201300068	05/01/2013	EGTT : London (FIR)	EGOE : Ternhill	North	G	ATZ	UNKNOWN	Unknown	1	Infringement of the Ternhill ATZ (Class G) by an unknown low wing a/c.	A/c had been observed to approach Ternhill ATZ from the North West and then entered a descent before carrying out a low flypast of the Longford microlight site, just North of Ternhill and within the ATZ. Manoeuvre was then repeated before the a/c disappeared behind hangar buildings to the North of the airfield.
201300079	06/01/2013	EGTT : London (FIR)	EGOE : Ternhill		G	ATZ	UNKNOWN	Reciprocating	1	Infringement of the Ternhill ATZ (Class G) by an unknown flexi-wing microlight.	The microlight had departed at 1538hrs from a microlight site to the North of Ternhill within the ATZ. No radio contact was made with Ternhill. Ternhill was active at the time with motor-gliders conducting engine-stopped rejoins from the North of the field.
201300145	05/01/2013	EGTT : London (FIR)	Humberside ATZ		G	Other	CESSNA	Reciprocating	1	Infringement of the Humberside ATZ (Class G) by a C152 (initially unknown) squawking 7000. No Mode C. A/c then flew a reciprocal tack passing through final approach R/W20, holding area and instrument approach area. Inbound airliner given an extended approach.	ATC traced the a/c on landing and spoke to the pilot. Appropriate CAA action to be taken as a result of this incident.

201300251	13/01/2013	EGTT : London (FIR)	EGSL : Andrewsfield	S	D	CTA	CESSNA	Reciprocating	1	Alleged infringement of the Stansted CTA (Class D) by a C152 indicating 2300ft. Standard separation maintained.	
201300251	13/01/2013	EGTT : London (FIR)	EGSL : Andrewsfield	S	D	CTA	AIRBUS	Turbofan	4	Alleged infringement of the Stansted CTA (Class D) by a C152 indicating 2300ft. Standard separation maintained.	
201300265	12/01/2013	EGTT : London (FIR)	EGXY-Syerston		G	ATZ	OTHER	Reciprocating	1	TL 2000 Sting infringed the Syerston ATZ (Class G) at 1700ft. Once realising his position, the pilot made a steep right turn to exit the ATZ. The pilot called Syerston to apologise. No Syerston a/c were airborne and none were being launched.	
201300410	17/01/2013	EGTT : London (FIR)	Syerston		G	ATZ	PIPER	Reciprocating	1	Infringement of the Syerston ATZ Gliding Site (Class G) by a PA38 at approx 1000 - 1200ft. No radio calls were heard. Infringement was within the published hours of ATZ however no flying was taking place at the time of the incident.	Radar controller at Waddington was contacted and confirmed the PA38's callsign, allegedly stating they had been in contact with the PA38 previously but PA38 was squawking 7000 and not under their control. Reporter also alleged Waddington stated pilot had enquired whether flying was taking place at Syerston and pilot had stated they were at 2000ft descending to 1500ft to the West.
201300714	25/01/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	7 NE	D	CTR	PIPER	Reciprocating	1	Infringement of the Southampton CTR (Class D) by a PA28 squawking 7000 indicating 1900ft. Blind transmission made with no response. Standard separation maintained.	Student under instruction.

201301081	02/02/2013	EGTT : London (FIR)	EGSX : North Weald	3nm NW	G	Restrict ed area	PIPER	Reciprocating	1	PA28 infringed the Stansted TMZ (Class G). Pilot of the a/c failed to switch the transponder to 'standby' when changing squawk. Inbound a/c given avoiding action and therefore delayed. Standard separation maintained.	Appropriate remedial action is being taken.
201301081	02/02/2013	EGTT : London (FIR)	EGSX : North Weald	3nm NW	G	Restrict ed area	BOEING	Turbofan	2	PA28 infringed the Stansted TMZ (Class G). Pilot of the a/c failed to switch the transponder to 'standby' when changing squawk. Inbound a/c given avoiding action and therefore delayed. Standard separation maintained.	Appropriate remedial action is being taken.
201301085	02/02/2013	EGTT : London (FIR)	VRP M11 J4		D	CTA	PIPER	Reciprocating	1	PA28 infringed the London City CTA (Class D). Once ATC had notified pilot, he corrected course. Pilot subsequently appreciates that his heading did not allow for drift in strong wind conditions.	
201301131	04/02/2013	EGTT : London (FIR)	WOD	5 E	A	CTR	PIPER	Reciprocating	1	Infringement of the London CTR (Class A) by a PA28 squawking 7000. Outbound airliner vectored clear of the infringer. Standard separation maintained.	Operator alerted. Pilot error acknowledged.
201301156	04/02/2013	EGTT : London (FIR)	EGMC (SEN): Southend		G	ATZ	AVIONS ROBIN	Reciprocating	1	Infringement of the Southend ATZ (Class G) by a R2120U at 2000ft resulting in an inbound A319 being broken from the ILS at 8DME under a DS. Separation minima was maintained.	Pilot subsequently apologised.

201301156	04/02/2013	EGTT : London (FIR)	EGMC (SEN): Southend		G	ATZ	AIRBUS	Turbofan	2	Infringement of the Southend ATZ (Class G) by a R2120U at 2000ft resulting in an inbound A319 being broken from the ILS at 8DME under a DS. Separation minima was maintained.	Pilot subsequently apologised.
201301183	04/02/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	9nm S	D	CTA	PIPER	Reciprocating	1	Infringement of the Birmingham CTA (Class D) Area 1 by a PA28 at 3500ft. Once instructed, the a/c headed South, out of the zone and the pilot apologised for the infringement saying he got caught out by strong winds. Separation minima was maintained.	
201301184	02/02/2013	EGTT : London (FIR)	Hinton Drop Zone		G	Other	CESSNA	Reciprocating	1	C172 flew through Hinton Drop Zone whilst active. DZ controller became aware of the C172's presence and alerted para drop a/c. Para drop suspended until C172 was clear of the zone.	First para drop had taken place at 5000ft. Para drop a/c then climbed to FL130 for the second drop at which point the C172 was observed overhead the zone.
201301192	05/02/2013	EGTT : London (FIR)	D138		G	Danger area	PIPER	Reciprocating	1	Infringement of Danger Area D138 by a PA28.	Pilot was briefed by ATC on landing regarding Southend being a Danger Area AIS and was advised to contact Southend ATC in future when flying within 10-15nm of Southend.
201301444	12/02/2013	EGTT : London (FIR)	Syerston		G	Other	BELL	Turboshaft	1	Infringement of the Syerston ATZ (Class G) by a Bell 206 at 1700ft.	CAA Closure: No further action possible due to elapsed time.

201301547	14/02/2013	EGTT : London (FIR)	Honiley		D	CTR	CESSNA	Reciprocating	1	Infringement of the Birmingham CTR (Class D) areas 1 and 2 and the Coventry ATZ (Class G) by a C152 at 3000ft. Traffic info given to inbound a/c. Blind calls made with no response. Standard separation maintained.	A/c had not been displaying Mode C. Student pilot stated that he had been flying at 3000ft when speaking to ATC after landing. Student pilot had got lost and called D&D. Flight Instructor notified. Investigation under 201214580.
201301582	15/02/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	9 NE	D	CTR	ROBINSON	Reciprocating	1	Infringement of the Gatwick CTR (Class D) by an R44 at 1800ft. Two inbound a/c vectored clear of the infringer. Standard separation maintained.	
201301605	15/02/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	6 NW	D	CTR	JABIRU	Reciprocating	1	Infringement of the Southampton CTR (Class D) by a Jabiru showing as a primary contact only. Standard separation maintained.	Pilot of a/c involved later called ATC.
201301607	16/02/2013	EGTT : London (FIR)	SAM	10nm N	D	CTA	MOONEY	Reciprocating	1	Infringement of the Solent CTA (Class D) by a Mooney M20 at 2900ft squawking 7000. Blind transmissions made with no response. Standard separation maintained.	Appropriate CAA action taken as a result of this incident.
201301613	15/02/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham		D	CTA	CESSNA	Reciprocating	1	A C206 infringed the Birmingham CTA (Class D) at 2000ft. Attempts were made to contact the a/c to no avail. No loss of separation occurred during the infringement.	

201301623	16/02/2013	EGTT : London (FIR)	D147		G	Danger area	PIPER	Reciprocating	1	Infringement of Danger Area (D147) by a PA28 at 5000ft. The controller attempted to keep the PA28 clear of the area but the a/c briefly infringed it before exiting to the North. Separation minima was maintained.	
201301631	17/02/2013	EGTT : London (FIR)	WOD	4 S	A	TMA	PIPER	Reciprocating	1	Infringement of the LTMA (Class A) by a PA28 at 2900ft. A/c instructed to descend immediately to 2400ft and pilot advised a/c was inside CAS. Instruction complied with. Standard separation maintained.	Pilot attributed the incident to a turbulence encounter while flying too close to CAS.☐ CAA Closure: Appropriate advice given.
201301632	17/02/2013	EGTT : London (FIR)	EGNM (LBA): LEEDS BRADFORD	13 SE	D	CTA	PIPER	Reciprocating	1	Infringement of the Leeds Bradford CTA (Class D) by a PA28 at 3600ft. Pilot advised and given transit clearance. Standard separation maintained.	
201301681	17/02/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	15 E	A	TMA	VANS	Reciprocating	1	Infringement of the LTMA (Class A) by a Vans RV8 at 4900ft squawking 7000. Standard separation maintained.	CAA Closure: No further action possible due to elapsed time.
201301689	16/02/2013	EGTT : London (FIR)	Wethersfield		G	Other	PIPER	Reciprocating	1	Overflight of the Wethersfield Gliding Site by a PA28 at 1300ft. Gliders were airborne at the time but were not in the vicinity of the PA28.	

201301729	19/02/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	13 SSE	D	CTA	TECNAM	Reciprocating	1	Infringement of the Birmingham CTA2 (Class D) by a Tecnam P2002 at 3000ft squawking 7000. Traffic info given. Standard separation maintained.	DHC8 on LH downwind for R/W33 broken off. Initial blind transmission was met with no response, however, after the DHC8 was broken off, the code changed to listening squawk 0010 and another blind transmission was made. A/c called and, with contact established, the a/c was instructed to descend to 2000ft and given a squawk. Pilot advised ATC on landing that he climbed the a/c above a layer of haze, became disorientated and got lost. Pilot given appropriate advice by the controller.
201301732	19/02/2013	EGTT : London (FIR)	EGTK (OXF): Oxford/Kidlington	2 NW	G	ATZ	DIAMOND	Reciprocating	1	Infringement of the Oxford ATZ (Class G) by a HK36 at 2200ft squawking 7000.	Investigation under 201209618.
201301737	19/02/2013	EGTT : London (FIR)	EGGD (BRS): Bristol/Lulsgate	16 E	D	CTA	SOCATA	Reciprocating	1	Infringement of the Bristol CTA (Class D) by a Socata TB20 at FL50. Departing a/c on EXM SID given an early turn to ensure separation.	Pilot error acknowledged.
201301747	20/02/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	8 SE	D	CTR	AEROSPATIALE	Turboshaft	1	Infringement of the Luton CTR (Class D) by an AS350 at 1000ft. Controller imposed a check all and made several blind transmissions. Pilot called and a/c positively identified. Standard separation maintained.	The pilot is to be de-briefed before his return flight.
201301800	13/02/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	SW	G	Restricted area	CESSNA	Reciprocating	1	Alleged infringement of the Stansted TMZ 2 (Class G) by a C182.	

201301802	15/02/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	7nm NW	D	CTA	OTHER	Reciprocating	1	Infringement of Solent CTA (Class D) by a Calidus Gyroplane at approx 3000ft. The pilot's GPS signalled he was outside the CTA. No loss of separation was reported.	
201301889	23/02/2013	EGTT : London (FIR)	Manchester LLR	S	D	CTR	PIPER	Reciprocating	1	Infringement of the Manchester LLR by a PA28R at 2000ft.	Liverpool Approach were contacted who confirmed they had traffic wearing their squawk in the area routeing to Oulton Park and would instruct it to leave the LLR. PA28 was approx 1nm inside the LLR.
201302077	28/02/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	4 NW	D	CTR	CESSNA	Reciprocating	1	Infringement of the Gatwick CTR (Class D) by a C152 resulting in a loss of separation against two inbound airliners.	CAA Closure:☐ No further action taken due to elapsed time.
201302077	28/02/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	4 NW	D	CTR	UNKNOWN	Turbofan	2	Infringement of the Gatwick CTR (Class D) by a C152 resulting in a loss of separation against two inbound airliners.	CAA Closure:☐ No further action taken due to elapsed time.
201302077	28/02/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	4 NW	D	CTR	UNKNOWN	Turbofan	2	Infringement of the Gatwick CTR (Class D) by a C152 resulting in a loss of separation against two inbound airliners.	CAA Closure:☐ No further action taken due to elapsed time.

201302114	02/02/2013	EGTT : London (FIR)	EGKB (BQH): Biggin hill		G	ATZ	PIPER	Reciprocating	1	Infringement of the Biggin Hill ATZ (Class G) by a PA28. Traffic info given to an inbound a/c.	
201302137	01/03/2013	EGTT : London (FIR)	EGBE (CVT): Coventry	10nm	A	CTA	CESSNA	Reciprocating	1	Infringement of Daventry CTA (Class A) by a C152 at 5200ft and the Birmingham CTA (Class D) when it descended below CAS. Coventry and Birmingham could not make contact with the a/c. East Midlands eventually made contact with the pilot. Separation minima was maintained.	The pilot believed the base of CAS was 5500ft.
201302143	01/03/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	5 NW	D	CTR	PIPER	Reciprocating	1	PA28 infringed the Gatwick CTR (Class D). Farnborough LARS were contacted who turned contact away to leave the CTR to the North. Traffic info was passed to the PA28.	
201302148	02/03/2013	EGTT : London (FIR)	EGLM : White waltham	1.5 S	A	CTR	DIAMOND	Reciprocating	1	Infringement of London CTR (Class A) by a DV20 at 1400ft resulting in a loss of separation against a Heathrow inbound B777. The DV20 was contacted and was instructed to divert West, out of the zone.	ATC unit have spoken to the pilot concerned and lessons appeared to have been learnt.
201302148	02/03/2013	EGTT : London (FIR)	EGLM : White waltham	1.5 S	A	CTR	BOEING	Turbofan	2	Infringement of London CTR (Class A) by a DV20 at 1400ft resulting in a loss of separation against a Heathrow inbound B777. The DV20 was contacted and was instructed to divert West, out of the zone.	ATC unit have spoken to the pilot concerned and lessons appeared to have been learnt.

201302149	02/03/2013	EGTT : London (FIR)	EGSX : North Weald	3nm W	G	Restrict ed area	VANS	Reciprocating	1	Infringement of the Stansted TMZ 2 (Class G) by an RV7 near North Weald. The a/c had no Mode C but displayed Mode S.	
201302154	02/03/2013	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	13nm NE	D	CTR	HUGHES	Turboshaft	1	Infringement of the Manchester CTR (Class D) by a Hughes 369HS at 2400ft. Traffic info was passed. Pilot was conducting cross-country training at the time and later apologised for the infringement.	
201302156	02/03/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	6.5 NE	D	CTR	ROBINSON	Reciprocating	1	Infringement of the Gatwick CTR (Class D) by an R22 resulting in a loss of separation against an outbound B737. Avoiding action and traffic info given.	Student became lost.☐ CAA Closure: Further investigation indicated that this was the third infringement from this training organisation within 12 months. A visit by CAA and NATS representatives is planned.
201302156	02/03/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	6.5 NE	D	CTR	BOEING	Turbofan	2	Infringement of the Gatwick CTR (Class D) by an R22 resulting in a loss of separation against an outbound B737. Avoiding action and traffic info given.	Student became lost.☐ CAA Closure: Further investigation indicated that this was the third infringement from this training organisation within 12 months. A visit by CAA and NATS representatives is planned.
201302167	03/03/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	North West	A	CTA	ROBINSON	Reciprocating	1	Infringement of the London CTA (Class A) by an R44 tracking Southbound with Mode C 1200ft. A321 inbound to Heathrow broken off approach. Separation lost.	CAA Closure: No further action possible due to elapsed time.

201302167	03/03/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	North West	A	CTA	AIRBUS	Turbofan	2	Infringement of the London CTA (Class A) by an R44 tracking Southbound with Mode C 1200ft. A321 inbound to Heathrow broken off approach. Separation lost.	CAA Closure: No further action possible due to elapsed time.
201302179	03/03/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted		G	Restricted area	PITTS	Reciprocating	1	Infringement of the Stansted TMZ (Class G) by a Pitts Special. Traffic info given to an inbound B737.	ATC have discussed this incident with the pilot concerned.
201302212	04/03/2013	EGTT : London (FIR)	DET	E	A	TMA	CESSNA	Reciprocating	1	Infringement of the LTMA (Class A) by a C172 at 4300ft. ATC coordination effected and a/c instructed to descend. Standard separation maintained.	
201302229	02/03/2013	EGTT : London (FIR)	EGVO (ODH): Odiham		G	ATZ	UNKNOWN	Reciprocating	1	Infringement of the Odiham ATZ (Class G) by an unknown a/c squawking 7000 at approx 1500ft agl passing from North to South during gliding operations.	
201302231	03/03/2013	EGTT : London (FIR)	EGVT - Wethersfield		G	Other	OTHER	None		UK AIRPROX 2013/013 - Glider at 550ft commencing RH downwind leg for R/W10 at Wethersfield and a PA28.	PA28 subsequently transited the Stansted TMZ (Class G) whilst not transponding, and was therefore displayed as an unknown contact. A/c turned on its transponder 9mins later and was identified.

201302231	03/03/2013	EGTT : London (FIR)	EGVT - Wethersfield		G	Other	PIPER	Reciprocating	1	UK AIRPROX 2013/013 - Glider at 550ft commencing RH downwind leg for R/W10 at Wethersfield and a PA28.	PA28 subsequently transited the Stansted TMZ (Class G) whilst not transponding, and was therefore displayed as an unknown contact. A/c turned on its transponder 9mins later and was identified.
201302246	03/03/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	SW	A	CTR	VANS	Reciprocating	1	Infringement of the London CTR (Class A) by a Vans RV7 at 1200ft, resulting in a loss of separation against an inbound A319.	Pilot distracted by passenger. ☐ CAA Closure: Pilot to complete refresher training and pass an assessment of navigation competence in his own aircraft.
201302246	03/03/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	SW	A	CTR	AIRBUS	Turbofan	2	Infringement of the London CTR (Class A) by a Vans RV7 at 1200ft, resulting in a loss of separation against an inbound A319.	Pilot distracted by passenger. ☐ CAA Closure: Pilot to complete refresher training and pass an assessment of navigation competence in his own aircraft.
201302321	05/03/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham		D	CTA	CESSNA	Reciprocating	1	Infringement of the Birmingham CTA 2, 4 and 5 (Class D) by a C152 at 2800ft. When contacted, the pilot said he was in strong winds, poor visibility and high workload. Separation maintained.	Training flight. Check all imposed at Birmingham.
201302344	05/03/2013	EGTT : London (FIR)	EGMH (MSE): Manston (Civil)		G	ATZ	AEROSPATIALE	Unknown	1	Infringement of the Manston ATZ (Class G) by a Gazelle seen to cross from East to West at approx 800ft. No contact was made with Manston Radar.	

201302363	03/03/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	10nm W	A	CTR	VANS	Reciprocating	1	Infringement of the London CTR (Class A) by a Vans RV7 at 1800ft resulting in a loss of separation against a Heathrow inbound airliner.	Investigation under 201302246 (same day at 1230 UTC).
201302363	03/03/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	10nm W	A	CTR	UNKNOWN	Turbofan	2	Infringement of the London CTR (Class A) by a Vans RV7 at 1800ft resulting in a loss of separation against a Heathrow inbound airliner.	Investigation under 201302246 (same day at 1230 UTC).
201302402	17/02/2013	EGTT : London (FIR)	EGVN (BZZ): Brize norton	4 NE	D	CTR	PIPER	Reciprocating	1	Infringement of the Brize Norton CTR (Class D) by a PA28 squawking 7000. Standard separation maintained.	Pilot contacted the ATC unit and apologised.
201302403	16/02/2013	EGTT : London (FIR)	EGTK (OXF): Oxford/Kidlington	1nm S	D	CTR	CESSNA	Reciprocating	1	Infringement of the Brize Norton CTR (Class D) by a C172 and a MCR-01 at 2000ft. Both pilots were informed by ATC that they needed permission before entering the CTR.	
201302403	16/02/2013	EGTT : London (FIR)	EGTK (OXF): Oxford/Kidlington	1nm S	D	CTR	OTHER	Reciprocating	1	Infringement of the Brize Norton CTR (Class D) by a C172 and a MCR-01 at 2000ft. Both pilots were informed by ATC that they needed permission before entering the CTR.	

201302650	14/03/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	NE	D	CTA	CESSNA	Reciprocating	1	Infringement of the Luton CTA (Class D) by a C182 (initially unknown) squawking 7000 with Mode C indicating 2900ft. Traffic info and avoiding action given. Standard separation maintained.	Pilot subsequently called on frequency and was formally identified was instructed to ROCAS and provided with a Basic Service. The operator has been alerted to this incident. Investigations indicate that the pilot's attention was diverted by a rough running engine due to an accumulation of carb ice. Whilst addressing that situation the infringement occurred.☐ CAA Closure: Infringement discussed with the pilot concerned.
201302650	14/03/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	NE	D	CTA	GULFSTREAM	Turbofan	2	Infringement of the Luton CTA (Class D) by a C182 (initially unknown) squawking 7000 with Mode C indicating 2900ft. Traffic info and avoiding action given. Standard separation maintained.	Pilot subsequently called on frequency and was formally identified was instructed to ROCAS and provided with a Basic Service. The operator has been alerted to this incident. Investigations indicate that the pilot's attention was diverted by a rough running engine due to an accumulation of carb ice. Whilst addressing that situation the infringement occurred.☐ CAA Closure: Infringement discussed with the pilot concerned.
201302658	14/03/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	8 SW	D	CTR	AVIONS ROBIN	Reciprocating	1	Infringement of the Southampton CTR (Class D) by a Robin R2160 at 1800ft resulting in a loss of separation against an inbound Trislander. Traffic info given.	CAA Closure: No further action possible due to elapsed time.
201302658	14/03/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	8 SW	D	CTR	BRITTEN NORMAN	Reciprocating	3	Infringement of the Southampton CTR (Class D) by a Robin R2160 at 1800ft resulting in a loss of separation against an inbound Trislander. 201302663	14/03/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	9.3 SE	D	CTA	AVIONS ROBIN	Reciprocating	1	Infringement of the Solent CTA (Class D) by a DR400 at 2900ft. Blind call made with no response received. Traffic info and avoiding action given to an inbound a/c. Standard separation maintained.	DR400 initially entered CAS at 2900ft, vacated and then re-entered CAS at 2700ft.

201302665	14/03/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	SW	D	CTR	CESSNA	Reciprocating	1	Infringement of the Luton CTR (Class D) by a C182 at 1800ft squawking 7000. Standard separation maintained.	
201302675	14/03/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	Baxterley	D	CTR	VANS	Reciprocating	1	Infringement of the Birmingham CTR (Class D) by a Vans RV7 at 1000ft squawking 7000 resulting in a loss of separation against an outbound A318. A318 given a turn onto 180deg. Traffic info issued to another a/c in the vicinity.	Vans RV7 was an unknown contact when it infringed CAS. Blind calls made with no response received. Pilot subsequently called ATC on the ground to confirm he had infringed the CTR. Pilot had became distracted due to a rough running engine.
201302675	14/03/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	Baxterley	D	CTR	AIRBUS	Turbofan	2	Infringement of the Birmingham CTR (Class D) by a Vans RV7 at 1000ft squawking 7000 resulting in a loss of separation against an outbound A318. A318 given a turn onto 180deg. Traffic info issued to another a/c in the vicinity.	Vans RV7 was an unknown contact when it infringed CAS. Blind calls made with no response received. Pilot subsequently called ATC on the ground to confirm he had infringed the CTR. Pilot had became distracted due to a rough running engine.
201302704	15/03/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	SW	D	CTR	PIPER	Reciprocating	1	Infringement of the Solent CTA (Class D) by a PA28 at 2500ft. Traffic info and avoiding action given to an inbound PC12. Standard separation maintained.	CAA Closure: No further action possible due to elapsed time.
201302740	17/03/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	Street Farm, Takely	D	CTR	AEROSPATIALE	Turboshaft	1	Infringement of the Stansted CTR (Class D) by an AS350. Standard separation maintained.	AS350 requested a departure clearance was instructed to standby whilst the controller confirmed that the a/c was not permitted to operate from the departure site during night time hours. Whilst awaiting confirmation (subsequently received as per MATS Pt2), the a/c lifted and subsequently entered CAS without a clearance. Controller decided that the safest course of action was to allow the a/c to depart and to direct it to vacate the CTR. The a/c was also instructed to operate not above 1500ft, however, the a/c called Essex Radar operating at 2000ft. No other traffic affected.☐ CAA Closure:☐ No response from registered owner. Closed due to elapsed time.

201302882	17/02/2013	EGTT : London (FIR)	Salisbury Plain	Danger Areas EG D126 and D125	G	Danger area	PIPER	Reciprocating	1	Infringement of active Danger Areas EG D126 and D125 by a PA28 squawking 7000 with Mode C indicating 2400ft. Airspace NOTAMed active to 8000ft amsl or higher.	The SSR return was seen to turn West and overfly Bulford Range, then overflying two formations of helicopters operating in that area. No RT calls were heard on the DACS frequency.☐ CAA Closure: No further action possible due to elapsed time.
201302971	21/03/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	8 SW	G	Restricted area	BAC	Other	1	Infringement of the Stansted TMZ 2 (Class G) by a Jet Provost. Traffic info given to an inbound B737.	Appropriate follow up action has been taken as a result of this incident.
201303068	16/03/2013	EGTT : London (FIR)	EGSX : North Weald	E	D	CTA	AEROMERE	Reciprocating	1	Infringement of Stansted CTA (Class D) by a Falco F8L at 1800ft. No other traffic was affected.	
201303167	26/03/2013	EGTT : London (FIR)	EGXY-Syerston		G	ATZ	ROBINSON	Reciprocating	1	An R44 infringed the Syerston ATZ (Class G) at approx 500ft passing South to North. The a/c was tracked to landing where the pilot contacted Syerston to apologise. His GPS showed him clear of the ATZ.	
201303284	29/03/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	15nm SW	A	TMA	CESSNA	Reciprocating	1	Infringement of the London TMA (Class A) by a C152 indicating 3000ft resulting in loss of separation with a Gatwick inbound A319. Traffic info and avoiding action given.	A319 was descending through 6600ft to 4000ft for R/W08R. ATC issued A319 avoiding action (right heading 360) and instructed A319 to stop descent. A319 stopped at 6000ft. Pilot's infringement report revealed pilot was aware of LTMA boundaries but travelled further North than intended. Pilot also commented they had been maintaining separation from a Shoreham based a/c at 2000ft in same general area as well as Parham gliding site, was distracted while adjusting intercom squelch and volume controls due to difficulties with headset and had missed landmarks due to lack of familiarity with the area. Pilot stated they would replace faulty headset and improve vigilance when operating close to TMA boundaries.

201303284	29/03/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	15nm SW	A	TMA	AIRBUS	Turbofan	2	Infringement of the London TMA (Class A) by a C152 indicating 3000ft resulting in loss of separation with a Gatwick inbound A319. Traffic info and avoiding action given.	A319 was descending through 6600ft to 4000ft for R/W08R. ATC issued A319 avoiding action (right heading 360) and instructed A319 to stop descent. A319 stopped at 6000ft. Pilot's infringement report revealed pilot was aware of LTMA boundaries but travelled further North than intended. Pilot also commented they had been maintaining separation from a Shoreham based a/c at 2000ft in same general area as well as Parham gliding site, was distracted while adjusting intercom squelch and volume controls due to difficulties with headset and had missed landmarks due to lack of familiarity with the area. Pilot stated they would replace faulty headset and improve vigilance when operating close to TMA boundaries.
201303291	29/03/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	12nm S	A	TMA	PIPER	Reciprocating	1	Infringement of the LTMA (Class A) by a PA28 at 3000ft. Separation minima was maintained and no other a/c affected.	The pilot reported increasing his height to reach smoother air, not realising he had infringed the LTMA.
201303296	29/03/2013	EGTT : London (FIR)	EGHI (SOU): Southampton		D	CTA	OTHER	Reciprocating	1	Infringement of Solent CTA (Class D) by a Pulsar who reported being at 2400ft, which resulted in avoiding action being taken by two other a/c, a Trislander and a PC12. Traffic info was given and separation minima was maintained.	CAA Closure:☐ PIC refused interview, time barred for prosecution.
201303296	29/03/2013	EGTT : London (FIR)	EGHI (SOU): Southampton		D	CTA	BRITTEN NORMAN	Reciprocating	3	Infringement of Solent CTA (Class D) by a Pulsar who reported being at 2400ft, which resulted in avoiding action being taken by two other a/c, a Trislander and a PC12. Traffic info was given and separation minima was maintained.	CAA Closure:☐ PIC refused interview, time barred for prosecution.
201303296	29/03/2013	EGTT : London (FIR)	EGHI (SOU): Southampton		D	CTA	PILATUS	Unknown		Infringement of Solent CTA (Class D) by a Pulsar who reported being at 2400ft, which resulted in avoiding action being taken by two other a/c, a Trislander and a PC12. Traffic info was given and separation minima was maintained.	CAA Closure:☐ PIC refused interview, time barred for prosecution.

201303302	30/03/2013	EGTT : London (FIR)	EGTF : Fairoaks	NE	A	CTR	PIPER	Reciprocating	1	Infringement of the Heathrow CTR (Class A) by a PA28 squawking 7000 at 1500ft. Departures suspended for 2mins. Traffic info given. Standard separation maintained.	Pilot has subsequently apologised for the infringement stating that he had been using two GPS systems at the time that were giving conflicting map displays. The pilot became disorientated and had difficulty locating the M25. Additionally the pilot started to fly North from OCK without turning back West before turning North to enter the Fairoaks ATZ.
201303312	31/03/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	15 South West	A	TMA	PIPER	Reciprocating	1	Infringement of the London TMA (Class A) by a PA28 squawking 7000 with Mode C indicating 2600ft. CAIT activated. Traffic info given. Standard separation maintained.	Infringing a/c then changed its squawk to 0431. A/c then descended to 2400ft and left the RMA via MID and North towards Farnborough.
201303312	31/03/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	15 South West	A	TMA	AIRBUS	Turbofan	2	Infringement of the London TMA (Class A) by a PA28 squawking 7000 with Mode C indicating 2600ft. CAIT activated. Traffic info given. Standard separation maintained.	Infringing a/c then changed its squawk to 0431. A/c then descended to 2400ft and left the RMA via MID and North towards Farnborough.
201303316	31/03/2013	EGTT : London (FIR)	EGMC (SEN): Southend	5nm N	A	TMA	VANS	Reciprocating	1	Infringement of LTMA (Class A) by an RV6 (operating with other similar a/c) at 4000ft. The controller restricted the level of an outbound a/c to 3000ft to avoid potential conflict. Standard separation maintained.	
201303340	28/03/2013	EGTT : London (FIR)	EGHH (BOH): Bournemouth/Hurn	3nm NW	D	CTA	COMMANDER	Reciprocating	1	Infringement of Solent CTA (Class D) by a RC114 at approx 3400ft. Traffic info was passed and separation minima was maintained.	

201303341	31/03/2013	EGTT : London (FIR)	EGNM (LBA): LEEDS BRADFORD		D	CTA	AVIONS ROBIN	Reciprocating	1	Infringement of the Leeds Bradford CTA (Class D) at 4000ft. The a/c was instructed to leave CAS, which it did. Subsequently, over an hour later the same a/c infringed in the same area. Separation minima was maintained.	
201303370	02/04/2013	EGTT : London (FIR)	EGKB (BQH): Biggin hill	18nm SE	A	TMA	CIRRUS	Reciprocating	1	Infringement of the LTMA (Class A) by an SR22 at 3000ft. No other a/c were in the vicinity and separation minima was maintained.	
201303381	02/04/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	13nm West	A	CTR	PIPER	Reciprocating	1	Infringement of the London CTR (Class A) by a PA28R and Nord 1002 squawking 7000 with Mode C indicating climb to 2000ft. STCA and CAIT activated. Both aircraft lost separation with A321 and A330 inbound to Heathrow.	Investigations have revealed that PA28 flight was the first for the PIC from R/W07. Realising the it would be heading into the London CTR he climbed slowly whilst turning a tight right turn but did not realise he had climbed too high. The root cause of this incident is considered to be inexperience in departing from the runway in use.☐ CAA Closure: The PIC has realised that the best course of action would have been to extend down wind until out of the zone before turning.

201303482	03/04/2013	EGTT : London (FIR)	Donna Nook	EG D307	G	Danger area	CESSNA	Reciprocating	1	Infringement of the promulgated active Danger Area EG D307 (Donna Nook) by a C150 a/c squawking 7000 flying North to South along the coast. No military activity on the range at the time of the infringement.	Humberside radar informed Donna Nook that the infringer had landed at Strubby airfield. Donna Nook contacted Strubby airfield, who confirmed a/c's identity and asked pilot to contact Donna Nook. Pilot subsequently contacted Donna Nook ATC and allegedly stated they thought EG D307 was closed. Donna Nook advised pilot it was always best to contact them on frequency if pilot intended to come near the airspace.
201303537	05/04/2013	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	9nm W	D	CTR	PIPER	Reciprocating	1	Infringement of the Manchester CTR (Class D) by a PA38. The a/c was requested to turn left to leave the zone, which it did. Separation lost with inbound airliner.	Solo student cross-country flight. Pilot error acknowledged. Investigations revealed that whilst navigating the Manchester Low Level Route, the pilot of the PA38 became distracted and made a navigational error. This led to the aircraft infringing the Manchester CTR which in turn resulted in an "immediate" loss of separation with an aircraft inbound to Manchester, R/W05L.
201303537	05/04/2013	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	9nm W	D	CTR	UNKNOWN	Unknown	2	Infringement of the Manchester CTR (Class D) by a PA38. The a/c was requested to turn left to leave the zone, which it did. Separation lost with inbound airliner.	Solo student cross-country flight. Pilot error acknowledged. Investigations revealed that whilst navigating the Manchester Low Level Route, the pilot of the PA38 became distracted and made a navigational error. This led to the aircraft infringing the Manchester CTR which in turn resulted in an "immediate" loss of separation with an aircraft inbound to Manchester, R/W05L.
201303540	05/04/2013	EGTT : London (FIR)	BNN	2nm North	D	CTR	PIPER	Reciprocating	1	Infringement of the Luton CTR (Class D) by a PA28 initially squawking 0013 at 1800ft. Separation lost against inbound Falcon 50. Pilot believed he was outside CAS, but was informed that he was inside the Southwest corner of the Luton zone.	CAA Closure: <input type="checkbox"/> No response from owner. Closed due to elapsed time.

201303540	05/04/2013	EGTT : London (FIR)	BNN	2nm North	D	CTR	DASSAULT	Turbofan	3	Infringement of the Luton CTR (Class D) by a PA28 initially squawking 0013 at 1800ft. Separation lost against inbound Falcon 50. Pilot believed he was outside CAS, but was informed that he was inside the Southwest corner of the Luton zone.	CAA Closure:☐ No response from owner. Closed due to elapsed time.
201303540	05/04/2013	EGTT : London (FIR)	BNN	2nm North	D	CTR	BOMBARDIER	Turbofan	2	Infringement of the Luton CTR (Class D) by a PA28 initially squawking 0013 at 1800ft. Separation lost against inbound Falcon 50. Pilot believed he was outside CAS, but was informed that he was inside the Southwest corner of the Luton zone.	CAA Closure:☐ No response from owner. Closed due to elapsed time.
201303561	06/04/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	4nm W	A	CTR	CESSNA	Reciprocating	1	Infringement of Heathrow CTR (Class A) by a C152. An HS125 inbound to Northolt was transferred to Northolt with less than prescribed separation, whilst a C560 was vectored so its track would not merge with the infringer's. Traffic info was not passed.	Operator alerted. Student pilot flying solo was unable to locate the arrival VRP for Denham. Pilot debriefed by the instructor and is to undertake further training focusing on the rejoin procedure. It has also been ascertained that Mode C was unavailable to the a/c due to an 'over reading' discrepancy, which became apparent a couple of days earlier.
201303561	06/04/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	4nm W	A	CTR	CESSNA	Turbofan	2	Infringement of Heathrow CTR (Class A) by a C152. An HS125 inbound to Northolt was transferred to Northolt with less than prescribed separation, whilst a C560 was vectored so its track would not merge with the infringer's. Traffic info was not passed.	Operator alerted. Student pilot flying solo was unable to locate the arrival VRP for Denham. Pilot debriefed by the instructor and is to undertake further training focusing on the rejoin procedure. It has also been ascertained that Mode C was unavailable to the a/c due to an 'over reading' discrepancy, which became apparent a couple of days earlier.
201303564	03/04/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	7nm S	D	CTA	CESSNA	Reciprocating	1	Infringement of the Birmingham CTA-2 (Class D) by a C152 at 1800ft. Once contact was made with the a/c, appropriate action was taken. There was no other traffic in the area at the time.	Pilot failed to maintain heading in windy conditions.

201303576	07/04/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	4nm S	D	CTR	ZENAIR	Reciprocating	1	Infringement of the Luton CTR (Class D) by a Zenair. The pilot appeared to realise he had infringed approx 3nm into the zone and turned around to exit. Separation minima was maintained.	
201303577	07/04/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	Banstead	A	CTR	PIPER	Reciprocating	1	Infringement of the London CTR (Class A) by a PA28 squawking 3756 indicating 2400ft. Heathrow Southbound departures were briefly stopped. Concerns around pilot competence.	Pilot had not changed frequency after being instructed to contact Gatwick and appeared to be having difficulties with navigation and infringed the Biggin ATZ before infringing the Heathrow zone. Gatwick Tower refused to accept a/c. Inexperienced pilot did not appreciate the complexity of flying the route he had planned.⚠ CAA Closure: Pilot undertaking restricted IR training (IMC).
201303583	06/04/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	5nm SE	D	CTA	CESSNA	Reciprocating	1	Infringement of the Birmingham CTA (Class D) by a C152 at 3000ft. ATC initiated a descent to exit the CTA which the a/c followed. Separation minima was maintained.	
201303590	07/04/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	5nm SW	G	Restricted area	PERCIVAL	Reciprocating	1	Infringement of the Stansted TMZ 2 (Class G) by a P10 Vega Gull. No outbound a/c were affected.	
201303592	07/04/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	10nm NE	G	Restricted area	CESSNA	Reciprocating	1	Infringement of the Stansted TMZ1 (Class G) by a Cessna 210. The a/c cut across the NE corner tracking towards Stapleford. Separation minima was maintained.	

201303596	07/04/2013	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	15nm E	D	CTA	FLIGHT DESIGN	Reciprocating	1	Infringement of the Manchester CTA (Class D) by a CTSW at 3100ft. ATC tried to contact the a/c to no avail. There was no other traffic in the area.	The pilot believes that the incident was caused by a lack of concentration plus uplift from the hills.
201303598	07/04/2013	EGTT : London (FIR)	Little Rissington	Runways 04/22	G	Other	DE HAVILLAND	Reciprocating	1	A/c was observed to fly overhead the length of runways 04/22 at approx 250ft AGL without RT comms. Two other a/c were active within the circuit.	CAA Closure:☐ Appropriate CAA follow up action has been taken.
201303601	07/04/2013	EGTT : London (FIR)	Little Rissington	Runways 04/22	G	Other	DE HAVILLAND	Reciprocating	1	Infringement of Little Rissington airspace (Class G) by a DH82. A/c was observed to approach the airfield from the North East at low level and flew overhead the length of runways 04/22 at approx 250ft AGL. One a/c was in the circuit.	Investigation under 201303598.
201303655	08/04/2013	EGTT : London (FIR)	EGVT- Wethersfield		G	Restrictedd area	SLINGSBY	Reciprocating	1	Infringement of the Stansted TMZ1 (Class G) by a Firefly T67M.	
201303714	08/04/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick		D	CTR	CESSNA	Reciprocating	1	Infringement of the Gatwick CTR (Class D) by a C152 (no transponder). CAIT activated. Departures were stopped. Three losses of separation occurred with a/c departing from Gatwick. ATC training in progress.	Investigations revealed that the pilot was unaware of the infringement it being caused by a loss of visual clues due weather and workload.☐ CAA Closure: The PIC plans to undertake further training, to fly with a transponder and use a GPS/airspace alerting device.

201303714	08/04/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick		D	CTR	AIRBUS	Turbofan	2	Infringement of the Gatwick CTR (Class D) by a C152 (no transponder). CAIT activated. Investigations revealed that the pilot was unaware of the infringement it being caused by a loss of visual clues due weather and workload.☐ CAA Closure: The PIC plans to undertake further training, to fly with a transponder and use a GPS/airspace alerting device.
201303847	12/04/2013	EGTT : London (FIR)	Luton	North East Stevenage	D	CTR	GRUMMAN	Reciprocating	1	Infringement of the Luton CTR (Class D) and Stansted TMZ (Class G) by an AA5 squawking 7000, no Mode C. Separation lost with inbound Luton a/c.	No other traffic was affected by the TMZ penetration. It has subsequently been revealed that the pilot had problems with his GPS and VOR receiver, so flew using a map.
201303847	12/04/2013	EGTT : London (FIR)	Luton	North East Stevenage	D	CTR	UNKNOWN	Unknown		Infringement of the Luton CTR (Class D) and Stansted TMZ (Class G) by an AA5 squawking 7000, no Mode C. Separation lost with inbound Luton a/c.	No other traffic was affected by the TMZ penetration. It has subsequently been revealed that the pilot had problems with his GPS and VOR receiver, so flew using a map.

201303860	13/04/2013	EGTT : London (FIR)	D206	SE	D	CTA	GRUMMAN	Reciprocating	1	An AA5 infringed the Luton CTA (Class D). The controllers calls at Luton and Essex went unanswered. The a/c was seen to land at Duxford at approx 0850hrs. No other traffic was affected.	Operator alerted. Incident was caused by a map reading error in flight.
201303917	11/04/2013	EGTT : London (FIR)	Winchester		D	CTR	SCHEIBE	Reciprocating	1	Infringement of the Southampton CTR (Class D) by an SF25 at 1900ft. Pilot realised error and turned and descended to vacate the zone.	Pilot error acknowledged. Poor visibility reported.
201303948	15/04/2013	EGTT : London (FIR)	EGSC (CBG): Cambridge		G	ATZ	OTHER	Reciprocating	1	Infringement of the Cambridge ATZ (Class G) by a Dyn'Aero MCR at 1900ft. No traffic affected.	
201304042	17/04/2013	EGTT : London (FIR)	BNN	5nm NW	D	CTA	PILATUS	Turboprop	1	Infringement of the Luton CTA (Class D) by a PC12 at 2600ft climbing to 3000ft, 5nm NW of BNN. Standard separation maintained.	Luton outbound check put in place. No outbound delay ensued. PC12 changed to Farnborough squawk and was instructed by Farnborough LARS North to leave CAS which they did without further incident. A/c encountered severe turbulence, causing the pilot to climb to reach smoother air and resulting in the subsequent infringement.☐ CAA Closure: Pilot apologised and has learnt from the incident.
201304048	17/04/2013	EGTT : London (FIR)	Basingstoke		D	Prohibited area	DE HAVILLAND	Reciprocating	1	Infringement of Farnborough CAS (T) (Class D) by a DHC1 squawking 7000 in the vicinity of Basingstoke with Mode C indicating 2,700ft. Standard separation maintained.	Farnborough ATC trainee with OJTI was working a royal flight downwind for R/W24 during CAS (T) when LARS West controller informed them of an infringer. DHC1's Mode C climbed to 3000ft before the a/c contacted Farnborough ATC. LARS West had made blind calls to DHC1, however the a/c called Farnborough Approach and was subsequently advised they were inside CAS (T) and given clearance to enter.☐ CAA Closure: No further action possible due to elapsed time.

201304129	19/04/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted		D	CTR	MORANE SAULNIER	Reciprocating	1	Infringement of the Stansted CTR (Class D) and the Southend ATZ (Class G) by an MS733 at 1500ft. Traffic info given. Standard separation maintained.	A/c infringed the Stansted zone resulting in an impending departure being stopped, a check all imposed and an inbound A320 being broken off the approach. Comms were established albeit with difficulty and protracted due to a suspected poor radio. Further attempts to establish comms with the a/c were unsuccessful. A/c continued a track towards Southend and TC contacted Southend Approach. A/c subsequently infringed the Southend ATZ. An inbound A319 was given traffic info. A319 pilot confirmed visual with the infringer and elected to continue the approach. Tower visual with both a/c. Appropriate CAA action is being taken as a result of this incident.
201304162	19/04/2013	EGTT : London (FIR)	EGSC (CBG): Cambridge		G	ATZ	AVIONS ROBIN	Reciprocating	1	Infringement of the Cambridge ATZ (Class G) by a DR400 at 1300ft. Departure cancelled until DR400 vacated. Traffic info given.	
201304173	19/04/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	13nm NNW	D	CTA	PIEL	Reciprocating	1	Infringement of the Birmingham CTA1 (Class D) by a Piel CP301 at 2200ft. A/c identified and clearance given to continue transit not above 2500ft. No traffic affected. Standard separation maintained.	
201304174	19/04/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	16 S	D	CTA	PIPER	Reciprocating	1	Infringement of the Birmingham CTA 4 (Class D) by a PA28 at 3800ft. Standard separation maintained. No traffic affected.	
201304177	20/04/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted		D	CTR	BEAGLE	Reciprocating	1	Infringement of the Stansted CTR (Class D) by a low wing light a/c (subsequently identified as a Beagle B121). Standard separation maintained. Stansted departures suspended.	Appropriate CAA action has been taken as a result of this incident.

201304183	20/04/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	6nm W	D	CTA	PIPER	Reciprocating	1	Infringement of the Gatwick CTA and CTR (Class D) by a PA28 squawking 0463 indicating 2100ft resulting in loss of separation with a Gatwick inbound B737 and outbound A319. Traffic info given.	ATC then broke the next sequenced Gatwick inbound B737 off the approach with a right turn heading of 180deg. Farnborough ATC had issued PA28 with a 0467 squawk but were unaware, due workload, that the PA28 had selected incorrect squawk 0463. It has not been determined if the incorrect code was issued, the correct code was issued and an incorrect readback undetected or if there was an incorrect setting after a correct readback.☐ CAA Closure: No further action considered necessary or appropriate at this time. CAA will monitor for future similar occurrences.
201304183	20/04/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	6nm W	D	CTA	AIRBUS	Turbofan	2	Infringement of the Gatwick CTA and CTR (Class D) by a PA28 squawking 0463 indicating 2100ft resulting in loss of separation with a Gatwick inbound B737 and outbound A319. Traffic info given.	ATC then broke the next sequenced Gatwick inbound B737 off the approach with a right turn heading of 180deg. Farnborough ATC had issued PA28 with a 0467 squawk but were unaware, due workload, that the PA28 had selected incorrect squawk 0463. It has not been determined if the incorrect code was issued, the correct code was issued and an incorrect readback undetected or if there was an incorrect setting after a correct readback.☐ CAA Closure: No further action considered necessary or appropriate at this time. CAA will monitor for future similar occurrences.
201304183	20/04/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	6nm W	D	CTA	BOEING	Turbofan	2	Infringement of the Gatwick CTA and CTR (Class D) by a PA28 squawking 0463 indicating 2100ft resulting in loss of separation with a Gatwick inbound B737 and outbound A319. Traffic info given.	ATC then broke the next sequenced Gatwick inbound B737 off the approach with a right turn heading of 180deg. Farnborough ATC had issued PA28 with a 0467 squawk but were unaware, due workload, that the PA28 had selected incorrect squawk 0463. It has not been determined if the incorrect code was issued, the correct code was issued and an incorrect readback undetected or if there was an incorrect setting after a correct readback.☐ CAA Closure: No further action considered necessary or appropriate at this time. CAA will monitor for future similar occurrences.

Traffic info and avoiding action given.	Pilot, believed to have been lost, was in contact with D&D. Pilot error acknowledged.
201304205	21/04/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTR	UNKNOWN	Unknown		Infringement of the Luton CTR (Class D) and the LTMA (Class A) by a PA28 resulting in a loss of separation against two Luton outbounds and one Northolt outbound. Traffic info and avoiding action given.	Pilot, believed to have been lost, was in contact with D&D. Pilot error acknowledged.

201304228	21/04/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	12 S	D	CTA	EVEKTOR AEROTECHNIK	Reciprocating	1	Infringement of the Birmingham CTA (Class D) by an EV97 at 2800ft. Blind transmission made and a/c identified. Standard separation maintained.	Pilot error acknowledged.
201304282	20/04/2013	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	Stretton	D	CTR	CESSNA	Reciprocating	1	Infringement of the Manchester CTR (Class D) by a C172 (initially unknown) squawking 7000.	Liverpool approach advised that the a/c had been instructed to call Manchester. Following blind transmission, a/c responded and was identified on a 7351 squawk.
201304309	23/04/2013	EGTT : London (FIR)	EGMC (SEN): Southend	4.5 NE	A	TMA	YAKOVLEV	Reciprocating	1	Infringement of the LTMA (Class A) by a Yak 52 at 5000ft. Inbound a/c delayed. Standard separation maintained.	A/c part of a formation training flight with two other a/c in formation. It is believed that the a/c may have been operating with a faulty transponder. The other possibility is that the altimeter lags due to the type of manoeuvres conducted in a high energy a/c. Both possibilities to be investigated by the operator.
201304310	23/04/2013	EGTT : London (FIR)	SAM	10.5nm E	D	CTA	PIPER	Reciprocating	1	Infringement of the Southampton CTA (Class D) by an unknown a/c squawking 7000 resulting in loss of separation with a DA40. Bournemouth ATC identified a/c via Mode S as a PA28. Traffic info given.	Bandboxed Solent Radar ATCO operating SSR only, due to unscheduled maintenance work on Southampton radar, observed a 7000 squawk outside CAS but getting close to CTA. ATCO made a blind call which went unanswered. ATCO then instructed an IFR transit DA40 to make a turn away from the infringer, however separation was lost when infringer entered CAS behind the DA40. Infringement submission report revealed the pilot regretted the incursion and that although the area was well known to them, in future flights the pilot would contact ATC when flying within 10nm of the area/zone.
201304310	23/04/2013	EGTT : London (FIR)	SAM	10.5nm E	D	CTA	DIAMOND	Reciprocating	1	Infringement of the Southampton CTA (Class D) by an unknown a/c squawking 7000 resulting in loss of separation with a DA40. Bournemouth ATC identified a/c via Mode S as a PA28. Traffic info given.	Bandboxed Solent Radar ATCO operating SSR only, due to unscheduled maintenance work on Southampton radar, observed a 7000 squawk outside CAS but getting close to CTA. ATCO made a blind call which went unanswered. ATCO then instructed an IFR transit DA40 to make a turn away from the infringer, however separation was lost when infringer entered CAS behind the DA40. 201304317	23/04/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	South of Stoney Cross	D	CTA	DIAMOND	Reciprocating	1	Infringement of the Southampton CTA (Class D) by a DA40 at 3000ft led to a loss of separation against an EMB190 outbound from Southampton.	DA40 pilot on being passed from Bournemouth had been told to remain outside of CAS. DA40 was put on a heading of 360 to turn it away from the outbound. EMB190 was put on a heading of 010 and climbed to FL70.
201304317	23/04/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	South of Stoney Cross	D	CTA	EMBRAER	Turbofan	2	Infringement of the Southampton CTA (Class D) by a DA40 at 3000ft led to a loss of separation against an EMB190 outbound from Southampton.	DA40 pilot on being passed from Bournemouth had been told to remain outside of CAS. DA40 was put on a heading of 360 to turn it away from the outbound. EMB190 was put on a heading of 010 and climbed to FL70.
201304365	24/04/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	4nm North West	D	CTR	PIPER	Reciprocating	1	Infringement of the Luton CTR (Class D) by a PA28 squawking 5036 at 2400ft. CAIT activated. Separation lost against a Challenger 604. Pilot had requested and been given his position several times.	The student pilot did not notice that his DI and compass were out of sync and in an attempt to rectify strayed into CAS. □ CAA Closure: The student is to undertake 8 hours of remedial navigation training and an additional briefing on how to make use of the different sevices offered by Air Traffic.
201304365	24/04/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	4nm North West	D	CTR	CANADAIR	Turbofan	2	Infringement of the Luton CTR (Class D) by a PA28 squawking 5036 at 2400ft. CAIT activated. Separation lost against a Challenger 604. Pilot had requested and been given his position several times.	The student pilot did not notice that his DI and compass were out of sync and in an attempt to rectify strayed into CAS. □ CAA Closure: The student is to undertake 8 hours of remedial navigation training and an additional briefing on how to make use of the different sevices offered by Air Traffic.
201304370	23/04/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	12nm East	D	CTR	DIAMOND	Reciprocating	1	Infringement of the Gatwick CTR (Class D) by a DA20 squawking 3767 climbing to 2000ft. Separation lost with inbound A319. Traffic info and avoiding action given.	CAA Closure: DA20 pilot inadvertently climbed above planned altitude into the base of CAS and will take a navigation refresher flight as a result of this incident.

201304370	23/04/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	12nm East	D	CTR	AIRBUS	Turbofan	2	Infringement of the Gatwick CTR (Class D) by a DA20 squawking 3767 climbing to 2000ft. Separation lost with inbound A319. Traffic info and avoiding action given.	CAA Closure: DA20 pilot inadvertently climbed above planned altitude into the base of CAS and will take a navigation refresher flight as a result of this incident.
201304373	22/04/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	12nm North East	D	CTA	CESSNA	Reciprocating	1	Infringement of the Stansted CTA (Class D) by a C172 with Mode C indicating 2000ft. CAIT activated. Traffic info given. Various a/c delayed as a result. Standard separation maintained.	A/c observed descending to leave CAS and turned away from South West track.
201304407	25/04/2013	EGTT : London (FIR)	EGLC (LCY): London city	10nm East	A	TMA	EUROPA	Reciprocating	1	Infringement of the London TMA (Class A) by a Europa squawking 7000 at 2700ft. Traffic info and avoiding action given to FK50 inbound R/W27. Standard separation maintained.	Infringer identified by Farnborough LARS East. Pilot reported that Mode C was erratic.
201304407	25/04/2013	EGTT : London (FIR)	EGLC (LCY): London city	10nm East	A	TMA	FOKKER	Turboprop	2	Infringement of the London TMA (Class A) by a Europa squawking 7000 at 2700ft. Traffic info and avoiding action given to FK50 inbound R/W27. Standard separation maintained.	Infringer identified by Farnborough LARS East. Pilot reported that Mode C was erratic.
201304447	26/04/2013	EGTT : London (FIR)	EGLD : Denham	W	A	CTA	PITTS	Reciprocating	1	Two infringements of the London CTR (Class A) by a Pitts Special. Standard separation maintained.	Appropriate CAA action has been taken as a result of this incident.

201304449	25/04/2013	EGTT : London (FIR)	EGGD (BRS): Bristol/Lulsgate	13nm E	D	CTA	CIRRUS	Reciprocating	1	Probable infringement of the Bristol CTA (Class D) by an SR22 squawking 7000 at 6500ft resulting in loss of separation with a Bristol inbound A319. Traffic info given.	ATC stated that at no stage did the 7000 squawk show on Mode C and they had assumed the infringer to be beneath CAS. The SR22 pilot telephoned the next day allegedly reporting they had inadvertently entered CAS.☐ CAA Closure: Appropriate CAA action taken.
201304449	25/04/2013	EGTT : London (FIR)	EGGD (BRS): Bristol/Lulsgate	13nm E	D	CTA	AIRBUS	Turbofan	2	Probable infringement of the Bristol CTA (Class D) by an SR22 squawking 7000 at 6500ft resulting in loss of separation with a Bristol inbound A319. Traffic info given.	ATC stated that at no stage did the 7000 squawk show on Mode C and they had assumed the infringer to be beneath CAS. The SR22 pilot telephoned the next day allegedly reporting they had inadvertently entered CAS.☐ CAA Closure: Appropriate CAA action taken.
201304487	25/04/2013	EGTT : London (FIR)	Haverhill	3 SW	D	CTA	PIPER	Reciprocating	1	Infringement of the Stansted CTA (Class D) by a PA28. Inbound a/c delayed. Traffic info given. Standard separation maintained.	
201304491	28/04/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	15 SW	D	CTA	CIRRUS	Reciprocating	1	Infringement of the Solent CTA (Class D) by an SR22 at 2400ft squawking 7000. Blind calls made without success. Standard separation maintained.	
201304501	28/04/2013	EGTT : London (FIR)	EGTR : Elstree		A	TMA	PIPER	Reciprocating	1	Infringement of the London TMA (Class A) by a PA28 squawking 7000 with Mode C indicating 2800ft. Separation lost with an HS125 inbound Northolt that was vectored away and delayed. Traffic info and avoiding action given.	Infringer identified by Farnborough North via a call from Northolt. Operator fully alerted.

201304501	28/04/2013	EGTT : London (FIR)	EGTR : Elstree		A	TMA	HAWKER SIDDELEY	Turbofan	2	Infringement of the London TMA (Class A) by a PA28 squawking 7000 with Mode C indicating 2800ft. Separation lost with an HS125 inbound Northolt that was vectored away and delayed. Traffic info and avoiding action given.	Infringer identified by Farnborough North via a call from Northolt. Operator fully alerted.
201304568	13/04/2013	EGTT : London (FIR)	EGUW : Wattisham	Threshold R/W05	G	ATZ	ROBINSON	Reciprocating	1	Infringement of the Wattisham ATZ (Class G) by an R44 at approx 300ft agl during active gliding activity. Helicopter was observed to fly low level across airfield crossing the main runway at the North threshold of R/W05.	Appropriate CAA action has been taken as a result of this incident.
201304633	30/04/2013	EGTT : London (FIR)	Syerston		G	ATZ	SPORTINE AVIACIJA	Other	1	Infringement of the Syerston ATZ (Class G) by a LAK17.	It is reported that the pilot was attempting to start his pop up motor but after numerous attempts this was not achieved. The glider landed on the southern grass area of the airfield. Pilot failed to contact the airfield frequency prior to entering the zone. Pilot subsequently advised ATC that he failed to check the airfield frequency on his chart because he was concentrating on flying the a/c.
201304642	30/04/2013	EGTT : London (FIR)	Solent CTA		D	CTA	SOCATA	Reciprocating	1	Infringement of the Solent CTA (Class D) by a Socata TB10 at 3700ft squawking 7000. Blind calls made without success. Standard separation maintained. No traffic affected.	During thermal activity the pilot failed to reduce engine power early enough
201304682	01/05/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	9nm NNE	D	CTA	OTHER	Unknown	1	A military helicopter possibly infringed the Solent CTA (Class D) at 2100ft which was possibly caused by an incorrect pressure setting. Separation minima was maintained.	The pilot believed he was North of Southampton CAS at 1900ft, on the Portland Regional QNH of 1019mb. The Solent QNH was 1025mb and the controller believes that the possible infringement may have been caused by this difference.

201304685	30/04/2013	EGTT : London (FIR)	D128 and D125		G	Danger area	PIPER	Reciprocating	1	Infringement of active Danger Areas D128 and D125 by a PA28 student pilot with instructor at 2700ft on VFR NAVEX. Live firing suspended.	ATC contacted various ATC units, none of whom appeared to be working the PA28. D&D contacted to track the PA28 on VHF guard frequency. At this point the PA28 squawk changed from 2065 to 2650. PA28 had allegedly selected the wrong squawk. As the flight was a PPL skill test, the Flight Examiner (FE) had not wanted to add stress to the student by interfering but, once it became apparent they were in danger, the FE took control of the aircraft. However, the infringement had already occurred.☐ CAA Closure: FE subsequently interviewed, no further action.
201304702	01/05/2013	EGTT : London (FIR)	EGLC (LCY): London city	7nm E	D	CTA	PIPER	Reciprocating	1	Infringement of the London City CTA (Class D) by a student pilot flying a PA28 at 1900ft. Standard separation maintained. Traffic info given.	Thames controller vectored an inbound London City a/c to ensure required spacing. PA28 student pilot was in contact with Farnborough LARS who stated they had instructed PA28 not to be above 1400ft and/or to turn Southbound immediately, but the turn had not been made and despite repeated instructions and the descent not made until 1.5nm inside CAS. Farnborough LARS then issued instructions to vector the PA28 out of CAS. CFI has been contacted and the pilot is to undertake extra navigational exercises.
201304702	01/05/2013	EGTT : London (FIR)	EGLC (LCY): London city	7nm E	D	CTA	UNKNOWN	Unknown		Infringement of the London City CTA (Class D) by a student pilot flying a PA28 at 1900ft. Standard separation maintained. Traffic info given.	Thames controller vectored an inbound London City a/c to ensure required spacing. PA28 student pilot was in contact with Farnborough LARS who stated they had instructed PA28 not to be above 1400ft and/or to turn Southbound immediately, but the turn had not been made and despite repeated instructions and the descent not made until 1.5nm inside CAS. Farnborough LARS then issued instructions to vector the PA28 out of CAS. CFI has been contacted and the pilot is to undertake extra navigational exercises.
201304704	01/05/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	NW	A	CTR	GRUMMAN	Reciprocating	1	Infringement of the London CTR (Class A) by a Grumman AA5 at 2100ft. Traffic info given. Standard separation maintained.	
201304708	01/05/2013	EGTT : London (FIR)	EGNM (LBA): LEEDS BRADFORD	12 NW	D	CTA	ROBINSON	Reciprocating	1	Infringement of the Leeds Bradford CTA (Class D) by an R44 at 3400ft. Pilot was informed of the infringement. No other a/c were in the area.	

201304719	02/05/2013	EGTT : London (FIR)	Boreham	3nm NE	A	TMA	GRUMMAN	Reciprocating	1	Infringement of the LTMA (Class A) by an a/c, identified via Mode S as an AA5, squawking 7000 with Mode C indicating 3100ft. Standard separation maintained.	Blind calls were made without success. Approx 13mins later, AA5 was observed in same airspace again on Southwest track with Mode C indicating 3000ft. Pilot's report indicates pilot was flying with an instructor on a training check exercise and had climbed into CAS due to believing they were further East then they were. ☐ CAA Closure: Loss of situational awareness during instructional flight. Instructor has identified the cause and suitable remedial measures to prevent recurrence.
201304742	02/05/2013	EGTT : London (FIR)	EGGD (BRS): Bristol/Lulsgate	10nm ESE	D	CTA	OTHER	Unknown	1	A military a/c infringed the Bristol CTA (Class D) at FL67. The a/c then turned S to exit. Traffic info was passed and separation minima was maintained.	Believed that a/c's navigational equipment had failed.
201304742	02/05/2013	EGTT : London (FIR)	EGGD (BRS): Bristol/Lulsgate	10nm ESE	D	CTA	ATR	Turboprop	2	A military a/c infringed the Bristol CTA (Class D) at FL67. The a/c then turned S to exit. Traffic info was passed and separation minima was maintained.	Believed that a/c's navigational equipment had failed.
201304748	02/05/2013	EGTT : London (FIR)	The Needles		D	CTA	OTHER	Turboshaft	1	Infringement of the Solent CTA (Class D) by a military helicopter. Separation minima was maintained.	
201304763	02/05/2013	EGTT : London (FIR)	Warrington		D	CTR	PIPER	Reciprocating	1	Infringement of the Manchester CTR (Class D) by a PA28 at 1800ft squawking 7000. Traffic info given. Standard separation maintained.	Pilot apologised for his error.

201304848	03/05/2013	EGTT : London (FIR)	EGNR : Hawarden	10nm South West	A	TMA	CESSNA	Reciprocating	1	Infringement of the Manchester TMA (Class A) by a C210 squawking 7000 indicating 4000ft. CAIT activated. Standard separation maintained.	A/c was tracked heading Northwest, eventually changing squawk to 4562, a Ronaldsway squawk whereupon identity was confirmed. Pilot contacted, a lesson has been learned.
201304857	03/05/2013	EGTT : London (FIR)	Dunsfold	3nm NW	A	TMA	EVEKTOR AEROTECHNIK	Reciprocating	1	Infringement of the LTMA (Class A) and the Gatwick CTA (Class D) by an a/c squawking 7000 indicating 2900ft, 3nm NW of Dunsfold. A/c identified via Mode S as an EV97. Traffic info and avoiding action given. Standard separation maintained.	Gatwick departures were stopped. TC gave avoiding action to a departing B737 on a BOG SID. Pilot had a comprehensive plan to get to Goodwood and concedes that it was a poor decision to change the plan on the day.☐ CAA Closure: Pilot has learned not the change plan at short notice, and also now more aware of the need to verify vertical as well as lateral clearance from controlled airspace.
201304857	03/05/2013	EGTT : London (FIR)	Dunsfold	3nm NW	A	TMA	BOEING	Turbofan	2	Infringement of the LTMA (Class A) and the Gatwick CTA (Class D) by an a/c squawking 7000 indicating 2900ft, 3nm NW of Dunsfold. A/c identified via Mode S as an EV97. Traffic info and avoiding action given. Standard separation maintained.	Gatwick departures were stopped. TC gave avoiding action to a departing B737 on a BOG SID. Pilot had a comprehensive plan to get to Goodwood and concedes that it was a poor decision to change the plan on the day.☐ CAA Closure: Pilot has learned not the change plan at short notice, and also now more aware of the need to verify vertical as well as lateral clearance from controlled airspace.
201304859	03/05/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	10 NE	G	Restricted area	SOCATA	Reciprocating	1	Infringement of the Stansted TMZ (Class G) by a TB20 squawking 7000 at 1700ft. The a/c initially talking to Andrewsfield, then transferred to LTCC. The infringement caused a delay to an inbound B737.	
201304859	03/05/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	10 NE	G	Restricted area	BOEING	Turbofan	2	Infringement of the Stansted TMZ (Class G) by a TB20 squawking 7000 at 1700ft. The a/c initially talking to Andrewsfield, then transferred to LTCC. The infringement caused a delay to an inbound B737.	

201304872	05/05/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	8 NE	D	CTR	PIPER	Reciprocating	1	Infringement of the Gatwick CTR (Class D) by a PA28 at 2000ft. Standard separation maintained.	Investigation identified further training required.☐ CAA Closure: One day of training spent with Senior FE followed by three further flights with FE/FI to confirm pilot's ability to fly solo.
201304874	05/05/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	4 N	D	CTR	UNKNOWN	Reciprocating	1	Infringement of the Southampton CTR (Class D) by an unknown a/c showing as a primary contact only. Blind transmissions made without success. DHC8 on approach given avoiding action and broken off approach. Another inbound DHC8 vectored clear.	Traffic info given.Standard separation maintained.
201304874	05/05/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	4 N	D	CTR	DE HAVILLAND	Turboprop	2	Infringement of the Southampton CTR (Class D) by an unknown a/c showing as a primary contact only. Blind transmissions made without success. DHC8 on approach given avoiding action and broken off approach. Another inbound DHC8 vectored clear.	Traffic info given.Standard separation maintained.
201304879	04/05/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	8.8 N	D	CTA	EUROPA	Reciprocating	1	Infringement of the Solent CTA (Class D) by a Europa at 3100ft. Blind calls made without success. Standard separation maintained.	
201304882	05/05/2013	EGTT : London (FIR)	Hunsdon	2nm South	G	Restricted area	OTHER	Reciprocating	1	Infringement of the Stansted TMZ 2 (Class G) by a Skyranger tracking Southbound. No other a/c affected. It seems that the pilot believed that his transponder was switched on.	CAA Closure: The transponder was unserviceable. The a/c was sent for maintenance.

201304898	06/05/2013	EGTT : London (FIR)	CPT	10nm SE	A	TMA	FLY BUY ULTRALIGHTS	Reciprocating	1	Infringement of the LTMA (Class A) by an Ikarus C42 at 5500ft. No other traffic were affected by this infringement.	
201304910	06/05/2013	EGTT : London (FIR)	DTY	11nm W	A	CTA	GROB	Reciprocating	1	Infringement of the Daventry CTA (Class A) by a G109B at 5200ft. Separation minima was maintained.	The pilot stated; 'with minimal experience of a/c in gliding mode he was taking instruction from a more experienced glider pilot on a casual basis. Continual tight turns in strong thermal activity resulted in pilot becoming unaware of position and height.'
201304922	03/05/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	12 W	D	CTA	CESSNA	Reciprocating	1	Alleged infringement of the Birmingham CTA (Class D) by a C182 at 2800ft. Separation minima was maintained.	The pilot was adamant he did not infringe the airspace, believing it was a 'Likely transponder malfunction'
201304928	29/04/2013	EGTT : London (FIR)	HON	6 SW	D	CTA	GROB	Reciprocating	1	Infringement of the Birmingham CTA 2 (Class D) by a G115 at 2000ft. Separation lost with an inbound B737.	Investigations revealed that the event was caused by the G115 climbing into CAS in CTA2 . The Birmingham radar controller believed he would achieve 5nm separation so no avoiding action or traffic info was passed however a separation loss did occur.
201304928	29/04/2013	EGTT : London (FIR)	HON	6 SW	D	CTA	BOEING	Turbofan	2	Infringement of the Birmingham CTA 2 (Class D) by a G115 at 2000ft. Separation lost with an inbound B737.	Investigations revealed that the event was caused by the G115 climbing into CAS in CTA2 . The Birmingham radar controller believed he would achieve 5nm separation so no avoiding action or traffic info was passed however a separation loss did occur.

201304931	07/05/2013	EGTT : London (FIR)	SAM	12nm North	A	CTA	CESSNA	Reciprocating	1	Infringement of the Solent CTA (Class D) by a C172 squawking 7000 at 3500ft on QNH 1013. Separation lost with inbound DHC8. Traffic info and avoiding action given.	Blind call was put out to try and establish two-way communication but received no reply. The contact subsequently changed to a Boscombe squawk and Boscombe were called and informed that they were working an a/c close to the CTA and requested they turn it away. A/c details were confirmed by Boscombe.
201304931	07/05/2013	EGTT : London (FIR)	SAM	12nm North	A	CTA	DE HAVILLAND	Turboprop	2	Infringement of the Solent CTA (Class D) by a C172 squawking 7000 at 3500ft on QNH 1013. Separation lost with inbound DHC8. Traffic info and avoiding action given.	Blind call was put out to try and establish two-way communication but received no reply. The contact subsequently changed to a Boscombe squawk and Boscombe were called and informed that they were working an a/c close to the CTA and requested they turn it away. A/c details were confirmed by Boscombe.
201304983	07/05/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	16 NW	A	TMA	CESSNA	Reciprocating	1	Infringement of the LTMA (Class A) by a C152 at 2800ft. Avoiding action given. Separation minima was maintained.	The student in question has been briefed by his CFI on what he did and the dangers/legality. It has been decided that he will repeat the same navigation route with his instructor, he will then fly with the CFI or deputy CFI on another navigation route involving the coordination of other, unfamiliar controlled airspace. Only when he has demonstrated to the CFI/DCFI to above a satisfactory standard will he then be sent to fly solo again.
201304983	07/05/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	16 NW	A	TMA	UNKNOWN	Turbofan		Infringement of the LTMA (Class A) by a C152 at 2800ft. Avoiding action given. Separation minima was maintained.	The student in question has been briefed by his CFI on what he did and the dangers/legality. It has been decided that he will repeat the same navigation route with his instructor, he will then fly with the CFI or deputy CFI on another navigation route involving the coordination of other, unfamiliar controlled airspace. Only when he has demonstrated to the CFI/DCFI to above a satisfactory standard will he then be sent to fly solo again.
201305219	11/05/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	9.1nm North East	D	CTR	BELL	Turboshaft	1	Infringement of the Luton CTR (Class D) by a Bell 206 squawking 5031 at 1400ft. Pilot apologised. Standard separation maintained.	The radar replay confirms that the a/c briefly entered the Luton CTR before being turned promptly by Farnborough LARS. Due to the short duration of this infringement, the prompt action taken by LARS and the fact that the pilot apologised, no further action is being taken. The pilots report indicates that he mistook Letchworth for Baldock.

201305269	12/05/2013	EGTT : London (FIR)	Overhead Thurrock		A	TMA	CESSNA	Reciprocating	1	Infringement of the London TMA (Class A) by a C172 squawking 7010 with Mode C 3100ft. Standard separation maintained.	The CFI of the flying club has been alerted and has taken appropriate action.
201305443	16/04/2013	EGTT : London (FIR)	En-route		A	CTR	PIPER	Reciprocating	1	Infringement of the London CTR (Class A) and Northolt RMA by an a/c, later identified as a PA28, at 1300ft. Separation may have been lost with a Northolt outbound a/c on BUZ 1Y SID.	Northolt ATC made a land line call to Denham airfield, whose ATZ the PA28 had subsequently entered, to instruct the PA28 to descend immediately to 1000ft London QNH. Reporter stated the a/c failed to comply with the instruction and separation may have been lost as a result.
201305443	16/04/2013	EGTT : London (FIR)	En-route		A	CTR	UNKNOWN	Unknown		Infringement of the London CTR (Class A) and Northolt RMA by an a/c, later identified as a PA28, at 1300ft. Separation may have been lost with a Northolt outbound a/c on BUZ 1Y SID.	Northolt ATC made a land line call to Denham airfield, whose ATZ the PA28 had subsequently entered, to instruct the PA28 to descend immediately to 1000ft London QNH. Reporter stated the a/c failed to comply with the instruction and separation may have been lost as a result.
201305457	15/05/2013	EGTT : London (FIR)	CPT	15nm S	A	CTA	CESSNA	Turboprop	1	Infringement of notified active Airway Q41 (Class A) by an a/c in climb squawking 0033 indicating FL099. A/c identified via D&D cell as a C208. Standard separation maintained.	Infringer reached FL116 before tracking Westbound towards the Salisbury Plain Danger Area, where it eventually climbed to FL140. TC reporter stated that the a/c infringed the active airspace for 5mins during a busy and complex Wx afflicted session on SW Deps. Solent Radar had attempted to contact the infringer without success. TC spoke to D&D cell who established the infringer to be a C208 in 2-way communication with Netheravon. On instruction of D&D, Netheravon agreed to speak to C208 on landing regarding active times for Airway Q41.
201305516	16/05/2013	EGTT : London (FIR)	Goodwood	7 S	A	Other	PIPER	Reciprocating	1	Infringement of Airway N859 (Class A) by a PA28 at FL081. Standard separation maintained.	

201305585	12/03/2013	EGTT : London (FIR)	EGWU (NHT): Northolt	7nm W	A	CTR	ROBINSON	Reciprocating	1	Infringement of the Heathrow CTR (Class A) by an unknown aircraft squawking 7000 with Mode C indicating approx 1200ft, resulting in loss of separation with an HS125. Aircraft identified via Denham ATC as an R44. Traffic info and avoiding action given.	The HS125 was instructed to stop descent at 4000ft due to the infringer entering CAS on a reciprocal heading. The infringer was tracked East, eventually becoming established within the Denham ATZ. The HS125 experienced a delayed descent and a short period in a hold before being vectored for a standard PAR approach to Northolt.
201305585	12/03/2013	EGTT : London (FIR)	EGWU (NHT): Northolt	7nm W	A	CTR	BAE	Turbojet	2	Infringement of the Heathrow CTR (Class A) by an unknown aircraft squawking 7000 with Mode C indicating approx 1200ft, resulting in loss of separation with an HS125. Aircraft identified via Denham ATC as an R44. Traffic info and avoiding action given.	The HS125 was instructed to stop descent at 4000ft due to the infringer entering CAS on a reciprocal heading. The infringer was tracked East, eventually becoming established within the Denham ATZ. The HS125 experienced a delayed descent and a short period in a hold before being vectored for a standard PAR approach to Northolt.
201305600	18/05/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	15 S	D	CTA	OTHER	Reciprocating	1	Infringement of the Southampton CTA (Class D) by a C42 at 3000ft 15nm S of SAM. Standard separation maintained.	Pilot became distracted while showing landmarks to passenger. Lesson learned.
201305612	19/05/2013	EGTT : London (FIR)	SAM	8.5nm S	D	CTR	ROBINSON	Reciprocating	1	Infringement of the Southampton CTR (Class D) by an R44 squawking 7000 at 1900ft. Standard separation maintained.	Bournemouth ATC contacted Southampton ATC to advise they had told the a/c to contact Solent Radar but the a/c had called London FIS instead.
201305615	18/05/2013	EGTT : London (FIR)	EGLC (LCY): London city	NE	D	CTA	AVIONS ROBIN	Reciprocating	1	Infringement of the London City CTA (Class D) by an a/c, identified via Mode S, as a Robin DR400 squawking 7000 at 2000ft resulting in loss of separation with a London City inbound EMB190. CAIT activated. Traffic info given.	Information indicates that the infringing a/c was detected by CAIT, the Thames controller took appropriate action and although separation was lost, the a/c were deemed not to be in unsafe proximity. The pilot believes a minor distraction led to this incident however the appropriate lessons appear to have been learnt.

201305615	18/05/2013	EGTT : London (FIR)	EGLC (LCY): London city	NE	D	CTA	EMBRAER	Turbofan	2	Infringement of the London City CTA (Class D) by an a/c, identified via Mode S, as a Robin DR400 squawking 7000 at 2000ft resulting in loss of separation with a London City inbound EMB190. CAIT activated. Traffic info given.	Information indicates that the infringing a/c was detected by CAIT, the Thames controller took appropriate action and although separation was lost, the a/c were deemed not to be in unsafe proximity. The pilot believes a minor distraction led to this incident however the appropriate lessons appear to have been learnt.
201305616	18/05/2013	EGTT : London (FIR)	Wethersfield G/S		G	Other	DE HAVILLAND	Reciprocating	1	Chipmunk a/c overflew the Wethersfield G/S, Class G airspace at approx 1000ft. Although Glider Ops were active, no a/c were airborne at the time.	Farnborough LARS were contacted and were already communicating with the a/c to warn it away from the airfield.
201305618	18/05/2013	EGTT : London (FIR)	EGLC (LCY): London city	12nm South East	A	TMA	PIPER	Reciprocating	1	Infringement of the London TMA (Class A) by a PA28 squawking 7000 at 2600ft. A/c also entered the Stansted CTA (Class D) with Mode C indicating 1900ft overhead North Weald. Standard separation maintained.	A/c was identified North of the River Thames as it passed a police helicopter working 125.625. The root causes of this incident appear to be poor preflight planning, further compounded by poor flying skills and lack of situational awareness.☐ CAA Closure: The pilot is undertaking additional training.
201305653	19/05/2013	EGTT : London (FIR)	EGNS (IOM): Isle Of Man/Ronaldswa y	8nm North	D	CTR	AEROSPATIALE	Turboshaft	1	Infringement of the Isle of Man CTR (Class D) by an AS350 squawking 4552. On establishing contact with ATC pilot allegedly made inappropriate comments and did not seem to understand the importance of obtaining a clearance before entering CAS.	CAA Closure: Appropriate CAA action taken.
201305727	19/05/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTR	EVEKTOR AEROTECHNIK	Reciprocating	1	Pilot lost.	Aircraft called D&D unsure of position and was given a DF fix using Auto-T. The pilot appeared uncertain of the position given and confirmed that he was lost. On being asked to squawk Lost the ac was identified on radar and seen to be entering the Luton Zone. The ac was placed under a service and turned onto a northerly heading to expedite exit from the zone and route towards Sywell. The ac was later turned onto 280 degrees at Luton's request to facilitate Luton recoveries. The ac cleared Luton Zone but was later observed to start tracking back towards it. Suspecting a faulty compass a NCNG turn was initiated placing the ac on a track of 350 degrees for Sywell at a range of 26nm. The ac remained with D&D until 5nm when the pilot reported visual with Sywell and reported ready to change frequency. The ac was transferred to 122.7 at 1107z but did not check in with Sywell until 1133z.

201305750	21/05/2013	EGTT : London (FIR)	REXAM		A	RVSM	DIAMOND	Reciprocating	1	Infringement of Airway N864 (Class A) at 5000ft. Avoiding action given. Standard separation maintained.	Pilot error acknowledged.
201305753	05/05/2013	EGTT : London (FIR)	EGKH : Lashenden/Headcorn		G	ATZ	PIPER	Reciprocating	1	Cancelled Processed Under 201305028.	As PA28 turned final for R/W28, they considered themselves too high and advised Lashenden/Headcorn ATC they would be initiating a go-around. As they rejoined the circuit the pilot expressed surprised at Lashenden/Headcorn advising them that they had breached the ATZ twice. PA28 pilot elected to return to Biggin Hill. PA28 pilot made comments regarding alleged poor pre-flight information received from Lashenden/Headcorn approx one hour before their flight and poor ATC communication experienced whilst near the field.
201305776	22/05/2013	EGTT : London (FIR)	EGLC (LCY): London city	8 NE	A	TMA	PIPER	Reciprocating	1	Infringement of the LTMA (Class A) by a PA28 at 2700ft resulting in a loss of separation against a London City inbound EMB190. Traffic info given.	Pilot confirmed that he had inadvertently set a QNH of 1008mb on departure instead of a correct QNH of 1018mb resulting in the a/c climbing through the LTMA base. Pilot error acknowledged.
201305776	22/05/2013	EGTT : London (FIR)	EGLC (LCY): London city	8 NE	A	TMA	EMBRAER	Turbofan	2	Infringement of the LTMA (Class A) by a PA28 at 2700ft resulting in a loss of separation against a London City inbound EMB190. Traffic info given.	Pilot confirmed that he had inadvertently set a QNH of 1008mb on departure instead of a correct QNH of 1018mb resulting in the a/c climbing through the LTMA base. Pilot error acknowledged.
201305793	22/05/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	5 ESE	D	CTR	CESSNA	Reciprocating	1	Infringement of the Southampton CTR (Class D) by a C150 squawking 7000 with no Mode C. Traffic info and avoiding action given. Standard separation maintained.	The pilots report into this incident appears to show that the appropriate lessons have been learnt.

201305801	22/05/2013	EGTT : London (FIR)	EXMOR	5 W	D	CTA	LET	Turbojet	1	Infringement of the Cardiff CTA (Class D) by an L29 at 5800ft squawking 7000. Blind transmissions made without success. Traffic info given. Standard separation maintained.	The St Athan ATCO was asked to brief the pilot involved over the CAS boundary in the vicinity of EXMOR.
201305897	21/05/2013	EGTT : London (FIR)	EGSC (CBG): Cambridge		G	ATZ	AEROMOT	Reciprocating	1	Infringement of the Cambridge ATZ (Class G) by a Motor Glider squawking 1177 at 1400ft. Traffic info given to C172 approx 2nm final.	On leaving the ATZ the squawk changed to Farnborough LARS North.
201305910	24/05/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	5.3nm North East	D	CTR	PIPER	Reciprocating	1	Infringement of the Solent CTR (Class D) by a PA28 squawking 0430 at 1700ft. Standard separation maintained.	A/c had been instructed to remain outside CAS and subsequently issued with onwards transit clearance along with a Southampton squawk. It is noted that Farnborough DF was out of service.
201305928	25/05/2013	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	10nm NE	D	CTA	EVEKTOR AEROTECHNIK	Reciprocating	1	Infringement of the East Midlands CTA (Class D) by an unknown aircraft with a London FIS squawk at 4200ft. Aircraft identified as an EV97. No other aircraft affected.	London FIS were contacted and requested transfer of the unknown aircraft to East Midlands ATC. Aircraft was subsequently identified by the allocation of East Midlands squawk 4550. EV97 pilot was reminded of their responsibility to obtain clearance. Pilot apologised.
201305930	25/05/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	27 SSW	A	Other	VANS	Reciprocating	1	Alleged infringement of Airway Q41 (Class A) by a Vans RV9 at 4000ft resulting in a possible loss of separation against a Southampton outbound Trislander. Traffic info and avoiding action given.	The Approach controller was required to transition between non-radar and radar approach controller. He reported difficulties with the transition resulting in an increased workload. During the period an a/c, that had been working Bournemouth, was observed, with rapidly changing Mode C to enter the Solent CTA-9 and come into proximity with a southbound Trislander. The CAA reviewed the available area surveillance and did detect the same anomaly with the infringing a/c's Mode C. The duration of the apparent infringement was approximately 40secs although the a/c had previously been observed to descend below the airways. □ CAA Closure: The procedural difficulties reported by controller are being reviewed and addressed by the unit. The CAA will monitor for future infringement events concerning the subject airframe.

201305930	25/05/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	27 SSW	A	Other	BRITTEN NORMAN	Reciprocating	3	Alleged infringement of Airway Q41 (Class A) by a Vans RV9 at 4000ft resulting in a possible loss of separation against a Southampton outbound Trislander. 201305943	25/05/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	12 SW	G	Restricted area	PIPER	Reciprocating	1	Infringement of the Stansted TMZ 2 (Class G) by a PA28 squawking 7000 with no Mode C. Blind call made but no response. Inbound flight vectored away from the infringer	
201305943	25/05/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	12 SW	G	Restricted area	UNKNOWN	Unknown		Infringement of the Stansted TMZ 2 (Class G) by a PA28 squawking 7000 with no Mode C. Blind call made but no response. Inbound flight vectored away from the infringer	
201305957	25/05/2013	EGTT : London (FIR)	DET	9nm South	A	TMA	PIPER	Reciprocating	1	Infringement of the London TMA (Class A) by a PA32 with Mode C indicating 3900ft. Standard separation maintained.	A/c remained within CAS for several mins. Squawk later changed to 5026 and a/c quickly descended out of CAS. Pilot subsequently reported that the flight had been particularly bumpy due to strong Northerly winds and that he had been distracted keeping the a/c straight and level.
201305958	25/05/2013	EGTT : London (FIR)	Denham	5nm WNW	A	CTR	GRUMMAN	Reciprocating	1	Infringement of the London CTR (Class A) by a Grumman AA5 squawking 7000 with Mode C indicating 2400ft. Heathrow northbound departures were stopped at 1722hrs and resumed shortly after 1724hrs. No loss of separation reported.	It has subsequently been revealed that the pilot's GPS battery had failed. He was proceeding to set up the CPT VOR and preoccupied with resolving instrument discrepancies had inadvertently turned South.

201305959	26/05/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	10 WSW	A	CTR	CESSNA	Reciprocating	1	Infringement of the LTMA (Class A) and Gatwick CTA/CTR (Class D) by a C172 at 3000ft. Blind calls made without success. Standard separation maintained.	Student pilot. Appropriate CAA action has been taken as a result of this incident.
201305959	26/05/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	10 WSW	A	TMA	CESSNA	Reciprocating	1	Infringement of the LTMA (Class A) and Gatwick CTA/CTR (Class D) by a C172 at 3000ft. Blind calls made without success. Standard separation maintained.	Student pilot. Appropriate CAA action has been taken as a result of this incident.
201305959	26/05/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	10 WSW	A	CTA	CESSNA	Reciprocating	1	Infringement of the LTMA (Class A) and Gatwick CTA/CTR (Class D) by a C172 at 3000ft. Blind calls made without success. Standard separation maintained.	Student pilot. Appropriate CAA action has been taken as a result of this incident.
201305979	26/05/2013	EGTT : London (FIR)	EGDO : Predannack Navy		G	ATZ	OTHER	Reciprocating	1	Infringement of active RNAS Predannack ATZ and gliding launching site (Class G) by four microlights between 500-800ft. Flying operations were suspended until the microlights were clear of the area.	The microlights passed beneath an airborne glider in the circuit. Military ATC contacted Newquay Airfield who confirmed the microlights were expected to land at Perranporth.
201305986	27/05/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	11.5nm South East	D	CTA	GRUMMAN	Reciprocating	1	Infringement of the Birmingham CTA2 (Class D) by a Grumman AA5B squawking 7000 climbing to 1900ft. A/c identity confirmed by Mode S. Standard separation maintained.	Pilot subsequently reported that he had been working Coventry until asked to freecall Wellesbourne. He believed that he had been at 1500ft throughout and had not realised that he had climbed into CAS. He was navigating using GPS.

201306020	27/05/2013	EGTT : London (FIR)	Northwich	3nm North	D	CTR	AQUILA	Reciprocating	1	Infringement of the Manchester CTR (Class D) by an AT01 squawking 7000 at 1300ft. Standard separation maintained.	Aircraft had been given a Basic Service on entering the LLR. Shortly after the squawk had been observed crossing the eastern boundary of the LLR and entering the zone tracking South East. Pilot was requested to squawk 7350, identified and informed that he had entered the CTZ. Pilot was instructed to vacate the zone which he did.
201306221	31/05/2013	EGTT : London (FIR)	WOD	2nm North	A	TMA	PIPER	Reciprocating	1	Infringement of the London TMA (Class A) by a PA28R squawking 0437 at 3400ft. Standard separation maintained.	Pilot had been issued with a squawk and a Basic Service with Farnborough QNH on his first call. He was instructed to descend immediately to 2400ft and to track Westbound to the leave the LTMA. No other traffic was observed in the vicinity. Pilot stated that he had been focussing on VOR tracking and had not detected his error.
201306236	31/05/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	8nm North	D	CTR	CESSNA	Reciprocating	1	Infringement of the Birmingham CTR (Class D) by a C150 squawking 7000. Traffic info given. Departing aircraft was instructed to climb straight ahead to 6000ft to maintain separation.	C150 left the CTR to the East and was tracked to Leicester who confirmed its identity. Pilot subsequently called and reported he was a low hours PPL who had temporarily become uncertain of his position.
201306236	31/05/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	8nm North	D	CTR	UNKNOWN	Unknown		Infringement of the Birmingham CTR (Class D) by a C150 squawking 7000. Traffic info given. Departing aircraft was instructed to climb straight ahead to 6000ft to maintain separation.	C150 left the CTR to the East and was tracked to Leicester who confirmed its identity. Pilot subsequently called and reported he was a low hours PPL who had temporarily become uncertain of his position.
201306252	31/05/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	13nm South East	D	CTA	CESSNA	Reciprocating	1	Infringement of the Birmingham CTA2 (Class D) by a C172 squawking 7000 at 2500ft. Separation lost with C560 on a closing heading for ILS R/W33.	A/c was tracked by Radar 2 via the TDB and details of the a/c were obtained from Shawbury. Attributed to pilot poor planning and situational awareness. ☐ CAA Closure: Appropriate CAA action taken.

201306252	31/05/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	13nm South East	D	CTA	CESSNA	Turbofan	2	Infringement of the Birmingham CTA2 (Class D) by a C172 squawking 7000 at 2500ft. Separation lost with C560 on a closing heading for ILS R/W33.	A/c was tracked by Radar 2 via the TDB and details of the a/c were obtained from Shawbury. Attributed to pilot poor planning and situational awareness. ☐ CAA Closure: Appropriate CAA action taken.
201306265	31/05/2013	EGTT : London (FIR)	EGCB : Manchester/Barton	4 E	D	CTR	CESSNA	Reciprocating	1	Infringement of the Manchester CTR (Class D) by a C172 squawking 7000. Standard separation maintained.	
201306270	01/06/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	12 S	D	CTA	VANS	Reciprocating	1	Infringement of the Birmingham CTA (Class D) by a Vans RV7 at 2500ft. Blind calls made with no response received. Three inbounds given vectors to maintain separation. Traffic info and avoiding action given. Standard separation maintained.	
201306272	01/06/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	9.5nm S	D	CTR	PIPER	Reciprocating	1	Infringement of the Birmingham CTR (Class D) by an a/c squawking 7000 indicating 2300ft. A/c identified via Mode S as a PA28. Traffic info given. Standard separation maintained.	Birmingham Radar 1 made blind calls, with no response. Inbound IFR traffic was routed to the GROVE hold at FL80 and FL90. The contact continued on an Easterly heading until reaching the Coventry overhead, then tracked South to leave the zone. Coventry were contacted by telephone to advise them of the infringer. The contact was then tracked until it entered the circuit at Wellesbourne Mountford. Student pilot became lost and misidentified required airfield. ☐ CAA Closure: Student pilot to receive extra navigation training before next solo flight.
201306287	01/06/2013	EGTT : London (FIR)	Pole Hill		A	TMA	AVIONS ROBIN	Reciprocating	1	Infringement of the Manchester TMA (Class A) by a DR400 at 5700ft. Standard separation maintained. Pilot was advised that he was inside CAS and to descend immediately to 3400ft. Squawk of 2674 assigned and a/c seen passing 4000ft before reporting 3400ft.	

201306292	01/06/2013	EGTT : London (FIR)	Epsom Heliport		G	ATZ	CESSNA	Reciprocating	1	Infringement of the Epsom Heliport ATZ (Class G) by a C172. No RT comms. Traffic info passed to a departing Bell 206.	
201306293	01/06/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick		D		VANS	Reciprocating	1	Infringement of the Gatwick CTZ by a Vans RV7. CAIT activated. Separation lost with Gatwick inbound.	CAA Closure: Appropriate follow-up action taken by ATC.
201306293	01/06/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick		D		UNKNOWN	Unknown		Infringement of the Gatwick CTZ by a Vans RV7. CAIT activated. Separation lost with Gatwick inbound.	CAA Closure: Appropriate follow-up action taken by ATC.
201306294	01/06/2013	EGTT : London (FIR)	Epsom Heliport		G	ATZ	PILATUS	Turboprop	1	Infringement of the Epsom Heliport ATZ (Class G) by a PC12 at 2200ft. The a/c was seen to pass overhead the Grandstand area. Fair Oaks confirmed that the a/c had landed with them.	
201306294	01/06/2013	EGTT : London (FIR)	Epsom Heliport		G	ATZ	EUROCOPTER	Turboshaft	2	Infringement of the Epsom Heliport ATZ (Class G) by a PC12 at 2200ft. The a/c was seen to pass overhead the Grandstand area. Fair Oaks confirmed that the a/c had landed with them.	

