Foreword

1 CONTENT

- 1.1 *CAA Monthly Statistics* is prepared by the Civil Aviation Authority with the co-operation of the United Kingdom airport and airline operators; some of this information is required by the Civil Aviation Act, 1971. Statistics for the Channel Islands airports are provided by the Commandant for Jersey Airport and the Office of the Lieutenant Governor for Guernsey and Alderney Airports. The assistance from all these authorities is gratefully acknowledged.
- 1.2 Some of the figures included in *CAA Monthly Statistics* are provisional only and may be revised in later issues. Figures contained in monthly and quarterly tables have not been seasonally adjusted, but figures are given, in the tables covering past years, for the most recent six months and the corresponding six months one year earlier.
- 1.3 Tables 13, 16-19 and 20 have been revised with effect from January 1977. Figures given in all the Tables are now for the current month only, instead of a monthly average of the latest three months. Tables 13 and 21 have been expanded so as to enable freight carried on all-freight flights to be separated from that carried on passenger flights, and to show a breakdown between International and Domestic and Scheduled and Non-Scheduled Traffic.
- 1.4 Tables 3-7 have been revised with effect from July 1977 and Tables 8-9 with effect from January 1978. Figures given in the Tables are now actuals for each quarter or year instead of a monthly average of three months or twelve months.
- 1.5 Table 19 was withdrawn after December 1977 because of misreporting at certain airports which led to anomalies in the published figures. From October 1978 the table is produced in a simplified form.

2 CONVENTIONS

- 2.1 **Symbols and Abbreviations** The following are used throughout:

+ = UK Customs airport
.. = not available
— = nil or less than half the final digit shown
n.e.i. = not elsewhere included
a.t-km = available tonne-kilometres

A.T. Movements = Air Transport Movements

- 2.2 **Rounding of Figures** In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

- 2.3 **Units of Measurement** Metric measurements are used throughout *CAA Monthly Statistics*.

Tonne = 1000 kilograms
Tonne-kilometres = The product obtained by multiplying the number of tonnes carried by the distance flown measured in kilometres

Conversion factors (foot/pound system to metric system)

1 short ton (2000 lbs) = 0.9072 tonnes
1 ton (2240 lbs) = 1.0160 tonnes
1 statute mile (5280 feet) = 1.6093 kilometres
1 short ton-mile = 1.4600 tonne-kilometres

The explanations of other terms used throughout the Tables are contained in the section on Definitions immediately following the Tables.

3 ENQUIRIES

- 3.1 **Statistics** Enquiries concerning the information in *CAA Monthly Statistics* should be addressed to:

Civil Aviation Authority
Room T415
CAA House Tel. 01 379 7311 Ext. 2504 (Airline Statistics and General Enquiries)
45/59 Kingsway
London WC2B 6TE Ext. 2519 (Airport and Air Passenger Statistics)

- 3.2 **Distribution** Enquiries concerning orders and subscriptions should be addressed to:

Civil Aviation Authority
Printing and Publication Services
Greville House
37 Gratton Road
Cheltenham
Glos GL50 2BN

- 4 **CIVIL AVIATION STATISTICS FOR EARLIER YEARS** Statistics for the period from January 1968 to December 1972 were published in the Civil Aviation Series of the Department of Trade & Industry's *Business Monitors*.

The series comprise:

CA. 1	<i>Airport activity</i>	(Monthly)
CA. 2	<i>Air passengers</i>	"
CA. 3	<i>Air freight & mail</i>	"
CA. 4	<i>Airline operations</i>	"
CA. 5	<i>Airline operations</i>	(Quarterly)
CA. 6	<i>Domestic passenger traffic</i>	"
CA. 7	<i>Air passengers - international and cabotage</i>	"
CA. 8	<i>Airline financial statistics</i>	(Annually - 1968 to 1971 only)

Annual versions of CA. 1 to CA. 7 were also published.

Civil Aviation Statistics—October 1979

Activity at UK Airports

1. Air Transport Movements

UK airports handled 83 000 air transport movements during October 1979 (8·2 per cent increase when compared with the same month in the previous year); of which 5·4 per cent were all-cargo movements. The number of scheduled air transport movements rose by 9·5 per cent and the number of charter air transport movements rose by 4·6 per cent. The UK operators' share of scheduled movements rose by 1·2 percentage points to stand at 76·9 per cent of the total and their share of charter movements rose marginally to stand at 87·0 per cent. of the total.

