Foreword

- 1 CONTENT** *CAA Annual Statistics* is prepared by the Civil Aviation Authority with the co-operation of the United Kingdom airport and airline operators; some of this information is required by the Civil Aviation Act, 1971. Statistics for the Channel Islands airports are provided by the Commandant for Jersey Airport and the Office of the Lieutenant Governor for Guernsey and Alderney Airports. The assistance from all these authorities is gratefully acknowledged.

2 CONVENTIONS

- 2.1 Symbols and Abbreviations** The following are used throughout:

+	=	UK Customs airport
..	=	not available
—	=	nil or less than half the final digit shown
n.e.i.	=	not elsewhere included
xx	=	not supplied

- 2.2 Rounding of Figures** In tables where figures have been rounded to the nearest final digit there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

- 2.3 Units of Measurement** Metric measurements are used throughout *CAA Annual Statistics*.

Tonne = 1000 kilogrammes

Conversion factors (foot/pound system to metric system)

1 short ton (2000 lbs)	=	0.9072 tonnes
1 long ton (2240 lbs)	=	1.0160 tonnes
1 statute mile (5280 feet)	=	1.6093 kilometres
1 short ton-mile	=	1.4600 tonne-kilometres

The explanations of other terms used throughout the Tables are contained in Appendices A, B and C.

4 OTHER CIVIL AVIATION STATISTICS

4.1 Statistics for the period from January 1968 to December 1972 were published in the Civil Aviation Series of the Department of Trade & Industry's *Business Monitors*.

The series comprise:

CA. 1	<i>Airport activity</i>	(Monthly)
CA. 2	<i>Air passengers</i>	"
CA. 3	<i>Air freight & mail</i>	"
CA. 4	<i>Airline operations</i>	"
CA. 5	<i>Airline operations</i>	(Quarterly)
CA. 6	<i>Domestic passenger traffic</i>	"
CA. 7	<i>Air passengers – international and cabotage</i>	"
CA. 8	<i>Airline financial statistics</i>	(Annually – 1968 to 1971 only)

Annual versions of CA. 1 to CA. 7 were also published.

4.2 Subsequent statistics (except those relating to airline finances) have been published in 'CAA Monthly Statistics', obtainable from the Civil Aviation Authority at the address given in para. 3.2.

4.3 Subsequent statistics relating to airline finances were published separately in 'Financial Results of United Kingdom Airlines 1968–74' (CAP 376), also obtainable from the address given in para. 3.2.

4.4 Previous CAA Annual Statistics publications
"Annual Statistics 1973" (CAP 375)
"Annual Statistics 1974/1975" (CAP 386)
"Annual Statistics 1976" (CAP 406)
"Annual Statistics 1977" (CAP 415)
"Annual Statistics 1978" (CAP 424)
"Annual Statistics 1979" (CAP 431)

4.5 Table 2.20 has been compiled from data collected in a series of Origin/Destination surveys carried out by the Authority during the last six years. The results of these surveys have been summarised and published in the following reports:-
CAP 393 — Scottish and Central England Airports
CAP 423 — Other English Provincial Airports
CAP 430 — London Area Airports

(a) Air Transport Movement statistics at BAA airports include air taxi movements for the first time. Two exceptions are Gatwick, which continues to report air taxi movements as "private movements" rather than air transport movements (the corresponding monthly tables for 1980 showed air taxi movements at BAA airports as private movements) and Aberdeen, where some air taxi movements (about 1000) were incorrectly allocated to "aero club".

(b) September to December only

(a) Air Transport Movement statistics at BAA airports include air taxi movements for the first time. Two exceptions are Gatwick, which continues to report air taxi movements as "private movements" rather than air transport movements (the corresponding monthly tables for 1980 showed air taxi movements at BAA airports as private movements) and Aberdeen, where some air taxi movements (about 1000) were incorrectly allocated to "aero club".

(a) Air Transport Movement statistics at BAA airports include air taxi movements for the first time. Two exceptions are Gatwick, which continues to report air taxi movements as "private movements" rather than air transport movements (the corresponding monthly tables for 1980 showed air taxi movements at BAA airports as private movements) and Aberdeen, where some air taxi movements (about 1000) were incorrectly allocated to "aero club".

