UK Airlines: Financial results

PART 2 UK Airlines - Financial Results

With effect from data relating to 1981, the number of UK airlines required to submit financial data has been reduced in order to lessen the burden of statistical reporting placed upon the smaller operators. Financial returns are now collected only from those holders of class 1-6 Air Transport Licences whose fleet has an aggregated maximum take-off weight exceeding 200 tonnes. No estimates have been made for those, therefore, not included.

For comparability tables 2.1 to 2.6 inclusive which show time-series of data have been recalculated to include only those carriers who met the revised criteria during the years presented. Annual summaries result from the addition of figures for individual financial years closest to the year involved. They are not representative of calendar years.

The standardised profit and loss account return was revised with effect from 1980. It is unfortunately not possible to convert the historic data to the new format and table 2.4 is therefore presented in two parts; table 2.4.1 presents results for 1978 and 1979 only and table 2.4.2 presents results for 1980-1985. Please note that overall industry estimates for the latest year (1986) have not been made.

Tables 2.7 to 2.9 inclusive give the individual financial results for individual major airlines in 1985. The figures are supplied by airlines on the standard returns and may not correspond with published company accounts. Data for Virgin Atlantic represents an 18 month period and is excluded from the summary tables.

Details of the operating and traffic statistics reported by each airline for the period of their 1985 financial year are included in tables 2.10 to 2.12 inclusive.

Definition of terms contained in the tables of financial statistics may be found in Appendix B - UK Airlines Financial Results - Definitions.

Appendix A Definitions - UK Airline Statistics

There are some differences between the definitions of UK airline statistics and those used for UK airport statistics published in "UK Airports - Annual Statements of Movements Passengers and Cargo". These arise mainly because UK airline statistics statistics do not include details of non-revenue activity but cover world wide operation by the carriers.

CLASSES OF LICENCE

Licence means an Air Transport Licence granted under Section 65 of the Civil Aviation Act 1982.

Class 1 authorises scheduled service flights;

Class 2 authorises the carriage of charter categories other than ITC's and sole use;

Class 3 authorises inclusive tour charter and travel only charter flights;

Class 4 authorises the carriage, on the same aircraft, of ITC's and other categories, other than sole use;

Class 5 authorises substitute charter flights (except exempted operations) for other UK airlines using UK registered aircraft;

Class 6 authorises charter flights for the carriage of cargo and attendants;

Class 7 authorises sole-use charter flights (except exempted operations). In practice this means sole-use flights to and from Heathrow or to and from oil rigs.

NB These definitions are not intended as a comprehensive statement of each type of licence. They define the general purpose of the types of flights authorised by each class of licence. The specifications for each class of licence are published in the Civil Aviation Authority Official Record Series 1.

Exempt operations are operations for which a licence is not required. The Civil Aviation Authority in pursuance of its powers under Section 64(2)(a) and (b) of the Civil Aviation Act 1982 has by an instrument dated 2 June 1980 and later instruments specified a number of types of flights for which a licence is not required. The specifications of such flights are published in the Authority's Official Record Series 1 and include all sole-use charter flights other than;

(a) flights to or from a vessel or installation located within an area of up to 400 nautical miles from the United Kingdom coastline used or intended to be used in connection with oil or gas exploration or production under the sea, not being

(i) a vessel or installation in transit, or

(ii) a vessel or installation which is located within twelve nautical miles of the United Kingdom coastline,

and which in either case is not performing any work in connection with exploration or production of oil or gas under the sea and is off location for the purpose of construction, inspection, maintenance, repair, transit or lay-up;

- (b) flights for the carriage of cargo or passengers and cargo to, from or within the United Kingdom, Channel Islands and Isle of Man by aircraft having a maximum total weight authorised of more than 25000 Kg;
- (c) flights beginning or ending at London (Heathrow) Airport, being flights for the carriage of passengers by aircraft having more than 10 seats available for occupation by passengers.