1.1 Air Transport Movements at London Area Airports

The London area airports reported 38 000 air transport movements (5·7 per cent increase when compared to October 1978); of which 5·4 per cent were all-cargo movements. Gatwick reported the greatest increase in movements handled (1 143 additional movements; 12·6 per cent growth) followed by Heathrow with 944 additional movements (4·0 per cent growth) and Luton with 257 additional movements (15·4 per cent growth). Both Southend and Stansted reported decreases in movements handled (233 fewer movements; 18·0 per cent decline and 34 fewer movements; 7·5 per cent decline respectively).

1.2 Air Transport Movements Outside the London Area

UK airports outside the London area handled 45 000 air transport movements (10·3 per cent increase when compared with October 1978); of which 5·7 per cent were all-cargo movements. Liverpool reported the greatest increase in movements handled (6·76 additional movements; 82·7 per cent growth) probably caused by the diversion of continuing work on the runway at Manchester. Edinburgh reported the second highest increase (604 additional movements; 30·6 per cent growth) and Glasgow reported 587 additional movements (14·3 per cent growth). Hawarden reported the greatest decrease in movements (from 88 in October 1978 to nil in October 1979). This was caused by the withdrawal of Air Wales scheduled service. Tees-side reported the second largest decrease (79 fewer movements; 6·8 per cent decline) and Humberside reported 67 fewer movements (12·8 per cent decline).

2. Terminal Passengers

5·2 million terminal passengers used UK airports during October 1979 (8·6 per cent increase when compared with the same month in the previous year).

The number of scheduled passengers rose by 9·5 per cent and the number of charter passengers rose by 5·8 per cent. The UK operators' share of scheduled passengers rose by 1·1 percentage points to stand at 64·9 per cent of the total whilst their share of charter passengers declined marginally to stand at 79·5 per cent of the total.

2.1 Terminal Passengers at London Area Airports

The London area airports handled 3·6 million terminal passengers (8·1 per cent increase when compared with October 1978). Heathrow reported the greatest increase in passengers handled (175 845 additional passengers; 7·3 per cent growth) followed by Gatwick with 100 322 additional passengers (14·7 per cent growth) and Luton with 2 373 additional passengers (1·4 per cent growth). Stansted and Southend each reported falls in the number of passengers handled (7 999 fewer passengers; 24·4 per cent decline and 4 293 fewer passengers; 23·5 per cent decline respectively).

2.2 Terminal Passengers Outside the London Area

Outside the London area, UK airports handled 1·6 million terminal passengers (9·7 per cent increase when compared with October 1978). The greatest increase in passengers handled was reported by Manchester (30 972 additional passengers; 9·5 per cent growth) followed by Glasgow with 20 806 additional passengers (10·2 per cent growth) and Belfast with 19 283 additional passengers (20·5 per cent growth). Kirkwall reported the greatest decrease in passengers handled (3 254 fewer passengers; 26·4 per cent decline) followed by Blackpool with 952 fewer passengers (10·8 per cent decline) and Lydd with 896 fewer passengers (14·2 per cent decline).

2.3 International and Domestic Passengers

3·8 million passengers travelled on international services during October 1979 (7·6 per cent increase when compared with October 1978). The most heavily used international scheduled services were, once again, those to the USA carrying 19·1 per cent of all international scheduled passengers followed by those to France (10·3 per cent) and those to Germany (8·6 per cent). The most heavily used charter services were those to Spain carrying 40·5 per cent of all international charter passengers followed by those to Greece (11·3 per cent) and those to Italy (6·8 per cent). There was an increase in the number of passengers using each of the main domestic services. Glasgow services carried 19·2 per cent more passengers, Belfast services

carried 19·1 per cent more, Isle of Man services carried 13·1 per cent more, London area services carried 12·6 per cent more, Channel Islands services carried 11·3 per cent more. Penzance services carried 3·7 per cent more and Edinburgh services carried 1·3 per cent more.