(b) September to December 1980 only

NOTES:

- Traffic is only published for a country if the annual total exceeds 17,500 and for city-to-city (with the exception of London) if exceeding 9,500. Exceptionally in the case of the USA, all scheduled traffic is shown, regardless of the amount, to or from gateways specified in the Bermuda II Agreement.
- Other than in the case of the USA, these figures are based on the origin and destination of passengers as reported to UK airport authorities by UK and foreign airlines. Operators are required to report in respect of each service operated, the point of uplift and discharge of each passenger. The figures may not reflect a passenger's entire air journey: the point at which a passenger disembarks from a particular service may not represent his ultimate destination.
- Although operators are asked to report all passenger journeys, in some cases the actual point of uplift or discharge is not recorded. In such cases all passengers are allocated to the end point of the service, i.e. the aircraft's origin or ultimate destination. This has been the practice since 1 January 1976 — before this date missing information was replaced by estimates made by the authority. The figures in this table include all passengers carried on scheduled and chartered services excluding those carried on aircraft chartered by government departments.
- A total alongside a country without any sector traffic shown indicates traffic to/from London only.
- Unst traffic included with effect from September 1980.

The table above shows a national picture of air passenger movements between planning regions and seventeen major UK airports. The information is drawn from origin/destination surveys run by the Authority in 1975, 1976 and 1978 and weighted up to 1980 levels of traffic. Only terminating passengers are included in the table i.e. those passengers who arrive at or depart from an airport by surface modes of transport.

Further information on origin/destination surveys is available as follows:

Part 3

UK Airlines—Financial Results

PART 3 UK Airlines—Financial Results

Introduction

Tables 1 to 6 in this section present estimates in summary form of the financial resources and the operating costs and revenues of the public and private sectors of the United Kingdom air transport industry for the years 1972 — 1979, together with an estimated profit and loss account for the entire industry in 1980.

The summaries have been built up from returns submitted by the individual airlines. These returns are made by all airlines which hold a Class 1, 2, 3, 4, 5, or 6 Licence. Those operators who have a Class 7 and no other class of Licence, are not required to report financial statistics, but the summaries include estimates in respect of their operations. The financial tables exclude the results of British Cargo Airlines, Invicta International and Skyways Aviation, from whom it was not possible to obtain statistics.

The annual summaries are not truly representative of calendar years; they result from the addition of figures for individual financial years closest to the calendar year involved. The estimate in respect of aggregate accounts for 1980 has been based, where possible, on the financial year accounts of individual airlines. Where financial year accounts are not yet available use has been made of the quarterly reports supplied by airlines, taking the four calendar quarters which most closely match the financial years of the airlines in question. The final audited accounts of airlines may differ considerably from the sum of quarterly profit and loss accounts, so, although the 1980 estimate has been constructed to be as nearly comparable with previous years as is possible at this stage, the final results for the year may be appreciably different.

Tables 7 to 9 give the individual results for individual airlines in 1979. The figures are a copy of the information supplied by airlines on the standard returns. They may not correspond with published company accounts, since, where possible, non-airline activities have been excluded.

Details of the operating and traffic statistics reported by each airline for the periods covered by their 1979 financial year are given in Tables 10 to 12.

The airlines whose financial statistics are covered in this Part had an average labour force in 1979 of some 76 000 of which nearly 9 000 were employed overseas. The net output of these airlines is estimated to represent approximately half of one per cent of United Kingdom gross domestic product.

Questions of definition concerning the tables of financial statistics may be answered by reference to Appendix C — UK Airlines financial results — definitions.

Excludes statistics of Air Taxi Operators

Appendix A Definitions—UK Airport Statistics (a)

(a) There are some differences between the definitions used in Appendix A (UK Airport Statistics), and those used in Appendix B (UK Airline Statistics). These arise mainly because UK airlines are not asked to report non-revenue passengers or non-revenue cargo.