The Authority in pursuance of its powers under paragraph (b) of Section 64 (2) of the said Act may also specify in an instrument published in its Official Record, Series 2 an exemption for a particular flight or series of flights.

Examples of exempted flights are certain substitute charter flights, ambulance flights, aircrew training and test flights, Government charter and helicopters carrying externally suspended loads.

TYPES OF SERVICE

International services	are services flown between the United Kingdom, Isle of Man, Channel Islands and points overseas, and services flown between points outside the United Kingdom, Isle of Man and Channel Islands. For the purposes of these statistics services operated between the United Kingdom and its Territories (cabotage) are regarded as international.
Domestic services	are services flown entirely within the United Kingdom, Isle of Man and Channel Islands.
Scheduled services	all services where all the cargo capacity and at least 50% (or such other percentage as may be specified in the licence) of the passenger carrying capacity of the aircraft has been made available by the operator or his agent (without the intervention of a charterer) for purchase by the public.
Non-scheduled or charter services	include all air transport flights other than scheduled services.
Inclusive Tour Charter	means a charter flight for the carriage only of passengers as part of a tour, the charge for which includes carriage by air and accommodation on the surface for the whole or part of the trip.
Travel Only Charter	means a charter flight made in accordance with the conditions set out in Schedule 10 of the Authority's Official Record Series 1.
Advance Booking Charter	means a flight operated between the UK and countries overseas complying with all the conditions set out in Schedule 5, Schedule 5A, Schedule 6, Schedule 7 or Schedule 9 to Series 1 of the Authority's Official Record.
Affinity Group Charter	means a charter flight for the carriage of passengers travelling as members of an Affinity Group which meets the conditions specified in Category 1(b) of Annex B to Section 1 of the Authority's Official Record Series 1.
Sole-use Charters	are those where the charterer has exclusive use of the whole capacity of the aircraft and does not dispose of any of it to third persons for reward.
Separate Fare Charters	are those where the charterer resells part of the capacity of the aircraft to the public, an organisation etc.

MEASURES AND THEIR COMPUTATION

The Civil Aviation Authority follows closely the statistical practices of the International Civil Aviation Organisation.

Aircraft days available	The sum of the number of days each aircraft is available for use. This figure includes days required for maintenance and overhaul but it does not include days between the date of purchase and the date actually placed in service, days out of service due to major accidents or conversion, days when an aircraft is in the possession of others or is not available because of government action such as grounding by government regulatory agencies.
Aircraft hours	An aircraft hour is said to be performed when an aircraft operates one hour. Aircraft hours are measured on the basis of block-to-block times ie measured from the time the aircraft moves from the loading point until it stops at the unloading point.
Average daily Utilisation per A/C (Hours)	This is the total number of aircraft hours flown (passenger and cargo) divided by the number of aircraft days available for the period in question.
Aircraft kilometres	Aircraft kilometres are calculated by multiplying the number of flights performed by the stage distance.
All cargo services	are scheduled or non-scheduled flights performed by aircraft carrying loads other than passengers, ie cargo, baggage, mail.
Cargo (or mail) tonne-kilometres used	are calculated by multiplying the number of tonnes of cargo and diplomatic bags carried on each stage flight by the stage distance. Mail tonne-kilometres used are computed in a similar way.
Cargo	The weight of property carried on an aircraft including for example, the weight of vehicles, excess baggage and diplomatic bags but excluding passengers' and crews' permitted baggage and mail.
Cargo (or mail) tonnes uplifted	are calculated by counting each tonne of revenue cargo or mail on a particular journey (with one flight number) once only and not repeatedly on each individual stage of that flight.
Distance flown per passenger	The average distance flown per passenger is calculated by dividing the seat kilometres used by the number of passengers carried.
Passenger load factor	is calculated by dividing seat-kilometres used by seat-kilometres available and expressing it as a percentage.
Passenger Tonne Kilometres Used	are calculated by multiplying the weight of passengers uplifted on each stage flight by the stage distance.
Passengers uplifted	are calculated obtained by counting each revenue passenger on a particular flight (with one flight number) once only and not repeatedly on each individual stage of that flight.
Payload capacity	Total of aircraft capacity available for the carriage of revenue load (passengers, baggage, cargo and mail) measured in metric tonnes.
Payload carried	The revenue load of passengers, baggage, cargo and mail carried in the aircraft measured in metric tonnes.
Revenue passengers	Those who pay 25% or more of the normal applicable fare.

