## FOREWORD

### 1 CONTENT

- 1.1 CAA Monthly Statistics is prepared by the Civil Aviation Authority with the co-operation of the United Kingdom airport and airline operators; some of this information is required by the Civil Aviation Act, 1971 as amended. Statistics for the Channel Islands airports are provided by the Commandant for Jersey Airport and the Office of the Lieutenant Governor for Guernsey and Alderney Airports. The assistance from all these authorities is gratefully acknowledged.
- 1.2 Some of the figures included in CAA Monthly Statistics are provisional only and may be revised in later issues. Figures contained in monthly and quarterly tables have not been seasonally adjusted, but figures are given, in the tables covering past years, for the most recent six months and the corresponding six months one year earlier.

### 2 CONVENTIONS

- 2.1 **Symbols and Abbreviations** The following are used throughout:

+ = UK Customs airport  
.. = not available  
- = nil or less than half the final digit shown  
n.e.l. = not elsewhere included  
a.t-km = available tonne-kilometres  
xx = not supplied  
A.T. Movements = Air Transport Movements

- 2.2 **Rounding of Figures** In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

- 2.3 **Units of Measurement** Metric measurements are used throughout CAA Monthly Statistics.

Tonne = 1000 kilogrammes

Conversion factors (foot/pound system to metric system)

1 short ton (2000 lbs) = 0.9072 tonnes  
1 ton (2240 lbs) = 1.0160 tonnes  
1 statute mile (5280 feet) = 1.6093 kilometres  
1 short ton-mile = 1.4600 tonne-kilometres

The explanations of other terms used throughout the Tables are contained in the section on Definitions immediately following the Tables.

## CIVIL AVIATION STATISTICS-FEBRUARY 1981

### ACTIVITY AT UK AIRPORTS

To enable comparisons to be made between the statistics of February 1981 and those of February 1980, this summary excludes the statistics of Carlisle, Dundee, Londonderry, Manston, Scatsta, Shoreham and Unst for which 1980 data are not available.

#### 1 AIR TRANSPORT MOVEMENTS

During February 1981, UK reporting airports handled 61,000 air transport movements (a fall of 10.5 per cent when compared with the same month in the previous year); of which 8.0 per cent were all-cargo movements. The number of scheduled movements fell by 11.7 per cent and the number of charter movements fell by 7.3 per cent. The UK operators' share of scheduled movements fell by 1.3 percentage points to stand at 75.3 per cent of the total whilst their share of charter movements fell marginally to stand at 93.5 per cent of the total.

##### 1.1 AIR TRANSPORT MOVEMENTS AT LONDON AREA AIRPORTS

The London area airports handled 29,000 air transport movements (a fall of 8.4 per cent when compared with February 1980); of which 7.1 per cent were all-cargo movements. Only Luton reported an increase in movements handled (221 additional movements; 15.2 per cent growth). Heathrow reported the heaviest fall in movements handled (2,137 fewer movements; 10.2 per cent decline) followed by Gatwick with 501 fewer movements (6.4 per cent decline), Southend with 199 fewer movements (24.1 per cent decline) and Stansted with 31 fewer movements (9.9 per cent decline).

##### 1.2 AIR TRANSPORT MOVEMENTS OUTSIDE THE LONDON AREA

UK airports outside the London area handled 32,000 air transport movements (a fall of 12.3 per cent when compared with February 1980); of which 8.8 per cent were all-cargo movements. Cardiff reported the greatest increase in movements handled (55 additional movements; 11.0 per cent growth) followed by Coventry with 38 additional movements (45.8 per cent growth) and Islay with 23 additional movements (21.3 per cent growth). ## OUTPUT OF UK AIRLINES

### 1 ALL SERVICES

During February 1981 the output of UK airlines for all services (excluding air taxi type operations) was 852 million available tonne kilometres (a fall of 3.1 per cent when compared with the same month in the previous year).

## 2 SCHEDULED SERVICES

UK airlines' scheduled services accounted for 689 million available tonne-kilometres (4.4 per cent growth when compared with February 1980). The over-all weight load factor was 59.3 per cent, compared with 57.2 per cent in the same month in the previous year. The seat load factor on scheduled services averaged 57.7 per cent. International and domestic seat load factors averaged 57.6 and 60.3 per cent respectively (compared with 56.3 and 54.2 per cent during the same month in the previous year).