MOVEMENTS

Aircraft movement	An aircraft take-off or landing at an airport. For airport traffic purposes one arrival and one departure are counted as two movements.
Air transport movements	are landings or take-offs of aircraft engaged on the transport of passengers or cargo on commercial terms. All scheduled service movements, whether loaded, empty or positioning; charter movements transporting passengers or cargo and air taxi movements are included. For the purpose of these statistics where flights are operated on a sub-charter basis the operator is identified according to the flight number.
Empty charter positioning movements	are movements by chartered aircraft moving into position for transport flights or returning to base after such flights, including empty air taxi movements.
Other commercial movements	are miscellaneous non air transport movements (eg commercial delivery or ferrying empty aircraft and local flights for the Press, survey companies or farmers).
Local pleasure movements	are commercial flights purely for public entertainment purposes ie air experience flights, joy flights at air displays.
Test and training movements	are movements for the purpose of testing aircraft or airport facilities, or for training flying crew or ground personnel. Also included in this category are demonstration flights by makers or sellers of aircraft and aviation equipment. Aero-club instructional flights are not included in this category.
Other non-Commercial movements	are non-revenue earning movements by air transport operators or manufacturers for the sole purpose of moving their own aircraft, personnel or stores from one place to another, and air transport flights forced to return to base by bad weather, engine failure or other causes.
Private movements	are movements for purely non-commercial purposes by private owners or other private aircraft operators, excluding aero-clubs movements. (See below).
Aero-club movements	are movements operated by aero-club members for instruction or pleasure.
Official movements	are movements for official purposes by British or foreign civil Government Departments excluding air transport movements eg movements by aircraft of the Queen's Flight.
Military movements	are movements exclusively for military purposes utilising military aircraft. Military movements at military airfields are not included in these statistics.

PASSENGERS

Passengers	All revenue and non-revenue passengers on air transport movement flights.
A terminal passenger	is a passenger joining or leaving an aircraft at the reporting airport. A passenger travelling between two reporting airports is counted twice, once at each airport. A passenger who changes from one aircraft to another, carrying the same flight number (change of gauge) is treated as a terminal passenger, as is an interlining passenger.
A transit passenger	is a passenger who arrives at and departs from a reporting airport on the same aircraft which is transiting the airport. Each transit passenger is counted once only and not once on arrival and once on departure.

CARGO

Cargo	is the weight of property carried on an aircraft including for example, the weight of vehicles, excess baggage and diplomatic bags, but excluding mail and passengers' and crews permitted baggage. When related to the activity at an airport it is usual to measure cargo as uplifted and set down. Cargo in transit through the airport on the same aircraft is excluded as is mail, company stores, excess baggage, diplomatic bags and passengers' and crews' permitted baggage.

TYPES OF SERVICES

- International Services** are services flown between the United Kingdom, Isle of Man, Channel Islands and places outside.
- Domestic services** are services flown entirely within the United Kingdom, Isle of Man and Channel Islands.
- Cabotage** here includes traffic carried between territories of the United Kingdom, Isle of Man and Channel Islands, other than domestic services. (For the purposes of these statistics cabotage is shown under International Services.)
- Scheduled services** are those performed according to a published timetable, including those supplementary thereto, available for use by members of the public.
- Non-scheduled or charter services** include all air transport movements other than scheduled services.

Appendix B Definitions—UK Airline Statistics ^(a)

(a) There are some differences between the definitions used in Appendix A (UK Airport Statistics) and those used in Appendix B (UK Airline Statistics). These arise mainly because UK airlines are not asked to report non-revenue passengers or non-revenue cargo.