3. Cargo

UK airports handled 70 000 tonnes of cargo this month (3·0 per cent increase when compared with October 1978); of which 49·4 per cent was carried on all-cargo flights. The number of scheduled tonnes handled rose by 3·6 per cent and the number of charter tonnes rose marginally. The UK operators share of scheduled tonnage rose by 1·9 percentage points to stand at 45·3 per cent of the total and their share of charter tonnage rose by 7·7 percentage points to stand at 92·0 per cent of the total.

3.1 Cargo at London Area Airports

The London area airports handled 57 000 tonnes of cargo (3·7 per cent increase when compared with October 1978) of which 45·0 per cent was carried on all-cargo services. Gatwick reported the greatest increase in tonnage handled (1 941 additional tonnes; 22·9 per cent growth) followed by Heathrow with 1 870 additional tonnes (4·4 per cent growth) and Luton with 195 additional tonnes (49·0 per cent growth). Stansted and Southend each reported a decrease in tonnage handled (1 886 fewer tonnes; 69·5 per cent decline and 90 fewer tonnes; 11·1 per cent decline respectively).

3.2 Cargo Outside the London Area

Outside the London area UK airports handled 13 000 tonnes of cargo (a decline of 0·1 per cent when compared with October 1978); of which 68·4 per cent was carried on all-cargo flights. Liverpool reported the greatest increase in tonnage handled (1 149 additional tonnes; more than one fold growth). This was probably

caused by the diversion of some cargo services during the continuing work on Manchester's runway. The second highest growth was reported by Prestwick (171 additional tonnes; 10·7 per cent growth) followed by Belfast with 110 additional tonnes (30·6 per cent growth). Manchester reported the heaviest fall in tonnage handled (1 150 fewer tonnes; 36·7 per cent decline) followed by Southampton with 218 fewer tonnes (45·4 per cent decline) and Bournemouth with 124 fewer tonnes (15·3 per cent decline).

Output of UK Airlines

The output of UK airlines for all services in October 1979 was 1 165 million available tonne-kilometres, an increase of 12·9 per cent on October 1978.

The scheduled service output of 798 million available tonne-kilometres was 13·4 per cent more than a year earlier. The overall load factor was 63·3 per cent, compared with 59·7 the previous year. Seat kilometres used were 65·2 per cent of those available. Seat factors on domestic and international scheduled services were 64·8 and 65·2 per cent respectively compared with 65·2 and 61·9 per cent a year earlier. The non-scheduled output of 367 million available tonne-kilometres was 11·9 per cent more than in October 1978. Advance Booking Charters and Inclusive Tour Charters on Class 3 licences accounted for 26·7 and 149·3 million available tonne-kilometres respectively compared with 23·1 and 111·1 million a year earlier.

NOTE: Statistics of airport activity, passengers and cargo are derived from data supplied by airports. Airline statistics are based on data supplied by the airlines. Data from these two sources are not strictly comparable. There are small differences in timing and more significantly differences arise because airlines are not asked to report non-revenue passengers and cargo.

Size and Structure of UK Airports and Airlines

Year ended October 1979

London includes Heathrow, Gatwick and Stansted.

S.E. England includes London, Luton, Lydd and Southend.

N. England comprises the airports in England north of a line from the Mersey to the Humber (Manchester, Liverpool, Blackpool, Newcastle, Leeds/Bradford and Tees-side).

Glasgow includes Prestwick and Abbotinch.

- (a) N. France comprises the airports north of the line of 49° latitude.
- (b) Soviet Union and Eastern Europe includes the United Soviet Socialist Republics, Bulgaria, Czechoslovakia, Hungary, Poland, Roumania and the Eastern Zone of Germany but excluding Berlin.
- (c) North Africa includes Algeria, Libya, Morocco and Tunisia.
- (d) Commonwealth countries only.
- (e) Commonwealth countries including Rhodesia.
- (f) Middle East includes Iraq, Iran, Israel, Jordan, Lebanon, Persian Gulf States, Saudi Arabia, Sudan and the United Arab Republic.
- (g) Total is in respect of charter passengers only. Passengers on scheduled flights included in London – Other Italy.
- (h) Total is in respect of charter passengers only. Passengers on scheduled flights included in other routes to Italy.