201306295	01/06/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick		D		JABIRU	Reciprocating	1	Infringement of the Gatwick CTZ (Class D) by a Jabiru with no Mode C. CAIT activated. Separation lost with Gatwick inbound a/c.	CAA Closure: Appropriate CAA action taken.
201306295	01/06/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick		D		UNKNOWN	Unknown		Infringement of the Gatwick CTZ (Class D) by a Jabiru with no Mode C. CAIT activated. Separation lost with Gatwick inbound a/c.	CAA Closure: Appropriate CAA action taken.
201306298	02/06/2013	EGTT : London (FIR)	BKY	North West	D	CTA	SCOTTISH AVIATION	Reciprocating	1	Infringement of the Stansted CTA (Class D) by a Bulldog squawking 7010 with Mode C of 2800ft. Possible late descent to get below the 2500ft CTA line. Standard separation maintained.	Blind transmission made with no response. Squawk changed to 7010, causing the magenta highlighting to drop. Aircraft descended and appeared to land at Audley End. Operator to be alerted.
201306300	02/06/2013	EGTT : London (FIR)	Harlow		G	Restrict ed area	CIRRUS	Reciprocating	1	Infringement of the Stansted TMZ 2 (Class G) by a SR20 squawking 7010 with no Mode C. A/c identity confirmed with Mode S.	North Weald confirmed working the a/c and were requested to check altitude. Initial response overhead from the pilot was to be 1800ft (the setting could not be determined). The pilot quickly transmitted 1200ft and said that he did have Mode C selected.
201306303	02/06/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	SW	G	Restrict ed area	BELL	Turboshaft	1	Infringement of the Stansted TMZ 2 (Class G) by a Bell 206 squawking 5042.	It has subsequently been revealed that the pilot had inadvertently failed to select ALT on the transponder. Pilot apologised.

201306304	02/06/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	12 SW	D	CTA	CESSNA	Reciprocating	1	Infringement of the Stansted CTA (Class D) by a C177 at 1800ft. Standard separation maintained.	
201306305	02/06/2013	EGTT : London (FIR)	Hunsdon		G	Restricted area	OTHER	Reciprocating	1	Infringement of the Stansted TMZ 2 (Class G) by a Skyranger.	Pilot to undertake further training.
201306306	02/06/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted		G	Restricted area	HUGHES	Turboshaft	1	Infringement of the Stansted TMZ 1 (Class G) by a Hu369 (believed) squawking 7000 with no Mode C. Aircraft was initially observed as a primary only contact.	
201306308	01/06/2013	EGTT : London (FIR)	EGWE : Henlow		G	Other	AEROSPATIALE	Turboshaft	1	Infringement of the RAF Henlow parachute drop zone (Class G) by an unknown helicopter at 1000ft.	
201306340	31/05/2013	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD		D	CTR	CIRRUS	Reciprocating	1	Infringement of Doncaster CTR (Class D) by an SR22 squawking 7000 with Mode C indicating 3000ft. Standard separation maintained.	Pilot stated that he had tried to obtain a service with Waddington but could not establish two-way communications with them. He then missed Gamston and continued Northbound and turned back when he realised he had gone too far.

201306357	31/05/2013	EGTT : London (FIR)	LOREL		A	TMA	OTHER	Reciprocating	1	Infringement of the LTMA (Class A) by a Sportcruiser at 5800ft. Luton inbound B737 given a vector to remain clear and given traffic info. Standard separation maintained.	Pilot error acknowledged.
201306357	31/05/2013	EGTT : London (FIR)	LOREL		A	TMA	BOEING	Turbofan	2	Infringement of the LTMA (Class A) by a Sportcruiser at 5800ft. Luton inbound B737 given a vector to remain clear and given traffic info. Standard separation maintained.	Pilot error acknowledged.
201306371	03/06/2013	EGTT : London (FIR)	EGLC (LCY): London city	7 NW	A	TMA	PIPER	Reciprocating	1	Infringement of the LTMA by a PA28 squawking 7000 at 2800ft. City northbound departures suspended. Standard separation maintained.	
201306375	03/06/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	10 W	D	CTA	PIPER	Reciprocating	1	Infringement of the Gatwick CTA (Class D) by an unknown a/c squawking 7000, with Mode C indicating 1900ft resulting in loss of separation with a Gatwick inbound B777. A/c later identified as a PA28.	ATC vectored a Gatwick inbound B757 to ensure separation against the infringer. The PA28 pilot commented in their report that the infringement was a result of them allowing their proficiency to lapse due to lack of recent experience, combined with an inadequate knowledge of the local area and poor flight planning. Pilot stated they had not experienced this level of uncertainty whilst in flight before and did not react properly even though they knew what the procedure should be. Pilot also acknowledged they should have contacted Farnborough ATC. Pilot has requested further training with regards to local orientation and D&D practice PAN.
201306375	03/06/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	10 W	D	CTA	BOEING	Turbofan	2	Infringement of the Gatwick CTA (Class D) by an unknown a/c squawking 7000, with Mode C indicating 1900ft resulting in loss of separation with a Gatwick inbound B777. A/c later identified as a PA28.	ATC vectored a Gatwick inbound B757 to ensure separation against the infringer. The PA28 pilot commented in their report that the infringement was a result of them allowing their proficiency to lapse due to lack of recent experience, combined with an inadequate knowledge of the local area and poor flight planning. Pilot stated they had not experienced this level of uncertainty whilst in flight before and did not react properly even though they knew what the procedure should be. Pilot also acknowledged they should have contacted Farnborough ATC. Pilot has requested further training with regards to local orientation and D&D practice PAN.

201306438	21/05/2013	EGTT : London (FIR)	EGLF (FAB): Farnborough civil	10nm N	A	TMA	DIAMOND	Reciprocating	1	A DA42 infringed the LTMA (Class A) at 2500ft. There was no other traffic in the area.	The Approach controller notified the aircraft that controlled airspace was in its 12 o'clock at 0.5nm and suggested the aircraft start its turn. Shortly after, the aircraft began to turn, but the turn was not sufficient to remain clear of controlled airspace.
201306452	01/06/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted				BELL	Turboshaft	1	Faulty transponder. The pilot was reading an altitude of 1380ft and the controller was indicating 1700ft. Aircraft had infringed the Stansted CTA (Class D).	The pilot said he would descend in order to exit the CTA. When the pilot reached 1100ft, the controller reported the same altitude also. The pilot stated he would be reporting the fault to Engineering upon arrival.
201306535	04/06/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	W	D	CTR	AEROSPATIALE	Turboshaft	1	Infringement of the Luton CTR (Class D) by an AS350 at 1300ft. Traffic info was passed and separation minima was maintained.	The controller stopped the descent of an aircraft inbound to Luton. The pilot was contacted and states that he became distracted whilst experiencing acute radio interference.
201306535	04/06/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	W	D	CTR	AIRBUS	Turbofan	2	Infringement of the Luton CTR (Class D) by an AS350 at 1300ft. Traffic info was passed and separation minima was maintained.	The controller stopped the descent of an aircraft inbound to Luton. The pilot was contacted and states that he became distracted whilst experiencing acute radio interference.
201306563	06/06/2013	EGTT : London (FIR)	GARMI	2nm E	Other	Danger area	PIPER	Reciprocating	1	Infringement of active Danger Area (D036) by a PA28 at FL084. Separation minima was maintained.	The aircraft had not obtained a clearance. The danger area was active, but no activity was taking place at the time.

201306587	07/06/2013	EGTT : London (FIR)	RAF Syerston		G	ATZ	PIPER	Reciprocating	1	Alleged infringement of the active Syerston ATZ (Class G) Gliding Site by a PA28 squawking 7000.	CAA Closure: Dispute over whether the circuit was actually infringed. No further action possible.
201306593	07/06/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	8nm North North East	D	CTR	PIPER	Reciprocating	1	Infringement of the Southampton CTR (Class D) by a PA17 tracking Southbound with no Mode C. Blind transmissions were made with no response. Traffic info and avoiding action given. Separation lost.	CAA Closure: Appropriate CAA action taken.
201306593	07/06/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	8nm North North East	D	CTR	EMBRAER	Turbofan	2	Infringement of the Southampton CTR (Class D) by a PA17 tracking Southbound with no Mode C. 201306598	07/06/2013	EGTT : London (FIR)	NEDUL	3nm North East	D	CTA	EVEKTOR AEROTECHNIK	Reciprocating	1	Infringement of the Southampton CTA (Class D) by an EV-97 squawking 7000 indicating between 2000ft and 2300ft unverified. Traffic info given to inbound DHC8.	CAA Closure: Pilot error, attributed to poor flight planning. No further action taken.
201306598	07/06/2013	EGTT : London (FIR)	NEDUL	3nm North East	D	CTA	DE HAVILLAND	Turboprop	2	Infringement of the Southampton CTA (Class D) by an EV-97 squawking 7000 indicating between 2000ft and 2300ft unverified. Traffic info given to inbound DHC8.	CAA Closure: Pilot error, attributed to poor flight planning. No further action taken.

201306615	07/06/2013	EGTT : London (FIR)	LAT/LONG: 52352005/0014 6814		D	CTR	CHRISTEN	Reciprocating	1	Infringement of the Birmingham CTR (Class D) by a Christen Eagle II squawking 7000 with no level information. Traffic info given. Check ALL imposed with Tower. Separation lost. Several unsuccessful attempts made to contact a/c.	A/c identified by Coventry allocated 4362 and turned East immediately to exit CAS. A/c briefly infringed again to the South whilst under Coventry control.☐ CAA Closure:☐ Pilot error and inaccurate compass. Pilot visited to ATC.
201306615	07/06/2013	EGTT : London (FIR)	LAT/LONG: 52352005/0014 6814		D	CTR	AIRBUS	Turbofan	2	Infringement of the Birmingham CTR (Class D) by a Christen Eagle II squawking 7000 with no level information. Traffic info given. Check ALL imposed with Tower. Separation lost. Several unsuccessful attempts made to contact a/c.	A/c identified by Coventry allocated 4362 and turned East immediately to exit CAS. A/c briefly infringed again to the South whilst under Coventry control.☐ CAA Closure:☐ Pilot error and inaccurate compass. Pilot visited to ATC.
201306618	08/06/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTR	PIPER	Reciprocating	1	Infringement of the Luton CTR (Class D) by an unknown a/c squawking 7000 with Mode C indicating 2000ft resulting in loss of separation with a Luton outbound A319. A/c identified via Farnborough as a PA28. Traffic info and avoiding action given.	Luton outbound A319 was turning right as per CPT SID which would have taken it directly overhead the infringer. TC turned the A319 left heading 170, however the infringer turned left also. TC turned A319 further left to 345 which took the A319 well away from the infringer. Farnborough identified the infringer and the PA28 left the zone. Operator alerted and pilot error accepted.
201306618	08/06/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTR	AIRBUS	Turbofan	2	Infringement of the Luton CTR (Class D) by an unknown a/c squawking 7000 with Mode C indicating 2000ft resulting in loss of separation with a Luton outbound A319. A/c identified via Farnborough as a PA28. Traffic info and avoiding action given.	Luton outbound A319 was turning right as per CPT SID which would have taken it directly overhead the infringer. TC turned the A319 left heading 170, however the infringer turned left also. TC turned A319 further left to 345 which took the A319 well away from the infringer. Farnborough identified the infringer and the PA28 left the zone. Operator alerted and pilot error accepted.
201306650	07/06/2013	EGTT : London (FIR)	Bath	2nm West	D	CTA	PIPER	Reciprocating	1	Infringement of the Bristol CTA (Class D) by a PA28 squawking 5062 at 3000ft. Standard separation maintained.	A/c had been instructed to remain outside CAS by Yeovilton and Bristol. A/c was offered navigational assistance via Chew Valley Lake and to take up a South Westerly track to his next turning point. A/c left the CTA and continued on own navigation. On speaking with the pilot (a low houred newly qualified PPL) he explained that he was on a cross country flight and got lost when looking for his waypoint at Longleat House, which he did not see and had continued on a Northerly track. He was also unaware that he was very close to the city of Bath and was unfamiliar with the area.

201306678	09/06/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	N	D	CTA	EXTRA	Reciprocating	1	Infringement of the Birmingham CTA 1 (Class D) by an Extra 300 at 1700ft. A parachute drop was about to take place at FL60 directly above. Traffic info was passed and separation minima was maintained.	The infringing aircraft was using an incorrect pressure setting (RPS 1011) when it should have been set to QNH 1016. The pilot also stated the altimeter was under-reading, including the incorrect pressure setting.
201306678	09/06/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	N	D	CTA	CESSNA	Turboprop	1	Infringement of the Birmingham CTA 1 (Class D) by an Extra 300 at 1700ft. A parachute drop was about to take place at FL60 directly above. Traffic info was passed and separation minima was maintained.	The infringing aircraft was using an incorrect pressure setting (RPS 1011) when it should have been set to QNH 1016. The pilot also stated the altimeter was under-reading, including the incorrect pressure setting.
201306718	09/06/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	12nm W	A	CTR	PIPER	Reciprocating	1	Infringement of the Heathrow CTR (Class A) by a PA28 indicating 1600ft, resulting in loss of separation with three a/c on approach. Traffic info given.	ATC vectored a Heathrow inbound B777 through the localiser from the North and gave them a closing heading from the South. Information indicates that no avoiding action was deemed necessary. Incident due to a temporary loss of situational awareness. PA28 pilot was thoroughly debriefed and navigational training tasks were proposed.
201306718	09/06/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	12nm W	A	CTR	BOEING	Turbofan	2	Infringement of the Heathrow CTR (Class A) by a PA28 indicating 1600ft, resulting in loss of separation with three a/c on approach. Traffic info given.	ATC vectored a Heathrow inbound B777 through the localiser from the North and gave them a closing heading from the South. Information indicates that no avoiding action was deemed necessary. Incident due to a temporary loss of situational awareness. PA28 pilot was thoroughly debriefed and navigational training tasks were proposed.
201306732	10/06/2013	EGTT : London (FIR)	EGSX : North Weald		G	Restricted area	OTHER	Turbojet	1	Gnat infringed the Stansted TMZ 2 (Class G). The pilot was traced using Mode S, stating his Mode C had failed. Traffic info was passed to an inbound Airbus.	The inbound Airbus aircraft was turned onto a base leg in order to maintain separation.

201306732	10/06/2013	EGTT : London (FIR)	EGSX : North Weald		G	Restricted area	AIRBUS	Turbofan	2	Gnat infringed the Stansted TMZ 2 (Class G). The pilot was traced using Mode S, stating his Mode C had failed. Traffic info was passed to an inbound Airbus.	The inbound Airbus aircraft was turned onto a base leg in order to maintain separation.
201306741	08/06/2013	EGTT : London (FIR)	EGGP (LPL): Liverpool	12nm SE	D	CTR	CESSNA	Reciprocating	1	Infringement of the Liverpool CTR (Class D) by a C150 at 1300ft. Traffic info was passed and separation minima was maintained.	The pilot later called ATC and was advised of the error, for which he apologised.
201306853	03/06/2013	EGTT : London (FIR)	EGDY (YEO): Yeovilton		G	ATZ	SOCATA	Reciprocating	1	A/c infringed military aerodrome traffic zone.	The tower controller made several calls attempting to establish contact with the a/c which at first appeared to be heading for a runway which was out of use for maintenance work. All other station based a/c had to be turned away or held as the intentions of this a/c were not clear. No reply was received until the a/c was just ½nm from touchdown, when the pilot called on the tower frequency asking to land on R/W06. The aerodrome does not have a R/W06. A/c landed safely and it was established that the pilot had incorrectly set the frequency of, and was in contact with, another aerodrome, with whom he was receiving instructions for joining and to land. The other aerodrome was in fact approx 50nm away. The controller at the other aerodrome reported the a/c as missing to D&D when it failed to appear.☐ CAA Closure:☐ Closed at the request of the Infringement Co-ordination Group. No further action possible due to elapsed time.
201306905	12/06/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	5nm N	D	CTR	DE HAVILLAND	Reciprocating	1	Infringement of Luton CTR (Class D) by a Chipmunk. There was no other aircraft in the area.	The pilot called to say he thought he had entered the CAS whilst lost in cloud and apologised.
201306969	15/06/2013	EGTT : London (FIR)	HEN	10nm N	A	TMA	ROCKWELL	Reciprocating	1	Infringement of the LTMA (Class A) by an unknown a/c, 10nm North of Henton, squawking 7000, believed to be at 4000ft. A/c later identified as a Rockwell 112. Standard separation maintained.	CAA Closure: Appropriate CAA action taken.

201306976	15/06/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	14nm SW	A	Restricted area	ROBINSON	Reciprocating	1	Infringement of an RA(T) by a helicopter, identified via Mode S as an R44, at 1500ft, 14nm Southwest of Luton. Traffic info given.	TC informed Thames. R44 climbed to 1800ft and further traffic info was given. Appropriate CAA action to be taken as a result of this incident.
201306978	14/06/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	12nm SW	D	CTR	FUNK	Reciprocating	1	Infringement of the Luton CTR (Class D) by an FK9 at 2000ft. Separation minima was maintained.	The aircraft in question clipped the corner of the CTR for a minimal amount of time.
201306979	14/06/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	11 SE	D	CTA	TECNAM	Reciprocating	1	Infringement of the Birmingham CTA 2 (Class D) by a Tecnam P2002 squawking 7000 at 2000ft. Standard separation maintained.	
201307054	08/06/2013	EGTT : London (FIR)	Folkestone		A	Restricted area	PIPER	Reciprocating	1	Infringement of the Red Arrows RA(T) at Folkestone by an unknown a/c resulted in disruption to the display. Manston Radar identified the a/c from the a/c's FPL as a PA28.	Reporter stated that the infringer affected flight safety as the RA(T) must be sterile due to the nature of the display. The infringer contacted Manston TWR frequency before being passed to Manston Radar and was ordered to route North out of the RA(T). Appropriate CAA action to be taken as a result of this incident.
201307057	14/06/2013	EGTT : London (FIR)	EGD 009		G	Danger area	PIPER	Reciprocating	1	Infringement of EGD009 and EGD009A (Danger Areas) by a PA32.	

201307085	17/06/2013	EGTT : London (FIR)	EG D123		G	Danger area	DIAMOND	Reciprocating	1	Infringement of active Danger Area EG D123 (Imber) by an unknown a/c squawking 7000 at FL019. A/c identified via Solent Radar as a solo student pilot flying a DA40 on a NAVEX.	No live firing was taking place at the time of the infringement. The 7000 squawk was seen to change to 3660. Solent Radar were contacted via landline and established that the a/c was a DA40. Solent Radar controller asked the DA40 solo student pilot to contact ATC MOD on landing. The solo student pilot subsequently telephoned, apologised and admitted to a navigational error, having mistaken Westbury for Frome.☐ CAA Closure: Following this event, student pilot flew the whole route with an instructor and attended a further one hour of ground school. Student pilot was also reminded to request a Traffic Service whenever possible.
201307127	18/06/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	3nm NE	D	CTR	JODEL	Reciprocating	1	Infringement of the Southampton CTR (Class D) by a Jodel D117 resulting in loss of separation with three Southampton inbound a/c. Traffic info and avoiding action given.	Jodel D117 pilot failed to correctly identify Roughay and overshot into conflict with Southampton inbounds.☐ CAA Closure: ATC Investigation identified closer liaison between Southampton ATC and the Roughay manager, including revised procedures.
201307127	18/06/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	3nm NE	D	CTR	EMBRAER	Turbofan	2	Infringement of the Southampton CTR (Class D) by a Jodel D117 resulting in loss of separation with three Southampton inbound a/c. Traffic info and avoiding action given.	Jodel D117 pilot failed to correctly identify Roughay and overshot into conflict with Southampton inbounds.☐ CAA Closure: ATC Investigation identified closer liaison between Southampton ATC and the Roughay manager, including revised procedures.
201307127	18/06/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	3nm NE	D	CTR	BAE	Turboprop	2	Infringement of the Southampton CTR (Class D) by a Jodel D117 resulting in loss of separation with three Southampton inbound a/c. Traffic info and avoiding action given.	Jodel D117 pilot failed to correctly identify Roughay and overshot into conflict with Southampton inbounds.☐ CAA Closure: ATC Investigation identified closer liaison between Southampton ATC and the Roughay manager, including revised procedures.
201307127	18/06/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	3nm NE	D	CTR	EMBRAER	Turbofan	2	Infringement of the Southampton CTR (Class D) by a Jodel D117 resulting in loss of separation with three Southampton inbound a/c. Traffic info and avoiding action given.	Jodel D117 pilot failed to correctly identify Roughay and overshot into conflict with Southampton inbounds.☐ CAA Closure: ATC Investigation identified closer liaison between Southampton ATC and the Roughay manager, including revised procedures.

201307132	18/06/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	5nm NE	D	CTR	JODEL	Reciprocating	1	Cancelled processed under 201307127	Once the pilot realised he had passed his destination, he immediately made a 180deg turn and saw the strip below the nose. The pilot infringed the CTR as the limit boundary runs close to the western edge of the farm. The pilot states that he has been in and out of ROUGHAY a number of times and is aware of the boundaries. He apologised for this incident occurring.
201307184	19/06/2013	EGTT : London (FIR)	EGLC (LCY): London city	6nm ENE	A	TMA	BEAGLE	Reciprocating	1	Infringement of the London City CTA (Class D) and the London TMA (Class A) by a primary contact. CAIT activated. Traffic info given. A/c later identified as a Beagle B121. Appropriate CAA action is to be taken as a result of this incident.	All London City departures were immediately stopped. A London City inbound Learjet 45 was vectored away from the Beagle B121 in order to maintain separation. An inbound Southend PA28, outside CAS, on final for R/W06 subsequently visually identified the Beagle B121 and had to take avoiding action against the a/c. Another Thames controller later reported that the Beagle B121 was observed to land at Stapleford. Appropriate CAA action being taken as a result of this incident.
201307184	19/06/2013	EGTT : London (FIR)	EGLC (LCY): London city	6nm ENE	A	TMA	LEARJET	Turbofan	2	Infringement of the London City CTA (Class D) and the London TMA (Class A) by a primary contact. CAIT activated. Traffic info given. A/c later identified as a Beagle B121. Appropriate CAA action is to be taken as a result of this incident.	All London City departures were immediately stopped. A London City inbound Learjet 45 was vectored away from the Beagle B121 in order to maintain separation. An inbound Southend PA28, outside CAS, on final for R/W06 subsequently visually identified the Beagle B121 and had to take avoiding action against the a/c. Another Thames controller later reported that the Beagle B121 was observed to land at Stapleford. Appropriate CAA action being taken as a result of this incident.
201307184	19/06/2013	EGTT : London (FIR)	EGLC (LCY): London city	6nm ENE	A	TMA	PIPER	Reciprocating	1	Infringement of the London City CTA (Class D) and the London TMA (Class A) by a primary contact. CAIT activated. Traffic info given. A/c later identified as a Beagle B121. Appropriate CAA action is to be taken as a result of this incident.	All London City departures were immediately stopped. A London City inbound Learjet 45 was vectored away from the Beagle B121 in order to maintain separation. An inbound Southend PA28, outside CAS, on final for R/W06 subsequently visually identified the Beagle B121 and had to take avoiding action against the a/c. Another Thames controller later reported that the Beagle B121 was observed to land at Stapleford. Appropriate CAA action being taken as a result of this incident.
201307195	17/06/2013	EGTT : London (FIR)	EGMC (SEN): Southend	4nm E (D138)	G	Danger area	PIPER	Reciprocating	1	Infringement of Danger Area D138 (Class G) by a PA28 at 1800ft. The range was active at the time.	

201307198	18/06/2013	EGTT : London (FIR)	EGNM (LBA): LEEDS BRADFORD		D	CTR	ROBINSON	Reciprocating	1	Infringement of the Leeds/Bradford CTR (Class D) by an R22 at 900ft. Traffic info was passed and separation minima was maintained.	A/c was displaying a radio fail squawk.
201307215	19/06/2013	EGTT : London (FIR)	EG D123		G	Danger area	ROBINSON	Reciprocating	1	Infringement of active Danger Area EG D123 (Imber) by an R44 at 1500ft, receiving a Basic Service. Check fire initiated.	After landing, R44 pilot contacted ATC-MOD allegedly stating that they were aware of the location of the Danger Area but had thought ATC would keep them clear. Pilot was informed that under a Basic Service, ATC had no requirement to monitor the R44's progress on radar.☐ CAA Closure:☐ The investigation findings revealed that the pilot expected ATC to warn him if he was about to enter CAS. The root cause of this incident was thus a significant lack of knowledge of ATC and the services and procedures they offer. Remedial Action(s) Taken: Retake PPL Communications paper and RT practical test. Completed.
201307259	18/06/2013	EGTT : London (FIR)	EGVP : Middle wallop		G	ATZ	AVIONS ROBIN	Reciprocating	1	Infringement of the Middle Wallop ATZ (Class G) by a Robin HR200 at 1000ft. Traffic info was passed to a military helicopter performing an SRA.	
201307270	20/06/2013	EGTT : London (FIR)	EGNS (IOM): Isle Of Man/Ronaldsway		D	CTR	ROBINSON	Reciprocating	1	Infringement of the Isle of Man CTR (Class D) at approx 1500ft by an R44. Delaying action was passed to an inbound CL300 and separation minima was maintained.	The infringer, the R44 was traced through Belfast City.
201307314	21/06/2013	EGTT : London (FIR)	EGNM (LBA): LEEDS BRADFORD	5nm N	A	Other	UNKNOWN	Turboprop	1	Infringement of Airway Y250 (Class A) by a climbing military aircraft. Standard separation maintained.	Leeds were contacted who confirmed ident of the infringing aircraft.

201307317	21/06/2013	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	15nm NE	D	CTR	ROBINSON	Reciprocating	1	Infringement of the Manchester CTR (Class D) by an R22 at 1700ft. Traffic info was passed and separation minima was maintained.	The pilot was blind called by the controller and identified. The R22 pilot was informed he was in CAS and was provided a radar control service until leaving CAS.
201307345	21/06/2013	EGTT : London (FIR)	BNN	5nm S	A	TMA	VANS	Reciprocating	1	Infringement of the LTMA (Class A) by an RV-7 at 2900ft. No other traffic was in the area, although, a departure from Northolt was delayed.	The aircraft shortly after descended into Panshanger where the aircraft was identified.
201307357	23/06/2013	EGTT : London (FIR)	EGHH (BOH): Bournemouth/Hurn	10nm NE	D	CTR	PIPER	Reciprocating	1	Infringement of the Bournemouth CTR (Class D) by a PA28. There was no other traffic in the area.	There were two POB, one of which was the instructor.
201307359	22/06/2013	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD	3nm SE	D	CTR	PIPER	Reciprocating	1	Infringement of the Doncaster/Sheffield CTR (Class D) by a PA28 at 2000ft. There was no other traffic in the area.	The aircraft called to request transit of the CTR whilst already in CAS. The pilot was reminded to obtain a clearance before entering in the future.
201307457	18/06/2013	EGTT : London (FIR)	Syerston		G	ATZ	GROB	Reciprocating	1	Infringement of the Syerston ATZ (Class G) by a Grob G115. A/c is believed to have performed a low approach and go-around from R/W24.	

201307459	22/06/2013	EGTT : London (FIR)	EGNO : Warton		G	ATZ	PITTS	Reciprocating	1	A/c landed at wrong airfield.	Pilot instructed by ATC to report RH base leg for R/W28 at destination airfield. A/c observed on radar to head in a southerly direction. ATC believed that due to marginal weather conditions pilot had converted to a straight in approach. Pilot instructed to call final to R/W28. On calling final a/c given clearance to land. Nothing seen by ATC until a/c called for taxi instructions having landed at the wrong airfield without clearance.
201307475	24/06/2013	EGTT : London (FIR)	EGNS (IOM): Isle Of Man/Ronaldsway	10nm WNW	D	CTR	ROBINSON	Reciprocating	1	Infringement of the Isle of Man CTR (Class D) by an R44 at 600ft. There was no other traffic in the area.	The controller blind called the R44 who answered immediately. The controller then issued clearance for the helicopter to transit through the CTR.
201307480	25/06/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	N	D	CTR	PIPER	Reciprocating	1	Infringement of the Luton CTR (Class D) on two occasions by a PA28 piloted by a solo student. Traffic info given. Check all imposed. Blind calls were made.	It has subsequently been revealed that the student pilot was undertaking his first solo navigation flight and had become lost. He called Farnborough and declared a Pan. Pilot was assigned a squawk 5031 and given QNH. Aircraft was advised to continue tracking northbound to leave the Luton zone. The CFI of the flying club has been alerted and has taken appropriate action. Review of the radar reply confirmed that there was no loss of separation.
201307480	25/06/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	N	D	CTR	BOEING	Turbofan	2	Infringement of the Luton CTR (Class D) on two occasions by a PA28 piloted by a solo student. Traffic info given. Check all imposed. Blind calls were made.	It has subsequently been revealed that the student pilot was undertaking his first solo navigation flight and had become lost. He called Farnborough and declared a Pan. Pilot was assigned a squawk 5031 and given QNH. Aircraft was advised to continue tracking northbound to leave the Luton zone. The CFI of the flying club has been alerted and has taken appropriate action. Review of the radar reply confirmed that there was no loss of separation.
201307480	25/06/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	N	D	CTR	UNKNOWN	Unknown		Infringement of the Luton CTR (Class D) on two occasions by a PA28 piloted by a solo student. Traffic info given. Check all imposed. Blind calls were made.	It has subsequently been revealed that the student pilot was undertaking his first solo navigation flight and had become lost. He called Farnborough and declared a Pan. Pilot was assigned a squawk 5031 and given QNH. Aircraft was advised to continue tracking northbound to leave the Luton zone. The CFI of the flying club has been alerted and has taken appropriate action. Review of the radar reply confirmed that there was no loss of separation.

201307572	25/06/2013	EGTT : London (FIR)	Rush Green		D	CTR	AUSTER	Reciprocating	1	Infringement of the Luton CTR (Class D) by an Auster and a C172. Aircraft had departed Rush Green without calling GS airports with their details or ETD.	
201307572	25/06/2013	EGTT : London (FIR)	Rush Green		D	CTR	CESSNA	Reciprocating	1	Infringement of the Luton CTR (Class D) by an Auster and a C172. Aircraft had departed Rush Green without calling GS airports with their details or ETD.	
201307627	27/06/2013	EGTT : London (FIR)	SANDY	3 N	A	TMA	CESSNA	Reciprocating	1	C185 infringed the LTMA (Class A) 3nm N of SANDY at FL60. Aircraft had been advised of the airspace and instructed to remain clear.	The aircraft was subsequently informed that it had entered CAS and instructed to descend immediately. Standard separation maintained.
201307672	26/06/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham		D	CTR	CESSNA	Reciprocating	1	Infringement of the Birmingham CTA 1 (Class D) by a C172 squawking 7000 at 2100ft. Aircraft identified and instructed to descend to remain outside CAS. Standard separation maintained.	
201307673	29/06/2013	EGTT : London (FIR)	DAYNE	N	D	CTA	PIPER	Reciprocating	1	Infringement of the Manchester CTA (Class D) by a PA28 at 3200ft. Several blind calls made without success. Standard separation maintained.	The pilots report indicates that the pilot allowed the a/c to climb into the CTA.

201307676	29/06/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	10nm North East	D	CTA	AVIONS ROBIN	Reciprocating	1	Infringement of the Solent CTA (Class D) and Southampton CTR (Class D) by a DR400 squawking 7000 at 3300ft. Traffic info and avoiding action given to IFR PA28 to ensure separation.	It was subsequently discovered that the DR400 pilot was conducting a trial lesson at the time and that the incident was caused by poor navigation. ☐ CAA Closure: Loss of situational awareness on dual flight attributed to poor navigation and lack of familiarity and preparation for the flight. No further action taken.
201307676	29/06/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	10nm North East	D	CTA	PIPER	Reciprocating	1	Infringement of the Solent CTA (Class D) and Southampton CTR (Class D) by a DR400 squawking 7000 at 3300ft. Traffic info and avoiding action given to IFR PA28 to ensure separation.	It was subsequently discovered that the DR400 pilot was conducting a trial lesson at the time and that the incident was caused by poor navigation. ☐ CAA Closure: Loss of situational awareness on dual flight attributed to poor navigation and lack of familiarity and preparation for the flight. No further action taken.
201307679	29/06/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	4 N	D	CTA	CESSNA	Reciprocating	1	Infringement of the Luton CTA (Class D) by a C152. Luton inbound BD700 given avoiding action. Traffic info also given.	

201307679	29/06/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	4 N	D	CTA	BOMBARDIER	Turbofan	2	Infringement of the Luton CTA (Class D) by a C152. Luton inbound BD700 given avoiding action. Traffic info also given.	
201307687	29/06/2013	EGTT : London (FIR)	EGGD (BRS): Bristol/Lulsgate	8nm ESE	D	CTA	PIPER	Reciprocating	1	Infringement of the Bristol CTA (Class D) by a PA28 squawking 7000 at 2300ft. Controller contacted the aircraft and informed the pilot he was inside CAS. VFR clearance issued not above 3000ft. Standard separation maintained.	Pilot advised ATC that he had drifted North of his intended track.
201307697	30/06/2013	EGTT : London (FIR)	EGHI (SOU): Southampton		D	CTR	ROBINSON	Reciprocating	1	Infringement of the Southampton CTR (Class D) by an R44 squawking 7377 at 1700ft. Traffic info and avoiding action given. Standard separation maintained. DHC8 departure delayed until contact had faded from radar cover.	Attempts were made by Bournemouth to contact the helicopter but they reported that his RT was intermittent and advised that he was landing at a private site near Beaulieu. Investigation confirmed a lack of situational awareness by the R44 pilot, caused by distraction.☐ CAA Closure: Appropriate CAA action taken.
201307697	30/06/2013	EGTT : London (FIR)	EGHI (SOU): Southampton		D	CTR	DE HAVILLAND	Turboprop	2	Infringement of the Southampton CTR (Class D) by an R44 squawking 7377 at 1700ft. Traffic info and avoiding action given. Standard separation maintained. DHC8 departure delayed until contact had faded from radar cover.	Attempts were made by Bournemouth to contact the helicopter but they reported that his RT was intermittent and advised that he was landing at a private site near Beaulieu. Investigation confirmed a lack of situational awareness by the R44 pilot, caused by distraction.☐ CAA Closure: Appropriate CAA action taken.
201307698	30/06/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	7nm SW	D	CTR	OTHER	Reciprocating	1	Infringement of the Southampton CTR (Class D) by an a/c squawking 7377, resulting in a potential loss of separation with a Bournemouth inbound B737 at 6000ft. Traffic info and avoiding action given. A/c identified via Bournemouth ATC as an MCR01.	Subsequent ATC investigation confirmed that no loss of separation occurred. MCR01 pilot distracted by weather and impeded by lack of knowledge of airspace dimensions.☐ CAA Closure: Appropriate CAA action taken.

201307698	30/06/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	7nm SW	D	CTR	BOEING	Turbofan	2	Infringement of the Southampton CTR (Class D) by an a/c squawking 7377, resulting in a potential loss of separation with a Bournemouth inbound B737 at 6000ft. Traffic info and avoiding action given. A/c identified via Bournemouth ATC as an MCR01.	Subsequent ATC investigation confirmed that no loss of separation occurred. MCR01 pilot distracted by weather and impeded by lack of knowledge of airspace dimensions.☐ CAA Closure: Appropriate CAA action taken.
201307708	29/06/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	12.5 N	D	CTA	GRUMMAN	Reciprocating	1	Infringement of the Birmingham CTA 8 (Class D) by a Grumman AA5 squawking 7000 at 2500ft. Traffic info and avoiding action issued to an outbound B737. Blind calls made without success. Standard separation maintained.	Pilot subsequently contacted ATC upon landing and advised that he had misidentified ground features.
201307712	30/06/2013	EGTT : London (FIR)	EGHH (BOH): Bournemouth/Hurn	3 E	D	CTR	PIPER	Reciprocating	1	Infringement of the Bournemouth CTR (Class D) by a PA28 at 1500ft. Blind calls made without success. Standard separation maintained.	
201307715	30/06/2013	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD	6 NE	D	CTR	AVIONS ROBIN	Reciprocating	1	Infringement of the Doncaster/Sheffield CTR (Class D) by a DR400. Standard separation maintained.	On initial call the aircraft was instructed to standby. The aircraft was then observed infringing CAS and crossing the final approach track to R/W20 at 6nm. When informed of his error the response indicated that the pilot thought being on frequency was enough to transit CAS. Appropriate advice then issued by the controller concerned.
201307789	01/07/2013	EGTT : London (FIR)	EGLD : Denham	4 E	A	CTR	CIRRUS	Reciprocating	1	Infringement of the Heathrow CTR (Class A) by an SR22. The SR22 appears to have mistaken Northolt for Denham and reached one mile final for R/W25 at Northolt before turning clear.	Northolt and Heathrow traffic affected. The pilot concerned has been contacted prior to his return flight and will receive a full briefing regarding departure procedures.

201307810	30/06/2013	EGTT : London (FIR)	Silverstone		A	Restricted area	OTHER	Unknown	1	Infringement of the Red Arrows RA(T) at Silverstone by an aircraft identified via Mode S as a Pipersport squawking 7000, indicating 1400-2000ft unverified. Traffic info was given to the Red Arrows who subsequently halted the display.	The infringer was observed orbiting in the Southeast corner of the RA(T) at approx 1100hrs. The Red Arrows subsequently stopped their display at 1107hrs and recommenced at 1112hrs. Appropriate ATC action to be taken as a result of this incident.
201307811	30/06/2013	EGTT : London (FIR)	Silverstone		A	Restricted area	CESSNA	Reciprocating	1	Infringement of the Red Arrows RA(T) at Silverstone by an aircraft believed to be a C150 at 2000ft. Traffic info was given to the Red Arrows who subsequently halted the display.	The infringer was observed at 1100hrs, the Red Arrows stopped their display at 1107hrs and recommenced at 1112hrs. The infringer left the RA(T) and was tracked to the East until the Cranfield area. TC contacted Cranfield APP by telephone who informed TC they had controlled an aircraft requesting a service who had claimed to have been visual with the Red Arrows display team and gave the details of the aircraft as a C150. Appropriate ATC action to be taken as a result of this incident.
201307867	02/07/2013	EGTT : London (FIR)	Syerston		G	ATZ	CESSNA	Reciprocating	1	Infringement of the Syerston ATZ (Class G) by a C152 transiting South to North through the overhead at 1500ft.	Aircraft was piloted by a student who had been in contact with ATC at East Midlands and was informed that Syerston and Langar airfields were active. However, the student still decided to transit through.
201307870	30/06/2013	EGTT : London (FIR)	Little Rissington		G	Other	EVEKTOR AEROTECHNIK	Reciprocating	1	Eurostar observed flying overhead on a 210deg track at approx 500-600ft AGL.	Brize Norton were called post incident. They were aware the aircraft was operating in the vicinity of Little Rissington but had no transponder details for the aircraft to determine location and track.
201307874	29/06/2013	EGTT : London (FIR)	Hullavington		G	Other	ROBINSON	Reciprocating	1	Infringement of the Hullavington Gliding Site (Class G) by an aircraft believed to be an R44, at approx 1200ft.	The helicopter overflew the airfield from the North heading South.

201307934	03/07/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	8.5nm South West	D	CTR	HUGHES	Turboshaft	1	Infringement of the Southampton CTR (Class D) by a Hughes 369 squawking 7000. Standard separation maintained.	Aircraft subsequently identified after being instructed to squawk 3672.
201307945	02/07/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick		D	CTR	ROCKWELL	Reciprocating	1	Infringement of the Gatwick CTR (Class D) by a Rockwell 114 squawking 3767. CAIT activated. Standard separation maintained.	The investigation has revealed that this was a visiting aircraft to Redhill and is unlikely to return again. The pilot had made a previous departure in the day without any issues and Redhill did not have any concerns regarding his second departure. However, on this occasion, it would appear that the left turn after departure was a little late.
201308007	05/07/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTR	AERONCA	Reciprocating	1	Infringement of the Luton CTR (Class D) by an Aeronca with no transponder. Standard separation maintained.	Pilot was not aware that he should have contacted TC GS before departure as per the new Letter of Agreement.
201308007	05/07/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTR	AIRBUS	Turbofan	2	Infringement of the Luton CTR (Class D) by an Aeronca with no transponder. Standard separation maintained.	Pilot was not aware that he should have contacted TC GS before departure as per the new Letter of Agreement.
201308014	05/07/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	10nm South West	D	CTR	UNKNOWN	Unknown		Infringement of the Luton CTR (Class D) by an unknown contact squawking 7000 at 1500ft tracking North. CAIT activated. Traffic info given to inbound PC12.	It has subsequently been revealed that the aircraft had been observed leaving Dunstable delegated airspace tracking South and remained within the horizontal confines of the ridge soaring area. It continued South of the final approach centreline, before turning right onto a Northerly track, back into the delegated Dunstable airspace. Gliding club has been contacted and incident has been discussed.

201308014	05/07/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	10nm South West	D	CTR	PILATUS	Turboprop	1	Infringement of the Luton CTR (Class D) by an unknown contact squawking 7000 at 1500ft tracking North. CAIT activated. Traffic info given to inbound PC12.	It has subsequently been revealed that the aircraft had been observed leaving Dunstable delegated airspace tracking South and remained within the horizontal confines of the ridge soaring area. It continued South of the final approach centreline, before turning right onto a Northerly track, back into the delegated Dunstable airspace. Gliding club has been contacted and incident has been discussed.
201308026	05/07/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	5nm WNW	D	CTR	PIPER	Reciprocating	1	Multiple infringements of the Southampton CTR (Class D) by a PA28 at 1400ft squawking 2650, resulting in a loss of separation with an EMB195. Avoiding action given.	Blind transmissions made.☐ CAA Closure: Attributed to lack of spatial awareness. Pilot undertook a navigational exercise with a flight examiner.
201308026	05/07/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	5nm WNW	D	CTR	EMBRAER	Turbofan	2	Multiple infringements of the Southampton CTR (Class D) by a PA28 at 1400ft squawking 2650, resulting in a loss of separation with an EMB195. Avoiding action given.	Blind transmissions made.☐ CAA Closure: Attributed to lack of spatial awareness. Pilot undertook a navigational exercise with a flight examiner.
201308026	05/07/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	5nm WNW	D	CTR	UNKNOWN	Unknown		Multiple infringements of the Southampton CTR (Class D) by a PA28 at 1400ft squawking 2650, resulting in a loss of separation with an EMB195. Avoiding action given.	Blind transmissions made.☐ CAA Closure: Attributed to lack of spatial awareness. Pilot undertook a navigational exercise with a flight examiner.
201308051	05/07/2013	EGTT : London (UIR)	BNN	4nm West	A	TMA	PIPER	Reciprocating	1	Infringement of the London TMA (Class A) by a PA28 squawking 4670 indicating 2700ft (base 2500ft). CAIT activated. Standard separation maintained.	Pilot had reported at 2700ft on first contact and had been asked to remain outside controlled airspace. Aircraft was identified with Mode S.

201308052	05/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted		D	CTA	CIRRUS	Reciprocating	1	Infringement of the Stansted CTA 2 (Class D) by an SR22 squawking 7000 at 1900ft. Standard separation maintained.	It has subsequently been revealed that the pilot had been distracted by clearing a radio fault which had prevented him from using the RT and making use of the Farnborough LARS service. He had then missed the 1500ft base of the Stansted CTA.
201308062	06/07/2013	EGTT : London (FIR)	Urmston	South	D	CTR	ROBINSON	Reciprocating	1	Infringement of the Manchester CTR (Class D) by an R44 squawking 7000. Standard separation maintained.	Manchester Barton appeared to have some knowledge of the aircraft and they were asked to pass a message to the pilot to advise that he may have landed just inside the control zone.
201308072	06/07/2013	EGTT : London (FIR)	R312		A	Restricted area	PIPER	Reciprocating	1	Infringement of Restricted Area EG R312 (Springfields) by a PA28 at 1700ft whilst positioning to rejoin the Blackpool visual circuit for R/W28. Traffic info given.	PA28 pilot routed North to vacate EG R312. Reporter alleged that the PA28 pilot contacted ATC after landing to acknowledge their error and apologise.
201308076	06/07/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	7nm SW	A	TMA	CESSNA	Reciprocating	1	Infringement of the LTMA (Class A) and the Gatwick CTR (Class D) by an aircraft squawking 7000, identified via Mode S as a C120, resulting in loss of separation with an A319 and ATC initiating a missed approach to a B777. Traffic info given.	C120 pilot convinced he had remained just outside CAS.☐ CAA Closure: Insufficient margin for error applied, no further action taken.
201308076	06/07/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	7nm SW	A	TMA	AIRBUS	Turbofan	2	Infringement of the LTMA (Class A) and the Gatwick CTR (Class D) by an aircraft squawking 7000, identified via Mode S as a C120, resulting in loss of separation with an A319 and ATC initiating a missed approach to a B777. Traffic info given.	C120 pilot convinced he had remained just outside CAS.☐ CAA Closure: Insufficient margin for error applied, no further action taken.

201308076	06/07/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	7nm SW	A	TMA	BOEING	Turbofan	2	Infringement of the LTMA (Class A) and the Gatwick CTR (Class D) by an aircraft squawking 7000, identified via Mode S as a C120, resulting in loss of separation with an A319 and ATC initiating a missed approach to a B777. Traffic info given.	C120 pilot convinced he had remained just outside CAS.☐ CAA Closure: Insufficient margin for error applied, no further action taken.
201308078	07/07/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	NW	A	CTR	SOCATA	Reciprocating	1	Infringement of the Heathrow CTR (Class A) by a Socata TB9. Standard separation maintained.	The Socata TB9 entered the CTR 4nm West of Denham tracking Southbound, the aircraft then turned Westbound and left CAS West of Cookham VRP. TC subsequently telephoned Wycombe ATC who confirmed they were working the aircraft.
201308081	05/07/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	8nm South East	D	CTA	SOCATA	Reciprocating	1	Infringement of the Birmingham CTA (Class D) by a TB9 squawking 0401 at 2500ft. Traffic info and avoiding action given. Standard separation maintained.	Aircraft subsequently contacted Birmingham requesting identification and a vector to Swindon. A squawk of 0401 was issued and aircraft identified. When questioned pilot stated that he had been flying at 2500ft during his transit which indicated that aircraft had infringed CTA-8 and CTA-2. ATC suggested a heading to fly and obtained a contact number for him before handing aircraft over to Brize Norton.
201308081	05/07/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	8nm South East	D	CTA	BOEING	Turbofan	2	Infringement of the Birmingham CTA (Class D) by a TB9 squawking 0401 at 2500ft. Traffic info and avoiding action given. Standard separation maintained.	Aircraft subsequently contacted Birmingham requesting identification and a vector to Swindon. A squawk of 0401 was issued and aircraft identified. When questioned pilot stated that he had been flying at 2500ft during his transit which indicated that aircraft had infringed CTA-8 and CTA-2. ATC suggested a heading to fly and obtained a contact number for him before handing aircraft over to Brize Norton.
201308081	05/07/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	8nm South East	D	CTA	DE HAVILLAND	Turboprop	2	Infringement of the Birmingham CTA (Class D) by a TB9 squawking 0401 at 2500ft. Traffic info and avoiding action given. Standard separation maintained.	Aircraft subsequently contacted Birmingham requesting identification and a vector to Swindon. A squawk of 0401 was issued and aircraft identified. When questioned pilot stated that he had been flying at 2500ft during his transit which indicated that aircraft had infringed CTA-8 and CTA-2. ATC suggested a heading to fly and obtained a contact number for him before handing aircraft over to Brize Norton.

201308086	07/07/2013	EGTT : London (FIR)	NELSA		A	TMA	CESSNA	Reciprocating	1	Infringement of the Manchester TMA (Class A) by a C182 squawking 1177 at FL70 with a FIS label. CAIT activated. Standard separation maintained. Pilot informed.	C182 in receipt of a Basic Service had been asked by the FISO for a position and altitude report. Pilot had responded by saying POL at 7000ft. At this time the other FISO was already speaking with Manchester who said they believed him to be infringing Leeds Airspace. Aircraft was immediately transferred to Leeds frequency.
201308088	07/07/2013	EGTT : London (FIR)	EGSX : North Weald		D	CTA	CESSNA	Reciprocating	1	Infringement of the Stansted CTA 2 (Class D) by a C152 squawking 5031 at 1800ft. Traffic info given. Standard separation maintained.	Pilot had requested a transfer frequency to North Weald for a transit. This had been approved and aircraft was told to keep the squawk and report back with LARS North, and remained at 1400ft. Shortly after aircraft climbed to 1800ft and subsequently called back. Pilot was instructed to descend immediately to leave controlled airspace.
201308088	07/07/2013	EGTT : London (FIR)	EGSX : North Weald		D	CTA	BOEING	Turbofan	2	Infringement of the Stansted CTA 2 (Class D) by a C152 squawking 5031 at 1800ft. Traffic info given. Standard separation maintained.	Pilot had requested a transfer frequency to North Weald for a transit. This had been approved and aircraft was told to keep the squawk and report back with LARS North, and remained at 1400ft. Shortly after aircraft climbed to 1800ft and subsequently called back. Pilot was instructed to descend immediately to leave controlled airspace.
201308110	07/07/2013	EGTT : London (FIR)	EGMC (SEN): Southend		G	ATZ	AQUILA	Reciprocating	1	Alleged infringement of Southend ATZ (Class G) by an AT-01.	There were no reports of any other traffic in the area.
201308130	07/07/2013	EGTT : London (FIR)	EGXC : Coningsby		G	ATZ	OTHER	Unknown		UK AIRPROX 2013/068 - Military display formation and an R22, inside the Coningsby visual circuit. Traffic info given. Military formation took evasive action.	The R22 appeared to be hovering at approx 500ft and was not in contact with ATC despite being inside the ATZ. Appropriate CAA action is being taken as a result of this incident.

201308130	07/07/2013	EGTT : London (FIR)	EGXC : Coningsby		G	ATZ	ROBINSON	Reciprocating	1	UK AIRPROX 2013/068 - Military display formation and an R22, inside the Coningsby visual circuit. Traffic info given. Military formation took evasive action.	The R22 appeared to be hovering at approx 500ft and was not in contact with ATC despite being inside the ATZ. Appropriate CAA action is being taken as a result of this incident.
201308152	08/07/2013	EGTT : London (FIR)	BNN	3nm North	D	CTR	CIRRUS	Reciprocating	1	Infringement of the Luton CTR (Class D) by an SR22 squawking 5030 at 2300ft. Standard separation maintained.	Pilot had called on frequency East of LAM and given a 5030 squawk and a Basic Service. Aircraft was subsequently observed turning North at BNN and inside the CTR and was given immediate instructions to fly West to the leave the zone. Pilot had believed he was in the FIR with a base of 2500ft QNH. He acknowledges that he may have misinterpreted his map.
201308179	06/07/2013	EGTT : London (FIR)	EGFF (CWL): Cardiff		D	CTA	OTHER	Reciprocating	1	A formation of Yak aircraft infringed the Cardiff CTA (Class D) at 2700ft climbing to 3000ft.	Initially the formation did not show a callsign on Mode S, so the controller made some blind calls to them prior to the infringement to warn them to no avail. The aircraft were communicating with Swansea. No other traffic was reported being in the area. One of the pilots concerned has since spoken to Cardiff ATC and apologised for the incident.
201308182	08/07/2013	EGTT : London (FIR)	EGXY-RAF Syerston		G	ATZ	CESSNA	Reciprocating	1	An unknown light aircraft (subsequently identified as a C152) infringed the Syerston ATZ (Class G) at approx 1000ft. Syerston tried to make contact to no avail.	There were no reports of any gliders airborne at the time of the incident. Appropriate CAA action has been taken as a result of this incident.
201308232	09/07/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	10nm NW	A	CTR	PIPER	Reciprocating	1	An unknown track infringed the London CTR (Class A) at 2000ft. Traffic info was passed. Aircraft subsequently identified as a PA28.	The controller was with a trainee and had traffic at the time downwind from LAM and dropping from FL70 to an altitude. The pilot concerned was alerted to this incident.

201308232	09/07/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	10nm NW	A	CTR	UNKNOWN	Turbofan		An unknown track infringed the London CTR (Class A) at 2000ft. Traffic info was passed. Aircraft subsequently identified as a PA28.	The controller was with a trainee and had traffic at the time downwind from LAM and dropping from FL70 to an altitude. The pilot concerned was alerted to this incident.
201308267	08/07/2013	EGTT : London (FIR)	EGD202	22nm NE (Newcastle Emlyn)	G	Danger area	OTHER	Reciprocating	1	Infringement of EGD202 (Danger Area) by two autogyros. There were no reports of any other aircraft in the area at the time.	The pilots were contacted who apologised for their mistake.
201308267	08/07/2013	EGTT : London (FIR)	EGD202	22nm NE (Newcastle Emlyn)	G	Danger area	OTHER	Reciprocating	1	Infringement of EGD202 (Danger Area) by two autogyros. There were no reports of any other aircraft in the area at the time.	The pilots were contacted who apologised for their mistake.
201308273	10/07/2013	EGTT : London (FIR)	EG D123		G	Danger area	CESSNA	Reciprocating	1	Infringement of active Danger Area EG D123 (Imber) by a C170 squawking 5055 at 2600ft. C170 was receiving a Basic Service from Bristol Radar.	The pilot was informed by Bristol of the event and the aircraft left the Danger Area. Reporter alleged that the pilot later apologised and admitted to poor navigational awareness.☐ CAA Closure: No further CAA action. Registration will be monitored.
201308279	10/07/2013	EGTT : London (FIR)	EGGP (LPL): Liverpool	6nm E	D	CTR	CESSNA	Reciprocating	1	A C210 infringed the Liverpool CTR (Class D) at 1200ft. No other traffic was in the area at the time.	The pilot thought he was outside of CAS.

201308294	10/07/2013	EGTT : London (FIR)	EGKR (KRH): Redhill	5nm W	D	CTR	PIPER	Reciprocating	1	PA28 infringed the Gatwick CTR (Class D) at 1900ft. Traffic info was passed. Separation lost.	This infringement affected two inbound flights. The first one was broken off the approach, which subsequently delayed another flight behind. The operator of the aircraft has been fully alerted to the incident and appropriate action has been taken.
201308294	10/07/2013	EGTT : London (FIR)	EGKR (KRH): Redhill	5nm W	D	CTR	AIRBUS	Turbofan	2	PA28 infringed the Gatwick CTR (Class D) at 1900ft. Traffic info was passed. Separation lost.	This infringement affected two inbound flights. The first one was broken off the approach, which subsequently delayed another flight behind. The operator of the aircraft has been fully alerted to the incident and appropriate action has been taken.
201308311	10/07/2013	EGTT : London (FIR)	EGTG (FZO): Bristol/Filton	5nm NW	D	CTA	CESSNA	Reciprocating	1	A C182 infringed the Bristol CTA (Class D) at approx 4500ft. There was no other traffic in the area at the time of the incident.	
201308341	11/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	12nm NNE	G	Restricted area	UNKNOWN	Unknown	1	An unknown contact infringed the Stansted TMZ 1 (Class G) at 1500ft. There was no other traffic in the area at the time.	The controller made numerous attempts to contact the aircraft to no avail. The aircraft was seen to head toward Duxford. Another aircraft which was monitoring the frequency which passed very close to the infringing traffic was asked if they could see the infringing traffic to which they said it was a "Harvard" shaped aircraft.
201308345	11/07/2013	EGTT : London (FIR)	D201		G	Danger area	BOLKOW	Reciprocating	1	A Bo209 infringed a live Danger Area (D201). No aircraft were airborne at the time.	The Aberporth controller established two-way comms with the pilot and enabled him to route clear of the danger area. The pilot was very apologetic and thanked the controller for his assistance.

201308375	10/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	ABBOT N	A	TMA	CIRRUS	Reciprocating	1	An SR22 infringed the LTMA (Class A) at 4400ft. The aircraft was late to descend below CAS. Separation minima was maintained and traffic info and avoiding action was passed.	
201308375	10/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	ABBOT N	A	TMA	AIRBUS	Turbofan	2	An SR22 infringed the LTMA (Class A) at 4400ft. The aircraft was late to descend below CAS. Separation minima was maintained and traffic info and avoiding action was passed.	
201308427	12/07/2013	EGTT : London (FIR)	GWC	4nm W	A	Restricted area	ROBINSON	Reciprocating	1	Infringement of the Red Arrows RA(T) at Goodwood by an unknown aircraft squawking 7000 indicating 1100ft. Aircraft identified themselves as an R22 climbing to 1800ft. Traffic info and avoiding action given.	R22 pilot apologised for the infringement.
201308446	12/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	13nm South West	D	CTA	CESSNA	Reciprocating	1	Infringement of the Stansted CTA (Class D) by a C152 squawking 5030 at 1800ft. CAIT activated. Standard separation maintained.	Farnborough had attempted to establish two-way contact and made multiple calls before aircraft replied 7nm East of Panshanger and was identified with 5030 squawk.
201308454	11/07/2013	EGTT : London (FIR)	EGLC (LCY): London city	10nm East	A	TMA	CESSNA	Reciprocating	1	Infringement of the London TMA (Class A) by a C152 squawking 4575 climbing to 2800ft. Separation lost with outbound EMB190. Avoiding action and traffic info given.	CFI of the flying club concerned has been alerted and a full report received which indicates a loss of spatial awareness by the instructor involved. Appropriate remedial action has been taken.

201308454	11/07/2013	EGTT : London (FIR)	EGLC (LCY): London city	10nm East	A	TMA	EMBRAER	Turbofan	2	Infringement of the London TMA (Class A) by a C152 squawking 4575 climbing to 2800ft. Separation lost with outbound EMB190. Avoiding action and traffic info given.	CFI of the flying club concerned has been alerted and a full report received which indicates a loss of spatial awareness by the instructor involved. Appropriate remedial action has been taken.
201308458	12/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	14nm NE	D	CTA	CIRRUS	Reciprocating	1	SR22 infringed the Stansted CTA (Class D) at 1700ft. No other aircraft were reported to be in the area at the time.	LTCC attempted to contact the aircraft to no avail.
201308464	12/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	10nm NE	D	CTA	BEECH	Reciprocating	1	BE33 infringed the Stansted CTA (Class D) at 1800ft. There was no other traffic reported in the area at the time of the incident.	The track disappeared 1nm West of Fowlmere.
201308467	12/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	15nm NE	G	Restricted area	CURTISS WRIGHT	Reciprocating	1	A P40 Warhawk infringed the Stansted TMZ (Class G). No other traffic was affected by the incident.	The P40 appeared as a primary track only and seemed to be talking to Duxford.
201308471	12/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	14nm NE	D	CTR	KLEMM	Reciprocating	1	Infringement of the Stansted CTR (Class D) by an aircraft, identified via Mode S as a KL107, squawking 7000, indicating 1700-1800ft. CAIT activated. Standard separation maintained.	Incident referred to German LBA who obtained a comprehensive response from the pilot, who stated that he was using Jeppesen VFR + GPS charts for the first time during this flight and subsequent flights within the UK. He had previously used ICAO maps and found the new maps lacked the clarity of the ICAO maps with regards to marking CAS boundaries.□ CAA Closure: The pilot apologised for this, and subsequent, infringements, has learnt a lesson and taken preventative action to avoid recurrence.

201308475	12/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	17nm E	A	TMA	CASA	Reciprocating	1	Casa 1.131E infringed the LTMA (Class A) at 3800ft. The aircraft was not able to be contacted and no other aircraft were reported to be in the area at the time.	The aircraft was squawking Southend but was unable to be reached by them.
201308477	13/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	15nm NE	D	CTA	KLEMM	Reciprocating	1	Infringement of the Stansted CTA (Class D) by an aircraft, identified via Mode S as a KL107, at 1800ft. CAIT activated. Standard separation maintained.	TC attempted to contact the KL107, without success. One Stansted inbound was routed to avoid the infringer.
201308477	13/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	15nm NE	D	CTA	UNKNOWN	Unknown		Infringement of the Stansted CTA (Class D) by an aircraft, identified via Mode S as a KL107, at 1800ft. CAIT activated. Standard separation maintained.	TC attempted to contact the KL107, without success. One Stansted inbound was routed to avoid the infringer.
201308481	13/07/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	5nm N	D	CTR	EUROPA	Reciprocating	1	Infringement of the Stansted CTR (Class D) and the Heathrow CTR (Class A) by an aircraft squawking 7000. CAIT activated. Traffic info given. Standard separation maintained.	Disruption to traffic resulted. Appropriate CAA action is to be taken as a result of this incident.
201308481	13/07/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	5nm N	D	CTR	UNKNOWN	Unknown		Infringement of the Stansted CTR (Class D) and the Heathrow CTR (Class A) by an aircraft squawking 7000. CAIT activated. Traffic info given. Standard separation maintained.	Disruption to traffic resulted. Appropriate CAA action is to be taken as a result of this incident.

201308487	13/07/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	CALSHOT VRP	D	CTA	DIAMOND	Reciprocating	1	Infringement of the Solent CTA (Class D) by a DA40 squawking 7000 indicating 2400ft. Traffic info and avoiding action given to a BN2T cleared for a visual approach R/W02. Standard separation maintained.	Blind call was made by both Solent and Southampton Radar and BN2T was given a right turn heading 120deg with traffic info on the infringer. Mode S confirmed the infringer was on Solent frequency. Aircraft passed position reports which were incorrect as the aircraft was transiting. Pilot was informed and made aware of his position before leaving controlled airspace. Student pilot on cross-country training.
201308487	13/07/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	CALSHOT VRP	D	CTA	BRITTEN NORMAN	Reciprocating	2	Infringement of the Solent CTA (Class D) by a DA40 squawking 7000 indicating 2400ft. Traffic info and avoiding action given to a BN2T cleared for a visual approach R/W02. Standard separation maintained.	Blind call was made by both Solent and Southampton Radar and BN2T was given a right turn heading 120deg with traffic info on the infringer. Mode S confirmed the infringer was on Solent frequency. Aircraft passed position reports which were incorrect as the aircraft was transiting. Pilot was informed and made aware of his position before leaving controlled airspace. Student pilot on cross-country training.
201308491	13/07/2013	EGTT : London (FIR)	EGTF : Fairoaks LFA	2nm NE	A	CTR	PIPER	Reciprocating	1	Infringement of the Heathrow CTR (Class A) by a PA28. CAIT activated. All Heathrow departures were stopped. Standard separation maintained.	TC SVFR stated that the infringer then deviated back Southbound and entered the Fairoaks circuit. TC SVFR called Fairoaks TWR who confirmed they were in contact with the infringer. Fairoaks ATC are believed to have spoken with the pilot of the infringing aircraft regarding the incident.
201308492	13/07/2013	EGTT : London (FIR)	Hitchin		D	CTR	PIPER	Reciprocating	1	Infringement of the Luton CTR (Class D) and the Stansted CTR (Class D) by an unknown aircraft identified via Mode S as a PA24. CAIT activated. Traffic info given. D&D cell alerted.	The infringer allegedly switched off their transponder after leaving the Luton CTR before subsequently infringing the Stansted CTR. TC's attempts to raise the pilot on APP frequency 129.55 were unsuccessful. A check all was placed at Stansted. A Stansted inbound aircraft was broken off their final approach to R/W04, and two further aircraft were vectored to avoid the infringer. Mode C indicated the PA24 was at 3000ft within the Stansted CTR. Appropriate CAA action is to be taken as a result of this incident.
201308499	14/07/2013	EGTT : London (FIR)	Not specified		A	Other	CESSNA	Unknown	1	Infringement of an Airway by a C172 squawking 7402. Aircraft flying VFR had got airborne without a flight plan and would not descend below CAS as it would have put the aircraft in cloud.	Appropriate CAA action has been taken as a result of this incident. Matter being dealt with by German Authorities.

201308501	13/07/2013	EGTT : London (FIR)	EGLM : White waltham	5nm North West	A	TMA	PAC	Turboprop	1	Infringement of the London TMA (Class A) by a PAC 750XL squawking 1200 ranging from 2500ft to 2800ft. Aircraft identified via Mode S.	It has subsequently been confirmed that the aircraft was undertaking a non-standard evening para-drop. Pilot acknowledged that the wrong QNH had been set (standard 1013 as opposed to 1024mb) and believed that he was operating at 2400ft. The 1200 squawk was inadvertently selected when the pilot selected VFR on the transponder (1200 is the VFR squawk for New Zealand and this had been input into this New Zealand registered aircraft).
201308505	12/07/2013	EGTT : London (FIR)	Wethersfield		G		AVIONS ROBIN	Reciprocating	1	Infringement of the Wethersfield Gliding Site (Class G) by a DR400 at 800ft squawking 7000.	The DR400 flew directly over the glider launching winch as one of the course trainees was completing their first solo landing. Reporter stated that a NOTAM was issued indicating that midweek gliding operations at Wethersfield could occur from sunrise to sunset and pilots were advised to avoid the area.
201308505	12/07/2013	EGTT : London (FIR)	Wethersfield		G		OTHER	Unknown		Infringement of the Wethersfield Gliding Site (Class G) by a DR400 at 800ft squawking 7000.	The DR400 flew directly over the glider launching winch as one of the course trainees was completing their first solo landing. Reporter stated that a NOTAM was issued indicating that midweek gliding operations at Wethersfield could occur from sunrise to sunset and pilots were advised to avoid the area.
201308509	14/07/2013	EGTT : London (FIR)	EGHI (SOU): Southampton		D	CTA	PIPER	Reciprocating	1	A PA28 infringed the Solent CTA (Class D) at 2300ft. Traffic info and avoiding action was given to inbound traffic. Separation minima was maintained.	The infringing aircraft was showing as a primary only track, but was talking to Bembridge.
201308509	14/07/2013	EGTT : London (FIR)	EGHI (SOU): Southampton		D	CTA	UNKNOWN	Unknown		A PA28 infringed the Solent CTA (Class D) at 2300ft. Traffic info and avoiding action was given to inbound traffic. Separation minima was maintained.	The infringing aircraft was showing as a primary only track, but was talking to Bembridge.

201308511	14/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	4nm North West	D	CTR	CESSNA	Reciprocating	1	Infringement of the Stansted CTR (Class D) by a C172 squawking 5045. Check all attempted but B737 already rolling and separation lost. CAIT activated.	C172 had called Farnborough and requested a Basic Service. Squawk 5045, QNH 1024 and Basic Service were given and pilot confirmed his level as 2000ft. Controller was busy dealing with other aircraft and was alerted when the Essex line rang and, looking at their area, noticed the 5045 infringing. Pilot was informed that he was inside CAS and instructed to turn westbound immediately. Pilot had already turned and his heading was taking him outside CAS.
201308511	14/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	4nm North West	D	CTR	BOEING	Turbofan	2	Infringement of the Stansted CTR (Class D) by a C172 squawking 5045. Check all attempted but B737 already rolling and separation lost. CAIT activated.	C172 had called Farnborough and requested a Basic Service. Squawk 5045, QNH 1024 and Basic Service were given and pilot confirmed his level as 2000ft. Controller was busy dealing with other aircraft and was alerted when the Essex line rang and, looking at their area, noticed the 5045 infringing. Pilot was informed that he was inside CAS and instructed to turn westbound immediately. Pilot had already turned and his heading was taking him outside CAS.
201308513	14/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	5nm North West	D	CTR	PIPER	Reciprocating	1	Infringement of the Stansted CTR (Class D) by a PA28 squawking 0013 climbing to 3000ft. Stansted departures were stopped.	A broadcast was made several times on 120.625, 136.2 and 129.550 asking for the aircraft to make themselves known. A few minutes later, the aircraft was identified by Luton and, due to poor weather, aircraft eventually returned to Wycombe aided by assistance from ATC.
201308514	14/07/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	10nm SE	D	CTA	CESSNA	Reciprocating	1	C152 infringed the Gatwick CTA (Class D) at 2200ft. There were no other traffic affected by the infringing aircraft reported.	The controller made number blind calls to the aircraft to no avail. The pilot reported mistaking his landmarks on a well known route.
201308516	14/07/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	5nm ENE	A	TMA	KLEMM	Reciprocating	1	Infringement of the LTMA (Class A) by an unknown aircraft squawking 7000 at 3600ft. The aircraft subsequently changed its squawk from 7000 to 3750 and was identified as a KL107. Standard separation maintained.	TC vectored a Gatwick inbound A319 at TIMBA to maintain separation.

201308516	14/07/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	5nm ENE	A	TMA	AIRBUS	Turbofan	2	Infringement of the LTMA (Class A) by an unknown aircraft squawking 7000 at 3600ft. The aircraft subsequently changed its squawk from 7000 to 3750 and was identified as a KL107. Standard separation maintained.	TC vectored a Gatwick inbound A319 at TIMBA to maintain separation.
201308517	13/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	20nm E	A	TMA	VANS	Reciprocating	1	Infringement of the LTMA (Class A) by two Vans RV7s squawking 7000 with Mode C indicating 5800ft. Standard separation maintained.	One IFR Luton inbound aircraft was given a slightly extended routing to avoid the Vans RV7s. Appropriate CAA action has been taken as a result of this incident.
201308517	13/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	20nm E	A	TMA	VANS	Reciprocating	1	Infringement of the LTMA (Class A) by two Vans RV7s squawking 7000 with Mode C indicating 5800ft. Standard separation maintained.	One IFR Luton inbound aircraft was given a slightly extended routing to avoid the Vans RV7s. Appropriate CAA action has been taken as a result of this incident.
201308518	14/07/2013	EGTT : London (FIR)	POL	5 NE	D	CTA	JABIRU	Reciprocating	1	A Jabiru infringed the Leeds CTA (Class D) at 3800ft. There were no other aircraft reported to be in the area at the time of the incident.	The aircraft landed at Oxenhope who were contacted.
201308519	14/07/2013	EGTT : London (FIR)	EGSR : Earls Colne		G	ATZ	JODEL	Unknown	1	Infringement of the Earls Colne ATZ (Class G) by a Jodel DR253 at 1000ft.	Reporter commented on the Jodel DR253's alleged poor airmanship, stating that the aircraft flew through Earls Colne airspace with no radio contact, in the opposite direction to traffic on approach to and departing from R/W06.

201308520	14/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	12nm SW	G	Restricted area	AVIONS ROBIN	Reciprocating	1	A DR400 infringed the Stansted TMZ 2 (Class G).	The aircraft displayed a 7000 squawk only. After the event the pilot was adamant the Mode C was selected but will endeavour to get the transponder checked prior to the next flight.
201308521	14/07/2013	EGTT : London (FIR)	EGNH (BLK): Blackpool	2nm West	G	ATZ	PIPER	Reciprocating	1	Infringement of the Blackpool ATZ (Class G) by a PA32 squawking 1177 and 1500ft Mode C. Pilot stated that he believed he had just skirted around the ATZ.	
201308540	15/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	12nm North	D	CTA	CESSNA	Reciprocating	1	Infringement of the Stansted CTA (Class D) by a C172 squawking 7000 indicating 2500ft. Traffic info and avoiding action given. Separation lost with inbound CL600.	CL600 was subsequently vectored back round for right base as the infringer left. Infringer was identified after being tracked all the way to landing. The investigation has revealed that the infringement was quite minor, the aircraft entered the CTA by approx 0.25-0.5nm and no further follow-up action is required. The Head of Training at the flying club has been spoken to and will de-brief the pilot concerned.
201308540	15/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	12nm North	D	CTA	BOMBARDIER	Turbofan	2	Infringement of the Stansted CTA (Class D) by a C172 squawking 7000 indicating 2500ft. Traffic info and avoiding action given. Separation lost with inbound CL600.	CL600 was subsequently vectored back round for right base as the infringer left. Infringer was identified after being tracked all the way to landing. The investigation has revealed that the infringement was quite minor, the aircraft entered the CTA by approx 0.25-0.5nm and no further follow-up action is required. The Head of Training at the flying club has been spoken to and will de-brief the pilot concerned.
201308549	15/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	12nm NNE	D	CTA	CESSNA	Reciprocating	1	A C172 infringed the Stansted CTA (Class D) at 2500ft.	The aircraft was talking to Cambridge who requested it to be transferred to LTCC. Once the aircraft was clear, the aircraft was transferred to Farnborough LARS.

201308565	15/07/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	12nm SW	A		EUROPA	Reciprocating	1	Infringement of Class A airspace by an unknown aircraft squawking 7000 indicating 6000ft. Aircraft was later identified as a Europa.	
201308583	15/07/2013	EGTT : London (FIR)	Danger Area D203	Sennybridge	Unknown	Danger area	PIPER	Reciprocating	1	Infringement of active Danger Area EG D203 (Sennybridge Range) by a PA28. Immediate check fire imposed.	Believed pilot was lost as he declared a PAN with D&D. Investigation confirmed that the inexperienced pilot was unsure how to use the GPS and became lost.☐ CAA Closure: Pilot to undertake further navigation and GPS training.
201308584	15/07/2013	EGTT : London (FIR)	BKY	10nm North West	A	TMA	NORTH AMERICAN	Reciprocating	1	Infringement of the London TMA (Class A) by a Harvard T-6 squawking 7000 climbing into the northerly 4500ft quadrant carrying out aerobatics. Standard separation maintained.	Following coordination with Essex, inbound A319 was taken for a long right base straight in approach R/W26 at Luton. T-6 pilot became disorientated after manoeuvres. Situational awareness and poor planning were considered factors.☐ CAA Closure: Appropriate CAA action taken.
201308584	15/07/2013	EGTT : London (FIR)	BKY	10nm North West	A	TMA	AIRBUS	Turbofan	2	Infringement of the London TMA (Class A) by a Harvard T-6 squawking 7000 climbing into the northerly 4500ft quadrant carrying out aerobatics. Standard separation maintained.	Following coordination with Essex, inbound A319 was taken for a long right base straight in approach R/W26 at Luton. T-6 pilot became disorientated after manoeuvres. Situational awareness and poor planning were considered factors.☐ CAA Closure: Appropriate CAA action taken.
201308591	15/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted		D	CTA	PIPER	Reciprocating	1	Infringement of the Stansted CTA (Class D) by a PA46 and a Hawker Hurricane resulting in loss of separation with a GLF5. Traffic info and avoiding action given.	A Stansted inbound A319 was turned right to maintain separation.☐ CAA Closure:☐ The PA46 and Hawker Hurricane were flying in formation, with the PA46 pilot doing all of the navigation and communication. Pilot of PA46 admitted an error, having misunderstood his clearance, resulting in an early climb into controlled airspace. The Hawker Hurricane pilot, staying in formation, also climbed into controlled airspace. German LBA and French DGAC advised. Lessons learnt by both pilots who each apologised for the incident.

201308591	15/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted		D	CTA	HAWKER	Unknown		Infringement of the Stansted CTA (Class D) by a PA46 and a Hawker Hurricane resulting in loss of separation with a GLF5. Traffic info and avoiding action given.	A Stansted inbound A319 was turned right to maintain separation.☐ CAA Closure:☐ The PA46 and Hawker Hurricane were flying in formation, with the PA46 pilot doing all of the navigation and communication. Pilot of PA46 admitted an error, having misunderstood his clearance, resulting in an early climb into controlled airspace. The Hawker Hurricane pilot, staying in formation, also climbed into controlled airspace. German LBA and French DGAC advised. Lessons learnt by both pilots who each apologised for the incident.
201308591	15/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted		D	CTA	GULFSTREAM	Turbofan	2	Infringement of the Stansted CTA (Class D) by a PA46 and a Hawker Hurricane resulting in loss of separation with a GLF5. Traffic info and avoiding action given.	A Stansted inbound A319 was turned right to maintain separation.☐ CAA Closure:☐ The PA46 and Hawker Hurricane were flying in formation, with the PA46 pilot doing all of the navigation and communication. Pilot of PA46 admitted an error, having misunderstood his clearance, resulting in an early climb into controlled airspace. The Hawker Hurricane pilot, staying in formation, also climbed into controlled airspace. German LBA and French DGAC advised. Lessons learnt by both pilots who each apologised for the incident.
201308591	15/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted		D	CTA	AIRBUS	Turbofan	2	Infringement of the Stansted CTA (Class D) by a PA46 and a Hawker Hurricane resulting in loss of separation with a GLF5. 201308594	15/07/2013	EGTT : London (FIR)	Shoeburyness	EGD 138	G	Danger area	GYROFLUG	Reciprocating	1	A C172 and SC01 infringed Danger Area D138A (Class G) at 5000ft. The range was not active at the time of the incident.	Southend ATC contacted D138 Range Control to inform them of the aircraft.
201308594	15/07/2013	EGTT : London (FIR)	Shoeburyness	EGD 138	G	Danger area	CESSNA	Reciprocating	1	A C172 and SC01 infringed Danger Area D138A (Class G) at 5000ft. The range was not active at the time of the incident.	Southend ATC contacted D138 Range Control to inform them of the aircraft.

201308622	16/07/2013	EGTT : London (FIR)	En-route		A	TMA	JODEL	Reciprocating	1	Infringement of the LTMA (Class A) by an unknown aircraft at 4000ft squawking 7000. Standard separation maintained. The unknown aircraft called Southend ATC and was identified as a Jodel D119. Traffic info given.	TC controller had made a blind transmission, with no reply. Two Stansted inbound B737s were vectored North away from the infringer and subsequently made normal approaches. Attributed to poor pre-flight planning.☐ CAA Closure: Appropriate CAA action taken.
201308622	16/07/2013	EGTT : London (FIR)	En-route		A	TMA	BOEING	Turbofan	2	Infringement of the LTMA (Class A) by an unknown aircraft at 4000ft squawking 7000. Standard separation maintained. The unknown aircraft called Southend ATC and was identified as a Jodel D119. Traffic info given.	TC controller had made a blind transmission, with no reply. Two Stansted inbound B737s were vectored North away from the infringer and subsequently made normal approaches. Attributed to poor pre-flight planning.☐ CAA Closure: Appropriate CAA action taken.
201308622	16/07/2013	EGTT : London (FIR)	En-route		A	TMA	BOEING	Turbofan	2	Infringement of the LTMA (Class A) by an unknown aircraft at 4000ft squawking 7000. Standard separation maintained. The unknown aircraft called Southend ATC and was identified as a Jodel D119. Traffic info given.	TC controller had made a blind transmission, with no reply. Two Stansted inbound B737s were vectored North away from the infringer and subsequently made normal approaches. Attributed to poor pre-flight planning.☐ CAA Closure: Appropriate CAA action taken.
201308650	16/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	North East	A	TMA	RUTAN	Reciprocating	1	Infringement of London TMA (Class A) by a Rutan Cozy squawking 1177 at FL65. Arrivals for Stansted and Luton were disrupted. Standard separation maintained.	Appropriate CAA action has been taken as a result of this incident. Matter being dealt with by the French Authorities.
201308666	16/07/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	8nm SW	D	CTR	SOCATA	Reciprocating	1	Infringement of the Luton CTR (Class D) by a Socata TB9 squawking 7000 between 2000ft and 2400ft. Outbound check applied to Luton departures. Standard separation maintained.	Attributed to distraction and faulty GPS.☐ CAA Closure: Appropriate CAA action taken. Additionally, the flying group has changed their operating procedure so that anyone who has not flown for more than 60 days, will require a flight with an instructor before being allowed solo.

201308701	15/07/2013	EGTT : London (FIR)	EG D036		G	Danger area	PIPER	Reciprocating	1	Infringement of active Danger Area EG D036 (Portsmouth) by an unknown aircraft squawking 3661. Aircraft identified as a PA28.	Military ATC established that the PA28 had been under Solent Radar, but was now being worked by Bournemouth ATC, who confirmed they were talking to the aircraft. PA28's squawk subsequently changed to 7000 and PA28 contacted Military ATC requesting a Basic Service. When questioned, PA28 confirmed they had not received clearance to enter EG D036. Reporter stated that no hazardous activities were taking place in EG D036 at the time of the infringement.
201308702	16/07/2013	EGTT : London (FIR)	Aberporth EG D201		G	Danger area	OTHER	Reciprocating	1	Infringement of active Danger Area EG D201 (Aberporth) by a unknown aircraft squawking 7000 at 2000ft. Aircraft later identified as an MCR01.	The MCR01 was found to be working Valley Radar and was transferred to Aberporth ATC, who directed the MCR01 out of the Danger Area.
201308705	17/07/2013	EGTT : London (FIR)	EG D009		G	Danger area	CESSNA	Reciprocating	1	Infringement of active Danger Area EG D009 (Wembury) by an unknown aircraft on a Newquay squawk. Newquay ATC subsequently identified the aircraft as a C182.	Investigation ascertained that the C182 pilot misinterpreted the altitude limits on his chart, having folded the chart in such a way that the limits were not clearly visible.☐ CAA Closure: Swiss Authorities advised. They have consulted with the pilot who completed an infringement questionnaire. Lesson learnt from this incident.
201308709	17/07/2013	EGTT : London (FIR)	EGLC (LCY): London city	5nm NNE	D	CTA	ROCKWELL	Reciprocating	1	A RC112 infringed the London City CTA (Class D) at 1800ft. Standard separation maintained.	The aircraft was instructed to leave the CAS, but it continued to track SE.
201308710	17/07/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	12nm West	D	CTA	VANS	Reciprocating	1	Infringement of the Gatwick CTA (Class D) by a formation of two Vans RV9 with Mode C indicating climb to 2000ft. Separation lost with inbound A319. Traffic info given. Shortly after, aircraft called Farnborough and were identified.	Attributed to poor planning and incorrect altimeter setting.☐ CAA Closure: Appropriate CAA action taken.

201308710	17/07/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	12nm West	D	CTA	VANS	Reciprocating	1	Infringement of the Gatwick CTA (Class D) by a formation of two Vans RV9 with Mode C indicating climb to 2000ft. Separation lost with inbound A319. Traffic info given. Shortly after, aircraft called Farnborough and were identified.	Attributed to poor planning and incorrect altimeter setting.☐ CAA Closure: Appropriate CAA action taken.
201308710	17/07/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	12nm West	D	CTA	AIRBUS	Turbofan	2	Infringement of the Gatwick CTA (Class D) by a formation of two Vans RV9 with Mode C indicating climb to 2000ft. Separation lost with inbound A319. Traffic info given. Shortly after, aircraft called Farnborough and were identified.	Attributed to poor planning and incorrect altimeter setting.☐ CAA Closure: Appropriate CAA action taken.
201308714	17/07/2013	EGTT : London (FIR)	EGLC (LCY): London city	5 NE	D	CTA	ROCKWELL	Reciprocating	1	Infringement of the London City CTA (Class D) by a Rockwell 112 at 1800ft. Standard separation maintained.	
201308716	17/07/2013	EGTT : London (FIR)	EGLK (BBS): Blackbushe		G	ATZ	CIRRUS	Reciprocating	1	Conflict between an SR22 and a C42 in the circuit at Blackbushe at 1400ft. Traffic info given.	The SR22 had already infringed the Farnborough ATZ and had been warned of the active Blackbushe ATZ.
201308716	17/07/2013	EGTT : London (FIR)	EGLK (BBS): Blackbushe		G	ATZ	COMCO IKARUS	Reciprocating	1	Conflict between an SR22 and a C42 in the circuit at Blackbushe at 1400ft. Traffic info given.	The SR22 had already infringed the Farnborough ATZ and had been warned of the active Blackbushe ATZ.

201308791	18/07/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	15nm W	A	TMA	PIPER	Reciprocating	1	Infringement of the LTMA (Class A) by a PA28 at 2800ft. There were no other aircraft in the immediate area.	
201308824	18/07/2013	EGTT : London (FIR)	D026		G	Danger area	CESSNA	Reciprocating	1	Infringement of active Danger Area D026 by a C172.	
201308835	19/07/2013	EGTT : London (FIR)	EGNR : Hawarden	5nm West	D	CTA	GRUMMAN	Reciprocating	1	Infringement of the Manchester CTA (Class D) by a Grumman AA5B squawking 7000 at 4500ft. Standard separation maintained	Traffic free-called Hawarden and they immediately descended the traffic below the base of CAS. Pilot had reported being 15nm West of Hawarden but in fact he was only 5nm to the West. The pilot admits that he failed to monitor his track with regard to CAS above his intended flight path.
201308845	18/07/2013	EGTT : London (FIR)	EGFF (CWL): Cardiff	10nm SE	D	CTA	OTHER	Turboshaft	1	A military helicopter infringed the Cardiff CTA-2 (Class D) at 2500ft. There was no other traffic in the area at the time of the incident.	The aircraft shortly after exited the CAS to the East.
201308907	19/07/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	8nm West	A	CTR	ROBINSON	Reciprocating	1	Infringement of the London CTR (Class A) by a R44 squawking 7000. CAIT activated. Traffic info given. Two Heathrow flights were broken off the approach.	Appropriate CAA action is being taken as a result of this incident.

201308907	19/07/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	8nm West	A	CTR	BOEING	Turbofan	2	Infringement of the London CTR (Class A) by a R44 squawking 7000. CAIT activated. Traffic info given. Two Heathrow flights were broken off the approach.	Appropriate CAA action is being taken as a result of this incident.
201308907	19/07/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	8nm West	A	CTR	AIRBUS	Turbofan	2	Infringement of the London CTR (Class A) by a R44 squawking 7000. CAIT activated. Traffic info given. Two Heathrow flights were broken off the approach.	Appropriate CAA action is being taken as a result of this incident.
201308916	20/07/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	9nm N	D	CTA	PIPER	Reciprocating	1	A PA28R infringed the Solent CTA (Class D) at 2300ft. An outbound aircraft has held on the runway at Southampton until the infringing aircraft was clear.	The infringing pilot reported having an unanticipated delay in contact with Solent Radar due to incorrectly set volume on radio transmitters. (The aircraft has two radios with a facility to monitor a second frequency while transmitting on the first. The volume was set high on the monitoring frequency but low on the primary radio. Only after several transmissions, with no apparent response, did it become clear that the radios were unhelpfully set.) During this period of radio re-setting, the aircraft drifted much further South than expected. Having just flown overhead the service station on the A34 SE of Andover, the pilot was surprised that the aircraft was apparently so far off track (nearly 90deg), presumably due to distraction and a much higher wind velocity than noted.
201308916	20/07/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	9nm N	D	CTA	DE HAVILLAND	Turboprop	2	A PA28R infringed the Solent CTA (Class D) at 2300ft. An outbound aircraft has held on the runway at Southampton until the infringing aircraft was clear.	The infringing pilot reported having an unanticipated delay in contact with Solent Radar due to incorrectly set volume on radio transmitters. (The aircraft has two radios with a facility to monitor a second frequency while transmitting on the first. The volume was set high on the monitoring frequency but low on the primary radio. Only after several transmissions, with no apparent response, did it become clear that the radios were unhelpfully set.) During this period of radio re-setting, the aircraft drifted much further South than expected. Having just flown overhead the service station on the A34 SE of Andover, the pilot was surprised that the aircraft was apparently so far off track (nearly 90deg), presumably due to distraction and a much higher wind velocity than noted.
201308923	20/07/2013	EGTT : London (FIR)	EGLM : White waltham		A	CTR	PIPER	Reciprocating	1	Infringement of the London CTR (Class A) by a PA28R at 1200ft, resulting in loss of separation with a Heathrow inbound A321 in descent to R/W09L. CAIT activated.	TC controller commented they had considered traffic info and avoiding action was inappropriate, due to the PA28R displaying an unverified Mode C of 1200ft, the cloud was broken at 2400ft and the A321 was just leaving 3000ft on the ILS. TC SVFR controller rang White Waltham to advise them of the situation and to tell the PA28R to turn West and leave the CTR. Operator alerted.

201308923	20/07/2013	EGTT : London (FIR)	EGLM : White waltham		A	CTR	AIRBUS	Turbofan	2	Infringement of the London CTR (Class A) by a PA28R at 1200ft, resulting in loss of separation with a Heathrow inbound A321 in descent to R/W09L. CAIT activated.	TC controller commented they had considered traffic info and avoiding action was inappropriate, due to the PA28R displaying an unverified Mode C of 1200ft, the cloud was broken at 2400ft and the A321 was just leaving 3000ft on the ILS. TC SVFR controller rang White Waltham to advise them of the situation and to tell the PA28R to turn West and leave the CTR. Operator alerted.
201308924	19/07/2013	EGTT : London (FIR)	EGNM (LBA): LEEDS BRADFORD	16nm West	D	CTA	ROBINSON	Reciprocating	1	Infringement of Leeds CTA (Class D) by an R44 squawking 1177 climbing to 3500ft. Standard separation maintained.	Pilot distracted by weather. Lack of concentration and detailed planning were also factors. ☐ CAA Closure: Appropriate CAA action taken.
201308925	18/07/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	13nm S	D	CTA	CESSNA	Reciprocating	1	A C152 infringed the Birmingham CTA (Class D) southerly corner at 2100ft. Inbound traffic was kept on its heading and separation minima was maintained.	
201308927	20/07/2013	EGTT : London (FIR)	EGHH (BOH): Bournemouth/Hurn	10nm NE	D	CTA	KLEMM	Reciprocating	1	Infringement of the Solent CTA (Class D) by a KL107 at 3500ft. Separation minima was maintained.	After several attempts, ATC established contact with the pilot and verified that the Mode C was indicating correctly.
201308928	20/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	TMZ 2	D	CTA	PIPER	Reciprocating	1	Infringement of the Stansted CTA (Class D) by a PA28 squawking 7000, indicating 2000ft, resulting in loss of separation with a B737 in descent to R/W04. Traffic info and avoiding action given.	The PA28 was observed to make an about turn and leave the CTA.TC made a blind call to the PA28 which was initially unanswered, however the pilot did make a courtesy call on frequency 120.625 shortly after. Student on PPL navigation flight with instructor on board. Instructor acknowledges late intervention when it became apparent that the aircraft was heading towards CAS.

201308928	20/07/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	TMZ 2	D	CTA	BOEING	Turbofan	2	Infringement of the Stansted CTA (Class D) by a PA28 squawking 7000, indicating 2000ft, resulting in loss of separation with a B737 in descent to R/W04. Traffic info and avoiding action given.	The PA28 was observed to make an about turn and leave the CTA.TC made a blind call to the PA28 which was initially unanswered, however the pilot did make a courtesy call on frequency 120.625 shortly after. Student on PPL navigation flight with instructor on board. Instructor acknowledges late intervention when it became apparent that the aircraft was heading towards CAS.
201308934	20/07/2013	EGTT : London (FIR)	EGSX : North Weald	3nm W	D	CTA	PIPER	Reciprocating	1	A PA28 infringed the Stansted CTA (Class D) at 1800ft. There were no reported disruption to Stansted Ops as a result of the infringement.	Initially the infringing aircraft was transponding Mode A only. The LTCC controller requested that Mode C was switched on.
201308939	20/07/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	11nm S	D	CTA	CESSNA	Reciprocating	1	A C172 infringed the Birmingham CTA-2 (Class D) at 2000ft. No other traffic were reported to have been affected by this infringement.	Numerous blind calls were made to the aircraft to no avail.
201308942	20/07/2013	EGTT : London (FIR)	ABBOT		A	TMA	SLINGSBY	Reciprocating	1	Infringement of LTMA (Class A) by a T67B at 4000ft. Separation minima was maintained.	The aircraft was contacted and requested to descend below the base of CAS, which was followed.
201308950	21/07/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	6 SE	D	CTR	BEAGLE	Reciprocating	1	Infringement of the Luton CTR (Class D) by a Beagle B121 squawking 7000 at 800ft. Traffic info/avoiding action given to airborne DVR departure. Separation lost.	Several unsuccessful blind transmissions had been made. Aircraft identified with Mode S.

201308950	21/07/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	6 SE	D	CTR	UNKNOWN	Unknown		Infringement of the Luton CTR (Class D) by a Beagle B121 squawking 7000 at 800ft. Traffic info/avoiding action given to airborne DVR departure. Separation lost.	Several unsuccessful blind transmissions had been made. Aircraft identified with Mode S.
201308953	19/07/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	15nm Northwest	A	TMA	AVIONS ROBIN	Reciprocating	1	Infringement of the London TMA (Class A) by a Robin R1180 observed at 3300ft. Traffic info and avoiding action given. Separation lost.	CAA Closure: <input type="checkbox"/> No response from PIC. Closed due to elapsed time.

201309001	19/07/2013	EGTT : London (FIR)	EGD 026		G	Danger area	CESSNA	Reciprocating	1	A C172 infringed active Danger Area D026 (Class G) at 1500ft. Live firing in progress.	The aircraft infringed the Danger Area twice.