Seat-kilometres available	are calculated by multiplying the number of seats available for sale on each stage flight by the stage distance. Seats not available for the carriage of passengers because of the weight of fuel or other load are excluded from the calculations.
Seat-kilometres used	are calculated by multiplying the number of revenue passengers carried on each stage flight by the stage distance.
Stage flight	is operated from when an aircraft takes off to when it next lands (including technical stops).
Stage flights Average Distance	is calculated by dividing the aircraft kilometres flown by the related number of stage flights.
Tonne	1000 kilogrammes.
Tonne-kilometres available	are calculated by multiplying the number of tonnes available for the carriage of revenue load (passengers, cargo and mail) on each flight stage by the stage distance.
Tonne-kilometres used	are calculated by multiplying the number of tonnes of revenue load carried on each flight stage by the stage distance.
Tonnes available	The capacity of the aircraft available for the carriage of payload measured in tonnes.
Weight load factor	is calculated by dividing tonne-kilometres used by tonne-kilometres available and expressing it as a percentage.

APPENDIX B DEFINITIONS - UK AIRLINE FINANCIAL RESULTS

With effect from 1980, the reporting form on which Profit and Loss Account data was collected was revised. The definitions applicable to data for 1977-79 are given in Part A and for 1980-84 in Part B below.

A PROFIT AND LOSS ACCOUNT (PRE-1980)

REVENUES

- 1 Scheduled passenger (seats individually booked direct to passengers) Included under this heading are revenues earned in scheduled services, performed where all the cargo capacity and at least 50% (or such other percentage as may be specified in the licence) of the passenger carrying capacity of the aircraft has been made available by the operator or his agent (without the intervention of a charterer) for purchase by the public. Revenue earned from extra flights operated for overflow traffic from such scheduled services is included but excluded from this heading are fares of passengers carried on scheduled services under part-charter arrangements, and other block-booked seats.
- 2 Scheduled passenger (all block-booked seats including part-charter) Only the fares of passengers carried on scheduled services whose seats have not been booked individually are shown under this heading.
- 3 Scheduled excess baggage Includes revenue arising from the carriage of passenger baggage in excess of the fixed free weight and fixed valuation allowance; excess baggage arising from passengers carried under heading 2 is also included.
- 4 Scheduled cargo, and diplomatic bags Includes revenue, after deduction of applicable discounts and rebates, on the basis of published tariffs and agreed inter-line prorates of through-tariffs. Cargo revenue also includes revenue from the carriage of diplomatic bags.
- 5 Scheduled mail Includes payments received from the carriage of all domestic and foreign mail at prevailing rates, irrespective of the fact that such rates may be fixed in advance or in arrears.
- 6 Non-scheduled flights Includes revenue derived from all flights performed for remuneration, including empty positioning flights, other than those reported as scheduled services in 1 and 2. Item 6(e) includes revenues from sales of the whole capacity of an aircraft when the responsibility for the flight is that of the reporting carrier.
- 7 Incidental revenues Includes net revenues (ie gross revenues less related direct expenses) from such sources as surface transport, food services, service and maintenance sales, property and other incidental net operating revenues which accrued to the airline from sources other than air transport. This item also includes gross revenues from passengers paying less than 25% of the normal applicable fare, commissions received on sales of carriage on other carriers, 'no-show' and cancellation fees, providing aircraft to other airlines or parties for operations under their control (such as in leasing, chartering or interchange agreements) revenues from capacity equalisation payments arising from pooled services, from the sale of blocked-space to other carriers on aircraft operated by the reporting carrier and any other operating revenues not classifiable in headings 1 to 6.
- 8 Total operating revenues The sum of headings 1 to 7.