These figures are based on the origin and destination of passengers as reported to UK airport authorities by UK and foreign airlines. Operators are required to report in respect of each service operated the point of uplift and discharge of each passenger. The figures may not reflect a passenger's entire air journey; the point at which a passenger disembarks from a particular service may not represent their ultimate destination.

Although operators are asked to report all passenger journeys, in some cases the actual point of uplift or discharge is not recorded. In such cases all passengers are allocated to the end point of the service, i.e., the aircraft's ultimate origin or destination. This has been the practice since the 1 January 1976 — before this date missing information was replaced by estimates made by the authority. The figures in this table include all passengers carried on scheduled and charter services excluding those carried on aircraft chartered by government departments.

NOTE: These figures do not include Sumburgh.

Domestic Passengers by Main Routes for October 1979

Table 19

Comparison with a Year Earlier

Origin/Destination		1979	1978	Percentage change
London (a)	Aberdeen	29 924	26 228	14·1

TOTAL		768 431	673 385	14·1

(a) Heathrow, Gatwick and Stansted

Traffic counted in either direction.

The figures show the uplift and discharge of passengers according to the destination and origin of the route. Because of the method of collection of this information there are discrepancies between the reports received from airports on a route, particularly in the case of multi-sector flights. In most cases, however, the discrepancies are small, but in a few cases the figures include an estimated component.

This information has been produced from quarterly returns provided by some 117 operators who are in possession of Air Operators Certificates.

Appendix A Definitions—UK Airport Statistics ^(a)

(a) There are some differences between the definitions used in Appendix A (UK Airport Statistics), and those used in Appendix B (UK Airline Statistics). These arise mainly because UK airlines are not asked to report non-revenue passengers or cargo.

MOVEMENTS

Aircraft movement	An aircraft take-off or landing at an airport. For airport traffic purposes one arrival and one departure are counted as two movements.
Air transport movements	are landings or take-offs of aircraft engaged on the transport of passengers or cargo on commercial terms. All scheduled service movements, whether loaded, empty or positioning; charter movements transporting passengers or cargo and air taxi movements are included.
Empty charter positioning movements	are movements by chartered aircraft moving into position for transport flights or returning to base after such flights.
Other commercial movements	are miscellaneous non air transport movements (eg commercial delivery or ferrying empty aircraft and local flights for the Press, survey companies or farmers).
Local pleasure movements	are commercial flights purely for public entertainment purposes ie air experience flights, joy flights at air displays.
Test and training movements	are movements for the purpose of testing aircraft or airport facilities, or for training flying crew or ground personnel. Also included in this category are demonstration flights by makers or sellers of aircraft and aviation equipment. Aero-club instructional flights are not included in this category.
Other non-Commercial movements	are non-revenue earning movements by air transport operators or manufacturers for the sole purpose of moving their own aircraft, personnel or stores from one place to another, and air transport flights forced to return to base by bad weather, engine failure or other causes.
Private movements	are movements for purely non-commercial purposes by private owners or other private aircraft operators, excluding aero-clubs movements. (See below).
Aero-club movements	are movements operated by aero-club members for instruction or pleasure.
Official movements	are movements for official purposes by British or foreign civil Government Departments excluding air transport movements.
Military movements	are movements exclusively for military purposes.

PASSENGERS

Passengers	All revenue and non-revenue passengers on air transport movement flights.
A terminal passenger	is a passenger joining or leaving an aircraft at the reporting airport. A passenger travelling between two reporting airports is counted twice, one at each airport. A passenger who changes from one aircraft to another, carrying the same flight number (change of gauge) is treated as a terminal passenger.
A transit passenger	is a passenger who arrives at and departs from a reporting airport on the same aircraft which is transiting the airport. Each transit passenger is counted once only and not once on arrival and once on departure.

