

Dear Sir / Madam,

Tandridge District Council (TDC) welcomes the opportunity to comment in respect of the consultation document, "Consultation on issues affecting passengers' access to UK Airports: a review of surface access".

It is considered by TDC that this particular consultation document relates more to the "Industries" that support and co-exist with Gatwick Airport, rather than "stakeholders" such as this District Council.

Much of what is examined and written about within the document centres on the interaction between the airport and service providers. As such, the Consultation has no significant impact on the community within TDC.

We hope you find our comments of some use.

Kind Regards