CLASSES OF LICENCE

- Licence** means an air transport licence granted under Section 22 of the Civil Aviation Act 1971.
- Class 1** authorises scheduled service flights;
- Class 2** until March 1980: authorised advance booking charter flights;
from April 1980: authorises the carriage of charter categories other than ITCs and sole use;
- Class 3** authorises inclusive tour charter flights;
- Class 4** until March 1980: authorised other charter flights for the carriage of passengers (not being sole use charters);
from April 1980: authorises the carriage, on the same aircraft, of ITCs and other charter categories, other than sole use;
- Class 5** authorises substitute charter flights (except exempted operations) for other UK airlines using UK registered aircraft;
- Class 6** authorises charter flights for the carriage of cargo and attendants;
- Class 7** authorises sole-use charter flights (except exempted operations). In practice this means sole-use flights to and from Heathrow or to and from oil rigs.
- NB** These definitions are not intended as a comprehensive statement of each type of licence. They define the general purpose of the types of flights authorised by each class of licence. The specifications for each class of licence is published in the Civil Aviation Authority Official Record Series 1.

Exempt operations are operations for which a licence is not required. The Civil Aviation Authority in pursuance of its powers under Section 21 (2) of the Civil Aviation Act 1971 has by an instrument dated 29 March 1972 and later instruments specified a number of types of flights for which a licence is not required. The specifications of such flights are published in the Authority's Official Record Series 1 and include all sole-use charter flights other than

- (a) flights to or from a vessel or installation used or intended to be used in connection with oil or gas exploration or production under the sea, not being a vessel or installation still in the course of construction;
- (b) flights for the carriage of cargo or passengers and cargo to, from or within the United Kingdom, Channel Islands and Isle of Man by aircraft having a maximum total weight authorised of 25 000 kg or more;
- (c) flights beginning or ending at London (Heathrow) Airport, being flights for the carriage of passengers by aircraft having more than 10 seats available for occupation by passengers.

Also exempt are substitute charter flights, on behalf of an operator using British registered aircraft, which do not (a) exceed 20% of the number of journeys authorised or advertised, whichever is the less, by the other operator in that year or period (whichever is shorter); or (b) carry more than 20% of the quantity of cargo authorised in that year or period (whichever is the shorter).

The Authority in pursuance of its powers under paragraph (b) of Section 21 (2) of the said Act may also specify in an instrument published in its Official Record, Series II an exemption for a particular flight or series of flights.

Examples of exempted flights are ambulance flights, air crew training and test flights, Government charters and helicopters carrying externally suspended loads.

TYPES OF SERVICES

International services	are services flown between the United Kingdom, Isle of Man, Channel Islands and places outside, and services flown between points outside the United Kingdom, Isle of Man and Channel Islands.
Domestic services	are services flown entirely within the United Kingdom, Isle of Man and Channel Islands.
Cabotage	here includes traffic carried between territories of the United Kingdom, Isle of Man and Channel Islands other than domestic services. (For the purposes of these statistics Cabotage is shown under International Services).
Scheduled services	are those performed according to a published timetable, including those supplementary thereto, and available for use by members of the public.
Non-scheduled or charter services	include all air transport flights other than scheduled services.
Inclusive Tour Charter	means a charter flight for the carriage only of passengers as part of a tour, the charge for which includes carriage by air and accommodation on the surface for the whole or part of the trip.
Advance Booking Charter	means a flight operated between the UK and countries overseas complying with all the conditions set out in Schedule 5, Schedule 5A, Schedule 6 or Schedule 7 to Series 1 of the Authority's Official Record.
Affinity Group Charter	means a charter flight for the carriage of passengers travelling as members of an Affinity Group which meets the conditions specified in Annex B, Section 1, of the Authority's Official Record Series 1.
Sole-use Charters	are those where the charterer has exclusive use of the whole capacity of the aircraft and does not dispose of any of it to third persons for reward.
Separate Fare Charter	are those where the charterer resells part of the capacity of the aircraft to the public at large, an organisation, etc.

MEASURES AND THEIR COMPUTATION

The Civil Aviation Authority follows closely the statistical practices of the International Civil Aviation Organisation.

