# Foreword

## 1 CONTENT

- 1.1 *CAA Monthly Statistics* is prepared by the Civil Aviation Authority with the co-operation of the United Kingdom airport and airline operators; some of this information is required by the Civil Aviation Act, 1971. Statistics for the Channel Islands airports are provided by the Commandant for Jersey Airport and the Office of the Lieutenant Governor for Guernsey and Alderney Airports. The assistance from all these authorities is gratefully acknowledged.
- 1.2 Some of the figures included in *CAA Monthly Statistics* are provisional only and may be revised in later issues. Figures contained in monthly and quarterly tables have not been seasonally adjusted, but figures are given, in the tables covering past years, for the most recent six months and the corresponding six months one year earlier.

## 2 CONVENTIONS

- 2.1 **Symbols and Abbreviations** The following are used throughout:
- |        |   |   |
|--------|---|---|
| +      | = | UK Customs airport                          |
| ..     | = | not available                               |
| —      | = | nil or less than half the final digit shown |
| n.e.i. | = | not elsewhere included                      |
| a.t-km | = | available tonne-kilometres                  |
- A.T. Movements = Air Transport Movements
- 2.2 **Rounding of Figures** In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.
- 2.3 **Units of Measurement** Metric measurements are used throughout *CAA Monthly Statistics*.
- |                  |   |   |
|------------------|---|---|
| Tonne            | = | 1000 kilogrammes  |
| Tonne-kilometres | = | The product obtained by multiplying the number of tonnes carried by the distance flown measured in kilometres |
- Conversion factors (foot/pound system to metric system)
- |                            |   |                         |
|----------------------------|---|-------------------------|
| 1 short ton (2000 lbs)     | = | 0.9072 tonnes           |
| 1 ton (2240 lbs)           | = | 1.0160 tonnes           |
| 1 statute mile (5280 feet) | = | 1.6093 kilometres       |
| 1 short ton-mile           | = | 1.4600 tonne-kilometres |

The explanations of other terms used throughout the Tables are contained in the section on Definitions immediately following the Tables.

## 3 ENQUIRIES

- 3.1 **Statistics** Enquiries concerning the information in *CAA Monthly Statistics* should be addressed to:

4 **CIVIL AVIATION STATISTICS FOR EARLIER YEARS** Statistics for the period from January 1968 to December 1972 were published in the Civil Aviation Series of the Department of Trade & Industry's *Business Monitors*.

The series comprise:

CA. 1	<i>Airport activity</i>	(Monthly)
CA. 2	<i>Air passengers</i>	"
CA. 3	<i>Air freight &amp; mail</i>	"
CA. 4	<i>Airline operations</i>	"
CA. 5	<i>Airline operations</i>	(Quarterly)
CA. 6	<i>Domestic passenger traffic</i>	"
CA. 7	<i>Air passengers – international and cabotage</i>	"
CA. 8	<i>Airline financial statistics</i>	(Annually – 1968 to 1971 only)

Annual versions of CA. 1 to CA. 7 were also published.

# Civil Aviation Statistics—February 1976

## Activity at UK Airports

UK air transport movements fell to just below 48,000 during the month of February 1976 a growth of 7.5 per cent on 1975. This overall growth rate aggregates a 4.5 per cent increase in London area movements and a 10.9 per cent growth elsewhere. When comparing movements recorded during the December 1975–February 1976 period against the corresponding months one year previously a growth of 1.9 per cent in total UK air transport movements is indicated. At London area airports the growth was marginal, whilst over the rest of the UK it stood at 3.7 per cent against 1974/75. Heathrow continued alone amongst London area airports in reporting a decline (649 fewer movements per month, 3.3 per cent decline). Gatwick handled 508 additional movements per month (11.5 per cent growth), Luton 156 additional movements (18.3 per cent growth), Southend 51 additional movements (7.7 per cent growth) and Stansted 5 movements (2.8 per cent growth). Whilst Swansea during this period reported the heaviest rate of growth (83.3 per cent), Aberdeen achieved the largest increase in actual movements (1135 movements per month; 61.6 per cent growth). Outside the London area Edinburgh reported the second largest increase in movements (228 additional movements; 20.1 per cent growth) followed by Newcastle with 102 additional movements (13.2 per cent growth). Manston reported the heaviest rate of decline (–36.7 per cent) whilst, excluding the London area airports, Liverpool reported the heaviest fall in movements (270 fewer per month, 25 per cent decline). Scheduled movements during the December 1975–February 1976 period fell by 1.4 per cent, whilst charter movements increased by 17.9 per cent. Overall, the UK operators marginally increased their share of movements on the previous year to stand at 75.8 per cent of the total. Their share of scheduled and charter traffic individually also declined marginally to 71.9 per cent and 91.2 per cent respectively.