201309005	22/07/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	12nm SW	A	TMA	CESSNA	Reciprocating	1	A C172 infringed the LTMA (Class A) at 2900ft. There was no other traffic affected by this incident.	The instructor did not read his charts correctly and apologised for his error.
201309013	16/07/2013	EGTT : London (FIR)	EG D117		G	Danger area	OTHER	Reciprocating	1	Infringement of active Danger Area EG D117 (Pendine) by a microlight, flying East to West at 500ft. Check fire imposed.	
201309048	22/07/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	10nm SSE	A	CTR	PIPER	Reciprocating	1	A PA28 infringed the London CTR (Class A) at 1000ft. There was no other traffic in the area reported at the time of the incident.	Heathrow were informed that the infringing aircraft was told to track southbound in order to exit CAS.
201309059	22/07/2013	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD		D	CTR	RANS	Reciprocating	1	Infringement of the Doncaster Sheffield CTR (Class D) by a Microlight at 2200ft. Traffic info and avoiding action given. Separation lost with departing A320.	
201309059	22/07/2013	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD		D	CTR	AIRBUS	Turbofan	2	Infringement of the Doncaster Sheffield CTR (Class D) by a Microlight at 2200ft. Traffic info and avoiding action given. Separation lost with departing A320.	

201309124	17/07/2013	EGTT : London (FIR)	Daventry CTA		A	CTA	EVEKTOR AEROTECHNIK	Reciprocating	1	An EV-97 infringed the Daventry CTA (Class A). There were no other aircraft reported to be in the area at the time of the incident.	Upon landing, the pilot called the controller and apologised and appropriate ATC advice was passed.
201309125	19/07/2013	EGTT : London (FIR)	EGBW : Wellesbourne mountford	2nm W	D	CTA	PIPER	Reciprocating	1	A PA28 infringed the Birmingham CTA-5 (Class D) at 4500ft. There were no other aircraft reported to be in the area at the time of the incident.	Multiple blind calls were initially made to no avail. Shortly after, the pilot called to request a BS where the aircraft was identified and the pilot was informed of his error.
201309145	24/07/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	16nm SW	A	TMA	FLY BUY ULTRALIGHTS	Reciprocating	1	Pilot reports that his C42 infringed the LTMA (Class A) at 2500ft.	Pilot error accepted.
201309166	12/07/2013	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	10nm SW	D	CTR	VANS	Reciprocating	1	An RV9 infringed the Manchester CTR (Class D). No other aircraft were reported to have been affected by the infringement.	RV9 pilot talking to inappropriate ATC unit.
201309232	25/07/2013	EGTT : London (FIR)	EGD 026		G	Danger area	PIPER	Reciprocating	1	A PA28R infringed Danger Area D026 (Class G) at 1000ft. The aircraft was working the FIR controller and had been informed to avoid the Danger Areas.	The Danger Area was active with live firing at the time of the infringement.

201309280	26/07/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	5nm S	D	CTR	UNKNOWN	Reciprocating	1	A microlight infringed the Luton CTR (Class D). No other aircraft were reported in the area at the time of the incident.	The infringement was observed by the TWR controllers. The microlight was in the area between 1115hrs and 1130hrs on four separate occasions.
201309298	26/07/2013	EGTT : London (FIR)	EGLF (FAB): Farnborough civil		D	Other	MORANE SAULNIER	Reciprocating	1	Infringement of Farnborough CAS-T (Class D) by a MS894A squawking 7000 indicating 5200ft towards Greenham Common. Blind call was made but no response.	There were no Farnborough departures during this time.
201309315	27/07/2013	EGTT : London (FIR)	EGNM (LBA): LEEDS BRADFORD	15nm NW	D	CTA	PIPER	Reciprocating	1	A PA28R infringed the Leeds CTA (Class D) at 4000ft. No other aircraft was reported to be in the area at the time of the incident.	The a/c was noted approaching CAS wearing a London Info conspicuity code. The aircraft was transferred (it was already inside CAS) and it called requesting a BS. The aircraft was then placed under a radar control service. The pilot was requested to call ATC once he had landed but no call was allegedly received.
201309326	27/07/2013	EGTT : London (FIR)	EGNM (LBA): LEEDS BRADFORD		D	CTR	SOCATA	Reciprocating	1	A TB20 infringed the Leeds CTR (Class D) at 2000ft. There were no other aircraft in the area at the time of the incident.	The aircraft was asked to join downwind LH for R/W14. The aircraft was then seen to cross R/W14 climb out. A new instruction to join the circuit was then issued.
201309330	27/07/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	6 W	D	CTR	CFM	Reciprocating	1	Infringement of the Birmingham CTR (Class D) by a Streak Shadow (believed) resulting in a loss of separation against an outbound DHC8. Traffic info and avoiding action given	CAA Closure: The infringing aircraft was not positively identified therefore no further CAA action is possible.

201309330	27/07/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	6 W	D	CTR	DE HAVILLAND	Turboprop	2	Infringement of the Birmingham CTR (Class D) by a Streak Shadow (believed) resulting in a loss of separation against an outbound DHC8. Traffic info and avoiding action given	CAA Closure: The infringing aircraft was not positively identified therefore no further CAA action is possible.
201309357	20/07/2013	EGTT : London (FIR)	D044 Lydd Ranges		G	Danger area	PIPER	Reciprocating	1	A PA28 infringed Danger Area EGD 044 (Class G) at 500ft.	The aircraft tracked from West to East across the ranges.
201309374	27/07/2013	EGTT : London (FIR)	Cranwell		Unknown	Restricted area	OTHER	Reciprocating	1	Infringement of the Red Arrows RA(T) at Cranwell by a Twister showing as a primary contact only. Traffic info was given to the Red Arrows who subsequently elected to delay the display until the aircraft had left the RA(T).	Several blind calls were made but without response. Appropriate CAA action to be taken as a result of this incident.
201309393	24/07/2013	EGTT : London (FIR)	EGWN : Halton		G	ATZ	WACO	Reciprocating	1	Possible infringement of the Halton ATZ (Class G) by a WACO at approx 900ft. A Halton based aircraft reported seeing the aircraft in the circuit which was active.	
201309417	29/07/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	Southern area of CTA	D	CTA	PIPER	Reciprocating	1	A PA24 infringed the Birmingham CTA (Class D) at 4800ft. Separation minima was maintained and traffic info was not passed to the infringer.	LACC FIS contacted Birmingham ATC to ask if they wanted to work the infringing aircraft. They declined.

201309418	28/07/2013	EGTT : London (FIR)	Haverhill		D	CTA	CESSNA	Reciprocating	1	Infringement of the Stansted CTA (Class D) by a C172 squawking 7000 at 2300ft. Traffic info given to inbound B737. Standard separation lost.	Attributed to inadequate flight planning and not checking compass, which was later found to be out by up to 20deg.□ CAA Closure: Appropriate CAA action taken in addition to navigation training with an instructor.
201309418	28/07/2013	EGTT : London (FIR)	Haverhill		D	CTA	BOEING	Turbofan	2	Infringement of the Stansted CTA (Class D) by a C172 squawking 7000 at 2300ft. Traffic info given to inbound B737. Standard separation lost.	Attributed to inadequate flight planning and not checking compass, which was later found to be out by up to 20deg.□ CAA Closure: Appropriate CAA action taken in addition to navigation training with an instructor.
201309436	21/07/2013	EGTT : London (FIR)	EGVA (FFD): Fairford		G	Restrict ed area	AEROSPATIALE	Turboshaft	1	Infringement of the Fairford RA(T), Kemble ATZ (Class G) and active Redlands Parachute Site by an unknown aircraft squawking 7000. The aircraft was later identified as an AS350.	Appropriate CAA action is to be taken as a result of this incident.
201309458	30/07/2013	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	10nm SW	D	CTR	PIPER	Reciprocating	1	A PA28 infringed the Manchester CTR (Class D). There was no other traffic in the area at the time of the incident.	The aircraft had entered the Manchester CTR from the LLR.
201309576	01/08/2013	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	3nm SE	D	CTR	CESSNA	Reciprocating	1	A C152 infringed the East Midlands CTR (Class D) at 2000ft. Traffic info was passed to en-route traffic and separation minima was maintained.	The C152 was being piloted by a student who declared a PAN with a training fix. Position fix and steers given for Leicester until the pilot was visual with the airfield.

201309596	01/08/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	8nm West	D	CTR	SOCATA	Reciprocating	1	Infringement of the Gatwick CTR (Class D) by a TB20 squawking 7000 at 2400ft. Traffic info and avoiding action given. Standard separation maintained.	Squawk was observed to change to a 0432 and aircraft identified by Farnborough LARS. Investigation identified an over-reliance on GPS for navigation.☐ CAA Closure: TB20 pilot to undertake training to emphasise the need to use a chart as part of planning and execution of the flight.
201309596	01/08/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	8nm West	D	CTR	AIRBUS	Turbofan	2	Infringement of the Gatwick CTR (Class D) by a TB20 squawking 7000 at 2400ft. Traffic info and avoiding action given. Standard separation maintained.	Squawk was observed to change to a 0432 and aircraft identified by Farnborough LARS. Investigation identified an over-reliance on GPS for navigation.☐ CAA Closure: TB20 pilot to undertake training to emphasise the need to use a chart as part of planning and execution of the flight.
201309598	01/08/2013	EGTT : London (FIR)	Damyns Hall	2E	A	TMA	STAMPE	Reciprocating	1	Infringement of the London TMA (Class A) by a Stampe SV4 at 2800ft. Two City inbound aircraft repositioned. Standard separation maintained.	
201309612	01/08/2013	EGTT : London (FIR)	EGHH (BOH): Bournemouth/Hurn	7nm East	D	CTR	PIPER	Reciprocating	1	Infringement of the Bournemouth CTR (Class D) by a PA28 squawking 7000 at 1300ft. Standard separation maintained.	
201309650	02/08/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	6nm South East	D	CTR	CESSNA	Reciprocating	1	Infringement of the Southampton CTR (Class D) by a C172. Traffic info and avoiding action given. Separation lost with outbound Trislander.	Dutch Authority advised. They contacted the pilot who provided a comprehensive response. Pilot briefly became disorientated, believing he was in contact with Southampton when, in fact, London Information had provided the frequency for Bournemouth. By the time the error was realised, the infringement had occurred.☐ CAA Closure: A lesson has been learnt and action taken by the pilot to prevent recurrence, no further action required by Dutch CAA.

201309650	02/08/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	6nm South East	D	CTR	BRITTEN NORMAN	Reciprocating	3	Infringement of the Southampton CTR (Class D) by a C172. Traffic info and avoiding action given. Separation lost with outbound Trislander.	Dutch Authority advised. They contacted the pilot who provided a comprehensive response. Pilot briefly became disorientated, believing he was in contact with Southampton when, in fact, London Information had provided the frequency for Bournemouth. By the time the error was realised, the infringement had occurred.☐ CAA Closure: A lesson has been learnt and action taken by the pilot to prevent recurrence, no further action required by Dutch CAA.
201309651	02/08/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	7.5nm N	D	CTR	UNKNOWN	Unknown		Infringement of the Southampton CTR (Class D) by an unknown aircraft showing as a primary contact only, resulting in loss of separation with a PA28 on ILS training. Traffic info and avoiding action given.	The PA28 was vectored clear of the infringer. ATC allowed the PA28 to continue with their ILS training once the infringer had left CAS.
201309651	02/08/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	7.5nm N	D	CTR	PIPER	Reciprocating	1	Infringement of the Southampton CTR (Class D) by an unknown aircraft showing as a primary contact only, resulting in loss of separation with a PA28 on ILS training. Traffic info and avoiding action given.	The PA28 was vectored clear of the infringer. ATC allowed the PA28 to continue with their ILS training once the infringer had left CAS.
201309662	03/08/2013	EGTT : London (FIR)	Audley End		G	Other	AVIAT	Reciprocating	1	Infringement of the Stansted TMZ1 (Class G) by an Aviat Huskey (believed) and a Vans RV7 (believed) in formation. Traffic info given.	
201309662	03/08/2013	EGTT : London (FIR)	Audley End		G	Other	VANS	Reciprocating	1	Infringement of the Stansted TMZ1 (Class G) by an Aviat Huskey (believed) and a Vans RV7 (believed) in formation. Traffic info given.	

201309667	03/08/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	17nm S	D	CTA	PIPER	Reciprocating	1	Infringement of the Solent CTA (Class D) by a PA 28 at 4200ft. Several blind transmissions made with no response. Standard separation maintained.	Pilot error acknowledged.
201309686	04/08/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	15.3nm South	D	CTA	PIPER	Reciprocating	1	Infringement of the Solent CTA (Class D) by a PA28 squawking 7377 indicating 2400ft. Traffic info and avoiding action given. Standard separation maintained.	CAA Closure:☐ Inexperienced PIC was not talking to Bournemouth when in their area. Navigation error. Ground/flight training given to emphasise boundaries of CAS in horizontal and vertical, plus more effective use of ATC.
201309686	04/08/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	15.3nm South	D	CTA	DE HAVILLAND	Turboprop	2	Infringement of the Solent CTA (Class D) by a PA28 squawking 7377 indicating 2400ft. Traffic info and avoiding action given. Standard separation maintained.	CAA Closure:☐ Inexperienced PIC was not talking to Bournemouth when in their area. Navigation error. Ground/flight training given to emphasise boundaries of CAS in horizontal and vertical, plus more effective use of ATC.
201309693	04/08/2013	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	4nn North West	D	CTR	CESSNA	Reciprocating	1	Infringement of the East Midlands CTR (Class D) and Syerston ATZ (Class G) by a C172 squawking 7000. East Midlands departures were suspended. Standard separation maintained.	Established that C172 pilot had initiated a return to departure airfield due to adverse weather. Appropriate CAA action has been taken as a result of this incident.
201309703	02/08/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	12nm SE	D	CTR	JODEL	Reciprocating	1	A D117 infringed the Luton CTR (Class D) at 1300ft. Traffic info was passed to inbound traffic and separation minima was maintained.	

201309716	29/06/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	10 NE	A	TMA	CESSNA	Reciprocating	1	Infringement of the LTMA (Class A) by a C152 at 2800ft. Inbound BD700 given avoiding action. Standard separation maintained.	C152 pilot subsequently interviewed/debriefed by CFI.
201309716	29/06/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	10 NE	A	TMA	BOMBARDIER	Turbofan	2	Infringement of the LTMA (Class A) by a C152 at 2800ft. Inbound BD700 given avoiding action. Standard separation maintained.	C152 pilot subsequently interviewed/debriefed by CFI.
201309768	04/08/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted		D	CTR	PIEL	Reciprocating	1	Infringement of the Stansted CTR (Class D) by a Piel CP 320 squawking 7000 indicating 1800ft. Traffic info and avoiding action given. Separation lost.	CAA Closure: <input type="checkbox"/> French DGAC have discussed the matter with the pilot and given appropriate advice.
201309768	04/08/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted		D	CTR	BOEING	Turbofan	2	Infringement of the Stansted CTR (Class D) by a Piel CP 320 squawking 7000 indicating 1800ft. Traffic info and avoiding action given. Separation lost.	CAA Closure: <input type="checkbox"/> French DGAC have discussed the matter with the pilot and given appropriate advice.
201309768	04/08/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted		D	CTR	AIRBUS	Turbofan	2	Infringement of the Stansted CTR (Class D) by a Piel CP 320 squawking 7000 indicating 1800ft. Traffic info and avoiding action given. Separation lost.	CAA Closure: <input type="checkbox"/> French DGAC have discussed the matter with the pilot and given appropriate advice.

201309808	06/08/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	10nm NE	D	CTA	BEECH	Reciprocating	1	Infringement of the Stansted CTA (Class D) by an aircraft identified via Mode S as a BE36 indicating 2200ft, resulting in loss of separation with a Stansted inbound B737.	The a/c also infringed on the return flight at 1640UTC. BE36 pilot admitted to and apologised for the infringements, stating that he does most of his flying IFR and conceding that he needs to refresh his understanding of VFR processes, particularly within the UK. The second infringement, during the return flight, was attributed to an incorrectly set autopilot which resulted in the aircraft heading South instead of East. This was corrected as soon as the error was realised.☐ CAA Closure: Lesson learned. Pilot will prepare more meticulously for future flights.
201309808	06/08/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	10nm NE	D	CTA	BOEING	Turbofan	2	Infringement of the Stansted CTA (Class D) by an aircraft identified via Mode S as a BE36 indicating 2200ft, resulting in loss of separation with a Stansted inbound B737.	The a/c also infringed on the return flight at 1640UTC. BE36 pilot admitted to and apologised for the infringements, stating that he does most of his flying IFR and conceding that he needs to refresh his understanding of VFR processes, particularly within the UK. The second infringement, during the return flight, was attributed to an incorrectly set autopilot which resulted in the aircraft heading South instead of East. This was corrected as soon as the error was realised.☐ CAA Closure: Lesson learned. Pilot will prepare more meticulously for future flights.
201309829	06/08/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	10nm S	D	CTA	PIPER	Reciprocating	1	A PA28 infringed the Southampton CTA (Class D) at 2400ft. A departing aircraft was passed traffic info and avoiding action.	The PA28 instructor reports missing the CTA on the chart.
201309829	06/08/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	10nm S	D	CTA	DE HAVILLAND	Turboprop	2	A PA28 infringed the Southampton CTA (Class D) at 2400ft. A departing aircraft was passed traffic info and avoiding action.	The PA28 instructor reports missing the CTA on the chart.
201309834	06/08/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	S	D	CTR	PIPER	Reciprocating	1	Infringement of Luton CTR (Class D) by a PA28R at 2200ft. Check all initiated. Standard separation maintained.	

201309843	06/08/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	15 E	D	CTA	CESSNA	Reciprocating	1	Infringement of the Stansted CTA (Class D) by a C152 at 2700ft.	
201309878	15/07/2013	EGTT : London (FIR)	D129 Weston-on-the-Green		G	Danger area	ROBINSON	Reciprocating	1	An R22 infringed Danger Area D129 (Class G) at 1300ft. Traffic info was passed to a paradropping aircraft.	The details on the infringing aircraft were obtained from Farnborough LARS as the R22 was under a BS with them.
201309898	06/08/2013	EGTT : London (FIR)	EGHI (SOU): Southampton		D	CTR	DRUINE	Reciprocating	1	Infringement of the Southampton CTR (Class D) by an aircraft showing as a primary contact only, resulting in loss of separation with a Southampton inbound JS32. Avoiding action given.	Infringing aircraft believed to be a D62. Attributed to poor flight planning and spatial awareness.☐ CAA Closure: Appropriate CAA action taken.
201309898	06/08/2013	EGTT : London (FIR)	EGHI (SOU): Southampton		D	CTR	BAE	Turboprop	2	Infringement of the Southampton CTR (Class D) by an aircraft showing as a primary contact only, resulting in loss of separation with a Southampton inbound JS32. Avoiding action given.	Infringing aircraft believed to be a D62. Attributed to poor flight planning and spatial awareness.☐ CAA Closure: Appropriate CAA action taken.
201309913	06/08/2013	EGTT : London (FIR)	EGLC (LCY): London city	13nm East	A	TMA	CESSNA	Reciprocating	1	Infringement of the London TMA (Class A) by a C182 squawking 5063 indicating 3000ft resulted in two losses of separation. Traffic info and avoiding action given.	CAA Closure:☐ Pilot error. Over-reliance on GPS. Interviewed, no further action.

201309913	06/08/2013	EGTT : London (FIR)	EGLC (LCY): London city	13nm East	A	TMA	EMBRAER	Turbofan	2	Infringement of the London TMA (Class A) by a C182 squawking 5063 indicating 3000ft resulted in two losses of separation. Traffic info and avoiding action given.	CAA Closure:☐ Pilot error. Over-reliance on GPS. Interviewed, no further action.
201309913	06/08/2013	EGTT : London (FIR)	EGLC (LCY): London city	13nm East	A	TMA	CESSNA	Turbofan	2	Infringement of the London TMA (Class A) by a C182 squawking 5063 indicating 3000ft resulted in two losses of separation. Traffic info and avoiding action given.	CAA Closure:☐ Pilot error. Over-reliance on GPS. Interviewed, no further action.
201309919	06/08/2013	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD		D	CTA	CESSNA	Reciprocating	1	A C152 infringed the Doncaster CTA (Class D) at 2000ft. No other traffic were affected by the infringement.	Prior to the infringement the student pilot asked for advice on how to avoid entering CAS. A few minutes later the student called again to notify the controller he had no Mode C and requested a steer towards Netherthorpe. The pilot was requested to squawk 3601 for ident, the controller then realised he had entered CAS so was requested to transfer to Doncaster. The student did not do this and remained on frequency until he was visual with Netherthorpe.
201309926	07/08/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	9 S	D	CTA	CESSNA	Reciprocating	1	Infringement of the Birmingham CTA (Class D) by a C152 at 2100ft. Standard separation maintained.	
201309981	08/08/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	10 N	D	CTA	CESSNA	Reciprocating	1	Infringement of the Solent CTA (Class D) by a C172. Traffic info and avoiding action given to an inbound DHC8. Standard separation maintained.	

201309981	08/08/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	10 N	D	CTA	DE HAVILLAND	Turboprop	2	Infringement of the Solent CTA (Class D) by a C172. Traffic info and avoiding action given to an inbound DHC8. Standard separation maintained.	
201309999	08/08/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	9nm NE	G	Restricted area	MCDONNELL DOUGLAS	Turboshaft	1	A Hu369 infringed the Stansted TMZ 1 (Class G). Traffic info was passed to an inbound aircraft.	The controller made a blind call to the infringer to no avail.
201309999	08/08/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	9nm NE	G	Restricted area	BOEING	Turbofan	2	A Hu369 infringed the Stansted TMZ 1 (Class G). Traffic info was passed to an inbound aircraft.	The controller made a blind call to the infringer to no avail.
201310003	08/08/2013	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD		D	CTA	RANS	Reciprocating	1	Infringement of the Doncaster Sheffield CTA (Class D) by an S6 at 4400ft. Standard separation maintained.	The microlight pilot had contacted Waddington who instructed the pilot to call Liverpool ATC. The pilot subsequently called Liverpool ATC and was informed they were inside CAS and should vacate immediately. The microlight took up an Easterly track, reportedly unaware that the track would put them on a heading towards a para drop site. Liverpool ATC advised the pilot of the para drop site, the pilot then took up a track to avoid the site and left CAS.
201310017	09/08/2013	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	SE	D	CTA	PIPER	Reciprocating	1	Infringement of the Nottingham East Midlands CTA (Class D) by a PA24 at 2300ft, showing a London FIR squawk.	ATCO contacted London FIR North who identified the aircraft as a PA24 and transferred the aircraft to Nottingham East Midlands APP. An inbound A321 was vectored clear and instructed to stop descent at 4000ft. Appropriate CAA action has been taken as a result of this incident.

201310017	09/08/2013	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	SE	D	CTA	AIRBUS	Turbofan	2	Infringement of the Nottingham East Midlands CTA (Class D) by a PA24 at 2300ft, showing a London FIR squawk.	ATCO contacted London FIR North who identified the aircraft as a PA24 and transferred the aircraft to Nottingham East Midlands APP. An inbound A321 was vectored clear and instructed to stop descent at 4000ft. Appropriate CAA action has been taken as a result of this incident.
201310034	07/08/2013	EGTT : London (FIR)	EGDG (NQY): St. Mawgan		G	ATZ	UNKNOWN	Reciprocating	1	A flexwing microlight infringed the Newquay ATZ (Class G) at 1500ft. No other traffic was affected by the infringement.	Various blind calls were made to the aircraft to no avail.
201310058	09/08/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTR	GRUMMAN	Reciprocating	1	An AA5B infringed the Luton CTR (Class D) at 1300ft. No traffic was affected by this incident.	The pilot reported misunderstanding the landmarks in the area.
201310065	10/08/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	7.5nm South East	D	CTR	ROBINSON	Reciprocating	1	Infringement of the Southampton CTR (Class D) by an R22 squawking 3670 at 2000ft. Traffic info and avoiding action given. Separation lost.	Blind call was made and pilot responded. He was made aware of his position and informed that traffic had to undertake avoiding action. Pilot apologised.
201310065	10/08/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	7.5nm South East	D	CTR	DE HAVILLAND	Turboprop	2	Infringement of the Southampton CTR (Class D) by an R22 squawking 3670 at 2000ft. Traffic info and avoiding action given. Separation lost.	Blind call was made and pilot responded. He was made aware of his position and informed that traffic had to undertake avoiding action. Pilot apologised.

201310077	10/08/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	13nm SW	D	CTA	CIRRUS	Reciprocating	1	An SR22 infringed the Stansted CTA (Class D) at 1800ft. No other traffic was affected by the infringement.	Several blind calls to the aircraft were made to no avail. North Weald were contacted who were able to confirm ident of the aircraft.
201310079	10/08/2013	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	12nm E	D	CTA	EUROPA	Reciprocating	1	Infringement of the East Midlands CTA (Class D) by a Europa at 3000ft squawking 7000. Standard separation maintained.	
201310081	10/08/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	11nm NE	D	CTA	OTHER	Reciprocating	1	A Skyranger 912 microlight infringed the Stansted CTA (Class D) at 1700ft. Traffic info was passed to an inbound aircraft and separation minima was maintained.	The inbound aircraft to Stansted was delayed as a result of the infringement.
201310081	10/08/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	11nm NE	D	CTA	UNKNOWN	Unknown		A Skyranger 912 microlight infringed the Stansted CTA (Class D) at 1700ft. Traffic info was passed to an inbound aircraft and separation minima was maintained.	The inbound aircraft to Stansted was delayed as a result of the infringement.
201310083	10/08/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	10 NE	D	CTA	CAARP	Reciprocating	1	A CAP10 infringed the Stansted CTA, followed by entering the CTR (Class D) at 2000ft. Traffic info was passed to an inbound aircraft and separation minima was maintained.	The inbound aircraft was given delaying vectors in order to maintain separation. A full report has been received from the pilot concerned who appears to recognise the causes of this incident.

201310083	10/08/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	10 NE	D	CTR	CAARP	Reciprocating	1	A CAP10 infringed the Stansted CTA, followed by entering the CTR (Class D) at 2000ft. Traffic info was passed to an inbound aircraft and separation minima was maintained.	The inbound aircraft was given delaying vectors in order to maintain separation. A full report has been received from the pilot concerned who appears to recognise the causes of this incident.
201310087	10/08/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	8nm N	D	CTR	PIPER	Reciprocating	1	A PA28 infringed the Stansted CTR (Class D). No other traffic was affected by this incident.	Pilot stated at one point that he was unaware of his position and appropriate ATC assistance was provided.
201310088	10/08/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	8nm WSW	D	CTR	NAVION	Reciprocating	1	A Navion A infringed the Luton CTR (Class D). No other traffic were reported to have been in the area at the time of the incident.	The controller phoned Dunstable, who got an aircraft airborne to look of the infringer stating he could see an aircraft parked on a private strip roughly where the infringing aircraft disappeared. The NATS controller was later able to track the aircraft on radar from Elstree to a point north of Dunstable Downs. This would match the flight profile and time of the routing.
201310092	10/08/2013	EGTT : London (FIR)	EGTO (RCS): Rochester	6nm NNW	A	TMA	EUROPA	Reciprocating	1	A Europa allegedly infringed the LTMA (Class A) at 3000ft. No other traffic was reported to have been affected by the incident.	Investigations have revealed a possible misreading transponder.
201310106	11/08/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	6 W	D	CTR	PIPER	Reciprocating	1	A PA28 infringed the Stansted CTR (Class D) at 2000ft. Numerous inbound and outbound flights were affected. Standard separation was maintained.	The pilot called to say he was infringing and required assistance to find his destination airfield which was given.

201310107	11/08/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	12nm N	D	CTA	AVIONS ROBIN	Reciprocating	1	A DR400 infringed the Stansted CTA (Class D) at 2000ft.	The aircraft was seen to descend from 5000ft and left CAS within 2nm.
201310144	10/08/2013	EGTT : London (FIR)	EGCF : Sandtoft	W	D	CTR	CESSNA	Reciprocating	1	Infringement of the Doncaster Sheffield CTR (Class D) by a contact squawking 7000. Aircraft identified via Wickenby as a C172. Standard separation maintained.	Doncaster Radar controller tracked the aircraft to Wickenby, who confirmed that the aircraft had just landed. The pilot contacted the Doncaster Radar controller, allegedly stating that they thought they had remained outside CAS and that they had been listening to the Doncaster radar frequency, but said it had been too busy. The controller informed the pilot that they could have used the "listening out" squawk 6170, which would have enabled ATC to contact them.
201310147	11/08/2013	EGTT : London (FIR)	EGCF : Sandtoft	S	D	CTR	CESSNA	Reciprocating	1	Infringement of the Doncaster CTR (Class D) by a C172 at 1800ft. Separation minima was maintained.	The C172 subsequently called on frequency to request clearance to enter CAS. After being given suitable advice, the aircraft was instructed to leave CAS to the East.
201310149	10/08/2013	EGTT : London (FIR)	EGCF : Sandtoft	N	D	CTR	AVIONS ROBIN	Reciprocating	1	Infringement of the Doncaster CTR (Class D) by a DR400 at 3100ft. Separation minima was maintained.	When asked, the pilot of the DR400 confirmed he was aware of the CAS and stated he thought the base of the CTR in his position was 2000ft.
201310154	10/08/2013	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD		D	CTA	EUROPA	Reciprocating	1	Infringement of the Doncaster CTA (Class D) by an unknown aircraft squawking 7000 at 2500ft. Aircraft identified via Sandtoft as a Europa. Standard separation maintained.	Attributed to no radio contact with Doncaster when in close proximity to their CAS. □ CAA Closure: Europa pilot has received refresher RT training.

201310157	10/08/2013	EGTT : London (FIR)	EGCF : Sandtoft	W	D	CTR	MD HELICOPTER	Turboshaft	1	Infringement of the Doncaster CTR (Class D) by an unknown aircraft, squawking 7000, indicating 600ft unverified. Aircraft identified themselves as an MD369. Traffic info given. Standard separation maintained.	MD369 pilot allegedly informed Doncaster Radar controller that they could not call for clearance due to the controller talking to another aircraft. The controller had been passing traffic info on the MD369 to ILS traffic. Pilot then made reference to only being at 600ft, controller informed pilot that although their transponder had indicated 600ft, it may not have been correct.
201310167	05/08/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	20nm SE	A	CTA	PIPER	Reciprocating	1	A PA28 infringed the Daventry CTA (Class A) at 5200ft. Standard separation maintained.	
201310170	14/08/2013	EGTT : London (FIR)	EGWN : Halton	5nm SW	A	TMA	CESSNA	Reciprocating	1	A C152 infringed the LTMA (Class A) at 3800ft. A Luton outbound aircraft was given a turn in order to increase separation.	
201310170	14/08/2013	EGTT : London (FIR)	EGWN : Halton	5nm SW	A	TMA	AIRBUS	Turbofan	2	A C152 infringed the LTMA (Class A) at 3800ft. A Luton outbound aircraft was given a turn in order to increase separation.	
201310194	12/08/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	8nm E	D	CTR	YAKOVLEV	Reciprocating	1	A YAK-18T infringed the Stansted CTR (Class D) at 1900ft. No traffic was affected by this incident.	The aircraft was identified by contacting the destination airfield. The A/G operator at the airfield is to debrief the pilot concerned.

201310203	10/08/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	16.1nm NNW	D	CTA	GRUMMAN	Reciprocating	1	Infringement of the Birmingham CTA-3 (Class D) by an unknown aircraft with altitude showing as 3700ft and continuing to climb. Aircraft identified via Mode S as a Grumman AA5. Standard separation maintained.	Blind transmissions made with no response. No traffic affected. ☐ CAA Closure: Appropriate CAA action taken.
201310243	12/08/2013	EGTT : London (FIR)	EGXY: Syerston		G	ATZ	UNKNOWN	Unknown	1	Infringement of the Syerston ATZ (Class G) by an unknown single engined high winged aircraft at approx 1200ft.	The infringing aircraft could not be identified or traced.
201310250	09/08/2013	EGTT : London (FIR)	EGBP : KEMBLE	End of Downwind Circuit	G	ATZ	PIPER	Reciprocating	1	UK AIRPROX 2013/106 - Two PA28s at 1000ft. PA28(2) infringed Kemble ATZ (Class G).	This AIRPROX has been subject to a separate review by the United Kingdom AIRPROX Board (UKAB). AIRPROX Board (UKAB) information indicates that this AIRPROX was due to the PA28(2) pilot flying through the Kemble visual circuit at a circuit height. ☐ Contributory Causes: 1. The PA28(2) pilot did not communicate his position and height to the FISO on entering the ATZ. 2. Lack of timely traffic information. ☐ 3. The FISO's ambiguous request to 'call passing abeam'.
201310250	09/08/2013	EGTT : London (FIR)	EGBP : KEMBLE	End of Downwind Circuit	G	ATZ	PIPER	Reciprocating	1	UK AIRPROX 2013/106 - Two PA28s at 1000ft. PA28(2) infringed Kemble ATZ (Class G).	This AIRPROX has been subject to a separate review by the United Kingdom AIRPROX Board (UKAB). AIRPROX Board (UKAB) information indicates that this AIRPROX was due to the PA28(2) pilot flying through the Kemble visual circuit at a circuit height. ☐ Contributory Causes: 1. The PA28(2) pilot did not communicate his position and height to the FISO on entering the ATZ. 2. Lack of timely traffic information. ☐ 3. The FISO's ambiguous request to 'call passing abeam'.
201310296	13/08/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	13nm NE	D	CTA	ROBINSON	Reciprocating	1	An unknown aircraft infringed the Stansted CTA (Class D) at 2000ft. Traffic info was passed to an inbound B737 and separation minima was maintained.	The pilots report concluded that in future, the instructor will conduct IF training to the East of a wind farm, further away from the CTA giving a wider margin for error in position.

201310296	13/08/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	13nm NE	D	CTA	BOEING	Turbofan	2	An unknown aircraft infringed the Stansted CTA (Class D) at 2000ft. Traffic info was passed to an inbound B737 and separation minima was maintained.	The pilots report concluded that in future, the instructor will conduct IF training to the East of a wind farm, further away from the CTA giving a wider margin for error in position.
201310330	14/08/2013	EGTT : London (FIR)	EGSC (CBG): Cambridge		G	ATZ	PIPER	Reciprocating	1	An unknown aircraft landed on R/W23 without ATC clearance. Aircraft identified as a PA28.	
201310334	14/08/2013	EGTT : London (FIR)	LOREL	3nm N	A	TMA	NORTH AMERICAN	Reciprocating	1	Infringement of the LTMA (Class A) by a T28, resulting in loss of separation with a BE200. Traffic info and avoiding action given.	CAA Closure: <input type="checkbox"/> No action taken. Closed due to elapsed time.
201310334	14/08/2013	EGTT : London (FIR)	LOREL	3nm N	A	TMA	BEECH	Turboprop	2	Infringement of the LTMA (Class A) by a T28, resulting in loss of separation with a BE200. Traffic info and avoiding action given.	CAA Closure: <input type="checkbox"/> No action taken. Closed due to elapsed time.
201310354	14/08/2013	EGTT : London (FIR)	EGGD (BRS): Bristol/Lulsgate	5N	D	CTR	OTHER	Turboshaft	1	Infringement of the Bristol CTR (Class D) by a military a/c. Standard separation maintained.	Student pilot under examination. Examiner error acknowledged.

201310366	14/08/2013	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	8nm South West	D	CTR	CESSNA	Reciprocating	1	Infringement of the Manchester CTR (Class D) by a C150 squawking 0021 with no Mode C. Departures were suspended. Inbound aircraft was broken off approach as there was an aircraft lined up on the runway. Further inbound aircraft were held at DAYNE.	Pilot had been distracted by his passenger who was looking for a particular landmark to take photographs and aircraft had descended to 600ft. On realising his mistake he turned towards his destination and reset the GPS to 4nm (it was 25nm) in the Manchester zone. Pilot had also failed to select his ALT on take-off.
201310389	14/08/2013	EGTT : London (FIR)	EGWN : Halton	1nm SW	G	ATZ	OTHER	Unknown	1	UK AIRPROX 2013/111 - Military aircraft and an unknown light aircraft, 1nm Southwest of RAF Halton. The light aircraft infringed the Halton ATZ (Class G).	This AIRPROX has been subject to a separate review by the United Kingdom AIRPROX Board (UKAB). AIRPROX Board (UKAB) information indicates that this AIRPROX was due to the light aircraft pilot flying through the Halton ATZ, without notifying the A/G operator, and into conflict with the military aircraft in the Halton visual circuit.
201310389	14/08/2013	EGTT : London (FIR)	EGWN : Halton	1nm SW	G	ATZ	UNKNOWN	Unknown		UK AIRPROX 2013/111 - Military aircraft and an unknown light aircraft, 1nm Southwest of RAF Halton. The light aircraft infringed the Halton ATZ (Class G).	This AIRPROX has been subject to a separate review by the United Kingdom AIRPROX Board (UKAB). AIRPROX Board (UKAB) information indicates that this AIRPROX was due to the light aircraft pilot flying through the Halton ATZ, without notifying the A/G operator, and into conflict with the military aircraft in the Halton visual circuit.
201310399	16/08/2013	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS		D	CTR	CESSNA	Reciprocating	1	Infringement of the East Midlands CTR (Class D) by a C152 flown by a student pilot. Inbound B737 was broken off the approach. Standard separation maintained.	
201310404	16/08/2013	EGTT : London (FIR)	EGNM (LBA): LEEDS BRADFORD	8 N	D	CTR	OTHER	Reciprocating	1	Infringement of the Leeds/Bradford CTR (Class D) by an unknown aircraft showing as a primary contact only. Aircraft identified from Tower as a microlight. Departures suspended. Standard separation maintained.	Traffic info given.

201310427	17/08/2013	EGTT : London (FIR)	EGWN : Halton		G	ATZ	CESSNA	Reciprocating	1	Alleged infringement of the Halton ATZ (Class G) by a C172.	
201310537	20/08/2013	EGTT : London (FIR)	EGSL : Andrewsfield	5nm NE	D	CTA	PIPER	Reciprocating	1	D&D Cell Report: Position fix and steers given until pilot became aware of his position. Four aircraft were given delaying vectors and separation minima was maintained.	The pilot seemed unaware of his position. The aircraft infringed the Stansted CTA (Class D) at 3500ft and subsequently Class A airspace. The aircraft was turned to exit the zone. The flight school concerned reported that although this incident originated with a navigational error it may have been prevented from becoming an infringement by earlier and more selective use of lost procedures. The school will, from now on, include a briefing in revalidation flights to ensure that all PPLs are familiar with the correct procedure for a training fix and carry out refresher training for those who may not have not covered this element in their initial course. All pilots will also be reminded of the limitations of a BS from a military unit in the vicinity of CAS and encouraged to request a TS from a unit such as Farnborough North LARS where available.
201310556	16/08/2013	EGTT : London (FIR)	EGGD (BRS): Bristol/Lulsgate	10 SE	D	CTA	CAARP	Reciprocating	1	Infringement of the Bristol CTA (Class D) by a CAP10 at 2400ft squawking 7000. Traffic info given. Standard separation maintained.	
201310558	20/08/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	Ware	G	Restricted area	JABIRU	Reciprocating	1	Infringement of the Stansted TMZ 2 (Class G) by a Jabiru J160 showing as a primary contact only.	Operator alerted. It transpired that the transponder had inadvertently been left on standby, or the master switch was knocked, during pre-flight checks.
201310560	20/08/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	TMZ 2	G	Restricted area	OTHER	Reciprocating	1	Infringement of the Stansted TMZ 2 (Class G) by a Skyranger 912 (believed) showing as a primary contact only. Check all imposed. A319 on departure instructed to make an earlier than normal RH turn to BKY.	The a/c is believed to have been identified and the CFI at the strip concerned will follow up with the pilot and provide further instruction on transponder use.

201310562	18/08/2013	EGTT : London (FIR)	EGWN : Halton		G	ATZ	DE HAVILLAND	Reciprocating	1	Alleged infringement of the RAF Halton ATZ (Class G) by an aircraft believed to be a Tiger Moth at 1600ft.	
201310573	21/08/2013	EGTT : London (FIR)	Cowes	2 W	D	CTA	JABIRU	Reciprocating	1	Infringement of the Solent CTA (Class D) by a Jabiru at 2300ft. Blind calls made with no response. Standard separation maintained.	
201310594	28/07/2013	EGTT : London (FIR)	EGFF (CWL): Cardiff	5 N	D	CTR	VANS	Reciprocating	1	A pair of RV8s infringed the Cardiff CTR (Class D) at approx 2500ft.	The pilot infringed after the lead aircraft experienced an electrical fault. The other pilot then took the lead role but became distracted and infringed the zone. Swansea Tower had notified the pilot of his error.
201310607	10/07/2013	EGTT : London (FIR)	EGWN : Halton		G	ATZ	PIPER	Reciprocating	1	UK AIRPROX 2013/113 - PA28 and an EV97 at Halton, in Class G airspace.	Information indicates that this AIRPROX was due to the PA28 pilot entering the Halton ATZ in error and flying into conflict with the EV97 on final approach (which he did not see). This AIRPROX has been subject to a separate review by the United Kingdom AIRPROX Board (UKAB). <input type="checkbox"/> CAA Closure: <input type="checkbox"/> No further CAA action at this time.
201310607	10/07/2013	EGTT : London (FIR)	EGWN : Halton		G	ATZ	OTHER	Reciprocating	1	UK AIRPROX 2013/113 - PA28 and an EV97 at Halton, in Class G airspace.	Information indicates that this AIRPROX was due to the PA28 pilot entering the Halton ATZ in error and flying into conflict with the EV97 on final approach (which he did not see). This AIRPROX has been subject to a separate review by the United Kingdom AIRPROX Board (UKAB). <input type="checkbox"/> CAA Closure: <input type="checkbox"/> No further CAA action at this time.

201310641	22/08/2013	EGTT : London (FIR)	En-route		D	CTR	AEROSPATIALE	Turboshaft	1	Infringement of the Bristol CTR (Class D) by an unknown aircraft squawking 7000, indicating 1800ft. Aircraft identified via Mode S as an AS350. Traffic info given.	Check all placed. Several blind calls made. A Bristol inbound ATR72 was broken off the approach to R/W09. Investigations revealed that the pilot failed to follow the correct procedure for transiting controlled airspace.☐ CAA Closure:☐ PIC has completed a Navigation Test Flight with a CAA FE.
201310641	22/08/2013	EGTT : London (FIR)	En-route		D	CTR	ATR	Turboprop	2	Infringement of the Bristol CTR (Class D) by an unknown aircraft squawking 7000, indicating 1800ft. Aircraft identified via Mode S as an AS350. Traffic info given.	Check all placed. Several blind calls made. A Bristol inbound ATR72 was broken off the approach to R/W09. Investigations revealed that the pilot failed to follow the correct procedure for transiting controlled airspace.☐ CAA Closure:☐ PIC has completed a Navigation Test Flight with a CAA FE.
201310644	22/08/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	10 S	D	CTA	COMMANDER	Reciprocating	1	Infringement of the Solent CTA (Class D) by a Rockwell 114B at 3300ft. Blind calls made without response. Standard separation maintained.	Pilot error acknowledged.
201310645	21/08/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	TMZ1	G	Restricted area	PIPER	Reciprocating	1	Infringement of the Stansted TMZ1 (Class G) by an unknown aircraft, possibly a Piper Cub, primary contact only. Blind transmissions made with no response.	
201310672	23/08/2013	EGTT : London (FIR)	MAY	5 NW	D	CTA	ROBINSON	Reciprocating	1	Infringement of the Gatwick CTA (Class D) by an R22 at 1900ft. Traffic info and avoiding action given to an outbound A319. Standard separation maintained.	R22 working Farnborough, who called the aircraft. Pilot responded after third call by which time the aircraft had entered CAS. Pilot was instructed to vacate CAS, which was complied with.

201310672	23/08/2013	EGTT : London (FIR)	MAY	5 NW	D	CTA	AIRBUS	Turbofan	2	Infringement of the Gatwick CTA (Class D) by an R22 at 1900ft. Traffic info and avoiding action given to an outbound A319. Standard separation maintained.	R22 working Farnborough, who called the aircraft. Pilot responded after third call by which time the aircraft had entered CAS. Pilot was instructed to vacate CAS, which was complied with.
201310683	23/08/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	15 S	D	CTA	PIPER	Reciprocating	1	Infringement of the Solent CTA (Class D) by a PA28R at 3000ft squawking 7000. Blind calls made with no response. Traffic info and avoiding action given to two outbound Trislanders. Standard separation maintained.	
201310683	23/08/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	15 S	D	CTA	BRITTEN NORMAN	Reciprocating	3	Infringement of the Solent CTA (Class D) by a PA28R at 3000ft squawking 7000. Blind calls made with no response. Traffic info and avoiding action given to two outbound Trislanders. Standard separation maintained.	
201310683	23/08/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	15 S	D	CTA	BRITTEN NORMAN	Reciprocating	3	Infringement of the Solent CTA (Class D) by a PA28R at 3000ft squawking 7000. Blind calls made with no response. Traffic info and avoiding action given to two outbound Trislanders. Standard separation maintained.	
201310692	21/08/2013	EGTT : London (FIR)	EGFF (CWL): Cardiff	6nm NW	D	CTR	AVIONS ROBIN	Reciprocating	1	Infringement of the Cardiff CTR (Class D) by a DR400 squawking 1177 at 2000ft, working London FIR. Standard separation maintained.	Cardiff ATC asked London FIR to transfer the DR400 to Cardiff and tell the aircraft to change squawk to 3610. Cardiff ATC commented that the pilot appeared to be unaware of his current position and gave the pilot track distance towards Swansea. The pilot reported good VMC and continued their transit towards Swansea. The pilot was informed that the cloud base at Swansea was approx 700ft, and he subsequently decided to divert into Cardiff. Information indicates the pilot was a little shaken by going into IMC and had thought he was further North than he was.☐ CAA Closure: Pilot lost in poor weather. Appropriate CAA action taken.

201310715	22/08/2013	EGTT : London (FIR)	EGDO : Predannack Navy		G	ATZ	PIPER	Reciprocating	1	Alleged infringement of the RNAS Predannack ATZ (Class G) by a PA28.	CAA Closure: Communication failure. The PIC undertook a flypast at Predannack at the request of the Gliding Club. He will check in future that those who need to be aware are informed.
201310722	26/08/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	9 N	A	CTR	PIPER	Reciprocating	1	Infringement of the London CTR (Class A) by a PA28 at 1600ft. Standard separation maintained.	Pilot error acknowledged. The pilot misread the PLOG and flew the wrong heading.
201310731	25/08/2013	EGTT : London (FIR)	MALBY	L9	A	RVSM	PIPER	Reciprocating	1	Infringement of Airway L9 (Class A) by a PA28 at FL70. Standard separation maintained.	Pilot contacted ATC on landing and apologised for his error citing an incorrect QNH setting.
201310749	26/08/2013	EGTT : London (FIR)	BNN	4nm S	A	TMA	ROBINSON	Reciprocating	1	Infringement of the LTMA (Class A) by an unknown aircraft squawking 7000 at unverified 4000ft. Aircraft identified via CAIT as an R44. Standard separation maintained.	
201310753	26/08/2013	EGTT : London (FIR)	Yarmouth		D	CTA	PIPER	Reciprocating	1	Infringement of the Solent CTA (Cass D) by a PA28 at 2300ft squawking 7000. Avoiding action issued to an SR22 in transit. Standard separation maintained.

201311040	31/08/2013	EGTT : London (FIR)	Brands Hatch		A	TMA	BOMBARDIER	Turbofan	2	Infringement of the LTMA (Class A) by a C152 at 2600ft. Traffic info and avoiding action given to a BD700 inbound to Biggin Hill. STCA activated. Standard separation maintained.	

201311041	31/08/2013	EGTT : London (FIR)	EGSX : North Weald	5nm NW	D	CTA	OTHER	Reciprocating	1	A Verhees Delta infringed the Stansted CTA (Class D) at 1900ft. Traffic info was passed to two inbound aircraft and separation minima was maintained.	Believed that the a/c was in formation with a Europa. Possible incorrect QNH setting.
201311041	31/08/2013	EGTT : London (FIR)	EGSX : North Weald	5nm NW	D	CTA	EUROPA	Reciprocating	1	A Verhees Delta infringed the Stansted CTA (Class D) at 1900ft. Traffic info was passed to two inbound aircraft and separation minima was maintained.	Believed that the a/c was in formation with a Europa. Possible incorrect QNH setting.
201311042	01/09/2013	EGTT : London (FIR)	Keyworth		D	CTA	STODDARD HAMILTON	Reciprocating	1	Infringement of the East Midlands CTA (Class D) by an unknown aircraft at 2000ft, resulting in loss of separation with a B737 in descent to R/W27. Aircraft identified as a Glastar. Traffic info and avoiding action given.	Investigations into this incident revealed that basic errors were made which resulted in the infringement. The root cause was that the pilot was not talking to the relevant ATC unit. <input type="checkbox"/> CAA Closure: <input type="checkbox"/> Appropriate CAA follow up action has been taken.
201311042	01/09/2013	EGTT : London (FIR)	Keyworth		D	CTA	BOEING	Turbofan	2	Infringement of the East Midlands CTA (Class D) by an unknown aircraft at 2000ft, resulting in loss of separation with a B737 in descent to R/W27. Aircraft identified as a Glastar. Traffic info and avoiding action given.	Investigations into this incident revealed that basic errors were made which resulted in the infringement. The root cause was that the pilot was not talking to the relevant ATC unit. <input type="checkbox"/> CAA Closure: <input type="checkbox"/> Appropriate CAA follow up action has been taken.
201311043	01/09/2013	EGTT : London (FIR)	Rhyl		A	Restricted area	ROBINSON	Reciprocating	1	Infringement of the Red Arrows RA(T) at Rhyl by a helicopter, identified via Mode S as an R44 at 1000ft. Traffic info was given to the Red Arrows who were starting their run into the display area.	R44 vacated the RA(T) before the Red Arrow display commenced. R44 pilot apologised. Information indicates the R44 pilot had been aware of the NOTAMed area and had believed they were 6nm away from the Red Arrows display centre. There also appears to have been some confusion over local and zulu timing.

201311045	01/09/2013	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	E	D	CTA	AVIONS ROBIN	Reciprocating	1	Infringement of the East Midlands CTA (Class D) by an HR100 at 2600ft. Blind calls made with no response. Aircraft observed descending to vacate CAS. Standard separation maintained.	Pilot subsequently apologised and stated he had a radio problem. Controller advised the pilot that if he is unable to contact ATC he is to remain outside CAS.
201311050	30/08/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	12.2 S	D	CTA	VANS	Reciprocating	1	Infringement of the Birmingham CTA-2 (Class D) by a Vans RV10 at 2200ft squawking 7000. Inbound airliner given traffic info. Standard separation maintained.	
201311054	31/08/2013	EGTT : London (FIR)	EGLC (LCY): London city	NE	D	CTA	EVEKTOR AEROTECHNIK	Reciprocating	1	Infringement of the London City CTA (Class D) by an EV97 at 1900ft. Blind transmission made with no response. Standard separation maintained.	Pilot error acknowledged. Appropriate advice given regarding the use of listening squawks when operating in the vicinity of CAS.
201311107	02/09/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	13nm SSW	D	CTA	SOCATA	Reciprocating	1	Infringement of the Solent CTA (Class D) by an unknown aircraft squawking 0011, indicating 2400ft, resulting in loss of separation with a Trislander. Aircraft identified via Mode S as a Socata TB9. Traffic info and avoiding action given.	Socata TB9 pilot report later revealed they had climbed above 2000ft whilst trying to identify Lee-on-Solent and make radio contact. Investigation identified poor planning, mis-reading the chart and situational awareness as contributory factors.☐ CAA Closure: Appropriate CAA action taken.
201311107	02/09/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	13nm SSW	D	CTA	BRITTEN NORMAN	Reciprocating	3	Infringement of the Solent CTA (Class D) by an unknown aircraft squawking 0011, indicating 2400ft, resulting in loss of separation with a Trislander. Aircraft identified via Mode S as a Socata TB9. Traffic info and avoiding action given.	Socata TB9 pilot report later revealed they had climbed above 2000ft whilst trying to identify Lee-on-Solent and make radio contact. Investigation identified poor planning, mis-reading the chart and situational awareness as contributory factors.☐ CAA Closure: Appropriate CAA action taken.

201311114	31/08/2013	EGTT : London (FIR)	EGSC (CBG): Cambridge	10nm WSW	A	TMA	TECNAM	Reciprocating	1	Infringement of the LTMA (Class A) by a Tecnam P2002 squawking 7000 indicating 6200ft. Avoiding action given to two Luton inbound aircraft to maintain separation.	Investigation identified incorrect pressure settings and poor planning and in-flight checks as contributory factors.☐ CAA Closure: Appropriate CAA action taken.
201311114	31/08/2013	EGTT : London (FIR)	EGSC (CBG): Cambridge	10nm WSW	A	TMA	BOMBARDIER	Turbofan	2	Infringement of the LTMA (Class A) by a Tecnam P2002 squawking 7000 indicating 6200ft. Avoiding action given to two Luton inbound aircraft to maintain separation.	Investigation identified incorrect pressure settings and poor planning and in-flight checks as contributory factors.☐ CAA Closure: Appropriate CAA action taken.
201311114	31/08/2013	EGTT : London (FIR)	EGSC (CBG): Cambridge	10nm WSW	A	TMA	AIRBUS	Turbofan	2	Infringement of the LTMA (Class A) by a Tecnam P2002 squawking 7000 indicating 6200ft. Avoiding action given to two Luton inbound aircraft to maintain separation.	Investigation identified incorrect pressure settings and poor planning and in-flight checks as contributory factors.☐ CAA Closure: Appropriate CAA action taken.
201311117	01/09/2013	EGTT : London (FIR)	Sudbury		A	TMA	RUSCHMEYER	Unknown	1	Infringement of the LTMA (Class A) by an unknown aircraft squawking 7000, indicating 6000ft. Aircraft identified via Manston as a Ruschmeyer R90. Traffic info given. Standard separation maintained.	Information indicates the Ruschmeyer R90's Mode C was undetected for a period whilst the aircraft was inside CAS and was subsequently redetected once the aircraft was abeam Southend indicating 5500ft. A B737 and an HS125 in descent were vectored clear of the infringer.☐ CAA Closure:☐ Pilot error. Poor awareness, possibly turned transponder off. Invited for interview.
201311117	01/09/2013	EGTT : London (FIR)	Sudbury		A	TMA	BOEING	Turbofan	2	Infringement of the LTMA (Class A) by an unknown aircraft squawking 7000, indicating 6000ft. Aircraft identified via Manston as a Ruschmeyer R90. Traffic info given. Standard separation maintained.	Information indicates the Ruschmeyer R90's Mode C was undetected for a period whilst the aircraft was inside CAS and was subsequently redetected once the aircraft was abeam Southend indicating 5500ft. A B737 and an HS125 in descent were vectored clear of the infringer.☐ CAA Closure:☐ Pilot error. Poor awareness, possibly turned transponder off. Invited for interview.

201311117	01/09/2013	EGTT : London (FIR)	Sudbury		A	TMA	HAWKER SIDDELEY	Unknown		Infringement of the LTMA (Class A) by an unknown aircraft squawking 7000, indicating 6000ft. Aircraft identified via Manston as a Ruschmeyer R90. Traffic info given. Standard separation maintained.	Information indicates the Ruschmeyer R90's Mode C was undetected for a period whilst the aircraft was inside CAS and was subsequently redetected once the aircraft was abeam Southend indicating 5500ft. A B737 and an HS125 in descent were vectored clear of the infringer.☐ CAA Closure:☐ Pilot error. Poor awareness, possibly turned transponder off. Invited for interview.
201311129	31/08/2013	EGTT : London (FIR)	Salisbury Plain		G	Danger area	ROBINSON	Reciprocating	1	Infringement of active Danger Area D125 (Larkhill) by an unknown aircraft squawking 7000, indicating 1000ft. Aircraft identified via Old Sarum as an R44.	Reporter commented that the R44 pilot contacted military ATC after landing at Old Sarum, accepted that their R44 may have been the aircraft identified on the SSR screen and apologised accordingly.
201311131	19/08/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTR	SOCATA	Turboprop	1	Brief infringement of the Luton CTR (Class D) by a TBM700 squawking 7000 at 2100ft. TBM700 pilot taking evasive action following conflict outside CAS. CAIT activated. Luton departures were stopped.	
201311131	19/08/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTR	PIPER	Reciprocating	1	Brief infringement of the Luton CTR (Class D) by a TBM700 squawking 7000 at 2100ft. TBM700 pilot taking evasive action following conflict outside CAS. CAIT activated. Luton departures were stopped.	
201311132	12/09/2013	EGTT : London (FIR)	Bridport		G	Danger area	CESSNA	Reciprocating	1	Infringement of Danger Area EG D012 (Lyme Bay) by a C172 receiving a Basic Service from Yeovilton LARS.	Reporter commented that a handover was taking place on the LARS position when the oncoming controller noticed the C172 was just within Danger Area EG D012. LARS controller advised the C172 to vacate. C172 replied that they were avoiding cloud and wished to remain VMC. The pilot then tracked directly South, further penetrating the EG D012. Military ATC subsequently called LARS requesting information on the aircraft and were informed the C172 was in turn heading North vacating EG D012.

201311138	11/08/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	9 S	D	CTA	UNKNOWN	Reciprocating	1	Infringement of the Birmingham CTA-2 (Class D) by an unknown aircraft at 1800ft squawking 7000. Blind transmissions made with no response. Standard separation maintained.	
201311230	04/09/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	5.4nm WNW	D	CTA	PIPER	Reciprocating	1	Infringement of the Solent CTA (Class D) by an unknown aircraft squawking 7000, resulting in loss of separation with Southampton traffic. Aircraft identified via Farnborough as a PA28. Traffic info and avoiding action given.	Southampton inbound EMB190 at 2100ft was given a heading of 160 and climb to 2500ft and a Southampton outbound JS41 was given a heading of 110 to avoid. Error by flying instructor.☐ CAA Closure: Appropriate CAA action taken.
201311230	04/09/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	5.4nm WNW	D	CTA	EMBRAER	Turbofan	2	Infringement of the Solent CTA (Class D) by an unknown aircraft squawking 7000, resulting in loss of separation with Southampton traffic. Aircraft identified via Farnborough as a PA28. Traffic info and avoiding action given.	Southampton inbound EMB190 at 2100ft was given a heading of 160 and climb to 2500ft and a Southampton outbound JS41 was given a heading of 110 to avoid. Error by flying instructor.☐ CAA Closure: Appropriate CAA action taken.
201311230	04/09/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	5.4nm WNW	D	CTA	BAE	Turboprop	2	Infringement of the Solent CTA (Class D) by an unknown aircraft squawking 7000, resulting in loss of separation with Southampton traffic. Aircraft identified via Farnborough as a PA28. Traffic info and avoiding action given.	Southampton inbound EMB190 at 2100ft was given a heading of 160 and climb to 2500ft and a Southampton outbound JS41 was given a heading of 110 to avoid. Error by flying instructor.☐ CAA Closure: Appropriate CAA action taken.
201311242	02/09/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	11nm SW	G	Restricted area	OTHER	Turbojet	1	A Folland Gnat infringed the Stansted TMZ-2 (Class G). No other aircraft were affected by this incident.	The aircraft was not displaying Mode C. Once the aircraft landed, the pilot contacted the controller to apologise and he was concerned his Mode C was unserviceable.

201311243	03/09/2013	EGTT : London (FIR)	DET	10 NW	A	TMA	OTHER	Reciprocating	1	Infringement of the LTMA (Class A) by a Savannah VG at 2900ft squawking 7000. Aircraft inbound to London City vectored clear of the infringer. Standard separation maintained.	Pilot apologised for his error.
201311272	04/09/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	4 NE	D	CTR	MAULE	Reciprocating	1	Infringement of the Southampton CTR (Class D) by an MX7 at 1500ft. Standard separation maintained.	MX7 pilot affected by sunglare. He has learnt from the incident, apologised and taken action to prevent recurrence.
201311288	02/09/2013	EGTT : London (FIR)	HON	4 SW	D	CTA	CESSNA	Reciprocating	1	Infringement of the Birmingham CTA -2 (Class D) by a C152 at FL50. Traffic info and avoiding action given to an inbound B757. Standard separation maintained.	C152 entered the zone twice before vacating to the South. Student pilot on qualifying cross country flight.☐ CAA Closure: Remedial training carried out by the training school. Student pilot re-briefed and to fly the same route with an Instructor.
201311288	02/09/2013	EGTT : London (FIR)	HON	4 SW	D	CTA	BOEING	Turbofan	2	Infringement of the Birmingham CTA -2 (Class D) by a C152 at FL50. Traffic info and avoiding action given to an inbound B757. Standard separation maintained.	C152 entered the zone twice before vacating to the South. Student pilot on qualifying cross country flight.☐ CAA Closure: Remedial training carried out by the training school. Student pilot re-briefed and to fly the same route with an Instructor.
201311295	05/09/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	3nm North West	D	CTR	CURRIE	Reciprocating	1	Infringement of the Luton CTR (Class D) by a Currie Wot squawking 7000 indicating 3000ft. Check all imposed. Separation lost.	Pilot subsequently acknowledged error and apologised.

201311295	05/09/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	3nm North West	D	CTR	UNKNOWN	Unknown		Infringement of the Luton CTR (Class D) by a Currie Wot squawking 7000 indicating 3000ft. Check all imposed. Separation lost.	Pilot subsequently acknowledged error and apologised.
201311312	05/09/2013	EGTT : London (FIR)	HON	5nm S	D	CTA	CESSNA	Reciprocating	1	Infringement of the Birmingham CTA-2 (Class D) by an unknown aircraft squawking 7000, climbing to 2000ft, resulting in loss of separation with a B737 in descent to 4000ft. Aircraft identified as a C152. Traffic info and avoiding action given.	Blind transmissions made. A/c identified via squawk ident. ☐ CAA Closure:☐ Pilot error, spatial awareness issues. A warning letter has been sent.
201311312	05/09/2013	EGTT : London (FIR)	HON	5nm S	D	CTA	BOEING	Turbofan	2	Infringement of the Birmingham CTA-2 (Class D) by an unknown aircraft squawking 7000, climbing to 2000ft, resulting in loss of separation with a B737 in descent to 4000ft. Aircraft identified as a C152. Traffic info and avoiding action given.	Blind transmissions made. A/c identified via squawk ident. ☐ CAA Closure:☐ Pilot error, spatial awareness issues. A warning letter has been sent.
201311327	06/09/2013	EGTT : London (FIR)	DTY	10nm SW	A	CTA	ROBINSON	Reciprocating	1	Infringement of the Daventry CTA (Class A) by an R44 squawking 7000 at FL85. CAIT activated. Standard separation maintained.	Base of CAS FL65. ☐ CAA Closure:☐ Pilot error. The root cause of this incident was the perceived need to choose a course to stay VMC and not leaving sufficient margin to CAS. The pilot has been interviewed and conducted a flight with a Staff Flight Examiner.
201311345	03/09/2013	EGTT : London (FIR)	EGTO (RCS): Rochester	12nm NE	A	TMA	VANS	Reciprocating	1	An RV9A infringed the LTMA (Class A) at 4300ft. No other traffic was reported to have been affected by this incident.

CAA Closure:☐ Information indicates that this AIRPROX was due to the Bell 206 pilot flying through a promulgated and active Glider Site and into conflict with a winch-launching glider. No further CAA action at this time. This AIRPROX has been subject to a separate review by the United Kingdom AIRPROX Board (UKAB).
201311361	04/09/2013	EGTT : London (FIR)	Rivar Hill Gliding Site		G	Other	SCHLEICHER	None	0	UK AIRPROX 2013/125 - Schleicher ASW15 glider and a Bell 206 at Rivar Hill Gliding Site, in Class G airspace.	CAA Closure:☐ Information indicates that this AIRPROX was due to the Bell 206 pilot flying through a promulgated and active Glider Site and into conflict with a winch-launching glider. No further CAA action at this time. This AIRPROX has been subject to a separate review by the United Kingdom AIRPROX Board (UKAB).
201311396	08/09/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	S	D	CTR	UNKNOWN	Reciprocating	1	Infringement of the Stansted CTR (Class D) by unknown microlight believed to be at 2000ft. Check all imposed. Traffic info given to an outbound aircraft. Standard separation maintained.	
201311402	08/09/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	8nm SE	D	CTA	GROB	Reciprocating	1	Infringement of the Solent CTA (Class D) by an unknown aircraft squawking 7000, indicating 2600ft, climbing to 3400ft. Aircraft identified via Mode S as a Grob 109. Traffic info and avoiding action given. Standard separation maintained.	Several blind calls were made without response. Avoiding action given to Southampton inbound Trislander and DHC8. Attributed to poor map reading by the Grob 109 pilot.☐ CAA Closure: Appropriate CAA action taken.
201311402	08/09/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	8nm SE	D	CTA	BRITTEN NORMAN	Reciprocating	3	Infringement of the Solent CTA (Class D) by an unknown aircraft squawking 7000, indicating 2600ft, climbing to 3400ft. Aircraft identified via Mode S as a Grob 109. Traffic info and avoiding action given. Standard separation maintained.	Several blind calls were made without response. Avoiding action given to Southampton inbound Trislander and DHC8. Attributed to poor map reading by the Grob 109 pilot.☐ CAA Closure: Appropriate CAA action taken.

201311402	08/09/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	8nm SE	D	CTA	DE HAVILLAND	Turboprop	2	Infringement of the Solent CTA (Class D) by an unknown aircraft squawking 7000, indicating 2600ft, climbing to 3400ft. Aircraft identified via Mode S as a Grob 109. Traffic info and avoiding action given. Standard separation maintained.	Several blind calls were made without response. Avoiding action given to Southampton inbound Trislander and DHC8. Attributed to poor map reading by the Grob 109 pilot.☐ CAA Closure: Appropriate CAA action taken.
201311413	07/09/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	0.5nm S	A	CTR	UNKNOWN	Unknown	1	Infringement of the Heathrow CTR (Class A) by an unknown powered parachute. Relevant authorities informed.	Ground crew observed the powered parachute route eastbound along the southern perimeter of the airfield.
201311520	10/09/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	5 SW	D	CTR	HUGHES	Reciprocating	1	Infringement of the Birmingham CTA-1 (Class D) by a Hughes 269 at 1200ft. Blind calls made with no response. Standard separation maintained.	Pilot error acknowledged.
201311521	10/09/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	12nm North East	D	CTA	JODEL	Reciprocating	1	Infringement of the Gatwick CTA (Class D) by a Jodel DR100 squawking 7047 at 1900ft. Traffic info and avoiding action given, inbound EMB190 broken off approach but re-positioned when the infringer changed its track. Separation lost.	Jodel DR100 pilot believed that he had remained clear of CAS and was very apologetic.☐ CAA Closure: German LBA advised.
201311521	10/09/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	12nm North East	D	CTA	EMBRAER	Turbofan	2	Infringement of the Gatwick CTA (Class D) by a Jodel DR100 squawking 7047 at 1900ft. Traffic info and avoiding action given, inbound EMB190 broken off approach but re-positioned when the infringer changed its track. Separation lost.	Jodel DR100 pilot believed that he had remained clear of CAS and was very apologetic.☐ CAA Closure: German LBA advised.

201311545	10/09/2013	EGTT : London (FIR)	MAY	10nm NNE	D	CTA	CHAMPION	Reciprocating	1	Infringement of the Gatwick CTA (Class D) by a Champion 8KCAB, being flown by a student pilot with instructor. Loss of separation with an A321. CAIT activated. Traffic info and avoiding action given.	Aircraft receiving a Traffic Service from Farnborough LARS. Champion 8KCAB instructor apologised for the infringement and explained they had misidentified Crowborough.
201311545	10/09/2013	EGTT : London (FIR)	MAY	10nm NNE	D	CTA	AIRBUS	Turbofan	2	Infringement of the Gatwick CTA (Class D) by a Champion 8KCAB, being flown by a student pilot with instructor. Loss of separation with an A321. CAIT activated. Traffic info and avoiding action given.	Aircraft receiving a Traffic Service from Farnborough LARS. Champion 8KCAB instructor apologised for the infringement and explained they had misidentified Crowborough.
201311715	14/09/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	8nm ENE	D	CTR	HUGHES	Reciprocating	1	A Hughes 369E infringed the Southampton CTR (Class D) at approx 1500ft. No offer traffic was affected by the incident.	The pilot intended to keep clear of Southampton's Airspace. However, due to weather conditions east of their track, the aircraft unintentionally and unknowingly infringed Southampton's Control Zone.
201311872	16/09/2013	EGTT : London (FIR)	EGNS (IOM): Isle Of Man/Ronaldsway	W	D	CTR	PIPER	Reciprocating	1	Infringement of the Isle of Man CTR (Class D) by a primary contact only at 3700ft. Aircraft identified by using the turn method as a PA28. Standard separation maintained.	IOM had received details on the aircraft from London FIR and a primary return was observed approaching the zone boundary. Reporter stated that after prompting, the aircraft was transferred to IOM but appeared to already inside the zone on first contact. IOM tried to identify the aircraft using SSR but stated the aircraft appeared unable to squawk. PA28 was eventually identified using the turn method. Pilot was informed they were 6nm inside CAS without ATC clearance. Reporter alleged pilot seemed unaware they were inside CAS.
201311891	18/09/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	9nm NE	D	CTR	FLY BUY ULTRALIGHTS	Reciprocating	1	An Ikarus C42 infringed the Southampton CTR (Class D) at 1800ft. Traffic info was passed to traffic transiting the area and separation minima was maintained.	The instructor noted not having the GPS system switched on and the need for better situational awareness.

201311925	16/09/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	TMZ1	G	Restricted area	ARV	Reciprocating	1	Infringement of the Stansted TMZ1 (Class G) by an ARV1 showing as a primary contact only. Blind calls made with no response.	
201311926	18/09/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	8.5nm NE	D	CTA	GROB	Reciprocating	1	Infringement of the Solent CTA (Class D) by an unknown contact, squawking 7000, indicating 2800ft. Aircraft identified via Mode S as a G109. Traffic info and avoiding action given.	Several blind calls made, without response. A Southampton outbound airliner had their departure delayed by approx 5mins due to the unknown intentions of the infringer. Attributed to poor pilot awareness/map reading.☐ CAA Closure: Appropriate CAA action taken.
201311926	18/09/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	8.5nm NE	D	CTA	UNKNOWN	Unknown	2	Infringement of the Solent CTA (Class D) by an unknown contact, squawking 7000, indicating 2800ft. Aircraft identified via Mode S as a G109. Traffic info and avoiding action given.	Several blind calls made, without response. A Southampton outbound airliner had their departure delayed by approx 5mins due to the unknown intentions of the infringer. Attributed to poor pilot awareness/map reading.☐ CAA Closure: Appropriate CAA action taken.
201311926	18/09/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	8.5nm NE	D	CTA	UNKNOWN	Unknown	2	Infringement of the Solent CTA (Class D) by an unknown contact, squawking 7000, indicating 2800ft. Aircraft identified via Mode S as a G109. Traffic info and avoiding action given.	Several blind calls made, without response. A Southampton outbound airliner had their departure delayed by approx 5mins due to the unknown intentions of the infringer. Attributed to poor pilot awareness/map reading.☐ CAA Closure: Appropriate CAA action taken.
201311953	18/09/2013	EGTT : London (FIR)	EGMD (LYX): Lydd	EG D044 Lydd	G	Danger area	ROCKWELL	Reciprocating	1	Infringement of Danger Area EG D044 (Lydd) by a Rockwell 114 at 1000ft.	Attributed to poor pilot awareness.☐ CAA Closure: Appropriate CAA action taken.

201311954	19/09/2013	EGTT : London (FIR)	Hythe Ranges	EG D141	G	Danger area	PIPER	Reciprocating	1	Infringement of Danger Area EG D141 (Hythe Ranges) by a PA28 at approx 2000ft on two occasions (0950hrs and 0956hrs).	Pilot changed plan from original plan. Incident attributed to lack of spatial awareness and distraction caused by passenger.☐ CAA Closure: Appropriate CAA action taken.
201312045	21/09/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	13nm E	D	CTA	OTHER	Reciprocating	1	A microlight aircraft infringed the Gatwick CTA (Class D) at 1900ft. The inbound circuit was extended in order to maintained separation with the infringing aircraft.	The controller later spoke with the CFI at Hunsden (who dealt with a previous TMZ infringement by this aircraft) and he in turn has spoken to the pilot concerned. The pilot acknowledged that he inadvertently infringed CAS and voluntarily decided not to fly again until he has undertaken some additional instruction and a checkout with the CFI.
201312049	20/09/2013	EGTT : London (FIR)	Bourne End		A	CTR	OTHER	Reciprocating	1	Alleged infringement of the London CTR (Class D) by a microlight. Heathrow northbound and westbound departures were stopped. CAIT activated. Standard separation maintained.	Pilot not familiar with White Waltham circuit.☐ CAA Closure: Appropriate CAA action taken.
201312051	20/09/2013	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	SE	D	CTR	HUGHES	Turboshaft	1	Infringement of the Manchester CTR (Class D) by a Hughes 369 indicating 1200ft. Inbound flight established on the localiser was broken off approach. Traffic info given.	Investigation established that there was an assumption by the helicopter operator that previous operating procedures agreed with ATC remained valid. Contributing factors were the inability of the operator to contact ATC prior to the flight due to changes to the telephone system and a misunderstanding over the allocation of transponder codes following a change of controller.☐ CAA Closure:☐ Both the operator and ATC have revised their procedures as a result of this incident.
201312051	20/09/2013	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	SE	D	CTR	AIRBUS	Turbofan	2	Infringement of the Manchester CTR (Class D) by a Hughes 369 indicating 1200ft. Inbound flight established on the localiser was broken off approach. Traffic info given.	Investigation established that there was an assumption by the helicopter operator that previous operating procedures agreed with ATC remained valid. Contributing factors were the inability of the operator to contact ATC prior to the flight due to changes to the telephone system and a misunderstanding over the allocation of transponder codes following a change of controller.☐ CAA Closure:☐ Both the operator and ATC have revised their procedures as a result of this incident.

201312066	14/09/2013	EGTT : London (FIR)	EGFF (CWL): Cardiff	R/W30	D	CTR	RANS	Reciprocating	1	Infringement of the Cardiff CTR (Class D) by a Rans S6 on final approach. Aircraft is believed to have been part of a formation of two aircraft with a possible non-radio Skyranger.	Investigation established that the Rans S6 called Cardiff Tower and reported being in formation with a Skyranger. The Skyranger had called Cardiff Radar and was positioned onto final. The Skyranger had informed Radar that it was unable to select the Tower frequency. At no time did the Skyranger report in formation with the Rans S6. This was confirmed by review of the relevant RT. Skyranger was given clearance to land, after coordination, by Radar. The Rans S6 was cleared to land by Tower and reported that he was unable to hear the Skyranger's transmissions. At no time did the S6 receive a clearance to enter CAS.☐ CAA Closure:☐ A Fly-In was taking place at Cardiff and a review of the incident has prompted Cardiff to limit the number of non-transponding aircraft at such events. Appropriate unit action taken and pilot of Rans S6 sent an infringement questionnaire.
201312066	14/09/2013	EGTT : London (FIR)	EGFF (CWL): Cardiff	R/W30	D	CTR	OTHER	Reciprocating	1	Infringement of the Cardiff CTR (Class D) by a Rans S6 on final approach. Aircraft is believed to have been part of a formation of two aircraft with a possible non-radio Skyranger.	Investigation established that the Rans S6 called Cardiff Tower and reported being in formation with a Skyranger. The Skyranger had called Cardiff Radar and was positioned onto final. The Skyranger had informed Radar that it was unable to select the Tower frequency. At no time did the Skyranger report in formation with the Rans S6. This was confirmed by review of the relevant RT. Skyranger was given clearance to land, after coordination, by Radar. The Rans S6 was cleared to land by Tower and reported that he was unable to hear the Skyranger's transmissions. At no time did the S6 receive a clearance to enter CAS.☐ CAA Closure:☐ A Fly-In was taking place at Cardiff and a review of the incident has prompted Cardiff to limit the number of non-transponding aircraft at such events. Appropriate unit action taken and pilot of Rans S6 sent an infringement questionnaire.
201312068	22/09/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	4nm N	D	CTA	ZENAIR	Reciprocating	1	Infringement of the Gatwick CTR (Class D) by a Zenair 601 squawking 3767 indicating 1300ft. Separation lost with EMB190 on a SAM departure. Check was put on departures.	Pilot of Zenair misidentified land features. Lack of planning identified.☐ CAA Closure: Appropriate CAA action taken.
201312068	22/09/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	4nm N	D	CTA	EMBRAER	Turbofan	2	Infringement of the Gatwick CTR (Class D) by a Zenair 601 squawking 3767 indicating 1300ft. Separation lost with EMB190 on a SAM departure. Check was put on departures.	Pilot of Zenair misidentified land features. Lack of planning identified.☐ CAA Closure: Appropriate CAA action taken.
201312091	22/09/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	4.5nm SSW	D	CTR	RANS	Reciprocating	1	A Rans S6 infringed the Birmingham CTR (Class D). Traffic info was passed to a helicopter working the area, which got close enough to the aircraft to read the registration number.	The controller made numerous blind calls to the aircraft to no avail.

201312223	24/09/2013	EGTT : London (FIR)	EGUY : Wyton		G	ATZ	OTHER	Reciprocating	1	An unknown microlight infringed the Wyton ATZ (Class G) at 1300ft. Traffic info was passed to other aircraft in the circuit and avoiding action was taken.	
201312287	18/09/2013	EGTT : London (FIR)	Chatteris Drop Zone		G	Other	PIPER	Reciprocating	1	Overflight of Chatteris Drop Zone, with para-dropping in progress, by a PA28. Traffic info and avoiding action given.	Pilot had been warned that the para-dropping aircraft was overhead climbing through FL145 and a steer to the North had been suggested but aircraft did not acknowledge this call. ☐ CAA Closure:☐ Warning letter sent.
201312351	27/09/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	5 NE	D	CTR	SOCATA	Reciprocating	1	A TB10 infringed the Luton CTR (Class D) at 2300ft. Standard separation maintained.	The TB10 was communicating with Farnborough with the quality of the RT transmissions being very poor. The aircraft turned away to the North out of the CTR and returned to its departure point. Possible GPS failure.
201312368	26/09/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	26nm SE	A	CTA	UNKNOWN	Unknown	1	An unknown aircraft infringed the Daventry CTA (Class A) at 4800ft. No other traffic were affected by this incident.	The operator telephoned shortly afterwards, stating the pilot was on a solo flight at the edge of their training area, and that he shouldn't have been above 4200ft. He said he would investigate and telephone back with the exact details when available.
201312371	27/09/2013	EGTT : London (FIR)	EGGP (LPL): Liverpool	8nm Southeast	D	CTR	CESSNA	Reciprocating	1	Infringement of the Liverpool CTR (Class D) by a C150 squawking 7000 at 1500ft. Traffic info given. Separation lost with outbound Liverpool B737.	Aircraft piloted by a student who was undertaking a solo cross country flight transiting the low level corridor to the West of Manchester. No Mode C. The student pilot misidentified landmarks and turned too early onto a Southwesterly course. The pilot was not in receipt of an ATS at the time. The PC controllers had not assimilated the infringer until warned by Liverpool ATC. At the time the B737 called PC, a loss of separation ensued almost immediately. However, the resolution actions taken by PC were insufficient to reduce the severity of the event.☐ CAA Closure: Correspondence between ATC and the flying school was undertaken by PC investigations, with appropriate advice and future mitigations being offered. Additionally, extensive investigation was undertaken with regard to the ATC aspects of the event and multiple unit recommendations were made and accepted.

201312371	27/09/2013	EGTT : London (FIR)	EGGP (LPL): Liverpool	8nm Southeast	D	CTR	BOEING	Turbofan	2	Infringement of the Liverpool CTR (Class D) by a C150 squawking 7000 at 1500ft. Traffic info given. Separation lost with outbound Liverpool B737.	Aircraft piloted by a student who was undertaking a solo cross country flight transiting the low level corridor to the West of Manchester. No Mode C. The student pilot misidentified landmarks and turned too early onto a Southwesterly course. The pilot was not in receipt of an ATS at the time. The PC controllers had not assimilated the infringer until warned by Liverpool ATC. At the time the B737 called PC, a loss of separation ensued almost immediately. However, the resolution actions taken by PC were insufficient to reduce the severity of the event.☐ CAA Closure: Correspondence between ATC and the flying school was undertaken by PC investigations, with appropriate advice and future mitigations being offered. Additionally, extensive investigation was undertaken with regard to the ATC aspects of the event and multiple unit recommendations were made and accepted.
201312388	28/09/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	4 E	D	CTR	SOCATA	Reciprocating	1	A TB10 infringed the Gatwick CTR (Class D) at 1400ft. Departures were halted and an outbound aircraft was turned away. Separation minima was maintained.	The TB10 was communicating with its base airfield, who were contacted by LTCC and asked to turn the aircraft away from CAS. The pilot reported recently purchasing a GPS system, upon realising it was not booted correctly the pilot rebooted the system, and then realised in this process he had lost his bearings and strayed into CAS.
201312399	28/09/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	10nm SW	G	Restricted area	FLIGHT DESIGN	Reciprocating	1	A CTSW infringed the Stansted TMZ 2 (Class G).	Whilst the aircraft was flying through the TMZ it was a primary contact only.
201312403	29/09/2013	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	22nm NE	A	TMA	PIPER	Reciprocating	1	A PA28 infringed the Manchester TMA (Class A) at 3700ft. Standard separation maintained.	The reporting controller attempted to gain the aircraft info by calling local units, as the aircraft only showed as a 7000 squawk on their radar. Once traced, the reporting controller contacted the unit that the aircraft was communicating with and asked it to contact Manchester.
201312406	29/09/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	6nm NW	D	CTR	PIPER	Reciprocating	1	A PA28 infringed the Stansted CTR/CTA (Class D) and subsequently the London City CTA (Class D) at 1800ft. Standard separation maintained,	The two incidents were approx 25mins apart. Operator fully alerted to this incident by ATC and appropriate advice given. The pilots report indicates that in deteriorating weather conditions he became uncertain of his position.

201312411	29/09/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	12nm S	D	CTA	PIPER	Reciprocating	1	A PA28 infringed the Solent CTA (Class D) at 2300ft. Standard separation maintained.	The pilot submitted a full report on this incident.
201312414	29/09/2013	EGTT : London (FIR)	EGLM : White waltham		A	CTR	PIPER	Reciprocating	1	A PA28R infringed the London CTR (Class A) at 2100ft. Separation lost with an airliner inbound to Heathrow establishing on the ILS for 09L..	The aircraft was identified having been requested to squawk and it was then noticed it was infringing CAS. The pilot apologised and turned to leave CAS.
201312414	29/09/2013	EGTT : London (FIR)	EGLM : White waltham		A	CTR	UNKNOWN	Turbofan	2	A PA28R infringed the London CTR (Class A) at 2100ft. Separation lost with an airliner inbound to Heathrow establishing on the ILS for 09L..	The aircraft was identified having been requested to squawk and it was then noticed it was infringing CAS. The pilot apologised and turned to leave CAS.
201312439	20/09/2013	EGTT : London (FIR)	EGKB (BOH): Biggin hill		G	ATZ	PILATUS	Turboprop	1	A PC12 infringed the Biggin Hill ATZ (Class G).	On calling for joining instructions, the pilot was instructed to report at 5 miles for onward clearance in accordance with the MATS Part 2. The next call received from the pilot was when he was downwind having entered the ATZ and joined the circuit without clearance. A PA28 orbiting downwind was required to descend to avoid the PC12.
201312461	28/09/2013	EGTT : London (FIR)	EGNR : Hawarden	6nm W (KEGUN)	A	Other	GROB	Reciprocating	1	A G109B infringed Airway N864 (Class A). Standard separation maintained.	A full pilot report was received on this incident.

201312473	29/09/2013	EGTT : London (FIR)	Little Rissington		G	Other	UNKNOWN	Unknown	1	A light aircraft overflew the Little Rissington glider site at approx 1000ft. A glider was in the circuit at approx 700ft at the time, no avoiding action was required.	No RT comms established.
201312510	30/09/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	11nm SW (TMZ 2)	G	Restricted area	JABIRU	Reciprocating	1	A Jabiru SK infringed the Stansted TMZ 2 (Class G) at 1100ft. Traffic info was passed to inbound aircraft.	The infringing aircraft was communicating with its inbound aerodrome and its transponder was intermittent. Appropriate advice has been given to the pilot as a result of this incident.
201312582	29/09/2013	EGTT : London (FIR)	Hinton Drop Zone		G	Other	DE HAVILLAND	Reciprocating	1	Overflight of Hinton-in-the-Hedges drop zone by two DHC1s at 2000ft flying in formation during para dropping activity.	Pilot misidentified Hinton-in-the-Hedges for Turweston.☐ CAA Closure: Appropriate CAA action taken.
201312582	29/09/2013	EGTT : London (FIR)	Hinton Drop Zone		G	Other	DE HAVILLAND	Reciprocating	1	Overflight of Hinton-in-the-Hedges drop zone by two DHC1s at 2000ft flying in formation during para dropping activity.	Pilot misidentified Hinton-in-the-Hedges for Turweston.☐ CAA Closure: Appropriate CAA action taken.
201312666	03/10/2013	EGTT : London (FIR)	EGKB (BQH): Biggin hill	O/H	G	ATZ	PILATUS	Turboprop	1	Infringement of the Biggin Hill ATZ (Class G) by a PC12 at 2400ft. Separation minima was maintained.	The aircraft was receiving a TS from Farnborough Radar.

201312678	03/10/2013	EGTT : London (FIR)	EGTB : Wycombe Air Park/Booker	O/H	G	ATZ	BEECH	Unknown	1	Infringement of the Wycombe Air Park ATZ (Class G) at 2300ft.	Another aircraft was inbound at 1nm. There was not time for the controller to issue traffic info as there was perceived to be no confliction. The unit the infringing aircraft was working confirmed its height.
201312702	05/10/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	7nm NW	A	CTR	EUROCOPTER	Turboshaft	1	Infringement of the London CTR (Class A) at 1000ft by an EC135. Separation minima was maintained.	No other traffic was reported to be in the area at the time of the incident. The pilot did not receive the instruction to call Northolt when ready to lift. The last instruction he received was to call SVFR which he complied with. The pilot apologised for this event. He did apparently try to call SVFR on the ground but without success. The pilot possibly predicted the clearance he would get (through past experience) and didn't wait until the clearance had been issued formally by ATC. Appropriate advice has been passed to the pilot concerned.
201312709	05/10/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	8nm ENE	D	CTR	UNKNOWN	Unknown	1	Infringement of the Southampton CTR (Class D) by an unknown aircraft (single engined low wing). Standard separation was maintained.	The controller made several blind calls to identify the aircraft (primary response only) to no avail. The aerodrome controllers reported visual with the infringing aircraft.
201312716	06/10/2013	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	10nm SW	D	CTR	ROBINSON	Reciprocating	1	Infringement of the Manchester CTR (Class D) by an R22. Separation minima was maintained.	No other traffic was in the area at the time of the incident and when contacted, the pilot was very apologetic.
201312731	05/10/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	12nm S	D	CTA	CIRRUS	Reciprocating	1	Infringement of the Solent CTA (Class D) at 2300ft by an SR22 (believed). A Southampton departing aircraft was given avoiding action and traffic info. Separation minima was maintained.	The unit that was working the infringing aircraft was identified and shortly after it exited CAS. From the information available it is believed that the pilot concerned misread the relevant chart depicting the base of the Solent CTA.

201312731	05/10/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	12nm S	D	CTA	BRITTEN NORMAN	Reciprocating	3	Infringement of the Solent CTA (Class D) at 2300ft by an SR22 (believed). A Southampton departing aircraft was given avoiding action and traffic info. Separation minima was maintained.	The unit that was working the infringing aircraft was identified and shortly after it exited CAS. From the information available it is believed that the pilot concerned misread the relevant chart depicting the base of the Solent CTA.
201312788	07/10/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	10nm NE	G	Restricted area	OTHER	Reciprocating	1	Infringement of the Stansted TMZ 1 (Class G) by a replica Nieuport Scout 17/23. The aircraft appeared as a primary radar return only.	The aircraft initially appeared as a primary track and was identified by contacting the airfield it appeared to land at. No other traffic was affected by this incident and the pilot appeared to have mistakenly identified Wethersfield for Ridgewell. The pilot has received appropriate advice as a result of this incident.
201312797	04/10/2013	EGTT : London (FIR)	DTY	3 N	A	CTA	CESSNA	Reciprocating	1	Infringement of the Daventry CTA (Class A) by a C182 at 4800ft. Separation minima was maintained.	No other traffic were reported to be in the area at the time of this incident.
201312806	05/10/2013	EGTT : London (FIR)	Little Rissington		G	Other	UNKNOWN	Reciprocating	1	Microlight overflow active gliding site at approx 200ft. No RT contact on A/G frequency.	
201312837	08/10/2013	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	10nm S	D	CTA	CESSNA	Reciprocating	1	Infringement of Manchester CTA (Class D) at 3500ft by a C182. Separation minima was maintained.	No other aircraft were in the area at the time of the incident.

201312840	08/10/2013	EGTT : London (FIR)	EGCB : Manchester/Barton	3nm NW	D	CTA	EVEKTOR AEROTECHNIK	Reciprocating	1	Infringement of the Manchester CTA (Class D) by an EV97 at 2000ft. Traffic info/avoiding action passed to an outbound aircraft and separation minima was maintained.	
201312840	08/10/2013	EGTT : London (FIR)	EGCB : Manchester/Barton	3nm NW	D	CTA	BOEING	Turbofan	2	Infringement of the Manchester CTA (Class D) by an EV97 at 2000ft. Traffic info/avoiding action passed to an outbound aircraft and separation minima was maintained.	
201312932	09/10/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	8nm NW	D	CTR	FLY BUY ULTRALIGHTS	Reciprocating	1	Infringement of the Southampton CTR (Class D) by a C42 at 1800ft. Traffic info was passed to an inbound aircraft and separation minima was maintained.	The instructor reported strong upper winds than anticipated during planning and a busy cockpit environment. He also failed to noticed the descent and turn away from CAS requested by ATC had not been complied with.
201313029	30/08/2013	EGTT : London (FIR)	EGCT : Tilstock	O/H	G	Other	CIRRUS	Reciprocating	1	SR20 overflew the Tilstock parachuting area (Class G) at 4200ft. Traffic info was passed.	The infringing aircraft was passed information by ATC on the paradropping area at approximately 4nm and again at 1nm away and also 0.5nm away. The pilot confirmed he was going to route to the North of the area but did not. The aircraft used for paradropping was on the ground at the time of the incident.
201313071	09/10/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	12nm SSW	D	CTA	CIRRUS	Reciprocating	1	Infringement of the Birmingham CTA (Class D) by an SR20 at 2900ft. Separation minima was maintained.	No other traffic were affected by this incident.

201313090	12/10/2013	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	10nm NW	A	CTR	PIPER	Reciprocating	1	Infringement of the London CTR (Class A) by a PA28 at 1900ft. Standard separation was maintained.	No other aircraft was reported to have been affected by this incident. Information indicates that the pilot became distracted by a high level of noise from his radio. At this point he believes he misidentified Beaconsfield as Wycombe and turned South. Appropriate follow up action has been taken as a result of this incident.
201313211	15/10/2013	EGTT : London (FIR)	EGXY - Syerston		G	ATZ	ROBINSON	Reciprocating	1	Alleged infringement of the Syerston ATZ (Class G) by an R44 at approx 900ft.	The R44 was spotted by other aircraft operating out of Syerston that was actively using both LH and RH circuits. Appropriate CAA action is being taken as a result of this incident.
201313298	17/10/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	12nm WSW	D	CTA	PIPER	Reciprocating	1	Infringement of the Southampton CTA (Class D) by a PA28 at 3200ft. Traffic info/avoiding action was passed to an outbound aircraft and separation was maintained.	PA28 pilot aware of CTA boundaries and suspects failure to compensate for wind resulted in aircraft drifting into CTA. As a result of this incident, pilot will fly at a lower altitude (below 2500ft) in this vicinity to avoid recurrence.
201313298	17/10/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	12nm WSW	D	CTA	DE HAVILLAND	Turboprop	2	Infringement of the Southampton CTA (Class D) by a PA28 at 3200ft. Traffic info/avoiding action was passed to an outbound aircraft and separation was maintained.	PA28 pilot aware of CTA boundaries and suspects failure to compensate for wind resulted in aircraft drifting into CTA. As a result of this incident, pilot will fly at a lower altitude (below 2500ft) in this vicinity to avoid recurrence.
201313328	05/09/2013	EGTT : London (UIR)	TIPAN	5 S	C	Other	DE HAVILLAND	Turbojet	1	Infringement of the London FIR (Class C) by a formation of two Vampire Jets at FL240. Separation minima was maintained.	Although the exact cause of this incident is unclear there appears to have been some ATC confusion involved and also some VFR/IFR flight plan issues.