## 3 NON-SCHEDULED SERVICES

163 million tonne-kilometres were made available on UK airlines' non scheduled services (excluding air taxi type operations) during February 1981 (a fall of 25.9 per cent when compared with the same month in the previous year). Inclusive Tour charters, performed on class 3 licences, accounted for 79.7 million available tonne-kilometres (compared with 87.4 million in February 1980) and the seat load factor averaged 84.5 per cent (compared with 83.4 per cent during the same month in the previous year). Advance Booking, Other Separate Fare and Inclusive Tour charters performed

on class 2 and 4 licences accounted for 9.3 million available tonne-kilometres (compared with 7.1 million during February 1980) and the seat load factor averaged 86.3 per cent (compared with 81.4 per cent in February 1980). All-cargo charter services performed on Class 6 licences accounted for 31.2 million available tonne-kilometres (compared with 71.3 million during the same month in the previous year).

**NOTE:** Statistics of airport activity, passenger and cargo are derived from data supplied by airports. Airline statistics are based on data supplied by the airlines. Data from these two sources are not strictly comparable. There are small differences in timing and more significantly differences arise because airlines are not asked to report non-revenue passengers and cargo.

## NOTES

1. Traffic is only published for a country if the annual total exceeds 17,500 and for city-to-city (with the exception of London) if exceeding 9,500. Exceptionally in the case of the USA, all scheduled traffic is shown, regardless of the amount, to or from gateways specified in the Bermuda II Agreement.
2. Other than in the case of the USA, these figures are based on the origin and destination of passengers as reported to UK Airport Authorities by UK and foreign airlines. Operators are required to report in respect of each service operated, the point of uplift and discharge of each passenger. The figures may not reflect a passenger's entire air journey: the point at which a passenger disembarks from a particular service may not represent his ultimate destination.
3. Although operators are asked to report all passenger journeys, in some cases the actual point of uplift or discharge is not recorded. In such cases all passengers are allocated to the end point of the service, i.e. the aircraft's origin or ultimate destination. This has been the practice since 1 January 1976 - before this date missing information was replaced by estimates made by the Authority. The figures in this table include all passengers carried on scheduled and chartered services.
4. A total alongside a country without any sector traffic shown indicates traffic to/from London only.

## Appendix A Definitions - UK Airport Statistics (a)

(a) There are some differences between the definitions used in Appendix A (UK Airport Statistics), and those used in Appendix B (UK Airline Statistics). These arise mainly because UK airlines are not asked to report non-revenue passengers or non-revenue cargo.

### MOVEMENTS

<b>Aircraft movement</b>	An aircraft take-off or landing at an airport. For airport traffic purposes one arrival and one departure are counted as two movements.
<b>Air transport movements</b>	are landings or take-offs of aircraft engaged on the transport of passengers or cargo on commercial terms. All scheduled service movements, whether loaded, empty or positioning; charter movements transporting passengers or cargo and air taxi movements are included. For the purpose of these statistics where flights are operated on a sub charter basis the operator is identified according to the flight number.
<b>Empty charter positioning movements</b>	are movements by chartered aircraft moving into position for transport flights or returning to base after such flights, including empty Air Taxi Movements.
<b>Other commercial movements</b>	are miscellaneous non air transport movements (eg commercial delivery or ferrying empty aircraft and local flights for the Press, survey companies or farmers).
<b>Local pleasure movements</b>	are commercial flights purely for public entertainment purposes ie air experience flights, joy flights at air displays.
<b>Test and training movements</b>	are movements for the purpose of testing aircraft or airport facilities, or for training flying crew or ground personnel. Also included in this category are demonstration flights by makers or sellers of aircraft and aviation equipment. Aero-club instructional flights are not included in this category.
<b>Other non-commercial movements</b>	are non-revenue earning movements by air transport operators or manufacturers for the sole purpose of moving their own aircraft, personnel or stores from one place to another, and air transport flights forced to return to base by bad weather, engine failure or other causes.
<b>Private movements</b>	are movements for purely non-commercial purposes by private owners or other private aircraft operators, excluding aero-clubs movements. (See below)
<b>Aero-club movements</b>	are movements operated by aero-club members for instruction or pleasure.
<b>Official movements</b>	are movements for official purposes by British or foreign civil Government Departments excluding air transport movements e.g. movements by aircraft of the Queen's Flight.
<b>Military movements</b>	are movements exclusively for military purposes utilising military aircraft. Military movements at military airfields are not included in these statistics.

### PASSENGERS

<b>Passengers</b>	All revenue and non-revenue passengers on air transport movement flights.
<b>A terminal passenger</b>	is a passenger joining or leaving an aircraft at the reporting airport. A passenger travelling between two reporting airports is counted twice, once at each airport. A passenger who changes from one aircraft to another, carrying the same flight number (change of gauge) is treated as a terminal passenger, as is an interlining passenger.

**A transit passenger** is a passenger who arrives at and departs from a reporting airport on the same aircraft which is transitting the airport. Each transit passenger is counted once only and not once on arrival and once on departure.