Aircraft accident	An occurrence associated with the operation of an aircraft which takes place between the time any person boards the aircraft with the intention of flight until such time as all such persons have disembarked, in which (a) any person suffers death or serious injury as a result of being in or upon the aircraft or by direct contact with the aircraft or anything attached thereto, or (b) the aircraft incurs damage or structural failure which adversely affects the structure strength, performance or flight characteristics of the aircraft and which would normally require major repair or replacement of the affected component.
Aircraft days available	The sum of the number of days each aircraft is available for use. This figure includes days required for maintenance and overhaul but it does not include days between the date of purchase and the date actually placed in service, days out of service due to major accidents or conversion, days when an aircraft is in the possession of others or is not available because of government action such as grounding by government regulatory agencies.
Aircraft hours	An aircraft hour is said to be performed when an aircraft operates one hour; aircraft hours are measured on the basis of block-to-block times ie the total number of hours measured from the time the aircraft moves from the loading point until it stops at the unloading point.

Aircraft hours flown per day	This is an average per aircraft computed by dividing the actual hours of use by the number of days on which the aircraft is available.
Aircraft kilometres used	Aircraft kilometres equal the sum of the products obtained by multiplying the number of flights performed by the stage distance.
All cargo services	Services relating to scheduled or non-scheduled flights performed by aircraft carrying loads other than passengers, ie cargo, baggage, mail.
Cargo (or mail) tonne-kilometres used	A metric tonne of revenue cargo carried one kilometre. Cargo tonne-kilometres equal the sum of the products obtained by multiplying the number of tonnes of cargo and diplomatic bags carried on each stage flight by the stage distance. Mail tonne-kilometres are computed in the same way.
Cargo	The weight of property carried on an aircraft including for example, the weight of vehicles, excess baggage and diplomatic bags but excluding mail and passengers' and crews' permitted baggage.
Cargo (or mail) tonnes uplifted	The number of tonnes of revenue cargo uplifted is obtained by counting each tonne of cargo or mail on a particular journey (with one flight number) once only and not repeatedly on each individual stage of that journey.
Distance flown per passenger	The average distance flown per passenger is computed by dividing the seat kilometres used by the number of passengers carried.
Seat-kilometres available	A seat-kilometre is available when a seat is flown one kilometre. Seat-kilometres available are equal to the sum of the products obtained by multiplying the number of seats available for sale on each stage flight by the stage distance. Seats not available for the carriage of passengers because of the weight of fuel or other load are excluded from the calculations.
Seat-kilometres used	A seat-kilometre is used when a revenue passenger is carried one kilometre. Calculation of seat-kilometres equals the sum of the products obtained by multiplying the number of revenue passengers carried on each stage flight by the stage distance. The resultant figure is equal to the number of kilometres travelled by all revenue passengers.
Passenger load factor	Seat-kilometres used divided by seat-kilometres available and expressed as a percentage.
Passengers uplifted	The number of passengers uplifted is obtained by counting each revenue passenger on a particular flight once only and not repeatedly on each individual stage of that flight.
Payload capacity	Total of aircraft capacity available for the carriage of revenue load (passengers, baggage, cargo and mail) measured in metric tonnes.
Payload carried	The revenue load of passengers, baggage, cargo and mail carried in the aircraft as measured in metric tonnes.
Revenue passengers	Those who pay 25% of more of the normal applicable fare.
Stage distance flown per aircraft	The average stage distance flown per aircraft is computed by dividing the aircraft kilometres flown by the related number of aircraft departures.
Stage flight	Is that part of an operation beginning when an aircraft takes off and ending when it next lands (including technical stops).
Tonne	1000 kilogrammes.
Tonne-kilometres available	A metric tonne of available payload space flown one kilometre. Tonne-kilometres available equals the sum of the products obtained by multiplying the number of tonnes available for the carriage of revenue load (passengers, cargo and mail) on each flight stage by the stage distance.

Tonne-kilometres used A metric tonne of revenue load carried one kilometre. Tonne-kilometres used equals the sum of the products obtained by multiplying the number of tonnes of revenue load carried on each flight stage by the stage distance.

Tonnes available The capacity of the aircraft for the carriage of payload measured in tonnes.

Weight load factor Tonne-kilometres used divided by tonne-kilometres available and expressed as a percentage.