201313328	05/09/2013	EGTT : London (UIR)	TIPAN	5 S	C	Other	DE HAVILLAND	Turbojet	1	Infringement of the London FIR (Class C) by a formation of two Vampire Jets at FL240. Separation minima was maintained.	Although the exact cause of this incident is unclear there appears to have been some ATC confusion involved and also some VFR/IFR flight plan issues.
201313364	19/10/2013	EGTT : London (FIR)	Crewe		A	TMA	GROB	Reciprocating	1	Infringement of the Manchester TMA (Class A) by a G115 at FL60. Separation minima was maintained.	The aircraft originally showed as a 7000 squawk. The controller tracked the aircraft to its destination where it was matched to a callsign. No other traffic in the area at the time. The pilot reported he was instructing a student at the time of the incident and strayed from their position, the instructor states that he has learnt from the experience.
201313381	19/10/2013	EGTT : London (FIR)	EGSC (CBG): Cambridge	19nm North West	G	ATZ	MAULE	Reciprocating	1	Poor RT and lack of knowledge and procedures displayed by Maule M5 in receipt of a Basic Service. Aircraft flew through Cambridge R/W23 climb out at 4nm at about 1500ft.	Aircraft had been observed on the ATM squawking 7000 on the D/F line and seen to enter the Wyton ATZ where it flew overhead at 1500ft.☐ CAA Closure: The aircraft has subsequently been delivered to Russia for registration and the pilot was a Dutch licence holder. No further action.
201313462	20/10/2013	EGTT : London (FIR)	EGKA (ESH): Shoreham	10 N	A	TMA	BEECH	Reciprocating	1	Infringement of the LTMA-1 by a BE36 at 4000ft. Standard separation maintained.	The pilot, having indicated that he was conducting an ADF tracking exercise overhead Shoreham NDB in Class G airspace, then mistakenly infringed the London TMA-1 Class A controlled airspace. The Shoreham controller did not have access to radar and was unaware of the infringement.☐ CAA Closure:☐ It is unclear why the pilot made the navigational error causing the infringement. No further investigation was possible.
201313530	06/04/2013	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	E	D	CTR	HUGHES	Turboshaft	1	Loss of separation between a Hughes 369, squawking 7000 at 1200ft and an A320 in ILS descent to R/W23R. CAIT activated.	Information indicates that the loss of separation was a direct result of the APP controller allowing the Hughes 369 to operate within CAS without a clearance and identification. The APP controller had not realised the position of the Hughes 369 and mistakenly believed the Hughes 369 would remain outside CAS. It was noted that the Hughes 369 had become airborne directly into CAS without any prior request, this aspect has been brought to the attention of the operator.

201313530	06/04/2013	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	E	D	CTR	AIRBUS	Turbofan	2	Loss of separation between a Hughes 369, squawking 7000 at 1200ft and an A320 in ILS descent to R/W23R. CAIT activated.	Information indicates that the loss of separation was a direct result of the APP controller allowing the Hughes 369 to operate within CAS without a clearance and identification. The APP controller had not realised the position of the Hughes 369 and mistakenly believed the Hughes 369 would remain outside CAS. It was noted that the Hughes 369 had become airborne directly into CAS without any prior request, this aspect has been brought to the attention of the operator.
201313582	20/10/2013	EGTT : London (FIR)	NUGRA	9W	A	CTA	TECNAM	Reciprocating	1	Infringement of the Daventry CTA (Class A) by a P2002JF at 5200ft. Separation minima was maintained.	The instructor reported being on an IMC training flight with a student at the time. Due to poor weather to the West , the instructor chose to avoid their usual training area to the West of the field & fly to the East, keeping track of their position visually using the town of Whitchurch. The strong Southerly wind combined with concentrating on the exercise caused the aircraft to drift further to the North than they intended, or realised.
201313654	24/10/2013	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	LLC	A	TMA	FLY BUY ULTRALIGHTS	Reciprocating	1	Potential infringement of the Manchester TMA (Class A) by C42 at 1300ft, squawking 7000, resulting in loss of separation with a departing airliner at 4000ft on a DESIG SID. CAIT activated.	MACC controller noticed CAIT activate against an unknown aircraft and instructed the departing airliner to turn right heading 065deg, on passing 4000ft. The controller had believed that the combination of the DESIG departure turn, followed by the further right turn instruction would have maintained separation from the infringing aircraft. Controller stated that they did not give avoiding action as it would not have been any different to the initial turn and traffic information was not given as the tracks were diverging and separation increasing.. Operator alerted.
201313654	24/10/2013	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	LLC	A	TMA	AIRBUS	Turbofan	2	Potential infringement of the Manchester TMA (Class A) by C42 at 1300ft, squawking 7000, resulting in loss of separation with a departing airliner at 4000ft on a DESIG SID. CAIT activated.	MACC controller noticed CAIT activate against an unknown aircraft and instructed the departing airliner to turn right heading 065deg, on passing 4000ft. The controller had believed that the combination of the DESIG departure turn, followed by the further right turn instruction would have maintained separation from the infringing aircraft. Controller stated that they did not give avoiding action as it would not have been any different to the initial turn and traffic information was not given as the tracks were diverging and separation increasing. Operator alerted.
201313749	24/10/2013	EGTT : London (FIR)	EGNM (LBA): LEEDS BRADFORD	10 SE	D	CTR	CESSNA	Reciprocating	1	Infringement of the Leeds Bradford CTR (Class D) by a C152 at 2700ft. Separation minima was maintained.	Once identified, the aircraft was given transit not above 3000ft.

201313971	29/10/2013	EGTT : London (FIR)	EGFF (CWL): Cardiff	7.5nm NW	D	CTR	PIPER	Reciprocating	1	Infringement of the Cardiff CTR (Class D) by a PA28. Separation minima was maintained.	No other aircraft were in the area at the time of the incident. The controller immediately contacted the pilot and told him he had entered CAS without clearance and asked his intentions. He replied he would, "immediately leave to the North." which he promptly did.
201314028	31/10/2013	EGTT : London (FIR)	Heysham	EG R444	G	Restrict ed area	AVIONS ROBIN	Reciprocating	1	Infringement of EG R444 (Heysham) Class G by an HR100 squawking 0450 with Mode C indicating 1400ft. Pilot informed.	
201314041	30/10/2013	EGTT : London (FIR)	DAYNE	10nm NE	A	TMA	CESSNA	Reciprocating	1	Believed infringement of the Manchester TMA (Class A) by a C152 at 4000ft. Separation minima was maintained.	No other aircraft were in the area at the time of the incident.
201314064	01/11/2013	EGTT : London (FIR)	GARMI	1.5W	G	Danger area	PIPER	Reciprocating	1	Infringement of Danger Area D036 by a PA28 at 4000ft squawking 7000. Pilot contacted London FIR whilst inside the DA. A coordinated clearance was issued for the aircraft to cross the DA.	D036 NOTAMed active, however, no live firings were taking place at the time of the infringement.☐ CAA Closure:☐ Pilot error. Appropriate CAA action had been taken with regard to the pilot concerned.
201314173	04/11/2013	EGTT : London (FIR)	NEDUL	4 NE	D	CTA	FLIGHT DESIGN	Reciprocating	1	Infringement of the Solent CTA (Class D) by a CTSW at 3100ft. Separation minima was maintained.	Numerous blind calls were made to the aircraft to no avail. A subsequent report from the pilot states that due to dense cloud and knowing of the high masts approx 10km E of the Needles, he thought it best to climb above the clouds in order to maintain VFR and inadvertently entered the CTA where the base is 2000ft. The pilots report indicates that the appropriate lessons have been learnt.

201314276	05/11/2013	EGTT : London (FIR)	EGWC : Cosford	7 ENE	A	CTA	GROB	Reciprocating	1	Infringement of the Daventry CTA (Class A) by a Grob Tutor at an indicated FL52. Separation minima was maintained.	
201314325	07/11/2013	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	6nm SSE	D	CTR	CESSNA	Reciprocating	1	Infringement of the East Midlands CTR (Class D) by a C172 at 2500ft. Separation minima was maintained. The aircraft returned to its departure aerodrome.	The aircraft had became lost and was transferred to D&D Cell where a position fix and steers given until the pilot was visual with Leicester airfield.
201314427	10/11/2013	EGTT : London (FIR)	EGTO (RCS): Rochester	2nm W	A	TMA	BEAGLE	Reciprocating	1	Infringement of the LTMA (Class A) by a Beagle B121 at 3000ft. Separation minima was maintained.	The aircraft descended to leave CAS shortly afterwards and the controller initiated tracing action. The pilot believes he may have inadvertently climbed whilst distracted when changing from Southend ATC to Farnborough LARS.
201314430	10/11/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	9 NE	D	CTR	UNKNOWN	Reciprocating	1	Infringement of the Southampton CTR (Class D) by an unknown aircraft (possibly a motor glider). Standard separation maintained.	Traffic info was passed to another aircraft in the area.
201314431	10/11/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted	14nm SW	D	CTA	DIAMOND	Reciprocating	1	Infringement of the Stansted CTA (Class D) at 2000ft by a DA40. Separation minima was maintained.	No other aircraft were reported to have been affected by this incident.

201314437	10/11/2013	EGTT : London (FIR)	MIRSI-ROSUN		A	TMA	FLY BUY ULTRALIGHTS	Reciprocating	1	Infringement of the Manchester TMA (Class A) by a C42 squawking 7000 with altitude showing up to 4600ft. CAIT activated. Four aircraft were vectored and coordinated to maintain 5nm lateral separation. Several unsuccessful blind calls were made.	CAA Closure:☐ Pilot error. Poor navigation. Additional navigation training.
201314508	10/11/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	CTA 1	D	CTA	CESSNA	Reciprocating	1	Infringement of the Birmingham CTA 1 (Class D) by a C172 at 2400ft. Traffic info given and a turn given to a Birmingham outbound B737 in order to maintain separation.	The pilot was contacted after the controller made a blind call and he thought he was further North than he was.
201314508	10/11/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	CTA 1	D	CTA	BOEING	Turbofan	2	Infringement of the Birmingham CTA 1 (Class D) by a C172 at 2400ft. Traffic info given and a turn given to a Birmingham outbound B737 in order to maintain separation.	The pilot was contacted after the controller made a blind call and he thought he was further North than he was.
201314518	10/11/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	NE	D	CTA	ROBINSON	Reciprocating	1	Infringement of the Gatwick CTA (Class D) by an R44 at 2300ft. Traffic info was passed to an inbound B737 and separation minima was maintained.	The B737 was broken off the approach at approx 10nm DME and a further two aircraft were orbited downwind until the R44 had left CAS. The R44 pilots report indicates that a loss of attention to vertical navigation resulted in this infringement of CAS.
201314518	10/11/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	NE	D	CTA	BOEING	Turbofan	2	Infringement of the Gatwick CTA (Class D) by an R44 at 2300ft. Traffic info was passed to an inbound B737 and separation minima was maintained.	The B737 was broken off the approach at approx 10nm DME and a further two aircraft were orbited downwind until the R44 had left CAS. The R44 pilots report indicates that a loss of attention to vertical navigation resulted in this infringement of CAS.

201314572	12/11/2013	EGTT : London (FIR)	Radstock	1nm North	D	CTA	DIAMOND	Reciprocating	1	Infringement of the Bristol CTA-3 (Class D) by a HK36 squawking 7000 at 3000ft. Several attempts were made to contact the aircraft before it entered CAS but with no response.	Standard separation maintained.☐ CAA Closure:☐ No CAA action taken. Closed due to elapsed time.
201314573	12/11/2013	EGTT : London (FIR)	EGGD (BRS): Bristol/Lulsgate	20nm ENE	D	CTA	PIPER	Reciprocating	1	Infringement of the Bristol CTA-8 (Class D) at 5200ft by a PA28. Separation minima was maintained.	The instructor reported that he failed to allow for the strong northerly winds and tried to achieve a lot of tasks in a short period of time.
201314626	13/11/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	10nm E	D	CTR	PIPER	Reciprocating	1	Infringement of the Gatwick CTR and CTA (Class D) by a PA28 squawking 7000, resulting in two Gatwick inbound airliners being broken off the approach to R/W26L. Traffic info and avoiding action given. Standard separation maintained.	ATC made two blind transmissions without response. Reporter noted that the PA28 pilot had appeared not to have selected Mode C ALT or obtained a service from Farnborough LARS. PA28 pilot's report revealed that they had not made contact with Farnborough LARS due to a headphone malfunction, and in their hurry to replace the headset the pilot had misidentified a land feature and subsequently infringed Gatwick airspace. PA28 pilot also made reference to a wind error during their pre-flight planning. Operator fully alerted.
201314626	13/11/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	10nm E	D	CTR	DE HAVILLAND	Turboprop	2	Infringement of the Gatwick CTR and CTA (Class D) by a PA28 squawking 7000, resulting in two Gatwick inbound airliners being broken off the approach to R/W26L. Traffic info and avoiding action given. Standard separation maintained.	ATC made two blind transmissions without response. Reporter noted that the PA28 pilot had appeared not to have selected Mode C ALT or obtained a service from Farnborough LARS. PA28 pilot's report revealed that they had not made contact with Farnborough LARS due to a headphone malfunction, and in their hurry to replace the headset the pilot had misidentified a land feature and subsequently infringed Gatwick airspace. PA28 pilot also made reference to a wind error during their pre-flight planning. Operator fully alerted.
201314626	13/11/2013	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	10nm E	D	CTR	AIRBUS	Turbofan	2	Infringement of the Gatwick CTR and CTA (Class D) by a PA28 squawking 7000, resulting in two Gatwick inbound airliners being broken off the approach to R/W26L. Traffic info and avoiding action given. Standard separation maintained.	ATC made two blind transmissions without response. Reporter noted that the PA28 pilot had appeared not to have selected Mode C ALT or obtained a service from Farnborough LARS. PA28 pilot's report revealed that they had not made contact with Farnborough LARS due to a headphone malfunction, and in their hurry to replace the headset the pilot had misidentified a land feature and subsequently infringed Gatwick airspace. PA28 pilot also made reference to a wind error during their pre-flight planning. Operator fully alerted.

201314733	15/11/2013	EGTT : London (FIR)	EGXY: Syerston	O/H	G	ATZ	WESTLAND	Turboshaft	1	Infringement of the Syerston ATZ (Class G) at 700ft by a Gazelle helicopter. The aircraft was not in communication with Syerston.	No other traffic were reported to be in the area at the time of the incident.
201314740	15/11/2013	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	9nm West	D	CTR	DIAMOND	Reciprocating	1	Infringement of the Manchester CTR (Class D) by a DA40 squawking 7000 at 1600ft. Separation lost with PA31 on a WAL departure. Traffic info and avoiding action given.	Pilot report indicates that the pilot commenced climb at too early a stage.☐ CAA Closure:☐ The root causes of this incident were poor planning, unfamiliar route, and reliance on GPS. Appropriate CAA action taken.
201314740	15/11/2013	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	9nm West	D	CTR	PIPER	Reciprocating	2	Infringement of the Manchester CTR (Class D) by a DA40 squawking 7000 at 1600ft. Separation lost with PA31 on a WAL departure. Traffic info and avoiding action given.	Pilot report indicates that the pilot commenced climb at too early a stage.☐ CAA Closure:☐ The root causes of this incident were poor planning, unfamiliar route, and reliance on GPS. Appropriate CAA action taken.
201314813	14/11/2013	EGTT : London (FIR)	EGUY : Wyton		G	ATZ	PIPER	Reciprocating	1	Infringement of the Wyton ATZ (Class G) at 1500ft by a PA28R. Separation minima was maintained and traffic info was passed.	A short while later, the pilot of the PA28R called to apologise for his error.
201314843	15/11/2013	EGTT : London (FIR)	Portsmouth	EG D036	G	Danger area	PIPER	Reciprocating	1	Infringement of active Danger Area EG D036 (Portsmouth) by a PA28 at 4000ft, squawking 7000.	PA28 entered EG D036 and contacted military ATC requesting a service. The pilot was informed they had entered an active Danger Area without a clearance and was advised that in future they should obtain a crossing clearance prior to entering.

201314902	19/11/2013	EGTT : London (FIR)	EG D117		G	Danger area	CESSNA	Reciprocating	1	Infringement of active Danger Area EG D117 (Pendine) by a C172 squawking 1177, in receipt of a Basic Service from LACC FIS. Check fire initiated.	C172 pilot informed LACC FIS that they were avoiding a large squall. LACC FIS transferred the C172 to Pembrey Range. ☐ CAA Closure:☐ The root cause of this incident is considered to be that the pilot failed to take into account the close proximity of the Danger Area when pre-flight planning. Appropriate CAA action has been taken.
201314918	19/11/2013	EGTT : London (FIR)	MIRSI		A	TMA	GROB	Reciprocating	1	Infringement of the Manchester TMA (Class A) by a Grob G115 at FL55. Separation minima was maintained with an aircraft routed away from the infringer.	.
201314934	19/11/2013	EGTT : London (FIR)	WAL	4 N	D	CTA	SOCATA	Reciprocating	1	Infringement of the Liverpool CTA (Class D) by a TB10 at 3200ft. Separation minima was maintained.	An inbound B737 had its descent stopped in order to maintain separation. When the pilot of the infringing aircraft was informed that he had entered CAS he stated that he was unable to get in on the frequency earlier. He was subsequently told that he must remain outside CAS when no clearance has been issued by ATC.
201315076	21/11/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	8nm North East	D	CTR	WESTLAND	Turboshaft	1	Infringement of the Southampton CTR (Class D) by a Westland Scout at 500ft. Aircraft was observed tracking through an 8nm final for R/W26. Standard separation maintained.	Appropriate CAA action is being taken as a result of this incident.
201315146	22/11/2013	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	10nm West	D	CTR	CESSNA	Reciprocating	1	Infringement of the Manchester CTR (Class D) by a Cessna 305 squawking 7366 with unverified Mode C showing 1100ft. Traffic info given. Separation lost. B737 vectored for ILS approach was broken off and re-positioned.	Pilot was advised that he was going to enter CAS but replied that the private site on his map was outside the zone but that he would turn away to the North. Traffic was coordinated with DIR who were already aware and during this conversation the aircraft entered the zone by 1/4nm.☐ Supplementary 10/02/14:☐ It is concluded that this event was caused by the pilot of not realising that in order to operate over his intended destination he would infact, very likely penetrate the Manchester CTR because of the closeness of the destination to the edge of CAS. When he realised that he was about to penetrate the CTR he turned away, however, due to the call from the Approach controller causing a distraction, the turn executed did not resolve the situation in time (poor manual handling); the aircraft thus entered the Manchester CTR without a clearance.

201315146	22/11/2013	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	10nm West	D	CTR	BOEING	Turbofan	2	Infringement of the Manchester CTR (Class D) by a Cessna 305 squawking 7366 with unverified Mode C showing 1100ft. Traffic info given. Separation lost. B737 vectored for ILS approach was broken off and re-positioned.	Pilot was advised that he was going to enter CAS but replied that the private site on his map was outside the zone but that he would turn away to the North. Traffic was coordinated with DIR who were already aware and during this conversation the aircraft entered the zone by 1/4nm. Supplementary 10/02/14: It is concluded that this event was caused by the pilot of not realising that in order to operate over his intended destination he would infact, very likely penetrate the Manchester CTR because of the closeness of the destination to the edge of CAS. When he realised that he was about to penetrate the CTR he turned away, however, due to the call from the Approach controller causing a distraction, the turn executed did not resolve the situation in time (poor manual handling); the aircraft thus entered the Manchester CTR without a clearance.
201315152	22/11/2013	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	14nm NW (Leigh VRP)	D	CTR	FLY BUY ULTRALIGHTS	Reciprocating	1	Infringement of the Manchester CTR (Class D) at 1800ft by an Ikarus C42. Separation minima was maintained.	The aircraft was identified through the controller contacting a local airfield and getting the aircraft to contact him. The RT quality was poor. No other aircraft were reported to have been affected by this incident.
201315178	22/11/2013	EGTT : London (FIR)	EGTK (OXF): Oxford/Kidlington	Climb out R/W01	G	ATZ	CESSNA	Reciprocating	1	Believed infringement of the Oxford/Kidlington ATZ (Class G) by a C182 squawking 4520 at 1500ft. Aircraft came into conflict with a departing C560.	CAA Closure: Pilot error. Not up to date on local procedures. Interviewed and retraining specified.
201315178	22/11/2013	EGTT : London (FIR)	EGTK (OXF): Oxford/Kidlington	Climb out R/W01	G	ATZ	CESSNA	Turbofan	2	Believed infringement of the Oxford/Kidlington ATZ (Class G) by a C182 squawking 4520 at 1500ft. Aircraft came into conflict with a departing C560.	CAA Closure: Pilot error. Not up to date on local procedures. Interviewed and retraining specified.
201315185	23/11/2013	EGTT : London (FIR)	BUR	1nm NW	A	CTR	PIPER	Reciprocating	1	Infringement of the London CTR (Class A) by a PA28 squawking 5032 at 1500ft. Standard separation maintained.	The PA28's squawk then changed to 7000 and the aircraft routed Southwest into the White Waltham ATZ at 1700ft. Heathrow departures were stopped until the PA28 had left CAS. The PA28 had been flown by a solo student pilot. Information indicates that the PA28 pilot had drifted to the left of their intended track. Farnborough North had called the pilot to warn them of the Wycombe ATZ ahead. The pilot had been uncertain of some of the ATC RT phraseology and had been unable to fix their position. The pilot subsequently contacted the D&D cell who gave the pilot a heading back to White Waltham, where the aircraft landed. Operator alerted and further training is to be given.

201315187	23/11/2013	EGTT : London (FIR)	BCN	10nm North West	A	Other	DIAMOND	Reciprocating	1	Infringement of Airway N864 by a HK36 squawking 7000 indicating FL95. Several blind calls were made with no response.	CAA Closure:☐ Navigation error. Warning letter sent.
201315196	24/11/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	7nm NW	D	CTA	FLY BUY ULTRALIGHTS	Reciprocating	1	Infringement of the Solent CTA (Class D) by an Ikarus C42 at 3500ft. Separation minima was maintained.	A DHC8 was held on the runway for departure until the infringer was clear. The pilot of the infringing aircraft reports that he was going to fly a well followed route at 1500ft following railway and river lines, which would have kept him well clear of CAS, when on this route he avoided following a compass course, to ensure he always knew where he was. The pilot was unable to raise Middle Wallop, but whilst above scattered cloud he could fly at 3600ft allowing him to fly over the MATZ. The pilot assumed this route would keep him even further away from Southampton's airspace but cloud cover thickened and deflected his course. The pilot was descending below broken cloud when he infringed. The appropriate lessons appear to have been learnt as a result of this incident.
201315196	24/11/2013	EGTT : London (FIR)	EGHI (SOU): Southampton	7nm NW	D	CTA	DE HAVILLAND	Turboprop	2	Infringement of the Solent CTA (Class D) by an Ikarus C42 at 3500ft. Separation minima was maintained.	A DHC8 was held on the runway for departure until the infringer was clear. The pilot of the infringing aircraft reports that he was going to fly a well followed route at 1500ft following railway and river lines, which would have kept him well clear of CAS, when on this route he avoided following a compass course, to ensure he always knew where he was. The pilot was unable to raise Middle Wallop, but whilst above scattered cloud he could fly at 3600ft allowing him to fly over the MATZ. The pilot assumed this route would keep him even further away from Southampton's airspace but cloud cover thickened and deflected his course. The pilot was descending below broken cloud when he infringed. The appropriate lessons appear to have been learnt as a result of this incident.
201315282	25/11/2013	EGTT : London (FIR)	EGLD : Denham	5nm W	A	CTR	PIPER	Reciprocating	1	Infringement of London CTR (Class A) by a PA28 at 1000ft. Separation minima was maintained but departures were delayed from Heathrow until the aircraft was clear.	The aircraft was initially squawking 7000, but was eventually identified but the controller calling Denham aerodrome. Heathrow departures were resumed approx 4mins later. The pilot involved in this infringement was hiring for the first time having just passed his PPL skill test. On this flight, he went out to the local area, navigating to Finmere, then returning to Denham via Princes Risborough and Bovingdon. It was on the return leg from Princes Risborough to Bovingdon where the pilot became disoriented. The plan was to fly to Bovingdon and then on to St. Giles VRP (Denham was operating on R/W06). The pilot saw Bovingdon but instead of turning overhead, turned approximately 2nm early. This led to him being West of his desired track and so missed the VRP. He compounded the mistake by failing to head North once his time for the leg had over run. Once the pilot landed, the incident was discussed and the pilot was very apologetic. The pilot will now fly a sortie that focuses on the rejoin procedure for Denham to reiterate what he learned during his PPL training.
201315340	26/11/2013	EGTT : London (FIR)	EGHH (BOH): Bournemouth/Hurn	10nm E	D	CTA	AEROSPATIALE	Turboshaft	1	Infringement of the Southampton CTA (Class D) by an AS350 at 2500ft, squawking 7375, resulting in a conflict with a DA42. Traffic info and avoiding action given.	CAA Closure:☐ No further details could be provided and the pilot on the day had little information to assist. No further CAA action.

201315340	26/11/2013	EGTT : London (FIR)	EGHH (BOH): Bournemouth/Hurn	10nm E	D	CTA	DIAMOND	Reciprocating	2	Infringement of the Southampton CTA (Class D) by an AS350 at 2500ft, squawking 7375, resulting in a conflict with a DA42. Traffic info and avoiding action given.	CAA Closure:☐ No further details could be provided and the pilot on the day had little information to assist. No further CAA action.
201315547	29/11/2013	EGTT : London (FIR)	HEN	3.5nm W	A	TMA	CESSNA	Reciprocating	1	Infringement of the LTMA (Class A) by an aircraft squawking 7000, indicating 4500ft. Aircraft identified as a C152. CAIT activated. Standard separation maintained.	C152 pilot later acknowledged the infringement and reported that the wind had increased from 30kts to 45kts which had resulted in the aircraft drifting further East than intended.
201315577	30/11/2013	EGTT : London (FIR)	EGGP (LPL): Liverpool	E	D	CTR	CESSNA	Reciprocating	1	Infringement of the Liverpool CTR (Class D) by a C150 squawking 7366 at 1300ft. Standard separation maintained.	Aircraft in receipt of a Basic Service was undertaking a navigational exercise. Pilot was instructed to turn East immediately and head East to exit CAS remaining VFR, but was seen heading South East not East as instructed and was again told to turn East to exit CAS.
201315583	16/11/2013	EGTT : London (FIR)	EGTO (RCS): Rochester	5nm SE	A	TMA	JODEL	Reciprocating	1	Infringement of the LTMA (Class A) by an unknown aircraft squawking 7000 indicating 3300ft. Aircraft identified as a Jodel D117. Standard separation maintained.	Appropriate ATC action was taken to vector London City traffic away from the infringer. Jodel D117 pilot later commented that a drop in oil pressure had been indicated and whilst being fixated on closely monitoring the oil pressure they had inadvertently gained height. An indication fault was discovered once the aircraft had landed. Pilot stated that their concerns over engine failure had overridden their altitude awareness.
201315584	26/11/2013	EGTT : London (FIR)	EGLD : Denham	4nm West	A	CTR	BELL	Turboshaft	1	Infringement of the London CTR (Class A) by a helicopter squawking 7000 at 1000ft. Heathrow departures were briefly suspended. Standard separation maintained.	Northolt established from Denham that the helicopter was a visitor and aircraft soon turned towards Denham and landed. Departures were then resumed.

201315587	30/11/2013	EGTT : London (FIR)	SAM	8nm SE	D	CTA	PIPER	Reciprocating	1	Infringement of the Solent CTA (Class D) by an unknown aircraft squawking 7000, climbing to 3200ft. Aircraft identified via Farnborough as a PA28. Standard separation maintained.	Blind transmissions made without response. Information indicates that the PA28 was observed to descend below CAS soon after the infringement. The pilot did not contact Solent Radar during or after the incident.
201315716	03/12/2013	EGTT : London (FIR)	MIRSI	5nm SE	D	CTR	OTHER	Reciprocating	1	Infringement of the Manchester CTR (Class D) by an unknown aircraft squawking 7000, indicating 2000ft. Aircraft identified as a Gyroplane. CAIT activated. Standard separation maintained.	At approx 1112hrs CAIT activated indicating that there was an infringement 5nm SE of MIRSI at altitude 2000ft descending 1400ft above the northern section of the low level corridor. Liverpool rang to say they were not working or aware of the traffic. Reporter contacted Manchester Approach to see if they were working it which they said they weren't but would speak to Barton. A Manchester inbound via MIRSI descending FL60 was coordinated with Manchester APC for a heading off MIRSI to avoid any potential conflict should the aircraft take up the MIRSI hold. As workload was low and there was plenty of time to resolve any potential conflict there was no safety impact with the infringer. Manchester radar out of service which resulted in Manchester APC only observing intermittent radar contact with the infringer. Information on the aircraft obtained over telephone by Manchester Watch Manager after speaking to Barton. ☐ Supplementary 09/01/14:☐ At approximately 1110z a 7000 squawk was observed just south of Wigan, in the Liverpool AOR, indicating altitude 2000ft. As I wasn't speaking to any aircraft I used the target information to obtain the aircraft registration and advised the APC S controller of the information. Soon after the radar return disappeared from our screens. At that time an airliner was inbound from the SW and WAL sector requested a heading with APC S to avoid as their radars were still showing the aircraft with an AIW. The aircraft returned to our radar approximately 5 miles later and was heading towards EGCB. I called the FISO there to see if they were speaking to the aircraft and requested if they could get the pilot to call our WM
201315716	03/12/2013	EGTT : London (FIR)	MIRSI	5nm SE	D	CTR	AIRBUS	Turbofan	2	Infringement of the Manchester CTR (Class D) by an unknown aircraft squawking 7000, indicating 2000ft. Aircraft identified as a Gyroplane. CAIT activated. Standard separation maintained.	At approx 1112hrs CAIT activated indicating that there was an infringement 5nm SE of MIRSI at altitude 2000ft descending 1400ft above the northern section of the low level corridor. Liverpool rang to say they were not working or aware of the traffic. Reporter contacted Manchester Approach to see if they were working it which they said they weren't but would speak to Barton. A Manchester inbound via MIRSI descending FL60 was coordinated with Manchester APC for a heading off MIRSI to avoid any potential conflict should the aircraft take up the MIRSI hold. As workload was low and there was plenty of time to resolve any potential conflict there was no safety impact with the infringer. Manchester radar out of service which resulted in Manchester APC only observing intermittent radar contact with the infringer. Information on the aircraft obtained over telephone by Manchester Watch Manager after speaking to Barton. ☐ Supplementary 09/01/14:☐ At approximately 1110z a 7000 squawk was observed just south of Wigan, in the Liverpool AOR, indicating altitude 2000ft. As I wasn't speaking to any aircraft I used the target information to obtain the aircraft registration and advised the APC S controller of the information. Soon after the radar return disappeared from our screens. At that time an airliner was inbound from the SW and WAL sector requested a heading with APC S to avoid as their radars were still showing the aircraft with an AIW. The aircraft returned to our radar approximately 5 miles later and was heading towards EGCB. I called the FISO there to see if they were speaking to the aircraft and requested if they could get the pilot to call our WM
201315759	04/12/2013	EGTT : London (FIR)	EGFA : WEST WALES/ABERP ORTH	6.5nm East	G	Danger area	BELL	Turboshaft	1	Infringement of Danger Area D202 (Aberporth) by a helicopter squawking 7000 indicating altitude 2000ft. Several blind transmissions were made.	Helicopter subsequently contacted ATC and pilot apologised and was advised of the D202 complex airspace, Aberporth radar frequencies and the provision of ATSOCAS.
201315825	06/12/2013	EGTT : London (FIR)	EGLC (LCY): London city	14 SE	A	TMA	CESSNA	Reciprocating	1	Infringement of the LTMA (Class A) by a C172 at 2800ft. City inbound EMB170 broken off approach. Avoiding action and traffic info given. Standard separation maintained.	Investigations have revealed that the root cause of this incident was poor planning and weather awareness.☐ CAA Closure:☐ Appropriate CAA action has been taken.

201315825	06/12/2013	EGTT : London (FIR)	EGLC (LCY): London city	14 SE	A	TMA	EMBRAER	Turbofan	2	Infringement of the LTMA (Class A) by a C172 at 2800ft. City inbound EMB170 broken off approach. Avoiding action and traffic info given. Standard separation maintained.	Investigations have revealed that the root cause of this incident was poor planning and weather awareness.☐ CAA Closure:☐ Appropriate CAA action has been taken.
201315854	07/12/2013	EGTT : London (FIR)	Manchester LLR		D	CTR	PIPER	Reciprocating	1	Infringement of the Manchester CTR (Class D) by a PA32 squawking 7000, indicating 1400ft. CAIT activated.	Supplementary 16/12/13:☐ Following an uneventful flight details were passed to PA32 pilot to inform him that he had entered corridor controlled airspace at 1400ft. This came somewhat as a surprise to the pilot as they had planned this route very carefully given it was their first flight in the low level corridor. The QNH was set and every care was taken to remain below 1300ft. Pilot now believes that the encoder for the transponder in the aircraft is over reading and the aircraft will be going to maintenance to be checked for errors.
201315881	07/12/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	5nm SSE	D	CTR	PIPER	Reciprocating	1	Infringement of the Luton CTR (Class D) by a PA28 squawking 5032, indicating 2300ft. CAIT activated. Standard separation maintained.	Supplementary 09/12/13: ☐ While plugged in as the LARS N controller (North and East bandboxed) and coming out of a busy session, the controller noticed a 5032 squawk infringing into the Luton CTR from the South on a North Easterly track at approx 2000ft QNH. At exactly the same moment the controller noticed the Luton line ringing. The controller answered the phone while advising the PA28 to turn South immediately (the controller then went back to the pilot to advise 'if able to turn South') and advised Luton if they were calling about the 5032 they were turning South. Luton advised if the pilot wanted to stay on that track then to call them. The controller acknowledged this but saw the PA28 turning South. On speaking with the pilot they sounded very nervous and unsure of their position, the controller tried to calm the pilot and gave them several position reports reference to Panshanger. In the Panshanger overhead the pilot seemed happy with their navigation.
201315931	09/12/2013	EGTT : London (FIR)	Ware	2nm N	D	CTA	PIPER	Reciprocating	1	Infringement of the Stansted CTA (Class D) by an unknown aircraft squawking 5030, indicating 1900ft. Aircraft identified via Farnborough LARS as a PA28. Standard separation maintained.	
201316142	13/12/2013	EGTT : London (FIR)	MAY	6 SW	A	TMA	PIPER	Reciprocating	1	Infringement of the LTMA (Class A) by a PA28 at 3900ft resulting in a loss of separation against an inbound airliner. Traffic info given.	Investigations into this incident revealed that the root cause was poor awareness.☐ CAA Closure: ☐ Appropriate CAA action has been taken.

201316142	13/12/2013	EGTT : London (FIR)	MAY	6 SW	A	TMA	UNKNOWN	Turbofan	2	Infringement of the LTMA (Class A) by a PA28 at 3900ft resulting in a loss of separation against an inbound airliner. Traffic info given.	Investigations into this incident revealed that the root cause was poor awareness.☐ CAA Closure: ☐ Appropriate CAA action has been taken.
201316275	22/11/2013	EGTT : London (FIR)	EGOS : Shawbury		G	ATZ	UNKNOWN	Unknown	1	Infringement of the Shawbury ATZ (Class G) by an unknown aircraft squawking 7000, at approx 1000ft.	It was witnessed that an unknown aircraft operating within the Sleaf ATZ, veered outside the ATZ and penetrated the Shawbury ATZ. After much deliberation and investigation as to whom the pilot may be, it was decided that the pilot in question was performing circuits at Sleaf and did not adhere to the standard pattern. The Shawbury Approach controller alerted the Supervisor in a professional manner and the correct action was taken on their part. Sleaf operations stated that they were experiencing a high number of visitors that day and reporter believes this to be a direct link to the cause. Shawbury have a Letter of Agreement with Shropshire Aerodrome club operating at Sleaf to maintain inside the Sleaf ATZ until NOT BELOW 2000ft, and to contact Shawbury RADAR, if departing on a track between the radials 350-210. Although the aircraft in question was not departing the Sleaf ATZ, it was apparent he was not aware of the reasoning for the Letter of Agreement, and thus did not comply, leading to the Airspace Infringement.
201316288	24/11/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	8nm South	D	CTA	PIPER	Reciprocating	1	Infringement of the Birmingham CTA-2 (Class D) by an aircraft squawking 0010 observed climbing through 1500ft. Standard separation maintained.	Two blind transmissions were sent before pilot responded and was issued a squawk of 0401 to identify the aircraft. Pilot was requested to call ATC after landing, and pilot left the frequency (to freecall Wolverhampton).
201316320	17/12/2013	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	3NW	D	CTR	BELL	Turboshaft	1	Infringement of the Manchester CTR (Class D) by a helicopter squawking 7000, resulting in loss of separation with a Manchester outbound airliner. CAIT activated.	The helicopter had called Manchester ATC requesting to transit the LLR (Low Level Route) Southbound under a FIS. The controller informed the helicopter they would receive a Basic Service and instructed them to remain outside CAS. The helicopter subsequently infringed CAS. Reporter stated that avoiding action had been deemed unnecessary as the airliner had already been moving away from the helicopter. ☐ Supplementary 14/01/14: Pilots report.☐ At the time of the incident I was navigating with low sun directly ahead of me and this made it difficult for me to concentrate on flight and map reading.
201316320	17/12/2013	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	3NW	D	CTR	AIRBUS	Turbofan	2	Infringement of the Manchester CTR (Class D) by a helicopter squawking 7000, resulting in loss of separation with a Manchester outbound airliner. CAIT activated.	The helicopter had called Manchester ATC requesting to transit the LLR (Low Level Route) Southbound under a FIS. The controller informed the helicopter they would receive a Basic Service and instructed them to remain outside CAS. The helicopter subsequently infringed CAS. Reporter stated that avoiding action had been deemed unnecessary as the airliner had already been moving away from the helicopter. ☐ Supplementary 14/01/14: Pilots report.☐ At the time of the incident I was navigating with low sun directly ahead of me and this made it difficult for me to concentrate on flight and map reading.

201316352	17/12/2013	EGTT : London (FIR)	EGLM : White waltham		A	CTR	GRUMMAN	Reciprocating	1	Infringement of the London CTR (Class A) by an unknown aircraft, indicating 1700ft. Aircraft identified as a Grumman AA5. CAIT activated. Traffic info and avoiding action given.	Reporter was working as OJTI with student controlling working Heathrow FIN. At approx 12.13 an unknown radar return activated CAIT tracking North East, indicating 1700ft. Mode S gave the aircraft details as a Grumman AA5. In confliction was an A319, which was heading 060 but not yet instructed to establish the localiser for 09L. No action was taken with the unknown aircraft at 1700ft. Reporter could hear Thames Radar on the phone line behind them, attempting to establish which ATSU was working the Grumman AA5, and requesting it descend to 1500ft on London QNH 1024. Grumman AA5 then climbed to 1800ft, and the A319 was immediately instructed to turn right 095 degrees to pass clear behind. Grumman AA5 continued climb to 2000ft, and A319 was issued traffic information and instructed to turn right IMMEDIATELY. Along with this, reporter reduced the A319's speed to 160kts as reporter deemed the safest option was to continue the approach to land 09L, passing clear behind of the infringing traffic. A B777 which was on a closing heading for 09L at 4000ft was instructed to continue the heading 120 and not establish the localiser, to maintain 5nm from the infringing traffic. Grumman AA5 descended and all Heathrow traffic continued approach to land 09L without further incident.☐ Supplementary 06/01/14:☐ The pilot involved in this event is convinced that at no point did their altitude exceed 1500 - as shown on both the aircraft's altimeter and navigational software. Prior to departure, the pilot had been fully de-briefed and the pilot was aware of the LFA altitude restriction and circuit pattern etc. The pilot stated that on his return flight, Boscombe ATC reported that his
201316352	17/12/2013	EGTT : London (FIR)	EGLM : White waltham		A	CTR	AIRBUS	Turbofan	2	Infringement of the London CTR (Class A) by an unknown aircraft, indicating 1700ft. Traffic info and avoiding action given. Inbound flights broken off approach. Separation lost.	CAA Closure:☐ No response from owner, closed due to elapsed time.
201316653	22/12/2013	EGTT : London (FIR)	EGSS (STN): London/Stansted		D	CTR	BOEING	Turbofan	2	Infringement of the Stansted CTR (Class D) by a PA28 squawking 7000 indicating 1400ft. Traffic info and avoiding action given. Inbound flights broken off approach. Separation lost.	CAA Closure:☐ No response from owner, closed due to elapsed time.
201316666	07/12/2013	EGTT : London (FIR)	Snitterfield Airfield	North Straford on Avon	G	Other	UNKNOWN	Unknown	1	Overflight of Snitterfield Gliding Site (Class G) by an unknown aircraft during a winch launch.	The unknown aircraft was seen passing at high speed away from the glider in the one o'clock position. No sign of unknown aircraft before launch.
201316666	07/12/2013	EGTT : London (FIR)	Snitterfield Airfield	North Straford on Avon	G	Other	SCHLEICHER	None	0	Overflight of Snitterfield Gliding Site (Class G) by an unknown aircraft during a winch launch.	The unknown aircraft was seen passing at high speed away from the glider in the one o'clock position. No sign of unknown aircraft before launch.
201316810	28/12/2013	EGTT : London (FIR)	EGGW (LTN): London/Luton	NE	D	CTR	BAC	Other	1	Infringement of the Luton CTR (Class D) by an unknown aircraft squawking 5034, climbing to 3000ft. Aircraft identified via Farnborough LARS as a Jet Provost. Standard separation maintained.	Supplementary 04/01/14: ☐ A Jet Provost, got airborne for North Weald. The pilot stated they were heading up to the North and would climb to FL100 as airspace allowed. The pilot was issued a squawk of 5034 and a basic service. The RT quality from the pilot was very quiet. As the aircraft was passing abeam BKY Farnborough LARS noticed they were climbing through 3.0A (just in the position where the airspace base changes from 2.5A to 4.5A). Farnborough LARS told the pilot they believed they had just infringed the Luton CTA and instructed them to remain outside controlled airspace. The pilot acknowledged this and continued enroute to the north leaving Farnborough's frequency. The Farnborough LARS North and East frequencies were busy and bandboxed. During this period, there was not enough radar qualified ATCOs on unit to split the frequencies. Luton phoned to request the details of the aircraft as they were also going to file an Infringement report.☐ Supplementary 06/01/14:☐ Radar replay confirms that the Jet Provost climbed to 3000' approximately 1nm before the LTMA 4500' boundary. The pilot subsequently telephoned Farnborough LARS. The pilot was flying as instructor with another pilot, they leaned forward to change a setting and when they looked up they noticed they had climbed. The pilot was very apologetic over the event.

201316817	29/12/2013	EGTT : London (FIR)	EGLD : Denham	3nm W	A	CTR	CESSNA	Reciprocating	1	Infringement of the London CTR (Class A) by an unknown aircraft squawking 7000, at 2400ft. Aircraft identified via Denham as a C177. Standard separation maintained.	An aircraft (Mode S) was seen departing the confines of the Denham LFA to the north they climbed to 2.4A (occasionally 2.6A) and turned south-westbound towards the London zone. The aircraft then entered the London zone at 2.4A West of the Denham LFA tracking towards White Waltham. Heathrow northbound departures were stopped at 1302z, the aircraft only entered by approximately 1nm before turning right to leave controlled airspace north-westbound. All Heathrow deps restarted at 13:03z. TC called Denham to ascertain the aircraft type.
201316828	29/12/2013	EGTT : London (FIR)	EGGP (LPL): Liverpool	SE	A	TMA	PIPER	Reciprocating	1	Possible infringement of the Manchester TMA (Class A).	Reporter was working as the WAL/IOM tactical when the incident happened. Reporter had an inbound to Hawarden (descending min stack FL60) routing via NANTI and had started to tell the aircraft to turn direct to KEGUN and was going to transfer them to Hawarden. As reporter was doing this CAIT was activated by the infringer (squawking 7000) who was indicating A25/A26 (base is A25). Reporter immediately cancelled the turn to KEGUN and told the inbound to turn right heading 330 (30+ turn). At the point CAIT was activated distance was at least 3 miles plus. Infringer was tracking SW, reporter didn't use the phrase Avoiding Action as they deemed it unnecessary in this instance as the infringer was through the inbounds 12 o'clock and moving away and there was no danger of the blips getting anywhere near each other. Reporter told the inbound aircraft the reason for the turn. The infringer then left CAS maintain A25 and stopped showing as CAIT. At this point traffic was handed over to Hawarden. As reporter was doing this their planner was trying to find who was working the aircraft. Aircraft originated from Barton and was working Manchester through the LLC and was then transferred to Shawbury.
201316828	29/12/2013	EGTT : London (FIR)	EGGP (LPL): Liverpool	SE	A	TMA	CESSNA	Turbofan	2	Possible infringement of the Manchester TMA (Class A).	Reporter was working as the WAL/IOM tactical when the incident happened. Reporter had an inbound to Hawarden (descending min stack FL60) routing via NANTI and had started to tell the aircraft to turn direct to KEGUN and was going to transfer them to Hawarden. 201316939	29/12/2013	EGTT : London (FIR)	EGWN : Halton	SE	G	ATZ	UNKNOWN	Unknown	1	Alleged infringement of the RAF Halton ATZ (Class G) by an unknown single engined low wing aircraft with a retractable landing gear.	The aircraft was observed to be flying directly towards the control caravan situated at the midpoint of the south eastern boundary of the airfield. It appeared to track NE towards the airfield before turning right through 180 degrees just before the boundary and heading away. No R/T contact was received by any station on frequency. Three aircraft operating, two in the visual circuit RW20 RH and gliders winch launching LH. TC Group supervisor was contacted via telephone, a fast moving contact was visible but was not in contact with either Luton or Farnborough.
201316940	28/12/2013	EGTT : London (FIR)	EGWN : Halton		G	ATZ	PIPER	Reciprocating	1	Possible infringement of the RAF Halton ATZ (Class G) by an unknown aircraft. Military aircraft in climb at 1200ft observed a single engine aircraft crossing in front, right to left. Aircraft identified via Farnborough North LARS as a PA28.	Whilst climbing out of the circuit a single engine low wing monoplane was observed to cross right to left with no risk of collision. After passing directly in front, the aircraft turned left and flew over Wendover. The standard 1:250K military chart was consulted and it was noted that the aircraft's track was within the ATZ. This was then reported to the DI via the air ground radio. The DI spoke with TC Group services who was informed that the aircraft was under Farnborough North LARS, was routing from Wellesbourne to Elstree.

201316940	28/12/2013	EGTT : London (FIR)	EGWN : Halton		G	ATZ	OTHER	Unknown		Possible infringement of the RAF Halton ATZ (Class G) by an unknown aircraft. Military aircraft in climb at 1200ft observed a single engine aircraft crossing in front, right to left. Aircraft identified via Farnborough North LARS as a PA28.	Whilst climbing out of the circuit a single engine low wing monoplane was observed to cross right to left with no risk of collision. After passing directly in front, the aircraft turned left and flew over Wendover. The standard 1:250K military chart was consulted and it was noted that the aircraft's track was within the ATZ. This was then reported to the DI via the air ground radio. The DI spoke with TC Group services who was informed that the aircraft was under Farnborough North LARS, was routing from Wellesbourne to Elstree.
201316976	29/12/2013	EGTT : London (FIR)	EGBB (BHX): Birmingham	11nm SE	D	CTA	OTHER	Reciprocating	1	Infringement of the Birmingham CTA-2 by a CZAW Sportcruiser at 1700ft climbing to 1900ft. Standard separation maintained.	Reporter was working as instructor on Radar 1 at Birmingham. At 1502 The AIW alerted reporter and their Trainee to a possible infringement of Birmingham CAS to the south east of Birmingham Airport by 11nm. The aircraft had already got reporter's attention as they had discussed it as traffic to the Birmingham based Police helicopter to the ESE of Birmingham outside CAS. It was also observed manoeuvring in the vicinity of "CT" which reporter had explained was a common occurrence when Coventry were closed, as now. A return on squawk 7000 was passing thru 1.7A (climbing arrow) on Mode C. The base of CAS in that location was 1.5A. It was observed climbing to an Altitude of 1.9A, reporter transmitted a blind call but got no response. At 1504 the return left CAS as the base changed to 3.5A. A colleague was called to monitor the track of the flight and phoned Wellesbourne Mountford to find out if they were in contact as it looked as if it was routing to that airfield. Reporter attempted to id the aircraft with squawk 0420 but this was not the correct aircraft. At 1510 the return left the radar screen and appeared to be descending into a private landing site. During the infringement there were 2 IFR arrivals being vectored, they were not delayed on their arrivals to Runway 33 at Birmingham. Ironically and as it was quiet this was a very good learning point for the Trainee. Reporter received a phone call about 20 minutes late from an AFISO at Wellesbourne Mountford telling them that they knew of 2 aircraft that had gone into the site at that time and one was a Sportcruiser out of Bruntingthorpe. As reporter was speaking the AFISO received a call from the Sportcruiser pilot. Reporter asked AFISO to pass on the WM telephone number and to please phone when on the ground at
201316985	09/12/2013	EGTT : London (FIR)	Pembrey Sands	EG D118	G	Danger area	MOONEY	Reciprocating	1	Infringement of Danger Area EG D118 (Pembrey Sands) by an aircraft that had been instructed to call the range to gain entry.	Pilot stated that he had tried to call but had no answer on our VHF frequency 122.750. He was told all aircraft must call before entering EG D118 and because he did not receive a reply he should not have entered.
201317163	17/07/2013	EGTT : London (FIR)	EGBP : KEMBLE	1 W	G	Other	PIPER	Reciprocating	1	Infringement of the Fairford RA(T) (Class G) by a PA28 at 2500ft.	An aircraft squawking 1177 (FIS) was observed transiting south east bound through Aston Down gliding site and into the RA(T) indicating 2500 feet. The aircraft maintained south east bound and subsequently departed the RA(T). I contacted London Information West who told me that the aircraft concerned was a PA28. I asked the FISO at London to tell the pilot to contact me at via landline as soon as possible.
201400028	02/01/2014	EGTT : London (FIR)	ABBOT	3.5 NNW	A	TMA	CIRRUS	Reciprocating	1	Infringement of the LTMA (Class A) by an unknown aircraft squawking 7000, at 4500ft, resulting in loss of separation with Stansted inbound traffic. Aircraft identified as an SR22. CAIT activated. Traffic info given.	

201400028	02/01/2014	EGTT : London (FIR)	ABBOT	3.5 NNW	A	TMA	BOEING	Turbofan	2	Infringement of the LTMA (Class A) by an unknown aircraft squawking 7000, at 4500ft, resulting in loss of separation with Stansted inbound traffic. Aircraft identified as an SR22. CAIT activated. Traffic info given.	
201400028	02/01/2014	EGTT : London (FIR)	ABBOT	3.5 NNW	A	TMA	CESSNA	Turbofan	2	Infringement of the LTMA (Class A) by an unknown aircraft squawking 7000, at 4500ft, resulting in loss of separation with Stansted inbound traffic. Aircraft identified as an SR22. CAIT activated. Traffic info given.	
201400280	08/01/2014	EGTT : London (FIR)	EGCV : Sleep	1.5 NE	G	ATZ	OTHER	Turboshaft	1	Infringement of the Sleep ATZ (Class G) by a military helicopter at 2000ft.	The pilot descended the ac into the Sleep ATZ to maintain VMC as the ac is not cleared to fly IMC.
201400287	09/01/2014	EGTT : London (FIR)	EGLM : White waltham	3nm East	A	CTR	AVIONS ROBIN	Reciprocating	1	Infringement of the London CTR (Cass D) by an aircraft squawking 7000 with Mode C showing 1200ft. CAIT activated. Standard separation maintained.	
201400289	08/01/2014	EGTT : London (FIR)	EGOS : Shawbury		G	ATZ	CESSNA	Reciprocating	1	Infringement of the Shawbury ATZ (Class G) by an aircraft squawking 7000 passing 1900ft. Pilot had failed to comply with Sleep Letter of Agreement to remain inside Sleep ATZ until not below 2000ft Shawbury QFE.	With no traffic to effect pilot was instructed to maintain his current track, in order to vacate at the earliest opportunity.

201400300	09/01/2014	EGTT : London (FIR)	Snitterfield		D	CTA	PIPER	Reciprocating	1	Infringement of the Birmingham CTA-2 (Class D) by an unknown a/c squawking 7000, indicating 3000ft. A/c identified via Coventry APP as a PA28. Traffic info and avoiding action given. Standard separation maintained.	CAA Closure:☐ Pilot error. The Flying Instructor had problems with a headset and whilst changing to another the student infringed. The Instructor was interviewed and a warning letter sent.
201400300	09/01/2014	EGTT : London (FIR)	Snitterfield		D	CTA	DE HAVILLAND	Turboprop	2	Infringement of the Birmingham CTA-2 (Class D) by an unknown a/c squawking 7000, indicating 3000ft. A/c identified via Coventry APP as a PA28. Traffic info and avoiding action given. Standard separation maintained.	CAA Closure:☐ Pilot error. The Flying Instructor had problems with a headset and whilst changing to another the student infringed. The Instructor was interviewed and a warning letter sent.
201400300	09/01/2014	EGTT : London (FIR)	Snitterfield		D	CTA	BOEING	Turbofan	2	Infringement of the Birmingham CTA-2 (Class D) by an unknown a/c squawking 7000, indicating 3000ft. A/c identified via Coventry APP as a PA28. Traffic info and avoiding action given. Standard separation maintained.	CAA Closure:☐ Pilot error. The Flying Instructor had problems with a headset and whilst changing to another the student infringed. The Instructor was interviewed and a warning letter sent.
201400309	09/01/2014	EGTT : London (FIR)	EGNR : Hawarden	3nm South East	A	CTA	CESSNA	Reciprocating	1	Infringement of part of Liverpool's delegated Class A airspace by an aircraft squawking 7000 at 3500ft. Standard separation maintained.	The 7000 was monitored as it descended outside of controlled airspace and routed southbound to land at its destination. A phone call was made and pilot was informed of the incident. No aircraft were affected at the time of the airspace infringement.
201400320	10/01/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	10 NW	D	CTR	PIPER	Reciprocating	1	Infringement of Luton CTR (Class D) by a PA28 squawking 7000. Standard separation maintained.	An unknown 7000 squawk was observed entering the zone tracking southbound. INT controller called the tower and put a 'Check All' on. The 7000 tracked down the western side of the zone and left to the South.

201400351	11/01/2014	EGTT : London (FIR)	BNN	3nm South East	A	TMA	OTHER	Reciprocating	1	Possible infringement of London TMA (Class A) by a microlight squawking 7000 with Mode C indicating 2600ft. CAIT activated.	Two departures were turned off the SID to avoid the infringing aircraft and to maintain separation. After a period of approx 3mins the infringing aircraft descended below controlled airspace.
201400351	11/01/2014	EGTT : London (FIR)	BNN	3nm South East	A	TMA	UNKNOWN	Unknown		Possible infringement of London TMA (Class A) by a microlight squawking 7000 with Mode C indicating 2600ft. CAIT activated.	Two departures were turned off the SID to avoid the infringing aircraft and to maintain separation. After a period of approx 3mins the infringing aircraft descended below controlled airspace.
201400351	11/01/2014	EGTT : London (FIR)	BNN	3nm South East	A	TMA	OTHER	Unknown		Possible infringement of London TMA (Class A) by a microlight squawking 7000 with Mode C indicating 2600ft. CAIT activated.	Two departures were turned off the SID to avoid the infringing aircraft and to maintain separation. After a period of approx 3mins the infringing aircraft descended below controlled airspace.
201400369	12/01/2014	EGTT : London (FIR)	EGKB (BOH): Biggin hill	2 NW	A	TMA	BELL	Turboshaft	1	Infringement of the LTMA (Class A) by a VFR Bell 206 at 3400ft. Standard separation maintained.	Controller noticed a 7047 (local conspicuity squawk) west of KB at 2700' and called them about it. They informed the controller that aircraft was doing an emergency climb to maintain VMC on top. Pilot called passing 3200' and unable to descend. Pilot then started asking for airport WX. Controller suggested MC, as at his present level of 3700' he would not conflict with KK/LL traffic. Pilot asked for the ILS frequency. Aircraft was finally transferred to MC radar.☐ CAA Closure:☐ The investigation findings were that after departure the weather deteriorated rapidly and the pilot had to climb for safety. A flight test has been undertaken with a staff flight examiner.
201400426	13/01/2014	EGTT : London (FIR)	EGFF (CWL): Cardiff	9nm South	D	CTA	OTHER	Unknown	1	Infringement of the Cardiff CTA-5 (Class D) by a military aircraft squawking 7001 climbing rapidly up to approx 4400ft. AIW alerted. Traffic info and avoiding action given.	Military aircraft was undertaking a diversion exercise. An FPS had been pre-prepared and at approx 1140 aircraft was seen crossing the Bristol Channel from Swansea to the Lynton Light. At that point the FPS was moved to the pending display and an SSR code was pre-allocated. Aircraft was then seen to go low level over Exmoor. At approx 1150 an aircraft with SSR code 7001 was seen to coast out by EXMOR at low level and high speed. The aircraft climbed rapidly into Cardiff CTA-5 (base altitude 3000ft) up to approx. altitude 4400ft. The AIW alerted. The aircraft then turned left in the climb on to a southerly heading before descending. A blind call was made with no response. An inbound flight to Bristol was giving a precautionary stop descent at FL130 and an avoiding action turn to the east. Traffic info was passed. There was no loss of separation and the radar targets did not merge. Military aircraft then called. The aircraft was identified and conducted the practise diversion without further incident. In a subsequent telephone conversation with the pilot he indicated that a student pilot was flying and during a simulated birdstrike the aircraft was inadvertently climbed at a high rate. The instructor believes their maximum level was altitude 3900ft based on the RPS of 992Hpa. The instructor again apologised.

201400426	13/01/2014	EGTT : London (FIR)	EGFF (CWL): Cardiff	9nm South	D	CTA	AIRBUS	Turbofan	2	Infringement of the Cardiff CTA-5 (Class D) by a military aircraft squawking 7001 climbing rapidly up to approx 4400ft. AIW alerted. Traffic info and avoiding action given.	Military aircraft was undertaking a diversion exercise. 201400657	20/01/2014	EGTT : London (FIR)	EGBB (BHX): Birmingham	S	D	CTA	CESSNA	Reciprocating	1	Infringement of the Birmingham CTA (Class D) by an aircraft squawking 7000 climbing to 2500ft. Traffic info given, Standard separation maintained. Inbound and outbound aircraft given headings to avoid.	Aircraft transponding 7000 entered controlled airspace climbing to altitude 2500', crossed the 33 approach at 10 miles towards Coventry. It then appeared to join the Coventry overhead and descended to altitude 2000'. Coventry did not have any details and suspected R/T failure. The aircraft then continued to descend tracking to the south west and left controlled airspace at 1700' to the south. Inbound and outbound aircraft were both given headings to avoid. The aircraft then selected a Coventry code and the details of the aircraft were passed on from them.☐ Supplementary 21/01/14:☐ At approx 1255 a 7000 squawk observed entering the control zone from the south at 2500ft, turned towards the Coventry overhead, made one orbit descending and left the zone to the south. Blind calls were made on 118.050 with no answer. the a/c was tracked after it left the zone, eventually the squawk changed to a BE conspicuity code, and details obtained. Inbound aircraft was given a heading to keep clear, as was the outbound aircraft. No avoiding action was required.
201400657	20/01/2014	EGTT : London (FIR)	EGBB (BHX): Birmingham	S	D	CTA	UNKNOWN	Unknown		Infringement of the Birmingham CTA (Class D) by an aircraft squawking 7000 climbing to 2500ft. Traffic info given, Standard separation maintained. Inbound and outbound aircraft given headings to avoid. 201400822	20/01/2014	EGTT : London (FIR)	EGGP (LPL): Liverpool	10 NE	D	CTR	GROB	Reciprocating	1	Infringement of Liverpool CTR (Class D) by a Grob 115 at 1300ft squawking 7000. Standard separation maintained.	

201401166	02/02/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	13 NE	D	CTA	PIPER	Reciprocating	1	Infringement of the Gatwick CTA (Class D) by a PA28 at 2000ft. Traffic info and avoiding action given to an inbound B747. Standard separation lost against another airliner	
201401166	02/02/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	13 NE	D	CTA	UNKNOWN	Turbofan		Infringement of the Gatwick CTA (Class D) by a PA28 at 2000ft. Traffic info and avoiding action given to an inbound B747. Standard separation lost against another airliner	
201401172	02/02/2014	EGTT : London (FIR)	Wethersfield		D	CTA	PITTS	Reciprocating	1	Infringement of the Stansted CTA (Class D) by a Pitts Special at 2000ft. Two inbound a/c vectored to remain clear. Pitts Special given ATC assistance to steer clear of the zone. Standard separation maintained.	CAA Closure:☐ Pilot error. The root cause of the incident was the inexperience of the pilot concerned. The pilot has been interviewed and licence restricted to not flying Pitts Special as PIC.
201401183	02/02/2014	EGTT : London (FIR)	EGHH (BOH): Bournemouth/Hum		D	CTA	CESSNA	Reciprocating	1	Infringement of the Bournemouth CTA (Class D) by a C172 at 3000ft. Standard separation maintained.	CAA Closure:☐ The investigation findings revealed that the pre-flight planning and preparation was not thorough enough. The root cause of the incident is that avoiding weather took the pilot South of planned track. The radio was turned down so he failed to establish 2-way R/T with Bournemouth in time. A dual flight with the CFI is to be undertaken and a warning letter has been issued.
201401432	07/02/2014	EGTT : London (FIR)	Burnham	3W	A	TMA	PIPER	Reciprocating	1	Infringement of the LTMA (Class A) by a PA28 at 2800ft. Heathrow North departures stopped. Standard separation maintained.	I was working as the TC NE deps controller. I saw a magenta return tracking east toward White Waltham currently 3nm west of White Waltham. The Mode C indicated A25 ssr:7000. The a/c climbed to A28 and tracked towards Burnham. I stopped LL north departures. The a/c got to 3nm west of Burnham and turned towards White Waltham and started descending.

201401840	16/02/2014	EGTT : London (FIR)	Little Rissington		G	Other	PIPER	Reciprocating	1	Alleged overflight of the Little Rissington Aerodrome (Class G) by an aircraft squawking 7000 at 1200ft during NOTAM'd parachute jump exercise.	Appropriate CAA action is being taken as a result of this incident.
201401907	16/02/2014	EGTT : London (FIR)	EGBB (BHX): Birmingham	10 S	D	CTA	CESSNA	Reciprocating	1	Infringement of the Birmingham CTA-2 (Class D) by a C172 at 2000ft. Traffic info and avoiding action given to an inbound DHC8. Standard separation maintained.	I was operating as the Radar 1 controller, controlling two inbounds to Birmingham; the first was established on a LOC/DME approach for 33 and the second, DHC8 on a downwind heading west of Birmingham airport in the descent to 4000 ft. I became aware of a 7000 squawk tracking south-east towards CTA2 and 2NM north west of Snitterfield, just before it infringed CAS at 2000ft. I gave DHC8 an avoiding action turn to the right onto 330 degrees and instructed it to stop descent at 6000 ft. Traffic information was passed about the infringing aircraft. I hovered the mouse pointer over the track data block of the infringing aircraft which revealed the registration of the aircraft. Two blind calls were made to this callsign, but no response was received. The infringer continued on a consistent south-easterly track, so I continued the approach for the DHC8 with a right turn onto a downwind heading. As the infringer left controlled airspace and tracked towards Wellesbourne, I asked the assistant to contact Wellesbourne to see if they were talking to the C172. They confirmed that they were in contact with that aircraft and it was transferred to 118.050. Upon calling Birmingham Radar, I gave the C172 a squawk of 0401 and positively identified this registration with the contact that had infringed.
201401907	16/02/2014	EGTT : London (FIR)	EGBB (BHX): Birmingham	10 S	D	CTA	DE HAVILLAND	Turboprop	2	Infringement of the Birmingham CTA-2 (Class D) by a C172 at 2000ft. Traffic info and avoiding action given to an inbound DHC8. Standard separation maintained.	I was operating as the Radar 1 controller, controlling two inbounds to Birmingham; the first was established on a LOC/DME approach for 33 and the second, DHC8 on a downwind heading west of Birmingham airport in the descent to 4000 ft. I became aware of a 7000 squawk tracking south-east towards CTA2 and 2NM north west of Snitterfield, just before it infringed CAS at 2000ft. 201401909	16/02/2014	EGTT : London (FIR)	EGBE (CVT): Coventry		D	CTA	NEW GLASAIR	Reciprocating	1	Infringement of Coventry ATZ (Class G) and Birmingham CTA-2 (Class D) by an unknown aircraft squawking 7000, resulting in loss of separation with a Birmingham inbound aircraft. Traffic info and avoiding action given. Aircraft identified as a Glasair.	I was on watch as the Radar 1 Controller at Birmingham. At approx 1310 I noticed a 7000 squawk in the vicinity of Bitteswell Industrial Estate VRP at 2000ft that had been tracking SW make a turn towards Coventry overhead. I commented to the Assistant that I was surprised it wasn't on a Coventry Squawk as it looked like it was joining their circuit. The Coventry Corner had been delegated to Coventry but I continued to monitor the aircraft. As it passed through Coventry's overhead still tracking SW I called Coventry Radar to check the aircraft's intentions. The Radar Assistant answered and said they had been trying to call the aircraft. I was vectoring an aircraft inbound towards the LOC/DME procedure for RW33 and had descended the aircraft to 6000ft. I deliberately delayed giving the aircraft further descent as I wasn't comfortable about the intentions of the unknown aircraft. As soon as the Coventry Radar Assistant told me they were not working the unknown aircraft, I issued the inbound aircraft an avoiding action turn left onto heading 240, told the aircraft to stop descent and passed traffic information. Inbound aircraft acknowledged the avoiding action and reported levelling at 6000ft. After a brief period monitoring the tracks of the aircraft, I gave the inbound aircraft a further left turn onto 060 and advised the crew I would set them up for another approach. Minimum separation was approx 3.6nm lateral and 4200ft vertical. A radar trainee sat in the Radar 2 position unsuccessfully attempted to obtain Mode S information from the unknown air and continued to track the aircraft. When approx 20nm SW of Coventry the aircraft changed to a Brize squawk and the ident was obtained from Brize Radar. The pilot subsequently called and reported he had planned to route via Southam
201401909	16/02/2014	EGTT : London (FIR)	EGBE (CVT): Coventry		D	CTA	EMBRAER	Turbofan	2	Infringement of Coventry ATZ (Class G) and Birmingham CTA-2 (Class D) by an unknown aircraft squawking 7000, resulting in loss of separation with a Birmingham inbound aircraft. Traffic info and avoiding action given. Aircraft identified as a Glasair.	I was on watch as the Radar 1 Controller at Birmingham. At approx 1310 I noticed a 7000 squawk in the vicinity of Bitteswell Industrial Estate VRP at 2000ft that had been tracking SW make a turn towards Coventry overhead. 201402043	19/02/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	4 N	D	CTR	OTHER	Reciprocating	1	Infringement of the Luton CTA (Class D) by Gyroplane at 1600ft resulting in a loss of separation with an inbound A320. Traffic info and avoiding action given.	At approximately 1300z a radar contact with intermittent Mode A/C/S information penetrated the Luton CTR North of Luton Airopor, on an easterly track. The intermittent Mode C information indicated it being at 1600 feet. At the time, an A320 and a BD100 were on final approach to R/W26 at Luton, and both had been cleared for the ILS approach. A320 was at approximately 4 miles from touchdown when the Gyroplane penetrated the CTR, and separation was lost, however I passed traffic info and agreed with the crew that the safest course of action was to let him continue to land. As the BD100 was further out on the approach, and the projected track of the Gyroplane was in conflict with it, I decided to discontinue the approach and provide them with delaying action until it was appropriate to commit to a second approach. A Falcon 2000 was also given delaying action by Essex Radar, before control and communication was transferred to me. At approximately 1317z, after the Gyroplane had continued on its easterly track all the way through the Luton CTR, it appeared to let down/land at the approximate location of: 51-56-51 6 - N 00-05-15 2 - S.☐ CAA Closure:☐ Pilot error-lack of situational awareness. Warning letter issued.
201402043	19/02/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	4 N	D	CTR	AIRBUS	Turbofan	2	Infringement of the Luton CTA (Class D) by Gyroplane at 1600ft resulting in a loss of separation with an inbound A320. At approximately 1317z, after the Gyroplane had continued on its easterly track all the way through the Luton CTR, it appeared to let down/land at the approximate location of: 51-56-51 6 - N 00-05-15 2 - S.☐ CAA Closure:☐ Pilot error-lack of situational awareness. Warning letter issued.
201402043	19/02/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	4 N	D	CTR	BOMBARDIER	Turbofan	2	Infringement of the Luton CTA (Class D) by Gyroplane at 1600ft resulting in a loss of separation with an inbound A320. Traffic info and avoiding action given.	At approximately 1300z a radar contact with intermittent Mode A/C/S information penetrated the Luton CTR North of Luton Airopor, on an easterly track. The intermittent Mode C information indicated it being at 1600 feet. At the time, an A320 and a BD100 were on final approach to R/W26 at Luton, and both had been cleared for the ILS approach. A320 was at approximately 4 miles from touchdown when the Gyroplane penetrated the CTR, and separation was lost, however I passed traffic info and agreed with the crew that the safest course of action was to let him continue to land. As the BD100 was further out on the approach, and the projected track of the Gyroplane was in conflict with it, I decided to discontinue the approach and provide them with delaying action until it was appropriate to commit to a second approach. A Falcon 2000 was also given delaying action by Essex Radar, before control and communication was transferred to me. At approximately 1317z, after the Gyroplane had continued on its easterly track all the way through the Luton CTR, it appeared to let down/land at the approximate location of: 51-56-51 6 - N 00-05-15 2 - S.☐ CAA Closure:☐ Pilot error-lack of situational awareness. Warning letter issued.

201402045	19/02/2014	EGTT : London (FIR)	Northwich		D	CTR	PIPER	Reciprocating	1	Alleged infringement of the Manchester CTR (Class D) by an aircraft squawking 7366 at 1500ft.	Whilst working as APP S I noticed an aircraft routing southbound in the Northwich area of the LLR indicating 1300ft . The aircraft was squawking 7366. The aircraft climbed quickly to 1500 ft, levelled for a short while then descending-as it climbed it set off the AIW system on the radar display. I called the aircraft by making a broadcast to aircraft routing southbound in that position. There were no IFR aircraft within 5 miles of its position so no avoiding action was needed against other traffic. The aircraft immediately replied, I issued him with a 7352 squawk and identified him. I advised him that he had climbed above the limits of the zone. He subsequently replied that he had the correct QNH set but his instruments did not indicate that he had climbed above 1300ft; I advised him that he had indeed climbed and that his QNH setting was correct.
201402162	22/02/2014	EGTT : London (FIR)	Yarmouth	3 NE	D	CTA	PIPER	Reciprocating	1	Infringement of the Solent CTA (Class D) by a PA28 at 2300ft. Standard separation maintained.	At c.1543 I observed a #7000 infringing airspace 3NM North East Yarmouth indicating 2.3A. Using Mode S aircraft identified. I attempted several times to raise the aircraft without success, including speaking to EGHH. Subsequently the aircraft left CAS in the vicinity of Cowes. Later the aircraft came on freq. I made him aware of the possible airspace infringement. No further action was taken.
201402169	21/02/2014	EGTT : London (FIR)	EGGD (BRS): Bristol/Lulsgate	10 NE	D	CTA	AVIONS ROBIN	Reciprocating	1	Infringement of the Bristol CTA (Class D) by a DR400 at 2300ft. Standard separation maintained.	I was working Radar1 when I observed an unknown secondary squawk 7000 enter controlled airspace in the vicinity of Mangotsfield at 2300ft (base 2000ft). The aircraft proceeded south for around 1.5nm before turning north, exiting CAS and climbing to 2700ft. The aircraft was then tracked to south of Gloucester. Gloucester ATC were contacted to see if any aircraft were inbound from the south, one was so a squawk was passed and the aircraft was positively identified as a DR400.☐ Supplementary 03/03/14:☐ I had no intention of flying into Bristol CTA but should have called Bristol on the radio to say I was in the vicinity. Unfortunately, I didn't, which was careless of me. I was overflying Mangotsfield Gold Club when I realised I was inside the CTA. I immediately turned around and left the airspace. Again, I should have called Bristol to firstly explain what happened, and secondly, apologise. Again, unfortunately, I didn't. I will in future call ahead with plenty of time, even if I don't intend to enter the CTA. I can only apologise and try to assure all concerned that it will not happen again. I will re-read my training manuals, and ensure that when approaching controlled airspace, to radio ahead to the controller to let them know I am nearby, and what my intentions are. I will also talk to my Club CFI to see if in his opinion, I require an accompanied training flight.
201402207	24/02/2014	EGTT : London (FIR)	Luton	S	D	CTR	CESSNA	Reciprocating	1	Infringement of the Luton CTR (Class D) by an unknown aircraft squawking 7000. Traffic info given. Standard separation maintained. Aircraft later identified as a C152.	Appropriate CAA action is to be taken as a result of this incident.
201402508	01/03/2014	EGTT : London (FIR)	Cowes / Yarmouth		D	CTA	AVIONS ROBIN	Reciprocating	1	Infringement of the Solent CTA (Class D) by a DR400 at 2500ft. Standard separation maintained.	Observed contact #7000 indicating 2.1A abeam Cowes southwest bound. Tried a number of times to raise contact including EGHH but no success. Mode S indicated the callsign. Continued to monitor as the Mode C indicated climb to 2.5A. A/C tracked and believed to have landed at EGHR. Spoke to EGHR and raised my concern regarding airspace levels to be passed to the pilot on landing.☐ Supplementary 19/03/14:☐ I was on a solo pleasure flight from Goodwood over Solent,Cowes,Isle of Wight and returning. Just West of there is atriangle of airspace with a lower limit of 2,000 ft which I accidentally intruded into at perhaps 2,200 ft. I am well aware of the D airspace extending from Southampton, and regularly fly under it when flying West along the Solent. I had forgotten that it extended over a patch of the Isle of Wight. I apologise for the intrusion, which should not have happened.

201402540	22/02/2014	EGTT : London (FIR)	Syerston		G	ATZ	CESSNA	Reciprocating	1	Alleged overflight of the Syerston ATZ (Class G) by a C172 at 1500ft (estimated).	High winged type aircraft (C172) flown over head Syerston at 1016L and observed estimated 1500ft with Syerston on 997 hPa QFE. RAF Waddington LARS called, but no answer received. No other radar unit contacted.
201402588	04/03/2014	EGTT : London (FIR)	LTMA				PIPER	Reciprocating	1	Infringement activation in the LTMA.	<p>Whilst working LAM the CAIT activated as I was on console with a slow moving 7000 squawk which popped up indicating FL112 tracking away from LAM to the North West towards BPK area. No STCA was activated and the return was white and pink intermittently on different radars. Aircraft was just about to commence the inbound hold over LAM when I issued an avoiding action turn to head 140 degrees away from the track. I asked if the pilot could see anything and he said there was no contact. Subsequently I turned the next LAM inbound, away from the hold and vectored away from the 7000 squawk and continued to vector both aircraft until the 7000 squawk was far enough away from LAM that 5nm could be maintained by LL APC and TC LAM. 10 mins later the GS indicated that the aircraft was believed to be identified and had been fitted with a new transponder and was confirmed maintaining 2000'. As the aircraft approached BNN the 7000 changed to 5031 indicating it was now in receipt of a service from LF LARS.☐</p> <p>Supplementary 12/0314: ☐</p> <p>It has been identified that there is an intermittent fault with the transponder installation. The owner has agreed for a newer version to be fitted and arrangements are being made for the new installation to take place. The pilot has been advised to limit flying until it has been installed.</p>
201402588	04/03/2014	EGTT : London (FIR)	LTMA				UNKNOWN	Unknown	2	Infringement activation in the LTMA.	<p>Whilst working LAM the CAIT activated as I was on console with a slow moving 7000 squawk which popped up indicating FL112 tracking away from LAM to the North West towards BPK area. No STCA was activated and the return was white and pink intermittently on different radars. Aircraft was just about to commence the inbound hold over LAM when I issued an avoiding action turn to head 140 degrees away from the track. The pilot has been advised to limit flying until it has been installed.</p>
201402600	04/03/2014	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD		D	CTR	PIPER	Reciprocating	1	Infringement of the Doncaster Sheffield CTR (Class D) by a PA28 at 1500ft. Standard separation maintained.	<p>PA28 called 126.225MHz requesting TS and advised climbing to 4A. Pilot instructed to squawk 6161, mode c was verified. At the same time, ADC was called to check circuit status as the PA28 was 3NM SW of EGCF, already inside CAS, passing A1.4. when the pilot was advised that he was inside CAS, he suggested that he would remain not above A1.5 until clear of the CTR. the PA28 was instructed to continue to climb to 4A in order to clear the ATZ, and was given a VFR Crossing Clearance on track. Visual and instrument CCT's clear, no other a/c affected. The pilot was asked if had read the VFR Departure Briefing before leaving EGCF. He replied that he had not read it, but would read it on returning. No further discussion of the matter was entered into with the pilot of the PA28, but EGCF was contacted by telephone to make further enquiries. Operations Manager advised that the pilot had only recently qualified, and could not apologise enough for the infringement. Full instruction on all relevant procedures had been given to the pilot before being authorised to fly solo. He also advised that he intended to comprehensively debrief the pilot of the PA28 on his return to EGCF.</p>
201402620	05/03/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	13nm East	D	CTR	BELL	Turboshaft	1	Infringement of the Manchester CTR (Class D) by a helicopter squawking 7000. CAIT activated. Separation lost.	<p>I became aware of a 7000 squawk which appeared just inside the Manchester zone in the Glossop area, which rapidly activated the AIW alert. FIN DIR were vectoring two aircraft; one had just been turned onto a closing heading from the south (fltnum743F), and the other (fltnum5JA) was on a wide right base. As this 7000 squawk appeared it was about 2 miles east of fltnum743F and indicating about '3000' below. I transmitted blind to the unknown traffic, who immediately responded with his callsign. I also alerted FIN DIR and then informed him the traffic was speaking to me. I allocated squawk 7350 which enabled rapid identification, I cleared aircraft to continue northbound not above 2000' [I believe] and subsequently determined his intention to operate in the Rishworth Moor area for most of the day. Traffic information was not passed as fltnum743F, who had already been turned onto a closing heading, was by now well to the west and tracking away. (FIN DIR had kept the fltnum5JA fairly wide and I believe that at least 5nm separation existed until identification of the helicopter had occurred). The pilot stated he was about to call me - it is unfortunate that two-way communication was not achieved before his aircraft lifted into radar cover whilst still on a 7000 squawk. The watch manager was advised, but could find no record of the pilot having booked out prior to lifting.</p>

201402620	05/03/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	13nm East	D	CTR	EMBRAER	Turbofan	2	Infringement of the Manchester CTR (Class D) by a helicopter squawking 7000. CAIT activated. Separation lost.	I became aware of a 7000 squawk which appeared just inside the Manchester zone in the Glossop area, which rapidly activated the AIW alert. 201402642	05/03/2014	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD		D	CTA	PIPER	Reciprocating	1	Infringement of the Doncaster Sheffield CTA (Class D) by an unknown aircraft at 2500ft squawking 7000 resulting in a loss of separation. Avoiding action given. Unknown aircraft subsequently identified as a PA28.	Further aircraft was C172(1), EGNW-EGNW, 6163, 'C' displayed and IFR making an ILS approach to RW20. Whilst vectoring C172(1) for an ILS at EGCN RW20 I observed that an aircraft squawking 7000, later to be identified as a PA28, had infringed CAS out of Sandtoft and was heading towards the final approach track for the same runway. Previously the PA28 had called on 126.225 for a service three times and was acknowledged by the radar controller to pass his message, but didn't do so. At the same time, an A319, was completing left hand visual circuits at Doncaster on RW20. ADC was informed, via landline, to keep the A319, which was in an orbit due to sequencing against an IFR inbound, heading South out of the way of the infringing traffic. C172(1) was given avoiding action to head away from the Localiser and positioned further ILS RW20, Also, a C172(2) in the FNY hold, cleared to go "beacon outbound" for the NDB/DME procedure RW20, was instructed to maintain in the hold to avoid. Although later, was also given vectored avoiding action to head SW away from the infringing aircraft. PA28 then changed his squawk to 6170 (EGCN listening watch), was called again, and was then identified and given a crossing clearance. ☐ CAA Closure:☐ The investigation findings revealed this incident resulted from poor planning. The root cause was that the pilot planned to depart Sandtoft heading towards Doncaster CTZ, problem compounded by Com 2 not being checked prior to take off. A warning letter has been sent.
201402642	05/03/2014	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD		D	CTA	CESSNA	Reciprocating	1	Infringement of the Doncaster Sheffield CTA (Class D) by an unknown aircraft at 2500ft squawking 7000 resulting in a loss of separation. 201402786	09/03/2014	EGTT : London (FIR)	EGLC (LCY): London city	15nm SSE	A	TMA	CESSNA	Reciprocating	1	Infringement of the London TMA (Class A) by a C182 squawking 4250 maintaining 3000ft. Departures from London City were halted.	I was working as Thames. At approx 1537Z, an aircraft squawking 4250 entered the TMA, approx 15 miles SSE of London City, tracking north-west bound, maintaining 3000ft (the base of CAS here is 2500ft). I contacted LARS East, who were not working the aircraft but said that it was a Manston squawk. I contacted Manston, who said they had been working it but were not now. They said it was a PA34 from EGKB to EGKB. The aircraft continued to track north west, so departures from London City were stopped. Eventually, the aircraft changed to a LARS North 5035 squawk and stopped reporting Mode C. LARS North were contacted and advised when the aircraft was back below 2500ft. At this point, departures were resumed again from London City. LARS provided the SVFR controller with details of the aircraft. They said it was a C152 from EGKA to EGPR. I'm therefore not sure which aircraft the infringer was. I suspect it is probably the one that Manston provided details of. □ Supplementary 11/03/14: □ Working LARS N, split Traffic: M-H. Subject a/c called on frequency stating 3.0A ft, the a/c altitude and position suggested there was a possibility the a/c was in CAS. I told the a/c to sqk 5035 and then observed the a/c change sqk indicating A only. I told the a/c to descend in a tone not to startle the pilot as the a/c was close to LC CTR and no conflicting traffic was apparent. SVFR called just as I had issued instructions; they were told the course of action and I called back when the aircraft was level 2.4A ascertained via pilot report.
201402848	09/03/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	10 NE	G	Restricted area	SLINGSBY	Reciprocating	1	Infringement of the Stansted TMZ1 (Class G) and overflight of Wethersfield airfield by a Slingsby T61.	I was controlling as Stansted INT/FIN boxed when I observed a magenta contact enter TMZ1 heading in a north-easterly direction. It was a very faint contact and initially I thought it was a spurious/weather as we had had a numerous number of similar contacts throughout the morning. However the contact started to change direction and I took action assuming an unknown aircraft. Two B737s were given delaying action to avoid the contact, however I did not achieve 5nm or 5000'. The unknown aircraft then headed southeast and flew directly overhead Wethersfield at low level where there was gliding activity. Wethersfield saw the aircraft and identified it as a Slingsby and phoned GS airports to advise them. □ Supplementary 13/03/14: The pilot believes that he misidentified Haverhill for Sudbury. Appropriate remedial action is being taken.
201402848	09/03/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	10 NE	G	Restricted area	BOEING	Turbofan	2	Infringement of the Stansted TMZ1 (Class G) and overflight of Wethersfield airfield by a Slingsby T61.	I was controlling as Stansted INT/FIN boxed when I observed a magenta contact enter TMZ1 heading in a north-easterly direction. It was a very faint contact and initially I thought it was a spurious/weather as we had had a numerous number of similar contacts throughout the morning. However the contact started to change direction and I took action assuming an unknown aircraft. Two B737s were given delaying action to avoid the contact, however I did not achieve 5nm or 5000'. The unknown aircraft then headed southeast and flew directly overhead Wethersfield at low level where there was gliding activity. Wethersfield saw the aircraft and identified it as a Slingsby and phoned GS airports to advise them. □ Supplementary 13/03/14: The pilot believes that he misidentified Haverhill for Sudbury. Appropriate remedial action is being taken.
201402848	09/03/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	10 NE	G	Restricted area	BOEING	Turbofan	2	Infringement of the Stansted TMZ1 (Class G) and overflight of Wethersfield airfield by a Slingsby T61.	I was controlling as Stansted INT/FIN boxed when I observed a magenta contact enter TMZ1 heading in a north-easterly direction. It was a very faint contact and initially I thought it was a spurious/weather as we had had a numerous number of similar contacts throughout the morning. However the contact started to change direction and I took action assuming an unknown aircraft. Two B737s were given delaying action to avoid the contact, however I did not achieve 5nm or 5000'. The unknown aircraft then headed southeast and flew directly overhead Wethersfield at low level where there was gliding activity. Wethersfield saw the aircraft and identified it as a Slingsby and phoned GS airports to advise them. □ Supplementary 13/03/14: The pilot believes that he misidentified Haverhill for Sudbury. Appropriate remedial action is being taken.
201402864	10/03/2014	EGTT : London (FIR)	EXMOR	5nm S	D	CTA	PIPER	Reciprocating	1	Infringement of the Cardiff CTA-7 (Class D) by an unknown aircraft, indicating approx 6000ft. Aircraft identified as a PA32. Standard separation maintained.	At the time of the infringement I was the Cardiff Radar ATCO. Radar 1 & 2 were boxed. Workload was light. At approx 1515 I noticed a radar track with SSR code 0410 enter Cardiff CTA-7 approx. 6nm SE of EXMOR, moving westbound, indicating FL056 (approx. altitude 6000ft QHN1029). The base of CAS is altitude 4500ft Cardiff QNH. I telephoned the Exeter Controller who confirmed the aircraft callsign and that it was operating up to altitude 6000ft. The Exeter Controller stated that the pilot had been instructed to remain outside of CAS. The aircraft maintained its level and then turned left to leave CAS to the South of EXMOR. No other aircraft were involved. I spoke to pilot by telephone after upon landing. □ Supplementary 11/03/14: □ Local training flight to complete turbocharged piston engine differences. Briefed plan was to climb to 6000' to remain below AWY N864 and route to NW of Dunkeswell. Once airborne the route was modified by flying North to allow climb through broken cloud layer to 6000' which placed us East of the airway. A turn was then made to the West to remain clear of SW segment of Cardiff CTA (base 3000'). Unfortunately I forgot about the short 'step-down' from the airway which has a base of 4,500' and we infringed this area from the East at 6000'.

201402922	11/03/2014	EGTT : London (FIR)	BHX	13nm NNW	D	CTA	VANS	Reciprocating	1	Infringement of the Birmingham CTA-1 (Class D) by an unknown aircraft squawking 7000, indicating 1600ft. Aircraft later identified as an RV6. Traffic info and avoiding action given. Standard separation maintained. RV6 distracted by elevator trim problem.	I was controlling on RAD 1 when I observed a 7000 squawk indicating 1600' with an up arrow on the mode C enter CTA-1 tracking south. An airliner had departed on a WH14D departure so I instructed him to turn left heading 260deg but he requested I repeat the heading so I turned him left heading 240deg to ensure separation was maintained. I put a 'check all' on with AIR and tried to blind call the ac. I could not raise the ac which then turned north and descended before turning south again and appeared to land. Once clear I turned the airliner back on track and coordinated a climb with PC before transferring him. Separation was maintained throughout.☐ Supplementary 12/03/14:☐ On taking off and trimming out, elevator trim malfunctioned and went to fully up. It took a few minutes to establish that the switch was sticking in the up position such that any application of up trim caused fully up trim to be selected. I was able to sort this out by switching trim from any up input to follow by down trim to unstick the switch. This has subsequently been repaired by simple lubrication. The aircraft had not been used for several months and this was the second flight of the day since being laid up. The distraction of dealing with the elevator trim problem caused me to be slightly south of track and thus infringing Birmingham airspace. As I was on the boundary at the time I was aware of my position according to the GPS and confirmed visually, I continued on my way to intended destination. I should have turned around and landed immediately, although landing an aircraft with full up trim on permanently would not have been easy, particularly with an 8 - 10kn crosswind, it would
201402922	11/03/2014	EGTT : London (FIR)	BHX	13nm NNW	D	CTA	BOEING	Turbofan	2	Infringement of the Birmingham CTA-1 (Class D) by an unknown aircraft squawking 7000, indicating 1600ft. 201402963	11/03/2014	EGTT : London (FIR)	D126/128		G	Danger area	ROBINSON	Reciprocating	1	Infringement of active Danger Areas D126 and D128 by an R22 at 1000ft.	As the on-duty Air Operations Officer on Salisbury Plain I received an RT call from a military helicopter operating over Everleigh DZ that they had been overflown by a small civilian helicopter at a height of approx 1000ft. I checked our SSR display and saw a slow moving SSR track in the area squawking 3/A 7000 hdg NW. The danger areas were notified active, D126 SFC-FL90 RPA Flying and EG D128 SFC-30,000 Artillery Firing. I suspected the aircraft might have departed from Thruxton so called the Tower. They confirmed that an R22 had recently departed to Wolverhampton Ha'penny Green. They said they had informed the pilot that the danger areas were active. I rang Wolverhampton and explained the problem and asked them to ask the pilot to call me after landing. At approx 1515 I received a call from the pilot. I explained I was trying to trace an R22 that infringed active danger areas over Salisbury Plain, and the pilot admitted it was probably him and he apologised. He said he had some problems with flight visibility and been told by Thruxton Tower to fly not above 1200ft. I reminded him that we provided a DACS and that if he had called, we might have been able to act and clear him safely into the area. I informed him that we were mandated to report the infringement by DASOR.☐ CAA Closure:☐ The investigation findings were that the pilot departed Thruxton without a clear plan of how to leave the ATZ and avoid the MATZ and D126 to the NW. A warning letter has been issued.
201402974	11/03/2014	EGTT : London (FIR)	EGBB (BHX): Birmingham	Bearing 360 Range 11nm	D	CTR	VANS	Reciprocating	1	Infringement of the Birmingham CTA-1 (Class D) by an aircraft squawking 7000 at 2100ft. Standard separation maintained.	I was Radar1 and saw a primary target that changed to a 7000 squawk north of Birmingham in CTA1 tracking west @1800 climbing. At 1517 the AIW activated and the target climbed to 2100ft. I made broadcast and had no replies. I put a label background and tracked the aircraft. The Air ground identified the traffic for me as it was the only one joining form the Northeast. The pilot was requested to phone me. He later told me that he had been troubled by his trim lever and that he had not flown the aircraft for some time. He did not think that he had been so high. He apologised for the incursion and will fill out the Infringement on line. This incursion had no effect on our operation as we were landing RWY33.
201403090	15/03/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	6.5 NW	D	CTA	GROB	Reciprocating	1	Infringement of the Solent CTA (Class D) by a Grob 115 at 3900ft. Standard separation maintained.	

201403093	15/03/2014	EGTT : London (FIR)	EGLC (LCY): London city	8nm E	A	TMA	PIPER	Reciprocating	1	Possible infringement of the LTMA (Class A) by a PA28 with Mode C indicating 2600ft, resulting in an EMB170 receiving/complying with TCAS RA to monitor V/S. STCA activated. Traffic info given. Incorrect Mode C indication involved.	On duty as Thames Radar with a trainee and vectoring EMB170 inbound to runway 27 ILS at 3000 feet QNH 1027 when a 7000 squawking aircraft displaying 2400 feet mode C climbed to 2600 feet within 1NM of EMB170 causing the STCA to show red. Traffic information was immediately passed and the pilot of EMB170 reported visual with the aircraft 400 feet below and that TCAS was monitoring. Avoiding action was not given due to the speed, direction of EMB170 and that the unknown aircraft was in sight. The unknown aircraft soon changed to an FIS squawk 1177 and we established via phone to the FIS that the said aircraft was a PA28 and the Mode C was verified on London QNH as showing 150 feet above reported level. The pilot of EMB170 subsequently informed tower that they thought the unknown aircraft was possibly only 300 feet below.☐ Supplementary 21/03/14:☐ TCAS RA during approach. Aircraft established on the localiser for RWY 27. Altitude 3000 and speed 160 kts. We were aware of a prox traffic to the north of final approach track. We were in contact with Thames radar 132.7 who advised of the other aircrafts position. The conflicting traffic then proceeded to fly south and crossed underneath our path. The other aircraft passed 300 ft below us; therefore it was at 2700 ft in controlled air space. TCAS gave us a resolution advisory 'Monitor vertical speed', the autopilot was disengaged and aircraft positioned into the (fly-to-zone). The conflicting traffic passed 300 ft below us and I was able to see that it was a single engine low wing light aircraft (possibly a PA28 or similar). After landing we spoke to ATC the other aircraft had been in contact with a F.I.R. frequency.
201403093	15/03/2014	EGTT : London (FIR)	EGLC (LCY): London city	8nm E	A	TMA	EMBRAER	Turbofan	2	Possible infringement of the LTMA (Class A) by a PA28 with Mode C indicating 2600ft, resulting in an EMB170 receiving/complying with TCAS RA to monitor V/S. 201403100	15/03/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	SE	D	CTR	VANS	Reciprocating	1	Infringement of the Gatwick CTR (Class D) by a Vans RV9 at 2200ft. Standard separation maintained.	I was the KK Int controller just commencing a handover to an oncoming controller when I noticed a FIS squawk 12nms SE of KK in the KK CTR at 2200'. My oncoming controller spoke to London FIS from another position to tell them about it and was informed that the AC had just been transferred to LF LARS. I stopped descent on an inbound AC to KK (vertical separation was not eroded as the inbound AC was passing approx 8600' when I stopped the descent at 6000') I then obtained the AC details from LF LARS.
201403116	16/03/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted		D	CTA	CESSNA	Reciprocating	1	Infringement of the Stansted CTA (Class D) by an unknown aircraft at 2800ft. A Luton inbound aircraft was turned on a base leg early to avoid the infringer. Unknown aircraft later identified as a C182. Traffic info given. Standard separation maintained.	
201403116	16/03/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted		D	CTA	UNKNOWN	Unknown		Infringement of the Stansted CTA (Class D) by an unknown aircraft at 2800ft. A Luton inbound aircraft was turned on a base leg early to avoid the infringer. Unknown aircraft later identified as a C182. Traffic info given. Standard separation maintained.	