The month of February 1976 saw the number of terminal passengers using UK airports fall to just over 2.4 million (10.7 per cent growth on 1975), whilst over the three month period ending February 1976 a monthly average of almost 2.6 million passengers were handled (7.7 per cent growth). In the London area an aggregate 8.3 per cent growth was achieved during this period when only Southend reported a decline on one year previously (707 less passengers per month 7.2 per cent decline). Passengers at Gatwick increased by 11.7 per cent (28 792 more per month) whilst those at Heathrow by 7.8 per cent (105 680 per month). Luton handled an additional 7508 passengers (9.2 per cent growth) and Stansted 1337 passengers (12.3 per cent growth). Over the remainder of the UK an aggregate 6.2 per cent growth was recorded. Liverpool reported the heaviest fall in passengers (8237 less per month) whilst Manchester the largest increase (17 564 additional passengers per month; 13.7 per cent growth). Aberdeen and Glasgow followed Manchester in reporting the second and third heaviest increases in passengers handled (12 307 passengers; 31.5 per cent growth and 9927 passengers; 8.6 per cent growth respectively).

Swansea achieved the heaviest rate of increase during this period (45.2 per cent growth) whilst Gloucester reported the heaviest rate of decline (–48.2 per cent). Over the three months December 1975–February 1976 scheduled service passengers grew by 6.5 per cent, and those travelling by charter services by 13.6 per cent. The UK operators marginally increased their share of charter passengers but their share of scheduled and total passengers each declined marginally to 65.0 per cent and 69.3 per cent respectively.

Of the monthly average 2.6 million passengers using UK airports between December 1975 and January 1976, 1.8 million travelled by international services (6.9 per cent growth) and 0.8 million by domestic services (9.5 per cent growth). Total international scheduled passengers grew by 6.5 per cent on the corresponding period one year earlier, and again the most frequently used routes were those to and from France (12.2 per cent of total scheduled traffic; 4.6 per cent growth) USA (11.4 per cent of the total; 8.2 per cent growth) and Netherlands (8.2 per cent of total; 8.4 per cent growth). Total international charter passengers grew by 11.1 per cent over this period when services to Spain, Germany and Italy carried the greatest number of charter passengers (32.9 per cent of total; 1.8 per cent growth, 11.8 per cent of total; 5.7 per cent growth and 9.0 per cent of total; 21.5 per cent growth respectively). An overall growth in passengers handled of 9.0 per cent was reported on domestic routes. London route passengers doubled their previous rate of growth to 18.7 per cent and services to Edinburgh handled 39.1 per cent more passengers than one year previously. Those travelling to Glasgow increased by 9.3 per cent but those to each of Belfast, the Channel Islands and the Isle of Man declined by 3.5 per cent, 8.6 per cent and 11.1 per cent respectively.