## **CARGO**

**Cargo** is the weight of property carried on an aircraft including for example, the weight of vehicles, excess baggage and diplomatic bags, but excluding mail and passengers' and crews' permitted baggage. When related to the activity at an airport it is usual to measure cargo as uplifted and set down. Cargo in transit through the airport on the same aircraft is excluded as is mail, company stores, excess baggage, diplomatic bags and passengers' and crews' permitted baggage.

## **TYPES OF SERVICES**

**International services** are services flown between the United Kingdom, Isle of Man, Channel Islands and places outside.

**Domestic services** are services flown entirely within the United Kingdom, Isle of Man and Channel Islands.

**Cabotage** here includes traffic carried between territories of the United Kingdom, Isle of Man and Channel Islands other than domestic services. (For the purposes of these statistics cabotage is shown under International Services.)

**Scheduled services** are those performed according to a published timetable, including those supplementary thereto, available for use by members of the public.

**Non-scheduled or charter services** include all air transport movements other than scheduled services.

## Appendix B Definitions - UK Airline Statistics (a)

(a) There are some differences between the definitions used in Appendix A (UK Airport Statistics) and those used in Appendix B (UK Airline Statistics). These arise mainly because UK airlines are not asked to report non-revenue passengers or non-revenue cargo.

### CLASSES OF LICENCE

- Licence** means an air transport licence granted under Section 22 of the Civil Aviation Act 1971, as amended
- Class 1** authorises scheduled service flights;
- Class 2** authorises the carriage of charter categories other than ITC's and sole use;
- Class 3** authorises inclusive tour charter flights;
- Class 4** authorises the carriage, on the same aircraft, of ITC's and other categories, other than sole use;
- Class 5** authorises substitute charter flights (except exempted operations) for other UK airlines using UK registered aircraft;
- Class 6** authorises charter flights for the carriage of cargo and attendants;
- Class 7** authorises sole-use charter flights (except exempted operations). In practice this means sole-use flights to and from Heathrow or to and from oil rigs.

**NB** These definitions are not intended as a comprehensive statement of each type of licence. They define the general purpose of the types of flights authorised by each class of licence. The specifications for each class of licence is published in the Civil Aviation Authority Official Record Series 1.

**Exempt operations** are operations for which a licence is not required. The Civil Aviation Authority in pursuance of its powers under Section 21 (2) of the Civil Aviation Act 1971 has by an instrument dated 29 March 1972 and later instruments specified a number of types of flights for which a licence is not required. The specifications of such flights are published in the Authority's Official Record Series 1 and include all sole-use charter flights other than;

- (a) flights to or from a vessel or installation used or intended to be used in connection with oil or gas exploration or production under the sea, not being a vessel or installation still in the course of construction;
- (b) flights for the carriage of cargo or passengers and cargo to, from or within the United Kingdom, Channel Islands and Isle of Man by aircraft having a maximum total weight authorised of 25 000 kg or more;
- (c) flights beginning or ending at London (Heathrow) Airport, being flights for the carriage of passengers by aircraft having more than 10 seats available for occupation by passengers.

Also exempt from 1 August 1979 are substitute charter flights, on behalf of an operator using British registered aircraft, which do not (a) exceed 20% of the number of journeys authorised or advertised, whichever is the less, by the other operator in that year or period (whichever is shorter); or (b) carry more than 20% of the quantity of cargo authorised in that year or period (whichever is the shorter).

*Section 21(2)(c) and (3)*

The Authority in pursuance of its powers under paragraph (b) of Section 21 (2) of the said Act may also specify in an instrument published in its Official Record, Series 11 an exemption for a particular flight or series of flights.

Examples of exempted flights are ambulance flights, aircrew training and test flights, Government charter and helicopters carrying externally suspended loads.

#### **TYPES OF SERVICES**

- International services** are services flown between the United Kingdom, Isle of Man, Channel Islands and places outside, and services flown between points outside the United Kingdom, Isle of Man and Channel Islands.
- Domestic services** are services flown entirely within the United Kingdom, Isle of Man and Channel Islands.
- Cabotage** here includes traffic carried between territories of the United Kingdom, Isle of Man and Channel Islands other than domestic services. (For the purposes of these statistics Cabotage is shown under International Services.)
- Scheduled services** are those performed according to a published timetable, including those supplementary thereto, and available for use by members of the public.
- Non-scheduled or charter services** include all air transport flights other than scheduled services.
- Inclusive Tour Charter** means a charter flight for the carriage only of passengers as part of a tour, the charge for which includes carriage by air and accommodation on the surface for the whole or part of the trip.
- Advance Booking Charter** means a flight operated between the UK and countries overseas complying with all the conditions set out in Schedule 5, Schedule 5A, Schedule 6 or Schedule 7 to Series 1 of the Authority's Official Record.
- Affinity Group Charter** means a charter flight for the carriage of passengers travelling as members of an Affinity Group which meets the conditions specified in Annex B, Section 1, of the Authority's Official Record Series 1.
- Sole-use Charters** are those where the charterer has exclusive use of the whole capacity of the aircraft and does not dispose of any of it to third persons for reward.
- Separate Fare Charters** are those where the charterer resells part of the capacity of the aircraft to the public at large, an organisation etc.