201403249	12/03/2014	EGTT : London (FIR)	Tern Hill		A	CTA	GROB	Reciprocating	1	Infringement of the Daventry CTA (Class A) by a Grob G115 indicating 5600ft.	<p>I was controlling the LARS position with up to 4 ac on frequency. With Director controlling a couple in the radar pattern under a DS, there was a lot of co- ordination required, not helped by having a comms fail on the Dir position at one point. Grob G115 was operating up to 6000' on Barnsley QNH 1027 between Cosford and Tern Hill and another aircraft to the south of Shawbury. Although I was quite busy co-ordinating, whenever I saw the Grob G115, he was operating outside CAS over the top of Tern Hill. At no point did I see him enter, or advise him he was getting close.□</p> <p>Military ATC Supervisor's Narrative:□</p> <p>I was in the ACR at the time of the incident. At the time my attention was focused on Dir who was controlling an another ac under DS, trying to ensure the correct separation was maintained. After receiving the phone call from Prestwick via the Birmingham Sup, I contacted them and they informed me that as the 7431 squawking ac's Mode C had indicated 056 in the area between Crewe and STAFA. I contacted the pilot of the ac in question, Grob G115 who was carrying out a GH sortie but stated he had been at 5500' on Barnsley QNH 1027, which would have put him in CAS.</p>
201403263	19/03/2014	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	9 E	D	CTA	PIPER	Reciprocating	1	Infringement of the East Midlands CTA (Class D) by a PA28 at 3000ft resulting in a loss of separation against an inbound B737.	<p>B737 was established at 9 miles for rwy 27 when PA28 called airborne from Nottingham requesting a transit clearance. He was instructed to remain outside controlled airspace and issued a squawk to identify. PA28 was observed climbing into controlled airspace behind the B737 without a transit clearance. PA28 reported he was climbing to 4000ft and was advised that he had entered controlled airspace without a clearance and told to descend due further inbound traffic. No avoiding action was given as the contacts were diverging and I believed no risk of collision existed. Appropriate CAA action is being taken as a result of this incident.</p>
201403263	19/03/2014	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	9 E	D	CTA	BOEING	Turbofan	2	Infringement of the East Midlands CTA (Class D) by a PA28 at 3000ft resulting in a loss of separation against an inbound B737.	<p>B737 was established at 9 miles for rwy 27 when PA28 called airborne from Nottingham requesting a transit clearance. 201403275	19/03/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	9nm NW	D	CTA	SOCATA	Reciprocating	1	Infringement of the Luton CTA (Class D) by a TB20 at 4700ft. Luton northbound departures were affected. Standard separation maintained.	TB20 entered CAS 9nm NW of Luton tracking SE, the contact climbed to 4700ft. I rang Cranfield who turned the a/c back to the CIT. □ Supplementary 25/03/14: □ When infringing airspace GNS flashes its message light. Unfortunately, in this instance I was so busy with other avionics I didnt get time to look at it until it was too late. Primary Cause - Mistake on Interpretation of an ATC instruction. After 3 successive go around instructions on the missed approach vis: 1- published missed - Climb 1500 on heading 213 then left turn back to the beacon. 2- climb 2500 on heading 213 then left turn back to the beacon, 3- climb 3500' on heading 213 then left turn back to the beacon. As I was climbing through 2500' I was then instructed to 'fly the 120 Daventry radial inbound'. I interpreted this as turn left to fly a course of 120 inbound to Cranfield. I later realised that, what was meant, was turn right inbound to Daventry and actually fly the reciprocal of 120 i.e. 300. I believe that this instruction is ambiguous and am in discussion with Cranfield ATC to amend it to make it clearer. I then received a 5th instruction to climb to 4500' and own navigation back to CIT. Contributory Factors - High ground speed (190kts) due to substantial tail wind component. This blew me into CAS whilst I was setting up the VOR/identifying it, Setting the OBS and intercepting it. - Slow turn to CIT due to unfamiliarity with new avionics set up. The purpose of the training was to familiarise myself with a new EFIS installation on the aircraft and its connection with the GNS 430. - Multiple changes to missed approach from ATC during go around. - Over familiarity with the Standard missed approach at Cranfield which is a left turn
201403278	19/03/2014	EGTT : London (FIR)	DTY	5nm N	A	CTA	PIPER	Reciprocating	1	Infringement of the Daventry CTA (Class A) by an unknown aircraft squawking 7000, indicating 6000ft. Aircraft identified as a PA28. An airliner in descent was stopped at FL110 and turned left to pass behind the infringer. Standard separation maintained.	Just as I took over the TC Midlands position an aircraft infringed controlled airspace roughly 5nm north of DTY. This was believed to be a PA28 at approximately 5800ft. The previous TC Midlands controller had recently transferred an airliner to Birmingham APC descending to FL90. Birmingham telephoned, the previous controller answered on the coordinator line, and was informed that they were stopping the descent of the airliner at FL110 in response to the infringing aircraft. □ Supplementary 25/03/14: □ At the time of the incident I was training a radar trainee. At 1655z I noticed a 7000 squawk enter the DTY CTA northbound indicating 6000ft QNH 1018. Shortly afterwards an airliner was handed over to me by TC passing FL130 descending to FL90. I instructed the trainee to stop the airliner at FL110 and then airliner was turned left to pass behind the unknown aircraft so the contacts did not merge. This action was then co-ordinated with TC. Mode S indicated that the aircraft was a PA28. On leaving CAS the squawk changed to 4550 & was identified by East Midlands. □ Supplementary 27/03/14: □ I had just completed a turbulent low level flight from Wolverhampton to Turweston (avoiding Birmingham) with my elderly passenger. My passenger suffered this flight poorly. (He was not sick at this point) I had also broken my glasses on this leg. One of the arms had snapped off the glasses. We took off from Turweston on our final leg to Sywell. At low level there was moderate turbulence. I had Sywell on standby on my GNS. I have also a stand by nav/com.
201403278	19/03/2014	EGTT : London (FIR)	DTY	5nm N	A	CTA	AIRBUS	Turbofan	2	Infringement of the Daventry CTA (Class A) by an unknown aircraft squawking 7000, indicating 6000ft. 201403323	19/03/2014	EGTT : London (FIR)	D009/D007		G	Danger area	PIPER	Reciprocating	1	Infringement EG D009 and D007 by a PA28 at 1100ft.	An aircraft squawking 0411 was observed flying westerly along the south Devon coast towards D009. Traffic Information was requested from Exeter who stated they had lost comms with the aircraft Ivo Berry Head. The aircraft then penetrated D009, and also D007 as it proceeded along the coast towards Perranporth. At the time of the infringements there was no hazardous activity taking place within the Danger Areas.
201403400	21/03/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	11 W	D	CTR	CESSNA	Reciprocating	1	Infringement of the Luton CTR (Class D) by a C152 at 3100ft. Standard separation maintained.	A 7000 west of GW by 11 miles climbed to 3100 into the CTR without clearance. I put a check all on in case it turned back for GW, nothing was affected. CAIT activated and gave the callsign, it continued northbound and I tracked it into TC. I spoke to TC and they confirmed they were talking to him and it was a C152 out of EGLD into themselves.

201403406	21/03/2014	EGTT : London (FIR)	BHX	12nm SSE	D	CTA	PIPER	Reciprocating	1	Infringement of the Birmingham CTA-2 (Class D) by an unknown aircraft squawking 7000. Aircraft later identified as a PA28. Standard separation maintained.	I was controlling on RAD1 and observed a 7000 squawk (mode S indicated PA28) entering CAS 4nm north of Wellesbourne at 2500' tracking northeast. I put a 'check all' on, carried out a blind call and contacted Coventry without success but Wellesbourne said they had contact and would move him outside CAS, the Ac turned north and did not descend so a second call to Wellesbourne was initiated and the Ac turned south and descended outside CAS. The pilot called me on frequency and I advised him of his position, he stated it was his fault due to instrument error. I instructed him to contact ATC on landing. An aircraft was held on the ground until I was satisfied PA28 was remaining clear of CAS.☐ CAA Closure:☐ Pilot error. Situational awareness. Warning letter sent.
201403434	19/03/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	N	D	CTR	PIAGGIO	Reciprocating	1	Infringement of the Manchester CTR (Class D) by a P149 at 2400ft. Traffic info given. Standard separation maintained.	P149 departed EGCB and tracked northbound activating the Airspace Infringement Warning. P149 was observed at 2200altitude and climbing. As the AIW activated I was accepting a release from North P, to which I informed them that I was not working the 7000 and it was unknown traffic. I had on frequency an RJ100 which was heading 085 degrees and approx 6nm east of Mirsi. I had to turn the RJ100 North to maintain separation. Traffic information was passed. I telephoned EGCB to see if they were working the P149. They were and I told them he had infringed the EGCC CTR and was indicating 2400 feet and asked them to make sure he had the correct QNH set and to fly outside controlled airspace. The P149 left the CTR to the north and the RJ100 was turned downwind.☐ Supplementary 10/04/14:☐ Climbing out of EGCB the ATC informed me that my undercarriage was still showing down I recycled it and checked the visual indicator Trim was set at climb to compensate for U/C being down I recycled again to check that U/C would now go down,which it did or I would need to declare an emergency and return to EGCB The U/C did extend and the it retracted showinig U/C up on the annunciator lights and the visual indicator I informed EGCB that the problem was resolved and continued with the flight. I would appear that this incident wa concurrent with the altitude infringement
201403439	22/03/2014	EGTT : London (FIR)	BKY	10nm NNW	A	TMA	EVEKTOR AEROTECHNIK	Reciprocating	1	Infringement of the LTMA (Class A) by an unknown aircraft squawking 7000, indicating FL88. Aircraft identified as an EV97. Adverse Wx involved. CAIT activated. Standard separation involved.	An aircraft squawking 7000, Mode S ID as an EV97, activated sCAIT and was observed infringing CAS approximately 10nm NNW BKY. The aircraft Mode C indicated up to FL88 where the base of CAS is 5500ft. The pilot made a telephone call to TC and explained that he encountered adverse weather which necessitated a climb. He was briefed on the procedure to follow in such a situation, namely contacting the appropriate ATSU without delay, and was informed that reporting action may be taken. There is not believed to be any associated loss of separation.☐ CAA Closure:☐ Investigation findings: Pilot has analysed the occurrence thoroughly and correctly identified a number of factors that led to the infringement and how it could have been prevented at an earlier stage. The root cause was that he became boxed in by weather while trying to complete a check flight. A warning letter has been issued.
201403450	22/03/2014	EGTT : London (FIR)	EGTK (OXF): Oxford/Kidlington		G	ATZ	PIPER	Reciprocating	1	Infringement of the Oxford ATZ (Class G) by a PA28 at 1800ft. Traffic info given.	I was the TWR/APP controller when I noticed, on the ATM, unknown traffic entering the ATZ to my North West indicating 7000A 018A on SSR. (Aerodrome elevation 270 ft). At the time, a Gulfstream 5, was in the base turn having been cleared for an ILS to RWY 19. There was no other circuit traffic. As the Gulfstream 5 was establishing on the Localiser, I informed the pilot of the Gulfstream 5 of the unknown traffic and the pilot reported TCAS contact. A PA28 was then seen in the overhead transiting North West to South East at approximately 1500 AGL. Mode 3 and C indications on the ATM confirmed it was the previously seen unknown traffic. The PA28 was then visually tracked to the East and then tracked by ATM The PA28's Mode A indication stopped for approximately 5 miles and the aircraft was tracked continually past Chalgrove using Primary Radar before a 5031 Mode A indication was seen coincident with the Primary contact 3 miles North West of Chalgrove. Farnborough LARS North Controller identified the contact.
201403473	23/03/2014	EGTT : London (FIR)	BHX	9nm S	D	CTR	VANS	Reciprocating	1	Infringement of the Birmingham CTA-2 (Class D) by an unknown aircraft squawking 7000 at 2000ft. Aircraft identified as a Vans RV10. Traffic info given. Standard separation maintained.	A 7000 squawk was observed approaching the CTR boundary from the west indicating 2000ft unverified (mode S indicated callsign was a Vans RV10). Before the unknown entered the zone I vectored a B738 who was joining at GROVE from MOSUN on a heading to pass North of the unknown & to maintain FL80, traffic information given. The unknown aircraft entered Birmingham airspace at 1241z and continued on a SE direction. CHECKALL / blind calls / phone call to Coventry made. The unknown aircraft continued on a SE track until it disappeared from Radar SE of Cranfield. A couple of hours previously the same aircraft had routed the opposite direction, just remaining clear of CAS. 6 aircraft were given extended routings / approaches due to the above infringer. The B738 stated after landed his flight time had been extended by 7 mins & 400kgs of extra fuel used.

201403497	24/03/2014	EGTT : London (FIR)	EGLC (LCY): London city	12 E	A	TMA	PIPER	Reciprocating	1	Infringement of the LTMA (Class A) by a PA28 at 2800ft. Standard separation lost against an FK50 inbound to the City.	At 1128z PA28 entered Class A controlled airspace climbing to 2.9A (base 2.4A) on a south-easterly track towards Rochester. An FK50, a London City inbound was slightly altered in heading to ensure separation, which was maintained with a closest lateral distance of approximately 6nm. The PA28 then left controlled airspace a few minutes later around the area of Rochester. □ Supplementary 12/05/14 □ The PA28 entered CAS climbing to 2800ft (base 2500ft) on a track towards EGTO. A London City inbound was turned 10deg right to ensure separation. However, separation was lost at 11:28:50, 4.4nm 1200ft, before being regained 24 seconds later. PA28 then left CAS later around the area of Rochester.
201403497	24/03/2014	EGTT : London (FIR)	EGLC (LCY): London city	12 E	A	TMA	FOKKER	Turboprop	2	Infringement of the LTMA (Class A) by a PA28 at 2800ft. Standard separation lost against an FK50 inbound to the City.	At 1128z PA28 entered Class A controlled airspace climbing to 2.9A (base 2.4A) on a south-easterly track towards Rochester. An FK50, a London City inbound was slightly altered in heading to ensure separation, which was maintained with a closest lateral distance of approximately 6nm. The PA28 then left controlled airspace a few minutes later around the area of Rochester. □ Supplementary 12/05/14 □ The PA28 entered CAS climbing to 2800ft (base 2500ft) on a track towards EGTO. A London City inbound was turned 10deg right to ensure separation. However, separation was lost at 11:28:50, 4.4nm 1200ft, before being regained 24 seconds later. PA28 then left CAS later around the area of Rochester.
201403498	24/03/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	NE	D	CTR	OTHER	Reciprocating	1	Infringement of the Gatwick CTA (Class D) by a Sportsruiser at 1800ft. Standard separation maintained.	Sportsruiser was noticed having climbed into controlled airspace upon activation of CAIT. Aircraft levelled at 1800ft indicated on Mode C where the base is 1500ft. As the aircraft was squawking the KR conspicuity code, I phoned Redhill who were aware of the traffic and advised them of the indicated level of the Sportsruiser, asking them to pass on to the pilot that he must descend. The Mode-C indication then rapidly descended to below 1500ft and the aircraft continued outside controlled airspace. KK TWR were advised by FIN of the situation as they had traffic departing on a DVR SID, but the Sportsruiser had descended outside controlled airspace before any action was required to maintain separation with the departure.
201403500	24/03/2014	EGTT : London (FIR)	BRI	10nm SW	D	CTA	GROB	Reciprocating	1	Infringement of the Bristol CTA (Class D) by a Grob G115E at FL62. Military ATC were contacted and subsequently turned the aircraft to the South. Standard separation maintained.	
201403528	11/03/2014	EGTT : London (FIR)	Culcheth		D	CTR	CESSNA	Reciprocating	1	Infringement of the Manchester CTR (Class D) by an unknown aircraft, observed to climb to 1800ft in the confines of the LLR. Aircraft identified via Barton as a C172. Standard separation maintained.	

201403613	26/03/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	9nm WSW	D	CTR	FLY BUY ULTRALIGHTS	Reciprocating	1	Infringement of the Manchester CTR (Class D) by an unknown aircraft squawking 7366, resulting in loss of separation with an A321 in descent. Aircraft identified as an Ikarus C42. Traffic info given.	Whilst awaiting traffic from Approach South (APS) I was monitoring traffic in the Manchester Low Level Route (LLR). An aircraft squawking 7366 with Mode C was noted southbound having appeared to have departed Barton. Using Mode S data I ascertained that this aircraft was an Ikarus C42. The aircraft was tracking slightly East of South and, whilst within the LLR was consistently heading toward the eastern limit of the LLR. APS transferred an A321 to me and I descended the aircraft, which was heading, from memory, 290. I pointed the Ikarus C42 out to APS and asked him to call the aircraft to ensure it did not infringe the zone, which APS did, using the aircraft callsign. Whilst this contact and subsequent identification process was being achieved, I advised the A321 of the situation and that I would be vectoring him around the other traffic. The Ikarus C42 did experience some difficulty in selecting the squawk assigned by APS and, although I was satisfied that identification was valid, notably from the Mode S data, I continued to maintain lateral separation between the A321 and the Ikarus C42, although this was less than 5nm. My alternative would have been to either enter the Liverpool CTR, which would have involved landline coordination using a line which had not been answered on a couple of earlier occasions that morning causing me to consider this as a less valid option, or vectoring away from the Ikarus C42, exiting CAS with all the associated risks that presents. As it was, APS achieved identification on the Ikarus C42 and validated the Mode C data, which also turned out of the Manchester CTR, having briefly entered by, perhaps 0.5nm. This enabled me to position the A321 onto the ILS 05L with minimal delay.☐
201403613	26/03/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	9nm WSW	D	CTR	AIRBUS	Turbofan	2	Infringement of the Manchester CTR (Class D) by an unknown aircraft squawking 7366, resulting in loss of separation with an A321 in descent. Aircraft identified as an Ikarus C42. Traffic info given.	Whilst awaiting traffic from Approach South (APS) I was monitoring traffic in the Manchester Low Level Route (LLR). An aircraft squawking 7366 with Mode C was noted southbound having appeared to have departed Barton. Using Mode S data I ascertained that this aircraft was an Ikarus C42. The Ikarus C42 did experience some difficulty in selecting the squawk assigned by APS and, although I was satisfied that identification was valid, notably from the Mode S data, I continued to maintain lateral separation between the A321 and the Ikarus C42, although this was less than 5nm. My alternative would have been to either enter the Liverpool CTR, which would have involved landline coordination using a line which had not been answered on a couple of earlier occasions that morning causing me to consider this as a less valid option, or vectoring away from the Ikarus C42, exiting CAS with all the associated risks that presents. As it was, APS achieved identification on the Ikarus C42 and validated the Mode C data, which also turned out of the Manchester CTR, having briefly entered by, perhaps 0.5nm. This enabled me to position the A321 onto the ILS 05L with minimal delay.☐
201403621	26/03/2014	EGTT : London (FIR)	EGKB (BQH): Biggin hill	6 E	A	TMA	FLIGHT DESIGN	Reciprocating	1	Infringement of the LTMA (Class A) by a CTSW at 4000ft. Standard separation maintained.	At 1527z secondary CAIT alerted me to a 7047 squawk East of Biggin Hill entering the TMA passing 2.5A. The Mode S identified for the aircraft. Having waited a few moments to confirm that the aircraft would not immediately leave again via descent, I phoned Biggin Hill to request the pilots intentions. Biggin Hill ATC advised me they were working the aircraft and that it had just gone IMC. The aircraft was now passing 2.9A and climbing. Therefore I instructed Biggin Hill ATC to get the pilot to call me on Thames Radar 132.7. The aircraft then called me and reported he was climbing VFR to remain VMC as he was a VFR only rated pilot, his level at this point was verified as 4.0A (base of controlled airspace 2.4A) The pilot reported he had tried to approach a few local airports and was unable to make the require visual criteria for an approach and needed my assistance to find a suitable airfield for a landing. At this point I called D&D and informed them of the situation and asked them to phone local airfields to find somewhere with the required weather minima. I also informed the relevant sector who's airspace is next to mine to "watch" the aircraft but that he was under my partial control. Southend airport was identified as having VMC weather of 10km vis FEW014 and the pilot was informed of this, he decided to attempt to approach Southend. The pilot was given a rough range and bearing to Southend but was informed that his priority must be to remain clear of cloud. I thought it not prudent to instruct the pilot to descend outside CAS or attempt to fly IFR, the safer option at that point was to let him fly VFR inside Class A TMA. The aircraft left CAS en-route to Southend and was identified and transferred to Southend ATC 130.775 at 1545. The investigation findings were that the pilot was caught
201403626	26/03/2014	EGTT : London (FIR)	EGCB : Manchester/Barton	5nm W	D	CTA	ROBINSON	Reciprocating	1	Infringement of the Manchester CTR (Class D) by an unknown aircraft with Mode C indicating 2100ft, resulting in loss of separation with a B737 in descent. Aircraft later identified as an R44. Traffic info given.	On duty as Final Director. Easterly dual ops. Low traffic levels. B737 was being positioned towards a left base. Just before B737 was transferred to me by Approach South I heard the controller say something along the lines of, "I don't know anything about the 7351 squawk" or "keep an eye on that 7351 squawk". I changed my picture in order to see what my colleague was referring to. I then noticed a 7351 squawk approximately 5nm west of Manchester/Barton and showing Mode C 2100ft. Almost immediately after the controller on Approach South pointed out the 7351 squawk (which was infringing); the B737 called me. I acknowledged the call from the crew and then took a couple of seconds to ascertain my best course of action (the aircraft tracks were already diverging). Although a loss of separation had occurred (and was still occurring) I decided that the best course of action was to inform the crew of the B737 about the unidentified aircraft but to NOT issue avoiding action as standard separation (5 and 5) was about to be regained. I do not know why the infringing aircraft was squawking a Manchester assigned code. The only thing I was aware of was that the Approach controller did NOT issue the aircraft with this squawk and thus the aircraft was not identified; thus a loss of separation has been recorded. ☐ Supplementary 28/03/14:☐ A 7351 squawk was observed 1 mile east of the LLR (Low level route) west of Manchester/Barton at 2000ft (mode S). I had not allocated that squawk to any aircraft although it is a Manchester approach squawk. The aircraft was called as it entered the LLR at 2000ft but with no response. I phoned the Manchester/Barton AFISO and asked if they
201403626	26/03/2014	EGTT : London (FIR)	EGCB : Manchester/Barton	5nm W	D	CTA	BOEING	Turbofan	2	Infringement of the Manchester CTR (Class D) by an unknown aircraft with Mode C indicating 2100ft, resulting in loss of separation with a B737 in descent. Aircraft later identified as an R44. Traffic info given.	On duty as Final Director. Easterly dual ops. Low traffic levels. B737 was being positioned towards a left base. Just before B737 was transferred to me by Approach South I heard the controller say something along the lines of, "I don't know anything about the 7351 squawk" or "keep an eye on that 7351 squawk". I do not know why the infringing aircraft was squawking a Manchester assigned code. The only thing I was aware of was that the Approach controller did NOT issue the aircraft with this squawk and thus the aircraft was not identified; thus a loss of separation has been recorded. ☐ Supplementary 28/03/14:☐ A 7351 squawk was observed 1 mile east of the LLR (Low level route) west of Manchester/Barton at 2000ft (mode S). I had not allocated that squawk to any aircraft although it is a Manchester approach squawk. The aircraft was called as it entered the LLR at 2000ft but with no response. I phoned the Manchester/Barton AFISO and asked if they

201403667	19/03/2014	EGTT : London (FIR)	Birchington	Kent	G	ATZ	BELL	Turboshaft	1	Infringement of the Manston ATZ (Class G) by a B206 at 1000ft.	This was a cross-TRE and Line Check flight. We were returning to the company from the west with an hydraulics fail routine. I was the radio operator and handling pilot. I acknowledged a tower request to approach from the north and remain outside the ATZ (due to a planned departure). As I was carrying out my required check responses and noting that we were on the boundary (by virtue of a known landmark ahead) tower advised we were inside the ATZ and to orbit left which I did. I believe we were outside the zone but acknowledge the lack of safety margin in my planning. I rang tower to apologise afterwards.
201403718	26/03/2014	EGTT : London (FIR)	EGLL (LHR): London/Heathrow		A	CTR	PIPER	Reciprocating	1	Infringement of the London CTR (Class A) by an unknown aircraft. Aircraft believed to be a PA28. An inbound A330 was given a wider downwind heading to ensure the infringing aircraft continued to pass behind. Standard separation maintained.	Working as FIN controller a PCAIT return was spotted in the proximity of White Waltham whilst inbound aircraft were landing 09L&R. The a/c was observed to follow a SSW track, enter CAS then track S for approximately 3nm before exiting the CTR. TCSVFR was contacted subsequently and was able to track the infringing a/c. They subsequently identified after it contacted Farnborough LARS as a PA28. This infringing a/c was issued a 0431 squawk. The inbound pattern was full and as they PCAIT triggered the infringer was geographically placed in the middle of a stream of a/c inbound from the south. Its placement meant that separation may have been immediately eroded with an A330 on a downwind heading. The infringing a/c's track showed that it was going to pass behind all the aircraft on frequency and therefore did not present any immediate confliction. The A330 was given a wider downwind heading to ensure that the infringing aircraft continued to pass behind. No avoiding action was issued as it was felt that it would not have helped the situation, and that the infringing a/c's position would mean that it would have been impossible to see from the cockpit of the A330. ☐ Supplementary 03/04/14:☐ The infringing aircraft was never more than 0.3nm inside the CTR and due to the aircraft turning almost as soon as infringing, it could be assumed that the pilot became aware of their position and made efforts to exit the airspace. The A330 did not enter the London CTR whilst the infringement was in progress. However, under the circumstances of this report, the controllers actions were prompt, effective and appropriate.
201403718	26/03/2014	EGTT : London (FIR)	EGLL (LHR): London/Heathrow		A	CTR	AIRBUS	Turbofan	2	Infringement of the London CTR (Class A) by an unknown aircraft. Aircraft believed to be a PA28. An inbound A330 was given a wider downwind heading to ensure the infringing aircraft continued to pass behind. Standard separation maintained.	Working as FIN controller a PCAIT return was spotted in the proximity of White Waltham whilst inbound aircraft were landing 09L&R. The a/c was observed to follow a SSW track, enter CAS then track S for approximately 3nm before exiting the CTR. TCSVFR was contacted subsequently and was able to track the infringing a/c. They subsequently identified after it contacted Farnborough LARS as a PA28. This infringing a/c was issued a 0431 squawk. Its placement meant that separation may have been immediately eroded with an A330 on a downwind heading. The infringing a/c's track showed that it was going to pass behind all the aircraft on frequency and therefore did not present any immediate confliction. The A330 was given a wider downwind heading to ensure that the infringing aircraft continued to pass behind. No avoiding action was issued as it was felt that it would not have helped the situation, and that the infringing a/c's position would mean that it would have been impossible to see from the cockpit of the A330. ☐ Supplementary 03/04/14:☐ The infringing aircraft was never more than 0.3nm inside the CTR and due to the aircraft turning almost as soon as infringing, it could be assumed that the pilot became aware of their position and made efforts to exit the airspace. The A330 did not enter the London CTR whilst the infringement was in progress. However, under the circumstances of this report, the controllers actions were prompt, effective and appropriate.
201403737	29/03/2014	EGTT : London (FIR)	MONTY	NE	A	Other	PIPER	Reciprocating	1	Infringement of the Manchester TMA (Class A) by an unknown aircraft squawking 7000, climbing to FL70. Aircraft identified as a PA32. Standard separation maintained.	Whilst working several streams of traffic, on combined WAL/IOM sector my attention was drawn by the sudden appearance of magenta data block approx 1-2 miles NE of MONTY. The data block showed a PA32 squawking 7000 with a height readout of FL65 and climbing. PA32 then tracked towards the SW whilst still climbing, saw level read out pass FL70, but too busy vectoring NM inbound away from the path of PA32, and ensuring the separation of the other traffic streams, to see at what point the infringer stopped climbing.☐ CAA Closure:☐ No response from PIC. Closed due to elapsed time.
201403740	29/03/2014	EGTT : London (FIR)	Woodvale Fillet		A	TMA	GROB	Reciprocating	1	Infringement of the Manchester TMA (Class A) by an unknown aircraft, squawking 0450 at FL65. Aircraft identified as a Grob G115. Standard separation maintained.	Working as IOM/WAL Planner noticed 0450 squawk at FL65 heading south towards active Woodvale fillet, A/C did not turn away but entered causing data block to turn magenta. C/S of Grob G115 appeared on data block as A/C continued south, called Blackpool to ascertain A/C intentions and to get A/C to change to correct squawk of 7375 for operations in the active Woodvale fillet. Blackpool controller informed me she was working tower and approach combined and didn't know who it was. A/C then turned to the North and left.

201403746	30/03/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl		D	CTA	PIPER	Reciprocating	1	Possible infringement of the Manchester CTA (Class D) by an unknown aircraft squawking 7000, indicating 1500ft. Aircraft identified as a PA28, experiencing undercarriage problems. Traffic info and avoiding action given to a Manchester inbound airliner.	I was operating as the App South controller. At 1042 hours I turned an airliner onto a Southerly heading along the low level route at FL60 (05L for landing). There was an unknown aircraft operating in the LLR at 1300 ft roughly West to East. I then became aware of this aircraft indicating 1500 ft which caused the AIW to alert. The airliner was approx 4nm North of the return so I issued a right turn to route behind and monitored the AIW. The Mode C continued to climb so I issued an avoiding action turn to the airliner of 260deg and passed traffic info. The unknown aircraft continued to the Barton overhead in a climb to 2000 ft (no longer infringing). Enquiries with Barton revealed that the aircraft was in an emergency situation and was experiencing problems with the undercarriage. It appeared that the aircraft began its climb approximately 3-4 miles prior to the boundary of uncontrolled airspace above Barton.□ Supplementary 15/07/14:□ This loss of separation was caused by the pilot of the PA28 climbing above the confines of the Manchester Low Level Route. This was due to the poor manual handling of the aircraft following a technical problem.
201403746	30/03/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl		D	CTA	BOEING	Turbofan	2	Possible infringement of the Manchester CTA (Class D) by an unknown aircraft squawking 7000, indicating 1500ft. Aircraft identified as a PA28, experiencing undercarriage problems. Traffic info and avoiding action given to a Manchester inbound airliner.	I was operating as the App South controller. At 1042 hours I turned an airliner onto a Southerly heading along the low level route at FL60 (05L for landing). There was an unknown aircraft operating in the LLR at 1300 ft roughly West to East. 201403750	30/03/2014	EGTT : London (FIR)	EGBB (BHX): Birmingham	South West	D	CTR	ROBINSON	Reciprocating	1	Infringement of the Birmingham CTR (Class D) by an R44 squawking 7003 with no Mode C information. Check all imposed. Standard separation maintained.	At 1300 UTC we observe a 7003, with no Mode C information from SW corner entered the zone. After check all, I transmitted blind to get his attention. Closest he came to the airfield was 6.8 miles when he turned westbound and left the zone. After observing his flight path he went to EGBO and when landed he contacted with Birmingham ATC. The pilot confirmed that he had a clutch trouble and he tried to fix the problem, when he realised his position at Solihull, that is when he turned westbound
201403754	30/03/2014	EGTT : London (FIR)	DAYNE		D	CTR	OTHER	Reciprocating	1	Infringement of the Manchester CTR (Class D) by an aircraft squawking 7000 with Mode C indicating 3400ft. LISTO departures were suspended. Standard separation maintained.	A 7000 return was noticed by the approach controllers to be in controlled airspace to the south east of the Manchester CTZ from 1404-1410. The mode C indicated 3400' in an area where the base of controlled airspace is 3000'. The LISTO departures from 05L were suspended until the aircraft left controlled airspace.□ Supplementary (1) 31/03/14:□ I was concentrating on avoiding the Danger Areas D314 and D304 which are south of Buxton. The ground here is up to 1800ft above sea level so I was flying at around 3000 ft to ensure adequate clearance in hazy conditions. Unfortunately I crept above this level and unintentionally infringed the controlled airspace in this area which starts at 3000ft. Lack of concentration on my part was the main cause. □ Supplementary (2) 31/03/14:□ CAIT was observed a few miles SE of DAYNE at 14:04. Aircraft indicating A33. A call was made to Manchester Approach who were not in communication with the aircraft. Subsequent phone call from approach revealed they were unable to contact pilot. The aircraft turned south and left CAS at approximately 14:08. The aircraft was traced and a message was subsequently passed to the pilot.
201403795	24/03/2014	EGTT : London (FIR)	Bovingdon	3.5nm SW	A	TMA	OTHER	Unknown	2	UK AIRPROX 2014/025 - Military helicopter and a PA28, 3.5nm Southwest of Bovingdon in Class G airspace. Military helicopter initiated a climbing left evasive manoeuvre to 2550ft and subsequently infringed LTMA (Class A) airspace.	This AIRPROX has been subject to a separate review by the United Kingdom AIRPROX Board (UKAB). AIRPROX Board (UKAB) information indicates that this AIRPROX was due to a late sighting by both pilots. □ A recommendation has been raised as a result of this AIRPROX.

201403818	30/03/2014	EGTT : London (FIR)	THORPE RP		A	CTR	BELL	Turboshaft	1	Infringement of the London CTR (Class A) by a helicopter squawking 7000 at 1400ft. Avoiding action given.	I was working LL SVFR, mentoring a trainee. At approx 1700, helicopter called on frequency, but due to other traffic and ongoing mentor instruction was told to standby. While in the process of instructing and discussing options for a LCY CTR transit, I noticed a 7000 squawk enter the LON Zone in the vicinity of EGTF. I shouted over to LL FIN that the "7000 is real" to alert them to the infringement. Since the pilot had already called, I asked if he was over Thorpe, to which he replied in the affirmative (therefore identified). At this point helicopter showed no intention of stopping his transit, and was flying towards LL final approach. I immediately instructed to turn southbound, an instruction that appeared to be only partially complied with since pilot was "requesting H3". It appeared that helicopter had entered an orbit in the vicinity of Thorpe. We asked the pilot to pass his message, and were made aware that it was on a famil flight for H3 and H4. Heathrow was on E'lys and pilot was informed that H3 was closed and to leave the zone to the South and expect H7 later. We subsequently asked the pilot if he had a NSF, which he didn't, therefore we restricted his transit to the confines of H7 up to LW and reciprocal. □ CAA Closure: □ Investigation findings revealed that the pilot was not fully aware of his proximity to CAS. The root cause of this incident was a poor level of knowledge. A navigation flight is to be undertaken with a staff flight examiner.
201403874	01/04/2014	EGTT : London (FIR)	POL	5nm S	A	TMA	CEA	Reciprocating	1	Possible infringement of Manchester TMA (Class A) by a DR300.	Aircraft requested climb to 3300A to remain below CAS. Aircraft set off AIW and observed at 3500A. Pilot informed and given QNH again; he insisted his indication read that he was below CAS.

201403900	02/04/2014	EGTT : London (FIR)	EG D036	Portsmouth	G	Danger area	PIPER	Reciprocating	1	Infringement of active Danger Area EG D036 (Portsmouth) by a PA28 at 1700ft.	I was controlling on LARS East when, at 0923L, I received a call from a PA28 with requesting to transit EGD036. He notified that his position was 5nm to the north of GARM1, which would have already placed him within the confines of EGD036. I instructed the aircraft to squawk mode 3/A 4531 and identified it as approximately 6nm within EGD036 at 1700ft. Identification took place at 50 04N 001 22W and the aircraft exited the danger area at 0933L position 50 23N 001 20W. I informed the pilot that he was already within the confines of an active danger area, that it was active from 0800 and that he must ensure he calls for clearance to cross before the FIR boundary. He requested if his transit was approved, which was too late as he was already in the middle of the area. He informed me that it was a late handover (no handover took place to me) from French ATC to London Info initially, who then transferred him to the Mil frequency. There was no live firing taking place in EGD036 during this time. Live firing in this danger area was scheduled for later in the day.☐ CAA Closure:☐ No response from owner. Closed due to elapsed time.
201403969	03/04/2014	EGTT : London (FIR)	EGLM : White waltham	2 S	D	CTR	YAKOVLEV	Reciprocating	1	Infringement of the London CTR (Class A) by a YAK52 squawking 7000 with no Mode C. Separation lost with two Heathrow inbound.	I was working as the LARS West and Approach controller with the sectors bandboxed as it was low traffic levels. I had just released a departure off Runway 06 when I noticed a 7000 squawk departing the London CTR approximately 5 miles south of EGLM tracking South. An aircraft called me shortly afterwards but I did not catch the callsign as the pilot was very accented - I told the pilot to standby as my departure was airborne and I wanted to speak to it first. I then returned to the aircraft whose callsign I missed and asked him to pass his message. I managed to get all the details from the pilot after a few attempts as he had a very strong foreign accent. He was subsequently given a squawk but not verified as he had no Mode C.☐ Supplementary 03/04/14: ☐ Secondary CAIT activated SE of the White Waltham ATZ with traffic squawking 7000, with no mode C. It appeared to have departed from White Waltham's north easterly runway and tracked South, through the London control zone before exiting near Bracknell. Details of the aircraft were obtained from the White Waltham radio operator and Farnborough LARS West, whom the aircraft called after leaving the Lon CTR.
201403969	03/04/2014	EGTT : London (FIR)	EGLM : White waltham	2 S	D	CTR	UNKNOWN	Unknown		Infringement of the London CTR (Class A) by a YAK52 squawking 7000 with no Mode C. 201404040	26/03/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	West of Dunstable Downs	D	CTR	CESSNA	Reciprocating	1	Infringement of the Luton CTR (Class D) by A C152 at 1100ft. Traffic info given. Standard separation maintained.	I was on duty as the Luton INT controller vectoring traffic for runway 08. At approximately 1723 a 7000 squawk was observed to enter the control zone west of Dunstable Downs on a northerly track indication 1,100 feet. An A319, established on the ILS at 4,000 feet was advised of the infringing traffic. The A319 reported having the traffic in sight, identified it as a Cessna 152 and requested to continue the approach. The 7000 squawk departed the zone at 1725, continued north and was last observed 4 NM south west of Cranfield.

201404051	04/04/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	Thelwall VRP	D	CTR	OTHER	Reciprocating	1	Infringement of the Manchester CTR (Class D) by an EV97 at 1000ft. Standard separation maintained.	At about 1458 a 7000 squawk was observed to enter the Manchester CTR at about the Thelwall VRP indicating 1000ft via Mode C. This activated AIW on the radar. From the radar the aircraft was believed to be a microlight. There was no response to either blind transmissions using the callsign nor was the aircraft from Barton as a phone call was made. Stafa P called to ask if I was working the aircraft and I advised them that neither myself nor Barton had spoken to the aircraft. Shortly after it was observed that the microlight was descending into Stretton aerodrome, and didn't appear to get airborne again afterwards. WM was informed and advised that an airliner on a desig was already airborne and turning east away from the 7000 squawk. □ Supplementary 14/04/14 □ An agreement between Manchester NATS and the strip owner allowing entry into the zone by not more than a mile and no higher than max alt of the LLR without obtaining clearance or communication with ATC when using the westerly runway had lapsed unbeknown to the pilot. The aircraft track flown strictly adhered to this procedure. Aircraft using the strip communicate on safetycom in its vicinity to ensure safe local movements. Unfortunately, this meant that in this case ATC could not make contact. The fault was with myself the pilot who should have made himself aware of the status of the agreement and communicated with ATC before approaching the zone boundary.
201404078	04/04/2014	EGTT : London (FIR)	Mayfield		A	TMA	AVIONS ROBIN	Reciprocating	1	Possible infringement of the LTMA (Class A) by an unknown aircraft squawking 7000 at 2700ft. Aircraft identified via Shoreham as a DR400. Traffic info given. Standard separation maintained.	Whilst working as the INT controller I observed a 7000 squawk NE MAY by aprpx. 10 miles indicating 2600. At the time I was vectoring an A319 for an approach to 26L. The 7000 squawk then went to 2700. I had plenty of time to vector the A319 5 miles clear of the infringer. I gave traffic to the A319 on the infringer and told him to expect a little less than a 10 mile final. All of this he was happy with. I then gave a blind transmission to see if said infringer was on the freq. It wasn't. I called the GS over and split the sector. The splitting of the sector was happening anyway due to an increase in traffic. B737 and EMB170 were both vectored around the Infringer so as to maintain 5000'. Eventually as the infringer moved SW of MAY it descended to 2300. We tracked it and established it was a DR400.
201404078	04/04/2014	EGTT : London (FIR)	Mayfield		A	TMA	AIRBUS	Turbofan	2	Possible infringement of the LTMA (Class A) by an unknown aircraft squawking 7000 at 2700ft. 201404241	05/04/2014	EGTT : London (FIR)	EGKB (BOH): Biggin hill		G	ATZ	ROCKWELL	Reciprocating	1	Infringement of the Biggin Hill ATZ (Class G) by a Rockwell 114 squawking 7000 at 1600ft.	I was on duty as the Approach ATCO, at approx 11.54 I noticed a 7000 squawk at altitude 1,600ft on the ATM from the West tracking East towards the ATZ. I warned the Aerodrome ATCO of this aircraft in case it penetrated the ATZ and conflicted with circuit traffic. The aircraft subsequently entered the ATZ from the West at high speed before crossing through the final approach track. A short time later the aircraft changed its squawk to 0012 and Thames Radar were contacted who provided the identity and flight details of the aircraft. ☐ CAA Closure:☐ Pilot error. Pilot distraction, spatial awareness issues. A warning letter has been issued.
201404276	09/04/2014	EGTT : London (FIR)	EGSX : North Weald	1nm S	D	CTA	PIPER	Reciprocating	1	Infringement of the Stansted CTR and CTA (Class D) by an unknown aircraft squawking 7000. Aircraft identified as a PA28. CAIT activated. Standard separation maintained.	I noticed a 7000 squawk enter the CTR to the SW of Stansted at 2.1A (Base 1.5A) at 14.53. The contact tracked westerly through the CTR maintaining 2.1A activating CAIT. The contact was then seen to track along the southern side of the Luton control zone then to the west of it, before performing some orbits then it disappeared at time 15.16. A passing contact on Luton Radars frequency described it as "a low wing single engine monoplane a lot like a Cherokee" although registration could not be identified.☐ Supplementary 10/04/14:☐ PA28, (mode S showed callsign on radar as the contact had alerted CAIT), tracked West / North West through a CTA at Stansted, Mode C reading 1700ft and 1800ft. I alerted Airports, and asked him to inform North TMA, and I also contacted Stansted Tower. I allowed the outbounds to continue as the east departure was already airborne and the SID track was well behind the infringer, and the next two outbounds were Cpt and their SID track also kept them clear of the infringing traffic. I tried several times to make contact.
201404298	05/04/2014	EGTT : London (FIR)	EGSD : Great Yarmouth/ North Denes		G	ATZ	JODEL	Unknown	1	Infringement of the North Denes ATZ (Class G) by an unknown aircraft squawking 7000, at approx 1200ft. Aircraft identified as a Jodel D11. Traffic info given.	The pilot of an outbound helicopter taxing to the landing/departure spot queried the presence of an aeroplane that he observed South of the Heliport. The traffic was not known to ATC and not in RTF contact. Visually estimated to be within the ATZ, height estimated 1200' approx. Radar confirmed it within the ATZ lateral limits. Radar requested to track. Aircraft continued to manoeuvre within ATZ South of Runway 27 while helicopter departed. At about 0955 aircraft departed South tracked by radar. 1007 aircraft disappeared off Radar overhead an airfield. Airfield confirm Jodel D11 landed at that time. Jodel D11 tel to say he tried to contact North Denes on 123.4 about 5 times but nothing heard so assumed we were shut.
201404298	05/04/2014	EGTT : London (FIR)	EGSD : Great Yarmouth/ North Denes		G	ATZ	AGUSTA BELL	Turboshaft	2	Infringement of the North Denes ATZ (Class G) by an unknown aircraft squawking 7000, at approx 1200ft. 201404340	10/04/2014	EGTT : London (FIR)	EG D036	Portsmouth	G	Danger area	JODEL	Reciprocating	1	Infringement of active Danger Area EG D036 (Portsmouth) by a Jodel DR221.	Jodel DR221 outbound reported onto the frequency at 11:21; after ascertaining its details; I observed on the FID an aircraft on a 1177 in D036. I arranged with military ATC for the a/c to cross the DA's and then informed the pilot of DA activity and his clearance. Military ATC requested we inform the pilot to contact them on landing.
201404353	10/04/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	NE	D	CTA	PIPER	Reciprocating	1	Infringement of the Gatwick CTA (Class D) by a PA28 at 1800ft. Standard separation maintained.	Secondary Cait showed a KB squawk entering the NE corner of the KK cta. I rang KB atc and asked them to turn it east to exit the cta asap. Kb advised that the aircraft was going to Shoreham vfr. The subject aircraft actually tracked south-east to exit. Fortunately no KK inbounds on 26L needed to be broken off.
201404370	11/04/2014	EGTT : London (FIR)	LIPGO	7nm E	G	Danger area	CESSNA	Reciprocating	1	Infringement of NOTAMed Danger Area EG D201 (Aberporth) by an unknown aircraft at 4500ft. Aircraft identified as a C172. Possible faulty transponder involved.	I was operating as Radar 1 providing ATSOCAS on 119.650. D201 and D201A were open with the airspace NOTAMed from 0800z to 1500z SFC to FL660. At approximately 0840z there was a very broken transmission made on 119.650 to which I responded but got no further response. This was heard by two of my colleagues in the room who had listened to the transmission and it was considered breakthrough on the frequency. At 0852z a return was spotted inside the D201 'northern stub' tracking West to East approximately 3nm south of the boundary line of D201B. On observing the return and establishing that it was in fact consistent with an aircraft a blind call was made on the frequency. There was no response and I called military ATC who stated they had a weak radar contact, possibly inside D201 and were trying to get good two way communication. Following discussion I requested the aircraft was transferred to me for a service and to help identify the intruder. C172 then called on frequency at 0855z. His English language was exceptionally poor and the RT very broken but I established that he was climbing from 2500ft up to 5500ft which would have been below our theoretical radar coverage in that area although by this time I was getting a weak primary return. The main receiver for CH20 was not receiving the calls and the communications were initially only received through multichannel CH24 which was selected to the ATSOCAS frequency. The aircraft was given a BS and asked to squawk 4530. This brought up a random squawk and the pilot advised that he thought his transponder was faulty. The aircraft was then asked to squawk standby. The details of the flight were obtained and I asked the aircraft if he was aware that he had penetrated the danger area and advised that reporting
201404373	11/04/2014	EGTT : London (FIR)	Not specified		A	TMA	PITTS	Reciprocating	1	Infringement of the London TMA (Class A) by an aircraft squawking 7004 indicating 2700ft. CAIT activated.	I was the Heathrow Final Director at the time of the incident. A CAIT alert was generated with a 7004 squawk indication 2700ft with an A320 having just passed overhead it. The aircraft continued to manoeuvre erratically in both heading and altitude and was in and out of controlled airspace. At one point the aircraft was seen at about 3300ft inside controlled airspace. I reported this to GS Airport who tracked the aircraft. Aircraft details passed by White Waltham.☐ Supplementary 14/04/14:☐ Analysis of the radar replay confirms that there was no loss of separation. The radar suggests that the aircraft was performing acrobatics in a position where the base of CAS is 2500' with the pilot possibly believing that he was a little further west (1nm) where the base of CAS is 3500'. However, the pilot advised the Ops Room that he did not fly above 2400'.
201404373	11/04/2014	EGTT : London (FIR)	Not specified		A	TMA	AIRBUS	Turbofan	2	Infringement of the London TMA (Class A) by an aircraft squawking 7004 indicating 2700ft. CAIT activated.	I was the Heathrow Final Director at the time of the incident. A CAIT alert was generated with a 7004 squawk indication 2700ft with an A320 having just passed overhead it. The aircraft continued to manoeuvre erratically in both heading and altitude and was in and out of controlled airspace. At one point the aircraft was seen at about 3300ft inside controlled airspace. However, the pilot advised the Ops Room that he did not fly above 2400'.

201404411	11/04/2014	EGTT : London (FIR)	EGBB (BHX): Birmingham	Bearing 150 Range 7.7nm	D	CTA	CESSNA	Reciprocating	1	Infringement of the Birmingham CTA (Class D) by a C152 squawking 1177 with no Mode C. Check all imposed. Standard separation maintained.	I was controlling on RAD 1 with R/W33 in use. I was working JS32 who had left Chase from the North at FL90 when I observed a FIS (1177) squawk with no Mode C East of the Warwick VRP approaching the CTR from the South tracking 330deg but believed it would be speaking to London Information. As the a/c continued I became uneasy and called London Information but they were unable to identify it. I turned the JS32 heading 240 and imposed a Check All whilst also coordinating with PC to cancel silent handovers and coordinate that the next inbound, DHC8, would hold at Chase FL100. Neither Wellesbourne nor Coventry could identify the a/c. I opened RAD2 and handed over DHC8. The a/c infringed CAS continuing towards Birmingham, I released fltnum3AE on a COWLY departure and coordinated a route and climb with TC to maintain clear of the unknown a/c. I vectored JS32 to the West and then South of the a/c positioning for an approach once the a/c had vacated CAS whilst RAD2 vectored DHC8 East of the airfield then South to complete his approach. The a/c continued towards Birmingham until it was approximately 4nm SW before it turned and slowly tracked NW before leaving CAS and landing at EGBO. DHC8 from EGBB and fltnum251V from EGBE were also delayed on the ground. Once the a/c landed, it was identified as C152 and the pilot and his instructor were asked to call the WM.☐ CAA Closure:☐ The student pilot on a cross country flight misidentified a turning point and went off course. Further navigation training to be undertaken.
201404411	11/04/2014	EGTT : London (FIR)	EGBB (BHX): Birmingham	Bearing 150 Range 7.7nm	D	CTA	BAE	Turboprop	2	Infringement of the Birmingham CTA (Class D) by a C152 squawking 1177 with no Mode C. Check all imposed. Standard separation maintained.	I was controlling on RAD 1 with R/W33 in use. I was working JS32 who had left Chase from the North at FL90 when I observed a FIS (1177) squawk with no Mode C East of the Warwick VRP approaching the CTR from the South tracking 330deg but believed it would be speaking to London Information. Further navigation training to be undertaken.
201404412	11/04/2014	EGTT : London (FIR)	EGGD (BRS): Bristol/Lulsgate	10nm WSW	D	CTA	OTHER	Reciprocating	1	Infringement of the Bristol CTA (Class D) by an unknown aircraft at 2500ft. Aircraft identified as a CZAW Sportcruiser. Standard separation maintained.	Whilst monitoring RAD1 I noticed a FIS squawk appear at 2500ft southbound. I rang FIR and asked for the aircraft to squawk #5062. The aircraft was identified as a CZAW Sportcruiser and asked to call 125.650. The aircraft did so, brief details were obtained and the pilot asked to call Bristol ATC watch manager. No other aircraft were affected by the infringement.☐ Supplementary 14/04/14:☐ I was concentrating on radio conversation and unfortunately this led to an increase in altitude. The aircraft is relatively new to me and this flight was the farthest I had flown in the new aircraft. The aircraft is equipped with 2 axis autopilot, (height and direction). My previous aircraft did not have autopilot. I utilised the autopilot and then manual for the descent. The fault I made was not monitoring the height as I should have. I have certainly learnt an important lesson today. I must be in contact with local ATC rather than area radar. I must remain focused on the flight, altitude, altitude setting and be in contact with the appropriate ATC.

201404418	11/04/2014	EGTT : London (FIR)	ROSUN		A	TMA	FLY BUY ULTRALIGHTS	Reciprocating	1	Infringement of the Manchester TMA (Class A) by an Ikarus C42 squawking 7000 observed climbing from 3600ft to 5500ft. CAIT activated. Traffic info given. Investigation under 201314437.	Aircraft was observed to infringe Controlled Airspace at time 1628, in the vicinity of ROSUN. The aircraft was squawking 7000. Infringement was observed by CAIT and aircraft was identified by mode S. After contacting Manchester was told that they were unable to contact the aircraft and so the aircraft was treated as an unknown intruder. The Infringement lasted from 1628 until 1634, during which time the aircraft climbed from A36 to A55 before descending clear. The infringement resulted in the deviation of routes of 3 separate flights. The first aircraft was required to perform a non-standard route into Manchester, turning north then east whilst north of ROSUN. The second, a Hawarden inbound flight required minor deviation to preserve the required separation. The third, an outbound from Leeds required a small turn to ensure the blips did not merge.☐ Supplementary 21/05/14:☐ Comprehensive remedial action has been taken by the aircraft operator as a result of this infringement.
201404429	12/04/2014	EGTT : London (FIR)	EGCB : Manchester/Barton	North West	D	CTA	CESSNA	Reciprocating	1	Infringement of the Manchester CTA (Class D) by a C152 indicating 2600ft.	An unknown aircraft entered controlled airspace NW EGCB indicating 2600ft. FIN coordinated with EGCB and ascertained that the aircraft was C152. FIN requested EGCB to tell the pilot to descend. The pilot believed his level was 1800ft. The pilot was requested to telephone the WM. His altimeter had indicated 1800ft.
201404440	12/04/2014	EGTT : London (FIR)	Match	Bearing West Range 2nm	D	CTR	CESSNA	Reciprocating	1	Infringement of the Stansted CTR (Class D) by a C172 squawking 7010 with no Mode C. Standard separation maintained.	At about 16.14z aircraft entered the EGSS CTR to the West of Match on a direct track. He was squawking 7010 with no Mode C. He exited the CTR abeam Great Dunmow having travelled about 7 miles inside and landed at his destination.
201404450	13/04/2014	EGTT : London (FIR)	Calshot	3nm S	D	CTA	DE HAVILLAND	Turboprop	2	Loss of separation between a DHC8 and an EV97.	DHC8 was at the end of the downwind right leg for runway 02 when AIW alerted due to a 7377 squawk climbing through 2000ft heading East. I turned the DHC8 onto his base heading and the 7377 was now at 2100ft. I called Bournemouth ATSU to obtain traffic intentions but by time they had answered the call the traffic was now at 2300ft and climbing. A loss of separation had now occurred with DHC8 who was heading away from the traffic. The unknown continued to climb to 2500ft. I did not give avoiding action as the DHC8 was already routing away from the 7377 traffic.☐ Supplementary 05/06/14: ☐ The EV97entered CAS without a clearance, whilst working Bournemouth Radar under a Basic Service. This caused a loss of separation with the DHC8 who was issued a turn onto base-leg away from the intruder.☐ CAA Closure:☐ An EV97 entered controlled airspace without a clearance which lead to a loss of separation from the DHC8. The controller gave a heading to the DHC8 to reduce the potential confliction with the intruder but did not use the term avoiding action. Appropriate unit action taken.
201404450	13/04/2014	EGTT : London (FIR)	Calshot	3nm S	D	CTA	EVEKTOR AEROTECHNIK	Reciprocating	1	Loss of separation between a DHC8 and an EV97.	DHC8 was at the end of the downwind right leg for runway 02 when AIW alerted due to a 7377 squawk climbing through 2000ft heading East. I turned the DHC8 onto his base heading and the 7377 was now at 2100ft. I called Bournemouth ATSU to obtain traffic intentions but by time they had answered the call the traffic was now at 2300ft and climbing. A loss of separation had now occurred with DHC8 who was heading away from the traffic. The unknown continued to climb to 2500ft. I did not give avoiding action as the DHC8 was already routing away from the 7377 traffic.☐ Supplementary 05/06/14: ☐ The EV97entered CAS without a clearance, whilst working Bournemouth Radar under a Basic Service. This caused a loss of separation with the DHC8 who was issued a turn onto base-leg away from the intruder.☐ CAA Closure:☐ An EV97 entered controlled airspace without a clearance which lead to a loss of separation from the DHC8. The controller gave a heading to the DHC8 to reduce the potential confliction with the intruder but did not use the term avoiding action. Appropriate unit action taken.

201404455	13/04/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTR	PIPER	Reciprocating	1	Infringement of the Luton CTR (Class D) by an unknown aircraft squawking 7000, indicating 2100ft. Aircraft identified via Elstree as a PA28. No other aircraft were affected or delayed.	CAA Closure:☐ Pilot error. Spatial disorientation. A warning letter has been sent.
201404457	13/04/2014	EGTT : London (FIR)	DTY	10nm W	A	CTA	SLINGSBY	Reciprocating	1	Infringement of the Daventry CTA (Class A) by an unknown aircraft indicating 5000ft. Aircraft identified as a Slingsby T67M. Standard separation maintained.	I was controlling an inbound which I had descended to FL90 routing direct to HON when I noticed an infringer. The infringer was 8 miles north west of it indicating altitude 5 thousand feet, it was approximately 10 miles west of DTY where the base is A4.5. On noticing it I turned the inbound aircraft onto a heading of 270 degrees and got the co-ordinator to inform inbound aircraft's intended destination of our action they were happy to take the aircraft on that heading and we maintained a separation of at least 5 miles lateral.☐ Supplementary 29/04/14:☐ We were on a aerobatic training flight. We require at least 4000ft ground clearance to do this safely. The weather visibility was good and cloud base was FEW/SCT 035 there were good size gaps and we stayed in sight of surface and clear of cloud at 4000ft and kept a good lookout at all times. After a while the cloud filled in and we forced down to a lower altitude not enough ground clearance for aeros. We looked around for brighter spaces. I checked the chart for airspace. I saw the step down DAVENTRY CTA FL85 then FL75 then FL65 and FL55 from Brize towards Wellesbourne and across to DTY VOR 5500+ And further northeast over towards East Midlands and DAVENTRY CTA A 5500+ So it looked like free airspace and good weather as long as we are below 5500ft. 4000ft ground clearance is a minimum, however if the weather allows I would always use a higher starting base for an even bigger/safer ground clearance. I just didn't see the writing by Daventry Town DAVENTRY CTA A 4500+ I even asked the pilot to double check the chart and we were both agreed we were clear of airspace. I am very sorry that this happened as you can see I
201404457	13/04/2014	EGTT : London (FIR)	DTY	10nm W	A	CTA	BOEING	Turbofan	2	Infringement of the Daventry CTA (Class A) by an unknown aircraft indicating 5000ft. Aircraft identified as a Slingsby T67M. Standard separation maintained.	I was controlling an inbound which I had descended to FL90 routing direct to HON when I noticed an infringer. The infringer was 8 miles north west of it indicating altitude 5 thousand feet, it was approximately 10 miles west of DTY where the base is A4.5. 201404460	13/04/2014	EGTT : London (FIR)	SAM	6.8nm NE	D	CTR	VANS	Reciprocating	1	Infringement of the Solent CTR (Class D) by an unknown aircraft at 1200ft. Aircraft identified as a Vans RV7. Standard separation maintained.	Contact was seen tracking NW at 1.2A. A blind call was made and a response was given from a Vans RV7. I identified the a/c and gave it transit clearance but it had already entered. I informed the a/c he had infringed but had now left CAS.☐ Supplementary 09/05/14:☐ The aircraft entered the Southampton Control Zone whilst on a northerly heading in the north eastern extremity of the CTR. The aircraft was identified and informed of the infringement whilst on the frequency. The pilot apologised and felt he was outside the CTR.
201404552	14/04/2014	EGTT : London (FIR)	Danger Area EG D123	Larkhill	G	Danger area	BEECH	Reciprocating	1	Infringement of active Danger Area EG D125 (Larkhill) by a BE33 squawking 7000.	A 7000 squawk was observed transiting from the area of Burbage, Wiltshire. south of Upavon where it was observed entering EGD 125 which was notified as active to 30,000ft amsl with live firing serials. The aircraft made no attempt to contact the controlling authority at any time during the transit so the 7000 return was followed on SSR and observed landing at Compton Abbas. The aerodrome was contacted and aircraft information sought, and a request for the pilot to contact this office was made. On speaking to the pilot, A/C details were confirmed and when asked why he infringed a live artillery range the pilot answered he had 'not seen the danger area' but had seen the gliders from Upavon so routed south to avoid en route to Compton Abbas.

201404553	04/04/2014	EGTT : London (FIR)	EGBB (BHX): Birmingham	15nm NW	D	CTA	ROBINSON	Reciprocating	1	Infringement of the Birmingham CTA 1 (Class D) by an R44 at 1800ft. AIW activated.	I was conducting OJTI duties on the Radar Student when we observed a FIS squawk of 1177 approaching from the NW towards CAS boundary and on the extended centreline of Runway 15. The Mode S revealed the aircraft callsign. London FIS were contacted as the AIW tool indicated a CTA infringement. The aircraft initially showed an altitude of 1700ft but this increased to 1800ft for a short while before returning to 1600ft. The aircraft contacted Birmingham Radar where it was identified and instructed to remain outside CAS then continued to the West around the Zone. I spoke with the pilot later on who said that he was aware of the proximity of CAS as he had his iPad and two SATNAV's and believed his altitude was below the base of CAS. It was his intention to remain West of Birmingham although the initial track did not indicate this. I spoke with him about the use of the "conspicuity code 0010" but he seemed to be unaware of this procedure and was directed to the AIP to find out more info which he seemed keen to do. The pilot was apologetic and had already had a bad day having had to divert en-route due weather.
201404649	10/04/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	7 NE	D	CTA	PIPER	Reciprocating	1	Infringement of the Gatwick CTA (Class D) by a PA28. Standard separation maintained.	PCAIT alerted my trainee and myself to an infringement 7 NE of EGKK inside the Gatwick CTA on a SE track indicating Mode C 2300. We immediately telephoned EGKR Tower as the aircraft was displaying 3767, the Redhill conspicuity code. We confirmed that Redhill were in contact with the aircraft, identified by Mode S, and requested that the aircraft turned northbound immediately and descended out of the CTA, which it was observed to do. The aircraft did not come within 3nm of the final approach path and in view of the excellent weather and visibility, the prompt actions of Redhill and the pilot of the aircraft, we decided that any avoiding action or delaying action to Gatwick inbounds was unnecessary.
201404654	16/04/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	14 NW	D	CTA	PIPER	Reciprocating	1	Infringement of the Gatwick CTA (Class D) by a PA28. Traffic info and avoiding action given. Standard separation maintained.	I gave the B737 a heading to intercept the 08R ILS. I then observed a 0433 squawk which had entered the North Western edge of the zone indicating an altitude of two thousand feet. The track of the B737 was going to keep it clear of the infringing aircraft. I phoned Farnborough Approach and was told that they were "dealing" with it. I passed traffic to the B737. The infringing aircraft subsequently turned North away from the final approach track.☐ Supplementary 17/04/14:☐ I was working as LARS West controller, the PA28 had been operating in the Guildford area . The AIW alerted me to the aircraft going into EGKK CTA, initially I inadvertently told the wrong a/c to turn away on to Westerly heading, but realised my error and did tell the Pa28 to descend and turn away onto Westerly heading, which he did and cleared the EGKK CTA.
201404654	16/04/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	14 NW	D	CTA	BOEING	Turbofan	2	Infringement of the Gatwick CTA (Class D) by a PA28. Traffic info and avoiding action given. Standard separation maintained.	I gave the B737 a heading to intercept the 08R ILS. I then observed a 0433 squawk which had entered the North Western edge of the zone indicating an altitude of two thousand feet. The track of the B737 was going to keep it clear of the infringing aircraft. I phoned Farnborough Approach and was told that they were "dealing" with it. I passed traffic to the B737. The infringing aircraft subsequently turned North away from the final approach track.☐ Supplementary 17/04/14:☐ I was working as LARS West controller, the PA28 had been operating in the Guildford area . The AIW alerted me to the aircraft going into EGKK CTA, initially I inadvertently told the wrong a/c to turn away on to Westerly heading, but realised my error and did tell the Pa28 to descend and turn away onto Westerly heading, which he did and cleared the EGKK CTA.
201404661	16/04/2014	EGTT : London (FIR)	EGLL (LHR): London/Heathrow				PIPER	Reciprocating	1	Transponder malfunction resulted in an apparent infringement in the London Control Zone.	AC2 was establishing on 09L at altitude 3000', when a 7000 squawking contact appeared at 2200' unverified. I gave traffic information to AC2 and broke the aircraft off by turning it right onto a heading of 150 degrees. AC1 was observed to be climbing at which point I gave avoiding action to the AC2 and a further turn onto 180 degrees. There was an AC3 that was being vectored onto 09R behind AC2, which I deemed was moving away from the infringer, so I kept the approach going. AC2 was climbed to 4000 feet and AC3 descended to 2500 to get a positive cross between the 2 aircraft. AC1 climbed to 2800' and tracked SW before turning it's transponder off. AC4 also had to be vectored around the infringing aircraft. After AC2 had been broken off, SVFR had spoken to the tower controller, who verified visually from the tower that AC1 was at 900'.☐ Supplementary 16/4/14:☐ AC1 indicating 2800' appeared to infringe the London Control Zone while flying within the lateral confines of departure airfield. On calling airfield they said the pilot reported to be at 900' and they could see the a/c visually and confirmed the pilot report. Tower was asked to request the pilot switch off the Mode C.☐ Supplementary 17/4/14:☐ Approach discontinued at ATC request due unidentified traffic with avoiding action. On an intercept heading for MLS 09L, cleared to 3500' director instructed a turn onto 360. We queried if we were still to establish on the MLS and were told negative and to come further left onto a heading of 300 and that this was avoiding action. We were then told to reclimb to

201404661	16/04/2014	EGTT : London (FIR)	EGLL (LHR): London/Heathrow				BOEING	Turbofan	2	Transponder malfunction resulted in an apparent infringement in the London Control Zone.	AC2 was establishing on 09L at altitude 3000', when a 7000 squawking contact appeared at 2200' unverified. I gave traffic information to AC2 and broke the aircraft off by turning it right onto a heading of 150 degrees. AC1 was observed to be climbing at which point I gave avoiding action to the AC2 and a further turn onto 180 degrees. 201404716	18/04/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	SW	D	CTA	PILATUS	Turboprop	1	Infringement of the Stansted CTA-2 (Class D) by a PC12 at 2400ft. Traffic info and avoiding action given to a B737. Standard separation maintained.	At 0700 I was acting as Essex and Stansted Director as I had just bandboxed. My attention was alerted to a secondary CAIT activation at the southern tip of CTA 2. The contact was wearing a FIS squawk and indicating 2400ft, tracking NW bound as though towards BPK. I had turned a B737 onto a heading of 195 in preparation for a left base and given the instruction to descend to 2000ft. As soon as I spotted the infringer I gave avoiding action. Separation maintained throughout. FIS was called and the infringing aircraft details were given as a PC12 flying IFR from EBBR to EGLD. According to FIS, the aircraft had stated he was going to route LAM - BPK.
201404716	18/04/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	SW	D	CTA	BOEING	Turbofan	2	Infringement of the Stansted CTA-2 (Class D) by a PC12 at 2400ft. 201404727	18/04/2014	EGTT : London (FIR)	EGNS (IOM): Isle Of Man/Ronaldsway	7 NE	D	CTR	AEROSPATIALE	Turboshaft	1	Infringement of the IOM CTR (Class D) and failure to maintain 2 way contact with ATC in CAS. Traffic info issued.	The pilot had been advised earlier to call for clearance before becoming airborne. On conclusion of the incident the controller advised the pilot that he believed that he had become airborne without a clearance and that he had been trying to call several times. The pilot was requested to call on landing. This he subsequently did and immediately apologised stating that he did not operate very often in CAS and had forgotten to call before lifting. He realised shortly after becoming airborne that he had not obtained clearance and did so immediately on realising his mistake. The pilot was reminded of the requirement but he was certainly aware that this had been his error.
201404730	17/04/2014	EGTT : London (FIR)	Hinton-in-the-Hedges	S	A	TMA	VANS	Reciprocating	1	Infringement of the LTMA (Class A) by a Vans RV8 at 5800ft. Standard separation maintained.	At approximately 08:46 UTC an aircraft on a 7000 squawk infringed CAS south of Hinton-in-the-Hedges parachute drop area. The data block highlighted and converted to show the registration. The base of CAS in this location is altitude 5500ft. Mode C indicated the aircraft climbed to approximately 5800ft before exiting CAS where the base is FL65.
201404731	17/04/2014	EGTT : London (FIR)	EGTO (RCS): Rochester		A	TMA	PIPER	Reciprocating	1	Possible infringement of the London TMA (Class A) by a PA28 squawking 7000 indicating 2700ft. Traffic info and avoiding action issued to inbound EMB170. Standard separation maintained.	I was the Thames controller with a trainee working EMB170 inbound EGLC at 4000ft just approaching DET when we observed 7000 squawk in his 12 o'clock at 7 miles indicating 2700ft (base 2500ft). We took avoiding action turning inbound aircraft left hdg 270 degrees and routed around the unknown traffic for a normal APC, this added about 10 track miles, separation was not lost. Mode S indicated that the unknown traffic descended and disappeared from radar in the vicinity of EGTO.
201404731	17/04/2014	EGTT : London (FIR)	EGTO (RCS): Rochester		A	TMA	EMBRAER	Turbofan	2	Possible infringement of the London TMA (Class A) by a PA28 squawking 7000 indicating 2700ft. Traffic info and avoiding action issued to inbound EMB170. Standard separation maintained.	I was the Thames controller with a trainee working EMB170 inbound EGLC at 4000ft just approaching DET when we observed 7000 squawk in his 12 o'clock at 7 miles indicating 2700ft (base 2500ft). We took avoiding action turning inbound aircraft left hdg 270 degrees and routed around the unknown traffic for a normal APC, this added about 10 track miles, separation was not lost. Mode S indicated that the unknown traffic descended and disappeared from radar in the vicinity of EGTO.
201404750	19/04/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	018 9nm	D	CTA	PIPER	Reciprocating	1	Infringement of the Solent CTA (Class D) by a PA28 at 2300ft. Traffic info given. Standard separation maintained.	A contact squawking 0460 was seen 14nm North of SAM indicating 2.5A. I phoned EGLF and asked to confirm it was below controlled airspace. At this time it had dropped to 2.4A so LF said yes it was. The contact continued towards EGHI and subsequently infringed CAS. LF phoned and passed the details. When the a/c came on frequency, I got more information off the pilot like his routing etc. From this, it was evident the pilot was lost so I gave him suggested track to route out of CAS and towards VRP Alderbury which was where he was wanting to go. Supplementary 22/04/14 I think, due to distance, I lost connection with OCK but did not see the NAV tag on my instrument. The needle remained central and I thought I was on track and drifted to the South thus infringing the Southampton CTA. Human error.

201404764	19/04/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	NW	D	CTR	CESSNA	Reciprocating	1	Infringement of the Manchester CTR (Class D) by a C172. Standard separation maintained.	At approximately time 14:10, the airspace infringement warning alerted me to a target squawking 6160 at 3.3A in the North West corner of the Manchester CTA. Despite attempts to contact the aircraft, no response was received. I ensured that Tower had no departures to affect. I received a call from Doncaster Radar saying that they were working the 6160 squawk and had told the aircraft to turn away from the Manchester CTA. I confirmed with Doncaster that the aircraft was turning away immediately. At time 14:17, the aircraft had indeed turned away from the Manchester CTZ but was still inside the CTA (aircraft had climbed to approx 3.7A). I called Doncaster CTZ to say that at that altitude the aircraft was still inside controlled airspace and needed to descend below 3A. Doncaster called back to say that the aircraft was struggling to descend due to terrain but by this time the aircraft had cleared the lateral limit of the CTA. I confirmed the aircraft details with Doncaster.
201404774	19/04/2014	EGTT : London (FIR)	EGGD (BRS): Bristol/Lulsgate	10 SE	D	CTR	AVIONS ROBIN	Reciprocating	1	Infringement of the Bristol CTR (Class D) by a DR400. Traffic info and avoiding action given. Standard separation maintained.	I was on duty as RAD 1 when I noticed an aircraft about 10nm SE tracking North towards Bristol CAS. It was at FL80 on a Brize Squawk. I attempted to contact Brize on the direct line but it was engaged. At the same time I put a check all on with the TWR and was informed by them that an EMB145 was just airborne. When I got the EMB145 on frequency I immediately gave him an avoiding action turn onto heading N. The infringer by this time had just entered CAS just to the SE of Chew Valley heading North. At this time I managed to get in contact with Brize who said that they were trying to turn him away but the aircraft wasn't acknowledging their calls. Soon after this the infringer was seen to turn onto an easterly track and left CAS just to the W of Radstock. Separation was not lost and shortly afterwards Brize called again with the details of the infringing aircraft. □ Supplementary 22/04/14: □ Setting up the GPS required a reversal of the flight plan used from Nuthampstead to Henstridge. For reasons that I couldn't fathom (but subsequent investigation has solved) I could not "invert" the flight plan. I therefore put the GPS into simulator mode and then could invert the flight plan. Unfortunately I took off with it still in this mode. Operating off of R/W07 at Henstridge with an extended departure to avoid various villages and a RH circuit to bring me onto the reciprocal heading, I started a climb to get above the clouds. Whilst concentrating on the climb and occasional glances at the GPS + my co-pilot telling me we should be heading North, it took me some minutes to realise that the GPS was to all intents "frozen". This meant having to turn it off and then on for it to function correctly and show that
201404774	19/04/2014	EGTT : London (FIR)	EGGD (BRS): Bristol/Lulsgate	10 SE	D	CTR	EMBRAER	Turbofan	2	Infringement of the Bristol CTR (Class D) by a DR400. Traffic info and avoiding action given. 201404784	21/04/2014	EGTT : London (FIR)	EGD 036		G	Danger area	PIPER	Reciprocating	1	Infringement of Danger Area 036.	PA32 reported onto frequency at 1054z at FL55, already within the active danger area. Co-ordinated with Plymouth Military DACS and on their request telephoned EGLM to ask the pilot to call Ply Mil on landing. Plymouth Military filing a ASISM. □ Supplementary 22/04/14: I was controlling on Plymouth Mil EAST sector when I observed a Mode3A 7000 squawk transiting through EGD036 without clearance. At the same time, Plymouth Mil received a phone call from London Info stating that they had just had this aircraft call on frequency and they requested continued transit through the Portsmouth Danger Areas. The Mode3A of the aircraft then changed to 1177 and permission was granted as there was no hazardous activity taking place at the time, although the area had been allocated to RW flying up to 3000ft. Subsequent call to/from London info identified the aircraft.
201404792	21/04/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	10nm South West	G	Restricted area	DE HAVILLAND	Turbojet	1	Infringement of the Stansted TMZ 2 (Class G) by a DH112 squawking 7010 with no Mode C. Traffic info and avoiding action taken.	While vectoring A319 downwind for R/W04 I observed a fast moving contact wearing a squawk 7010, with no Mode 'C' leaving the North Weald local flying area. This unknown a/c was in the Stansted Transponder Mandatory Zone (TMZ) and tracking NW. As there was no Mode 'C' I took avoiding action with A319 turning on to a westerly track and passed traffic info. The unknown a/c passed about 1nm behind A319 left the TMZ and appeared with a Farnborough LARS (North) squawk of 5032. The unknown a/c was identified by Farnborough out of North Weald for Duxford then Coventry, and at a reported altitude of 2000. □ CAA Closure: □ Investigations revealed a pilot error. The root cause of the incident was a late call and transponder problems. Warning letter issued.

201404792	21/04/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	10nm South West	G	Restricted area	AIRBUS	Turbofan	2	Infringement of the Stansted TMZ 2 (Class G) by a DH112 squawking 7010 with no Mode C. 201404834	19/04/2014	EGTT : London (FIR)	EGLK (BBS): Blackbushe	1nm ATZ northside	G	ATZ	ROCKWELL	Reciprocating	1	Infringement of the Blackbushe ATZ (Class G) by a Rockwell 112.	Aircraft seen in ATZ northside routing west confirmed with LF.☐ CAA Closure:☐ No response from owner. Closed due to elapsed time.
201404863	22/04/2014	EGTT : London (FIR)	EGMC (SEN): Southend	5nm S	G	Danger area	PIPER	Reciprocating	1	PA28 deviation from assigned heading resulted in an outbound RJ100 infringing active Danger Area at Shoeburyness. Traffic info given. Standard separation maintained.	PA28 calls on my frequency in error as it was supposed to call NE deps. I choose to work it with coordination with NE Deps. Pilot calls requesting descent due icing to FL60. I am informed that he had made this request with TC South already who said I could descend as it had been coordinated with Thames Radar. The aircraft was currently 5 miles South of Southend and therefore would be descending into Thames airspace. The A/C is descended to Altitude 6000ft when it requests a left turn due weather. I turn him left and immediately coordinate with Thames about the action. After a short while the aircraft took a sharp turn right again, heading North, without instruction. I instruct PA28 to turn back onto his previous heading and to maintain 6A feet. Shortly after I instruct the pilot to resume own navigation to BKY, which was spelled as well. I transfer him to NE Deps. Again shortly after the A/C appears to be tracking in a SW direction as opposed to a NW direction towards BKY.☐ Supplementary 25/04/14:☐ I was working an RJ100 on a LYD SID off LC and had been given coordinated climb by North via my Coordinator to 6000'. The climb was agreed providing I turned inside a transit ac PA28 also working North that was going to descend to 6000' on top of another inbound and stay on a northerly track. I climbed RJ100 and observed that PA28 had turned onto a Westerly track and was level at 6000'; I elected to keep the RJ100 on a HDG of 105 whilst the coordinator made enquiries. My Coordinator then informed me that PA28 was now weather avoiding on this westerly track so we decided to acquire further climb for RJ100 and my coordinator obtained FL100. I started the climb and then observed PA28 turn onto North
201404863	22/04/2014	EGTT : London (FIR)	EGMC (SEN): Southend	5nm S	G	Danger area	BAE	Turbofan	4	PA28 deviation from assigned heading resulted in an outbound RJ100 infringing active Danger Area at Shoeburyness. Traffic info given. Standard separation maintained.	PA28 calls on my frequency in error as it was supposed to call NE deps. I choose to work it with coordination with NE Deps. 201404965	23/04/2014	EGTT : London (FIR)	SAM	Bearing 150 Range 6nm	D	CTR	PIPER	Reciprocating	1	Infringement of the Southampton CTR (Class D) by a PA32 squawking 7000 indicating 1600ft. Traffic info and avoiding action given. Separation lost with inbound aircraft.	I was operating as OJTI at the time of the infringement. At approximately time 1442 I observed a 7000 squawk tracking from Lee on Solent NW bound and pointed it out to my trainee as a potential infringer. The trainee attempted to call the 7000 using the Mode S callsign - PA32 - with no response. At time 1443 the 7000 entered CAS, South of Bishops Waltham, indicating 1600ft. The trainee issued avoiding action to the aircraft mid downwind left for R/W20 which was a continuation of the previously issued heading, and also requested the aircraft to stop descent at 4000ft. The infringer turned NE and followed the inbound aircraft (just inside the control zone). Separation was lost between the 2 aircraft with approximately 4.6nm and an indicated 2400 feet. As the assistant attempted to call Lee on Solent for details on recently departed aircraft, the infringer turned eastbound and left CAS. Shortly afterwards PA32 called on the frequency and said he believed that he had infringed. The trainee issued a squawk and formally indentified it as the infringing aircraft.☐ Supplementary 17/07/14:☐ PA32 infringed the Southampton CTR and Solent CTA, resulting in a loss of separation with a Trislander, although there was no risk of collision. The infringement was caused by a navigational error by the pilot of the PA32.
201404965	23/04/2014	EGTT : London (FIR)	SAM	Bearing 150 Range 6nm	D	CTR	BRITTEN NORMAN	Reciprocating	3	Infringement of the Southampton CTR (Class D) by a PA32 squawking 7000 indicating 1600ft. Traffic info and avoiding action given. Separation lost with inbound aircraft.	I was operating as OJTI at the time of the infringement. At approximately time 1442 I observed a 7000 squawk tracking from Lee on Solent NW bound and pointed it out to my trainee as a potential infringer. The trainee attempted to call the 7000 using the Mode S callsign - PA32 - with no response. At time 1443 the 7000 entered CAS, South of Bishops Waltham, indicating 1600ft. The trainee issued avoiding action to the aircraft mid downwind left for R/W20 which was a continuation of the previously issued heading, and also requested the aircraft to stop descent at 4000ft. The infringer turned NE and followed the inbound aircraft (just inside the control zone). Separation was lost between the 2 aircraft with approximately 4.6nm and an indicated 2400 feet. As the assistant attempted to call Lee on Solent for details on recently departed aircraft, the infringer turned eastbound and left CAS. Shortly afterwards PA32 called on the frequency and said he believed that he had infringed. The trainee issued a squawk and formally indentified it as the infringing aircraft.☐ Supplementary 17/07/14:☐ PA32 infringed the Southampton CTR and Solent CTA, resulting in a loss of separation with a Trislander, although there was no risk of collision. The infringement was caused by a navigational error by the pilot of the PA32.

201405010	24/04/2014	EGTT : London (FIR)	EGHI (SOU): Southampton		D	CTA	AVIONS ROBIN	Reciprocating	1	Infringement of the Southampton CTA (Class D) by a DR400 at 2800ft. Standard separation maintained.	At approximately time 1745 a Farnborough squawk was observed by my coordinator and I tracking towards controlled airspace North of Gosport, indicating 2900ft. With a couple of miles to run to the boundary it turned into a 7000 squawk, and so I made blind calls to it, with a response from another aircraft North of Portsmouth which was on a listening squawk. The coordinator called Farnborough to enquire about the potential infringer. The 7000 entered Cas for approximately a mile before exiting again, indicating 2800 feet. Farnborough passed the details. No other aircraft were affected.
201405203	23/04/2014	EGTT : London (FIR)	EGBB (BHX): Birmingham		D	CTA	VARGA	Reciprocating	1	Infringement of the Birmingham CTA (Class D) by a Varga Kachina. Traffic info given. Standard separation maintained.	Plog from Fenland to Leicester was fine. Lost visual with my turning point at Leicester. Chose to route via O/H Leicester as a little intimidated and unsure/under confident of how to transit through CAS. Turned onto my heading from Leicester to Sleep too late but I had not realised so continued and lost visual with the plotted way points. At this point I was in contact with East Midlands believing I was still on course (Basic Service). Upon realising I was lost I managed to navigate the GPS and noticed I was pointing towards what I believed to be Birmingham. I called EM for a position fix who requested a squawk and confirmed I was infringing Birmingham and told me to contact them immediately. I contacted them immediately and ATC requested a squawk and directed me away from CAS. A listening in aircraft overheard my destination and offered to lead me away to my desired destination. ATC guided both aircraft towards each other until visual was confirmed and I followed the other aircraft to Sleep. ☐ Supplementary 29/04/14:☐ While working as Radar 1 during a fairly busy period, Radar 2 and I noticed a primary contact North of Birmingham airfield by 6 miles tracking southbound. There were a few inbound to Runway 15 working Radar 2 which they had to vector away once the primary contact was observed inside CAS. I called Coventry ATC to find out whether they knew anything about said primary. Unfortunately they were not talking to the anything North of them. I transmitted blind a few times and asked Radar 2 and Tower to do the same. I contacted East Midlands who said that they had been working the aircraft and he was lost.
201405260	28/04/2014	EGTT : London (FIR)	MAY	6.1 N	D	CTA	AVIONS ROBIN	Reciprocating	1	Infringement of the Gatwick CTA (Class D) by an unknown aircraft squawking 7000. Aircraft later identified as a DR400. Standard separation lost against a Gatwick departure.	I was working as INT / FIN bandboxed when I noticed, via CAIT, a 7000 squawk infringing the Gatwick CTA. I did a blind transmission, and called Redhill to see if they were working the aircraft. I advised TMA South, as they had an outbound in conflict. I called the Tower and stopped straight ahead departures initially, and then later stopped left turns also. The infringing aircraft then departed to the North. The GS tracked the infringer, who was observed to switch to a Biggin squawk, and the GS was advised by Biggin as a DR400. ☐ CAA Closure:☐ Investigation findings: The aircraft was on its first flight since a reconditioned engine was fitted, the pilot was monitoring the engine performance and became distracted. The root cause of this incident was thus a lapse in attention while monitoring the new engine. Further training with FI to be undertaken.
201405260	28/04/2014	EGTT : London (FIR)	MAY	6.1 N	D	CTA	UNKNOWN	Unknown		Infringement of the Gatwick CTA (Class D) by an unknown aircraft squawking 7000. Aircraft later identified as a DR400. 201405377	29/04/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted		G	Restricted area	PIPER	Reciprocating	1	Infringement of the Stansted TMZ 2 (Class G) by an unknown aircraft showing as a primary contact only at 1000ft. Aircraft identified as a PA28. CAIT activated.	Primary contact tracking NW, PCAIT activated. A short time later the contact squawked A7000 and was identified using Mode S as a PA28. The contact called Luton, the altitude was established as 1000ft QNH.

201405379	30/04/2014	EGTT : London (FIR)	EGSC (CBG): Cambridge		G	ATZ	CESSNA	Reciprocating	1	C152 landed at wrong aerodrome.	I was working handboxed on both Tower 125.9 and Approach 123.6. I was providing a Procedural Service to a PA28 who was localiser established and making an approach to R/W23 to go around for a further approach. PA28 had been cleared low approach and reported going around. On looking out the tower window I observed a light a/c on approx a 1nm final. I watched the a/c which then landed on R/W23, at this stage I thought that this a/c was the PA28 and he was making a touch and go. I was waiting to transmit to him once he was airborne and in a safe phase of flight. The next call I received was from the PA28 who reported level at 2000'. At this stage I realised that it wasn't him on the runway, it was a C152 who had landed without clearance. Given where I observed the C152 from on final approach and the time the PA28 had called going around in my estimation there couldn't have been any more than a mile between the a/c. Appropriate CAA action is to be taken as a result of this incident.
201405379	30/04/2014	EGTT : London (FIR)	EGSC (CBG): Cambridge		G	ATZ	PIPER	Reciprocating	1	C152 landed at wrong aerodrome.	I was working handboxed on both Tower 125.9 and Approach 123.6. 201405453	02/05/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	12nm East	D	CTA	BELL	Turboshaft	1	Possible infringement of the Manchester CTA (Class D) by a Bell 206 squawking 1177 with Mode C indicating up to 3200ft. CAIT activated.	Aircraft was identified by Mode S (the aircraft was squawking 1177 for London info) as it tracked towards and eventually through the Manchester CTA 12nm East of Manchester airport. CAIT was activated at the CTA boundary and Mode C indicated up to 3200FT. W2LAS was advised and requested to contact London info since Manchester has no immediate means of communication with them.
201405456	03/05/2014	EGTT : London (FIR)	Glossop	E	D	CTR	ENSTROM	Reciprocating	1	Infringement of the Manchester CTR (Class D) by an unknown aircraft squawking 7000 at 1500ft. Infringer identified as an Enstrom 280. AIW activated. Standard separation maintained.	A 7000 squawk was approaching the eastern edges of the zone around Glossop heading NW into the zone. I enquired to traffic known on the frequency for an update to their position but none tied up with the 7000. The AIW set off and Director was warned against the traffic. Enstrom 280 called me and seemed at first quite inexperienced but commented that his radio was poor. I placed him on a Manchester squawk and identified him as the zone infringer. I requested that the aircraft call in ATC but I received no response and from the hesitancy and lack of confidence in the RT voice I elected not to pursue as the aircraft would be landing shortly. No losses of separation or delays to other traffic occurred.
201405457	03/05/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	194Deg 16	D	CTA	JABIRU	Reciprocating	1	Infringement of the Solent CTA (Class D) by a Jabiru at 2500ft. Standard separation maintained.	7000 squawk observed climbing into the Solent CTA over the Solent (base 2000). Blind calls made but no response. Bournemouth called but had no knowledge of aircraft. Contact left CAS indicating 2500ft continuing eastbound.☐ Supplementary 02/06/14:☐ Attempts in tracing the pilot in command of the aircraft have been made but without success.
201405463	03/05/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	Bearing 265 Range 12nm	D	CTA	PIPER	Reciprocating	1	Infringement of the Gatwick CTA (Class D) by a PA46 squawking 7000 at 2400ft. Traffic info and avoiding action given. Standard separation maintained.	I was operating as KK Fin. A330 was on a closing heading for the localiser, runway 08R at 4500ft descending to 3000ft. I was then made aware of a PA46 just infringing CAS to the north of the final approach, almost southbound, at 2400ft. I gave the A330 avoiding action by stopping descent at 4000ft and turning away to the right. Shortly thereafter PA46 turned away to the west and left CAS. I was able to turn the A330 back to the localiser but he joined inside 10 miles.

201405463	03/05/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	Bearing 265 Range 12nm	D	CTA	AIRBUS	Turbofan	2	Infringement of the Gatwick CTA (Class D) by a PA46 squawking 7000 at 2400ft. 201405472	03/05/2014	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	18nm WSW	A	TMA	COMCO IKARUS	Reciprocating	1	Infringement of the LTMA (Class A) by an Ikarus C42 indicating 3200ft. CAIT activated. Standard separation lost.	A380 was downwind R/H to R/W09L. Ikarus C42 produced a secondary CAIT indicating 3200'. A380 was in such a position that to continue westbound would have taken him out of CAS. I elected to turn him onto a heading of 060 in order to remain South of Ikarus C42 and avoid leaving CAS.☐ Supplementary 25/06/14:☐ Upon infringing, the a/c was seen to make a sharp turn to the NW and descend, giving the appearance that the pilot was aware of their position and took steps to exit CAS as soon as possible
201405472	03/05/2014	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	18nm WSW	A	TMA	AIRBUS	Turbofan	4	Infringement of the LTMA (Class A) by an Ikarus C42 indicating 3200ft. CAIT activated. Standard separation lost.	A380 was downwind R/H to R/W09L. Ikarus C42 produced a secondary CAIT indicating 3200'. A380 was in such a position that to continue westbound would have taken him out of CAS. I elected to turn him onto a heading of 060 in order to remain South of Ikarus C42 and avoid leaving CAS.☐ Supplementary 25/06/14:☐ Upon infringing, the a/c was seen to make a sharp turn to the NW and descend, giving the appearance that the pilot was aware of their position and took steps to exit CAS as soon as possible
201405473	03/05/2014	EGTT : London (FIR)	BKY		A	TMA	PIPER	Reciprocating	1	Infringement of the Luton and Stansted CTA's (Class D) by a PA28 squawking 4361 at 3500ft. Separation lost. Check West followed by check all applied.	At approx 15.40z, EGBE approach assistant called to inform that they had been trying to contact PA28 which they had been working but had been unable to raise RT contact. Blind transmissions were made on both the Luton and Essex frequency, but there was no reply by the aircraft. At approx 15.43z, an aircraft was observed at BKY squawking 4361 (EGBE), infringing CAS at 3500ft, tracking towards the Stansted overhead, and believed to be involved in a loss of separation with a EGSS departure. I pointed out the 4361 squawk to the Stansted controller, who put a departure check on with EGSS tower. Further blind calls were made on both 129.550 and 120.625 to try to raise the aircraft. A request was also made through GS Airports that D&D try to raise the aircraft through the guard frequency. The 4361 squawk made a turn towards BPK and descended below CAS, before calling EGLF LARS once West of BPK. EGLF confirmed the aircraft and routing details which had previously been working EGBE approach.☐ Supplementary 06/05/14:☐ I was Essex Radar and it was relatively busy, GW pointed out a 4361 at 3500 at BKY inside controlled airspace. No CAIT activation went off otherwise we could have acted sooner and more promptly. I had an aircraft depart Stansted on a CPT. I had put him on a Northwest heading and was climbing him. The unknown passed down the left hand side of my outbound. I was going to turn West but corrected that until further North of the unknown. I cannot say but how many miles or what vertical there was. I did manage to put a Check West on, then overhearing Luton and realising the 4361 was likely lost I went Check all. I
201405473	03/05/2014	EGTT : London (FIR)	BKY		A	TMA	UNKNOWN	Unknown		Infringement of the Luton and Stansted CTA's (Class D) by a PA28 squawking 4361 at 3500ft. Separation lost. Departures stopped. An A320 was sent around and an airborne B737 on a ADN 1D departure was turned off the SID at 2500ft. Standard separation maintained.	Investigation findings:over reliance on GPS. The root cause of this incident was that the pilot was unable to determine his position using a chart. ☐ CAA Closure:☐ The pilot was interviewed and required to complete the navigation element of the PPL skill test.
201405486	04/05/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	Bearing 275 Range 8nm	D	CTR	BOEING	Turbofan	2	Infringement of the Gatwick CTR (Class D) by a C172 squawking 3767 at 1300ft. Departures stopped. An A320 was sent around and an airborne B737 on a ADN 1D departure was turned off the SID at 2500ft. Standard separation maintained.	Investigation findings:over reliance on GPS. The root cause of this incident was that the pilot was unable to determine his position using a chart. ☐ CAA Closure:☐ The pilot was interviewed and required to complete the navigation element of the PPL skill test.
201405492	04/05/2014	EGTT : London (FIR)	Not specified		Other	Restrict ed area	PIPER	Reciprocating	1	Infringement of the Abingdon RA (T) by a PA28 squawking 5032 at 2300ft.	I was in position as the LARS North & East controller (band boxed). PA28 had called on frequency and was given a squawk of 5032. I received a phone call from Oxford informing me that the 5032 was infringing the Abingdon RA(T). I called the pilot and told him to track east immediately as he was infringing. He turned east. At approximately 1315 I informed pilot that again he was infringing the RA(T) and to turn East immediately.

