London area airports Southend and Stansted reported a fall in the number of passengers handled (2275 fewer passengers per month; 14.6 per cent decline and 1486 fewer passengers, 8.6 per cent decline respectively) whilst Gatwick, Heathrow and Luton reported growth (34 728 additional passengers; 11.1 per cent growth, 87 768 additional passengers; 5.7 per cent growth and 15 702 passengers; 16.7 per cent growth respectively). Over the remainder of the UK Manchester, Aberdeen and Edinburgh achieved the largest increase in actual passengers (24 133 additional passengers; 14.8 per cent growth, 16 815 additional passengers; 41.1 per cent growth and 7479 additional passengers; 13.8 per cent growth respectively). Despite

the fall in the level of its growth rate, Lydd continued to handle the greatest growth in passengers (84.2 per cent) and Gloucester the heaviest rate of fall in passengers (–72.1 per cent). During the fourth quarter, total UK scheduled service passengers grew by 4.3 per cent and charter service passengers by 17.5 per cent against 1974. The UK operators increased their share of each, but only marginally to 65.8 per cent of scheduled, 84.0 per cent of charter and 69.6 per cent of total passengers.

Between October and December a monthly average of 3.0 million passengers used UK airports, 2.2 million on international services (8.5 per cent growth) and 0.8 million on domestic services (2.8 per cent growth). During this period the most frequently used scheduled services were those to France, USA, and the Netherlands with 12.2 per cent, 11.9 per cent and 8.5 per cent of the total respectively (2.0 per cent growth, 3.4 per cent growth, and 5.3 per cent growth). The three most heavily used charter services were those to Spain (43.1 per cent of total; 9.8 per cent growth), Italy (8.9 per cent of total; 29.7 per cent growth), and Canary Islands (5.4 per cent of total; 39.0 per cent growth). Overall the domestic routes experienced 2.0 per cent growth during this period despite four of the six route groupings showing a decline in passengers carried (Belfast services 8.9 per cent decline, Channel Islands services 2.5 per cent decline, Glasgow services 21.8 per cent decline and Isle of Man services 13.9 per cent decline). London route passengers, however, grew by 5.2 per cent and those travelling to Edinburgh by 28.7 per cent.

The level of air freight handled by UK airports during December 1975 continued to be lower than during the previous two years (52 000 tonnes; 4.8 per cent less than 1974). Over the last quarter of 1975 a monthly average of almost 53,000 tonnes were carried (13.6 per cent less than 1974). London area tonnage fell by an aggregate 10.4 per cent and that over the rest of the UK by 24.0 per cent. Heathrow, Luton and Southend each reported handling less freight than the previous year (6807 fewer tonnes, 17.5 per cent decline; 50 fewer tonnes, 24.8 per cent decline and 387 fewer tonnes, 24.9 per cent decline respectively). Gatwick and Stansted reported 38.4 per cent growth and 36.4 per cent growth respectively (a monthly average of 1851 additional tonnes and 512 tonnes respectively). Over the remainder of the UK Aberdeen reported the greatest actual increase in tonnage (116 additional tonnes; 44.9 per cent growth) followed by Lydd (55 additional tonnes; 24.3 per cent growth) and Sumburgh (40 additional tonnes; 47.3 per cent growth). Belfast reported the heaviest fall in tonnage (1218 fewer tonnes) and Manston the heaviest rate of decline (–70.3 per cent). The 8-fold growth rate at Coventry was the heaviest over this period. Between October and December whilst scheduled service cargo fell by 19.6 per cent, that carried by charter services increased by 24.6 per cent. The UK operators' share of total tonnage fell by 6.4 percentage points to 47.2 per cent, their share of scheduled tonnage by 10.3 percentage points to 39.2 per cent and their share of charter tonnage marginally to 77.8 per cent.

Output of UK Airlines

The output of UK airlines for all services in December 1975 was 727 million available tonne-kilometres, an increase of 9.4 per cent on December 1974.