Contrary to the growth in movements and passengers against the month of February for the previous three years, cargo figures remained lower than for each of these years. During February 1976 just over 50,000 tonnes moved through UK airports (5.1 per cent less than February 1975). Over the three month period ending February 1976 a 5.6 per cent decline was reported against one year earlier. London area tonnage fell by 4.7 per cent during this period when only Gatwick and Stansted reported handling more cargo than in 1974/75. (1176 additional tonnes per month; 22.3 per cent growth and 116 additional tonnes; 8.2 per cent growth respectively). Freight handled at Heathrow fell by 3059 tonnes per month (8.8 per cent decline), that at Luton by 59 tonnes (30.9 per cent decline) and that at Southend by 207 tonnes (17.3 per cent decline). Over the rest of the UK tonnage fell by an aggregate 9.1 per cent. Aberdeen, Exeter (which also reported the heaviest rate of growth,) and Sum-burgh reported the largest increases in tonnage (158 additional tonnes per month; 68.1 per cent growth, 49 tonnes; almost 3 fold growth and 40 tonnes; 53.0 per cent growth respectively). Manchester reported the heaviest fall in tonnage (356 fewer tonnes per month) whilst Manston the heaviest rate of decline (93.4 per

cent). Freight carried on scheduled services fell by 10·8 per cent over this period whilst that moved by charter services increased by 22·7 per cent. The UK operators share of total and scheduled cargo fell by 3·0 percentage points to 50·4 per cent and by 6·0 percentage points to 43·0 per cent respectively, but their share of charter service cargo increased 2·4 percentage points to 79·5 per cent.

### **Output of UK Airlines**

The output of UK airlines for all services in February 1976 was 602 million available tonne-kilometres, an increase of 11·7 per cent on February 1975.

The scheduled service output of 442 million available tonne-kilometres was 12·6 per cent higher than a year earlier. The overall load factor of 51·7 per cent compared with 53·3 per cent the previous year. Seat kilometres used were 52·2 per cent of those available,

exactly the same as in February 1975. Seat factors on domestic and international scheduled services were 54·9 and 51·9 per cent respectively compared with 56·4 and 51·9 per cent a year earlier.

The non-scheduled output of 161 million available tonne-kilometres was 9·5 per cent higher than in February 1975. Advance Booking Charters and Inclusive Tour Charters accounted for 3·2 and 50·4 million available tonne-kilometres respectively compared with 4·4 and 41·1 million a year earlier.

NOTE: Statistics of airport activity, passengers and cargo are derived from data supplied by airports. Airline statistics are based on data supplied by the airlines. Data from these two sources are not strictly comparable. There are small differences in timing and more significant differences arise because airlines are not asked to report non-revenue passengers and cargo.

**London** includes Heathrow, Gatwick and Stansted.

**S.E. England** includes London, Luton, Lydd, Manston and Southend.

**N. England** comprises the airports in England north of a line from the Mersey to the Humber (Manchester, Liverpool, Blackpool, Newcastle, Leeds/Bradford and Tees-side).

**Glasgow** includes Prestwick and Abbotsinch.

(a) N. France comprises the airports north of the line of 49° latitude.

(b) Soviet Union and Eastern Europe includes the United Soviet Socialist Republics, Bulgaria, Czechoslovakia, Hungary, Poland, Roumania and the Eastern Zone of Germany but excluding Berlin.

(c) North Africa includes Algeria, Libya, Morocco and Tunisia.

(d) Commonwealth countries only.

(e) Commonwealth countries including Rhodesia.

(f) Middle East includes Iraq, Iran, Israel, Jordan, Lebanon, Persian Gulf States, Saudi Arabia, Sudan and the United Arab Republic.

(g) Total is in respect of charter passengers only. Passengers on scheduled flights included in London — Other Italy.

(h) Total is in respect of charter passengers only. Passengers on scheduled flights included in other routes to Italy.

The figures show the uplift and discharge of passengers at United Kingdom airports on services operated there according to their immediate destination or last point of embarkation overseas on those services. These may not, in all cases, be the origin or destination of passenger journeys: they may be places at which a journey was broken or a connection made with another air service. The figures in this table include all passengers carried on scheduled and charter services excluding those carried on aircraft chartered by Government Departments.

# Domestic Passengers by Main Routes

(a) Heathrow, Gatwick and Stansted

Traffic counted in either direction

The figures show the uplift and discharge of passengers according to the destination and origin of the route. Because of the method of collection of this information there are discrepancies between the reports received from airports on a route, particularly in the case of multi-sector flights. In most cases, however, the discrepancies are small, but in a few cases the figures include an estimated component.