201405493	03/05/2014	EGTT : London (FIR)	BPK	Bearing 040 Range 9nm	G	Restrict ed area	OTHER	Reciprocating	1	Infringement of the Stansted TMZ2 (Class G) by a microlight squawking 7000 with no Mode C. Traffic info and avoiding action given.	Whilst working SS INT I noticed a contact with no mode Charlie just Alpha getting airborne from departure site the contact stayed in the zone which allows the operation of primary or no Charlie. However, the unknown contact continued into the TMZ with no mode Charlie. I immediately issued avoiding action right 360 to the B737 downwind to 04 whilst notifying Luton it would be infringing their airspace. I also passed traffic information on the contact during the avoiding action turn, which then suddenly displayed mode Charlie indicating 1000 altitude. I updated the B737 and turned base for 04 making sure B737 was aware the contact was now a legitimate return
201405493	03/05/2014	EGTT : London (FIR)	BPK	Bearing 040 Range 9nm	G	Restrict ed area	BOEING	Turbofan	2	Infringement of the Stansted TMZ2 (Class G) by a microlight squawking 7000 with no Mode C. Traffic info and avoiding action given.	Whilst working SS INT I noticed a contact with no mode Charlie just Alpha getting airborne from departure site the contact stayed in the zone which allows the operation of primary or no Charlie. However, the unknown contact continued into the TMZ with no mode Charlie. I immediately issued avoiding action right 360 to the B737 downwind to 04 whilst notifying Luton it would be infringing their airspace. I also passed traffic information on the contact during the avoiding action turn, which then suddenly displayed mode Charlie indicating 1000 altitude. I updated the B737 and turned base for 04 making sure B737 was aware the contact was now a legitimate return
201405495	04/05/2014	EGTT : London (FIR)	Abingdon	3nm S	A	Restrict ed area	CESSNA	Reciprocating	1	Infringement of the Abingdon Air and Country Show RA(T) by a C152 squawking 7000, at 2300ft. A Spitfire was engaged in a display at time of the incident.	I was on duty as the Air/Ground Operator manning the Abingdon Display frequency when we observed a C152 to the South of the airfield tracking eastbound approximately 3nms from the airfield. We continued to watch the progress of the aircraft while contacting Brize Radar who confirmed they could see on radar a A7000 squawk in that location. The aircraft then turned left and tracked NNE bound to the East of Abingdon and we then contacted Oxford Radar who said that an aircraft in that position was transmitting the Mode S C152 and squawking A7000. Oxford also advised that the contact was well within the RA(T) approximately 2.5 nms East of Abingdon. We continued to track the aircraft visually until it appeared to leave the RA(T) to the northeast. A Spitfire was engaged in his display at the time of the incident and the A/G operators together with the Display Director monitored the profile of the display in relation to the profile of the infringer and elected not to pass traffic while the Spitfire was displaying.
201405495	04/05/2014	EGTT : London (FIR)	Abingdon	3nm S	A	Restrict ed area	OTHER	Unknown		Infringement of the Abingdon Air and Country Show RA(T) by a C152 squawking 7000, at 2300ft. A Spitfire was engaged in a display at time of the incident.	I was on duty as the Air/Ground Operator manning the Abingdon Display frequency when we observed a C152 to the South of the airfield tracking eastbound approximately 3nms from the airfield. We continued to watch the progress of the aircraft while contacting Brize Radar who confirmed they could see on radar a A7000 squawk in that location. The aircraft then turned left and tracked NNE bound to the East of Abingdon and we then contacted Oxford Radar who said that an aircraft in that position was transmitting the Mode S C152 and squawking A7000. Oxford also advised that the contact was well within the RA(T) approximately 2.5 nms East of Abingdon. We continued to track the aircraft visually until it appeared to leave the RA(T) to the northeast. A Spitfire was engaged in his display at the time of the incident and the A/G operators together with the Display Director monitored the profile of the display in relation to the profile of the infringer and elected not to pass traffic while the Spitfire was displaying.
201405508	05/05/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	6 NE	D	CTR	JODEL	Reciprocating	1	Infringement of the Southampton CTR (Class D) by a Jodel at 1500ft. Standard separation maintained.	R/W20, QNH1012, CAVOK, 3A = 170 @20kts. At approximately 1158 I was operating as Solent Radar when a primary contact was observed 6nm NE of SAM, North of BWFA, tracking North inside the CTR. AIW alarmed as an associated 7000 squawk appeared. Mode S indicated the callsign and on making a blind call the pilot replied saying the position might correlate with him. A 3664 squawk was issued and this subsequently identified the infringer. He apologised, saying he had been blown off course. No IFR aircraft affected.☐ Supplementary 05/06/14:☐ The aircraft entered the Southampton Class D Control Zone whilst listening out on the Solent Radar frequency and displaying conspicuity code 7000 and at 1800ft. The pilot apologised for the event at the time and stated that he must have been blown off track in the strong wind.

201405509	04/05/2014	EGTT : London (FIR)	SAM	Bearing 340 Range 7.5nm	D	CTA	ZENAIR	Reciprocating	1	Possible infringement of the Solent CTA (Class D) by a Microlight squawking 7000 indicating 2200-2300ft. Traffic info given. Standard separation maintained.	RWY20 QNH 1025 FEW026 9999. At approximately 0908z I was operating as Solent Radar, with 3 IFR aircraft inbound from south, fltnum1RH, fltnumN1D & fltnum232. I had noticed a 7000 squawk approximately 10NW SAM tracking eastbound indicating Alt 2.2-2.3A and on selecting Mode S it indicated the callsign. I believe I may have put out a blind call, but about half a mile before the CTA it turned NE paralleling the CTA boundary. Shortly afterwards, TWR phoned for release on fltnum6NW towards NRY and with the 7000 staying just outside, I released the departure. On watching the 7000 further it was apparent it was slowly drifting on to the CTA boundary line, indicating Alt 2.2 A unverified. I put out further blind calls - no reply, the ATSA tried HH and LF but no information. I therefore phoned the TWR to ask where fltnum6NW was in order to stop the departure, they advised lined up and cleared for T.O. The TWR ATCO offered to stop the departure, which was successful. The 7000 was still on the CTA boundary but not entering any further. On its present track it would leave the CTA limits in 3miles. I therefore put fltnumN1D & fltnum232 towards SAM to hold, fltnum1RH was slowed down and warned that there may be delaying headings once late downwind. The 7000 maintained track and on clearing of the northern limits of the CTA normal operation resumed, holds cancelled and fltnum6NW released. The departure had an approximate 5 min delay.
201405527	05/05/2014	EGTT : London (FIR)	EGHI (SOU); Southampton	Freshwater Bay	D	CTA	AVIONS ROBIN	Reciprocating	1	Infringement of the Solent CTA (Class D) by an R2160 at 4400ft. Standard separation maintained.	At 1605 a primary contact was seen entering the Solent CTA West bound approaching Freshwater Bay at 4400ft squawking 0011. Several calls were made to the aircraft before a response was received. The pilot verified he was at 4400ft. I advised him he had entered CAS and obtained the details of his flight. He was given a 3670 squawk and identified. This confirmed it was the infringement. I gave him clearance to continue. There were no other aircraft in the vicinity so no loss of separation.☐ Supplementary 05/06/14:☐ The aircraft entered the Class D Solent Control Area whilst listening out on the Solent Radar frequency and displaying the Solent Monitor Code, 0011. The pilot misread the vertical limits of the Solent CTA from the chart. The pilot has apologised for the event, providing a comprehensive explanation for the incident.☐ CAA Closure:☐ Pilot error. Lack of attention to detail, poor planning. A warning letter has been issued.
201405647	07/05/2014	EGTT : London (FIR)	TALGA	5nm S	A	Other	PIPER	Reciprocating	1	Infringement of Airway N864 (Class A) by a PA32. Standard separation maintained.	I was the radar 1 boxed controller when I received a call from Western radar regarding the routing of their 3775 squawk (PA32). They told me that the aircraft had been warned about the proximity of CAS and that the aircraft was about to turn eastbound to remain clear. I then observed the aircraft inside CAS, to the South of TALGA at FL82. Further calls took place with Western regarding the intended routing of PA32. The aircraft informed Western that they were unable to accept an IFR clearance and needed to continue on that track to maintain VMC. The aircraft had entered a Class A Airway N864, the base of which is FL75. Further co-ordination continued with the Western radar controller to get the aircraft out of CAS as soon as possible. No other aircraft were affected on their routing's and there was no loss of separation. The aircraft was seen to exit controlled airspace to the East of N864.☐ Supplementary 09/05/14:☐ I was trying to maintain VFR, clouds surrounded the aircraft at -2c. I had no de-icing facilities available, so I was reluctant to enter any IFR conditions. I knowingly entered the airway, maintaining VFR and communication with radar at all times trying to gain permission. Once I found a VFR route I returned to uncontrolled airspace. Again my apologies for this inconvenience. ☐ Supplementary 12/05/14:☐ The Allocator took a pre-note from London Information on PA32. The aircraft called on frequency and requested a Basic Service. I identified the aircraft and confirmed Basic Service. When I queried his routing I asked if he intended to remain clear of controlled
201405783	09/05/2014	EGTT : London (FIR)	NANTI	5nm North	A	TMA	CIRRUS	Reciprocating	1	Infringement of the Manchester TMA (Class A) by an SR22 squawking 7000 at 1500ft. CAIT activated.	Whilst controlling on the South East sector, an infringer appeared as CAIT in LLC, 5N of NANTI, at 1.5A. I had a EGCC departure, A319, on a HON SID. I had to climb the departure and turn immediately, below the noise abatement level, to ensure the necessary separation against the unknown traffic, informing the aircraft that it was against unknown traffic. I later explained to the A319 that the turn had been against an aircraft in the low level corridor who was indicating slightly high. The infringer was identified by mode S who was squawking 7000. The planner phoned Manchester approach to point the aircraft out. We were subsequently informed that the aircraft landed at Barton airfield around 1700.☐ Supplementary 18/05/14:☐ At approximately 1654 hours I noticed a 7000 squawk north bound in the LLR, mode C indicating 1500ft unverified. The AIW activated. Two departures that were already airborne (HON and WAL) and working PC were turned early to maintain 5nm separation. I attempted to "blind call" the aircraft but received no reply. I then put a stop on all departures until the aircraft was north of Warrington and observed to make a right and descend into Barton. Aircraft traced using Mode S data.
201405783	09/05/2014	EGTT : London (FIR)	NANTI	5nm North	A	TMA	AIRBUS	Turbofan	2	Infringement of the Manchester TMA (Class A) by an SR22 squawking 7000 at 1500ft. CAIT activated.	Whilst controlling on the South East sector, an infringer appeared as CAIT in LLC, 5N of NANTI, at 1.5A. I had a EGCC departure, A319, on a HON SID. I had to climb the departure and turn immediately, below the noise abatement level, to ensure the necessary separation against the unknown traffic, informing the aircraft that it was against unknown traffic. I later explained to the A319 that the turn had been against an aircraft in the low level corridor who was indicating slightly high. The infringer was identified by mode S who was squawking 7000. The planner phoned Manchester approach to point the aircraft out. We were subsequently informed that the aircraft landed at Barton airfield around 1700.☐ Supplementary 18/05/14:☐ At approximately 1654 hours I noticed a 7000 squawk north bound in the LLR, mode C indicating 1500ft unverified. The AIW activated. Two departures that were already airborne (HON and WAL) and working PC were turned early to maintain 5nm separation. I attempted to "blind call" the aircraft but received no reply. I then put a stop on all departures until the aircraft was north of Warrington and observed to make a right and descend into Barton. Aircraft traced using Mode S data.

201405785	09/05/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	Bearing 240 Range 13nm	D	CTA	CESSNA	Reciprocating	1	Infringement of the Luton CTA (Class D) by a C182 squawking 7000 with Mode C indicating 2800ft. CAIT activated. Check all imposed. Standard separation maintained	A7000 with mode C indicating 2800ft entered CAS, tracking NE. The contact climbed to 3000ft and then turned North and descended to leave CAS. A 'CHECK ALL' was imposed and alternative missed approach instructions given to tower in case the landing a/c carried out a missed approach. Aircraft identity confirmed. Blind TX made no response received.☐ Supplementary 14/05/14:☐ Investigations findings: Aircraft infringed Luton CTA indicating 3000ft where base is 2,500ft. Investigation findings were; Aircraft made an unauthorised penetration of the Luton CTA (bottom left portion) indicating a3000ft where base CAS is 2500ft. CAIT was activated. Aircraft, displaying a 7000 squawk, visible on radar in the vicinity of EGTB (Booker) tracking Northerly. Check all imposed. Aircraft tracked back on a Southerly heading towards EGTB and left radar coverage in ☐. the vicinity of the airfield at 1818:08.
201405787	07/05/2014	EGTT : London (FIR)	EGKB (BOH): Biggin hill		G	ATZ	PILATUS	Turboprop	1	Infringement of the Biggin Hill ATZ (Class G) by a PC12.	The pilot made his first call inside the ATZ passing through the climb out runway 21 over the noise sensitive area of Biggin Hill village. No comms prior to entering the ATZ, pilot reports 'working' Thames Radar on the other radio. No coordination from any other agency received.
201405806	04/05/2014	EGTT : London (FIR)	SAM	10nm NW	A	Other	CESSNA	Turboprop	1	C208 aircraft squawking 0033 observed infringing Airway Q41 (Class A) on numerous occasions during ATC shift. Standard separation maintained.	On a number of occasions a #0033 observed inside the Q41 FUA up to FL110. In particular between 1630z and 1730z although there were other occasions during the shift. The TC coordinator was informed and they were not aware of any coordination having taken place.☐ Supplementary 05/06/14:☐ The aircraft was identified and the operator alerted. The CFI is to call back and will be advised of the incident and will be encouraged to ensure that his pilots are familiar with the airspace in question.
201405824	11/05/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	12 SSE	D	CTA	PIPER	Reciprocating	1	Alleged infringement of the Solent CTA (Class D).	0430 squawk observed 12nm ESE of SAM tracking NE indicating 3000ft. Track indicated it would clip the South-Eastern corner of CTA where base is 2500ft. Trainee phoned Farnborough to state that 0430 squawk would enter Solent CTA. Farnborough stated that contact would remain outside. During phone call AIW alerted for 0430 squawk. Trainee advised Farnborough that contact was inside CTA. Farnborough stated that there must be a difference in the airspace maps between the two units, as the 0430 was indicating outside the Solent CTA on their maps.
201405875	12/05/2014	EGTT : London (FIR)	SAM	Bearing 205 Range 8nm	D	CTR	SOCATA	Reciprocating	1	Infringement of the Southampton CTR (Class D) by a TB10 (believed) squawking 0011 indicating 1500ft with no Mode S. Traffic info and avoiding action given. Separation lost	0011 squawk observed approaching southern zone indicating 1.5A, with no Mode S callsign.Blind call elicits no response. Fltnum544 departs runway 20 and checks in on frequency, not given immediate turn due to terrain concerns, but then turned left heading 170 degrees. 0011 entered CAS at which point Fltnum544 given avoiding action turn at 1.1A and traffic information on infringer. No response to further blind calls, contact confirmed to be not working EGHH. Immediate LOS as the infringer entered CAS. Contact left CAS tracking NW, no trace action possible.☐ Supplementary 18/06/14:☐ The ATC investigator spoke to the pilot of the TB10, which is believed to be the aircraft involved, who telephoned the unit at the request of Bournemouth radar on the day of the incident. The pilot sounded confused and stated that he had departed Lee on Solent airfield for Compton Abbas and had flown his usual route of South of Calshot, towards Beaulieu and then Stoney Cross below the Solent CTA. He also reported that he had selected a 0011 squawk but could not recall hearing any blind calls to an infringing aircraft. In addition the pilot could not tell me whether he had been listening to Bournemouth's or Solent's frequency for the duration of his flight. He stated that although he was not aware of having infringed, he may have been blown further North than he had planned to fly.

201405875	12/05/2014	EGTT : London (FIR)	SAM	Bearing 205 Range 8nm	D	CTR	UNKNOWN	Unknown		Infringement of the Southampton CTR (Class D) by a TB10 (believed) squawking 0011 indicating 1500ft with no Mode S. The aircraft was a PA28R locally flying from and to EGKB and had reported turbulence causing climb into the TMA.☐ Supplementary 22/05/14:☐ A comprehensive report was received from the pilot which indicates that the pilot had trouble controlling the aircrafts altitude whilst passing near a squall.
201405999	14/05/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	Bearing 108 Range 9.7nm	D	CTA	PIPER	Reciprocating	1	Infringement of the Solent CTA (Class D) by a PA28 (initially unknown primary contact) squawking 4530 at 2800ft (base CAS 2500ft). Standard separation maintained.	RWY02, Q1031, 9999, FEW030☐ I was operating as Solent radar at approximately 0900z when observed a 4530 squawk 12 east of SAM southwest bound at Alt033. On that track and level it was likely to enter the CTA sector with a Alt 3A base. I put out a blind call, with no reply and the ATSA phoned Plymouth Military. The contact turned onto a more southerly track and descended to Alt 029. Plymouth explained to the ATSA they had not yet got 2 way with the aircraft. As it continued southbound at Alt 2.9A I believe it infringed the sector with an Alt 2.5A base but cannot be sure whether Plymouth Mil had yet verified its mode C. No other aircraft affected.☐ Supplementary 05/06/14:☐ The investigation has concluded that the aircraft entered the Class D Solent Control Area, without a clearance, whilst transferring between Farnborough Radar and Plymouth Military ATSUs. At the time of the incident the aircraft was displaying the Plymouth transponder code but was not in contact with the ATSU. There was no loss of separation with any other aircraft.

201406001	14/05/2014	EGTT : London (FIR)	EGLC (LCY): London city	5nm SE	A	TMA	CIRRUS	Reciprocating	1	Possible infringement of the LTMA (Class A) by an SR22 at 2700ft. Standard separation maintained.	Traffic seen going under ILS at 2400ft on a 7010 (circuit traffic apparently) it climbed to 2700ft with changing magenta, and headed towards downwind traffic. This was highlighted to Fin who hadn't spotted due to no Magenta) Traffic was eventually located and descended.
201406032	14/05/2014	EGTT : London (FIR)	South Wonston		D	CTA	UNKNOWN	Unknown		Infringement of the Solent CTA (Class D) by un unknown aircraft squawking 7000, indicating 2600ft. Traffic info given. Standard separation maintained.	observed a 7000 squawk 14nm north of SAM heading south indicating 2800ft. Due to its track I made blind calls to the aircraft but no response received. At 1522 the unknown entered the Solent CTA at 2600ft. It continued east and entered that part of the CTA where the base is 2000ft. Several blind calls were still made but no response. The aircraft left CAS and climbed to 2800ft. The contact continued eastbound. The only traffic was a PA28, who I gave traffic information to but not avoiding action as it was VFR. PA28 did get visual contact with the unknown but could not identify it.☐ Supplementary 05/06/14:☐ The aircraft entered the Class D Solent Control Area without a clearance. It has not been possible to trace the identity of the aircraft.
201406032	14/05/2014	EGTT : London (FIR)	South Wonston		D	CTA	PIPER	Reciprocating	1	Infringement of the Solent CTA (Class D) by un unknown aircraft squawking 7000, indicating 2600ft. Traffic info given. Standard separation maintained.	I observed a 7000 squawk 14nm north of SAM heading south indicating 2800ft. Due to its track I made blind calls to the aircraft but no response received. At 1522 the unknown entered the Solent CTA at 2600ft. It continued east and entered that part of the CTA where the base is 2000ft. Several blind calls were still made but no response. The aircraft left CAS and climbed to 2800ft. The contact continued eastbound. The only traffic was a PA28, who I gave traffic information to but not avoiding action as it was VFR. PA28 did get visual contact with the unknown but could not identify it.☐ Supplementary 05/06/14:☐ The aircraft entered the Class D Solent Control Area without a clearance. It has not been possible to trace the identity of the aircraft.
201406090	13/05/2014	EGTT : London (FIR)	EG D011C	Merrivale	G	Danger area	BEECH	Reciprocating	1	Infringement of active Danger Area EG D011C (Merrivale) by a BE36 squawking 4551 at FL75. Traffic info and avoiding action given.	Whilst controlling on Plym Mil LARS West an ac was handed over from CUL for a transit from the Scilly Isles to EGTE at FL130. The ac was on an easterly track and was under a TS. The aircraft was pre-noted to EGTE and a level of FL60 was issued by them. The aircraft soon after requested a descent. I issued a descent to FL60 as per TE's instructions. At this point the pilot queried my instruction informing me that he did not understand what i was asking him to do. At no point was it suggested that there may have been an issue with radio comms. After several explanations the ac descended to FL60. At approx 1225L it was observed that the current track of the ac would have taken it through EG D011C which was active with live firing up to 10000ft. A warning was issued to the pilot. He then reported back that he did not know what I was telling him. I then issued an avoiding action turn on to 180 degrees in order to avoid the danger area, the ac at this point was at FL75 in the descent. The pilot again came back questioning what I was asking him to do and claimed that he did not understand what I was asking him to do. I reiterated again that he was now inside an active DA with live firing taking place and that he should turn to the south to avoid the area. The aircraft proceeded in an easterly direction. After several more attempts to explain to the aircraft his predicament he finally made a south easterly turn by which point he was on the boundary of D011C. Once it was established that the aircraft was no longer in danger a normal hand over to EDTE was conducted. During the entirety of this transit it was apparent that the pilot was unable to understand/comply with simple ATC instructions.
201406096	15/05/2014	EGTT : London (FIR)	EGGD (BRS): Bristol/Lulsgate	Bearing 265 Range 9nm	D	CTA	ZLIN	Reciprocating	1	Infringement of the Bristol CTA (Class D) by an aircraft squawking 5077 at 2300ft. Standard separation maintained.	Acting as RAD 2, aircraft called to request a CAS transit. The aircraft was given a squawk, QNH and was instructed to remain outside controlled airspace. The frequency was moderately busy and I completed a red transit strip which was given to RAD1. As there were aircraft calling to the north east, I did not co-ordinate immediately with RAD1. A minute or so later, I looked at a 9nm final for RW09, and saw the #5077 just south of the approach inside CAS at 2300'. I told the pilot he had been instructed to remain outside CAS at which point he informed me that his GPS indicated he was not. An arrival for 09 had passed in front of him by two miles and RAD1 had passed traffic information. The pilot was informed that he needed to descend below 1500' to remain clear of CAS due to his route.

201406125	15/05/2014	EGTT : London (FIR)	POL		A	TMA	EUROCOPTER	Turboshaft	1	Infringement of the Manchester TMA (Class A) by an unknown aircraft squawking 7000 at 4200ft. Aircraft identified as an EC120. Standard separation maintained.	At approx 12:55Z a/c infringed the tma at A42 southbound for approx 10miles cruising just west of the Leeds zone. Both Leeds and Manchester were asked about traffic but neither had worked the a/c. A/C descended below the base of controlled airspace at 13:04Z. A/C was tracked and landed at destination at 13:52Z. A/C was seen on mode s as EC120. ☐ Supplementary 27/05/14:☐ At the time of infringement use of GPS and no warning was observed. Confusion due to a lot of different airspaces and lines on the GPS, and because of the weather we were higher and more to the west as planned. On the GPS, there are lines parallel not shown on the map. Who are very confusing. Especially when unable to fly the planned routing.
201406145	16/05/2014	EGTT : London (FIR)	EGSR : Earls Colne		D	CTA	COMMANDER	Reciprocating	1	Infringement of the Earls Colne ATZ (Class G) and the Shoreham CTA (Class D) by an unknown aircraft showing as a primary contact only at 2000ft. Aircraft identified as a Rockwell 114. CAIT activated. Traffic info and avoiding action given.	ATZ infringement. Aircraft flew through ATZ, less than 2000ft agl. At the time 1xaircraft in the circuit on a solo circuit (2ns time on his own). Aircraft Rockwell 114 no radio call, no care to others. ☐ Supplementary 22/05/14:☐ Whilst working as Fin I noticed a fast moving primary contact about to enter the Shoreham CTA 15nm East of Shoreham. Wethersfield was not notified as active. The contact tracked through the zone on a NW'ly track primary only setting of pCait as it left the Wethersfield area. We double checked with Farnborough Lars that TMZ 1 was not active. I elected to continue the approach of one aircraft (B737) as he was going to remain clear of it. Other aircraft(BD700) and one other were given avoidance/delaying action to remain clear of the contact. During the infringement the SWA was telephoned by Earls Colne air traffic asking for information on an aircraft that had just flown through their ATZ at 2A (presumably a best estimate by them) - We informed the SWA we were also tracking the contact. When the primary contact left the zone it tracked towards its destination and landed. The GS Air telephoned the Rockwell 114's destination at the time of landing and informed the GS that the aircraft that had just landed was a Rockwell Commander. The GS Air later telephoned back Earls Colne to give them this information.
201406145	16/05/2014	EGTT : London (FIR)	EGSR : Earls Colne		D	CTA	BOEING	Turbofan	2	Infringement of the Earls Colne ATZ (Class G) and the Shoreham CTA (Class D) by an unknown aircraft showing as a primary contact only at 2000ft. Aircraft identified as a Rockwell 114. CAIT activated. Traffic info and avoiding action given.	ATZ infringement. Aircraft flew through ATZ, less than 2000ft agl. At the time 1xaircraft in the circuit on a solo circuit (2ns time on his own). The GS Air later telephoned back Earls Colne to give them this information.
201406162	16/05/2014	EGTT : London (FIR)	EGSL : Andrewsfield	4nm 315deg	D	CTR	PIPER	Reciprocating	1	Infringement of the Stansted CTA/CTR (Class D) by a PA28 at an indicated 800ft. Traffic info given. Separation lost with a B737.	An unknown aircraft squawking 7000 infringed the CTR which caused a B737 to be delayed. I phoned Andrewsfield and the infringer is believed to be a PA28.

201406162	16/05/2014	EGTT : London (FIR)	EGSL : Andrewsfield	4nm 315deg	D	CTR	BOEING	Turbofan	2	Infringement of the Stansted CTA/CTR (Class D) by a PA28 at an indicated 800ft. Traffic info given. Separation lost with a B737.	An unknown aircraft squawking 7000 infringed the CTR which caused a B737 to be delayed. I phoned Andrewsfield and the infringer is believed to be a PA28.
201406162	16/05/2014	EGTT : London (FIR)	EGSL : Andrewsfield	4nm 315deg	D	CTA	PIPER	Reciprocating	1	Infringement of the Stansted CTA/CTR (Class D) by a PA28 at an indicated 800ft. Traffic info given. Separation lost with a B737.	An unknown aircraft squawking 7000 infringed the CTR which caused a B737 to be delayed. I phoned Andrewsfield and the infringer is believed to be a PA28.
201406162	16/05/2014	EGTT : London (FIR)	EGSL : Andrewsfield	4nm 315deg	D	CTA	BOEING	Turbofan	2	Infringement of the Stansted CTA/CTR (Class D) by a PA28 at an indicated 800ft. Traffic info given. Separation lost with a B737.	An unknown aircraft squawking 7000 infringed the CTR which caused a B737 to be delayed. I phoned Andrewsfield and the infringer is believed to be a PA28.
201406166	16/05/2014	EGTT : London (FIR)	EGLD : Denham	4nm WSW	A	CTR	AEROSPATIALE	Turboshaft	1	Infringement of the London CTR (Class A) by an unknown aircraft squawking 7000 resulted in Heathrow departures being stopped. Aircraft identified as an AS350. Standard separation maintained.	Working as SVFR with Thames and LC DIR split. A 7000 squawk was observed heading south approx. 4nm west of Denham with an associated mode S AS350 callsign attached. FIN stopped departures from Heathrow whilst both myself and Northolt called all the local airports to find the aircraft. Northolt eventually got the aircraft on to their frequency and departures resumed. The aircraft had filed a VFR flight plan which had the routing of its departure and intended destination.
201406168	16/05/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	15 040deg	D	CTA	CESSNA	Reciprocating	1	Infringement of the Manchester CTA (Class D) by a C152 at 3400ft.	I became aware of a 6160 squawk, about 5-10 miles East of the eastern control zone boundary, and was aware that the aircraft was operating very close to the base of CAS [3000'] but tracking towards the Manchester zone. Shortly after that, the AIW alert activated with the Mode C indicating 3100'. The Mode S ident feature was used to obtain the registration, and blind calls were made on both APP(S) and DIR frequencies to this aircraft, but to no avail. PC North Sector then telephoned to ask if I was working it, and I requested they use their direct line to contact Doncaster radar [the 'owner' of that squawk]. I then telephoned Liverpool radar, who share a room with Doncaster approach - Doncaster reported that they had lost contact with the aircraft in question, and later confirmed the identity. The squawk entered the Manchester control zone briefly, before turning South and climbing slowly to a maximum observed 3400', which continued to activate the AIW until the aircraft finally left CAS to the SE. Fortunately there was no traffic in the immediate vicinity, and no loss of separation occurred. The next arrival via DAYNE was coordinated high (FL90) in order to provide the required 5000' separation - however, by the time this IFR inbound arrived, the 'unknown' traffic had left CAS in the Camphill area and no delays ensued.☐ CAA Closure:☐ Pilot error-lack of situational awareness. A warning letter has been issued.

201406173	16/05/2014	EGTT : London (FIR)	Between Denby Dale and Glossop		A	TMA	CESSNA	Reciprocating	1	Infringement of the Manchester TMA (Class A) by a C152.	I believe that I must have made my turn over Denby Dale in a slightly incorrect position and not adjusted my planned heading. I spotted a ribbon of water ahead of me which I believed was Derwent. I then recognised that I was mistaken and that I must be too far east so I adjusted heading to return to my planned route. I maintained contact with Doncaster Radar although my radio reception was not good at this point. I did not realise that I had strayed into Manchester TMA until returning to the ground. I apologise for the error. I will plan my route more thoroughly in future and make sure that I make the correct turning points and gain the correct headings. I realise now that I should have sought guidance from Doncaster Radar about changing frequency to Manchester Tower in this case. As a newly qualified pilot I take this sort of thing very seriously. I will endeavour to ensure that in future I observe correct practice and procedures so as not risk endangering my own life or the lives of others.
201406178	15/05/2014	EGTT : London (FIR)	EGBP : KEMBLE	1nm W	G	ATZ	MD HELICOPTER	Turboshaft	2	Infringement of the Kemble ATZ (Class G) by an MD900 on operational duties. Traffic info given.	On monitoring the departure of a Beagle B121 Pup from Runway 26, I was suddenly aware of an MD900 crossing through the extended centreline of RWY26 at approx. 800ft QFE, approx. 1NM West of the airport. I called the traffic to the Pup (the MD900 was not on frequency) who passed within close proximity. Bristol identified the traffic after a phone call to Brize, who had not worked the traffic.☐ Supplementary 02/06/14:☐ This was on the return trip. On leaving, the aircraft departed east, however there was 'confusion' over the compass heading (possible SLVD/DG). The heading was corrected and they tracked south, aiming to pass between Kemble's ATZ and R105. I estimate from the task sheet that they were passing approximately 1610(L). The aircraft may have clipped the west of Kemble's ATZ.
201406178	15/05/2014	EGTT : London (FIR)	EGBP : KEMBLE	1nm W	G	ATZ	BEAGLE	Reciprocating	1	Infringement of the Kemble ATZ (Class G) by an MD900 on operational duties. Traffic info given.	On monitoring the departure of a Beagle B121 Pup from Runway 26, I was suddenly aware of an MD900 crossing through the extended centreline of RWY26 at approx. 800ft QFE, approx. 1NM West of the airport. I called the traffic to the Pup (the MD900 was not on frequency) who passed within close proximity. Bristol identified the traffic after a phone call to Brize, who had not worked the traffic.☐ Supplementary 02/06/14:☐ This was on the return trip. The heading was corrected and they tracked south, aiming to pass between Kemble's ATZ and R105. I estimate from the task sheet that they were passing approximately 1610(L). The aircraft may have clipped the west of Kemble's ATZ.
201406188	16/05/2014	EGTT : London (FIR)	Frensham		G	Restrict ed area	VANS	Reciprocating	1	Alleged infringement of Farnborough CAS-T (Class D) and the Odiham ATZ (Class G) airspace by an RV8.	An RV8 got airborne from a site near Frensham during CAS-T at Farnborough. The aircraft called up already inside the zone and non transponding. The pilot was told to route VFR not above 2.5A and to avoid the Odiham ATZ. He then proceeded towards the Odiham ATZ at 1.5 and infringed this also. We called Odiham to advise them of the traffic. We tried to identify him by issuing a squawk which was never actually observed on radar so no positive ID was ever achieved. He continued to the North and left controlled airspace.☐ Supplementary 20/05/14:☐ I was the OJTI on Lars West with a trainee that had only done CAS-T on Lars once before. At 1154 an RV8 called on frequency, saying he was out of a private site to the West of Frensham. I immediately thought that this might lead to an infringement if he wasn't aware of the CAS-T. The trainee spoke to the aircraft initially and I saw a primary contact appear and move northbound inside the CTR-T. I asked the aircraft if he was aware of the CAS-T, and he replied that he wasn't and informed me of his requested route. I asked him to squawk 0430, gave the aircraft VFR transit avoiding the VO ATZ. The primary contact continued into the VO ATZ, so I asked it what level it was at and also asked it to squawk. He said he was at 1700 which would put it in the VO ATZ. I told him that he should have stayed outside of it, and he replied that he thought I had given him transit. The aircraft was still not identified, but I phoned VO to say that it was believed to be infringing the ATZ, and asked whether they could see the squawk. They couldn't see it either. I told the aircraft that it was not squawking and he came back and said that it was only Farnborough that had a problem with his
201406195	17/05/2014	EGTT : London (FIR)	Lamaload		D	CTR	ROBINSON	Reciprocating	1	Infringement of the Manchester CTR (Class D) by an unknown aircraft squawking 7000, indicating 2500ft. Aircraft identified as an R44. Traffic info given. Standard separation maintained.	Unknown aircraft squawking 7000 entered CTR, north eastbound, indicating 2500ft. On being passed traffic information, a medical helicopter became visual with an R44 helicopter in the area. The Mode S of the unknown aircraft indicated an R44. There was no response to several blind transmissions. A commercial airliner on right base for 23R was given extended vectors to maintain separation. The unknown aircraft paralleled the south eastern edge of the zone, approx 1.5nm inside controlled airspace.☐ Supplementary 28/05/14:☐ R44 infringed CAS to the east of Manchester paralleled the south eastern edge / corner of the zone for 1.5 nm inside the CAS for approximately 60 seconds. The scale used on the map at 15nm appeared to show the magenta line just on/to the east of the zone. I was visible with a medical helicopter to the left and below me. I was listening to Manchester on the second receiver and transmitting on the 1st receiver to London information. I appreciate that this was an infringement and will take steps to ensure that if travelling this pathway again I will keep further to the east of the airspace to avoid a wind induced drift again. Strong Wind 210 degree. I sincerely apologise for the incident and would like to reassure that I was visual with the medical helicopter at all times.

201406195	17/05/2014	EGTT : London (FIR)	Lamaload		D	CTR	UNKNOWN	Unknown		Infringement of the Manchester CTR (Class D) by an unknown aircraft squawking 7000, indicating 2500ft. Aircraft identified as an R44. Traffic info given. Standard separation maintained.	Unknown aircraft squawking 7000 entered CTR, north eastbound, indicating 2500ft. On being passed traffic information, a medical helicopter became visual with an R44 helicopter in the area. The Mode S of the unknown aircraft indicated an R44. 201406196	17/05/2014	EGTT : London (FIR)	Ashcroft Farm		D	CTA	PIAGGIO	Reciprocating	1	Infringement of the Manchester CTA Class (D) by a P149. Manchester departures suspended.	The AIW showed a zone infringing aircraft South of the low level route heading North at 2800ft. Scottish control were advised that the traffic was unknown and the departures were stopped from Manchester. The aircraft was identified by Mode S information as a P149 inbound to EGCB (after checking with CB). The aircraft descended into the low level route and after a period of observing the aircrafts track the departures were released. A request for the pilot to contact ATC after landing was passed to EGCB A/G. □ Supplementary 21/05/14: □ Descending to 1200ft for entry to LLR from 2500ft started descent abeam Ashcroft airfield to arrive at 1200 at start of corridor for flying above perceived microlights as the airspace was very busy from Sleaf to LLC. Apparently I clipped the TMA and will take precautions in future to descend sooner. □ CAA Closure: □ Pilot error-poor cockpit management. A warning letter has been issued.
201406229	18/05/2014	EGTT : London (FIR)	EGLF (FAB): Farnborough civil		G	ATZ	CESSNA	Reciprocating	1	Infringement of the Farnborough ATZ (Class G) by an C172 squawking 7000 at 1400ft.	I was working as Farnborough LARS West with medium to Heavy traffic levels. Approach was busy with a sequence of 3 inbound aircraft and I was trying to identify and co-ordinate as much traffic as possible with them. At the time of the incident I had a primary contact believed to be at Guildford and inbound to Fair Oaks. Another aircraft was also on frequency and also inbound to Fair Oaks. I became aware of a 7000 squawk 6 miles south of Farnborough when approach had an inbound and i was working a Blackbushe inbound in the vicinity. I managed to select the 7000 squawk once it separated from the other squawks and I was able to tell through Mode S that the 7000 squawk was a C172. I blind called the aircraft and the pilot responded. I asked for his level and he replied 1400ft and he indicated he was inbound to Fair Oaks via the Farnborough overhead. After instructing the pilot to squawk 0431 I identified the aircraft entering the Farnborough ATZ from the south. I advised the pilot he was infringing the ATZ and he said he was turning south. I asked his routing and he said he was via Farnborough for Fair Oaks. I asked him to route via Guildford as there were a number of aircraft inbound for the ILS and i subsequently gave the pilot a track to fly for Guildford as he appeared lost. The situation was further complicated by poor pilot RT discipline on the frequency and the pilots of the 3 other aircraft taking each other's calls at times.
201406268	19/05/2014	EGTT : London (FIR)	SAM	16.5nm S	D	CTA	PIPER	Reciprocating	1	Infringement of the Solent CTA (Class D) by an unknown aircraft showing as a primary contact only at 3000ft. ATC made a call to a PA28 using the Mode S downlink callsign, no response received. Standard separation maintained.	A primary contact (with SSR) was observed approaching the southern CTA Boundary at 3000ft. A blind call was made with no response received. A further call was made using the Mode S downlink callsign "PA28". No response received. At 0942 the contact entered the CTA and started descending. At 0944 the contact left the CTA at 2500ft tracking NE. Further calls were made to the PA28 but no contact established. □ Supplementary 07/07/14: □ The aircraft entered the Class D Solent Control Area after having changed frequency from Plymouth Military to Lee Radio. The aircraft was displaying the conspicuity code 7000. The pilot was aware the vertical limits of the Solent CTA but mis-judged his position in relation to the CTA boundary. The pilot has apologised for the event, providing a comprehensive explanation for the incident and has been asked to complete an airspace infringement questionnaire.

201406304	19/05/2014	EGTT : London (FIR)	BNN	4nm North	D	CTR	ROBINSON	Reciprocating	1	Infringement of the Luton CTR (Class D) by a R44 squawking 7000 at 2000ft. Disruption to several inbound aircraft including one aircraft broken off approach on three occasions and held.	Appropriate CAA action is being taken as a result of this incident.
201406304	19/05/2014	EGTT : London (FIR)	BNN	4nm North	D	CTR	BOEING	Turbofan	2	Infringement of the Luton CTR (Class D) by a R44 squawking 7000 at 2000ft. Disruption to several inbound aircraft including one aircraft broken off approach on three occasions and held.	Appropriate CAA action is being taken as a result of this incident.

201406309	17/05/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	8nm 250deg	D	CTR	OTHER	Turbofan	4	Alleged double infringement of Luton Control Zone (Class D) by an R44. Traffic info and avoiding action given. Very high ATC workload. Luton departures stopped.	Appropriate CAA action is to be taken as a result of this incident.

201406317	18/05/2014	EGTT : London (FIR)	EGKB (BQH): Biggin hill		G	ATZ	CESSNA	Reciprocating	1	Infringement of the Biggin Hill ATZ (Class G) by a C152.	The aircraft departed runway 21 and was instructed to turn left at 2 miles as per SOP, the Tower ATCO then instructed the pilot to contact Biggin Approach which was done correctly. Having established two way communications with the pilot, I observed to leave the ATZ during the turn after take-off before re-entering without any request to do so. The Aircraft then flew downwind left hand to a point approximately 2 miles North of the airfield and then proceeded to fly opposite direction along the ILS final approach track (with great precision). The pilot was asked to report her position to which she replied "abeam West Wickham" (NB: West Wickham is West of the FAT runway 21). Thames Radar telephone to find out the intentions of the Aircraft as they were vectoring an aircraft inbound however, I had already asked the pilot to track North East. The pilot did as instructed and continued uneventfully.
201406380	17/05/2014	EGTT : London (FIR)	HON	4nm E	D	CTR	OTHER	Reciprocating	1	Infringement of the Birmingham CTR (Class D) by an unknown aircraft showing as a primary contact only. Aircraft identified as a Pioneer 300. Standard separation maintained.	I was the Radar Controller on duty when AIR alerted me to a primary contact entering the Birmingham CTR to the east of HON VOR. I called Coventry Radar who indicated they were not speaking to the aircraft. The contact was inside CAS within the Birmingham CTR when I made a blind transmission. At this time the contact faded from Radar. The VCR were looking to acquire the contact visually without success. The contact then faded from the Radar display approaching HON VOR. For a few minutes we believed it to be a spurious contact when about 6 minutes later a primary contact appeared on a similar track to the south west of HON VOR leaving CAS before turning north west bound. At no stage was Birmingham traffic affected and no "checks" were needed. Shortly afterwards an aircraft called on 118.05 believing it to be Halfpenny Green on 123.0. This identified the callsign and aircraft type (A Pioneer 300), routing and position 10 miles south east of Wolverhampton. I confirmed that this may be the aircraft in question and asked the pilot to contact ATC on landing. I have had a conversation with the pilot who was very apologetic and admitted it may have been poor planning on his part. He had a conversation with his instructor and believed that he was in serious trouble. I alluded to the fact that no other aircraft were compromised on this occasion. He explained that he had descended and turned away from Birmingham CAS. Whether this was in response to the blind transmission was not clear.
201406384	17/05/2014	EGTT : London (FIR)	BHX	5nm NNE	D	CTR	CESSNA	Reciprocating	1	Infringement of the Birmingham CTR (Class D) by an unknown aircraft squawking 7000. Aircraft identified as a C152. Standard separation maintained.	C152 was on a Basic Service routing from Tamworth VRP to Bedworth VRP at 2000ft. I was training a controller at the time of the incident and we simultaneously noticed an ac squawking 7000 entering the Zone just south of Baxterley. We passed a Birmingham squawk, identified the ac and instructed the pilot to take up an easterly track to leave CAS. There was no need to break off the ac on final, as the infringer was identified promptly.
201406384	17/05/2014	EGTT : London (FIR)	BHX	5nm NNE	D	CTR	UNKNOWN	Unknown		Infringement of the Birmingham CTR (Class D) by an unknown aircraft squawking 7000. Aircraft identified as a C152. Standard separation maintained.	C152 was on a Basic Service routing from Tamworth VRP to Bedworth VRP at 2000ft. I was training a controller at the time of the incident and we simultaneously noticed an ac squawking 7000 entering the Zone just south of Baxterley. We passed a Birmingham squawk, identified the ac and instructed the pilot to take up an easterly track to leave CAS. There was no need to break off the ac on final, as the infringer was identified promptly.
201406412	21/05/2014	EGTT : London (FIR)	EGKR (KRH): Redhill	5nm W	D	CTR	PIPER	Reciprocating	1	Infringement of the Gatwick CTR (Class D) by a PA28 at 1000ft. Standard separation maintained.	A Redhill inbound infringed whilst establishing inbound to Redhill. I immediately rang Redhill to identify the aircraft and instructed them to route it north straight away to leave controlled airspace. The Redhill controller had already warned the pilot not to enter Gatwick but he did anyway. Separation was not lost.

201406437	21/05/2014	EGTT : London (FIR)	Tring	1nm E	D	CTR	CESSNA	Reciprocating	1	Infringement of the Luton CTR and CTA (Class D) by an unknown aircraft squawking 7000 at 2500ft. Aircraft identified as a C152. Check-all placed. D&D cell confirmed C152 had declared a PAN. Traffic info given. Standard separation maintained.	7000 squawk observed entering Luton Control zone on an easterly track at 2.5 A - Mode S / CAIT revealed callsign as C152 - blind transmissions were made on 129.55 and "CHECK ALL " outbound restriction was placed with Luton Tower. A VFR transit A/C reported that the A/C in question was calling 121.5. - D&D were contacted who confirmed that the A/C had declared a PAN. Infringing A/C subsequently turned south to leave Luton CAS - two inbound A/C were given extended routings to keep clear of zone and landed without further incident. ☐ Supplementary 28/05/14:☐ Pilot was on track then turned left and infringed the Luton CTA & CTR. Realised he was lost and called PAN on guard frequency.
201406437	21/05/2014	EGTT : London (FIR)	Tring	1nm E	D	CTR	AIRBUS	Turbofan	2	Infringement of the Luton CTR and CTA (Class D) by an unknown aircraft squawking 7000 at 2500ft. 201406540	21/05/2014	EGTT : London (FIR)	MID	2.5 SE	A	TMA	CESSNA	Reciprocating	1	Infringement of the LTMA (Class A) by a C172 indicating 2800ft, resulting in loss of separation with inbound traffic. Traffic info and avoiding action given.	C172 at 3A entered CTA just South of MID at 3A tracking East. B737 is downwind, just about to give avoiding action when an outbound aircraft checks in he is told to standby and avoiding action given and some traffic information. C172 starts to track North and B737 is turned away again to the localiser. Twr is informed A319 is given delaying action to avoid infringer and climb to keep inside CAS.☐ Supplementary 29/05/14:☐ I planned a circuit of the Isle of Wight and a visit to Redhill for the return via the Dartford Crossing. I made a PPR call to Redhill before leaving. I was running late and, on leaving the Isle of Wight, decided to return directly to EGTR. I decided to call Redhill around MID to tell them I was not coming and then to switch to Farnborough for a basic service and transit. I called Redhill to tell them not to worry and switched to Farnborough. Almost immediately I heard Farnborough ask if the plane about a mile north of MID was on frequency. I responded that it was probably me and I was about to call them. I was surprised that they had called me and looking at the chart realised that I was at 2600ft in the 2500ft LTMA immediately to the east of MID. I descended immediately and the return to EGTR went as planned. I had observed the 3500+ LTMA note to the West of MID and the 2500+ note to the North of Slinfold but , for some inexplicable reason, I had overlooked the 2500+ note immediately to the East of MID and thought I was still in 3500+ airspace.
201406540	21/05/2014	EGTT : London (FIR)	MID	2.5 SE	A	TMA	BOEING	Turbofan	2	Infringement of the LTMA (Class A) by a C172 indicating 2800ft, resulting in loss of separation with inbound traffic. 201406676	26/05/2014	EGTT : London (FIR)	EGBJ (GLO): Gloucestershire	1.75nm E	G	ATZ	CIRRUS	Reciprocating	1	Infringement of the Gloucestershire/Staverton ATZ (Class G) by an unknown aircraft showing as a primary contact only at approx 2000ft. Aircraft identified as an SR22.	At approximately 1215 UTC, a contact was observed on primary radar to pass 1.75 NM East abeam Gloucestershire, northbound. Looking out of the VCR window, a SR22 aircraft corresponding with the radar contact was seen at an estimated level of 2000 ft. Further information gathered from local ATSUs gave the callsign as SR22 and a mode C readout of 2.0A was obtained from Brize Radar (Brize QNH 1019). No contact was made by the pilot at any time on any of the Gloster frequencies. A similar event occurred some three hours prior to this, with the aircraft travelling in the opposite direction but at a slightly higher level. Appropriate CAA action is to be taken as a result of this incident.
201406743	24/05/2014	EGTT : London (FIR)	EGSL : Andrewsfield	3nm NE	G	Restricted area	SUPERMARINE	Reciprocating	1	Infringement of the Stansted TMZ 1 (Class G) by an unknown aircraft squawking 7000 with no Mode C, causing two aircraft to be delayed. Aircraft later identified as a Spitfire. Traffic info given.	
201406795	26/05/2014	EGTT : London (FIR)	Not specified		D	CTA	PIPER	Reciprocating	1	Possible infringement of the Manchester CTA (Class D) by a PA28 maintaining 2200ft. CAIT activated. Standard separation maintained.	CAIT alerted us to an infringer just north of BARTN. Callsign was a PA28 and was maintaining 2.2A where the base of controlled airspace is 2A. Two outbound were in conflict with it but separation was maintained without the need for avoiding action. Once the infringer reached Barton aerodrome it descended beneath CAS.

201406936	30/05/2014	EGTT : London (FIR)	EGNS (IOM): Isle Of Man/Ronaldsway	5 NE	D	CTR	ROBINSON	Reciprocating	1	Infringement of the Isle of Man CTR (Class D) by an R44. Standard separation maintained.	R44 called saying that he was airborne from Mount Murray Hotel and wished to transit the control zone. The pilot was advised he had lifted into Class D airspace without an ATC clearance.
201406953	31/05/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	5 SE	D	CTR	VANS	Reciprocating	1	Infringement of the Luton CTR (Class D) by an RV8. Standard separation maintained. Traffic info given.	At 1117z, an aircraft with 5030 Mode A and no Mode C entered the Luton CTR 5 miles SE of Luton Airport. The aircraft was on a NNW track. I phoned Farnborough who at the time of picking up the phone were issuing instructions to the aircraft to leave CAS. I then phoned Luton Tower to suspend departures with one CLN departure waiting to depart. At the time I was in control of one VFR transit aircraft and traffic info was given. I subsequently received the details of the infringing aircraft from the Farnborough ATSA. □ Supplementary 03/06/14: □ I was working LARS N+E boxed, having just taken over the position. The frequency had just started a phase on quietening down after being extremely busy with up to 30 a/c on frequency. I can't recall if I noticed the RV8 (squawking 5030) infringe the EGGW CTR before or after the EGGW line started to ring, but the moment I noticed I asked the pilot to turn South immediately if able and advised his position inside CAS. I had no response initially and answered the phone. I asked the EGGW controller if he was calling reference the 5030 which he was, so advised I was trying to raise him and turn him out now. The RV8 pilot acknowledged my second call to turn South, so I again advised it to turn South immediately if able, and tried to keep the pilot calm while informing the pilot of possible conflicting traffic to the SW entering the EGGW CTR on a EGGW squawk. After leaving CAS I assisted the RV8 with his navigation, and told the pilot to try flying NE over the EGLG ATZ to get back enroute, assessing this to be the safest course given possible pilot confusion. RV8 then resumed own navigation without further incident. EGSS did call a
201406966	31/05/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	10-12nm SW	D	CTA	CESSNA	Reciprocating	1	Infringement of Stansted TMZ 2 (Class G) and Stansted CTA (Class D) by an unknown aircraft showing as a primary contact only, resulting in loss of separation with an inbound B737. Aircraft identified as a C177. Traffic info and avoiding action given.	While vectoring a/c inbound for runway 04 I noticed a magenta primary only contact enter TMZ2 tracking south-east. I gave avoiding action and traffic information to B737 who was downwind at 3000'. The unknown a/c entered the Hunsdon Microlight activity area and more or less remained within this area. B737 was then vectored downwind right-hand for runway 04 at 3000'. I handed over position to another controller and immediately after an unknown a/c entered the CTA just to the west of North Weald tracking SE and indicating 2000', and clipping the corner. The unknown was identified by mode s as a C177 which passed behind B737 who had been turned onto a base-leg. Traffic information was passed to B737. Avoiding action was not taken as the a/c were diverging from each other. Southend advised on the details of C177.
201406966	31/05/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	10-12nm SW	D	CTA	BOEING	Turbofan	2	Infringement of Stansted TMZ 2 (Class G) and Stansted CTA (Class D) by an unknown aircraft showing as a primary contact only, resulting in loss of separation with an inbound B737. Aircraft identified as a C177. Traffic info and avoiding action given.	While vectoring a/c inbound for runway 04 I noticed a magenta primary only contact enter TMZ2 tracking south-east. I gave avoiding action and traffic information to B737 who was downwind at 3000'. The unknown a/c entered the Hunsdon Microlight activity area and more or less remained within this area. B737 was then vectored downwind right-hand for runway 04 at 3000'. Avoiding action was not taken as the a/c were diverging from each other. Southend advised on the details of C177.
201406967	30/05/2014	EGTT : London (FIR)	EGNS (IOM): Isle Of Man/Ronaldsway		D	CTR	CESSNA	Reciprocating	1	Infringement of the Isle of Man CTR (Class D) by a C172 at 2500ft. Standard separation maintained. Appropriate advice subsequently given to the pilot concerned.	

201406968	30/05/2014	EGTT : London (FIR)	EGNS (IOM): Isle Of Man/Ronaldsway	10 NW	D	CTR	PIPER	Reciprocating	1	Infringement of the Isle of Man CTR (Class D) by a PA32. Standard separation maintained. Appropriate advice subsequently given by ATC.	
201406974	01/06/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted		D	CTA	PIPER	Reciprocating	1	Infringement of the Stansted CTA 2 (Class D) by a PA28 indicating 2000ft. Standard separation maintained. Operator alerted.	At 1126z, secondary cait was activated when the PA28 entered the CTA indicating altitude 2000ft on an easterly track. I called North Weald but they weren't talking to the aircraft. The Luton controller stated he had just finished giving a service to PA28 so he was able to give me the details. Fortunately there was no IFR traffic in the vicinity at the time. We are using RW04 this morning and aircraft are regularly operating in that area at 2000ft on a base leg. Aircraft descended to 1700ft and left the CTA to the south of North Weald.☐ Supplementary 08/07/14:☐ Due to miscalculated wind component, I drifted slightly, which put me inside the Stansted CTA without realising.
201407083	31/05/2014	EGTT : London (FIR)	Eskmeals Range EGD406		G	Danger area	UNKNOWN	Unknown	1	Danger Area Infringement - EGD406.	At 1220(L), a light a/c (with red leading edges) flew South to North over one of the firing batteries at 500ft. Checkfire procedures were implemented until the a/c cleared the Range at 1224 (L).
201407083	31/05/2014	EGTT : London (FIR)	Eskmeals Range EGD406		G	Danger area	OTHER	Turboshaft	2	Danger Area Infringement - EGD406.	At 1220(L), a light a/c (with red leading edges) flew South to North over one of the firing batteries at 500ft. Checkfire procedures were implemented until the a/c cleared the Range at 1224 (L).
201407095	03/06/2014	EGTT : London (FIR)	EGCB : Manchester/Barton		G	ATZ	PIPER	Reciprocating	1	Infringement of the Manchester Barton ATZ (Class G) by a PA28. Traffic info given.	PA28 departed EGCB at 0902z after advising he was departing on a local flight. The pilot reported departing the circuit towards the POL VOR at 0904 and then subsequently advised he was changing frequency to Manchester Radar on 118.575 at 0914. At 0916 the aircraft appeared in the overhead at EGCB tracking NE to SW at an unknown height. The only other aircraft in the circuit was advised of the PA28 and the situation and advised he was looking for the aircraft. Manchester Radar were phoned on the Direct Line and reported that they had had no contact from the PA28 and that they were not working him. It later transpired that the pilot was landing away at Wolverhampton.

201407125	04/06/2014	EGTT : London (FIR)	EGNS (IOM): Isle Of Man/Ronaldsway	5 NE	D	CTR	ROBINSON	Reciprocating	1	Infringement of the IOM TT RA-T (Class D) by an R44 towards the Mount Murray Hotel.	7000 squawk and primary return observed tracking through the TT RA-T inside CAS towards Mount Murray Hotel from the Peel direction. Return disappeared at the Hotel. The return was visually acquired by ADC as a helicopter.
201407137	26/05/2014	EGTT : London (FIR)	EGCT : Tilstock		G	Other	BOLKOW	Reciprocating	1	UK AIRPROX 2014/072 - Infringement of the Tilstock parachute drop zone area (Class G) by a Bolkow Bo209 at 1500ft came into close proximity with a parachutist.	CAA Closure:☐ No response from PIC. This AIRPROX will be subject to a separate review by the United Kingdom AIRPROX Board (UKAB).
201407153	01/06/2014	EGTT : London (FIR)	EGDY (YEO): Yeovilton		G	ATZ	ROBINSON	Reciprocating	1	Infringement of the Yeovilton ATZ (Class G) by a civilian helicopter (believed R44) at 800ft.	RNAS Yeovilton was closed for military flying. Yeovilton Flying Club (GA) and Gliding Club were operating. Weather was fine, visibility over 10km, no cloud below 2000ft. Runway in use was 27L. Circuit height is 800ft. I was standing by my aircraft on South Dispersal, about to refuel. One glider was on runway 27 prior to launch, one GA aircraft was taxiing from North to South Dispersals. No club aircraft were airborne at the time. I watched a black civilian helicopter, I believe an R44, approach from the east and fly at circuit height the wrong way down the precise path of the downwind leg of 27L. The Gliding Club operates its activities from a bus, using 120.800 MHz (Tower freq). I immediately called on their mobile number - they had not observed the helicopter, but confirmed that no radio transmission had been made. I was Yeovilton Flying Club Duty Pilot for the day.
201407156	04/06/2014	EGTT : London (FIR)	MALBY	5nm North	A	Other	CIRRUS	Reciprocating	1	Infringement of Airway L9 (Class A) by an SR22 squawking 7000 at FL94.	SR22 was cleared by ADC for take-off, understood to be on a VFR flight plan from EGBJ to LFAT via the GWC. ATD 14:50 UTC and VFR DEP signal sent. After being transferred to Approach, the pilot advised he was climbing to 1300 ft, and was provided with a Basic Service, as is routine for VFR flights. When the aircraft was approximately eight miles South, I ascertained that the pilot wished to transfer to Brize Radar for a service (the pilot received a service from Brize on his inbound flight), and so the pilot was cleared to freecall Brize on 124.275 MHz. Some five minutes later, the pilot came back onto the Gloster Approach frequency with words to the effect that Brize were not expecting him. I suspected there might have been some difficulty understanding the pilot's request/intentions, so, still believing the pilot to be flying VFR, I suggested he tried Brize LARS again, and to explain that he required a radar service for his VFR transit. The pilot then stated he was flying IFR and climbing FL90 to MALBY. I advised the pilot that we had him booked out on a VFR flight plan to LFAT via the GWC, and suggested he should stop climb FL60 and remain outside CAS. The pilot advised he had filed both a VFR and an IFR flight plan but, after electing to fly IFR, had not cancelled his VFR plan (ADC only had a flight progress strip for the VFR flight). The pilot then stated he was happy to continue to his destination on his VFR flight plan, at which point he was advised to remain outside CAS and freecall en route.☐ Supplementary 04/06/14:☐ At 14.59, 7000 squawk was seen entering CAS 5 miles North of Malby climbing to FL94. After passing Malby, the squawk changed to a Brize Squawk and the aircraft descended to
201407182	05/06/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	8 NE	D	CTR	AMERICAN AVIATION	Reciprocating	1	Infringement of the Southampton CTR (Class D) and subsequent loss of separation with an inbound DHC8 by an AA5.	At time 1001 I was halfway through a handover of the radar position when an unknown primary contact was seen approaching the zone boundary from the North, I made a blind call to it with no reply, and so gave a DHC8 (downwind left for R/W20) avoiding action against it, with traffic info as the contact entered. More blind calls were made, with no reply. The DHC8 crew said that they could see a light fixed wing aircraft at low level to the North of them as they turned. I estimate that separation was reduced to less than 3nm as the DHC8 turned. My colleague was happy to take the handover, and continued to call the contact with no reply, the contact continued southbound towards the aerodrome and then turned back towards the DHC8, causing the new controller to take further avoiding action away from him (at one point he was forced to take the DHC8 outside of CAS to keep some distance from the unknown). The tower controller identified the aircraft as possibly a PA28 at approximately 1500 or 2000 feet. The contact left CAS and disappeared in the vicinity of Popham. Farnborough were contacted by the ATSA but said that they were not working anything in the vicinity.☐ Supplementary 09/06/14:☐ Routing from Petersfield to Popham at 2000ft AGL, visual with Lasham on right of track, visual with New Arlsford on the NE corner of the Solent CTA. At this point I checked bearing and GPS track to find Lost Satellite signal indicated , no warning tone received from GPS. While re-orientating on looking up, perceived Winchester in the distance to be Basingstoke. Set heading for 'Basingstoke', flew for approx 3 minutes, realised error, reset course and left

201407182	05/06/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	8 NE	D	CTR	DE HAVILLAND	Turboprop	2	Infringement of the Southampton CTR (Class D) and subsequent loss of separation with an inbound DHC8 by an AA5.	At time 1001 I was halfway through a handover of the radar position when an unknown primary contact was seen approaching the zone boundary from the North, I made a blind call to it with no reply, and so gave a DHC8 (downwind left for R/W20) avoiding action against it, with traffic info as the contact entered. More blind calls were made, with no reply. The DHC8 crew said that they could see a light fixed wing aircraft at low level to the North of them as they turned. I estimate that separation was reduced to less than 3nm as the DHC8 turned. My colleague was happy to take the handover, and continued to call the contact with no reply, the contact continued southbound towards the aerodrome and then turned back towards the DHC8, causing the new controller to take further avoiding action away from him (at one point he was forced to take the DHC8 outside of CAS to keep some distance from the unknown). The tower controller identified the aircraft as possibly a PA28 at approximately 1500 or 2000 feet. The contact left CAS and disappeared in the vicinity of Popham. Farnborough were contacted by the ATSA but said that they were not working anything in the vicinity.☐ Supplementary 09/06/14:☐ Routing from Petersfield to Popham at 2000ft AGL, visual with Lasham on right of track, visual with New Arlsford on the NE corner of the Solent CTA. 201407221	05/06/2014	EGTT : London (FIR)	MCT	Bearing 218 Range 11nm	D	CTR	CESSNA	Reciprocating	1	Infringement of the Manchester CTR (Class D) by a C152 squawking 7426 with no height information. Departures stopped.	I noticed a C152 on a 7426 squawk with no height information south of EGCC when the stafa radar controller called to ask for more of my airspace with a CC departure in order to avoid him. I then hooked the target on the radar and made my Tactical aware of where it was, as it was tracking toward my airspace in the WHI area. A321 was then seen on radar airborne from CC and then called on frequency. At the time, there was at least 8 miles lateral between them. My tactical then turned the A321 further north in order to create more room, hence separation was not lost and the A321 was never in any danger and was unaware of the C152. I rang CC Tower to ask if he was aware of the aircrafts presence, he informed me he was and had stopped departures. I rang EGGP and they were also unaware and were trying to reach him with a blind transition. I searched in the SIRS for the squawk, 7426 came up as the EGOS conspicuously squawk. I then ran the LAS on duty and informed him of all that had happened and he proceeded to contact EGOS, who were eventually able to contact the aircraft, and he subsequently turned south away from the CC departure track and normal operations resumed.☐ Supplementary 07/06/14:☐ Operating as the safety controller on a level 3 check, we noticed a 7426 code entering the CTR in the Holmes Chapel vicinity. No height information was available but the callsign was obtained from the RSS radar. The aircraft entered controlled airspace without a clearance at approx' 1418z and remained inside controlled airspace until eventually leaving the CTR in the Northwich area at time 1425z. Initially a Check was issued to Sanba and Listo
201407221	05/06/2014	EGTT : London (FIR)	MCT	Bearing 218 Range 11nm	D	CTR	AIRBUS	Turbofan	2	Infringement of the Manchester CTR (Class D) by a C152 squawking 7426 with no height information. Departures stopped.	I noticed a C152 on a 7426 squawk with no height information south of EGCC when the stafa radar controller called to ask for more of my airspace with a CC departure in order to avoid him. 201407239	05/06/2014	EGTT : London (FIR)	EGGP (LPL): Liverpool		D	CTR	BELL	Turboshaft	1	Infringement of the Liverpool CTR (Class D) by a Bell 206 at 1500ft. Standard separation maintained.	A 7000 Squawk was observed entering Controlled Air Space SW of Capenhurst. The Aircraft previously was carrying a Hawarden squawk. I spoke to them and he was told to remain outside CAS. Hawarden said it was a B06 inbound to a private site at Neston. I tried calling him, but to no avail. A departure was delayed until the infringer was observed landing on the boundary of CAS. Pilot contacted after landing.
201407265	05/06/2014	EGTT : London (FIR)	BKY	6nm E	D	CTA	HARMON	Reciprocating	1	Infringement of the Luton CTA (Class D) by an unknown aircraft showing as a primary contact only, resulting in a potential conflict with an A319 on final approach to R/W26. Infringer identified via Biggin Hill. Traffic info and avoiding action given.	Whilst working as INT I noticed a fast moving primary contact (believed to be outside of CAS) tracking towards the Luton CTA. I also had an A319 on the final approach path. I was a little concerned by the track of the primary contact and elected to give traffic info to the inbound aircraft. Later during the series of events the contact set a squawk of 7000 but with no Mode C and entered the Luton CTA - I elected to break A319 off the approach and reposition at this point. I estimate (and the pilot informed me) that at the point the contact entered the CTA before the break off they were 1.5 miles away. The contact left the zone to the SE of Luton and the inbound aircraft was repositioned. I tracked the contact as it continued in a southerly direction navigating around the London control zone to the East. Sometime later it set a Biggin Hill conspicuity squawk so I phoned Biggin Hill and asked them to allocate a squawk of 4670 to the aircraft. The Biggin Hill controller gave the details of the a/c. This phone call took place on another panel as I was on a break at the time. CAIT activated.☐ CAA Closure:☐ Pilot error-loss of situational awareness. Warning letter issued.

201407265	05/06/2014	EGTT : London (FIR)	BKY	6nm E	D	CTA	AIRBUS	Turbofan	2	Infringement of the Luton CTA (Class D) by an unknown aircraft showing as a primary contact only, resulting in a potential conflict with an A319 on final approach to R/W26. 201407307	06/06/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	10nm SW	A	TMA	CESSNA	Reciprocating	1	Possible infringement of the Manchester TMA (Class A) by a C152. Traffic info and avoiding action given to a departing B737. CAIT activated.	On sector as WAL/IOM Tactical C152 set of CAIT when he appeared slightly East of the Low Level Corridor approximately 10 miles SW of Manchester. C152 was indicating 1200/1300 feet and was in conflict with B737 who was departing out of Manchester. I gave an avoiding action turn to B737 and by the time the pilot had acknowledged the instruction the aircraft had passed each other therefore I informed the B737 that the turn had been due to infringing traffic which they had now passed and instructed the aircraft to resume own navigation. C152 went back inside the Low level Corridor very quickly and CAIT de-activated. The aircraft continued South and changed to a 7426 squawk and activated CAIT again when it climbed to 2600 feet where the base was 2500 feet. Again this deactivated very quickly when the aircraft crossed the boundary where the base rises to 4500 feet. ☐ Supplementary 11/06/14:☐ On investigation, C152 did not exit the LLR, and therefore there was no loss of separation. It did track right up to the boundary at an acute angle before turning, however did not 'cross the line'. CAIT activated as C152 was so close to the boundary.☐ Supplementary 17/06/14:☐ Flying at 2400. Height confirmed by Shawbury ATC on transfer from Manchester. Sincere apologies for creating a problem. Did not notice the infringement.
201407307	06/06/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	10nm SW	A	TMA	BOEING	Turbofan	2	Possible infringement of the Manchester TMA (Class A) by a C152. Traffic info and avoiding action given to a departing B737. CAIT activated.	On sector as WAL/IOM Tactical C152 set of CAIT when he appeared slightly East of the Low Level Corridor approximately 10 miles SW of Manchester. 201407317	31/05/2014	EGTT : London (FIR)	EGNR : Hawarden	5nm SW	A	Other	CESSNA	Reciprocating	1	Infringement of Airway N864 (Class A) by an unknown aircraft squawking 1177, in climb to 3300ft. Aircraft believed to be a C172. CAIT activated. Standard separation maintained.	At approximately 1535z, a CAIT alert was displayed on a contact 5nm SW Hawarden. The contact was observed to be squawking 1177 (FIS), tracking Westbound and climbing to altitude of 3.3A. The contact continued Westbound at 3.3A and infringed CAS for around 5mins before slowly descending below CAS. A phone call was made to Liverpool (Hawarden were closed for the day) to ascertain if they were aware of the traffic- they were not. A phone call was also made to London Information where a few probable details were ascertained. These were; a C172 was told to ROCAS 5nm SW Hawarden.
201407331	05/06/2014	EGTT : London (FIR)	Guildford		D	CTR	AVIONS ROBIN	Reciprocating	1	Infringement of the Gatwick CTR (Class D) by a DR400 squawking 7000. Standard separation maintained.	Working LARS W during CAS T 7000 observed westbound at Dorking. Contact was attempted several times from approx. 12:28. The a/c infringed at Guildford at 12:31, leaving in a southbound direction approx. 3 mins later. The a/c was A only, callsign obtained from Mode S.

201407356	08/06/2014	EGTT : London (FIR)	SAM	7nm NNE	D	CTR	UNKNOWN	Unknown		Infringement of the Solent CTR (Class D) by an unknown aircraft showing as a primary contact only. Aircraft described as a microlight at approx 2000ft. Traffic info given. Standard separation maintained.	Primary contact observed approx 7 NM North of SAM, 1 NM inside CTR, I have no recollection of the return painting prior to this point. Traffic info given to VFR traffic in the vicinity but no blind call made. Contact continued South to a point 6nm North of SAM before turning left and leaving the CTR 3 minutes later at 1538. Attempts made using other a/c to identify infringing a/c after it had passed the CTR boundary- this a/c described it as "a microlight" at "about 2000ft". Radar contact finally lost at 324/8 NM SAM at 1553.
201407356	08/06/2014	EGTT : London (FIR)	SAM	7nm NNE	D	CTR	SIAI MARCHETTI	Reciprocating	1	Infringement of the Solent CTR (Class D) by an unknown aircraft showing as a primary contact only. Aircraft described as a microlight at approx 2000ft. Traffic info given. Standard separation maintained.	Primary contact observed approx 7 NM North of SAM, 1 NM inside CTR, I have no recollection of the return painting prior to this point. Traffic info given to VFR traffic in the vicinity but no blind call made. Contact continued South to a point 6nm North of SAM before turning left and leaving the CTR 3 minutes later at 1538. Attempts made using other a/c to identify infringing a/c after it had passed the CTR boundary- this a/c described it as "a microlight" at "about 2000ft". Radar contact finally lost at 324/8 NM SAM at 1553.
201407366	08/06/2014	EGTT : London (FIR)	EGLC (LCY): London city	E	D	CTA	FLIGHT DESIGN	Reciprocating	1	Infringement of the London City CTA (Class D) by a Flight Design CT2K, resulting in loss of separation with an EMB190 in descent to R/W27. Traffic info and avoiding action given.	EMB190 was established on the localiser for R/W27. I noticed an aircraft climbing under the London City CTA. The infringing aircraft climbed to approx. 2000ft. I took avoiding action with the EMB190 and achieved about 2nm lateral and 1000ft vertical separation. Traffic info was passed and the EMB190 pilot was visual with the offending plane. Flight Design CT2K was listening to the frequency and contacted me to apologise. The aircraft subsequently called their intended destination and I managed to get all details and verify the level.☐ CAA Closure:☐ Pilot error-distraction. Warning letter issued.
201407366	08/06/2014	EGTT : London (FIR)	EGLC (LCY): London city	E	D	CTA	EMBRAER	Turbofan	2	Infringement of the London City CTA (Class D) by a Flight Design CT2K, resulting in loss of separation with an EMB190 in descent to R/W27. Traffic info and avoiding action given.	EMB190 was established on the localiser for R/W27. I noticed an aircraft climbing under the London City CTA. The infringing aircraft climbed to approx. 2000ft. 201407456	09/06/2014	EGTT : London (FIR)	EGNM (LBA): LEEDS BRADFORD	8 NW	D	CTR	BELL	Turboshaft	1	Infringement of the Leeds Bradford CTR (Class D) by a Bell 206 at 1000ft. Standard separation maintained.	0036 squawk observed getting close to zone boundary. 2 blind transmissions were made in an attempt to get 2 way with aircraft. The acft was then observed entering and transiting CAS. Another call was made when the acft was underneath approx a 5 mile final 14. This time the acft responded and informed me he was low level and could not raise me to gain an entry clearance. The acft was cleared to continue as required and to remain clear of the airfield. No traffic affected. 090/11 28km nil wx few 016 +
201407464	09/06/2014	EGTT : London (FIR)	NORRY	Basildon			CESSNA	Reciprocating	1	Transponder malfunction. Airspace infringement.	CAIT activated by infringing aircraft at FL68 and climbing to FL80 in the NORRY area. Aircraft tracked and identified. Transponder issue identified. Operator will rectify.

201407470	07/06/2014	EGTT : London (FIR)	EGCV : Sleaf		G	ATZ	PIPER	Reciprocating	1	Infringement of the Sleaf ATZ (Class G) by a PA28.	I was the TC (Zone) controller at the time of the occurrence. A PA28 requested a BS, routing from the IOM to Wolverhampton. He was believed to be NW of SHY stating that he was at 900' on QNH 1010. After issuing the service and passing the SHY QNH 1010, the pilot continued on his route. Due to the known area of poor radar coverage I did not see any primary or secondary contact in the area of the DF spike to the NW. This was anticipated due to the ac altitude and the poor radar coverage to the NW of Shawbury. After approximately 10mins I saw a non-squawking contact WNW of Sleaf, inside the ATZ by 1/2 mile. I did not respond to this contact as it is usual for Sleaf cct traffic to be painting this way on radar. When the contact was directly W abeam Sleaf my BS squawk of 7426 displayed on radar, correlating with the previous non squawker inside the Sleaf ATZ. I asked the pilot if he was in the Sleaf ATZ and if so, had he received permission to enter their airspace. The pilot stated that he had not received permission from Sleaf and that he had been on my frequency all the time. I immediately contacted Sleaf Tower to inform them of the a/c. Sleaf stated that they had seen "something fly through" but they had nothing happening at their field at the time and they were happy for me to continue as an ATZ transit. I informed the pilot that I had gained permission for him to continue on his transit of Sleaf. I also reminded him that I could only give him permission to transit ATZ's, which I am directly responsible for. If he is requesting to transit any other ATZ he must gain specific permission from the ATZ operators to transit. To which he replied "confirmed". I contacted Wolverhampton Tower and requested that they ask the pilot to contact the Shawbury ATC
201407540	11/06/2014	EGTT : London (FIR)	DET	5 N	A	TMA	CESSNA	Reciprocating	1	Infringement of the LTMA (Class A) by a C172 at 3900ft. Standard separation maintained.	I was mentoring a trainee on Thames Radar when I spotted a 7000 squawk North of DET by approx 5nms tracking East, with a Mode C readout of 3600 feet and slowly climbing; the highest altitude that the Mode C readout gave was 3900'. I contacted FIR East as I saw the 7000 squawk switch to a FIS squawk and they confirmed they were working an ac in the position that I passed to them. I asked them to ask the pilot to squawk 7030 so that I could positively identify the a/c. Once positively identified, FIR East gave me the necessary a/c details.
201407558	11/06/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	8 SE	D	CTR	VANS	Reciprocating	1	Infringement of the Luton CTR (Class D) by a Vans RV9 at 2000ft. Standard separation maintained.	A 7000 was observed entering the GW zone from the SE from the direction of EGLG at 2200 feet. I called the tower and went check all. It was tracking west, I did a blind transmission and shortly after it turned to the South. It then squawked 5020 after leaving controlled airspace and I got the following details from LF LARS RV7 from EGLG to Weston Zoyland. No traffic was affected.
201407585	12/06/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	Low level corridor			CIRRUS	Reciprocating	1	Infringement due to faulty transponder.	I was working as Combined WAL Tactical and Planner. I observed through a CAIT alert that aircraft (SSR 7000 - Callsign derived from Mode S) was routing southbound following the Low Level Corridor but was fluctuating between 1.3A and 1.4A. I called the W2 LAS to enable them to notify the appropriate agencies. Supplementary 13/6/14: I was on radar last night and aircraft called up. I cleared him through the Manchester Low Level Route and gave him all the appropriate info, which he read back correctly. He then proceeded to inform me that his Mode C was not working correctly and that he had had an "infringement incident" earlier that day. It looks as though his Mode C is over reading. He was quite annoyed with the situation stating that the engineers should have sorted it. Whilst on my frequency last night his Mode C was turned off (which he informed me was due to it malfunctioning).
201407616	12/06/2014	EGTT : London (FIR)	Syerston		G	ATZ	PIPER	Reciprocating	1	PA28 infringed Syerston ATZ (Class G) and subsequently performed an unauthorised landing on disused R/W24.	An aircraft was spotted entering the Syerston ATZ. The aircraft subsequently landed on Runway 24 Centre and proceeded to taxi down the disused runway. No R/T calls were received and attempts to contact the aircraft were unsuccessful. The pilot was subsequently stopped from taxiing down the disused runway, through the use of hand signals, and then proceeded to select the correct taxi route to the hangar. He was met by several CGS personnel whom dispatched from CGS HQ and spoke to the pilot verbally. Tollerton Tower were contacted to see if they had an aircraft of this description. They were aware of the aircraft as he was giving R/T circuit position calls on the Tollerton frequency. He was completing a transit but when questioned was not sure of his location. He was verbally briefed how to depart from Syerston and shown where his intended destination was on his map. Since there was no flying activity at Syerston, the CGS personnel elected not to ask him to contact Syerston Radio, as they were concerned about overloading him with information. They subsequently briefed the Duty Instructor before the aircrafts departure. CAA Closure: Navigation error. Warning letter sent.

201407639	12/06/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	18	A	TMA	CESSNA	Reciprocating	1	Infringement of LTMA (Class A) by a C172 at 6300ft. Traffic info given. Standard separation maintained.	I had noticed a Lakenheath squawk (0451) tracking towards CAS at FL65 NE of Stansted by about 23 miles. As a B737, inbound from the East, crossed over the line between FL95 and FL85 I checked again and realised the C172 was just about to enter CAS at 6300 feet (about 13.20z). I turned B737 away from the aircraft and tried a couple of blind calls to the C172 with no joy. I continued to vector B737 around the infringer and onto final approach. C172 slowly descended to 4000 feet and at 13.29z put on a Southend squawk and descended below the base of CAS. □ Supplementary 13/06/14: □ A/c made his first call on the radar frequency at 4000ft overhead EGSR. The aircraft was told to descend immediately to 3400ft or below to remain outside CAS. TC North East were informed and the aircraft did promptly descend. Aircraft continued to land at Southend without further incident.
201407639	12/06/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	18	A	TMA	BOEING	Turbofan	2	Infringement of LTMA (Class A) by a C172 at 6300ft. Traffic info given. Standard separation maintained.	I had noticed a Lakenheath squawk (0451) tracking towards CAS at FL65 NE of Stansted by about 23 miles. As a B737, inbound from the East, crossed over the line between FL95 and FL85 I checked again and realised the C172 was just about to enter CAS at 6300 feet (about 13.20z). I turned B737 away from the aircraft and tried a couple of blind calls to the C172 with no joy. I continued to vector B737 around the infringer and onto final approach. C172 slowly descended to 4000 feet and at 13.29z put on a Southend squawk and descended below the base of CAS. □ Supplementary 13/06/14: □ A/c made his first call on the radar frequency at 4000ft overhead EGSR. The aircraft was told to descend immediately to 3400ft or below to remain outside CAS. TC North East were informed and the aircraft did promptly descend. Aircraft continued to land at Southend without further incident.
201407642	12/06/2014	EGTT : London (FIR)	Macclesfield	S	D	CTR	AEROSPATIALE	Turboshaft	1	Infringement of Manchester CTR (Class D) by an AS350 squawking 7000. Standard separation maintained.	A7000 observed some ten miles south of the CTR on a northerly track, monitored the return, observed the aircraft enter the zone south of Macclesfield at 1A indicated unverified. Notified the AIR 1 controller, made two blind transmissions and phoned Barton to see if they were working the aircraft. Mode C information provided the registration. Aircraft did not respond to my calls, proceeded north and the descended in an orbit and apparently landed in the North Macclesfield/Prestbury area. The incident had no effect on any Manchester traffic.
201407644	11/06/2014	EGTT : London (FIR)	Not specified		A	TMA	PIPER	Reciprocating	1	Possible infringement of the Manchester TMA (Class A) by a PA38 indicating 1400ft. CAIT activated. Traffic info and avoiding action given to a departing aircraft in climb to cleared FL80.	An a/c called me climbing out and was climbed to FL80. The a/c was passing 5000ft when PA38 set off the caith showing 1400ft. While I was satisfied that I would retain 5000ft against the traffic, I was concerned that the radar returns might merge so I gave an avoiding action turn to ensure that they did not. My planner phoned Manchester approach who reported that the aircraft was in the low level corridor maintaining 1300 on QNH1026. □ Supplementary 03/07/14: □ I was advised to use transponder code 7366 by my instructor whilst navigating the Low Level Corridor. Unfortunately I did not do so as I was given an instruction by Liverpool radar to use the code 7000, and mistakenly believed that this request was to override my previous instruction. I understand now, that it is not the case and a 7000 code with a free call instruction does not mean other more relevant are not to be used in the appropriate situations. I was however listening to Manchester Radar 118.575, and was able to communicate with them when contacted. I was undertaking a flight in order to negotiate the Low Level Corridor (LLC) between Liverpool and Manchester as a solo student pilot in preparation for a cross country qualifier. It is a route I have done previously as a solo student pilot, negotiating it without any issues. I obtained Manchester ATIS and changed to listening frequency 118.575, however I failed to change to the appropriate transponder code 7366 despite a clear brief from my instructor, choosing 7000 instead. I believe I confused myself about the hierarchy of instructions for the situation. I understand that the incident involved PA38 straying into Manchester controlled airspace by straying too far west of my intended
201407644	11/06/2014	EGTT : London (FIR)	Not specified		A	TMA	UNKNOWN	Unknown		Possible infringement of the Manchester TMA (Class A) by a PA38 indicating 1400ft. CAIT activated. Traffic info and avoiding action given to a departing aircraft in climb to cleared FL80.	An a/c called me climbing out and was climbed to FL80. 201407656	12/06/2014	EGTT : London (FIR)	EGTK (OXF): Oxford/Kidlington		G	ATZ	UNKNOWN	Reciprocating	1	Infringement of the Oxford ATZ (Class G) and possibly D129.	Whilst operating as the Oxford Radar controller I observed a radar contact entering the north eastern ATZ boundary having just left D129 which was notified as active. The traffic was squawking 7000 with intermittent Mode C indicating 1500ft. No Mode S was observed. The traffic passed 1nm North of the aerodrome through the visual circuit and traffic info was passed to Twr. Twr reported it to be a possible Vans type aircraft. Blind calls were made on both the Oxford Radar and legacy APP frequency (125.325). The traffic was tracked as it flew westbound and disappeared from radar in the vicinity WOTAN some 10 minutes later.
201407657	12/06/2014	EGTT : London (FIR)	EGD138		G	Danger area	CESSNA	Reciprocating	1	Infringement Of Danger Area EGD138 (Class G) by a C172 at 1600ft.	Blind calls made on 128.950 and 130.775. No response. Range authority contacted and check fire until aircraft vacated southbound at 1511. Range authority passed details, aircraft track monitored and lost mid channel southbound.
201407672	13/06/2014	EGTT : London (FIR)	EGWU (NHT): Northolt		A	CTR	DE HAVILLAND	Reciprocating	1	Infringement of the London CTR (Class A) by a DH82.	I had just taken over the Tower controller position and had no aircraft on frequency. I received a free-call on the tower freq' from a Tiger Moth expected to arrive one hour later. Telling the aircraft to stand by, I intended to hand the aircraft over to the radar controller so phoned him to confirm which frequency to send it to. At this point the Tiger Moth free called again stating he was down wind for runway 25RH. The ATCO observed the aircraft out the window, late downwind beginning to turn finals. The traffic lights were set to red and I issued a joining clearance with the QFE, which was not read back. I then attempted to ascertain the POB, still receiving no reply. With the aircraft on short finals I issued a landing clearance which wasn't acknowledged. On arrival, the aircraft taxied on to Charlie Taxiway without instruction and free-called me on Ground freq' shortly after.
201407702	13/06/2014	EGTT : London (FIR)	SAM	5nm NW	D	CTR	MAULE	Reciprocating	1	Infringements of the Southampton CTR (Class D) by an unknown aircraft showing as a primary contact only. Aircraft identified via Popham as a Maule MX7. Standard separation maintained.	Primary contact observed approaching Romsey from the West (1427hrs). Series of blind transmissions made with no response. Contact passed CTR boundary at 1424, just North of Romsey bearing 317 degrees from the airfield. Contact continued to track East for 2 miles inside CAS before commencing a left turn and leaving the CTR. The radar return was tracked until it faded just south of Popham. Telephone call to Popham elicited the information that Maule MX7 was possibly the a/c concerned.□ Supplementary 16/06/14:□ In a period of high workload (1135hrs) a contact with a Mode S readout of Maule MX7 infringed the Southampton Control Zone, due workload no tracking action was possible. Blind calls made but no response, I don't believe there was any loss of separation.□ Supplementary 17/06/14:□ I was practising flying by map, compass and protractor to avoid over-dependence on GPS. I left my turn at Romsey VRP too late and should have routed closer to Chilbolton. A GPS would have alerted me to this. I shall in future obtain an Air Traffic Service from Solent Radar, and use a GPS at all times. □ Supplementary 23/06/14□ My intended route would have taken me well clear of the CTR boundary near Beaulieu. As a precaution against infringing CAS I selected the next waypoint from Cowes and pressed the 'Direct to' facility. My saved waypoints include Lymington and Lyndhurst, and I inadvertently input Lyndhurst instead of Lymington. When I realised my mistake I veered away from the
201407709	13/06/2014	EGTT : London (FIR)	Aveley		D	CTA	DIAMOND	Reciprocating	1	UK AIRPROX 2014/090 - DA40 and an EMB170. Traffic info and avoiding action given.	Appropriate CAA action is being taken as a result of this incident.□ This AIRPROX has been subject to a separate review by the United Kingdom AIRPROX Board (UKAB). AIRPROX Board (UKAB) information indicates that this AIRPROX was caused by the EMB170 pilot being concerned by the proximity of the DA40. □ A recommendation has been raised as a result of this AIRPROX.

201407709	13/06/2014	EGTT : London (FIR)	Aveley		D	CTA	EMBRAER	Turbofan	2	UK AIRPROX 2014/090 - DA40 and an EMB170. Traffic info and avoiding action given.	Appropriate CAA action is being taken as a result of this incident.☐ This AIRPROX has been subject to a separate review by the United Kingdom AIRPROX Board (UKAB). AIRPROX Board (UKAB) information indicates that this AIRPROX was caused by the EMB170 pilot being concerned by the proximity of the DA40. ☐ A recommendation has been raised as a result of this AIRPROX.
201407726	14/06/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	8nm E	A	TMA	PIPER	Reciprocating	1	Infringement of the Manchester TMA (Class A) by a PA28 at 1200ft, resulting in loss of separation with an outbound B767. CAIT activated. Traffic info and avoiding action given.	I was operating as WAL/IOM Tactical. I noticed PA28 activate CAIT 8 miles West of Manchester at 1200'. B767 airborne on WAL SID is 3000' and calls me 3-3.5 miles East of PA28. Separation is already lost. I instruct B767 to turn left immediately 180deg and pass traffic info on the infringing aircraft. B767 resumes own navigation when PA28 moves 0.5miles West and re-enters the LLC, de-activating CAIT. ☐ CAA Closure:☐ Pilot error-over reliance on GPS. A warning letter has been issued.
201407726	14/06/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	8nm E	A	TMA	BOEING	Turbofan	2	Infringement of the Manchester TMA (Class A) by a PA28 at 1200ft, resulting in loss of separation with an outbound B767. CAIT activated. Traffic info and avoiding action given.	I was operating as WAL/IOM Tactical. I noticed PA28 activate CAIT 8 miles West of Manchester at 1200'. 201407728	14/06/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	TMZ	G	Restricted area	PIPER	Reciprocating	1	PA18 infringed the Stansted TMZ (Class G). Traffic info and avoiding action. Stansted inbound traffic disrupted.	Whilst vectoring aircraft to R/W04 at Stansted PCAIT was activated on a primary only radar target at T1025 Z. The target aircraft entered the Stansted TMZ at a position SW of WARE VRP and tracked through a 9nm final for R/W04 eventually disappearing from radar whilst in the North Weald circuit. Subsequent telephone coordination revealed the aircraft to be a Piper Cub. A B737 was given avoiding action as a result of the infringement to maintain separation, though 5nm was lost between the two radar contacts they never merged at any point, the a/c also ended up vectored for a 4nm final. Another B737 was also immediately delayed due to the infringing aircraft.☐ Supplementary 16/06/14:☐ The pilot had fitted his own transponder and thought it was working. ATC spoke to him once he landed and provided the following:☐ "I spoke with the pilot of the PA18 inbound to North Weald from Leicester. The pilot explained he had called TC Luton transiting low level through the Stansted-Luton gap and was operating his transponder. TC Luton had apparently told him they could not see the transponder. He flew not above 1000ft and transferred to North Weald West of Ware. Obviously, his transponder was still not operating as he transmitted through the TMZ. North Weald instructed him to squawk 7010 when passing the airfield information. I explained to the pilot that TC had not seen his transponder and therefore regarded the aircraft as an infringement. I confirmed with the pilot that he would depart via the delegated area, remaining clear of the TMZ and would check his transponder with Farnborough or Luton
201407728	14/06/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	TMZ	G	Restricted area	BOEING	Turbofan	2	PA18 infringed the Stansted TMZ (Class G). Traffic info and avoiding action. 201407730	14/06/2014	EGTT : London (FIR)	SAM	7nm NE	D	CTR	OTHER	Reciprocating	1	Infringement of the Southampton CTR (Class D) by an unknown aircraft squawking 7000, indicating 1100ft. Aircraft identified as a Skyranger microlight. Standard separation maintained.	As I took over the position a 7000 squawk was observed NE of Southampton tracking West indicating A011 about to enter the Southampton Control Zone. One departure was held on the runway. Blind transmissions made and the contact turned south bound. Farnborough, Lower Upham and Roughay Farm contacted to ascertain if they knew the aircraft, they didn't. Tower requested to look for the contact. The Tower ATSA and Lower Upham reported the aircraft as a high wing single engine. The contact tracked SE and left the control zone towards Lee on Solent airfield. I continued to make blind transmissions and a Skyranger microlight reported on frequency, I issued a squawk but the pilot said it was too bumpy to select the squawk. I was certain this was the aircraft so requested him to squawk ident on the 7000, the ident feature was then seen on this contact which was Skyranger microlight. The pilot was requested to telephone Southampton ATC after landing. The pilot spoke to the ATC WM and admitted it was him. The departing aircraft was delayed for 5 minutes. Appropriate CAA action is to be taken as a result of this incident.
201407747	15/06/2014	EGTT : London (FIR)	EGBB (BHX): Birmingham	8 S	D	CTR	PIPER	Reciprocating	1	Infringement of the Birmingham CTR (Class D) by a PA28. Standard separation maintained.	I was in position as Radar 1. I observed a primary only return, deemed to be outside controlled airspace around CTA 2, it was north north west bound and on its present track I believed it would enter CAS towards the M20/M42 VRP, as it approached CAS I made a blind call which was not responded to. The primary only return just entered CAS towards the M40/M42. I pointed out the traffic to the Air controller, I made another call to try and get an Identification. I then called the duty Watch Manager to come and assist in trying to trace infringing aircraft and suggested possibly calling Wellesbourne Mountford, at this time the primary came up on the generic London Information squawk. I asked the W. M. to call London Information and suggested a squawk and a right turn onto west to leave CAS, also requesting that the aircraft is handed to me on 118.050. I observed the aircraft turn onto a westerly track and shortly afterwards call me. I asked him to squawk 0401.The aircraft was positively identified as a Piper Arrow out of Wellesbourne Mountford on a cross country flight to Caernarfon. I gave the aircraft a reduced traffic service with the Birmingham QNH, gave the pilot a position check and instructed him to continue on his own navigation. I also informed him that he had entered CAS without a clearance. The pilot was asked to call the duty manager at Birmingham when they had landed. The aircraft left the frequency in the vicinity of Halfpenny Green and I gave the pilot that frequency as he gave me the impression he was going to divert to Halfpenny Green due weather closing in. After reporting this to the W. M. I also made him aware of an error I had made 15minutes previous to this by allowing an aircraft to leave CAS.☐

201407763	15/06/2014	EGTT : London (FIR)	EGSX : North Weald	3.5 W	G	Restricted area	GREAT LAKES	Reciprocating	1	Infringement of the Stansted TMZ2 (Class G).	A non squawking aircraft infringed the Stansted TMZ2, which caused me to give avoiding action to a B737 inbound to Stansted. I phoned North Weald to ascertain the infringer's details.
201407763	15/06/2014	EGTT : London (FIR)	EGSX : North Weald	3.5 W	G	Restricted area	BOEING	Turbofan	2	Infringement of the Stansted TMZ2 (Class G).	A non squawking aircraft infringed the Stansted TMZ2, which caused me to give avoiding action to a B737 inbound to Stansted. I phoned North Weald to ascertain the infringer's details.
201407764	06/06/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	8nm SW	G	Restricted area	BAC	Other	1	Infringement of the Stansted TMZ 2 (Class G) by an unknown aircraft squawking 7010 without Mode C. Aircraft identified as a Jet Provost. Traffic info and avoiding action given to a BE200.	An aircraft squawking 7010 without Mode C infringed Stansted's TMZ 2. I had to give avoiding action and passed traffic info to BE200. The infringer then changed to a Farnborough squawk. I phoned Farnborough and got the aircraft's details.☐ CAA Closure:☐ Pilot error during a transponder problem. The root cause of this infringement was lack of situational awareness. A warning letter has been sent.
201407764	06/06/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	8nm SW	G	Restricted area	BEECH	Turboprop	2	Infringement of the Stansted TMZ 2 (Class G) by an unknown aircraft squawking 7010 without Mode C. Aircraft identified as a Jet Provost. Traffic info and avoiding action given to a BE200.	An aircraft squawking 7010 without Mode C infringed Stansted's TMZ 2. I had to give avoiding action and passed traffic info to BE200. The infringer then changed to a Farnborough squawk. I phoned Farnborough and got the aircraft's details.☐ CAA Closure:☐ Pilot error during a transponder problem. The root cause of this infringement was lack of situational awareness. A warning letter has been sent.
201407907	17/06/2014	EGTT : London (FIR)	Newport		D	CTA	PIPER	Reciprocating	1	Infringement of the Cardiff CTA 6 (Class D) by an unknown aircraft formation, resulting in loss of separation with an inbound ATR72. Aircraft identified as a PA28 and a Jet Provost. STCA and AIW activated. Traffic info and avoiding action given.	Loss of separation between ATR72 and a 7000 squawk in Cardiff CTA-6 indicating 5A the ATR72 was stopped at 6A but no avoiding action given. Separation was 3-4 miles and 1A.☐ Supplementary 19/06/14:☐ I was the radar 1 controller in a split R1/R2 configuration, at time 11:00Z the seating plan had R1 controller going into R2 and the R2 controller taking R1,this split is impossible to carry out so radar 2 offered to box the positions and operate both positions in a boxed configuration. After giving radar 2 my traffic situation R2 closed and took over radar 1&2. At the time of the hand over I did not notice a 7000 squawk in the Newport area at 5000ft. I subsequently found out that the 7000 squawk infringed control airspace and caused Bristol to administer avoiding action.☐ Supplementary 19/06/14:☐ I was the Cardiff Radar 1 Boxed ATCO. At approx 1100 Z, PA28 first called, passing his details as a PA28R information with a Jet Provost. PA28, who was transmitting for both aircraft reported their position as Newport at Alt 5000ft. They were passed the Cardiff QNH 1028 and instructed to squawk 3610. Only one contact was seen which was identified in the Newport area. This placed the aircraft inside Controlled Airspace on first contact. Bristol then phoned to ascertain the identity of the aircraft and asked if the aircraft could call GD Watch Manager. This information was passed to PA28's intended destination, to pass on to the aircraft, after they had landed with them.☐ Supplementary 19/06/14:☐

201407907	17/06/2014	EGTT : London (FIR)	Newport		D	CTA	BAC	Unknown		Infringement of the Cardiff CTA 6 (Class D) by an unknown aircraft formation, resulting in loss of separation with an inbound ATR72. Aircraft identified as a PA28 and a Jet Provost. STCA and AIW activated. Traffic info and avoiding action given.	Loss of separation between ATR72 and a 7000 squawk in Cardiff CTA-6 indicating 5A the ATR72 was stopped at 6A but no avoiding action given. 201407914	17/06/2014	EGTT : London (FIR)	Warrington		D	CTA	EVEKTOR AEROTECHNIK	Reciprocating	1	Infringement of the Manchester CTA (Class D) by an EV97. Standard separation maintained.	On duty as the Manchester Approach South Radar instructor with trainee, we noticed a 7366 code setting of the AIW. We tried to raise the pilot as he was using the listening code but to no avail. The a/c was North of Warrington in the lateral confines of the Low Level Route but climbed to altitude 1.8A. The a/c then reset code 7000 and tracked toward's Barton. We called Barton and asked if the a/c had called them. We obtained the a/c registration from the RDP. The a/c was inbound to Barton and we asked them to get the pilot to contact the Manchester Airport supervisor. I asked Manchester Director to contact West as they had an airliner airborne on a Walsy SID. They had not noticed the AIW but maintained 5nm separation. □ Supplementary 02/07/14: □ Flying North in Low Level Route (1100 feet) passed Thelwell viaduct VRP on my right proceded to turn on a heading for Barton and started to climb when I believed I was out of the low level area and at the same time changed radio and transponder settings to Barton 120.250 and 7000 squawk . I climbed to 1900 ft and proceded in the direction of Barton for an overhead join. I was also using a GPS to navigate for the first time. I believed I was clear of the Low Level Route. □ I have looked at the maps and analysed my route to be certain of the boundary line and also studied the GPS device and display settings. I also need to make sure the transponder setting is changed prior to the radio frequency .
201407948	17/06/2014	EGTT : London (FIR)	EGBJ (GLO): Gloucestershire		G	ATZ	CESSNA	Reciprocating	1	Alleged infringement of the Gloucester ATZ (Class G) by an unknown aircraft showing as a primary contact only at 2000ft. Aircraft identified as a C172.	At approximately 15:30 UTC, a contact was observed on primary radar to be routing toward the aerodrome from the north-east. At 15:33, looking out of the VCR window, a high-wing aircraft corresponding with the radar trace was seen approaching the overhead at an estimated level of 2000 ft, south-west bound. Further information gathered from other ATSUs gave the aircraft identification as a C172, squawking London FIS. I called London Information, who confirmed they were providing a service to the aircraft. The aircraft, a C172, was en route flying at 2.0A on a pressure setting of 1027. Aerodrome QFE at the time was 1024. No contact with Gloucester ATC was made by the pilot at any time on any of the Gloster frequencies. Appropriate CAA action is to be taken as a result of this incident.
201407949	16/06/2014	EGTT : London (FIR)	EG D123, 125 and 126		G	Danger area	ROBINSON	Reciprocating	1	Infringement of Danger Areas EG D123 (Imber), EG D125 (Larkhill) and active Danger Area EG D126 (Bulford) by an unknown a/c squawking 7000. Aircraft identified as an R44.	A 7000 squawk was observed entering southern edge of EGD123 (stated height Gnd - 50,000ft), transit N/E into EGD125(Gnd - 50,000ft), continuing into EGD126 (NOTAMed active for RPA activity sfc - FL090), where he flew close to a military helicopter who was able to obtain the registration and estimate his height around 1000ft agl as he continued N/E erly. Farnborough Radar was contacted and given the registration and asked to confirm position and track from his ident, this was confirmed and estimated track headed towards R44's home base, they contacted the home base on my behalf and confirmed the a/c was homed there and could the pilot contact SPTA Air Ops on landing. As yet there has been no contact from the pilot and at no time during the transit did the a/c contact SPTA Air Ops for a DACS. □ Supervisors Narrative: □ Briefed on the occurrence at 0900 hrs 17 Jun. Apparent that the pilot was unaware of the Danger Area or which frequencies to call Salisbury Ops on. Airfield Manager was unable to confirm whether R44 had returned to home base that evening even though Farnborough Radar stated that the a/c was heading back to its base. □ CAA Closure: □ Pilot error, the root cause being distraction.