CARGO

Cargo	is the weight of property carried on an aircraft including for example, the weight of vehicles, excess baggage and diplomatic bags, but excluding passengers' and crews' permitted baggage and mail. When related to the activity at an airport it is usual to measure cargo as uplifted and set down. Cargo in transit through the airport on the same aircraft is excluded as is mail, company stores, excess baggage, diplomatic bags and passengers' and crews' permitted baggage.
--------------	--

TYPES OF SERVICES

- International services** are services flown between the United Kingdom, Isle of Man, Channel Islands and places outside.
- Domestic services** are services flown entirely within the United Kingdom, Isle of Man and Channel Islands.
- Cabotage** here includes traffic carried between territories of the United Kingdom, Isle of Man and Channel Islands, other than domestic services. (For the purposes of these statistics cabotage is shown under International Services.)
- Scheduled services** are those performed according to a published timetable, including those supplementary thereto, available for use by members of the public.
- Non-scheduled or charter services** include all air transport movements other than scheduled services.

Appendix B Definitions—UK Airline Statistics ^(a)

(a) There are some differences between the definitions used in Appendix A (UK Airport Statistics) and those used in Appendix B (UK Airline Statistics). These arise mainly because UK airlines are not asked to report non-revenue passengers or cargo.

CLASSES OF LICENCE

Licence means an air transport licence granted under Section 22 of the Civil Aviation Act 1971.

Class 1 authorises scheduled service flights;

Class 2 authorises advance booking charter flights;

Class 3 authorises inclusive tour charter flights;

Class 4 authorises other charter flights for the carriage of passengers (not being sole use charters);

Class 5 authorises substitute charter flights (except exempted operations) or other airlines using UK registered aircraft;

Class 6 authorises charter flights for the carriage of cargo and attendants;

Class 7 authorises sole-use charter flights (except exempted operations). In practice this means sole-use flights to and from Heathrow or to and from oil rigs.

NB These definitions are not intended as a comprehensive statement of each type of licence. They define the general purpose of the types of flights authorised by each class of licence. The specifications for each class of licence is published in the Civil Aviation Authority Official Record Series 1.

Exempt operations are operations for which a licence is not required. The Civil Aviation Authority in pursuance of its powers under Section 21 (2) of the Civil Aviation Act 1971 has by an instrument dated 29 March 1972 and later instruments specified a number of types of flights for which a licence is not required. The specifications of such flights are published in the Authority's Official Record Series 1 and include all sole-use charter flights other than

- (a) flights to or from a vessel or installation used or intended to be used in connection with oil or gas exploration or production under the sea, not being a vessel or installation still in the course of construction;
- (b) flights for the carriage of cargo or passengers and cargo to, from or within the United Kingdom, Channel Islands and Isle of Man by aircraft having a maximum total weight authorised of 25 000 kg or more;
- (c) flights beginning or ending at London (Heathrow) Airport, being flights for the carriage of passengers by aircraft having more than 10 seats available for occupation by passengers.

Also exempt from 1 August 1979 are substitute charter flights, on behalf of an operator using British registered aircraft, which do not (a) exceed 20% of the number of journeys authorised or advertised, whichever is the less, by the other operator in that year or period (whichever is shorter); or (b) carry more than 10% of the quantity of cargo authorised in that year or period (whichever is the shorter).

The Authority in pursuance of its powers under paragraph (b) of Section 21 (2) of the said Act may also specify in an instrument published in its Official Record, Series II an exemption for a particular flight or series of flights.

Examples of exempted flights are ambulance flights, air-crew training and test flights, Government charters and helicopters carrying externally suspended loads.

TYPES OF SERVICES

International services are services flown between the United Kingdom, Isle of Man, Channel Islands and places outside, and services flown between points outside the United Kingdom, Isle of Man and Channel Islands.

Domestic services are services flown entirely within the United Kingdom, Isle of Man and Channel Islands.

Cabotage	here includes traffic carried between territories of the United Kingdom, Isle of Man and Channel Islands other than domestic services. (For the purposes of these statistics Cabotage is shown under International Services.)
Scheduled services	are those performed according to a published timetable, including those supplementary thereto, and available for use by members of the public.
Non-scheduled or charter services	include all air transport flights other than scheduled services.
Inclusive Tour Charter	means a charter flight for the carriage only of passengers as part of a tour, the charge for which includes carriage by air and accommodation on the surface for the whole or part of the trip.
Advance Booking Charter	means a flight operated between the UK and countries overseas complying with all the conditions set out in Schedule 5, Schedule 5A, Schedule 6 or Schedule 7 to Series 1 of the Authority's Official Record.
Sole-use Charters	are those where the charterer has exclusive use of the whole capacity of the aircraft and does not dispose of any of it to third persons for reward.
Separate Fare Charters	are those where the charterer resells part of the capacity of the aircraft to the public at large, an organisation, etc.

