

Specification for Diabetes Reports

The UK regulations and the CAA's guidance material for fitness decisions, acceptable treatments and required investigations (if specified) can be found in the medical section of the CAA website (www.caa.co.uk/medical).

The following headings are for guidance purposes only and should not be taken as an exhaustive list. All relevant information should be reported.

Diagnoses

- Type
- Comorbidities

Presenting history and initial investigation and treatment (initial report only)

- Presenting complaint and symptoms (including date of diagnosis)
- Nature of condition, circumstances surrounding onset, precipitating factors

Progress since last report

- Review and management of glucose monitoring, correlated with symptom review
- Changes to treatment
- Number of severe hypoglycaemic episodes in past year
- Loss of hypoglycaemic awareness
- Other relevant medical history
- Current treatment

Screening examination and investigation findings

- Blood tests
 - HbA1c
 - Liver and renal function (eGFR and ACR)
 - Lipids
- Screening for complications
 - Retinopathy report including gradings (for Class 1 & 3 by an ophthalmologist / specialist clinic)
 - Neuropathy
 - Nephropathy
- Cardiovascular risk assessment confirming no evidence of cardiovascular disease
 - See requirements for investigation in the [diabetes certification guidance](#)
 - Risk factors including family history, smoking, alcohol intake and weight (BMI)
 - Blood pressure within acceptable parameters (British Hypertension Guidelines)

Follow up and further investigations / referrals planned or recommended

- Anticipated follow up / frequency of clinical reviews and investigations
- Confirmation disease is well controlled at date of report on stable dose of acceptable medication

Clinical implications

- Any concerns regarding disease progression, treatment compliance or risk of sudden incapacity