Cargo by Type and Nationality of Operator February 1976

# Appendix A Definitions—Traffic Statistics

## MOVEMENTS AT AIRPORTS

<b>An air transport movement</b>	is a landing or a take-off of an aircraft engaged on commercial air transport. The types of movement covered are all scheduled service movements, whether loaded or empty, and charter movements transporting passengers or cargo from one point to another. All other types of commercial flying are excluded (e.g. flights returning to the airport of take-off without landing elsewhere, empty charter positioning flights paid for by the charterer, ferrying of empty aircraft, etc.).
<b>Empty charter positioning flights</b>	are flights by chartered aircraft moving into position for transport flights or returning to base after such flights.
<b>Other commercial flights</b>	are miscellaneous non-transport charter flights (e.g. commercial delivery or ferry of empty aircraft and local flights for the Press, survey companies or farmers).
<b>Test and training flights</b>	are flights for the purpose of testing aircraft or airports, or for training flying crew or ground personnel. Also included in this category are demonstration flights by makers or sellers of aircraft and aviation equipment. Aero-club instructional flights are excluded from this category and shown under 'Aero-club'.
<b>Other non-commercial flights</b>	by air transport operators are flights by air transport operators for the sole purpose of moving their own aircraft, personnel or stores from one place to another, and air transport flights forced to return to base by bad weather, engine failure or other causes.
<b>Private flights</b>	are flights for purely private purposes by private owners or other private aircraft operators, excluding aero-club flights.
<b>Aero-club flights</b>	are flights operated by aero-club members for instruction or pleasure.
<b>Official flights</b>	are flights for official purposes by British or foreign civil Government Departments excluding air transport movements.
<b>Military flights</b>	are flights by British or foreign military personnel exclusively for military purposes.

## AIR PASSENGERS

<b>Passengers</b>	includes all revenue and non-revenue passengers on air transport flights. Air crew being carried on such flights other than as members of the aircraft's complement are classified as non-revenue passengers.
<b>Revenue passengers</b>	are those who pay 25 per cent or more of the normal applicable fare.
<b>A terminal passenger</b>	is a passenger joining or leaving the aircraft flight at the reporting airport. A passenger travelling between two reporting airports is counted twice, once at each airport.
<b>A transit passenger</b>	is a passenger who arrives at and departs from a reporting airport on the same aircraft which is transitting the airport. Each transit passenger is counted once only and not once on arrival and once on departure.

## TYPES OF SERVICES

<b>International services</b>	are services flown between the United Kingdom (including Great Britain, Isle of Man, Channel Islands and Northern Ireland) and places outside.
<b>Domestic services</b>	are services flown entirely within Great Britain, Isle of Man, Channel Islands and Northern Ireland.
<b>Cabotage</b>	is traffic carried between territories of the United Kingdom other than domestic services.
<b>Scheduled services</b>	are those performed according to a published timetable, including those supplementary thereto, and open to use by members of the public.

**Non-scheduled or charter services**

include all air transport flights other than scheduled services.

**Separate fare charters**

are those where the charterer re-sells part of the capacity of the aircraft to the public at large; an organisation, etc.

**Inclusive tour**

consists of a round trip or circle trip performed in whole or in part by air, organised by a tour operator and offered to the public at a comprehensive price including besides air transport, accommodation for the duration of the trip, surface transport and, where appropriate, other amenities.

**Advance booking charters**

Charter flights operated under Class 2 licences between the UK and territories overseas in respect of which an operator has sold blocks of seats to one or more licensed travel organisers for resale to passengers. Advance details of sales to travel organisers and sales of seats to passengers have to be notified to the Civil Aviation Authority.

**Sole-use charters**

are those where the charterer has exclusive use of the whole capacity of the aircraft and does not dispose of any of it to third persons for reward.

**Licence**

means an air transport licence granted under Section 22 of the Civil Aviation Act 1971.

