All rights reserved. If you wish to use or reference this chart for other purposes e.g. within training material for students, then you must contact the CAA for formal agreement.

Controlled Environment
- Continuously managed by the same Part M Subpart G organisation for previous twelve (12) months and maintained by a Part 145 or Part M Subpart F organisation (including a third party maintenance provider if anticipated).
- The aircraft is still considered as being in a controlled environment if it has been continuously managed as stated in M.A.901 (from the date when the last ARC was issued until the date when the extension is performed (this can be up to 30 days less than 12 months).

Extension Date Protocol
- 30 days notice required for new expiration date.
- Extension after ARC expiry date is not allowed.
