Part 2

UK Airlines: Financial results

PART 2 UK Airlines - Financial Results

With effect from data relating to 1981, the requirement for UK airlines to submit financial data on standardised statistical returns has been revised. This change has been made to reduce the burden of statistical reporting placed upon the smaller operators. Financial returns are now collected only from those holders of class 1-6 Air Transport Licences whose fleet has an aggregated maximum take-off weight exceeding 200 tonnes. No estimates have been made for those holders of class 1-6 licences not included or for solely class 7 or air taxi carriers.

For comparability tables 2.1 to 2.6 inclusive which show time-series of data have been recalculated to include only those carriers who met the revised criteria during the years presented. Annual summaries result from the addition of figures for individual financial years closest to the year involved. They are not representative of calendar years.

The standardised profit and loss account return was revised with effect from 1980. It is unfortunately not possible to convert the historic data to the new format and table 2.4 is therefore presented in two parts; table 2.4.1 presents results for 1975-1979 inclusive and table 2.4.2 presents results for 1980-1982. Please note that overall industry estimates for the latest year (1983) have not been made. It may be possible for estimates to be made on an ad hoc basis, for further information please contact the Authority at the address given in the foreword to this publication.

Tables 2.7 to 2.9 inclusive give the individual financial results for individual major airlines in 1982. The figures are a copy of information supplied by airlines on the standard returns. Please note that they may not correspond exactly with published company accounts.

Details of the operating and traffic statistics reported by each airline for the period of their 1982 financial year are included in tables 2.10 to 2.12 inclusive.

Definition of terms contained in the tables of financial statistics may be found in Appendix B - UK Airlines Financial Results - Definitions.

APPENDIX A DEFINITIONS - UK AIRLINE STATISTICS (A)

(a) There are some differences between the definitions of UK airline statistics and those used for UK airport statistics (published in UK Airports - Annual Statistics of Movements Passengers and Cargo) . These arise mainly because UK airlines are not asked to report non-revenue passengers cargo or flights.

CLASSES OF LICENCE

Licence means an air transport licence granted under Section 65 of the Civil Aviation Act 1982.

Class 1 authorises scheduled service flights;

Class 2 authorises the carriage of charter categories other than ITC's and sole use;

Class 3 authorises inclusive tour charter flights;

Class 4 authorises the carriage, on the same aircraft, of ITC's and other categories, other than sole use;

Class 5 authorises substitute charter flights (except exempted operations) for other UK airlines using UK registered aircraft;

Class 6 authorises charter flights for the carriage of cargo and attendants;

Class 7 authorises sole-use charter flights (except exempted operations). In practice this means flights to and from Heathrow or to and from oil rigs.

NB These definitions are not intended as a comprehensive statement of each type of licence. They define the general purpose of the types of flights authorised by each class of licence. The specifications for each class of licence is published in the Civil Aviation Authority Official Record Series 1.

Exempt operations are operations for which a licence is not required. The Civil Aviation Authority in pursuance of its powers under Section 64(2)(a) and (3) of the Civil Aviation Act 1982 has by an instrument dated 2 June 1980 and later instruments specified a number of types of flights for which a licence is not required. The specifications of such flights are published in the Authority's Official Record Series 1 and include all sole-use charter flights other than;

- (a) flights to or from a vessel or installation used or intended to be used in connection with oil or gas exploration or production under the sea, not being a vessel or installation still in the course of construction;
- (b) flights for the carriage of cargo or passengers and cargo to, from or within the United Kingdom, Channel Islands and Isle of Man by aircraft having a maximum total weight authorised of more than 25000 Kg;
- (c) flights beginning or ending at London (Heathrow) Airport, being flights for the carriage of passengers by aircraft having more than 10 seats available for occupation by passengers.

The Authority in pursuance of its powers under paragraph (b) of Section 21 (2) of the said Act may also specify in an instrument published in its Official Record, Series 11 an exemption for a particular flight or series of flights.

Examples of exempted flights are certain substitute charter flights, ambulance flights, aircrew training and test flights, Government charter and helicopters carrying externally suspended loads.