**CLASSES OF LICENCE**

**Class 1** authorises scheduled service flights;

**Class 2** authorises advance booking charter flights;

**Class 3** authorises inclusive tour charter flights;

**Class 4** authorises other charter flights for the carriage of passengers;

**Class 5** authorises substitute charter flights;

**Class 6** authorises charter flights for the carriage of cargo and attendants;

**Class 7** authorises sole-use charter flights.

**NB** These definitions are not intended as a comprehensive statement of each type of licence. They define the general purpose of the types of flights authorised by each class of licence. The specification for each class of licence is published in the Civil Aviation Authority Official Record Series 1.

**Exempt operations**

are operations for which a licence is not required. The Civil Aviation Authority in pursuance of its powers under paragraph (a) of Section 21 (2) of the Civil Aviation Act 1971 has by an instrument dated 29 March 1972 and later instruments specified a number of types of flights for which a licence is not required. The specifications of such flights are published in the Authority's Official Record Series 1 but typical examples are ambulance flights, aircrew training and test flights, Government charters, helicopters carrying externally suspended loads, etc.

**Cargo**

means the weight of any property carried on an aircraft including the weight of vehicles carried, mail and diplomatic bags, but excluding passengers' baggage. When related to the activity of an airline or airlines, cargo uplifted means the number of tonnes of revenue cargo that is obtained by counting each tonne of cargo on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight. The only exception to this is for cargo flown on both the international and domestic stages of the same flight which is considered in competition both as a domestic and an international shipment or despatch.

When related to the activity of an airport it is usual to measure cargo as uplifted and set down. Cargo in transit through the airport on the same aircraft is excluded as is mail, company stores, excess baggage, and diplomatic bags picked up and set down.

## Appendix B Measures and their Computation

The Civil Aviation Authority follows closely the statistical practices of the International Civil Aviation Organisation.

<b>Aircraft accident</b>	An occurrence associated with the operation of an aircraft which takes place between the time any person boards the aircraft with the intention of flight until such time as all such persons have disembarked, in which (a) any person suffers death or serious injury as a result of being in or upon the aircraft or by direct contact with the aircraft or anything attached thereto, or (b) the aircraft incurs damage or structural failure which adversely affects the structure strength, performance or flight characteristics of the aircraft and which would normally require major repair or replacement of the affected component.
<b>Aircraft days available</b>	The sum of the number of days each aircraft is available for use during the year. This figure includes days required for maintenance and overhaul but it does not include days between the date of purchase and the date actually placed in service, days out of service due to major accidents or conversion, days when an aircraft is in possession of others or is not available because of government action such as grounding by government regulatory agencies.
<b>Aircraft departures</b>	The number of take-offs of aircraft. For statistical uses, departures are equal to the number of landings made or flight-stages flown.
<b>Aircraft hours</b>	An aircraft hour is said to be performed when an aircraft operates one hour; aircraft hours are measured on the basis of block-to-block time.
<b>Aircraft hours flown per day</b>	This is an average per aircraft measure computed by dividing the actual hours of use by the number on days on which the aircraft are available.
<b>Aircraft kilometres performed</b>	Aircraft kilometres equal the sum of the products obtained by multiplying the number of flights performed by the stage distance.
<b>Aircraft movements</b>	An aircraft take-off or landing at an airport. For airport traffic purposes one arrival and one departure are counted as two movements.
<b>All cargo services</b>	Services relating to scheduled or non-scheduled flights performed by aircraft carrying loads other than passengers, i.e. freight, baggage, mail.
<b>Baggage</b>	Personal property of passengers and crew carried on an aircraft by agreement with the operator.
<b>Block-to-block/ chock-to-chock time</b>	The total number of hours (and minutes) measured from the time the aircraft moves from the loading point until it stops at the unloading point.
<b>Capacity offered per aircraft hour</b>	This is an average per aircraft computed by dividing the tonne-kilometres available by the related aircraft hours of flight.
<b>Capacity offered per flight</b>	This is an average per aircraft computed by dividing the tonne-kilometres available by the related number of aircraft departures.
<b>Cargo (or mail) tonne-kilometres performed</b>	A metric tonne of cargo carried one kilometre. Cargo tonne-kilometres equal the sum of the products obtained by multiplying the number of tonnes of cargo, diplomatic bags carried on each flight stage by the stage distance. Mail tonne-kilometres are computed in the same way.