EXPENSES

- 9 Flight crew salaries and expenses Includes pay and allowances, pensions, insurance, travelling and other similar expenses, including crew equipment costs. Pay, allowances and other related expenses of pursers, cabin attendants and passenger service personnel is not to be included here but under item 23(a). Training costs are not included in this item (see 14 and 20).

- 15 Flight expenses other than items 9 to 14 Includes expenses relating to inflight operation and related standby time of aircraft, which are not classifiable under items 9 to 14 inclusive.
- 16 Maintenance and overhaul Includes not only the cost of current maintenance of aircraft, engines, components and spares in an operative condition, but also the cost of repair and overhaul (including certificate of airworthiness overhaul where such is carried out under Government mandatory requirements). Expenditure grouped under this account refers to the cost of engineering labour, not only hourly rated or costed labour, but engineering supervision, planning, inspection, etc., which can be determined as relating solely to engineering work in the particular type of aircraft, or to the particular unit within the airline's organisation. It also includes the cost of materials used in maintaining the flight equipment in an operative condition. The cost can be determined according to the airline's internal methods.

Indirect expenditure arising under the above heading is also included, whether by direct allocation or by pro-rating or apportionment eg pay, travel and training costs of all personnel at maintenance and overhaul shops, maintenance and insurance of equipment used at the maintenance and overhaul shops (where separately assessed), accommodation costs, office supplies and expenses, telephone and cable costs, transport costs.

The cost of repair, overhaul and maintenance of the flight equipment by outside contractors and manufacturers, or by specialist units within the airline's organisation, is also included.

Where direct and related indirect maintenance of ground facilities cannot be segregated for inclusion under item 22 they are included here.

- 17 Depreciation of aircraft fleet including spares is the historic cost depreciation appropriate to the year included in heading 1 of the Airline Balance Sheet.
- 18 Depreciation of ground property and equipment is the historic cost depreciation appropriate to the year included in heading 1 of the Airline Balance Sheet.
- Note: Normal depreciation of an asset to be the proportion of the historical cost of the asset which is charged against the operating expenses in a particular year. The accrued normal depreciation of an asset should never exceed the historical cost of that asset.

- 5 Non-scheduled flights Includes revenue derived from all flights performed for remuneration, including empty positioning flights.

6 Incidental revenues Includes net revenues (ie gross revenues less related direct expenses) from such sources as surface transport, food services, bar and duty free sales, property and other incidental net operating revenues which accrued to the airline from sources other than air transport. This item also includes gross revenues from passengers paying less than 25% of the normal applicable fare, 'no-show' and cancellation fees, providing aircraft to other airlines or parties for operations under their control (such as in leasing, chartering or interchange agreements) revenues from capacity equalisation payments arising from pooled services, from the sale of blocked-space to other carriers on aircraft operated by the reporting carrier and any other operating revenues not classifiable in headings 1 to 5.

7 Total operating revenues The sum of headings 1 to 6.

EXPENSES

8 Flight crew salaries Includes pay, pensions, insurance and crew uniform and equipment costs. Pay and related expenses of pursers, cabin attendants and passenger service personnel is not charged under this account, but included under item 10. Training costs are not included in this item (see 15 and 21), but the salaries of flight crew under training are included.

9 Flight crew allowances and expenses Includes expenses incurred by the airline in respect of meals, travelling and accommodation for flight crew. Similar expenses relating to pursers, cabin attendants and passenger service personnel are not charged under this account, but included under item 11.