The scheduled service output of 512 million available tonne-kilometres was 4.6 per cent higher than a year earlier. The overall load factor of 57.9 per cent compared with 57.8 per cent the previous year. Seat kilometres used were 61.0 per cent of those available compared with 58.8 per cent in December 1974. Seat factors on domestic and international scheduled services were 56.2 and 61.4 per cent respectively compared with 58.0 and 58.8 per cent a year earlier.

The non-scheduled output of 215 available tonne-kilometres was 24.1 per cent higher than in December 1974. Advance Booking Charters and Inclusive Tour Charters accounted for 13.6 and 52.3 million available tonne-kilometres respectively compared with 10.3 and 43.9 million a year earlier.

NOTE: Statistics of airport activity, passengers and cargo are derived from data supplied by airports. Airline Statistics are based on data supplied by the airlines. Data from these two sources are not strictly comparable. There are small differences in timing and more significant differences arise because airlines are not asked to report non-revenue passengers and cargo.

Size Structure of UK

London includes Heathrow, Gatwick and Stansted.

S.E. England includes Ashford, London, Luton, Lydd, Manston and Southend.

N. England comprises the airports in England north of a line from the Mersey to the Humber (Manchester, Liverpool, Blackpool, Newcastle, Leeds/Bradford and Tees-side).

Glasgow includes Prestwick and Abbotsinch.

(a) N. France comprises the airports north of the line of 49° latitude.

(b) Soviet Union and Eastern Europe includes the United Soviet Socialist Republics, Bulgaria, Czechoslovakia, Hungary, Poland, Roumania and the Eastern Zone of Germany but excluding Berlin.

(c) North Africa includes Algeria, Libya, Morocco and Tunisia.

(d) Commonwealth countries only.

(e) Commonwealth countries including Rhodesia.

(f) Middle East includes Iraq, Iran, Israel, Jordan, Lebanon, Persian Gulf States, Saudi Arabia, Sudan and the United Arab Republic.

(g) Total is in respect of charter passengers only. Passengers on scheduled flights included in London – Other Italy.

(h) Total is in respect of charter passengers only. Passengers on scheduled flights included in other routes to Italy.

The figures show the uplift and discharge of passengers at United Kingdom airports on services operated there according to their immediate destination or last point of embarkation overseas on those services. These may not, in all cases, be the origin or destination of passenger journeys: they may be places at which a journey was broken or a connection made with another air service. The figures in this table include all passengers carried on scheduled and charter services excluding those carried on aircraft chartered by Government Departments.

Domestic Passengers by Main Routes

Table 19

(a) Heathrow, Gatwick and Stansted

Traffic counted in either direction

The figures show the uplift and discharge of passengers according to the destination and origin of the route. Because of the method of collection of this information there are discrepancies between the reports received from airports on a route, particularly in the case of multi-sector flights. In most cases, however, the discrepancies are small, but in a few cases the figures include an estimated component.

(a) Undergoing revision.

Appendix A Definitions

AIRPORT ACTIVITY

- An air transport movement** is a landing or a take-off of an aircraft engaged on commercial air transport. The types of movement covered are all scheduled service movements, whether loaded or empty, and charter movements transporting passengers or cargo from one point to another. All other types of commercial flying are excluded (e.g. flights returning to the airport of take-off without landing elsewhere, empty charter positioning flights paid for by the charterer, ferrying of empty aircraft, etc.).
- Empty charter positioning flights** are flights by chartered aircraft moving into position for transport flights or returning to base after such flights.
- Other commercial flights** are miscellaneous non-transport charter flights (e.g. commercial delivery or ferry of empty aircraft and local flights for the Press, survey companies or farmers).
- Test and training flights** are flights for the purpose of testing aircraft or airports, or for training flying crew or ground personnel. Also included in this category are demonstration flights by makers or sellers of aircraft and aviation equipment. Aero-club instructional flights are excluded from this category and shown under 'Aero-club'.
- Other non-commercial flights** by air transport operators are flights by air transport operators for the sole purpose of moving their own aircraft, personnel or stores from one place to another, and air transport flights forced to return to base by bad weather, engine failure or other causes.
- Private flights** are flights for purely private purposes by private owners or other private aircraft operators, excluding aero-club flights.
- Aero-club flights** are flights operated by aero-club members for instruction or pleasure.
- Official flights** are flights for official purposes by British or foreign civil Government Departments excluding air transport movements.
- Military flights** are flights by British or foreign military personnel exclusively for military purposes.

