

Getting behind the A/C

Suggested facilitation questions for use by trainers

- What evidence did you observe to indicate that the Pilot's level of Situation Awareness was compromised?
- What do you think were the key root causes that impacted the loss of SA?
- What were the consequences of that loss of SA?
- What would you do to ensure maintenance of your SA?
- The scenario showed distraction in the form of a chatty passenger but what other threats could cause your workload to ramp up?
- How would you manage your workload under these circumstances?
- What evidence did you observe of poor communication?
- Why do you think that this poor communication occurred?
- What could have prevented the mis-communication?
- List some good strategies to utilise when carrying out a checklist
- Where in the scenario did you see examples of critical decision making that had to be made by the pilot?
- What information was required in support of these critical decisions and what options did he have?