201407949	16/06/2014	EGTT : London (FIR)	EG D123, 125 and 126		G	Danger area	OTHER	Unknown		Infringement of Danger Areas EG D123 (Imber), EG D125 (Larkhill) and active Danger Area EG D126 (Bulford) by an unknown a/c squawking 7000. Aircraft identified as an R44.	A 7000 squawk was observed entering southern edge of EGD123 (stated height Gnd - 50,000ft), transit N/E into EGD125(Gnd - 50,000ft), continuing into EGD126 (NOTAMed active for RPA activity sfc - FL090), where he flew close to a military helicopter who was able to obtain the registration and estimate his height around 1000ft agl as he continued N/E erly. As yet there has been no contact from the pilot and at no time during the transit did the a/c contact SPTA Air Ops for a DACS.☐ Supervisors Narrative:☐ Briefed on the occurrence at 0900 hrs 17 Jun. Apparent that the pilot was unaware of the Danger Area or which frequencies to call Salisbury Ops on. Airfield Manager was unable to confirm whether R44 had returned to home base that evening even though Farnborough Radar stated that the a/c was heading back to its base. ☐ CAA Closure:☐ Pilot error, the root cause being distraction.
201408041	19/06/2014	EGTT : London (FIR)	NDL	3nm NNE	D	CTA	ROCKWELL	Reciprocating	1	Infringement of the Solent CTA (Class D) by an unknown aircraft at 2300ft. Aircraft identified as a Rockwell 112. Traffic info and avoiding action given to inbound traffic. Standard separation lost.	A contact was observed entering the Solent CTA tracking NE at 2.3A. Avoiding action was given to an inbound to R/W02 at Southampton as a result. Blind calls were made with no response. Mode S showed a callsign of Rockwell 112. I made a call to this but no response. The a/c climbed to 2.6A.☐ CAA Closure:☐ Pilot error. Distraction and prioritising tasks were the root causes of this incident. Warning letter issued.
201408041	19/06/2014	EGTT : London (FIR)	NDL	3nm NNE	D	CTA	PIPER	Reciprocating	2	Infringement of the Solent CTA (Class D) by an unknown aircraft at 2300ft. Aircraft identified as a Rockwell 112. Traffic info and avoiding action given to inbound traffic. Standard separation lost.	A contact was observed entering the Solent CTA tracking NE at 2.3A. Avoiding action was given to an inbound to R/W02 at Southampton as a result. Blind calls were made with no response. Mode S showed a callsign of Rockwell 112. I made a call to this but no response. The a/c climbed to 2.6A.☐ CAA Closure:☐ Pilot error. Distraction and prioritising tasks were the root causes of this incident. Warning letter issued.
201408059	19/06/2014	EGTT : London (FIR)	Airway Q41		A	Other	PIPER	Reciprocating	1	Infringement of Airway Q41 by a PA32 at FL65. Standard separation maintained.	At 1003 PA32 checked in on frequency position ORIST FL65 heading 300deg. Multiple transmissions were made as the pilot was foreign with a strong accent and the R/T readability was not clear. A/c told to squawk 1177c and I advised the base of Q41 was FL35 several times and that a/c would need to descend to remain clear. I gave the Portland pressure and the pilot reported descending to ALT 3500'. I then called S21 planner and advised the a/c was infringing Q41 and descending. I could not establish where the a/c would coast in but by reference to the FID it appeared that the a/c was heading toward the Portland DA's which were active. I called Plymouth Mil and requested a transit, this was approved at ALT 3500'. Traffic levels at the time were very busy.☐ CAA Closure:☐ Pilot misinterpreted his map, resulting in Airway infringement. Pilot apologised, lesson learnt. French DGAC advised.
201408063	20/06/2014	EGTT : London (FIR)	TRIPO	E	A	TMA	BEECH	Reciprocating	1	Infringement of the LTMA (Class A) by a BE35 at 6000ft. Standard separation maintained.	TC East called and asked whether we would work an aircraft into EGLG. As this airport is not in the Thames area of responsibility, we elected not to work it. No further coordination was offered. EGMC asked for release on a CLN departure which was granted. Once the CLN departure was airborne we had to remain 5 miles away from an infringing aircraft working the London FIR. I phoned the London FIR and got the details of the infringing plane. The aeroplane's destination was EGLG.☐ Supplementary 20/06/14: ☐ Terminal Control passed an estimate to FIS for point XAMAN Est 0658z, initially IFR at FL100, but revised that to FL60 and confirmed that he would be outside CAS . A/c a BE35 from EDVY to EGLG German pilot but with good English. A/c called at point LOGAN at 0702z FL60, but due to traffic workload FIS did not obtain 2-way for a couple of minutes, at which time, A/c squawked 1177 and was told to remain outside CAS, but was already approaching point JACKO at FL60 where the base is 5,500ft. A/c responded by saying he was descending to 5,000ft, on the London QNH. Thames Radar called to say that a/c had infringed CAS but a/c was already descending.

201408070	20/06/2014	EGTT : London (FIR)	Henley	NW	A	TMA	EVEKTOR AEROTECHNIK	Reciprocating	1	Infringement of the LTMA (Class A) by an EV97 at 3800ft. Standard separation maintained.	Working on NW bandboxed. B737 on a GW CPT departure maintaining 5A and unable to climb due LL traffic. Noticed an infringer EV97 NW HEN by 3nm indicating between 3.6A and 3.8A, at which point I turned the B737 onto a heading of 195 in order to make sure the blips would not merge and when able climbed the B737 to 6A.
201408075	20/06/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted		D	CTR	GROB	Reciprocating	1	Infringement of the Stansted CTR/CTA (Class D) by a G115 at 2200/2800ft. Standard separation maintained.	7000 clipped the corner of the SS CTR at 2200, turned to the Northwest and then climbed too soon to 2800 where the base was 2500. He was seen landing at Wytton at 1055Z. I did two blind transmissions and got no reply. I did turn a CPT dept early to pass well behind the unknown and also vectored a GW inbound behind it. Separation was not lost and I did not deem any of my aircraft to be in unsafe proximity to the unknown.
201408075	20/06/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted		D	CTA	GROB	Reciprocating	1	Infringement of the Stansted CTR/CTA (Class D) by a G115 at 2200/2800ft. Standard separation maintained.	7000 clipped the corner of the SS CTR at 2200, turned to the Northwest and then climbed too soon to 2800 where the base was 2500. He was seen landing at Wytton at 1055Z. I did two blind transmissions and got no reply. I did turn a CPT dept early to pass well behind the unknown and also vectored a GW inbound behind it. Separation was not lost and I did not deem any of my aircraft to be in unsafe proximity to the unknown.
201408105	20/06/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	12 SW	D	CTA	VANS	Reciprocating	1	Infringement of the Stansted CTA (Class D) by a Vans RV6 at 2400ft. Standard separation maintained.	7000 entered the SS CTA to the southwest 2400 and tracked SE for about 5nm in our airspace. I had an aircraft on base leg which I did not deem to be in unsafe proximity and the safest course of action was to continue for the ILS.
201408125	20/06/2014	EGTT : London (FIR)	Gt Dunmow		D	CTR	AVIONS ROBIN	Reciprocating	1	Infringement of the Stansted CTR (Class D) by a DR400.	At approx 1725, a primary infringer was seen to enter the EGSS CTR in the vicinity of Gt Dunmow, tracking NW'bound. Runway in use at Stansted had just changed to R/W22, and the infringement was tracking directly towards inbounds. An a/c was broken off the approach and several other aircraft delayed from making an approach. EGSS tower were informed of the infringement, as traffic under their control was on short final. It was decided that this traffic was to land, as it was ahead of the infringer. The infringement was seen to skirt around Gt Dunmow and fly towards Andrewsfield where it appeared to join the circuit and land on the SW'ly runway, although radar cover at this time was patchy. We contacted Andrewsfield, however no operational staff were available, and nobody there was able to supply an ident to the landed traffic. The infringer disappeared at approx 1730. Subsequently (at 1740) the pilot of the a/c phoned TC and admitted to having infringed the EGSS zone after having flown further West than he had intended. The a/c was a DR400 and landed at Andrewsfield.

201408146	21/06/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	12 E	A	TMA	PIPER	Reciprocating	1	Infringement by a PA28 of the LTMA (Class A) 12nm E of Luton at 2900ft. Separation lost with Falcon 2000 inbound to Luton. Traffic info and avoiding action given.	At approx 1313, 5021 squawk is observed at 2800' inside CAS in confliction with a Falcon 2000. Avoiding action was passed to the Falcon 2000. 5021 was then observed as 7000 squawk at 2900', activating CAIT. EGLF LARS were called, who advised that they had transferred frequency on 5021 approx 10-15 seconds before the infringement. They gave the details as a PA-28, EGSF-EGLG. During the incident I was working as OJTI with trainee in control. Trainee controllers first instinct was to call EGLF regarding the 5021. I instructed trainee to issue avoiding action first. Trainee issued the avoiding action, initially as a left turn and then corrected to a right 360deg heading. This avoiding action was read back as the telephone was being answered by EGLF. EGLF then advised they were no longer in contact with 5021. These points were discussed during the training session debrief. By the end of the telephone call, 7000 squawk had descended below CAS and the Falcon was given a new heading to establish LLZ R/W26. Falcon advised that they had the traffic on TCAS. CAIT was observed NOT TO ACTIVATE whilst the infringing aircraft was wearing 5021 squawk inside CAS at 2800'. It was only spotted during a routine radar scan by the trainee controller which enabled early action to be taken.☐ CAA Closure:☐ An aircraft squawking 5021 infringed controlled airspace. CAIT did not appear to activate correctly. However, the engineering investigation stated that CAIT responded as designed. CAIT activated at 1312:15 but the aircraft had descended below controlled airspace at 1312:18 so the CAIT alert was only active for one sweep.
201408146	21/06/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	12 E	A	TMA	DASSAULT	Turbofan	2	Infringement by a PA28 of the LTMA (Class A) 12nm E of Luton at 2900ft. Separation lost with Falcon 2000 inbound to Luton. Traffic info and avoiding action given.	At approx 1313, 5021 squawk is observed at 2800' inside CAS in confliction with a Falcon 2000. Avoiding action was passed to the Falcon 2000. 5021 was then observed as 7000 squawk at 2900', activating CAIT. EGLF LARS were called, who advised that they had transferred frequency on 5021 approx 10-15 seconds before the infringement. They gave the details as a PA-28, EGSF-EGLG. During the incident I was working as OJTI with trainee in control. Trainee controllers first instinct was to call EGLF regarding the 5021. I instructed trainee to issue avoiding action first. Trainee issued the avoiding action, initially as a left turn and then corrected to a right 360deg heading. This avoiding action was read back as the telephone was being answered by EGLF. EGLF then advised they were no longer in contact with 5021. These points were discussed during the training session debrief. By the end of the telephone call, 7000 squawk had descended below CAS and the Falcon was given a new heading to establish LLZ R/W26. Falcon advised that they had the traffic on TCAS. CAIT was observed NOT TO ACTIVATE whilst the infringing aircraft was wearing 5021 squawk inside CAS at 2800'. It was only spotted during a routine radar scan by the trainee controller which enabled early action to be taken.☐ CAA Closure:☐ An aircraft squawking 5021 infringed controlled airspace. CAIT did not appear to activate correctly. However, the engineering investigation stated that CAIT responded as designed. CAIT activated at 1312:15 but the aircraft had descended below controlled airspace at 1312:18 so the CAIT alert was only active for one sweep.
201408153	21/06/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	18 NE	D	CTA	OTHER	Reciprocating	1	Infringement of the Manchester CTA (Class D) by a Skyranger Swift. Standard separation maintained.	At approximately 1402 AIW alerted me to a 7000 squawk on a bearing of 050deg at 18nm from Manchester. Unverified Mode C indicated 3300 ft QNH and Mode S showed a/c to be a Skyranger. A/c tracked towards Manchester for 2 -3 miles and then turned onto a reciprocal track and descend to leave CAS.☐ Supplementary 02/07/14:☐ My plan was leave EGNM control and call EGCC. Due to the short time I was to spend in area I did not. Very bad mistake on my part. I did look at the map to check heights but I saw what I wanted to see 3500ft but not 3000 to 3500 Class D. Bad mistake No 2 on my part. I had made plan, had all the relevant frequencies to hand but did not stick to it. Bad overall. Cause of incident me. My apologies.
201408174	22/06/2014	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	11nm W	A	CTR	PIPER	Reciprocating	1	Infringement of the Heathrow CTR (Class A) by a PA28 squawking 0451, indicating 1900ft. CAIT activated. Separation lost.	I was in position as FIN. A319 was on a closing heading of 065 for 09L at 4A at around 12 miles when squawk 0451 appeared as a CAIT just south of White Waltham indicating 1.9A tracking east. I did not turn the A319 at this point as the aircraft were diverging. Just before A319 was due to establish SVFR informed me that the 0451 was speaking to Farnborough, was at 2A and was turning south, descending to 1.5A. As this was the case A319 established on 09L and I descended him to 3A, following the LOC. When three miles was between A319 and 0451 I cleared the A319 to 2A and further on the ILS.☐ Supplementary 27/06/14:☐ I was working as the LARS W controller. Traffic levels at the time of the infringement were light, but had been medium to heavy for the previous 1hr30mins. A PA28, routing LD-TF via Henley at 1.5a was transferred to me by LARS N at 1503. I issued it with a 0451 squawk, passed the QNH and advised it was a BS. At approximately 1510 I was alerted by AIW that 0451 was infringing the LL Zone. I looked for the a/c which was garbling with LM traffic and LL final approach traffic. It was at 2a tracking SE. I instructed the PA28 to turn West and vacate the zone as this was the quickest route whilst my colleague answered the phone from LL and relayed information. At LL request, I descended the PA28 to 1.5a and instructed the pilot to track SW ensuring the pilot was VMC and able to maintain their own terrain clearance. When the PA28 had cleared the zone I continued to give navigational assistance until the pilot was happy with his position.
201408174	22/06/2014	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	11nm W	A	CTR	AIRBUS	Turbofan	2	Infringement of the Heathrow CTR (Class A) by a PA28 squawking 0451, indicating 1900ft. CAIT activated. Separation lost.	I was in position as FIN. A319 was on a closing heading of 065 for 09L at 4A at around 12 miles when squawk 0451 appeared as a CAIT just south of White Waltham indicating 1.9A tracking east. I did not turn the A319 at this point as the aircraft were diverging. Just before A319 was due to establish SVFR informed me that the 0451 was speaking to Farnborough, was at 2A and was turning south, descending to 1.5A. As this was the case A319 established on 09L and I descended him to 3A, following the LOC. When three miles was between A319 and 0451 I cleared the A319 to 2A and further on the ILS.☐ Supplementary 27/06/14:☐ I was working as the LARS W controller. Traffic levels at the time of the infringement were light, but had been medium to heavy for the previous 1hr30mins. A PA28, routing LD-TF via Henley at 1.5a was transferred to me by LARS N at 1503. I issued it with a 0451 squawk, passed the QNH and advised it was a BS. At approximately 1510 I was alerted by AIW that 0451 was infringing the LL Zone. I looked for the a/c which was garbling with LM traffic and LL final approach traffic. It was at 2a tracking SE. I instructed the PA28 to turn West and vacate the zone as this was the quickest route whilst my colleague answered the phone from LL and relayed information. At LL request, I descended the PA28 to 1.5a and instructed the pilot to track SW ensuring the pilot was VMC and able to maintain their own terrain clearance. When the PA28 had cleared the zone I continued to give navigational assistance until the pilot was happy with his position.

201408180	22/06/2014	EGTT : London (FIR)	EXMOR	W	A	RVSM	CIRRUS	Reciprocating	1	Infringement of Airway N864 (Class A) by an SR22 at FL70. Traffic info given. Standard separation maintained.	London FIR squawk observed close to the western of N864, approximately abeam EXMOR, at FL70 with FL75 showing on Mode S. Telephone call made to London FIR to instruct the a/c to turn to the South or SW immediately to remain outside CAS. London FIR advised they would transfer the a/c to my frequency as they cannot issue turn instructions to a/c. The a/c did not call and continued on a south easterly track through N864 at FL75. The squawk was then seen to change to 0426 (Exeter Radar) heading towards Dunkeswell paradrop zone which was active with a Beech 99 climbing to FL150. Traffic info was passed to the Beech 99. Exeter were contacted to request the 0426 squawk be kept clear of the drop zone. The controller stated that the a/c had called them unexpectedly and they knew nothing about it at that time. The SR22 then called on my frequency and it was established that this was the infringing a/c, an SR22 routing EGFE to LFRC. It was ascertained the flight was being conducted under VFR. The pilot was advised they had infringed CAS and that a report would be filed. The pilot was instructed to make contact as soon as they land. The pilot was then told to remain outside CAS and to call en route to the their next agency. Safety was not compromised and there was no loss of separation between the SR22 and the Beech 99. The pilot has contacted the unit and advised that they had climbed from FL55 to FL75 to remain clear of cloud.☐ Supplementary 08/10/14:☐ This infringement was caused by the pilot of the SR22 climbing to remain clear of cloud and inadvertently infringing Class A airspace (N864).
201408181	22/06/2014	EGTT : London (FIR)	EGNM (LBA): LEEDS BRADFORD	15nm SE	D	CTA	EVEKTOR AEROTECHNIK	Reciprocating	1	Infringement of the Leeds Bradford CTA (Class D) by an unknown aircraft squawking 6170, indicating 3500ft. Aircraft identified as an EV97. Standard separation maintained.	Aircraft observed entering Leeds CTA approx. 15nm SE of Leeds Bradford, squawking 6170 (Doncaster listening out), at 3500' indicated. I phone Doncaster Radar who said they hadn't worked it and it wasn't on their frequency when they called it. I then made a blind call, to which the pilot replied. I instructed the pilot to squawk 2676, and verified the Mode C. I informed the pilot he had been inside CAS for at least 4nm, to which he replied that he thought the base of CAS was FL85 (that is the upper limit of the CTA). No other traffic affected.☐ CAA Closure:☐ Pilot error, lack of situational awareness. Warning letter issued.
201408183	22/06/2014	EGTT : London (FIR)	EGTK (OXF): Oxford/Kidlington		G	ATZ	UNKNOWN	Reciprocating	1	Infringement of the Oxford ATZ (Class G) by an unknown high wing single engined a/c.	At 10:22 the subject aircraft was observed in the downwind position in the visual circuit for RW 19 indicating 1500ft (the circuit level). The aircraft continued along the downwind leg until NE of the aerodrome, the turned West, towards Blenheim Palace. From there the aircraft turned South and left the ATZ at 1900ft indicated Mode C. Blind transmissions were made on the Oxford published frequencies but to no response. The visual circuit was active throughout the occurrence and traffic info was passed. The aircraft was observed from the Tower and was a single engine high wing aircraft predominantly white with blue details.
201408237	19/06/2014	EGTT : London (FIR)	EGSD : Great Yarmouth/ North Denes	1 E	G	ATZ	PIPER	Reciprocating	1	Infringement of the North Denes ATZ (Class G) by an unidentified PA28.	
201408245	22/06/2014	EGTT : London (FIR)	EGLL (LHR): London/Heathrow		A	CTR	CESSNA	Reciprocating	1	Infringement of the Heathrow CTR (Class A) by a C210 with no Mode C, resulting in loss of separation with an inbound A320. CAIT activated. Traffic info and avoiding action given.	CAA Closure:☐ Pilot error-lack of situational awareness. Warning letter issued.

201408245	22/06/2014	EGTT : London (FIR)	EGLL (LHR): London/Heathrow		A	CTR	AIRBUS	Turbofan	2	Infringement of the Heathrow CTR (Class A) by a C210 with no Mode C, resulting in loss of separation with an inbound A320. CAIT activated. Traffic info and avoiding action given.	CAA Closure:☐ Pilot error-lack of situational awareness. Warning letter issued.
201408248	22/06/2014	EGTT : London (FIR)	EGLL (LHR): London/Heathrow		A	CTR	PIPER	Reciprocating	1	Infringement of the Heathrow CTR (Class A) by a PA28, resulting in loss of separation with an inbound A320. CAIT activated.	CAIT appeared on radar with callsign for a PA28. This a/c was outside the LFA heading North. A320 was on loc - I considered that it was better to leave the A320 on loc as it would pass well behind but separation technically lost. ☐ CAA Closure:☐ Pilot error-loss of situational awareness. A warning letter has been sent.
201408248	22/06/2014	EGTT : London (FIR)	EGLL (LHR): London/Heathrow		A	CTR	AIRBUS	Turbofan	2	Infringement of the Heathrow CTR (Class A) by a PA28, resulting in loss of separation with an inbound A320. CAIT activated.	CAIT appeared on radar with callsign for a PA28. This a/c was outside the LFA heading North. A320 was on loc - I considered that it was better to leave the A320 on loc as it would pass well behind but separation technically lost. ☐ CAA Closure:☐ Pilot error-loss of situational awareness. A warning letter has been sent.
201408272	22/06/2014	EGTT : London (FIR)	EGSC (CBG): Cambridge		G	ATZ	MAINAIR	Reciprocating	1	Mainair Blade microlight infringed Cambridge ATZ (Class G), landed on grass R/W05 and crossed main R/W23 without ATC clearance.	Whilst operating ADI & APP combined, I observed a micro light on a one mile final to runway 05. The micro light was not talking on either frequency and I started making blind transmissions. Shortly after the aircraft started making 'Zigzag' manoeuvres across the final approach, shortly after landing on runway 05 grass. The aircraft vacated the grass and begun crossing the main runway, with no clearance and before a 'follow-me' had arrived. The aircraft was then escorted to the parking area and shut down. Several aircraft were waiting to depart runway 23, but were held until the aircraft was under control and escort. The pilot advised ground staff that she was monitoring the micro light frequency, and at no time had tried to contact Cambridge ATC. The aircraft departed to a private site. Supplementary 16/01/15: Pilot sent a warning letter.
201408277	23/06/2014	EGTT : London (FIR)	EGNM (LBA): LEEDS BRADFORD	7nm SE	D	CTR	ROBINSON	Reciprocating	1	Infringement of the Leeds Bradford CTR (Class D) by an unknown aircraft squawking 7000. Infringer identified as an R44. Traffic info given.	R44 called getting airborne at 1338z requesting a Basic Service, intending to carry out a survey to the east of Leeds. I asked if the pilot required to enter CAS, he replied that he would be remaining outside CAS. I reinforced this by asking the pilot to report if he did wish to enter CAS, which he acknowledged. At 1342z, an a/c squawking 7000 was observed entering the Leeds CTR approximately 7nm SE of Leeds Bradford. I instructed R44 to squawk 2676, and passed traffic information to B737, which was establishing on the RWY 32 ILS, and said to expect avoiding action if I could not identify the infringer very soon. Shortly after, I identified the infringer as R44, passed traffic information on the B737, and cleared R44 to continue inside CAS. When R44 was informed that he had infringed CAS, he replied that he was 'only on the edge' (was approximately 1.5nm inside by this point). I asked the pilot to phone me when he landed to explain why I had nearly had to take avoiding action, but no call was received.☐ CAA Closure:☐ Over reliance on GPS. Pilot error. Failed on-line test. Interviewed. Retake PPL Air Law and Comms examinations.

201408277	23/06/2014	EGTT : London (FIR)	EGNM (LBA): LEEDS BRADFORD	7nm SE	D	CTR	BOEING	Turbofan	2	Infringement of the Leeds Bradford CTR (Class D) by an unknown aircraft squawking 7000. Infringer identified as an R44. Traffic info given.	R44 called getting airborne at 1338z requesting a Basic Service, intending to carry out a survey to the east of Leeds. I asked if the pilot required to enter CAS, he replied that he would be remaining outside CAS. I reinforced this by asking the pilot to report if he did wish to enter CAS, which he acknowledged. 201408343	24/06/2014	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS		D	CTR	BOLKOW	Reciprocating	1	Infringement of the East Midlands CTR (Class D) by a Bo209. Standard separation maintained.	An airliner was in the process of being turned onto the ILS R/W27 from the South when a contact was seen approaching the northern edge of EGNX CTR. Contact was on 4572 listening out squawk. Airliner was turned off the approach onto heading 060 while a blind broadcast was made to the unknown aircraft. The unknown aircraft responded as a Bo209 and was told to leave the zone on a northerley track which was complied with immediately. The pilot of the aircraft was very apologetic and realised his mistake quickly and subsequently phoned EGNX ATC to explain and apologise again. Airliner was vectored round back onto the ILS from the North and with minimal delay. Airliner had been weather avoiding to the South of the approach but conditions at the airfield were good, vis 10km, cloud sct 3800ft, QNH 1019.
201408394	24/06/2014	EGTT : London (FIR)	EG D201	Aberporth	G	Danger area	JODEL	Reciprocating	1	Infringement of active Danger Area EG D201 (Aberporth) by an unknown aircraft squawking 7000. Aircraft identified as a Jodel DR100. Live firing suspended until Jodel DR100 vacated the area. Traffic info given.	Whilst plugged in at the RAC 1 position I was made aware of a 7000 squawk (no Mode C) by the Radar 1 controller at approximately 1350z. It was 5 miles NE of Pembrey and tracking northerly towards the D201/D202 complex. At the time I was working a military helicopter in D201. The aircraft continued to track North whilst the radar 1 controller made blind transmissions on 119.650 and attempted tracing action. It became apparent that the aircraft was going to avoid D201 but without Mode C information we could not determine whether it would be outside of D202A/B. The Radar 1 controller informed the Watch keeper UAV RPASp (that was operating in the D202 corridor) of the aircraft and ensured that the UAV was positioned safely to achieve deconfliction minima. I informed the TCO that we may call a 'STOP STOP STOP' shortly unless the aircraft altered its track. The sponsor was informed who immediately told the air crew. At approximately 1402z the aircraft infringed D201 in the area of Newquay, tracking North. Prior to its infringement I called STOP and ensured switches were safe. I informed the air crew of the reason for the stop and passed traffic info on the infringer. At 1405z the aircraft left D201 4nm N of Llanon. I obtained clearance from the range to continue and then completed the sortie without incident. The Radar 1 controller traced the aircraft and requested that the pilot call us so we could discuss the incident. The pilot duly contacted us and informed us that he was routing VFR at various levels, but typically 2.5A. The pilot was aware of the danger area but believed he had remained clear. I explained the impact on the trial and the risk he exposed himself and the trials participant to. I passed him our DACS/DAAIS frequency and he explained that he would contact us when
201408404	25/06/2014	EGTT : London (FIR)	Syerston		G	ATZ	UNKNOWN	Reciprocating	1	Alleged infringement of the Syerston ATZ (Class G) by an autogyro.	An aircraft (possible autogyro) was seen possibly transiting through the ATZ. The a/c was spotted over the Western end of the airfield heading NW. At this point several radio calls were made but received no reply. Waddington Zone were contacted he stated that the aircraft was squawking 7000 but displaying a height of 900 ft. The QFE at the time was 1010 and therefore once the height above airfield is calculated (1013.25 - 1010 hPa = 3.25 hPa x 27 feet = 88 ft; therefore 900-88 = 812 ft AGL). Waddington LARS stated the the a/c was seen to descend 4 miles to the NW of Syerston. There is a microlight site called Oxtan in that area, however, attempts to find a contact number were unsuccessful. There were no aircraft in the circuit at the time, but a motor glider crew were preparing to "crew in" for a departure.
201408404	25/06/2014	EGTT : London (FIR)	Syerston		G	ATZ	OTHER	Unknown		Alleged infringement of the Syerston ATZ (Class G) by an autogyro.	An aircraft (possible autogyro) was seen possibly transiting through the ATZ. The a/c was spotted over the Western end of the airfield heading NW. At this point several radio calls were made but received no reply. Waddington Zone were contacted he stated that the aircraft was squawking 7000 but displaying a height of 900 ft. The QFE at the time was 1010 and therefore once the height above airfield is calculated (1013.25 - 1010 hPa = 3.25 hPa x 27 feet = 88 ft; therefore 900-88 = 812 ft AGL). Waddington LARS stated the the a/c was seen to descend 4 miles to the NW of Syerston. There is a microlight site called Oxtan in that area, however, attempts to find a contact number were unsuccessful. There were no aircraft in the circuit at the time, but a motor glider crew were preparing to "crew in" for a departure.

201408461	20/06/2014	EGTT : London (FIR)	EG D017	Portland	G	Danger area	NORTH AMERICAN	Reciprocating	1	Infringement of active Danger Area EG D017 (Portland) by an unknown aircraft squawking 7000. Aircraft identified as a Navion.	At approx 0920 a 7000 squawk was observed in D017 transiting South - South East. After a short period of time the squawk changed to a Lon Info squawk; after subsequent liaison with Lon Info we were able to determine the callsign of the aircraft, a Navion and determine its routing. There was no hazardous activity taken place in the areas through which he was transiting so a clearance to transit the remainder of the danger areas was passed as well as a request for the pilot to contact Plymouth Mil on landing to explain the correct procedures. There was live firing being conducted in the areas to the North of the aircraft but his direction of transit suggested that he had not passed through these areas.
201408542	27/06/2014	EGTT : London (FIR)	EGHH (BOH): Bournemouth/Hurn	9nm WSW	D	CTA	YAKOVLEV	Reciprocating	1	Infringement of the Bournemouth CTA (Class D) by an unknown aircraft indicating 3000ft. Aircraft identified as a Yak52. Traffic info given. Standard separation maintained.	I was on duty as the Bournemouth radar and LARS controller. At 1536 a primary and secondary contact was observed about to infringe a section of the Solent CTA delegated to Bournemouth, SSR code 1200 and indicated altitude 3000ft. A number of blind calls were made on 119.475 without success, and the unknown contact then entered CAS. A departing B737 was held on the runway and traffic information was given. At approximately 1540 Yak52 called Bournemouth Tower on 125.6 and was instructed to call Bournemouth Radar. On contact, Yak52 was asked to squawk 7355 and was identified as the infringing aircraft which had just left controlled airspace by this time. A BS was given, and the pilot was advised of his infringement and information of further CAS ahead, both of which the pilot seemed unaware. The departing B737 was delayed by around 5 minutes. CAA Closure: Portuguese Authority written to (Portuguese pilot), but no response forthcoming. Closed due to elapsed time.
201408545	24/06/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	TMZ 2	G	Other	CHAMPION	Reciprocating	1	Infringement of the Stansted TMZ 2 (Class G) by a Champion 8KCAB.	An aircraft squawking 7010 with no mode C infringed Stansted TMZ 2 and caused a B737 to be delayed. The infringer went on to do circuits at North Weald, whom I called to ascertain the aircraft's details.
201408548	28/06/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	3 SE	D	CTR	OTHER	Reciprocating	1	Infringement of the Southampton CTR (Class D) by an Ikarus C42. Separation lost with outbound traffic. Avoiding action and traffic info given.	A primary contact was observed inside the Southampton CTR tracking NW. Avoiding action was given to both and in and outbound to Southampton. Several blind calls were made with no response. The contact turned East to leave CAS, the re-entered at the BWFA. The a/c was tracked and landed in the BWFA. The pilot was a victim of a heavy rain shower and other aircraft nearby. It was an unfortunate mistake and ATC having spoken to the pilot as soon as he realised his mistake, he rectified the problem by leaving the airspace as quickly as possible. Supplementary 11/07/14: The aircraft entered the Southampton Control Zone, whilst avoiding weather (rain shower) en route to a private airstrip inside the CTR, in accordance with the locally agreed procedures. The pilot has apologised for the incident, stress to the controller and has agreed to receive re-training and familiarisation from the operator of the strip to ensure compliance with the agreed procedures. Although a loss of separation occurred the Solent Controller acted promptly and correctly by providing 'avoiding action' to two aircraft in the correct order of priority to ensure that there was minimal risk and ensuring the lateral separation increased. The Solent Radar Controller was also pro-active in providing 'blind transmissions' as soon as it became apparent there was an unknown aircraft inside the CTR.
201408548	28/06/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	3 SE	D	CTR	BRITTEN NORMAN	Reciprocating	3	Infringement of the Southampton CTR (Class D) by an Ikarus C42. Separation lost with outbound traffic. Avoiding action and traffic info given.	A primary contact was observed inside the Southampton CTR tracking NW. Avoiding action was given to both and in and outbound to Southampton. Several blind calls were made with no response. The contact turned East to leave CAS, the re-entered at the BWFA. The a/c was tracked and landed in the BWFA. The pilot was a victim of a heavy rain shower and other aircraft nearby. It was an unfortunate mistake and ATC having spoken to the pilot as soon as he realised his mistake, he rectified the problem by leaving the airspace as quickly as possible. Supplementary 11/07/14: The aircraft entered the Southampton Control Zone, whilst avoiding weather (rain shower) en route to a private airstrip inside the CTR, in accordance with the locally agreed procedures. The pilot has apologised for the incident, stress to the controller and has agreed to receive re-training and familiarisation from the operator of the strip to ensure compliance with the agreed procedures. Although a loss of separation occurred the Solent Controller acted promptly and correctly by providing 'avoiding action' to two aircraft in the correct order of priority to ensure that there was minimal risk and ensuring the lateral separation increased. The Solent Radar Controller was also pro-active in providing 'blind transmissions' as soon as it became apparent there was an unknown aircraft inside the CTR.

201408549	25/06/2014	EGTT : London (FIR)	EGBB (BHX): Birmingham	S	D	CTA	CESSNA	Reciprocating	1	Infringement of the Birmingham CTA (Class D) by a C172 at 4700ft. Traffic info given. Standard separation maintained.	I was in position as the RADAR controller when I observed an FIS squawk in the vicinity of Wellesbourne Mountford indicating altitude 3000'. I had an inbound aircraft downwind left for 33 at the time, and advised the inbound that the FIS squawk was outside CAS. After turning the inbound for the RNAV procedure, the FIS squawk began to climb, reaching as high as 4800' - although no separation was lost. I phoned London FIS who gave me the aircraft's details. I asked for the C172 to call me to validate and verify his level. He confirmed he was level at 4700' on my QNH 1019 (indicating 4800' on Mode C) and apologised for infringing CAS. C172 was inside CAS for approximately 3 minutes (0800 - 0803z). I passed on the Watch Manager's number and asked the pilot to call in order to complete the necessary paperwork involved.
201408644	30/06/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	3nm NE	D	CTA	PIPER	Reciprocating	1	Possible infringement of the Gatwick CTA (Class D) by an unknown aircraft at 1600ft. Aircraft identified as a PA28. Standard separation maintained.	A/C got airborne on a SAM departure, I climbed it to 4000ft. As it was turning an infringer popped up at 1600ft, the departing A/C passed about a mile down the west hand side of it.
201408644	30/06/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	3nm NE	D	CTA	AIRBUS	Turbofan	2	Possible infringement of the Gatwick CTA (Class D) by an unknown aircraft at 1600ft. Aircraft identified as a PA28. Standard separation maintained.	A/C got airborne on a SAM departure, I climbed it to 4000ft. As it was turning an infringer popped up at 1600ft, the departing A/C passed about a mile down the west hand side of it.
201408654	28/06/2014	EGTT : London (FIR)	EGLS : Old sarum		G	ATZ	ROBINSON	Reciprocating	1	Infringement of the Old Sarum ATZ (Class G) by a R44 at approx 500ft.	On Saturday 28/06/2014 I was manning the A/G radio at Old Sarum airfield. Also present in the tower was the airfield manager. At approximately 10:30z we heard a pilot, using a callsign xxx report on the Boscombe Down frequency of 126.700, (which we monitor for situational awareness and advanced notice of inbound aircraft), that he was an, "R 44 from Denham routeing along the Low Level Route south of Boscombe Down". There was no reply. At 10:38z, the airfield manager and I observed a blue and silver R 44 helicopter travelling East to West through Old Sarum ATZ and travelling in effect the wrong way along the downwind leg of the circuit in use. The aircraft passed about 1/2 a mile to the North of Old Sarum at an estimated height of 500ft apparently tracking the Low Level Route. Apart from the initial call mentioned above, no further transmissions were heard from the helicopter on 126.700 and there was no call to Old Sarum Radio on 123.200. On Sunday 29/06/2014, I was again manning the A/G radio at Old Sarum. The runway in use was 06 with a left hand circuit. About 17:25z I observed an R 44 helicopter similar in colour to the previous aircraft, travelling West to East about 1/2 a mile North of the airfield at an estimated height of 500 ft and against the direction of the downwind leg of the circuit. On this occasion no transmissions from the traffic were heard on either 123.00 or 126.700. The Low Level Route runs approximately parallel to the Old Sarum runway North of Old Sarum by about 1/2 to 3/4 NM cutting the ATZ in half. On Weekdays it is mainly used by military helicopters and some civil aircraft approved by Boscombe Down ATC. To facilitate this, a letter of agreement exists between Old Sarum and Boscombe Down whereby, when the Boscombe Down MATZ is
201408722	01/07/2014	EGTT : London (FIR)	EGLC (LCY): London city	6 E	D	CTA	CESSNA	Reciprocating	1	Infringement of the London City CTA (Class D) by a C172 at 2000ft. Traffic info given. Standard separation maintained.	CAIT was seen on C172 infringing the City CTA.Tower was called. A318 had already been cleared for take off rwy 09. Southend was then called to have the a/c descend back out of CAS.

201408732	01/07/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	6 E	D	CTR	CESSNA	Reciprocating	1	Infringement of the Luton CTR (Class D) by a C152.	At 17.28z an aircraft squawking 7000 (no Mode C) infringed the GW CTR 6nm SE of GW. R/W08 was in use at GW so I put a 'check all' on departures. The VCR controller visually acquired the aircraft. The aircraft left CAS but re-entered at 1731 so departures were stopped. An Airbus was on the runway awaiting departure on a CPT SID. The aircraft left CAS again, but re-entered at 17.33. I contacted EGLG to see if they had an aircraft in the local area. They broadcast on 120.250, but no aircraft responded. As the aircraft was orbiting inside CAS it appeared that it might be lost, so D&D were informed. Luton tower controller could see the aircraft visually and an identification of the radar return was given to confirm identification on their ATM. Coordination was effected so that the Airbus could depart with a left turn out, with the tower controller applying reduced separation, as he had both aircraft in sight. 5nm lateral separation was maintained at all times. 17.46 the aircraft left CAS and tracked to the East of Stevenage northbound. Freeflow was given to GW departures.☐ Supplementary 14/07/14:☐ The comprehensive report on this incident from the pilot concerned concluded that it was was poor judgement on his part to continue with the flight as planned with the wrong mind-set and without any form of GPS on board and inadequate airmanship to not make use of the many services available to avoid such an incident. He is more than willing to undertake further training to make sure such infringements are not caused by him again.
201408767	02/07/2014	EGTT : London (FIR)	SAM	Bearing 200 Range 8nm	D	CTR	OTHER	Reciprocating	1	Infringement of the Southampton CTR (Class D) by a Microlight.	Primary contact observed approaching southern zone boundary in the vicinity of Beaulieu. Several blind transmissions made. Contact entered CTR at 0919 and followed a track just inside the CTR boundary by approx 1 NM before leaving the zone in the vicinity of Calshot at 0922. Telephone conversation with EGHF indicated likely aircraft. ☐ Supplementary 02/07/14:☐ Pilot had approached Beaulieu VRP from the NW @ 1900ft on QNH of 1023 and then turned onto a heading of 90°m for Lee-on-Solent. During the run in to Lee had drifted North in the prevailing wind and possibly climbed in the buoyant air, into Southampton' CTR.
201408774	02/07/2014	EGTT : London (FIR)	VATRY	16.5nm South	G	Danger area	MORANE SAULNIER	Reciprocating	1	Infringement of active Danger Area D201A (Class G) by a Rallye 110 squawking 2615 at 3000ft.	During the handover where I was taking over Radar 1 a discussion ensued as to a return squawking 2615 routing towards the FIR boundary from the West. I took over the position and the outgoing ATCO contacted both Dublin and Shannon and it was established that the aircraft was a Rallye 110. Blind calls to the aircraft were not answered and I communicated with London Information to see if they were two way. The aircraft entered D201A at 1007z. 16.5nms south of VATRY. Eventually the aircraft made two way communication with London FIR and they transferred the aircraft to 119.650. On contact I identified the aircraft which confirmed it was the track inside D201A. A Basic Service was offered and the pilot asked to call the unit on landing. He was obviously having communications difficulties and left my frequency to talk to EGFE Haverfordwest without having cleared the frequency which increased my workload whilst I tracked the aircraft down. On landing at Swansea the pilot called and he was debriefed. He thought he was clear of the Danger Areas - Dublin had warned him they were active! He failed to maintain two way communication in the middle of the Irish Sea with any agency and also stated his GPS was faulty. I reminded him of the Aberporth frequency and the importance of contacting us but also stressed that if in difficulty to contact D&D on 121.5 who would be able to offer assistance in such a circumstance. The pilot has been sent the infringement questionnaire for completion.
201408785	02/07/2014	EGTT : London (FIR)	DET	1nm NW	A	TMA	CESSNA	Reciprocating	1	Infringement of the LTMA (Class A) by an unknown aircraft squawking 7000, indicating 2900ft, resulting in loss of separation with a C560. Aircraft identified as a C150. Traffic info and avoiding action given.	An aircraft - later identified as C150 - infringed controlled airspace between DET and Rochester airfield. It was tracking NW bound indicating 3A on a squawk of 7000. I gave avoiding action on an London City inbound - C560 who was on a radar heading of 350 degrees at 4A to the SW of the infringer. I turned the C560 left onto 290 degrees and passed traffic information on the - then unknown - aircraft. The C560 pilot reported he had the aircraft on TCAS. I phoned TMA SE and gave an avoiding heading of 270 degrees on an Biggin Hill inbound - who was routing to DET towards the infringer. The unknown aircraft then started descending, eventually levelling at 2.5A, and the squawk changed to 1735 - a Farnborough LARS East squawk. I subsequently returned the C560 and Biggin Hill inbound to normal vectoring. Farnborough LARS were contacted and the details of the aircraft were obtained, and they verified his current altitude.☐ Supplementary 07/07/14:☐ I was in contact with London 124.600, which the frequency was very busy and had to wait in turn. I drifted on the wrong side of the London CTR near Rochester at 2700ft QNH 1023 (Shown on Radar 2900ft) as soon as I finally changed frequency to Farnborough East descended immediately down to 2300ft QNH 1023 (Shown on radar 2500). One side of CTR is 2500ft and to the west 3500ft closer to Detling. I contacted London City Airport to apologise for any disruption that I may have caused, I am happy that the controllers acted and made the situation a safe one.
201408785	02/07/2014	EGTT : London (FIR)	DET	1nm NW	A	TMA	CESSNA	Turbofan	2	Infringement of the LTMA (Class A) by an unknown aircraft squawking 7000, indicating 2900ft, resulting in loss of separation with a C560. 201408830	03/07/2014	EGTT : London (FIR)	Airway Q41		A	Other	PIPER	Reciprocating	1	Infringement of Airway Q41 by a PA28.	PA28 was transiting South to Jersey from Shobdon at 3000ft on the Portland pressure 1015 on a Basic Service, after being instructed to route East of D026 the aircraft took up a direct track South. During this part of the transit the aircraft climbed (without informing the controller) to indicate a Mode C indication of 037 which put the aircraft within Q41 (base level FL35); the aircraft was then instructed to descend to vacate controlled airspace (the altitude the pilot had actually climbed to was never confirmed although the Mode C was verified on the initial contact). There was airways traffic transiting Q41 in the opposite direction at FL45, this traffic only closed to within 15 nm before the PA28 vacated controlled airspace. Upon initial questioning the pilot was unaware of the airway stating it did not appear on his GPS, after a few seconds and further prompting of the routing and positioning of the airway the pilot was subsequently able to identify the airway on his GPS stating that he was sorry but was concerned about staying clear of D031. The pilot contacted me by phone once he had landed and stated that he had originally planned to transit through the Portland Danger Areas as they were not NOTAMd as active, he also confirmed that he had climbed above 3500ft. I re-briefed him on the activation timings of the Danger Areas and sent him the link to the Infringement Analysis Form for completion.
201408842	14/06/2014	EGTT : London (FIR)	Warwick	North of VRP	D	CTA	PIPER	Reciprocating	1	Infringement of the Birmingham CTA (Class D) by a PA32 squawking 7000 climbing to 2200ft. Separation lost. Traffic info and avoiding action given.	I was mentoring a trainee ATCO on Radar 1 when I noticed a 7000 squawk approaching the Warwick VRP (Jct 15 M40) area below CAS under the 3500ft stub. With the amount of VFR traffic about on a Saturday afternoon and maintaining vigilance, it was not immediately apparent that this aircraft would infringe. However as the aircraft Mode C increased to 1800ft South of Warwick I became concerned. Initially I thought this was going to remain outside on a sightseeing flight. As the trainee was vectoring the inbound B737 to the NDB/DME approach for R/W33 I highlighted this to her but the trainee indicated that she was aware of it. About this time the aircraft entered CAS and continued climb to 2200ft as indicated on the Radar display. I instructed the trainee to give avoiding action and turn the B737 to try and achieve the prescribed separation which she did immediately. Disruption was caused to the inbound B737 and an ATR42 inbound from MOSUN. The second aircraft had been given a heading which now took it towards the infringing aircraft. The ATSA was asked to telephone Wellesbourne regarding PA32 - the callsign displayed by the Mode S who confirmed he was on frequency. Wellesbourne were asked to transfer PA32 to Birmingham Radar immediately. The aircraft called, was identified and continued en-route VFR. Avoiding action was given to the B737 but was not necessary for the ATR42. I telephoned the pilot concerned and the contact details have been passed to the investigation team. The pilot of PA32 was very apologetic and offered an explanation. He concluded it was inattention combined with flying an aircraft he didn't regularly fly. He had also been briefed by Wellesbourne about the need to avoid a sensitive area around Hampton Lucy because of noise complaints. He was
201408842	14/06/2014	EGTT : London (FIR)	Warwick	North of VRP	D	CTA	BOEING	Turbofan	2	Infringement of the Birmingham CTA (Class D) by a PA32 squawking 7000 climbing to 2200ft. Separation lost. 201408897	04/07/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	Bearing 040 Range 14nm	D	CTA	AVIONS ROBIN	Reciprocating	1	Infringement of the Stansted CTA (Class D) by a DR400 squawking 7000 indicating 3000ft. Standard separation maintained.	Three A7000 squawks were observed approaching controlled airspace tracking northwest towards Wethersfield indicating 3000ft. As the first of these got closer to the airspace boundary, I tried blind calling the callsign shown on Mode-S but got no answer, I also tried calling the other callsigns in what appeared to be the group of D- registered aircraft, but also got no answer. There were three observed squawks, and there seemed to be a primary only second aircraft formatting with each transponding return. As the DR400 and its primary wingman entered controlled airspace, I advised the GS of the situation. He attempted to contact Duxford to see if they were in contact, while the SS FIN controller tried to contact Earls Colne. Earls Colne advised that they had been in contact, but had transferred themselves to Duxford. Both the GS & FIN were only able to get an answering machine response from Duxford. After a few minutes the aircraft & wingman turned north and left controlled airspace. No EGSS traffic was affected as there were no inbound aircraft at the time.
201408951	05/07/2014	EGTT : London (FIR)	SAM	9nm NNW	D	CTA	CESSNA	Reciprocating	1	Infringement of the Solent CTA (Class D) by an unknown aircraft squawking 0460, indicating 3000ft. Aircraft identified as a C172 under a Traffic Service from Farnborough. Standard separation maintained.	0460 squawk observed tracking NE towards NW CTA boundary in the vicinity of Chilbolton indicating 2800ft. Coordinator contacted Farnborough and reminded ATCO of requirement to remain outside CAS. Contact then appeared to turn left onto a more Northerly heading as it approached the airspace boundary and AIW alarm initiated although it was difficult to confirm whether the a/c had crossed the line. The a/c also continued a climb to 3400 ft. Subsequent communication with Farnborough gave details of A/C as C172 on a local flight. ☐ Supplementary 07/07/14:☐ I was working LARS West when C172 called requesting a Traffic Service. When I identified C172 he was SW of Chilbolton at 2800' I told him it was a reduced Traffic Service due to his range and altitude and advised him that there were a number of contacts in his area indicating 1000'. C172 tracked East bound towards the Southampton zone but I thought he was still clear of it as the fillet to the NW of the zone is not marked on our overhead displays and the altitude of the base is not marked on our radar video map. C172 continued East and I told him to turn North but thought we had remained outside of the main part of the Southampton zone. ☐ Supplementary 08/08/14:☐ The aircraft entered Solent Class D Control Area whilst on a navigational training flight whilst in receipt of a service from Farnborough Radar (West). Information from the report submitted by the Farnborough Radar controller has been made known to unit management
201409007	07/07/2014	EGTT : London (FIR)	SAM	Bearing 255 Range 10nm	D	CTA	AVIONS ROBIN	Reciprocating	1	Infringement of the Solent CTA (Class D) by HR200 squawking 7000 at 2400ft. Avoiding action given.	R/W20, Q1015. I was operating as Solent Radar at approximately 0838z when I noticed a 7000 squawk in the STX area tracking SE bound, climbing through Alt2.2A unverified. I put out a blind call, no reply and the radar ATSA phoned HH to see if they were working and initially they said not. The unknown then indicated Alt2.4A still tracking SE in the CTA sector with base Alt2A. AIW alarmed and after a further blind call with no reply I used tactical headings to keep arrivals North of the airfield. The coordinator took a call from Bournemouth saying they were now working the a/c, a student pilot who was lost, and that the aircraft was descending and turning away from us. The aircraft was subsequently observed at Alt 1.8A approximately 9SW SAM now southbound (I believe still on a 7000 squawk), so normal operations resumed. At approximately 0850z the radar ATSA asked HH for the a/c details, but were told they would call back. At 0858z the HH ATCO phoned Solent to advise the details a HR020, HH-HH, and that the pilot was extremely sorry and upset. He thought the base was Alt3A in that area.☐ Supplementary 10/07/14:☐ Pilot reported that he was using a Portland Regional Setting of 1001 as conveyed by Bournemouth when the aircraft left the zone at Tarrant Rushton, whereas it should have reverted to the Bournemouth (or Solent) QNH of 1015 when entering the corridor between the two zones - this was an error on his part. The aircraft was on the Bournemouth frequency as directed earlier to remain on it, with hindsight given how busy this area is the pilot should have changed to Solent frequency and talked to them. ☐

201409063	07/07/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	12 SW	D	CTR	PIPER	Reciprocating	1	Infringement of the Luton CTR (Class D) by a PA28 at 1800ft. Standard separation maintained.	PA28 activated CAIT at 1800ft whilst infringing the SW corner of EGGW zone, tracking NW. PA28 was identified using mode S.
201409126	08/07/2014	EGTT : London (FIR)	EGNY : Beverly (Linley Hill)		G	ATZ	THRUSTER	Reciprocating	1	UK AIRPROX 2014/105 - Thruster T600N and a military transport final approach R/W12 at Beverley Airfield.	This AIRPROX has been subject to a separate review by the United Kingdom AIRPROX Board (UKAB). AIRPROX Board (UKAB) information indicates that this AIRPROX was caused by the military pilot flying into conflict with the Thruster T600N.
201409126	08/07/2014	EGTT : London (FIR)	EGNY : Beverly (Linley Hill)		G	ATZ	OTHER	Turboprop	4	UK AIRPROX 2014/105 - Thruster T600N and a military transport final approach R/W12 at Beverley Airfield.	This AIRPROX has been subject to a separate review by the United Kingdom AIRPROX Board (UKAB). AIRPROX Board (UKAB) information indicates that this AIRPROX was caused by the military pilot flying into conflict with the Thruster T600N.
201409198	08/07/2014	EGTT : London (FIR)	EGTK (OXF): Oxford/Kidlington		G	ATZ	PIPER	Reciprocating	1	Infringement of the Oxford ATZ (Class G) by a PA28 at 1500ft. Traffic info given	Primary only return was observed to enter the ATC to the NW and fly directly overhead. The DSATCO was dispatched to the VCR and observed a P28A white upper red lower fly overhead circa 1500ft - the visual circuit altitude. Blind calls were made on 127.775, 125.325 (old App frequency) and the Twr frequency but to no reply. The aircraft was non squawking. The aircraft subsequently orbited at Oxford City and called Brize Radar who transferred the aircraft to Oxford Radar. The aircraft ID was subsequently confirmed from Wellesbourne and the aircraft reported to be transponder equipped but could not get the device to operate. The aircraft was placed under a Basic Service and returned to Wellesbourne.
201409289	04/07/2014	EGTT : London (FIR)	Not specified		G	Restricted area	JABIRU	Reciprocating	1	Infringement of the Stansted TMZ 1 (Class G) by a Microlight at 1300ft.	I was working as the SS INT controller and at time 1127 I observed a primary only contact enter the TMZ 1 to the west of Haverhill tracking south East. I made a transmission to see if anyone in that position was on frequency but got no reply. I gave delaying vectors to two B737s and a further B737 was subsequently delayed.. Aircraft called on the frequency. His position report identified the primary infringing contact to be him. He was non transponding. □ Supplementary 11/07/14:□ The investigation has revealed that the pilot did report onto frequency as 'negative transponder', requesting a basic service. The controller informed him that he was inside the zone without permission, to which the pilot responded he was under the 1500ft limit (1300ft on qnh 1007). It was pointed out to him that he still needed to call for approval for entry into the zone without a transponder.

201409289	04/07/2014	EGTT : London (FIR)	Not specified		G	Restricted area	BOEING	Turbofan	2	Infringement of the Stansted TMZ 1 (Class G) by a Microlight at 1300ft.	<p>I was working as the SS INT controller and at time 1127 I observed a primary only contact enter the TMZ 1 to the west of Haverhill tracking south East. I made a transmission to see if anyone in that position was on frequency but got no reply. I gave delaying vectors to two B737s and a further B737 was subsequently delayed.. Aircraft called on the frequency. His position report identified the primary infringing contact to be him. He was non transponding.</p> <p>☐</p> <p>Supplementary 11/07/14:☐</p> <p>The investigation has revealed that the pilot did report onto frequency as 'negative transponder', requesting a basic service. The controller informed him that he was inside the zone without permission, to which the pilot responded he was under the 1500ft limit (1300ft on qnh 1007). It was pointed out to him that he still needed to call for approval for entry into the zone without a transponder.</p>
201409291	03/07/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	7 NE	D	CTA	PIPER	Reciprocating	1	PA28 infringed the Gatwick CTA (Class D) at 1900ft. Standard separation maintained.	<p>Operating as Gatwick Director I observed a contact on radar entering Gatwick CAS North of Lingfield wearing a 7047 squawk at 1900'. The squawk then changed to 7000 before the contact turned to the NE to leave CAS descending to 1600'. There were no aircraft on the final approach. I rang tower and asked them to stop right turn out departures although there weren't any. I did reduce the speed of the No.1 aircraft but not below a reasonable speed for that range (220kts at 22 DME).☐</p> <p>CAA Closure:☐</p> <p>Pilot error. Poor airmanship. Warning letter issued.</p>
201409298	11/07/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	Bearing ENE Range 18nm	A	TMA	MOONEY	Reciprocating	1	Infringement of the London TMA (Class A) by a Mooney M20 squawking 7000 at 4000ft. Standard separation maintained.	<p>CAIT activated 4000 18nm ENE of EGSS. I did a blind TX and got no reply. Both myself and my final director had seen in previously on an FIR squawk. I was on the phone so my radar 2 called FIS and they said it was inbound to SC. He then called SC and got the details and asked for it to be transferred to 136.2. Aircraft called 136.2 was given a 7402 squawk and was informed he was inside controlled airspace, it appeared that he then started his own descent to leave CAS. I had an A320 inbound to ABBOT 5000 above but I turned him left just in case the unknown had climbed, I advised him of the reason and he seemed quite happy.</p>

201409298	11/07/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	Bearing ENE Range 18nm	A	TMA	AIRBUS	Turbofan	2	Infringement of the London TMA (Class A) by a Mooney M20 squawking 7000 at 4000ft. Standard separation maintained.	CAIT activated 4000 18nm ENE of EGSS. I did a blind TX and got no reply. Both myself and my final director had seen in previously on an FIR squawk. I was on the phone so my radar 2 called FIS and they said it was inbound to SC. He then called SC and got the details and asked for it to be transferred to 136.2. Aircraft called 136.2 was given a 7402 squawk and was informed he was inside controlled airspace, it appeared that he then started his own descent to leave CAS. I had an A320 inbound to ABBOT 5000 above but I turned him left just in case the unknown had climbed, I advised him of the reason and he seemed quite happy.
201409312	12/07/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	5 SE	D	CTR	OTHER	Reciprocating	1	Infringement by of the Luton CTR (Class D) by a microlight. Standard separation maintained.	A PA28 from EGMD to EGBE was a VFR transit from the SE to the NW via the 26 threshold not above 2400. As he entered the zone he advised me there was a microlight in his 3 o'clock and possibly in my airspace. I called tower and let them know what I was doing as they were expecting a military aircraft to turn in with the NDB procedure, I also shouted for the GS. There was a primary contact there tracking to the east, the traffic I had at the time was military aircraft doing an NDB approach. Luckily at this time was outbound with the procedure and so separation was not lost against the unknown. I advised the military aircraft I had to keep him away from the unknown so kept him on a heading to the east. There were two airliners behind that had to be extended due to the unknown microlight near EGLG. The unknown left controlled airspace and I let the military aircraft continue inbound. I tried to track the unknown but lost it east of my airspace. The military aircraft was at GW for training and not inbound to land.
201409337	12/07/2014	EGTT : London (FIR)	EGR 312		G	Other	CESSNA	Reciprocating	1	Infringement of Restricted Area EGR 312 by a C150 at 1300ft. Avoiding action given.	I was the radar ATCO at Blackpool. At 1234UTC, a C150, which was inbound was sent to the ADI frequency of 118x4 as it approached the VRP Inskip. The a/c was instructed by ADI to report overhead the Gasholders (at the end of the M55). I was vectoring other traffic for an IFR approach to R/W28 and observed a 0450 Squawk, believed to be the C150, taking up a southerly track from Inskip directly towards Warton and advised ADI of this. He asked C150 to confirm he was over the Gasholders and visual with Blackpool, which he did. The pilot was then instructed to return to the Radar frequency and instructed to squawk Ident. The ident correlated with the track now some 2.5 nms South of Inskip and 1.5nms North of Warton. He was instructed to turn immediately onto a northerly track and to maintain 2000', his height was requested. The readback was 1300', which placed the a/c inside of EGR312. On vacating EGR312, the a/c was given navigational assistance and subsequently handed to ADI and landed at intended destination.
201409406	14/07/2014	EGTT : London (FIR)	Solent CTA		D	CTA	PIPER	Reciprocating	1	Infringement of the Solent CTA (Class D) by a PA28 at 2300ft. Traffic info given. Standard separation maintained.	At 1620 a 2650 squawk was observed close to the NW edge of the Solent CTA indicating approx 2500ft, this shortly afterwards activated the AIW as the aircraft initially headed East before turning to the SW, descending to 2000ft and away from CAS. During this time my coordinator was obtaining details from Boscombe, who indicated it was a student and they were turning him away from the Solent CAS. I continued to monitor the contact closely and after approximately 1 minute the return made a turn to the East toward CAS again and climbed to 2300ft. My coordinator again rang Boscombe to instruct them to turn the aircraft away. During the infringement an airliner was inbound approaching PEPIS, I instructed the airliner to continue present heading to stop the turn towards the SAM from PEPIS, the pilot announced that they had started the turn and the heading was 185deg. As the infringing aircraft turned right into CAS I turned the airliner further left onto 160 deg to ensure there was no loss of separation. The infringing aircraft left CAS to the North and the minimum distance between the airliner and the infringer was approx 7.5nm and 4700ft.☐ Supplementary 14/08/14:☐ Solo student confused by an instruction from Boscombe decided to orbit which caused the infringement. Student was thoroughly debriefed and 2 dual flights close and through CAS.
201409469	11/07/2014	EGTT : London (FIR)	R002	Plymouth	G	Restricted area	AVIONS ROBIN	Reciprocating	1	Infringement of Restricted Area R002 (Plymouth) by a Robin HR200 at 1800ft.	Robin HR200 free called Plymouth Mil within R002 at 1800ft. Once vacated (on the most expeditious heading) I asked the pilot if he was aware of R002 at which point he assured me he was aware and that he was maintaining to the North according to his GPS. The pilot contacted me on landing explaining that he was an experienced pilot who had flown the route countless times and was aware of the avoid. He had replotted his track and agreed that he had entered R002 for which he was very sorry. He said that normally he would avoid R002 but was 'ducking in and out of cloud' which lead to the inadvertent penetration.

201409490	15/07/2014	EGTT : London (FIR)	EGSC (CBG): Cambridge		G	ATZ	CESSNA	Reciprocating	1	Infringement of the Cambridge ATZ (Class G) by a C152.	I was working handboxed on both Cambridge Tower 125.9 and Cambridge Approach 123.6. I observed an aircraft transponding 7000 approaching the Cambridge ATZ from the West indicating 1400ft on Mode C. I looked out of the tower window and saw a C152 which appeared to be in the ATZ. I made a blind call on both tower and approach frequencies which received no reply. I had work in progress on the runway so alerted the vehicle to the possibility of an aircraft inbound with an emergency. Essex Radar rang to request a level for an inbound aircraft and whilst on the phone they confirmed that the aircraft was in our ATZ and passed me the registration. The aircraft came onto the Cambridge Approach frequency and reported that he was inbound to Andrewsfield. He didn't seem to be aware that he had entered the ATZ without permission. Appropriate CAA action is to be taken as a result of this incident.
201409529	16/07/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	Middlewich	D	CTR	HUGHES	Reciprocating	1	Infringement of the Manchester CTR (Class D) by a Hughes 369 at 700ft. Traffic info given. Standard separation maintained.	At about 15:23 I was alerted by AIW warning of unknown traffic entering the control zone at Middlewich 700ft climbing squawking 7000. I passed traffic information to a VFR transit aircraft squawking 7360 who saw what he believed to be a microlight aircraft. Closest distance was 3nm between the two. Mode S interrogation gave the callsign of the unknown. Following a brief orbit near Middlewich the unknown left CAS and disappeared from radar near Crewe. Some five minutes later a Hughes 369 helicopter, called at Crewe for zone entry and was identified via mode A on 7350, when advised of the previous infringement the pilot stated that someone else was flying the aircraft at that time.
201409591	17/07/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted		G	Restricted area	HUNTING PERCIVAL	Turbofan	1	Infringement of the Stansted TMZ2 SW (Class G) by a Jet Provost squawking 7010.	Fairly fast-moving contact squawking 7010 with NMC observed tracking NNW'ly within the lateral limits of TMZ2. As contact approached the northern edge of the TMZ, squawk changed to 5023 now with a display of mode C. Farnborough LARS contacted, who gave details of the a/c as a Jet Provost. The transit with no mode C displayed was non-compliant with TMZ procedures. The use of transponder code of 7010 was non-compliant with its conditions of use, as the offending a/c was not operating in an aerodrome traffic pattern. Mode C was clearly serviceable on this a/c, and the requirement for a transponder check prior to entering transponder mandatory airspace would have prevented this incident from occurring. No Stansted traffic was adversely affected.
201409592	17/07/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted		D	CTR	VANS	Reciprocating	1	Infringement of the Stansted CTR (Class D) by a Vans RV9 at 1300ft. Standard separation maintained.	Contact squawking 7010 indicating 1300ft observed transiting the very southerly corner of the Stansted CTR on a SW'ly track. The contact was inside the zone by about a mile at most, and vacated the zone again very shortly afterwards. Contact was observed to join on a left base for North Weald. No Stansted traffic adversely affected. Mode S data gave a/c i/d. I am sure it was caused by the upper SE'ly wind being stronger than the pilot had allowed for, pushing his track inside CAS.
201409596	17/07/2014	EGTT : London (FIR)	EGBB (BHX): Birmingham	Bearing 295 Range 15nm	D	CTA	CESSNA	Reciprocating	1	Infringement of the Birmingham CTA (Class D) by a C172 squawking 7000 at 3000ft. Traffic info and avoiding action given. Separation lost.	I was the Radar Controller on duty when the AIW tool indicated penetration of Birmingham CAS CTA6 (base 3500ft) at 4000ft. Shortly afterwards the Mode C indicated the contact descending below CTA 6. The traffic levels were moderate with ATSOCAS an inbound from the South and one inbound from the North via CHASE. The Mode S on RDP did not give a callsign so I made a blind transmission. The a/c was squawking 7000 and unknown traffic. At this point I perceived that the a/c had turned South away from CAS and was aware of his position and the AIW may have been in response to a different QNH setting. However a little later the contact was observed SE bound entering Birmingham CTA 1 and 5 at 3000ft. With the inbound from the North approaching CHASE an avoiding action turn was given in an attempt to achieve the required minimum of 5miles and 5000ft. At this point I recognised that there was an a/c that had called but told to standby or perhaps I had not acknowledged it. The ATSA had actually written a strip for the callsign as I was busy at the time so did not have the details immediately in front of me. However I had a hunch that this might be the infringing traffic. I allocated a squawk and identified the a/c. The pilot admitted that he may have been inside CAS but was replanning to remain clear. His intended track was to have transited Birmingham CAS VFR direct to BKY VFR. The pilot apologised on the R/T. Although the pilot apologised on the R/T I requested the pilots contact details via AFTN message to EBCI upon landing. I trust that this information will follow.☐ CAA Closure:☐ CFI of C172 pilot's flying club has discussed the incident with the pilot concerned.

201409596	17/07/2014	EGTT : London (FIR)	EGBB (BHX): Birmingham	Bearing 295 Range 15nm	D	CTA	DE HAVILLAND	Turboprop	2	Infringement of the Birmingham CTA (Class D) by a C172 squawking 7000 at 3000ft. Although the pilot apologised on the R/T I requested the pilots contact details via AFTN message to EBCI upon landing. I trust that this information will follow.☐ CAA Closure:☐ CFI of C172 pilot's flying club has discussed the incident with the pilot concerned.
201409626	17/07/2014	EGTT : London (FIR)	EGBW : Wellesbourne mountford	Bearing 340 Range 5nm	D	CTA	GROB	Reciprocating	1	Infringement of the Birmingham CTA-2 (Class D) by a Grob G115 squawking 7000 between 1800-2000ft. Traffic info given.	I was controlling on Rad 1 and observed a 7000 squawk NW of Wellesbourne tracking towards CAS and Wellesbourne at approx 1800', identified using Mode S as a G115. I attempted to blind call the a/c and also telephoned Wellesbourne but to no avail. The a/c continued and entered CTA -2 in the vicinity of Snitterfield between 1800-2000'. I was working a DHC8 (1) inbound form Chase descending to FL70 so turned him 240deg to ensure I had space to manoeuvre should the infringer alter course, I was also working a DHC8 (2) on a Mosun departure which I gave vectors to allow continuous climb above the DHC8 (1). The a/c landed at Wellesbourne and the pilot was instructed to call the WM. He identified his callsign flown by a student pilot with himself as the instructor.☐ Supplementary 06/08/14:☐ The route included an anticlockwise circumnavigation of the Birmingham Zone routing inbound to Wellesbourne from Bridgenorth. The sortie was flown at 2000ft on the relevant QNHs with the Birmingham QNH selected on the last leg. The student performed well throughout the sortie but on the final leg was a little closer than the planned 3nm North abeam of the Snitterfield gliding site. In order to maintain lateral separation from the active gliding site I directed him to alter heading to the North. During this manoeuvre a momentary lapse in my SA resulted in the a/c remaining at 2000ft rather than starting the planned descent below 1500ft. After landing at Wellesbourne I was contacted by the Birmingham Radar controller and informed I had entered his Class D airspace without a clearance. Ironically, I had used the earlier transit to the North of Birmingham to demonstrate the use of
201409626	17/07/2014	EGTT : London (FIR)	EGBW : Wellesbourne mountford	Bearing 340 Range 5nm	D	CTA	DE HAVILLAND	Turboprop	2	Infringement of the Birmingham CTA-2 (Class D) by a Grob G115 squawking 7000 between 1800-2000ft. 201409700	16/07/2014	EGTT : London (FIR)	Harlow, Essex		G	Restrict ed area	FLIGHT DESIGN	Reciprocating	1	Infringement of the Stansted TMZ 2 (Class G) by an unknown aircraft squawking 0013. Aircraft identified as a Flight Design.	0013 squawk (NMC) observed on SE'ly track. Blind Tx no response, then directed call to Flight Design (derived from mode S data) also no response. Luton radar asked to try, and it was determined to be listening out with them. My understanding would be that display of 0013 without mode C and listening out on Luton constitutes non-compliance with the rules governing the TMZ, and therefore an infringement. What did emerge, however, was the fact that Flight Design was at 1370ft alt, and therefore outside CAS. What also emerged was that he thought mode C should have been on. The requirements of the TMZ have never made provision for a mandatory transponder check prior to transit, so the chance to avoid precisely this scenario was not offered to the pilot.☐ CAA Closure:☐ The AIP states that Mode C it is strongly recommended that aircraft should use Mode C if available. In this case Mode C was available but had not been selected on and this caused the controller to be concerned. The controller tried to contact the aircraft on the Stansted frequency and then determined that the aircraft was in contact with Luton radar. The level of the aircraft was then obtained.

201409707	18/07/2014	EGTT : London (FIR)	KONAN	S			OTHER	Unknown	1	ATC coordination issues concerning a foreign military aircraft alleged to have infringed UK and Maastricht airspace.	Foreign military aircraft infringed UK and Maastricht airspace without coordination. I was working as S15/16 Tactical. We were informed by Raki about aircraft squawking 4601 that would be operating in the Channel sector at FL205 and FL215. The aircraft was operating mainly South of Ratuk (East to West). I then observed the aircraft then climbed to FL235. The aircraft penetrated our airspace without coordination to the West of SOVAT. I warned S17 tactical of this as the aircraft was fairly close to inbounds routing to Tiger. The aircraft then turned out of our airspace. This didn't cause any problems at the time. The aircraft then started progressing East into the area of CBA1. It then turned North towards L9 to the SE of KONAN. I had fltnum 143 on a heading on the south of L9 climbing through similar levels. As the tracks got closer the military aircraft turned East and started climbing. I turned fltnum 143 left 35deg and gave traffic info on the position of the 4601 squawk. The minimum distance between the two aircraft was 6nm. I then transferred fltnum 143 to Maastricht control as 4601 squawk was turning away from the traffic. I then transferred fltnum 3131 outbound, who was approximately 15nm behind, to Maastricht. 4601 squawk then turned North again and penetrated L9 in Maastricht airspace without coordination. 4601 squawk was indicated Mode C below the fltnum 3131. Maastricht phoned us to ask us about it as they knew nothing at all about it. The LAS tried to find out who was actually working the military aircraft. On coming out of the position the LAS gave me a phone number of the controller who had been working the 4601 squawk. I spoke to her and she said that she had been told that the aircraft had been coordinated through our airspace with Military ATC. I subsequently

I spoke to her and she said that she had been told that the aircraft had been coordinated through our airspace with Military ATC. I subsequently
201409730	19/07/2014	EGTT : London (FIR)	EGLF (FAB): Farnborough civil	Bearing 001 Range 0.5nm	A	TMA	OTHER	Reciprocating	1	Infringement of the London TMA (Class A) by a display aircraft at 3988ft.	I was on duty as the Terminal Control Liaison Officer positioned within the Farnborough Tower, primarily to support the activities of the Airshow that conflict with the normal operation of the LTMA. The a/c was displaying within the overhead during a period where there was no airspace delegated from SW Deps, resulting in a requirement for the show traffic to remain clear of CAS (3500' altitude). I received a telephone call from the VCR Show coordinator who had been informed by the Flying Control Committee (FCC) that while monitoring the display aircraft they had tracked the flightpath to an altitude of 3488' AMSL (3250' QFE). Due to the immediate proximity of CAS, in negotiation with the VCR Coord and TMA SW Deps I arranged for a temporary buffer whereby SW Deps would remain above 6000' altitude within 5nm of the aerodrome. This would ensure standard aerobatic separation for activities within 2nm of Farnborough up to an altitude of 4000'. At this time the aircraft was not displaying Mode C according to the Heathrow 10cm radar used at Farnborough The purpose of this was to ensure the safety of TMA operations while the display traffic completed their activities in case of further transgression. This buffer had not been communicated with either the FCC of the display aircraft whose clearance remained to keep clear of CAS. Immediately after this action the FCC contacted the VCR Coord again to report that the a/c concerned had been monitored achieving a height of 3750', equating to 3988' QNH, 498' within CAS. This buffer remained in force between 1408 and 1413.☐ Supplementary 20/07/14:☐ I was on duty as one of two VCR coordinators at the time of this event. My colleague
201409750	20/07/2014	EGTT : London (FIR)	EGTE (EXT): Exeter		G	ATZ	PIPER	Reciprocating	1	Infringement of the Exeter ATZ (Class G) by a PA28 at 1800ft.	At 1005Z PA28 calls leaving on a "Short flight to South & West". PA28 was instructed to "Remain outside the ATZ. Runway 26 in use", which was acknowledged. PA28 was asked to "report your routing". PA28 replied: "I will pass to the North of Exeter to Kennford. PA28 entered the ATZ at 10:11 and was asked to "Report your level". PA28 reported "1900ft". PA28 was informed that he was within the Aerodrome Traffic Zone and was instructed to expedite his tracks clear of the Aerodrome Traffic Zone. PA28 tracked Westbound and left the ATZ.

201409823	20/07/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	10nm E	D	CTR	OTHER	Reciprocating	1	Gyroplane infringed Gatwick CTR (Class D) twice, resulting in loss of separation with inbound traffic. Traffic info and avoiding action given.	At 1530 7000 squawk tracking SW infringed the SE corner of Gatwick CTR by about 2nm. Mode S converted the infringer to a Gyroplane. An A319 was on an 8 mile final at the time. Although the a/c was only about 2 miles away I called traffic and told the pilot to continue his approach. The track and speed of the infringer indicated it was not a threat to the A319. The infringing a/c routed South and left CAS at 1535. I unbandboxed the sector. We tried to call and trace the a/c to no avail. We continued to monitor the a/c. At 1545 it infringed again this time going NE retracing its previous infringing track! It finally left CAS at 1548 and continued ENE. This time another A319 had to be given a slight reroute (it was taken through the ILS eventually establishing from the North at about 6nm) to maintain 5nm separation. ☐ Supplementary 04/08/14:☐ On the day in question I can only think that my lack of concentration mixed with poor judgement led to this incident.☐ CAA Closure:☐ Pilot error. Warning letter sent.

201409896	22/07/2014	EGTT : London (FIR)	GARMI	FIR boundary with LFRG	G	Danger area	MAULE	Reciprocating	1	Infringement of active Danger Area EGD036 (Class G) by a MX7 at FL70.	Deauville pre-noted flight approx 40 minutes earlier, and at 1802 a/c called 42miles South of the Isle of Wight at 7,000ft, but I was unable to establish 2-way comms. After several attempts to establish 2-way, I got a response, but by that time the a/c had just entered D036. The number 2 FISO had already seen on the FID that the a/c might enter D036 so called Swanwick Mil to try to obtain a DACS. Swanwick Mil response was that D036 was active with live firing and this info was relayed to the a/c. The a/c was markedly unresponsive to the info about live firing so this was reiterated several times until we observed him turning left (on the FID) to leave the Danger Area. A/c was then asked his intentions but did not seem to have any idea what to do. I informed him about Q41 and the base of airway and he seemed to have some difficulty in trying to decide on a course of action. I gave him information about the Airway M185 with the base of FL105 and point ORIST at the boundary, but he did not have any idea where that was, even when told that it was 6 miles East of ORTAC. Another controller then rang Sector 21 to inform them of the situation, and also Jersey Zone, as there was an a/c inbound to Jersey. As the a/c still had no idea what course of action to take and didn't know where ORTAC was we suggested that Jersey may be able give him a Radar service. The response was that he would be 'flying over the top of their airspace' so didn't see the need to contact them. Other controller rang Jersey again and they said that they could provide a service to vector him out of any possible infringement situation and eventually a/c agreed to change freq to Jersey Zone on 125.2. At this point there was some interaction between Sector 21 and Jersey. Once a/c was clear of the CAS Jersey rang to ask
201409920	22/07/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	SE	D	CTR	CESSNA	Reciprocating	1	Infringement of the Luton CTR (Class D) by a C152. Standard separation maintained.	I was in the process of handing over the sector to the afternoon controller and then observed a 7000 squawk entering the control zone without a clearance. He was northwest of Panshanger, tracking northbound, I think with no Mode C (although it all happened very quickly, I can't be sure). I phoned the tower via priority line to enquire if a departure was moving and to stop it. This lead to the enforced go around of an inbound which was at about 3 miles from touchdown. I instructed tower to climb it to 3000ft and it came back to my frequency. In this time, the infringing aircraft, which had been continuing northbound, turned 180 degrees and left the zone to the south. No further action was necessary. The infringer was kindly traced by the afternoon watch.☐ CAA Closure:☐ No response from owner. Closed due to elapsed time.
201409947	22/07/2014	EGTT : London (FIR)	EGDG (NQY): St. Mawgan	1 NW	G	ATZ	CYCLONE AIRSPORTS	Reciprocating	1	Infringement of the Newquay ATZ (Class G) by two microlights. Traffic info given.	2 radar contacts observed North of the aerodrome, heading SW along the coast. Blind transmissions made but no response. 2 air transport movements delayed as the microlights were observed to cross the climb out of R/W30. Tracing action identified two microlights travelling from Bodmin to the Isles of Scilly.
201409947	22/07/2014	EGTT : London (FIR)	EGDG (NQY): St. Mawgan	1 NW	G	ATZ	UNKNOWN	Reciprocating	1	Infringement of the Newquay ATZ (Class G) by two microlights. Traffic info given.	2 radar contacts observed North of the aerodrome, heading SW along the coast. 201410025	23/07/2014	EGTT : London (FIR)	EGNR : Hawarden		D	CTA	PIPER	Reciprocating	1	Infringement of the Liverpool CTA (Class D) by a PA28 at 2500ft. Traffic info given. Standard separation maintained.	Working as WAL Planner CAIT was activated by a 4000 squawk NW of WAL in the Liverpool CTA. The mode C was indicating 2500feet. I contacted Liverpool who did not have any details of the traffic. We had already transferred a B737 to Liverpool however we also had an ATR42 inbound to EGCC to whom the Tactical gave a turn to maintain required separation. The 4000 squawk continued in a south westerly direction with the height readout fluctuating between 2200ft and 2500ft. After approx 5 min's Liverpool called to confirm that the aircraft was A PA28 and that it was now talking to Hawarden on a 4601 squawk.
201410081	23/07/2014	EGTT : London (FIR)	EGVP : Middle wallop		G	ATZ	PIPER	Reciprocating	1	Infringement of the Middle Wallop ATZ (Class G) by a PA28 at 1500ft.	At 1222Z I received a call from Wallop Approach informing me of a 7000 squawk approaching Great Wood Gate (Approx. 51 10.49N 001 32.78W) from the NE indicating 1500FT QFE on the VRD, descending. The aircraft was observed to continue SW bound towards Middle Wallop (EGVP), passing approximately 1NM to the north of the airfield, crossing the extended centreline of Runway 36 at 1224Z and at a height estimated visually to be between 700FT and 1000FT QFE. The aircraft was then observed to turn north towards Thruxton Aerodrome (EGHO). I direct dialled the AGCS Radio operator at EGHO who stated he had an aircraft, a PA28 which he believed had misidentified Middle Wallop as Thruxton. The 1150Z weather report for Middle Wallop reported colour state blue, cloud few at 3500FT and a prevailing visibility of 30KM. traffic levels were light, the infringement did not impact operations nor result in an airprox.
201410086	25/07/2014	EGTT : London (FIR)	EGTK (OXF): Oxford/Kidlington		G	ATZ	OTHER	Reciprocating	1	Infringement of the Oxford ATZ (Class G) by a CZAW Sportsruiser at 1900ft. Traffic info given.	EGTK 250950Z 08008KT 050V110 9999 FEW016 22/17 Q1018=□ Whilst on duty as the Oxford radar controller I observed a 7000 squawk get airborne from Enstone (EGTN) and climb to altitude 2000' on mode C, tracking directly toward EGTK. The OX east/west hold was active with a DA42 maintaining 3500' on a traffic service and traffic information was passed. As the 7000 squawk approached 2.5nm NW of EGTK, Brize ATSU phoned to advise that the aircraft had just tried to call Brize but they were unable to maintain two way communication with the pilot. The 7000 squawk then changed to 3702 and entered the EGTK ATZ at 1000 UTC. Traffic information was requested from Brize Zone but again they stated that the aircraft was still not talking to them and that they were attempting to get it to turn away from Oxford. The aircraft then tracked south through the EGTK ATZ, 1.5nm west of the aerodrome before turning southwest to leave the ATZ and enter the Brize CTR. Brize ATSU advised the callsign of the aircraft. Although the aircraft did not, on this occasion, fly into direct conflict with any Oxford traffic, Oxford tower did have inbound traffic inside the ATZ from the south east and traffic was held in the OX hold until the intentions of the aircraft were known. Jet traffic was also being vectored inbound from the south for the NDB(L)/DME 01 approach.
201410099	25/07/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted		D	CTA	JODEL	Reciprocating	1	Possible infringement of the Stansted CTA (Class D) by a Jodel D117, indicating 1700ft. CAIT activated. Traffic info and avoiding action given to Stansted inbounds.	Jodel D117 ran along the edge of the CTA/RMA indicating 1700ft, twice alerting SCAIT, (the callsign burning thru). In the first instance the Stansted traffic was already turning away to establish, but the second instance I had to issue avoiding action. This turn was towards/then past the infringer due to: turning away would have meant going into Luton airspace at 3000ft and I didn't have time to co-ordinate, this level affecting the missed approach and all of the outbounds, Luton on Runway 08. By continuing or turning to the right the Jodel D117 could have climbed and then I would have less room for manoeuvre. While the left turn had the initial effect of reducing the separation slightly, the distance then opened quickly with the a/c involved moving in opposite directions. (I passed traffic information to the pilot informing of the initial reduction in separation and that the distance would then open). Lots of co-ordination was required by Stansted INT and myself to effect right hand circuits away from the infringer. I believe GS Airports monitored the a/c and that the pilot did telephone into TC and spoke with GS Airports.

201410099	25/07/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted		D	CTA	AIRBUS	Turbofan	2	Possible infringement of the Stansted CTA (Class D) by a Jodel D117, indicating 1700ft. CAIT activated. Traffic info and avoiding action given to Stansted inbound.	Jodel D117 ran along the edge of the CTA/RMA indicating 1700ft, twice alerting SCAIT, (the callsign burning thru). In the first instance the Stansted traffic was already turning away to establish, but the second instance I had to issue avoiding action. This turn was towards/then past the infringer due to: turning away would have meant going into Luton airspace at 3000ft and I didn't have time to co-ordinate, this level affecting the missed approach and all of the outbounds, Luton on Runway 08. 201410100	25/07/2014	EGTT : London (FIR)	London City CTR		D	CTR	BEECH	Reciprocating	1	Infringement of the London City CTR (Class D) by a BE33 squawking 4670. London City departures were stopped.	A/c had been on the TC Luton frequency whilst transiting the Luton CTR from Cranfield on track to Elstree, but en-route to Lyon Bron. On reaching the Elstree overhead, the pilot announced turning left onto a heading of 095deg, and his ensuing track paralleled the northern edge of the Heathrow CTR. After some time, a/c was observed to turn hard right and track towards the London City CTR boundary. Attempts, with increasing levels of urgency, were made to contact the a/c without success. Not surprisingly, Thames Radar contacted me, but all I could tell them was that he wasn't on my frequency. A/c had made no announcement of his intention or desire to leave the frequency on which he had contracted to receive a service, nor had he changed his transponder code. Thames subsequently advised that the a/c had contacted Farnborough. Investigation findings: Pilot was avoiding bad weather and thought he had received clearance from Thames Radar. The root cause was bad weather and the pilots lack of knowledge. CAA Closure: A warning letter has been sent.
201410111	26/07/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	12 N	D	CTA	OTHER	Reciprocating	1	Alleged infringement of the Manchester CTA (Class D) by a Groppo Trail. Traffic info and avoiding action given. Standard separation maintained.	I was acting as FIN DIR at 1310 when an A321 was transferred to me from APP(S). As the aircraft was being transferred, an AIW alert activated on a 7000 squawk ahead of the A321 and to the right of its track. At this stage, the A321 was heading 085deg from MIRS1 and levelling at 5000', North of Manchester Airport. The 7000 squawk was in the Barton LFA, heading away from Barton, on a north-easterly track, but indicating 2100' and climbing into CAS. As the A321 contacted me, the unknown traffic continued climbing to 2200'. I was concerned that this aircraft was continuing to climb into CAS and into conflict with the A321. My first response to the A321, therefore, was an avoiding action left turn to [I believe] 040deg and passed traffic info on the 7000 squawk which was about 6 miles away in the A321s 1 o'clock position, which was immediately actioned by the A321 crew. The 7000 squawk levelled at about 2100' and continued tracking north-easterly, and shortly afterwards left the Manchester CTR at which point the AIW alert cancelled. Mode S data indicated the subject aircraft may have been a Groppo Trail. APP(S) attempted to call this aircraft, but to no avail. Further traffic info was passed to the A321 as they passed North of the unknown contact. The ERBM tool was used and indicated that separation of 4.9 miles and 3000' was maintained. Shortly afterwards, the A321 was turned back into the radar circuit and landed with no further incident, although a small delay resulted from the extra track distance given. Supplementary 28/07/14: Manchester Approach gave radar avoiding action. 50° left. A TCAS unmarked advisory popped up, but disappeared after 5 seconds. ATC filed avoiding action.