10 Cabin crew salaries Includes pay, pensions, uniforms, insurance and equipment.

Passenger and cargo insurance is not included under this heading. Uninsured losses includes the expenses incurred but not covered by insurance for which the airline is liable in respect of accidental damage to flight equipment while in flight and on the ground, and liability which has occurred from the operation of aircraft.

14 Rental of flight equipment Includes expenses incurred for the rental of aircraft and crews from other carriers such as in leasing, chartering and interchange agreements and payments made for capacity equalisation arising from pooled services. This item also includes payments for the purchase of blocked-space on aircraft operated by other carriers.

15 Flight crew training (when not amortised) Includes the cost of training flight crew, when separately identifiable, if this cost is not to be amortised over two or more years (see also item 21). The salaries of flight crew under training are included under item 8.

16 Flight expenses other than items 8 to 15 Includes expenses relating to inflight operation and related standby time of aircraft, which are not classifiable under items 8 to 15 inclusive.

- 17 Maintenance and overhaul This item is subdivided into (a) fixed and (b) and variable costs in order to separate that proportion which is fixed over an accounting year from that which varies with the amount of flying undertaken. The fixed element will include the cost of any engineering bases operated by the airline, and any fixed contracts held with maintenance organisations.

Included are not only the cost of current maintenance of aircraft engines, components and spares in an operative condition, but also the cost of repair and overhaul (including certificate of airworthiness overhaul where such is carried out under Government mandatory requirements). Expenditure grouped under this account refers to the cost of engineering labour, and also the cost of materials used in maintaining the flight equipment in an operative condition. The cost can be determined according to the airline's internal methods.

Indirect expenditure arising under the above heading is also included whether by direct allocation or by pro-rating or apportionment. This will include eg pay, travel and training costs of all personnel at maintenance and overhaul shops, maintenance and insurance of equipment used at the maintenance and overhaul shops (where separately assessed) accommodation costs, office supplies and expenses, telephone and cable costs, transport costs.

The cost of repair, overhaul and maintenance of the flight equipment by outside contractors and manufacturers, or by specialist units within the airline's organisation, is also included.

If the airline's organisation permits the separate costs of engineering staff at out-stations to be ascertained, then such costs should normally be included under this account. When this is not possible, such costs are included in item 25.

Where direct and related indirect maintenance of ground facilities cannot be segregated for inclusion under 'Station costs' it is included under item 17.

- 18 Depreciation of aircraft fleet including spares is the historic cost depreciation appropriate to the year.

Costs which can be specifically identified as being associated with cargo handling are excluded and incorporated in item 34.

The cost of providing services to third parties is charged to this account.

When the cost of maintenance expenditures at outstations cannot be segregated for reporting in item 17, it is reported in item 25.

- 26 Passenger Services (a) Fixed cost, (b) Variable cost. Includes the full cost of meals and other personal services furnished to passengers as part of the fare. Meals, accommodation and other services provided for passengers in transit or affected by aircraft delays or cancellation are also included under this heading. The cost of transit desks should, however, be grouped with station costs. The cost of bar supplies for sale are excluded from this heading, and netted against revenue from this source and included under item 6 (Incidental revenue).

Airlines which are able to split passenger meal costs between fixed and variable components are asked to do so. Fixed costs would include the cost of kitchens and catering staff, while variable costs consist of the passenger-related component, such as food ingredients. Meals bought from outside caterers on a 'per passenger' basis should be entered as a variable cost.

- 27 Passenger embarkation fees Includes embarkation/disembarkation fees and security charges levied by airport authorities on a 'per passenger' basis.

Note: Overhead costs directly related to operating expense items 8 to 17, and 24 to 30 should be included in the expense items to which they are related and not in item 33.

- 34 Specific cargo costs Includes any costs specifically attributed to the carriage of cargo eg insurance premiums against liability to consignors, commissions paid less commissions received on cargo sales, and directly attributable handling and marketing costs. No allowance should be made for an allocation of general flight-related costs to the specific cargo costs heading.