<b>Cargo (or mail) tonnes carried</b>	The number of tonnes of cargo carried is obtained by counting each tonne of cargo or mail on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight. The only exception to this is for cargo flown on both the international and domestic stages of the same flight, which is considered in computation both as a domestic and an international shipment or despatch. The same principle is used in calculating mail tonnes carried.
<b>Distance flown per passenger</b>	The average distance flown per passenger is computed by dividing the passenger-kilometres by the related number of passengers carried.
<b>Distance flown per tonne of cargo</b>	The average distance flown per tonne of cargo is computed by dividing the cargo tonne-kilometres performed by the related number of tonnes of cargo carried.
<b>Flights (commercial air transport)</b>	The operation of aircraft on a stage or number of stages with an unchanging flight number is counted as one flight. (Technical stops are not counted.) An air transport operation having both international and domestic stages would be counted as an international flight and also a domestic flight.
<b>Passenger-kilometres performed</b>	A passenger-kilometre is performed when a passenger is carried one kilometre. Calculation of passenger-kilometres equals the sum of the products obtained by multiplying the number of revenue passengers carried on each flight stage by the stage distance. The resultant figure is equal to the number of kilometres travelled by all passengers.
<b>Passenger load factor</b>	Passenger-kilometres performed divided by seat-kilometres available and expressed as a percentage.
<b>Passenger revenue per traffic-unit</b>	This is a type of financial measurement which relates the passenger traffic applicable to the passenger revenues. It is computed by dividing passenger revenues by the passenger-kilometres performed.
<b>Passengers carried</b>	The number of passengers carried is obtained by counting each passenger on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight, with a single exception that a passenger flying on both the international and domestic stages of the same flight is counted as both a domestic and an international passenger.
<b>Passengers carried per aircraft</b>	The average number of passengers per aircraft is computed by dividing passenger-kilometres by the related aircraft kilometres flown.
<b>Payload capacity</b>	Total of aircraft capacity available for the carriage of revenue load (passengers, baggage, cargo and mail) measured in metric tonnes.
<b>Payload capacity per aircraft</b>	This is an average per aircraft computed by dividing the tonne-kilometres available by the related aircraft kilometres flown.
<b>Payload carried</b>	The revenue load of passengers, baggage, cargo and mail carried in the aircraft as measured in metric tonnes.
<b>Seat-kilometres available</b>	A seat-kilometre is available when a seat is flown one kilometre. Seat-kilometres available are equal to the sum of the products obtained by multiplying the number of passenger seats available for sale on each flight stage by the stage distance. Seats not actually available for the carriage of passengers because of the weight of fuel or other load are excluded in the calculations.

<b>Seats available per aircraft</b>	This is an average per aircraft computed by dividing the seat-kilometres available by the related aircraft kilometres flown.
<b>Speed flown per aircraft</b>	This is an average per aircraft measure computed by dividing the aircraft kilometres flown by the related aircraft hours of flight.
<b>Stage distance flown per aircraft</b>	The average stage distance flown per aircraft is computed by dividing the aircraft kilometres flown by the related number of aircraft departures.
<b>Tonne-kilometres available</b>	A metric tonne of available payload space flown one kilometre. Tonne-kilometres available equals the sum of the products obtained by multiplying the number of tonnes available for the carriage of revenue load (passengers, cargo and mail) on each flight stage by the stage distance.
<b>Tonne-kilometres performed</b>	A metric tonne of revenue load carried one kilometre. Tonne-kilometres performed equals the sum of the products obtained by multiplying the number of tonnes of revenue load carried on each flight stage by the stage distance.
<b>Tonnes available</b>	The capacity of the aircraft for the carriage of payload measured in tonnes.
<b>Weight load factor</b>	Tonne-kilometres performed divided by tonne-kilometres available and expressed as a percentage.