#### **MEASURES AND THEIR COMPUTATION**

The Civil Aviation Authority follows closely the statistical practices of the International Civil Aviation Organisation.

- Aircraft days available** The sum of the number of days each aircraft is available for use. This figure includes days required for maintenance and overhaul but it does not include days between the date of purchase and the date actually placed in service, days out of service due to major accidents or conversion, days when an aircraft is in the possession of others or is not available because of government action such as grounding by government regulatory agencies.
- Aircraft hours** An aircraft hour is said to be performed when a aircraft operates one hour, aircraft hours are measured on the basis of block-to-block times i.e. the total number of hours measured from the time the aircraft moves from the loading point until it stops at the unloading point.

<b>Aircraft hours flown per day</b>	This is an average per aircraft computed by dividing the actual hours of use by the number of days on which the aircraft is available.
<b>Aircraft kilometres used</b>	Aircraft kilometres equal the sum of the products obtained by multiplying the number of flights performed by the stage distance.
<b>All cargo services</b>	Services relating to scheduled or non-scheduled flights performed by aircraft carrying loads other than passengers, ie cargo, baggage, mail.
<b>Cargo (or mail) tonne-kilometres used</b>	A metric tonne of revenue cargo carried one kilometre. Cargo tonne-kilometres equal the sum of the products obtained by multiplying the number of tonnes of cargo and diplomatic bags carried on each stage flight by the stage distance. Mail tonne-kilometres are computed in the same way.
<b>Cargo</b>	The weight of property carried on an aircraft including for example, the weight of vehicles, excess baggage and diplomatic bags but excluding passengers' and crews' permitted baggage and mail.
<b>Cargo (or mail) tonnes uplifted</b>	The number of tonnes of revenue cargo uplifted is obtained by counting each tonne of cargo or mail on a particular journey (with one flight number) once only and not repeatedly on each individual stage of that journey.
<b>Distance flown per passenger</b>	The average distance flown per passenger is computed by dividing the seat kilometres used by the number of passengers carried.
<b>Seat-kilometres available</b>	A seat-kilometre is available when a seat is flown one kilometre. Seat-kilometres available are equal to the sum of the products obtained by multiplying the number of seats available for sale on each stage flight by the stage distance. Seats not available for the carriage of passengers because of the weight of fuel or other load are excluded from the calculations.
<b>Seat-kilometres used</b>	A seat-kilometre is used when a revenue passenger is carried one kilometre. Calculation of seat-kilometres used equals the sum of the products obtained by multiplying the number of revenue passengers carried on each stage flight by the stage distance. The resultant figure is equal to the number of kilometres travelled by all revenue passengers.
<b>Passenger load factor</b>	Seat-kilometres used divided by seat-kilometres available and expressed as a percentage.
<b>Passengers uplifted</b>	The number of passengers uplifted is obtained by counting each revenue passenger on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight.
<b>Payload capacity</b>	Total of aircraft capacity available for the carriage of revenue load (passengers, baggage, cargo and mail) measured in metric tonnes.
<b>Payload carried</b>	The revenue load of passengers, baggage, cargo and mail carried in the aircraft as measured in metric tonnes.
<b>Revenue passengers</b>	Those who pay 25% or more of the normal applicable fare.
<b>Stage distance flown per aircraft</b>	The average stage distance flown per aircraft is computed by dividing the aircraft kilometres flown by the related number of aircraft departures.
<b>Stage flight</b>	Is that part of an operation beginning when an aircraft takes off and ending when it next lands (including technical stops).
<b>Tonne</b>	1000 kilogrammes.

<b>Tonne-kilometres available</b>	A metric tonne of available payload space flown one kilometre. Tonne-kilometres available equals the sum of the products obtained by multiplying the number of tonnes available for the carriage of revenue load (passengers, cargo and mail) on each flight stage by the stage distance.
<b>Tonne-kilometres used</b>	A metric tonne of revenue load carried one kilometre. Tonne-kilometres used equals the sum of the products obtained by multiplying the number of tonnes of revenue load carried on each flight stage by the stage distance.
<b>Tonnes available</b>	The capacity of the aircraft for the carriage of payload measured in tonnes.
<b>Weight load factor</b>	Tonne-kilometres used divided by tonne-kilometres available and expressed as a percentage.