TYPES OF SERVICE

- International services** are services flown between the United Kingdom, Isle of Man, Channel Islands and places outside, and services flown between points outside the United Kingdom, Isle of Man and Channel Islands.
- Domestic services** are services flown entirely within the United Kingdom, Isle of Man and Channel Islands.
- Cabotage** here includes traffic carried between territories of the United Kingdom, Isle of Man and Channel Islands other than domestic services. (For the purposes of these statistics Cabotage is shown under International Services.)
- Scheduled services** are those performed according to a published timetable, including those supplementary thereto, and available for use by members of the public.
- Non-scheduled or charter services** include all air transport flights other than scheduled services.
- Inclusive Tour Charter** means a charter flight for the carriage only of passengers as part of a tour, the charge for which includes carriage by air and accommodation on the surface for the whole or part of the trip.
- Advance Booking Charter** means a flight operated between the UK and countries overseas complying with all the conditions set out in Schedule 5, Schedule 5A, Schedule 6, Schedule 7 or Schedule 9 to Series 1 of the Authority's Official Record.
- Affinity Group Charter** means a charter flight for the carriage of passengers travelling as members of an Affinity Group which meets the conditions specified in Category 1(b) of Annex B to Section 1 of the Authority's Official Record Series 1.
- Sole-use Charters** are those where the charterer has exclusive use of the whole capacity of the aircraft and does not dispose of any of it to third persons for reward.
- Separate Fare Charters** are those where the charterer resells part of the capacity of the aircraft to the public at large, an organisation etc.

MEASURES AND THEIR COMPUTATION

The Civil Aviation Authority follows closely the statistical practices of the International Civil Aviation Organisation.

Aircraft days available The sum of the number of days each aircraft is available for use. This figure includes days required for maintenance and overhaul but it does not include days between the date of purchase and the date actually placed in service, days out of service due to major accidents or conversion, days when an aircraft is in the possession of others or is not available because of government action such as grounding by government regulatory agencies.

Aircraft hours An aircraft hour is said to be performed when a aircraft operates one hour, aircraft hours are measured on the basis of block-to-block times ie the total number of hours measured from the time the aircraft moves from the loading point until it stops at the unloading point.

Average daily Utilisation per A/C (Hours)	This is the total number of aircraft hours flown (passenger and cargo) divided by the number of aircraft days available for the period in question.
Aircraft kilometres	Aircraft kilometres equal the sum of the products obtained by multiplying the number of flights performed by the stage distance.
All cargo services	Services relating to scheduled or non-scheduled flights performed by aircraft carrying loads other than passengers, ie cargo, baggage, mail.
Cargo (or mail) tonne-kilometres used	A metric tonne of revenue cargo carried one kilometre. Cargo tonne-kilometres equal the sum of the products obtained by multiplying the number of tonnes of cargo and diplomatic bags carried on each stage flight by the stage distance. Mail tonne-kilometres used are computed in a similar way.
Cargo	The weight of property carried on an aircraft including for example, the weight of vehicles, excess baggage and diplomatic bags but excluding passengers' and crews' permitted baggage and mail.
Cargo (or mail) tonnes uplifted	The number of tonnes of revenue cargo uplifted is obtained by counting each tonne of cargo or mail on a particular journey (with one flight number) once only and not repeatedly on each individual stage of that journey.
Distance flown per passenger	The average distance flown per passenger is computed by dividing the seat kilometres used by the number of passengers carried.
Passenger load factor	Seat-kilometres used divided by seat-kilometres available and expressed as a percentage.
Passenger Tonne Kilometres Used	A metric tonne of revenue passengers carried one kilometre. Passenger tonne-kilometres equal the sum of the products obtained by multiplying the weight of passengers uplifted on each stage flight by the stage distance.
Passenger uplifted	The number of passengers uplifted is obtained by counting each revenue passenger on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight.
Payload capacity	Total of aircraft capacity available for the carriage of revenue load (passengers, baggage, cargo and mail) measured in metric tonnes.
Payload carried	The revenue load of passengers, baggage, cargo and mail carried in the aircraft as measured in metric tonnes.
Revenue passengers	Those who pay 25% or more of the normal applicable fare.
Seat-kilometres available	A seat-kilometre is available when a seat is flown one kilometre. Seat-kilometres available are equal to the sum of the products obtained by multiplying the number of seats available for sale on each stage flight by the stage distance. Seats not available for the carriage of passengers because of the weight of fuel or other load are excluded from the calculations.
Seat-kilometres used	A seat-kilometre is used when a revenue passenger is carried one kilometre. Calculation of seat-kilometres used equals the sum of the products obtained by multiplying the number of revenue passengers carried on each stage flight by the stage distance. The resultant figure is equal to the number of kilometres travelled by all revenue passengers.
Stage flight	Is that part of an operation beginning when an aircraft takes off and ending when it next lands (including technical stops).