Appendix C Definitions – UK Airline Financial Results

PROFIT AND LOSS ACCOUNT

- 1 *Scheduled passenger* (individually booked seats direct to passenger) Included under this heading are revenues earned in services scheduled and performed according to a published timetable (or from services so regular or frequent as to constitute a recognisably systematic series), which are open to use by members of the public, including revenue earned from extra flights occasioned by overflow traffic from such scheduled services. Excluded from this heading are fares of passengers carried on scheduled services under part-charter arrangements, and other block-booked seats.
- 2 *Scheduled passenger* (all block-booked seats including part-charter) Only the fares of passengers carried on scheduled services whose seats have not been booked individually are shown under this heading.
- 3 *Scheduled excess baggage* includes revenue arising from the transportation of passenger baggage in excess of the fixed free weight and fixed valuation allowance; excess baggage arising from passengers carried under heading 2 is also included.
- 4 *Scheduled cargo, and diplomatic bags* Cargo includes revenue, after deduction of applicable discounts and rebates, on the basis of published tariffs and agreed inter-line pro-rates of through-tariffs.

Cargo revenue also includes revenue from the carriage of diplomatic bags.

- 5 *Scheduled mail* Mail includes: payments received from the carriage of all domestic and foreign mail at prevailing rates, irrespective of the fact that such rates may be fixed in advance or in arrears.
- 6 *Non-scheduled flights* Includes revenue derived from all flights performed for remuneration, including empty flights related thereto, other than those reported as scheduled services in heads 1 and 2. Item 6(e) includes revenues from sales of the whole capacity of an aircraft when the responsibility for the performance of transportation is that of the reporting carrier.
- 7 *Incidental revenues* Includes *net* revenues (ie gross revenues less related direct expenses) from such sources as surface transport; food services; service and maintenance sales; property and other incidental net operating revenues which accrued to the airline from sources other than air transportation. This item also includes *gross* revenues from passengers paying less than 25% of the normal applicable fare; commissions received on sales of transportation on other carriers; 'no-show' and cancellation fees; providing aircraft to other airlines or parties for operations under their control, such as in leasing, chartering or interchange agreements; revenues from capacity equalisation payments arising from pooled services; from the sale of blocked-space to other carriers on aircraft operated by the reporting carrier and any other operating revenues not classifiable in headings 1 to 6.
- 8 *Total operating revenues* The sum of headings 1 to 7.

EXPENSES

- 9 *Flight crew salaries and expenses* Includes pay and allowances, pensions, insurance, travelling and other similar expenses, including crew equipment costs. Pay, allowances and other related expenses of pursers, cabin attendants and passenger service personnel is not to be charged under this account, but included under 'Passenger services' (item 23(a)). Training costs shall not be included in this item (see 14 and 20).

- 10 *Aircraft fuel and oil* Includes non-refundable duties and taxes.
- 11 *Flight equipment insurance* Includes: insurance against accidental damage to flight equipment while in flight and on the ground and insurance against liability occurring from operation of aircraft.
- 12 *Uninsured losses* Includes the expenses incurred but not covered by insurance for which the airline is liable in respect of accidental damage to flight equipment while in flight and on the ground, and liability which has occurred from the operation of aircraft.
- 12 *Rental of flight equipment* Includes expenses incurred for the rental of aircraft and crews from other carriers such as in leasing, chartering and interchange agreements and payments made for capacity equalisation arising from pooled services. This item also includes payments for the purchase of blocked-space on aircraft operated by other carriers, identifying the total amount of such payments separately by footnote.
- 14 *Flight crew training (when not amortised)* Includes the cost of training flight crew, when separately identifiable, if this cost is not to be amortised over two or more years (see also item 20).
- 15 *Flight expenses other than items 9 to 14* Includes expenses pertaining to inflight operation and related standby time of aircraft, which are not classifiable under items 9 to 14 inclusive.
- 16 *Maintenance and overhaul* Includes not only the cost of current maintenance of aircraft, engines, components and spares in an operative condition, but also the cost of repair and overhaul, including certificate of airworthiness overhaul where such is carried out under Government mandatory requirements. Expenditure grouped under this account refers to the cost of engineering labour, not only hourly rated or costed labour, but engineering supervision, planning, inspection, etc., which can be determined as relating solely to engineering work in the particular type of aircraft, or to the particular unit within the airline's organisation. It also includes the cost of materials used in maintaining the flight equipment in an operative condition. The cost can be determined according to the airline's internal methods.