MEASURES AND THEIR COMPUTATION

The Civil Aviation Authority follows closely the statistical practices of the International Civil Aviation Organisation.

Aircraft days available	The sum of the number of days each aircraft is available for use. This figure includes days required for maintenance and overhaul but it does not include days between the date of purchase and the date actually placed in service, days out of service due to major accidents or conversion, days when an aircraft is in the possession of others or is not available because of government action such as grounding by government regulatory agencies.
Aircraft hours	An aircraft hour is said to be performed when an aircraft operates one hour; aircraft hours are measured on the basis of block-to-block times ie the total number of hours measured from the time the aircraft moves from the loading point until it stops at the unloading point.
Aircraft hours flown per day	This is an average per aircraft computed by dividing the actual hours of use by the number of days on which the aircraft is available.
Aircraft kilometres used	Aircraft kilometres equal the sum of the products obtained by multiplying the number of flights performed by the stage distance.
All cargo services	Services relating to scheduled or non-scheduled flights performed by aircraft carrying loads other than passengers, ie cargo, baggage, mail.
Cargo (or mail) tonne-kilometres used	A metric tonne of revenue cargo carried one kilometre. Cargo tonne-kilometres equal the sum of the products obtained by multiplying the number of tonnes of cargo and diplomatic bags carried on each stage flight by the stage distance. Mail tonne-kilometres are computed in the same way.
Cargo	The weight of property carried on an aircraft including for example, the weight of vehicles, excess baggage and diplomatic bags but excluding passengers' and crews' permitted baggage and mail.
Cargo (or mail) tonnes uplifted	The number of tonnes of revenue cargo uplifted is obtained by counting each tonne of cargo or mail on a particular journey (with one flight number) once only and not repeatedly on each individual stage of that journey.

Distance flown per passenger	The average distance flown per passenger is computed by dividing the seat kilometres used by the number of passengers carried.
Seat-kilometres available	A seat-kilometre is available when a seat is flown one kilometre. Seat-kilometres available are equal to the sum of the products obtained by multiplying the number of seats available for sale on each stage flight by the stage distance. Seats not available for the carriage of passengers because of the weight of fuel or other load are excluded from the calculations.
Seat-kilometres used	A seat-kilometre is used when a revenue passenger is carried one kilometre. Calculation of seat-kilometres equals the sum of the products obtained by multiplying the number of revenue passengers carried on each stage flight by the stage distance. The resultant figure is equal to the number of kilometres travelled by all revenue passengers.
Passenger load factor	Saet-kilometres used divided by seat-kilometres available and expressed as a percentage.
Passengers uplifted	The number of passengers uplifted is obtained by counting each revenue passenger on a particular flight (with one flight number) once only and not repeatedly on each individual state of that flight.
Payload capacity	Total of aircraft capacity available for the carriage of revenue load (passengers, baggage, cargo and mail) measured in metric tonnes.
Payload carried	The revenue load of passengers, baggage, cargo and mail carried in the aircraft as measured in metric tonnes.
Revenue passengers	Those who pay 25% or more of the normal applicable fare.
Stage distance flown per aircraft	The average stage distance flown per aircraft is computed by dividing the aircraft kilometres flown by the related number of aircraft departures.
Stage flight	Is that part of an operation beginning when an aircraft takes off and ending when it next lands (including technical stops).
Tonne	1000 kilograms.
Tonne-kilometres available	A metric tonne of available payload space flown one kilometre. Tonne-kilometres available equals the sum of the products obtained by multiplying the number of tonnes available for the carriage of revenue load (passengers, cargo and mail) on each flight stage by the stage distance.
Tonne-kilometres used	A metric tonne of revenue load carried one kilometre. Tonne-kilometres used equals the sum of the products obtained by multiplying the number of tonnes of revenue load carried on each flight stage by the stage distance.
Tonnes available	The capacity of the aircraft for the carriage of payload measured in tonnes.
Weight load factor	Tonne-kilometres used divided by tonne-kilometres available and expressed as a percentage.