AIR PASSENGERS

- Passengers** includes all revenue and non-revenue passengers on air transport flights. Air crew being carried on such flights other than as members of the aircraft's complement are classified as non-revenue passengers.
- Revenue passengers** are those who pay 25 per cent or more of the normal applicable fare.
- A terminal passenger** is a passenger joining or leaving the aircraft flight at the reporting airport. A passenger travelling between two reporting airports is counted twice, once at each airport.
- A transit passenger** is a passenger who arrives at and departs from a reporting airport on the same aircraft which is transiting the airport. Each transit passenger is counted once only and not once on arrival and once on departure.

- International services** are services flown between the United Kingdom (including Great Britain, Isle of Man, Channel Islands and Northern Ireland) and places outside.
- Domestic services** are services flown entirely within Great Britain, Isle of Man, Channel Islands and Northern Ireland.
- Cabotage** is traffic carried between territories of the United Kingdom other than domestic services.
- Scheduled services** are those performed according to a published timetable, including those supplementary thereto, and open to use by members of the public.
- Non-scheduled services** include all air transport flights other than scheduled services.
- Charter services** are those transporting passengers or cargo for hire or reward from one point to another, other than scheduled services.

AIR CARGO

- Cargo** in airport statistics means the weight of cargo (including accompanied vehicles) picked up and set down by aircraft on air transport flights. Cargo in transit through the airport on the same aircraft is excluded as is mail, company stores, excess baggage and diplomatic bags picked up and set down. (See also definition below under 'Airline Operations').
- Tonnes** are metric tonnes of 1 000 kilogrammes (2 204.62 lb).

AIRLINE OPERATIONS

- Advance booking charters (ABC)** Charter flights operated under Class 2 licences between the UK and designated territories overseas in respect of which an operator has sold blocks of seats to one or more licensed travel organisers for resale to passengers. Details of the sales to travel organisers have to be notified to the Civil Aviation Authority 120 days before the date of the flight: details of the sales of seats to passengers which must be on a round trip basis have to be notified to the Authority 60 days before departure.
- Aircraft-hour** an aircraft hour is performed when an aircraft flies for one hour: aircraft hours are measured on the basis of block-to-block time.
- Aircraft-kilometre (Aircraft-km)** An aircraft-kilometre is performed when an aircraft flies one kilometre. Aircraft-kilometres equal the sum of the products obtained by multiplying the number of flights performed on each stage flight by the stage distance measured in kilometres.
- Cargo** in airline statistics means the weight of any property carried on an aircraft, including the weight of vehicles carried, mail and diplomatic bags, but excluding passengers' baggage. (See also definition above for 'Air Cargo' statistics and definition below for 'Passenger tonne-kilometres').
- Cargo tonne-km** means a metric tonne of cargo carried one kilometre. Cargo tonne-kilometres equal the sum of products obtained by multiplying the number of tonnes of cargo carried on each flight stage by the stage distance measured in kilometres.