Indirect expenditure arising under the above heading is also charged, whether by direct allocation or by pro-rating or apportionment. This includes items such as: pay or supervisory personnel at maintenance and overhaul shops; pay of engineers and other employees at the maintenance and overhaul shops, including stores and supplies personnel, accounting personnel, timekeepers, etc; travel, training and other expenses of maintenance and overhaul employees; maintenance and insurance of equipment used at the maintenance and overhaul shops, where separately assessed; accommodation costs; office supplies and expenses, telephone and cable costs, transportation costs.

The cost of repair, overhaul and maintenance of the flight equipment by outside contractors and manufacturers, or by specialist units within the airline's organisation, is also included.

If the airline's organisation permits the separate cost of engineering staff at out-stations to be ascertained, then such costs are normally included under this account. When this is not possible, such costs are included in item 22 with a note to this effect.

Where direct and related indirect maintenance of ground facilities cannot be segregated for inclusion under 'Station and other ground expenses' it is included under item 16.

- 17 *Depreciation of aircraft fleet including spares* The historic cost depreciation appropriate to the year included in heading 1 of CAA Form No Stats 252 Airline Balance Sheet.
- 18 *Depreciation of ground property and equipment* The historic cost depreciation appropriate to the year included in heading 1 of CAA Form No Stats 252 Airline Balance Sheet.

Note: Normal depreciation of an asset to be the proportion of the historical cost of the asset which is charged against the operating expenses in a particular year. The accrued normal depreciation of an asset should never exceed the historical cost of that asset.

- 19 *Amortisation of development and pre-operating costs* This item includes charges for the amortisation of capitalised development and pre-operating costs and other intangible assets applicable to air transport.
- 20 *Flight crew training (when amortised)* Includes charges for the training of flight crew, when separately identifiable, and amortised over two or more years (see also item 14).
- 21 (a) *Landing and departure fees* Includes, exclusively, fees levied against the airline for landings and departures of its aircraft.

(b) *Aerodrome en route and other navigation service charges.*
- 22 *Station and ground expenses other than heading 21* Includes such items as: housing, mooring, parking and picketing charges at all airports; pay; allowances and expenses of all station staff engaged in handling and servicing aircraft and load, including flight supervisors, dispatchers and ground radio operators; station accommodation costs; maintenance and insurance of airport facilities, where separately assessed; representation and traffic handling fees charged by third parties for handling the air services of the airline; station stores charges, including local duties on equipment, transport, packing and materials, rental of stores, storekeeper's pay, allowances and expenses, etc.

The cost of providing services to third parties is credited to this account.

When the cost of maintenance expenditures at outstations cannot be segregated for reporting in item 16, it should be reported in item 22 and identified separately with a footnote.

- 23 *Passenger services* Includes:

(a) Pay, allowances and expenses of cabin attendants and passenger service personnel, including pensions, uniforms, insurance, etc; premiums for passenger liability insurance and passenger accident insurance paid by the airline; meals and accommodation, including costs of supplies and personal services furnished to passengers.

(b) Expenses of handling passengers incurred because of interrupted flights, including hotels, meals, taxi fares and other expenses items; costs of other services provided for passengers, such as pay, allowances and expenses of room reservation personnel, and all other services provided for the comfort of passengers in transit.
- 24 *Ticketing, sales and promotion* Includes items such as: pay, allowances and related expenses of all staff engaged in ticketing, sales and promotion activities; accommodation costs; commissions on tickets sales; agency fees for outside services; advertising and publicity through various media and expenses related thereto.
- 25 *General and administrative* Includes expenses incurred in performing the general and administrative functions of the airline and those expenses relating to matters of a general corporate nature, whether separately assessed or apportioned in conformity with the airline's accounting practices.

Note: Overhead costs directly related to operating expense items 9 to 16, 21, 22, 23 and 24 are included in the expense items to which they are related and not in this item 25.