Stage flights	This is computed by dividing the aircraft kilometres flown by the related number of stage flights.
Average Distance	
Tonne	1000 kilogrammes.
Tonne-kilometres available	A metric tonne of available payload space flown one kilometre. Tonne-kilometres available equals the sum of the products obtained by multiplying the number of tonnes available for the carriage of revenue load (passengers, cargo and mail) on each flight stage by the stage distance.
Tonne-kilometres used	A metric tonne of revenue load carried one kilometre. Tonne-kilometres used equals the sum of the products obtained by multiplying the number of tonnes of revenue load carried on each flight stage by the stage distance.
Tonnes available	The capacity of the aircraft for the carriage of payload measured in tonnes.
Weight load factor	Tonne-kilometres used divided by tonne-kilometres available and expressed as a percentage.

APPENDIX B DEFINITIONS - UK AIRLINE
FINANCIAL RESULTS

With effect from 1980, the reporting form on which Profit and Loss Account data was collected was revised. The definitions applicable to the new reporting form are shown in Part B of this appendix.

A PROFIT AND LOSS ACCOUNT (1975-1979)

- 1 Scheduled passenger (individually booked seats direct to passengers) included under this heading are revenues earned in services scheduled and performed according to a published timetable (or from services so regular or frequent as to constitute a recognisably systematic series), which are open to use by members of the public, including revenue earned from extra flights occasioned by overflow traffic from such scheduled services. Excluded from this heading are fares of passengers carried on scheduled services under part-charter arrangements, and other block-booked seats.
- 2 Scheduled passenger (all block-booked seats including part-charter) Only the fares of passengers carried on scheduled services whose seats have not been booked individually are shown under this heading.
- 3 Scheduled excess baggage includes revenue arising from the transportation of passenger baggage in excess of the fixed free weight and fixed valuation allowance; excess baggage arising from passengers carried under heading 2 is also included.
- 4 Scheduled cargo, and diplomatic bags Cargo includes revenue, after deduction of applicable discounts and rebates, on the basis of published tariffs and agreed inter-line prorates of through-tariffs.

Cargo revenue also includes revenue from the carriage of diplomatic bags.
- 5 Scheduled mail Mail includes: payments received from the carriage of all domestic and foreign mail at prevailing rates, irrespective of the fact that such rates may be fixed in advance or in arrears.
- 6 Non-scheduled flights Includes revenue derived from all flights performed for remuneration, including empty flights related thereto, other than those reported as scheduled services in heads 1 and 2. Item 6(e) includes revenues from sales of the whole capacity of an aircraft when the responsibility for the performance of transportation is that of the reporting carrier.
- 7 Incidental revenues Includes net revenues (ie gross revenues less related direct expenses) from such sources as surface transport; food services; service and maintenance sales; property and other incidental net operating revenues which accrued to the airline from sources other than air transportation. This item also includes gross revenues from passengers paying less than 25% of the normal applicable fare; commissions received on sales of transportation on other carriers; 'no-show' and cancellation fees; providing aircraft to other airlines or parties for operations under their control, such as in leasing, chartering or interchange agreements; revenues from capacity equalisation payments arising from pooled services; from the sale of blocked-space to other carriers on aircraft operated by the reporting carrier and any other operating revenues not classifiable in headings 1 to 6.
- 8 Total operating revenues The sum of headings 1 to 7.

EXPENSES

- 9 Flight crew salaries and expenses Includes pay and allowances, pensions, insurance, travelling and other similar expenses, including crew equipment costs.