Cargo uplifted	means the number of tonnes of cargo which is obtained by counting each tonne of cargo on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight. The only exception to this is for cargo flown on both the international and domestic stages of the same flight which is considered in computation both as a domestic and an international shipment or despatch.
Daily utilisation per a/c (hrs)	is an average per aircraft measure computed by dividing the aircraft hours of use by the number of days on which the aircraft are available. This latter figure includes days required for maintenance and overhaul but it does not include days between the date of purchase and the date actually placed in service, days out of service due to major accidents or conversion, days when an aircraft is in the possession of others or is not available because of government action, such as grounding by government order.
Exempt operations	are operations for which a licence is not required. The Civil Aviation Authority in pursuance of its powers under paragraph (a) of Section 21(2) of the Civil Aviation Act 1971 has by an instrument dated 29 March 1972 and later instruments specified a number of types of flights for which a licence is not required. The specifications of such flights are published in the Authority's Official Record Series 1 but typical examples are ambulance flights, aircrew training and test flights, Government charters, helicopters carrying externally suspended loads, etc.
Inclusive tours (IT)	are separate fare charters where the cost to the passenger includes the cost of accommodation.
Licence	means an air transport licence granted under Section 22 of the Civil Aviation Act 1971.
Mail	covers only that handled by postal administrations and includes troop mail.
Mail tonne-km	are calculated using the same principle as when calculating cargo tonne-km.
Overall load factor	is an expression of tonne-km used as a percentage of tonne-km available.
Passengers	in airline statistics means revenue passengers only, i.e. passengers paying 25 per cent or more of the normal fare.
Passenger-km	means a passenger carried one kilometre. Calculation of passenger-kilometre equals the sum of the products obtained by multiplying the number of passengers carried on each flight stage by the stage distance measured in kilometres. The resultant figure is equal to the number of kilometres travelled by all passengers. Note.—Passenger-km is numerically equivalent to Seat-km used.
Passenger load factor	is an expression of seat-km used as a percentage of seat-km available.
Passengers uplifted and passengers carried	The number of passengers uplifted is obtained by counting each revenue passenger on a particular flight (with one flight number) once only and not repeatedly on each individual stage of flight.
Passenger tonne-kilometres	is deduced as the difference between the total tonne-kilometres used and tonne-kilometres used for cargo and/or mail; it includes the weight of passengers' free and excess baggage.

Seat-km available a seat-kilometre is available when a seat is flown one kilometre. Seat-kms available are equal to the sum of the products obtained by multiplying the number of passenger seats available for sale on each stage flight by the stage distance measured in kilometres.

Seat-km used a seat-kilometre is used when a seat occupied by a revenue passenger is flown for one kilometre. Seat-km used is equal to the sum of the products obtained by multiplying the number of revenue passengers carried on each stage flight by the stage distance measured in kilometres.

Separate fare charters are those where the charterer re-sells part of the capacity of the aircraft to the public at large; an organisation, etc.

Sole-use charters are those where the charterer has exclusive use of the whole capacity of the aircraft and does not dispose of any of it to third persons for reward.

Stage flights that part of the flight between two consecutive places, i.e. from take-off to the next landing, excluding technical stops, on the route.

Tonne-km available a metric tonne of payload space available flown one kilometre. Tonne-km available is equal to the sum of the products obtained by multiplying the number of tonnes available for the carriage of revenue load (passengers and cargo) on each stage flight by the distance measured in kilometres.

Tonne-km used a metric tonne of revenue load carried one kilometre. Tonne-km used is the sum of the products obtained by multiplying the number of tonnes of revenue load (passengers and cargo) carried on each stage flight by the distance measured in kilometres.

Appendix B Classes of Licence

NB These definitions are not intended as a comprehensive statement of each type of licence. They define the general purpose of the types of flights authorised by each class of licence. The specification for each class of licence is published in the Civil Aviation Authority Official Record Series 1.

- Class 1** authorises scheduled service flights;
- Class 2** authorises advance booking charter flights;
- Class 3** authorises inclusive tour charter flights;
- Class 4** authorises other charter flights for the carriage of passengers;
- Class 5** authorises substitute charter flights;
- Class 6** authorises charter flights for the carriage of cargo and attendants;
- Class 7** authorises sole-use charter flights.