201410111	26/07/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	12 N	D	CTA	AIRBUS	Turbofan	2	Alleged infringement of the Manchester CTA (Class D) by a Groppo Trail. 201410137	26/07/2014	EGTT : London (FIR)	BNN	2nm N	D	CTR	NORTH AMERICAN	Reciprocating	1	Infringement of the Luton CTR (Class D) by an unknown aircraft squawking 7000, resulting in loss of separation with an A320 on final approach to R/W08. Aircraft identified as a P51. Traffic info given.	7000 squawk with no mode C observed on a northerly track by BNN VOR - entered Luton CTR towards the RWY08 final approach track towards A320, A320 established on final. Unknown had no useful mode S data available, and a blind Tx elicited no response. Traffic info was passed to A320, but, although separation had been lost, no avoiding action was given. To turn right would have taken it towards outbound traffic, to turn left would have entered active gliding airspace, it was felt that to continue the approach would have allowed the unknown to pass behind (though it is admitted that relied completely on the unknown NOT turning right). A fairly steady sequence of inbounds was under way, and in order not to lose any gaps, only limited options were available to keep subsequent inbounds at bay. The unknown did turn left shortly after to clear the lateral limits of the CTR, but as no mode C was displayed, it is not known if this placed it outside CAS or not. The sequence was continued on the basis that the groundspeed of the unknown was relatively high, therefore resulting in fairly wide turn radii if it looked like coming back through again. The unknown was boxed to facilitate tracking, and it manoeuvred very close to the SW edge of Cranfield's ATZ. At first, staff there had no visual contact, but as it continued to operate in the same area, they did observe and describe an aircraft type. This was one of the most unpleasant experiences I have had with infringing traffic, as the options for avoiding action (had it remained inside CAS) were so limited. It was chosen to operate this aircraft close to the airspace of two busy airfields without making contact with either of the controlling units, or with Farnborough LARS. It was operated at a speed which brought it, in short order, close to

201410150	27/07/2014	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD		D	CTR	CESSNA	Reciprocating	1	Infringement of the Doncaster/Sheffield CTR (Class D). Standard separation maintained.	Aircraft in the overshoot from Sandtoft climbs straight ahead into CAS by 3 miles without a clearance. Pilot then checked in asking to cross CAS on a photo detail. I informed pilot that he had infringed CAS and he then said he'd had some engine troubles after the overshoot and that's why. He was given a retrospective clearance and continued on his sortie.
201410154	25/07/2014	EGTT : London (FIR)	EGGP (LPL): Liverpool	2nm South	D	CTR	PIPER	Reciprocating	1	Infringement of the Liverpool CTR (Class D) by a PA28 at 1500ft.	Whilst carrying out OJTI duties PA28 infringed controlled airspace. Our attention was first drawn to this aircraft when tower asked if we were visual with a light aircraft on the south bank of the River Mersey (about 2nm south of the airfield). Another aircraft had been released on a heading of 210 degrees climbing to 3000ft. There was no primary or secondary cover of the zone infringer. The tower controller gave the departing aircraft a turn onto 180degrees to avoid the unknown aircraft and then coordinated this with radar. Further climb was obtained from the TMA and the heading coordinated, the aircraft was subsequently transferred to Scottish control. There was still no primary or secondary return. PA28 then called on frequency and reported his position to be similar to that of the zone infringer. He was asked to squawk 4364 with ident but this was not observed. The pilot was asked to confirm his position again. He was believed to be the zone infringer but was no positively identified. The pilot was informed he had infringed controlled airspace and was subsequently asked to leave the zone to the south. The pilot apologised and said he was unfamiliar with the area. At the closest point the aircraft were to be believed to be 3 miles apart. The minimum vertical distance was unknown but based on the pilot's report this was estimated to be 1000ft.☐ CAA Closure:☐ Pilot unfamiliar with airspace and procedures for Liverpool due to inadequate pre-flight planning and preparation. Warning letter sent.
201410189	30/07/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	7 SE	D	CTA	CESSNA	Reciprocating	1	Infringement of the Luton CTA/CTR by a C152. Traffic info given. Standard separation maintained.	I saw an intermittent 5022 squawk near EGLG to the SE of GW. It was approaching the zone boundary when I advised my inbound A319 that if that traffic came into my airspace I would have to break him off the approach. The primary came into the zone so I told the A319 to turn right onto 360deg. There was a DET rolling, I called tower, told them about the unknown and asked for the outbound. They said it had gone to North. I rang North and told them about the unknown and that they needed to avoid it. I called LF LARS during this to ask about it and they said they were having trouble keeping ident on it. It was intermittent on my screen. It turned away and I bought the A319 round for another approach. I asked the GS to get the details from LF LARS. I followed the contact on radar and it looked like it was about to come in again. I had already warned my next a/c that I may have to break him off but the primary turned at the zone boundary. LARS rang back and asked if I could still see him, I said yes. It was LARS that instructed him to turn East and mentioned he was having trouble with his DI. The 5022 was a C152 EGKR to EGSU.

201410189	30/07/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	7 SE	D	CTA	AIRBUS	Turbofan	2	Infringement of the Luton CTA/CTR by a C152. Traffic info given. Standard separation maintained. It was LARS that instructed him to turn East and mentioned he was having trouble with his DI. The 5022 was a C152 EGKR to EGSU.
201410254	29/07/2014	EGTT : London (FIR)	OSPOL		A	Other	OTHER	Reciprocating	1	Infringement of Airway M189 (Class A) by an unknown aircraft indicating FL85. Aircraft identified as a Dynamic microlight. Standard separation maintained.	At 1113 a 1177 squawk was observed inside CAS between OSPOL and NEVIL indicating FL85 where the base of CAS is FL75. Enquiries with London FIR revealed the aircraft to be a Dynamic microlight which had called the FISO already inside CAS and was requesting a crossing clearance of the Portsmouth DAs. No other traffic within the sector was affected by this infringement.□ Supplementary 02/08/14:□ I took over the FIS tactical position at 1100 UTC with a light traffic load. My colleague whom I had just relieved had completed their handover but was still standing close by. I was called on 124.6 by a Dynamic microlight aircraft. He reported at 8500 feet mid-channel and a heading of 320deg. I instructed him to select the FIS SSR code 1177. From previous experience, I suspected his position would be somewhere to the NE of the Cherbourg peninsula, and I was concerned that his routing may place him either inside, or adjacent to, CAS or an active danger area. When the SSR code appeared on our FID it confirmed that he appeared to be inside CAS in Airway M189 (base FL75) approx 10 NM NE of NEVIL, and about to infringe EGD040 which was notified as active. My immediate concern was the DA, and so I queried whether the pilot was aware of the Portsmouth DA complex activity (EGD036-040) and whether he had a map to help him locate the DAs relative to his position. He confirmed he had a map to show the DAs, but was unaware of the activity status of them. My FISO colleague initiated a call to Plymouth Mil Radar to inform them of the situation and to request a clearance through the EGD040 on a direct track to destination. This was duly
201410256	29/07/2014	EGTT : London (FIR)	ORIST		A	Other	PIPER	Reciprocating	1	Infringement of Airway Q41 (Class A) by a PA32 at FL50. Standard separation maintained.	An a/c subsequently confirmed by Jersey to be a PA32 was seen to infringe Q41 North of ORIST on being handed over from Jersey Zone to London Mil. The a/c was approximately 1nm within the eastern side of R41 at c.FL50 before turning East to leave regulated airspace. Jersey advised initially that the a/c was working London FIS but they did not speak to it. The a/c was subsequently observed to select a Plymouth Radar squawk. There was no safety impact on other sector traffic.□ Supplementary 04/08/14:□ Possible infringement of Q41 by light civilian a/c. I was controlling on Plymouth Mil LARS East. PA32 called on VHF at approximately 1220 asking for information on activity taking place in D036 that would affect his transit in the climb to 6000ft. I informed him there was no hazardous activity to effect and asked him if he required a service to which he replied no. There was a 7000 squawk close to edge of Q41 but diverging, with a Mode C indication of 038 and climbing. As the 7000 appeared to still be tracking very close to Q41 I asked PA32 if he was aware of Q41 base level FL35. He said he was altering his course 10 to 15deg to the right and I once again asked him if he would like a service. This time he said yes for a BS at which point I changed the squawk to 4530 and it was the 7000 near to Q41. I later received a phone call from Sector 20 asking if I was working a PA32 as they believe it had infringed Q41. They asked me to inform the pilot to which he responded that according to his GPS he was just to the eastern edge of the airway.□ CAA Closure:□

201410296	29/07/2014	EGTT : London (FIR)	EGTK (OXF): Oxford/Kidlington	NW	G	ATZ	OTHER	Reciprocating	1	Infringement of the Oxford ATZ (Class G) by a flex wing microlight. Traffic info given.	I had just taken over in radar with the calibrator aircraft on final approach R/W19 to fly through and climb out. I noticed a primary only contact appear to the NW of the ATZ and track North-South just inside the boundary. Traffic info was passed to the calibrator aircraft as it climbed out and toward the contact. The calibrator reported visual with at first a helicopter but then changed his report to a flexwing microlight and upon questioning reported its level to be 1200 ft. The contact was tracked as it continued on a easterly track to 1 1/4 West of the aerodrome (3/4 mile inside the ATZ) and then turned around and cleared the area. The contact was traced to Enstone aerodrome where radar contact was lost in the vicinity of the aerodrome at 1039.
201410296	29/07/2014	EGTT : London (FIR)	EGTK (OXF): Oxford/Kidlington	NW	G	ATZ	PIPER	Reciprocating	2	Infringement of the Oxford ATZ (Class G) by a flex wing microlight. Traffic info given.	I had just taken over in radar with the calibrator aircraft on final approach R/W19 to fly through and climb out. I noticed a primary only contact appear to the NW of the ATZ and track North-South just inside the boundary. Traffic info was passed to the calibrator aircraft as it climbed out and toward the contact. The calibrator reported visual with at first a helicopter but then changed his report to a flexwing microlight and upon questioning reported its level to be 1200 ft. The contact was tracked as it continued on a easterly track to 1 1/4 West of the aerodrome (3/4 mile inside the ATZ) and then turned around and cleared the area. The contact was traced to Enstone aerodrome where radar contact was lost in the vicinity of the aerodrome at 1039.
201410327	30/07/2014	EGTT : London (FIR)	EGVN (BZZ): Brize norton	NE	D	CTR	AVIONS ROBIN	Reciprocating	1	Infringement of the Brize Norton CTR (Class D) and allegedly the Oxford ATZ (Class G) by a DR400.	Operating as the RA controller I received a call from Oxford ATC informing of a 7000 track that had transited through their ATZ between 1800' and 2300' without talking to them. The aircraft was heading for the CTR, the track was monitored and entered the zone at 0950 it tracked along the northern edge of the zone wearing a 7000 squawk with NMC without talking to anyone. The aircraft left the zone at 1004 and headed towards Gloucester, after observing we called Gloucester and the aircrafts details were given to us. The pilot later called and was advised of his mistake. The RA controller took a call from Oxford informing him that an unknown aircraft had just flown through their ATZ. We watched as the aircraft squawking 7000 then infringed the NE corner of our CTR. We had no assets in the zone at the time. The aircraft concerned is based at Gloucester.

201410336	30/07/2014	EGTT : London (FIR)	Royston		D	CTA	CESSNA	Reciprocating	1	Infringement of the Luton CTA (Class D) by an unknown aircraft squawking 7000, at 2800ft-3000ft. Aircraft identified as a C182. Traffic info given to an inbound GLF5.	At approximately 1800Z, an aircraft squawking 7000 entered the Luton CTA near Royston at 2.8A-3.0A. At the same time, almost directly above it, GLF5 was on a base leg at 5.0A. I saw the 7000 approach the boundary of CAS and initially advised GLF5 that I would keep him at 5.0A for a short while as I wasn't sure about the intentions of another aircraft just on the boundary. The 7000 then entered CAS - Mode S showed the callsign. I turned GLF5 away (onto heading 270) from the infringer, who also began an orbit/turn in the opposite direction and then left CAS. I made 2 blind calls to callsign but no response was received. At 1804Z, the callsign called up and requested a Basic Service. I identified the aircraft and it was the same one that has earlier infringed CAS.
201410336	30/07/2014	EGTT : London (FIR)	Royston		D	CTA	GULFSTREAM	Turbofan	2	Infringement of the Luton CTA (Class D) by an unknown aircraft squawking 7000, at 2800ft-3000ft. Aircraft identified as a C182. Traffic info given to an inbound GLF5.	At approximately 1800Z, an aircraft squawking 7000 entered the Luton CTA near Royston at 2.8A-3.0A. At the same time, almost directly above it, GLF5 was on a base leg at 5.0A. I saw the 7000 approach the boundary of CAS and initially advised GLF5 that I would keep him at 5.0A for a short while as I wasn't sure about the intentions of another aircraft just on the boundary. The 7000 then entered CAS - Mode S showed the callsign. I turned GLF5 away (onto heading 270) from the infringer, who also began an orbit/turn in the opposite direction and then left CAS. I made 2 blind calls to callsign but no response was received. At 1804Z, the callsign called up and requested a Basic Service. I identified the aircraft and it was the same one that has earlier infringed CAS.
201410392	31/07/2014	EGTT : London (FIR)	EGSS (STN); London/Stansted	15 S	D	CTA	GRUMMAN	Reciprocating	1	Infringement of the Stansted CTA (Class D) by an AA1. Standard separation maintained.	7000 squawk observed indicating 1900ft in CTA South of EGSS. CAIT activated and identified as an AA1.. Blind call made but not on frequency. Finally raised on EGGW frequency 129.550. Descended outside CAS by GW INT. Pilot made aware of error and apologised.

201410404	29/07/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	8nm WNW	D	CTA	PIPER	Reciprocating	1	Infringement of the Manchester CTA (Class D) by an unknown aircraft squawking 7000 at 2400ft. Aircraft identified as a PA28. ATC stopped all Northbound departures. Standard separation maintained.	At 1150 I observed an aircraft squawking 7000 south west of Barton on a northerly track. Its mode C indicated 1900ft. The aircraft continued to climb to altitude 2400ft, indicating that it had entered the Manchester CTA above Barton aerodrome. I immediately called the departures controller and stopped all north bound departures. I called Barton, who confirmed that they had an aircraft in that position, and that it was at altitude 2400ft. It was later determined that this aircraft was PA28.☐ Supplementary 11/08/14:☐ Flew up the LLC at 1100/1200 ft and after leaving the LLC started to climb to 1800ft for Barton. Not watching my altitude properly and rose to 2500ft.
201410423	04/08/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	5nm SSE	D	CTR	PIPER	Reciprocating	1	Infringement of the Luton CTR (Class D) by an unknown aircraft, squawking 7000, indicating 1500ft. Aircraft identified as a PA28. Check all imposed on departures and some inbound delays. Traffic info given.	A7000 with Mode C indicating 1500ft infringed Luton zone 5nm South of Luton. The contact continued North toward the airport before turning West and then South to leave CAS. The tower advised and a 'Check All' used to stop all departures. There were a number of inbound a/c, some were delayed as a precaution. The contact was identified with the assistance of Elstree radio.☐ CAA Closure:☐ No response from owner. Closed due to elapsed time.
201410457	01/08/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	8 NE	D	CTR	PIPER	Reciprocating	1	Infringement of the Luton CTR (Class D) by a PA28. Standard separation maintained.	At 13.26z I noticed a A7000 squawk (9 miles NE of Luton) that had been tracking due South at 2000 feet suddenly turn 90deg and approach the zone boundary. At 13.28z it crossed into the zone. I put a check all on with the tower as the aircraft began to track towards the field. Essex held the next 3 inbound at LOREL. The aircraft got to about 6 miles NE of the field and then turned SE subsequently exiting the zone about a mile North of EGLG. The aircraft was tracked to EGLG and identified as a PA28. An instructor from EGLG called the GS desk and I spoke to him to explain the above. He asked me to include the fact that the pilot of the PA28 was a newly valid PPL.☐ Supplementary 07/08/14:☐ Due to the complexity of release in the BPK area, EMB190 was kept at 4A til just North of the BPK. A late climb meant that we had a conflict against an infringing aircraft that was late coordinated from EGGW. Due to the fact that our outbounds restricted a left turn, and a right turn could of potentially taken us into gate traffic at 5A, a judgement was made to get the EMB190 climbing ASAP. Unfortunately this meant we didn't get 5A above the infringer. MC i/b at FL80, other traffic at 6A, 5A, and at 4A, vectoring of the EMB190 to enable climb, all within the vicinity of BPK.
201410461	01/08/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	12 NE	D	CTA	FOURNIER	Reciprocating	1	Infringement of the Stansted CTA (Class D) by a Fournier RF-5B. Standard separation maintained.	A/c on an FIR squawk observed infringing CTA to the NE of EGSS. Called FIR and asked for a/c to be transferred to Essex on 120.625. A/c called on frequency and was advised of base of CAS. A/c descended to clear CAS.
201410485	02/08/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	SE	D	CTA	FLY BUY ULTRALIGHTS	Reciprocating	1	Infringement of the Solent CTA (Class D) by an Ikarus C42 microlight at 2600ft. Standard separation maintained. AIW activated.	At 1600 the AIW alerted me to traffic entering the Solent CTA(CTA-6). Blind transmissions were made but no response. The Mode S callsign was ZZZZZZZ. I had previously worked an aircraft earlier with this down link callsign. The ATSA went through the strips and we believed the aircraft was an Ikarus C42 microlight. I made a blind call using this callsign and the pilot responded. I identified the aircraft as an Ikarus C42 microlight using SSR. I advised the pilot he had infringed the CTA and the pilot acknowledged this. I then gave him clearance to transit CAS. When I worked this aircraft earlier in the afternoon I had to give him a transit clearance due to his close proximity to Southampton CTR and I believe he entered then.☐ Supplementary 22/08/14:☐ The aircraft entered the Class D Solent Control Area without a clearance, whilst tracking North. The pilot admitted that the descent to operate underneath the Solent CTA was left too late resulting in the vertical airspace infringement and apologised for the incident caused by poor situational awareness and manual handling as he was aware of the airspace boundary.

201410513	03/08/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	Bearing 080 Range 12nm	D	CTA	PIPER	Reciprocating	1	Infringement of the Gatwick CTA (Class D) by a PA28 squawking 7000 at 2000ft. Traffic info given. Separation lost.	An A7000 squawk was seen to enter CAS East of EGKK tracking North toward the 26L final approach at 2000ft indicated. B737 was in close proximity to the infringing a/c in the descent to 3000ft to join the ILS and was passed traffic as he went in front of the infringer. At that stage of flight I considered it would be more disruptive to break off the approach to achieve separation than to let B737 continue past the infringer. Fltnum35BT was the next in the landing sequence and was given an extended circuit before joining the ILS after the infringer had cleared away to the North. The infringing a/c was tracked to EGKB. I spoke with EGKB ATC who identified the a/c. ☐ Supplementary 12/08/14:☐ My return trip was along the coast intercepting Mayfield VOR on a 045 radial to and from heading then intercepting Biggin VOR on a to radial of 290-300 unfortunately due to an error on my part I had inadvertently selected a 340 to radial to Biggin .This was my mistake for which I offer you my most sincere apologies.☐ CAA Closure:☐ Pilot error. Warning letter sent.
201410513	03/08/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	Bearing 080 Range 12nm	D	CTA	BOEING	Turbofan	2	Infringement of the Gatwick CTA (Class D) by a PA28 squawking 7000 at 2000ft. Traffic info given. Separation lost.	An A7000 squawk was seen to enter CAS East of EGKK tracking North toward the 26L final approach at 2000ft indicated. 201410516	03/08/2014	EGTT : London (FIR)	MID	3nm ESE	A	TMA	CESSNA	Reciprocating	1	Infringement of the LTMA (Class A) by a C172 indicating 3400ft. CAIT activated. Traffic info given. Standard separation maintained.	I was working as the WILLO controller when I was made aware of an infringer (C172) flying in circles to the East of Midhurst. The Mode C indicated an infringement with 3.4A being the highest altitude I observed. Just airborne was an aircraft from Gatwick on an ADNID SID which I advised of the traffic and turned right onto West with a climb to FL100. Once the aircraft was no longer in conflict I turned it back towards its normal route. C172 appeared to track West and either descended or was no longer CAITing once the base changed to 3.4A to the West of Midhurst. No other traffic was affected on WILLO.
201410518	03/08/2014	EGTT : London (FIR)	Not specified		G	Restricted area	CYCLONE AIRSPORTS	Reciprocating	1	Infringement of the Stansted TMZ1 (Class G) by a Microlight initially observed as a primary contact. Traffic info given.	At approx 1515 a primary contact was observed to enter the SS TMZ1 area tracking SE. A318 was vectored clear and 6 subsequent aircraft were delayed as a result. The contact disappeared from radar around the 8 mile point for R/W22 so inboundes were vectored in to land. One aircraft may have been less than 5 miles when the contact reappeared just to the NW of the SL area, although there was never any risk of collision. The tower had confirmed the contact as a Microlight by this time. Successive tracking and research highlighted the possibility that it was a Microlight from EGSU to Headcorn. This became evident when it contacted LF LARS and was issued a 5060 squawk.

201410518	03/08/2014	EGTT : London (FIR)	Not specified		G	Restricted area	AIRBUS	Turbofan	2	Infringement of the Stansted TMZ1 (Class G) by a Microlight initially observed as a primary contact. 201410601	04/08/2014	EGTT : London (FIR)	MIRSI	5nm W	D	CTA	PIPER	Reciprocating	1	Infringement of the Manchester CTA (Class D) by an unknown aircraft squawking 7000 at 4000ft, resulting in ATC issuing a late revised descent clearance to an inbound ATR72. Aircraft identified as a PA38. CAIT activated. Standard separation maintained.	CAS Infringer near MIRSI stack. At approximately 16:05Z an infringer appeared around 5nm West of MIRSI. CAIT activated. I was working an inbound ATR72 at the time on his own navigation to MIRSI and descending to FL80. I asked my planner to call Liverpool to ask if they were working the unknown a/c and at the same time I turned ATR72 20deg to the right (not avoiding action) to ensure that the blips did not merge. In the next transmission I stopped his descent at FL90 (the infringer had seemed to level off at 4A where the base of the CTA is 3.5A). Separation was not lost. Once the returns had passed on radar and the infringer had left CAS I then descended the ATR72 further and my planner coordinated a heading past MIRSI with approach. I also briefly explained to the pilot why I had stopped him off late (he had been passing about FL93 when I asked him to stop at FL90). Supplementary 18/08/14: I was flying with my student at the time of the event. I was flying at 3400 ft on Liverpool QNH and below Manchester CTA. I was squawking 4360 on Mode C. I was fully aware of the airspace because I have done this route many times before. I was in contact with Liverpool Radar. Then I changed my frequency to Warton Radar and I obtained Traffic Service from them. I completed the flight and returned back to intended destination. I was with Warton Radar and then Liverpool Radar they did not mention anything about the infringement of CAS. When I was informed about the infringement of control airspace I took a flight with my student to check the transponder. I went to Stoke and Trent in PA38 approximately 15:00z. I contacted Shrewsbury radar and requested for altimeter reading on their screen. I found out
201410601	04/08/2014	EGTT : London (FIR)	MIRSI	5nm W	D	CTA	ATR	Turboprop	2	Infringement of the Manchester CTA (Class D) by an unknown aircraft squawking 7000 at 4000ft, resulting in ATC issuing a late revised descent clearance to an inbound ATR72. Aircraft identified as a PA38. CAIT activated. Standard separation maintained.	CAS Infringer near MIRSI stack. At approximately 16:05Z an infringer appeared around 5nm West of MIRSI. CAIT activated. In the next transmission I stopped his descent at FL90 (the infringer had seemed to level off at 4A where the base of the CTA is 3.5A). Separation was not lost. Once the returns had passed on radar and the infringer had left CAS I then descended the ATR72 further and my planner coordinated a heading past MIRSI with approach. I also briefly explained to the pilot why I had stopped him off late (he had been passing about FL93 when I asked him to stop at FL90). Supplementary 18/08/14: I was flying with my student at the time of the event. I was flying at 3400 ft on Liverpool QNH and below Manchester CTA. I was squawking 4360 on Mode C. I was fully aware of the airspace because I have done this route many times before. I was in contact with Liverpool Radar. Then I changed my frequency to Warton Radar and I obtained Traffic Service from them. I completed the flight and returned back to intended destination. I was with Warton Radar and then Liverpool Radar they did not mention anything about the infringement of CAS. When I was informed about the infringement of control airspace I took a flight with my student to check the transponder. I went to Stoke and Trent in PA38 approximately 15:00z. I contacted Shrewsbury radar and requested for altimeter reading on their screen. I found out
201410623	04/08/2014	EGTT : London (FIR)	EGSS (STN); London/Stansted		D	CTR	CESSNA	Reciprocating	1	Infringement of the Stansted CTR (Class D) and the Stansted TMZ 1 (Class G) by an unknown aircraft squawking 7000 at 1800ft. Aircraft identified as a C152.	At time 1110 7000 squawk observed departing an airfield. A/c climbed to 1800 infringing first Stansted CTR then TMZ 1. Aircraft left CAS to the East. FIN position opened due to increasing traffic. FIN controller called ATC at the departure airfield but no reply. At time 1118 a/c observed to change squawk to 4503. FIN controller called military ATC who advised a/c was C152. Pilot was including the word 'student' in callsign.

201410628	05/08/2014	EGTT : London (FIR)	EGLC (LCY): London city	8nm E	D	CTA	FLIGHT DESIGN	Reciprocating	1	Infringement of the London City CTA (Class D) by an unknown aircraft squawking 7000 at 1700ft. Aircraft identified as a Flight Design CT2K. Traffic info given. Standard separation maintained.	FK50 was established on the ILS R/W227 when a 7000 squawk was observed just outside the edge of the zone at 1600ft (unverified Mode c) base 1500ft, just North of the APC travelling South, which then just entered the edge of the zone. I advised FK50 of the traffic and asked if the pilot had the traffic in sight ? which he confirmed and that he was happy to continue the APC. I considered this to be the safe option as I had traffic 1000ft above and departure traffic to the North at the same level. I was distracted from my task by this and was late climbing fltmnum17W which went outside CAS for a brief period in the climb. The 7000 changed onto a Farnborough LARS EAST squawk and was identified as a Flight Design CT2K reported at 1700ft on first call to Farnborough.
201410628	05/08/2014	EGTT : London (FIR)	EGLC (LCY): London city	8nm E	D	CTA	FOKKER	Turboprop	2	Infringement of the London City CTA (Class D) by an unknown aircraft squawking 7000 at 1700ft. From this, I used M,ode S to get the callsign which was a military aircraft.

201410730	07/08/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	15.7 SW	D	CTA	COMCO IKARUS	Reciprocating	1	Infringement of the Solent CTA (Class D) by a C42. Standard separation maintained.	At approximately time 1014 I noticed a Solent / Bournemouth listening squawk (0011) approaching CAS in the vicinity of Yarmouth indicating 2000 feet, this then climbed to 2100 feet, and so using the Mode S callsign I made a call to the a/c to see if they were on frequency. The a/c answered my call and I gave it the QNH and asked it to report its level - to which he answered 2300 feet, which by this point put him inside CAS . I told him he was inside CAS, changed the service to radar control and cleared him to cross not above 2500 feet. The pilot sounded confused and struggled to reset his squawk to the one I allocated him. The aircraft entered CAS bearing 205 at 15.7nm from SAM and tracked NE, leaving bearing 180 at 13nm from SAM. After the aircraft left CAS he told me he was resetting his squawk to 0011, and I attempted to explain that the base of CAS North of Yarmouth was 2000 feet, and asked him to ensure that in future he remained below that level, unless in receipt of a transit clearance from Solent. There was no response and then I observed the squawk change to 7000. My assistant spoke to Goodwood who later confirmed the aircraft had landed safely with them. No impact on operation caused by the infringement.☐ Supplementary 14/08/14:☐ I was not being sufficiently careful as I moved from the 3,500 ft to the 2,000 ft airspace. I was thinking more about avoiding the patches of cloud. ☐ Supplementary 02/09/14:☐ The aircraft entered the Solent Control Area without a clearance caused by the pilot being distracted by his passenger and also trying to avoid cloud over the Isle of Wight. The pilot
201410736	04/08/2014	EGTT : London (FIR)	Donna Nook	Danger Area EGD307	G	Danger area	PIPER	Reciprocating	1	Infringement of Danger Area EGD307 (Donna Nook) by a PA28 at 2700ft.	I received a call from Humberside that an aircraft was entering D307 on the South Western boundary of the range tracking S - N at approximately 2700 ft. I had military aircraft on the range about to commence Air to Ground operations. I told the military aircraft to remain switches safe. At approximately 1210L I received a call that the aircraft was departing D307 to the North. I spoke to the Humberside controller, who informed me that of the aircraft's identity, a PA28 out of Nottingham for Gamston. The aircraft had been handed over by Coningsby to Humberside at 2700ft Barnsley pressure 1009 in the Strubby area but had failed to come on frequency. I believe the Humberside controller established comms with the aircraft as he was departing the range to the North.☐ CAA Closure:☐ No response from owner. Closed due to elapsed time.
201410750	07/08/2014	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	12 E	D	CTA	CESSNA	Reciprocating	1	Infringement of the East Midlands CTA (Class D) and the Doncaster Sheffield CTR (Class D) by a C152. Standard separation maintained. Traffic info and avoiding action given.	Whilst vectoring a C550 and a B737 inbound from the South a #3605 alt 2000ft was observed ENE of EGNX by 12nm . The contact continued to remain 12nm East on a southerly heading. EGXW advised the a/c details but said it was no longer on frequency. Both inbound a/c given tactical headings to remain 5nm clear of the contact . Director traced the contact to 20nm South of EGNX when the a/c called on 134.175 mhz and was identified, the pilot was advised that a report would be filed.☐ Supplementary 14/08/14:☐ I was vectoring an A320 inbound R/W02. The aircraft was heading 200 descending to 3500ft. I noticed an aircraft climbing in the Gamston ATZ passing 2100ft on a 3605 squawk. I turned the A320 early, but the 3605 continued climbing to 2400ft. I upgraded the A320 turn to an avoiding action turn. Then rang Wadington for traffic info. They weren't working the aircraft.. The Assistant rang Gamston who advised the aircraft was a C152. We then received a call advising this was a Student Pilot and the Instructor would speak to them. I advised we will be filing paper work as this was a CAS infringement

201410785	06/08/2014	EGTT : London (FIR)	DTY	Approx 5-7nm West	A	Other	DIAMOND	Reciprocating	1	Infringement of the Daventry CTA (Class A) by an aircraft squawking 7000. Standard separation maintained.	At approximately 1310 an infringer entered TC COWLY airspace and reached 6.7A in an area where the base is 5.5A. Birmingham, Coventry and Oxford were contacted to find if either were working the aircraft, neither were. Oxford advised that the callsign was registered at Enstone Airfield. The aircraft remained inside controlled airspace for approximately 10 minutes before descending clear.☐ CAA Closure:☐ Pilot error. The instructor on board did not take control of the situation early enough. Poor pre flight planning. Instructor interviewed. On-line test failed. Flight with Staff FE.
201410819	09/08/2014	EGTT : London (FIR)	Beaconsfield	2nm South	A	CTR	BELL	Turboshaft	1	Infringement of the London CTR (Class A) by a Bell 206 squawking 7000.	CAIT informed us of a helicopter inside the CTR just South of Beaconsfield. Aircraft tracked East then NE then left the zone,and then called SVFR to say he was just leaving the CTR, had tried to contact 125.625, had failed (we never heard anything), and then took off. I pointed out that he could have phoned us, or he could have lifted into a low hover for better rt coverage.
201410824	07/08/2014	EGTT : London (FIR)	WELIN	NE	A	CTA	BEECH	Unknown	1	Infringement of the Daventry CTA (Class A) NE of Welin at an indicated 5000ft. Standard separation maintained.	10 miles NE of Welin, a 7000 squawk was observed at 5000 feet where the base is 4500 feet. The registration was confirmed. It was outbound from EGTK and appeared to descend in the EGXT area. We had no traffic to affect.

201410825	07/08/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	NE	D	CTR	PIPER	Reciprocating	1	Infringement of the Luton CTR (Class D). Standard separation maintained.	At 0930, an unknown aircraft, squawking 7000 Mode A only entered Luton control zone in the North Eastern corner, tracked towards the airport, then turned away to leave the zone to the East. At 0950, the same unknown aircraft entered Luton control zone again and tracked southbound underneath a 7 mile final, before turning eastbound to leave the zone again. I made blind calls in case the aircraft was maintaining a listening watch on the frequency but this was to no avail. The unknown then started squawking 5023. Farnborough LARS were called and the aircraft ascertained to be a PA38. The aircraft was unsure of his position and trying to find Panshangar.
201410826	08/08/2014	EGTT : London (FIR)	EGGD (BRS): Bristol/Lulsgate	BRI Bearing Noth East Range 5nm	D	CTR	CESSNA	Reciprocating	1	Infringement of the Bristol CTR (Class D) by a C172 squawking 5074. Traffic info given. Departures stopped. Separation lost. Aircraft subsequently landed with electrical failure.	I was operating as the Radar 2 controller with LARS traffic. The PSR was out of service but was being monitored to my left by a contractor. I had the PSR selected on my display for monitoring purposes as part of the PSR return to service programme but was not using the PSR for operational surveillance purposes. A helicopter, c/s xxx22 was providing frequent pleasure flights from a site to the NE of Bristol Airport as part of the International Balloon Fiesta taking place there. C172 departed at 1427 for a local flight to the North VFR. A police helicopter had been operating over the City landing back at Filton at 1447Z. I had made some transmissions to C172 as I had not observed the aircraft SSR return since seeing it in the area of the Severn Bridge VRP earlier, but was not unduly concerned at this point. At 1448 I was aware of a possible primary contact approximately 5nm NE of the airfield in close proximity to xxx22 and asked whether he could see another aircraft close to him; the response to this was negative. Whilst discussing this intermittent primary contact with the contractor I observed the SSR return from xxx22 'jump' to the potential primary return and back again. As the xxx22 could not see any other aircraft in his vicinity I considered that the SSR return was being seduced to clutter. Other LARS traffic was then calling me for services, including a display aircraft inbound to the Fiesta site. At 1450 I contacted the Tower controller to see if he could see any traffic to the NE inside CAS as I again was aware of a possible primary only contact which I suspected may have been the xxx22; However xxx22 advised me that he was on the ground at Ashton Court pending the arrival of the display aircraft. I then became involved with coordinating the display aircraft on a landline
201410826	08/08/2014	EGTT : London (FIR)	EGGD (BRS): Bristol/Lulsgate	BRI Bearing Noth East Range 5nm	D	CTR	EMBRAER	Turbofan	2	Infringement of the Bristol CTR (Class D) by a C172 squawking 5074. Traffic info given. Departures stopped. Separation lost. Aircraft subsequently landed with electrical failure.	I was operating as the Radar 2 controller with LARS traffic. The PSR was out of service but was being monitored to my left by a contractor. I had the PSR selected on my display for monitoring purposes as part of the PSR return to service programme but was not using the PSR for operational surveillance purposes. 201410829	09/08/2014	EGTT : London (FIR)	EGBB (BHX): Birmingham	13 SSE	D	CTA	CESSNA	Reciprocating	1	Infringement of the Birmingham CTA-2 (Class D) by a C152. Standard separation maintained.	At 1121z a 7000 squawk was observed entering Birmingham airspace (CTA-2) indicating 2000ft unverified. A blind call was made with no reply. Telephone calls made to Coventry & Wellesbourne. Approx 30 seconds later C152 called & stated he believed he had infringed BB airspace at 2000ft and was descending. C152 instructed too squawk 0401 & was identified. I informed the pilot he had been inside CAS & to call WM upon landing at Leicester. The aircraft was then transferred to Coventry Radar clear of CAS. No aircraft arriving or departing Birmingham were affected by the infringement.☐ Supplementary 20/08/14:☐ The pilot was distracted due to a conversation with the student and a strong tailwind. He was discussing with the student the need to contact Coventry ATC and descend to 1400ft to avoid CAS but the student was slow to initiate the descent and because of the strong tailwind they entered CAS above 1500ft.

201410835	09/08/2014	EGTT : London (FIR)	POL	10 W	A	Other	AERO	Reciprocating	1	Infringement of Airway N57A (Class A) by an AT3. Standard separation maintained.	I was alerted by CAIT to an infringer West of POL on a EGNH 0450 conspicuity code. I contacted EGNH and they transmitted to the aircraft and he confirmed he was passing 8300ft (base 4500ft), I instructed EGNH to inform the aircraft to descend and turn West immediately, due pending EGNM departures. The aircraft continued to track East and started to descend. A EGNM departure was given a HDG of 180deg to keep clear. The highest observed level of the aircraft was FL86.
201410907	07/08/2014	EGTT : London (FIR)	EGSD : Great Yarmouth/ North Denes		G	ATZ	ROBINSON	Reciprocating	1	Infringement of the North Denes ATZ (Class G) by an R44. Traffic info given. No RT comms.	R44 noted at a height of 1000ft. It crossed the extended centre line of R/W09 then turned left to land at the racecourse. Traffic info given to inbound A139.
201410937	31/07/2014	EGTT : London (FIR)	EG D125		G	Danger area	OTHER	Reciprocating	1	Infringement of active Danger Area EG D125 by a WT9.	A 3/A 1177 Squawk was seen to enter EG D125 Larkhill Danger Area W of Rushall VRP (SU128568) hdg WSW indicating 2000ft Mode C. The area was active with live artillery firing from SFC-30000ft and UAV operations were about to commence. We attempted to contact the aircraft via London Information, who advised us the pilot had been instructed to contact Boscombe Down Zone for a radar service, and the Squawk seen to change to 3/A7000. Boscombe ATC contacted us saying that the aircraft was being turned out of the danger area to the N. The aircraft's SSR return was now in the vicinity of Redhorn Vidette (SU060554) and seen to exit the area S of Urchfont and remained clear of SPTA. A checkfire was not called as it appeared the infringement was being controlled. Boscombe Down ATC advised us the pilot of the WT9, seemed unsure about the danger areas, had departed from Kemble this morning and was routing towards Bellegarde-Vouvray (LFHN).
201410958	11/08/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	19 SE	A	TMA	SLINGSBY	Reciprocating	1	Infringement of the LTMA (Class A) at 5700ft by a T67M. Traffic info and avoiding action given. Standard separation maintained.	At approximately 14:07 I observed a contact in the vicinity of Goodwood/Hayling Island at 5.4A, where the base was 5.5A, squawking 7004. DHC8 was seen on radar but not yet on my frequency, inbound to Southampton via GWC. I then saw the Mode C of the 7004 indicate 6.4A, but do not think it was inside CAS. I asked the coordinator to call LTC to ask if they knew about it, but during this call the DHC8 checked in on my frequency. I immediately issued a right turn and then when I saw the 7004 enter CAS at 5.7A issued avoiding action. I am unsure how long the 7004 was inside CAS as I was unable to monitor the Mode C due to other aircraft weather avoiding. The coordinator watched the aircraft descend towards Goodwood and called them to ask the details. ☐ Supplementary 20/08/14:☐ Aeros with breaks in cloud, cloud base 2,500 with tops generally 4,000 but higher in places. Opted for above cloud for noise, started S of Thorney and at 5,000 but ended slightly further North than intended at 6,000', still thought I was clear of CAS, though nearer than I would normally have operated due to cloud in the area, obviously not quite!
201410958	11/08/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	19 SE	A	TMA	DE HAVILLAND	Turboprop	2	Infringement of the LTMA (Class A) at 5700ft by a T67M. Traffic info and avoiding action given. Standard separation maintained.	At approximately 14:07 I observed a contact in the vicinity of Goodwood/Hayling Island at 5.4A, where the base was 5.5A, squawking 7004. 201410967	11/08/2014	EGTT : London (FIR)	EGGP (LPL): Liverpool		D	CTR	GROB	Reciprocating	1	Infringement of the Liverpool CTR (Class D) by a Grob G115 squawking 7000. Traffic info given. Standard separation maintained.	Whilst mentoring a trainee operating on the Liverpool radar control position, a 7000 squawk was observed to enter CAS in the vicinity of the town of Tarvin and track towards the final approach for R/W27. At the time a B737 was on left base for R/W27 ILS approach. Due to the current track and the unknown intentions of the infringing a/c, B737 was instructed to continue on the Northbound heading and given traffic info. The 7000 squawk entered an orbit just South of the M56 motorway before tracking SE towards Oulton Park VRP. The a/c entered the Manchester Low Level Route and began squawking 7366 (Manchester listening watch). EGCC approach confirmed the identity of the a/c a G115 inbound to EGCB. I have not checked the radar or tape recordings but I do not believe that separation between the infringing aircraft and B737 was lost. Pilot was contacted. ☐ CAA Closure:☐ Pilot error. Lack of situational awareness. Warning letter sent.
201410967	11/08/2014	EGTT : London (FIR)	EGGP (LPL): Liverpool		D	CTR	BOEING	Turbofan	2	Infringement of the Liverpool CTR (Class D) by a Grob G115 squawking 7000. Traffic info given. 201411066	13/08/2014	EGTT : London (FIR)	EGLC (LCY): London city	Bearing 085 Range 13nm	A	TMA	CESSNA	Reciprocating	1	Infringement of the London TMA (Class A) by a C152 squawking 4575 observed to climb to A2800. Traffic info given. Separation lost.	At approximately 1400UTC a contact showing the Southend conspicuity code 4575 appeared to enter the London TMA in the vicinity of Thurrock at A2600. The contact was subsequently observed to climb to A2800. At this time C560 was about 12nm East of LCY at A3000 on a closing heading to intercept the localiser for R/W27. Although within the prescribed lateral distance for proximity to unknown contacts I assessed the relative tracks and speeds of the two contacts and concluded that the safest option would be for C560 to continue its approach. I informed the pilot of the presence of the unknown traffic and advised him that it was not at present a problem. I also advised that I would give further advice if necessary. Co-incident with the above actions I called Southend Radar to enquire about the unknown contact. Southend advised that they would instruct the C152 to descend. ☐ CAA Closure:☐ The root cause of this incident was flying too close to CAS. The instructor became distracted and did not notice the student had inadvertently climbed, possibly due to thermic activity. The instructors at the ATO have been reminded of their responsibilities when they are PIC with a student.

201411066	13/08/2014	EGTT : London (FIR)	EGLC (LCY): London city	Bearing 085 Range 13nm	A	TMA	CESSNA	Turbofan	2	Infringement of the London TMA (Class A) by a C152 squawking 4575 observed to climb to A2800. 201411112	14/08/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	Norther end of LLR	D	CTR	PIPER	Reciprocating	1	Infringement of the Manchester CTR (Class D) by a PA28 squawking 7000 between 1600 and 1800ft at the northern end of the LLR. Standard separation maintained.	At 1543, I noticed that a 7000 squawk had set off the AIW at the northern end of the LLR. The aircraft's level was showing as between 1600 and 1800ft. The Mode S information indicated the aircraft's callsign. I made a call to the aircraft twice on 118.575 but there was no response. I then called Barton to ask them that if the aircraft was on their frequency, that they get the aircraft to call me on 118.575 - so that I could 'identify' the aircraft. A few minutes later the aircraft called me with a 4366 squawk now on. I advised him that he had infringed CAS and that the max alt in the LLR was 1300 feet. He apologised for his actions and then said that he wished to change to Warton Radar - which I acknowledged. The aircraft appeared to be out of Barton, heading northwest, entering the northern end of the LLR from the Barton LFA. Also see Open 201410404 and 201409969.☐Supplementary 17/09/14:☐It was my first flight since passing and I was heading out of Barton to the NW. I did not realise I passed by 1300 in the LLR and I must have passed through the edge of it for just a few minutes.☐CAA Closure:☐Pilot error. Situational awareness. Failed on-line test. Warning letter.
201411190	15/08/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	9.9 N	D	CTA	PIPER	Reciprocating	1	Infringement of the Solent CTA (Class D) by a PA28 at 2200ft. Standard separation maintained.	A 2650 squawk was observed tracking towards the Solent Control Area from the North, blind calls were made for a callsign on the Mode S. My coordinator telephoned a neighbouring military ATC unit, this traffic entered CAS bearing from SAM 010 D9.9D tracking SW, an a/c on a visual approach R/W02 was advised I may break him off the approach. After some time holding on the coordinator advised that the 2650 squawk was working the military unit and they were making him turn West bound to leave CAS. No loss of separation or delays but an increase in workload.☐Supplementary 27/09/14:☐Trying to stay clear of Middle Wallop ATZ and Boscombe MATZ and strayed just into Southampton CTA. Warned by Boscombe that I was infringing and turned away immediately.☐Supplementary 23/10/14:☐The a/c entered the Solent Control Area without a clearance, whilst in receipt of a 'Basic Service' from a military unit. The pilot's knowledge and awareness of the Solent CTA boundary in relation to the position of the Boscombe MATZ and Middle Wallop ATZ has been recorded to the operator of the a/c.
201411216	24/08/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	overhead			RUTAN	Reciprocating	1	Aircraft flown intentionally though CTR due to rough running engine.	At about 1650 the pilot of the aircraft experienced a rough running engine. He called his home airfield telling them he was intending to route direct track to them even though this would route him through the CTR. The FISO at the airfield immediately contacted GS (A) to coordinate this intention. At the same time I noticed the infringing aircraft (squawking 7010) and started to try and trace the aircraft whilst also asking the TWR to check any departures. In the end no aircraft were delayed. The GS (A) then came over explaining the conversation with the airfield. Together with him, airfield and the pilot, his squawk was checked and identification confirmed. The aircraft landed safely. A subsequent telephone call suggests that the pilot was aware of engine trouble before he had taken off again for this flight. The a/c when landing at its destination, allegedly suffered a "rough running engine" It was tinkered with and departed. An alleged landing was then made in a field where more tinkering was (allegedly performed). This all occurred before the infringement.☐CAA Closure:☐Due to the elapsed time since the event, no further investigation is practicable.
201411227	15/08/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	TMZ2	G	Other	BELL	Turboshaft	1	Infringement of the Stansted TMZ2 (Class G) by a Bell 206. Traffic info given.	B737(1) was being vectored for R/W04 at Stansted when an aircraft contact squawking 7000 was observed entering TMZ2 just North of North Weald airfield. The aircraft was not showing any level/Mode C reading. The aircraft was subsequently identified via Mode S, several attempts on frequencies 136.2 and 120.625 were made to establish two way contact unsuccessfully. I decided the safest course of action was to vector the B737(1) onto a short approach to keep away from the aircraft, 5nm separation was not maintained however traffic was passed to B737(1) and they maintained headings away from each other at all times. As a result of the Bell 206 the following inbound, a B737(2), was given extended vectoring also.

201411244	27/07/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	TMZ2	G	Other	OTHER	Reciprocating	1	Infringement of the Stansted TMZ2 (Class G) by a SkyRanger showing as a primary contact only.	Primary contact observed leaving the Hunsden Microlight Area (HMA) tracking SW. The contact turned right and returned to the HMA, however, the contact infringed the TMZ2 at least two more times. The contact appeared to land at Hunsden at 17:29. No other traffic was affected. The GS airports was advised, the GS airports contacted the microlight club at Hunsden and spoke to the chairperson. Aircraft identified. CFI will be speaking to the pilot.
201411258	16/08/2014	EGTT : London (FIR)	BPK	15 NE	D	CTA	DIAMOND	Reciprocating	1	Infringement of the Stansted CTA (Class D) by a DA40 at 2000ft. Traffic info and avoiding action given to a departing B737. Standard separation maintained.	Whilst working Stansted INT bandboxed I was confronted by an infringer Farnborough LARS had lost contact with at 2000 feet from the western side of TMZ 2. I initiated a check all but the tower seemed already committed with a CPT so I saw the traffic turning away releasing the CPT with an instruction to call immediately after departure. This traffic continued turning away and was a non-event. However shortly after a DA40 came into the SW CTA by North Weald at 2000 feet displaying a 4575 conspicuity code. I had to immediately give avoiding action on a B737 CPT outbound initiating a sharp turn onto 360deg. This all happened very fast resulting in a slight delay to the inbounds and two requests for check alls and traffic passed to the tower. The DA40 descended shortly after to 1600 feet continuing for a while due to the backlog of departures I launched freeflow but he then climbed again to 1700 feet. I let the tower know this with an instruction to pass traffic on the unknown contact for the next CPT if it remained at 1700 feet and qsy to me quickly. As it was the traffic descended again to 1600 feet and did not present a further confliction. EGMC was contacted for me at my request to get the unknown contacts details. Subsequently it was identified by Farnborough LARS on 5021. In the mean time I immediately got Stansted FIN back as the workload had increased rapidly with lots of developing scenarios to deal with.
201411258	16/08/2014	EGTT : London (FIR)	BPK	15 NE	D	CTA	BOEING	Turbofan	2	Infringement of the Stansted CTA (Class D) by a DA40 at 2000ft. Traffic info and avoiding action given to a departing B737. 201411261	16/08/2014	EGTT : London (FIR)	SAM	Bearing 180 Range 11nm	D	CTA	PIPER	Reciprocating	1	Infringement of Southampton CTA (Class D) by a PA28 squawking 7000 at 2500ft. Traffic info and avoiding action given. Separation lost.	R/W20, QNH 1020, 9999, SCT042. At approximately 1518z I was operating as OJTI on Solent Radar with an ATCO returning to duty. Traffic levels were medium largely due to freecallers, FIN/Coord was in use. An inbound was approximately 8S SAM at Alt 4A heading 035deg DWL for R/W20. Both the ATCO and I noticed a primary return with associated 7000 squawk approximately 3.5nm South of the inbound aircraft heading eastbound towards Cowes, indicating Alt2A then Alt2.1A unverified in a portion of the Solent CTA with a base of Alt2A. Mode S indicated that the callsign might be a PA28. As it changed to Alt2.2A the ATCO issued avoiding action turn of 350deg to the inbound aircraft and passed traffic info. The inbound aircraft was approximately 3.5nm North of the unknown heading away, so a likely LOS. The unknown continued to climb eastbound indicating Alt2.5A unverified as it left the CTA. The ATCO and FIN ATCO put out blind calls but there was no reply. Shortly afterwards at 1527z, FIN noticed that the aircraft was overhead Portsmouth on a LF squawk 0452. The radar ATSA phoned LF LARS who provided the details as a PA28, HJ - TF and asked LF to relay a request for the pilot to phone Solent after landing. At time of writing, no phone call yet received. Inbound aircraft continued for a normal approach and landing. No other aircraft affected.☐ Supplementary 18/09/14:☐ PA28 entered CAS without a clearance (working Sandown Radio) causing a loss of separation with an inbound to Southampton. The controller issued Avoiding Action and Traffic Information to the inbound in a timely manner.☐
201411261	16/08/2014	EGTT : London (FIR)	SAM	Bearing 180 Range 11nm	D	CTA	BRITTEN NORMAN	Reciprocating	3	Infringement of Southampton CTA (Class D) by a PA28 squawking 7000 at 2500ft. No other aircraft affected.☐ Supplementary 18/09/14:☐ PA28 entered CAS without a clearance (working Sandown Radio) causing a loss of separation with an inbound to Southampton. The controller issued Avoiding Action and Traffic Information to the inbound in a timely manner.☐

201411274	19/08/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	Bearing 330 Range 4nm	D	CTR	BELL	Turboshaft	1	Infringement of the Luton CTR (Class D) by a Bell 206 squawking 7000 at 1200ft. Traffic info given. Standard separation maintained. Departures were stopped.	I had noticed a 7000 squawk NW of GW Tracking South, outside CAS at this time. I called the tower as I had a feeling it was going to come into CAS and could they pre note any departures before hand, just in case. The 7000 had Mode S and I made a few blind transmissions but got no reply. It entered the GW zone NW of GW by about 4 miles tracking South at 1200 feet. I stopped all departures and advised my inbound B737 of the situation. I let him know I may have to extend him downwind but as long as the unknown left CAS to the South it would be OK but if the unknown did a U turn I would have to break him off the approach. The 7000 left the zone to the South and the B737 wasn't affected. Thames shouted to the GS airports they had his details. They had called Denham and asked if they were expecting the a/c, they said yes. He was a Jet Ranger helicopter. They explained what had happened and to advise the pilot reporting action was going to be taken. ☐ CAA Closure: ☐ Pilot error, loss of situational awareness. The pilot has subsequently passed the on-line test. Warning letter issued.
201411274	19/08/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	Bearing 330 Range 4nm	D	CTR	BOEING	Turbofan	2	Infringement of the Luton CTR (Class D) by a Bell 206 squawking 7000 at 1200ft. Traffic info given. Standard separation maintained. Departures were stopped.	I had noticed a 7000 squawk NW of GW Tracking South, outside CAS at this time. 201411275	19/08/2014	EGTT : London (FIR)	Banstead		A	CTR	CESSNA	Reciprocating	1	Infringement of the London CTR (Class A) by a C206 at 2000ft. Standard separation maintained.	I observed a 7047 squawk (EGKB conspicuity code) at altitude 2000ft heading towards Banstead looking as if it would penetrate the CTR. I called EGKB to advise them that a C206, identified on Mode S, was about to enter CAS, they advised me that it was a C206 survey aircraft. I heard the EGKB controller advise the C206 to turn left to leave CAS and hung up. The C206 made no attempt to leave the zone and continued on the previous track for 4 miles. I rang EGKB and told them to instruct the C206 to leave CAS. Finally the C206 left CAS and then came on frequency asking to make a run just inside the control zone at 1800ft for 15 miles East to West. I refused permission as I had no information on the survey and was unsure of the effect on EGLL departures.
201411281	17/08/2014	EGTT : London (FIR)	52 58N 02 32W		A	CTA	AMERICAN GENERAL	Reciprocating	1	Infringement of the Daventry CTA (Class A) by an AG5B at FL70. Standard separation maintained.	A CAIT return was seen at position 52 58N 02 32W at FL70. No ID was determined from Mode S. The next controller told me the aircraft went to Sleep. ☐ Supplementary 27/08/14: ☐ The pilot considers that the incident occurred whilst he was avoiding weather/cloud.
201411332	16/08/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTA	AVIONS ROBIN	Reciprocating	1	Infringement of the Luton CTA (Class D) by a DR400 at 3800ft. Standard separation maintained.	I was working as OJTI on GW INT. At approx 1536Z, a 7000 squawk with mode C entered the Luton CTA, north of Luton airport between 3700ft and 3800ft (where the base is 3500ft). The aircraft tracked South West before turning North East and descending back below controlled airspace. Northbound departures were stopped (though there were none). Several blind calls were made on the frequency, with no response. The GSA contacted Dunstable Downs, who confirmed the aircraft was not one of theirs.

201411357	15/08/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	N	D	CTR	UNKNOWN	Unknown		Infringement of the Gatwick CTR (Class D) on nine separate occasions by Redhill circuit traffic, resulting in losses of separation with inbound ILS a/c.	I was working Gatwick FIN and then Gatwick INT / FIN bandboxed and on 3 separate occasions Redhill R/W36 circuit traffic infringed the Gatwick CTZ. On each occasion I monitored the infringing a/c, and assessed they were not in an unsafe proximity after they had turned base leg. I did not therefore break off any Gatwick IFR inbound. On at least two occasions I believe separation was lost against inbound ILS a/c. On each occasion I called KR and advised them the a/c had infringed. The first two happened around 1200 - 1204, and were wearing 3767 squawk. The third happened at 1247, and was a primary only contact PA28. I do not think the Redhill R/W36 circuit is safe against Gatwick ILS inbound, due to the close proximity. The Redhill circuit traffic has very little time to make the base leg turn and remain in the Redhill LFA. This is obviously not helped by the Northerly winds, which is the reason for the use of the 36 runway. In addition Redhill 36 circuit traffic is a distraction to Gatwick FIN, as you need to do a lot of monitoring of the traffic, as we have regular infringers when 36 is in the runway in use at Redhill. ☐ Supplementary 27/11/14:☐ The METAR from Gatwick at the time of the infringements showed surface winds between 320 and 330deg at between 8 and 12kts. Most of the a/c in the Redhill circuit over this period flew a ground speed of around 90-100kts on the downwind leg. Several a/c flew in excess of 120kts on the downwind leg, a speed which reduced by 30-50kts when they turned on to the base leg. Most of the infringing a/c had groundspeeds in excess of 120kts as they approached the turn and therefore may not have been able to make a tight enough turn,
201411357	15/08/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	N	D	CTR	UNKNOWN	Unknown		Infringement of the Gatwick CTR (Class D) on nine separate occasions by Redhill circuit traffic, resulting in losses of separation with inbound ILS a/c. 201411375	18/08/2014	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD		D	CTA	PIPER	Reciprocating	1	Infringement of the Doncaster/Sheffield CTA (Class D) by a PA28 at 5000ft. Standard separation maintained.	No aircraft to separate. I tracked the aircraft and Leeds ascertained the identity as a PA28.
201411422	19/08/2014	EGTT : London (FIR)	Between EGKK and EGKR		A	TMA	PIPER	Reciprocating	1	Infringement of the London TMA (Class A) by a PA28 squawking 3767 observed at 1600ft and climbing to 1900ft. Separation lost.	I was operating on TC South-East bandboxed. A320 departed LL on a DVR @6A and was given a vector of 125 after EPM. B737 departed KK on a DVR departure and was identified and given climb to 5A under A320. I then observed on radar after CAIT was activated that PA28 (3767) was inside CAS without authorisation @ 1600ft (Base of CAS 1500ft). A320 was climbed to FL140 and was passing behind the infringing a/c, which was tracking to the West, with less than 5nm but separation increasing. I then observed PA28 climb up to 1900ft. During this time I had given B737 a heading 115deg and further climb to avoid PA28. I had to exercise caution on how far right I turned the B737 as it would be vectored into the KK RMA and would also be a potential confliction with other traffic departing KK. B737 had less than the prescribed separation against the unknown traffic infringing CAS. The KK approach controller then advised the South coordinator that although they weren't in contact with PA28, they had spoken to Redhill who had told the a/c to descend to leave CAS.☐ CAA Closure:☐ No response from owner. Closed due to elapsed time.

201411422	19/08/2014	EGTT : London (FIR)	Between EGKK and EGKR		A	TMA	BOEING	Turbofan	2	Infringement of the London TMA (Class A) by a PA28 squawking 3767 observed at 1600ft and climbing to 1900ft. Separation lost.	I was operating on TC South-East bandboxed. A320 departed LL on a DVR @6A and was given a vector of 125 after EPM. 201411464	20/08/2014	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	3 NW	D	CTR	CESSNA	Reciprocating	1	Infringement of the East Midlands CTR (Class D) believed by a C172. Standard separation maintained.	B737 was turning downwind righthand when the pilot reported a light aircraft, highwing, that passed close to the aircraft. The aircraft was tracked to Tatenhill aerodrome; however, as there was more than one arrival at the same time, the identity of the infringing aircraft cannot be proven beyond doubt. The pilot of the most likely aircraft has been spoken to.

201411464	20/08/2014	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	3 NW	D	CTR	BOEING	Turbofan	2	Infringement of the East Midlands CTR (Class D) believed by a C172. Standard separation maintained.	B737 was turning downwind righthand when the pilot reported a light aircraft, highwing, that passed close to the aircraft. The aircraft was tracked to Tatenhill aerodrome; however, as there was more than one arrival at the same time, the identity of the infringing aircraft cannot be proven beyond doubt. The pilot of the most likely aircraft has been spoken to.
201411466	20/08/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	6 SW	D	CTR	OTHER	Reciprocating	1	Infringement of Stansted CTR (Class D) by a Sports Cruiser at 1700ft. Standard separation maintained.	At approx 1011, I noticed a 7010 squawk enter the SS CTR to the SW of EGSS. The unknown traffic manoeuvred in this vicinity for a few minutes then left the zone to the South, while descending below CAS. I made a blind call on the frequency, however no reply was forthcoming. The traffic situation at the time was too busy to make attempts at raising the aircraft via other agencies, therefore SS departures were stopped for approx 5 minutes. I traced the traffic to EGSX, and tallied the landing time of 1020 with EGSX, who informed me of the aircrafts details.
201411467	20/08/2014	EGTT : London (FIR)	EGLC (LCY): London city		D	CTA	PIPER	Reciprocating	1	Infringement of the London City CTA (Class D) by a PA28R squawking 5021 at 2300ft. STCA activated. Separation lost.	I was working Thames Radar when a 5021 transponder code appeared at 2.3A NE of the 27 final approach within the EGLC CTA. The traffic was routing NW. EMB170 was established on the localiser, working EGLC tower and had been cleared to descend with the glide path. As the infringing aircraft appeared to be behind the landing EMB170 and moving away I decided to phone the tower on the priority line asked if they had the infringing aircraft in sight, which they did and we came to the conclusion even though the infringer was less than 5 nm from the E170 that EMB170 should be allowed to land as it was safer. Details of the infringing aircraft were passed by EGLF LARS EAST.☐ Supplementary 24/08/14:☐ I was working LARS N+E band boxed. Traffic loading was medium to heavy in terms of complexity and RT loading. PA28R had called me at time 0937 for a BS routing from EGKB to EGTR. I issued a 5021 squawk, and then proceeded to pick up other a/c calling on frequency. Approximately 3-5 mins after PA28R called me I noticed I was not picking up a squawk or even a primary return that could have been PA28R. I asked the pilot to recycle squawk 5021 with ident. Another aircraft called me at that moment, and as I took the details I observed the 5021 appear inside the EGLC CTA approx. 1.5nm West of EGML at 2300ft amsl. I immediately asked PA28R if he could accept a right turn and/or descent to leave CAS and saw that Thames Radar had inbound traffic to EGLC, I elected not to pass traffic info as PA28R was North of the conflict and continuing North, and felt it more imperative that I issue instructs to get PA28R outside CAS safely and quickly. As I was finishing the
201411467	20/08/2014	EGTT : London (FIR)	EGLC (LCY): London city		D	CTA	EMBRAER	Turbofan	2	Infringement of the London City CTA (Class D) by a PA28R squawking 5021 at 2300ft. STCA activated. 201411471	20/08/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	261 deg 11.9	D	CTA	GARDAN	Reciprocating	1	Infringement of the Solent CTA (Class D) by a GY80 at 2900ft. Traffic info given. Standard separation maintained.	At approximately 0905z I was operating as OJTI in Solent Radar with an ATCO returning to duty. Traffic levels were high-end medium with several freecallers, as well as HI arrivals and HH departures. An additional ATCO was coordinating. A 2650 squawk was observed at STX, tracking SSE indicating Alt2.9A inside CAS in HH's delegated Area D. Whilst it could have been working HH, on its present track it would soon cross Forest Gate into Solent's airspace. The ATCO therefore put out a blind call for the 2650 squawk with no reply. AIW was not alarming. HH were then phoned and they said they had no details but seemed unconcerned. I therefore asked the coordinator to phone DM while the ATCO returning to duty tried a blind transmission again. This time the GY80 replied, was put on a 3676 squawk and was identified just approaching Forest Gate still SSE bound, Mode C in tolerance. GY80 was cleared to transit not above AL13A VFR then subsequently at Alt4A maintaining VFR so that an inbound a/c approximately 9SW SAM could be positioned DWR R/W02 descending to Alt3A.☐ Supplementary 02/12/14:☐ The foreign registered a/c entered the Solent Control Area without a clearance, whilst awaiting a response from Solent Radar to his initial transmission.

201411475	20/08/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	183deg 14nm	D	CTA	PIPER	Reciprocating	1	Infringement of the Solent CTA (Class D) by a PA28R (believed). Traffic info and avoiding action given. Standard separation maintained.	R/W02, R/W26, QNH1018. At approximately 1035z I was operating as OJTI in Solent Radar with an ATCO returning to duty. An ATSA and Coordinator were also present. A 7000 squawk with associated Mode C was seen approaching the CTA 14nm South of SAM indicating Alt2.3A climbing south-west bound, the CTA base in this area being Alt2A. Mode S indicted the a/c might be a PA28R. The ATCO returning to duty put out blind calls for the PA28R with no reply and shortly afterwards AIW alarmed. The a/c now indicated Alt2.4A. There was a FL80 overflight southbound - approximately 7 North of the infringing a/c and not knowing whether it might climb further we agreed to issue a precautionary avoiding action to the DA42 onto to heading 260 deg. The unknown a/c continued SW to leave the CTA at Alt2.3-2.4A. A VFR inbound, PA32, was given traffic info as their routes and levels would conflict. PA32 passed the unknown with less than a mile describing it as a dark painted PA28. The unknown then turned back onto a reciprocal track and re-entered the same portion of the CTA, NE bound. DHC8, mid DWR 02 at Alt4A was warned of the infringer and told avoiding action may become necessary shortly. However on checking, the DHC8 said they could continue visually and turned in quickly on a visual approach. By 1042z the unknown had left the CTA and was monitored by the coordinator until it disappeared overhead HN. After sometime trying to get a number for HN, the coordinator was able to contact them to ask the pilot to phone HI ATC. The pilot subsequently phoned advising his details as a PA28R, who had previously received a service from Solent. After leaving Solent he advises that he had contacted HN and was told there would be delays due a para drop.
201411475	20/08/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	183deg 14nm	D	CTA	DE HAVILLAND	Turboprop	2	Infringement of the Solent CTA (Class D) by a PA28R (believed). Traffic info and avoiding action given. Standard separation maintained.	R/W02, R/W26, QNH1018. At approximately 1035z I was operating as OJTI in Solent Radar with an ATCO returning to duty. An ATSA and Coordinator were also present. A 7000 squawk with associated Mode C was seen approaching the CTA 14nm South of SAM indicating Alt2.3A climbing south-west bound, the CTA base in this area being Alt2A. Mode S indicted the a/c might be a PA28R. The ATCO returning to duty put out blind calls for the PA28R with no reply and shortly afterwards AIW alarmed. The a/c now indicated Alt2.4A. 201411475	20/08/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	183deg 14nm	D	CTA	DIAMOND	Reciprocating	2	Infringement of the Solent CTA (Class D) by a PA28R (believed). Traffic info and avoiding action given. Standard separation maintained.	R/W02, R/W26, QNH1018. At approximately 1035z I was operating as OJTI in Solent Radar with an ATCO returning to duty. An ATSA and Coordinator were also present. A 7000 squawk with associated Mode C was seen approaching the CTA 14nm South of SAM indicating Alt2.3A climbing south-west bound, the CTA base in this area being Alt2A. Mode S indicted the a/c might be a PA28R. The ATCO returning to duty put out blind calls for the PA28R with no reply and shortly afterwards AIW alarmed. The a/c now indicated Alt2.4A. There was a FL80 overflight southbound - approximately 7 North of the infringing a/c and not knowing whether it might climb further we agreed to issue a precautionary avoiding action to the DA42 onto to heading 260 deg. The unknown a/c continued SW to leave the CTA at Alt2.3-2.4A. A VFR inbound, PA32, was given traffic info as their routes and levels would conflict. PA32 passed the unknown with less than a mile describing it as a dark painted PA28. The unknown then turned back onto a reciprocal track and re-entered the same portion of the CTA, NE bound. DHC8, mid DWR 02 at Alt4A was warned of the infringer and told avoiding action may become necessary shortly. However on checking, the DHC8 said they could continue visually and turned in quickly on a visual approach. By 1042z the unknown had left the CTA and was monitored by the coordinator until it disappeared overhead HN. After sometime trying to get a number for HN, the coordinator was able to contact them to ask the pilot to phone HI ATC. The pilot subsequently phoned advising his details as a PA28R, who had previously received a service from Solent. After leaving Solent he advises that he had contacted HN and was told there would be delays due a para drop.
201411478	20/08/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	CTA	D	CTA	AVIONS ROBIN	Reciprocating	1	DR400 infringed the Stansted CTA (Class D). Standard separation maintained.	At 1440z I watched a 5024 Farnborough squawk enter the Stansted CTA just North of Audley End at 1900 feet tracking east bound. I immediately phoned Farnborough and the aircraft began descending to ultimately leave CAS. Farnborough identified the aircraft.☐ Supplementary 02/09/14:☐ After being given TMZ 1 transit not above 1400 feet the aircraft entered the Stansted CTA at 1900 feet, 4 miles NE of Audley end, tracking East. I told the aircraft to descend which he complied with immediately.
201411484	20/08/2014	EGTT : London (FIR)	EGSX : North Weald		D	CTA	PIPER	Reciprocating	1	Infringement of the Stansted CTA (Class D) by a PA28 at 1800ft. Standard separation maintained.	PA28 had called Essex at 1327. It was a PA28 SL to TR. The pilot also said they were a VFR PPL which led us to believe they may be newly valid. He was given a 7402 squawk and offered a basic service. I took over at 1330 and the previous controller mentioned that they may be newly valid so I kept an eye on him. At one point he looked like he was heading for SS and I asked him about this. He replied with something along the lines of picking up the 043 line to LAM. I can't remember the exact words. Once the PA28 was established towards LAM I suggested he free call SG as they had traffic. He squawked 7000 and went enroute. This was at 1339. At approx 1345 CAIT activated with his callsign SW on SS in the CTA at 1800 feet tracking NW. He entered CAS near SX. I stopped departures but I had a B737 already airborne on a CPT/BUZAD. I was happy for him to continue, I stopped all subsequent departures. He left my airspace to the West and I went free flow. I let Thames know about him as at one point he was heading in their direction.

201411486	20/08/2014	EGTT : London (FIR)	EGYD : Cranwell		G	ATZ	COMCO IKARUS	Reciprocating	1	Infringement of the Cranwell ATZ (Class G) by an Ikarus C42 squawking 7000 observed making a low approach to R/W26.	I was conducting the morning airfield inspection and had just entered R/W26 to inspect the threshold and lighting. As always, I checked to my right and left and noticed an a/c that appeared to be making an approach to R/W26. Given the fact that the airfield was closed and that I was in a bright yellow vehicle with a flashing orange light, I assumed that the a/c must be continuing the approach due to an emergency that involved a loss of comms and I vacated the runway immediately. I made a note of the a/c serial number and contacted the tower to record it. As the a/c passed my vehicle, it subsequently conducted a low approach to R/W26 descending to between 5 and 10ft, broke right, flew low level over the main ASP and then climbed for a left turn towards Sleaford. I radioed the tower and suggested that they try and contact the a/c on VHF guard to ascertain its intentions. This was attempted but the a/c did not respond and continued to fly around the local area squawking 7000. It appeared to land around 8nm South of RAF Coningsby. The a/c appeared to be carrying out its low approach regardless of my position on the main runway and had I not seen it and vacated, there could have been a risk of collision.☐ Supervisors Narrative:☐ I was the Supervisor and in the approach room when I was informed by the Local assistant that the controller conducting an airfield inspection had reported a light a/c making an approach to R/W26 whilst he was carrying out an inspection of that RWY. I was given the a/c registration and tried to contact the pilot on both 124.45 and 125.050. There was no response from the pilot. Calls were made to both Coningsby and Waddington regarding the
201411491	19/08/2014	EGTT : London (FIR)	EGCB : Manchester/Barton	5 NE	D	CTR	MOONEY	Reciprocating	1	Infringement of the Manchester CTR (Class D) by a Mooney 20. Traffic info and avoiding action given. Standard separation maintained.	DHC8 left MIRSI hdg 080, vectoring downwind for R/W23R. A 7000 squawk was observed NE of Barton climbing through 2200ft into CAS about 6nm ahead of the DHC8. I immediately issued avoiding action and gave traffic info on the unknown a/c. A lateral distance of 5nm was achieved. After coordination with Barton I identified the unknown a/c and vectored the DHC8 back into the circuit for a normal approach.
201411491	19/08/2014	EGTT : London (FIR)	EGCB : Manchester/Barton	5 NE	D	CTR	DE HAVILLAND	Turboprop	2	Infringement of the Manchester CTR (Class D) by a Mooney 20. Traffic info and avoiding action given. Standard separation maintained.	DHC8 left MIRSI hdg 080, vectoring downwind for R/W23R. A 7000 squawk was observed NE of Barton climbing through 2200ft into CAS about 6nm ahead of the DHC8. I immediately issued avoiding action and gave traffic info on the unknown a/c. A lateral distance of 5nm was achieved. After coordination with Barton I identified the unknown a/c and vectored the DHC8 back into the circuit for a normal approach.
201411559	21/08/2014	EGTT : London (FIR)	EGVP : Middle wallop		G	ATZ	PIPER	Reciprocating	1	Infringement of the Middle Wallop ATZ (Class G) by a PA28. Traffic info given.	At 1141Z I noticed on the VRD a return squawking 2650 and indicating 1600ft QFE approximately 3nm SW of Middle Wallop tracking NE. I direct dialled Wallop Approach to see if they were aware of the aircrafts intentions. They were not however as the aircraft was wearing a Boscombe squawk the APP controller direct dialled Boscombe to gather information. The aircraft was observed on the VRD to continue NE before entering the Middle Wallop ATZ to the SW at 1142Z and 1600FT QFE. Traffic at Middle Wallop at the time of the infringement included 2 Grob Tutor aircraft, 1 in the visual circuit up to 1000FT QFE and 1 deadside, descending from 2000ft QFE to 1500ft QFE. Traffic info on the infringing aircraft was passed to the a/c who reported visual. The aircraft continued NE bound passing through the overhead until approximately 0.5NM NE of the airfield before turning to the East and departing. After the incident I received a call from Wallop Approach who had established the callsign and that the aircraft was working Boscombe Zone (126.700) at the time of the incident. The aircraft subsequently landed at Thruxton (EGHO) and contact with the pilot was made. The 1050Z weather report for Middle Wallop reported colour state blue, cloud few 3000FT, broken 5000FT and a prevailing visibility of 50KM.☐ Supplementary 02/09/14:☐ Leg Frome to Fordinbridge: Prior to the leg of the possible infringement of the Middle Wallop ATZ routing Frome to Fordinbridge I was receiving a Basic Service from Boscombe Radar. On two occasions I requested a change of frequency to Bournemouth LARS to ensure I would remain outside the Bournemouth CTR. On both occasions the controller refused
201411579	20/08/2014	EGTT : London (FIR)	EGXT : Wittering		G	ATZ	CESSNA	Reciprocating	1	UK AIRPROX 2014/153 - Grob G115 and a C150 in Class G airspace.	This AIRPROX has been subject to a separate review by the United Kingdom AIRPROX Board (UKAB). AIRPROX Board (UKAB) information indicates that this AIRPROX was caused by the C150 pilot entering the Wittering ATZ without obtaining clearance.

201411579	20/08/2014	EGTT : London (FIR)	EGXT : Wittering		G	ATZ	GROB	Reciprocating	1	UK AIRPROX 2014/153 - Grob G115 and a C150 in Class G airspace.	This AIRPROX has been subject to a separate review by the United Kingdom AIRPROX Board (UKAB). AIRPROX Board (UKAB) information indicates that this AIRPROX was caused by the C150 pilot entering the Wittering ATZ without obtaining clearance.
201411583	31/08/2014	EGTT : London (FIR)	HAZEL	12nm North West	A	TMA	AVIONS ROBIN	Reciprocating	1	Infringement of the London TMA (Class A) by a DR400 climbing through FL64 to FL75. Separation lost with two a/c as a result of this infringement.	A/c infringed CAS initially SW of CPT at FL64 but then went outside in the fillet of airspace to the West where the base is FL65. We were keeping an eye on the a/c and it then turned SE towards hazel and entered CAS again about 12nm NW of Hazel. The a/c then climbed to FL75. Neither EGLF or EGHI were providing a service to the a/c and when it appeared to be making an approach towards Sandown the OS called Sandown Radio to try and trace the a/c but the operator was too busy to speak to that OS. SW deps/OCK had become quite busy with SAM deps off of EGKK one of which I believe may have only had 4500' and 1nm.☐ Supplementary 05/09/14:☐ Flying with first time flyer passenger who was extremely nervous. I elected to fly above the cloud base as it was broken all the way to the coast. I was well aware of my position throughout the journey but allowed my concern for my passenger to override my airmanship in climbing into the upper CAS as the cloud was rising steadily. I was also trying to avoid Southampton's lower air space, and did not pay enough attention to the upper CAS levels. Thus, infringed the areas set at 4,500 base for the airspace. My reason for not descending through the many broken cloud gaps was that the turbulence created, would further stress my first time passenger. I could see the cloud base ending at the coast and knew I could descend gently across the sea in steady air.
201411583	31/08/2014	EGTT : London (FIR)	HAZEL	12nm North West	A	TMA	UNKNOWN	Unknown		Infringement of the London TMA (Class A) by a DR400 climbing through FL64 to FL75. Separation lost with two a/c as a result of this infringement.	A/c infringed CAS initially SW of CPT at FL64 but then went outside in the fillet of airspace to the West where the base is FL65. 201411641	23/08/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	10 SSE	D	CTA	OTHER	Reciprocating	1	Infringement of the Manchester CTA (Class D) by a Sportcruiser. Standard separation maintained.	CTA to the South of EGCC infringed by an aircraft climbing to 3000ft where the base is 2500ft. The aircraft was tracking West to East South of Manchester CTR, not in contact with ATC. No separation issues. Aircraft identification was taken from Mode S data.☐ Supplementary 02/09/14:☐ I was the STF/TNT controller at 1340 and the Sportscruiser was observed to set off CAIT indicating 2700A where the base is 2500A in the CC control zone in the☐ DAYNE vicinity. I stopped an inbound to DAYNE off and coordinated with CC APC who were aware of the aircraft.☐ Supplementary 11/09/14:☐ Take off from Trevett NI to local airfield Forwood Fm Nottinghamshire, we coasted in via Colwyn Bay and transited Hawarden ATZ at 2000 feet after exiting the zone we changed to en route frequency 129.825 and remained clear the Manchester CTA at 2000ft. As we approached Ashcroft airfield, I lost power to the GPS, I then proceeded to fix the problem eventually giving up. As I approached what I thought was the edge of the Manchester CTA, I started climb in order to remain clear of Danger D304 which was surface to 3500ft so proceeded to climb at the point. I was unaware of any infringement till receiving a letter from ATC, my passenger had his GPS working but we were unable to retrieve it when in flight, this did reveal we have encroached the edge of the CTA by 400ft for around 3 mins.

201411645	23/08/2014	EGTT : London (FIR)	REXAM	5 N	A	Other	HUGHES	Reciprocating	1	Infringement of Airway N864 (Class A) by a Hughes 369 at 5000ft. Standard separation maintained.	Hughes 369 on a 7000 squawk infringed the Wallasey sector airspace 5m north of REXAM initially at A50 tracking east and slowly descended until leaving CAS near WHI. Liverpool were informed and subsequently so were Manchester, neither had any traffic to effect, nor did any PC sectors. It was later ascertained that the aircraft was inbound to a private airfield near Crewe and the pilot was going to telephone W2 LAS after landing to discuss the infringement to prevent further occurrence.
201411647	26/08/2014	EGTT : London (FIR)	EGD406		G	Danger area	PIPER	Reciprocating	1	Infringement of Danger Area D406 by a PA28 at 5000ft.	
201411648	23/08/2014	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD		D	CTR	SOCATA	Reciprocating	1	Infringement of the Doncaster Sheffield CTR (Class D) by a Socata TB10 at 2500ft. Standard separation maintained.	A 7000 squawk was observed infringing CAS South of Sandtoft airfield. Shortly after, TB10 called on frequency reporting departing from the Sandtoft circuit. The aircraft was given a squawk and identified as the previously observed 7000. The pilot was asked if he was aware he was already in CAS. The pilot replied that he was and I reminded him that in future he must obtain a clearance before entering CAS. No other traffic had been affected and the pilot was given a crossing clearance.
201411650	23/08/2014	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD	12 SW	D	CTA	CESSNA	Reciprocating	1	Infringement of the Doncaster CTA (Class D) by a C150.	A/c first called 5nm SE of Gamston at 2500ft tracking 110deg towards Gamston. This position and track did not seem right so I identified the aircraft on a Doncaster discrete squawk which placed the aircraft inside CAS to the East of Netherthorpe airfield. I was vectoring a DHC8 to R/W02 which was descending to 2500ft West of Gamston at the time. There was no immediate conflict but if the infringing aircraft was a couple of miles to the East it would have conflicted with the DHC8 at a similar level. The flight examiner reported that the original position was incorrect and he was now descending below CAS and returning to Hucknall. I spoke to the student on the telephone. He apologised and said he got overloaded as he was on a skills test and was given a practice diversion.
201411662	24/08/2014	EGTT : London (FIR)	Warrington	N	D	CTR	PIPER	Reciprocating	1	Possible infringement of the Manchester CTR (Class D) by an unknown aircraft squawking 7000 at 1500ft. Aircraft identified as a PA28R. Traffic info given.	At 1515 I noticed a AIW on a 7000 squawk coming out of the Barton LFA into the LLR at 1500 feet. Mode S indicated the aircraft to be PA28R. Fin Dir phoned Barton for me to establish whether the aircraft was on their frequency. It was, so they asked PA28R to descend to not above 1300 - which it did shortly after. I gave a DHC8 a precautionary heading to ensure that separation was maintained and passed traffic info - though PA28R descended below CAS shortly after the DHC8 was given the heading.

201411662	24/08/2014	EGTT : London (FIR)	Warrington	N	D	CTR	DE HAVILLAND	Turboprop	2	Possible infringement of the Manchester CTR (Class D) by an unknown aircraft squawking 7000 at 1500ft. Aircraft identified as a PA28R. Traffic info given.	At 1515 I noticed a AIW on a 7000 squawk coming out of the Barton LFA into the LLR at 1500 feet. Mode S indicated the aircraft to be PA28R. Fin Dir phoned Barton for me to establish whether the aircraft was on their frequency. It was, so they asked PA28R to descend to not above 1300 - which it did shortly after. I gave a DHC8 a precautionary heading to ensure that separation was maintained and passed traffic info - though PA28R descended below CAS shortly after the DHC8 was given the heading.
201411666	24/08/2014	EGTT : London (FIR)	EGGP (LPL): Liverpool	10 ENE	D	CTR	CESSNA	Reciprocating	1	Infringement of the Liverpool CTR (Class D) by a C172 at 1300ft. Standard separation maintained.	7366 squawk (Manchester listening watch for aircraft operating below 1300' within the Manchester low level corridor) observed approaching the eastern side of the Liverpool CTZ boundary near the VRP Burton wood (10 miles NE of EGGP). I contacted Manchester ATC who were in turn able to establish contact with the subject aircraft. They identified the aircraft by allocating a discreet code (7350), by which point the aircraft had flown into the Liverpool CTZ. The Manchester radar controller advised the pilot of his position and issued an instruction to route back East until outside of the CTZ and within the Manchester low level corridor. Details of the aircraft obtained from Manchester ATC as the aircraft continued the flight. No aircraft within the Liverpool CTZ were affected by the infringement. □ WX @ EGGP: 0920Z 18004KT 9999 FEW030 14/10 Q1018
201411675	24/08/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	Bearing 070 Range 18nm	A	TMA	JABIRU	Reciprocating	1	Possible infringement of the London TMA (Class A) by a Microlight observed at 2700ft unverified. Traffic info and avoiding action issued.	Aircraft on base leg to RWY 26L was turned away when aircraft observed at 2700 feet unverified on converging track to base leg traffic.
201411675	24/08/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	Bearing 070 Range 18nm	A	TMA	UNKNOWN	Unknown		Possible infringement of the London TMA (Class A) by a Microlight observed at 2700ft unverified. Traffic info and avoiding action issued.	Aircraft on base leg to RWY 26L was turned away when aircraft observed at 2700 feet unverified on converging track to base leg traffic.
201411682	23/08/2014	EGTT : London (FIR)	BPK	3 SE	A	TMA	JODEL	Reciprocating	1	Alleged infringement of the LTMA (Class A) by a Jodel D120.	Whilst working as NE deps, I observed CAIT activate just NW LAM at 2600, on a 7000 squawk. The a/c dropped out of CAS and re-entered a couple of times, never above 2600' until 3nm SE BPK at time 1001, when it remained there until time 1004. It turned NE and continued to intermittently infringe as it tracked towards BKY. In this period I vectored one Stansted inbound to prevent the returns merging, a B737. Secondary contact was lost for around 1 minute SW BKY before returning, and the aircraft was observed to land at EGSU at 1020. A call to Duxford revealed the registration.

201411689	23/08/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	Bearing 270 Range 10nm	D	CTA	OTHER	Reciprocating	1	Infringement of the Gatwick CTA (Class D) by an aircraft squawking 1730 with Mode C indicating 2200ft. Gatwick departures were halted for more than 5mins.	Whilst mentoring a trainee, I saw a 1730 squawk enter the western portion of the Gatwick CTA. The mode C indicated 2200 but then disappeared a minute later. The aircraft was involved in a display at Dunsfold and was not given a clearance into CAS. I telephoned Farnborough but they had transferred the aircraft to Dunsfold. They also told me it was a formation of three aircraft. Gatwick departures were stopped for over five minutes. I eventually got through to Dunsfold Tower and they told the aircraft to finish the display. I believe there may have been a loss of separation with an aircraft on a Bogna SID.☐ CAA Closure:☐ Pilot did not realise he had infringed until he was interviewed and shown the evidence. Pilot error. Interviewed, passed on-line test and conducted a flight with a Staff Training Inspector.
201411691	24/08/2014	EGTT : London (FIR)	EGNJ (HUY): Humberside	2nm East	G	ATZ	ROBINSON	Reciprocating	1	Infringement of the Humberside ATZ (Class G) on several occasions by a R22 squawking 7000. Traffic info given.	Appropriate CAA action is being taken as a result of this incident.
201411771	23/08/2014	EGTT : London (FIR)	Dawlish		G	Other	PIPER	Reciprocating	1	Infringement of the Dawlish Airshow NOTAMED area (Class G) by a PA28 (believed). Display a/c held off until area clear.	Whilst providing a VFR ATC service at the Dawlish airshow the controllers noticed a light aircraft (believed to be a PA28) flying SW to NE at approximately 2500-3000ft, infringing the NOTAM'd airspace established to protect displaying aircraft. The Jet Provost that was imminently due to display was instructed to hold off and appraised of the situation. Whilst one controller maintained visual contact on the infringing aircraft, the other rang Exeter ATC to see if they were in communication with it. They weren't and as a result the Display Director, in conjunction with Tac ATC held the Jet Provost off until satisfied that the conflicting aircraft was well clear. Once cleared back in the display continued with no further incident.
201411885	27/08/2014	EGTT : London (FIR)	EGKA (ESH): Shoreham		G	ATZ	DE HAVILLAND	Reciprocating	1	Infringement of the Shoreham ATZ (Class G) by a DH82A.	A Tiger Moth was observed passing South abeam the airfield along the coast routing eastbound, estimated at around 1000ft. Aircraft identified as a "Maroon and silver coloured Tiger Moth". A DA40 and PA28 in the Shoreham R/W07 circuit both sighted the aircraft as it flew opposite direction through the downwind leg of the R/W07RH circuit. PA28 pilot stated aircraft was within the ATZ. Pertinent traffic info was passed to circuit traffic and an IFR departure was held on the runway. The Tiger Moth did not appear to alter course or make contact with Shoreham on any of the published frequencies. Aircraft was subsequently traced as a Goodwood based aircraft flying to Audley End, apparently on a maintenance flight. METAR EGKA 271120Z 10014KT 5000 HZ BKN014 18/14 Q1014= METAR EGKA 271150Z 11012KT 4800 HZ SCT014 19/15 Q1014=.☐ Supplementary 28/08/14:☐ The pilot has since got in touch with the ATSU and apologised for the infringement. He stated that he had attempted to contact Shoreham but used the wrong frequency and therefore received no reply. He elected to call London Information for a service instead. This combined with a reduction in visibility and lowering cloudbase caused him to unknowingly enter the Shoreham ATZ. He was not aware of the infringement or his proximity to Shoreham until informed about it post flight.
201411901	02/09/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTR	DIAMOND	Reciprocating	1	Infringement of Luton CTR (Class D) by a cross-country solo student. Loss of separation.	At time 1250 a 7000 squawk was observed entering the Luton zone from the North on a south easterly direction. The tower broke of an a/c on the final approach to the North and all departures were stopped until the infringing a/c left the zone to the East.☐ Supplementary 12/12/14:☐ A loss of separation was caused when an a/c squawking 7000 (later identified as a DA40) infringed the Luton CTR bringing it in to confliction with an airliner on a short final approach to Luton. The incident was resolved when the airliner landed as the Luton INT controller deemed this the safest course of action. Luton INT informed Luton Tower of the infringing a/c in the CTR, and instructed another airliner to break off the approach.☐ CAA Closure:☐ Remedial training as determined by CFI.

201411901	02/09/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTR	UNKNOWN	Turbofan	2	Infringement of Luton CTR (Class D) by a cross-country solo student. Loss of separation.	At time 1250 a 7000 squawk was observed entering the Luton zone from the North on a south easterly direction. The tower broke of an a/c on the final approach to the North and all departures were stopped until the infringing a/c left the zone to the East.□ Supplementary 12/12/14:□ A loss of separation was caused when an a/c squawking 7000 (later identified as a DA40) infringed the Luton CTR bringing it in to confliction with an airliner on a short final approach to Luton. The incident was resolved when the airliner landed as the Luton INT controller deemed this the safest course of action. Luton INT informed Luton Tower of the infringing a/c in the CTR, and instructed another airliner to break off the approach.□ CAA Closure:□ Remedial training as determined by CFI.
201411903	15/08/2014	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS		D	CTR	GROB	Reciprocating	1	Infringement of East Midlands CAS (Class D) by an unknown a/c squawking 7000. A/c identified as a Grob G109.	A 7000 return was observed to enter the zone from the NE routing towards the EME then continuing SW leaving the zone South of the airfield, and routing to the West, then north of Birmingham and towards the direction of Shawbury. A call to Shawbury to see if he had called them was to the negative. A/c type identification was made from the tower and information for the callsign was obtained from the Multilat radar. A number of blind calls were made on 134.175, with no response. Fortunately at the time of the incident there was no inbound or outbound traffic to affect. However, if the infringement had taken place 15/20 minutes later or 10 minutes earlier, then the situation would have been a great deal more serious. Appropriate CAA action is to be taken as a result of this incident.
201411914	30/08/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick		A	CTR	OTHER	Reciprocating	1	Infringement of the Gatwick CTA (Class D) and LTMA (Class A) by a Sportsruiser at 2600ft. Standard separation maintained.	A/c airborne on 7000 sqk from EGTD climbed to Mode C 2700 in KK (1500') CTA. It tracked NW leaving CAS then called EGLF LARS. LF i/d on 0436 squawk. Some outbounds in the vicinity but no loss of separation. □ Supplementary 05/09/2014: □ The aircraft appeared on radar indicating at 0600ft and tracked East for about 5 sweeps climbing well, then turned North and infringed the CTA indicating up to 2600ft (base CAS 1500ft). The a/c then infringed the LTMA before descending beneath CAS and indicated receiving a service from FLARS (squawk 0436), which is how it was identified. I have it climbing at a maximum of +862ft/min within the CTA. The 2 outbound aircraft were firmly within the LTMA by the time they came into lateral conflict, but obviously there are concerns with an aircraft with this sort of performance becoming airborne where it did and subsequently infringing.□ CAA Closure:□ Pilot distraction by GPS usage. Use of unfamiliar equipment. Failed on-line test, retraining required.
201411914	30/08/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick		A	TMA	OTHER	Reciprocating	1	Infringement of the Gatwick CTA (Class D) and LTMA (Class A) by a Sportsruiser at 2600ft. Standard separation maintained.	A/c airborne on 7000 sqk from EGTD climbed to Mode C 2700 in KK (1500') CTA. It tracked NW leaving CAS then called EGLF LARS. LF i/d on 0436 squawk. Some outbounds in the vicinity but no loss of separation. □ Supplementary 05/09/2014: □ The aircraft appeared on radar indicating at 0600ft and tracked East for about 5 sweeps climbing well, then turned North and infringed the CTA indicating up to 2600ft (base CAS 1500ft). The a/c then infringed the LTMA before descending beneath CAS and indicated receiving a service from FLARS (squawk 0436), which is how it was identified. I have it climbing at a maximum of +862ft/min within the CTA. The 2 outbound aircraft were firmly within the LTMA by the time they came into lateral conflict, but obviously there are concerns with an aircraft with this sort of performance becoming airborne where it did and subsequently infringing.□ CAA Closure:□ Pilot distraction by GPS usage. Use of unfamiliar equipment. Failed on-line test, retraining required.
201412048	29/08/2014	EGTT : London (FIR)	EGGP (LPL): Liverpool	8 SSW	D	CTR	CESSNA	Reciprocating	1	Infringement of the Liverpool CTR (Class D) by a C172 at 800ft. Standard separation maintained.	Whilst vectoring 3 aircraft inbound for runway 27, I observed a London information 1177 squawk 4 miles south of the control zone. The contact was between 700 and 1000ft slow moving. it continued into the Liverpool zone and was now at 800ft. None of my inbound traffic were affected. I telephoned London info NW and when the phone was answered he was also speaking to the zone infringer. The FIR controller said the pilot had stated he would remain outside CAS. FIR then transferred the aircraft to me and I changed his squawk to 4361 and provided a radar control service through the zone until he coasted out near Wallasey.

201412052	30/08/2014	EGTT : London (FIR)	EGGD (BRS): Bristol/Lulsgate		D	CTR	PIPER	Reciprocating	1	Infringement of the Bristol CTR (Class D) by a PA28. Traffic info given. Standard separation maintained.	Whilst operating Radar 1 & 2 combined, I observed a contact displaying a London Information transponder code (1177) approaching the Severn Bridges from the North, (my thoughts were that this was a good candidate for a zone crossing request). Mode S flight data indicated that it was a PA28. PA28 then attempted to call me on 125.65Mhz, but unfortunately we were unable to make two way communication during many attempts which included the instruction from me to remain outside CAS. Shortly following this 125.65Mhz became unusable due to what appeared to be interference or jamming. During this the following actions were completed whilst problem solving the situation, utilising Radar 2 and ATSA support: Transmitter & receiver changes (Main/STBY) / De-coupling of frequencies / TELS request to check RX/TX system / Adjacent unit coordination / Traffic management (Transfers / traffic acceptance). The ADC controller was advised of the potential infringement risk and to monitor the contact which was now transponding 7000 (and also heard pilot advising of selecting this on RTF); a 'Check All' was coordinated. At 0924, the contact entered CAS and passed 1nm West of BRI, exiting CAS in the vicinity of Cheddar VRP at 0931 at 2.2A. A B737 (an EXMOR arrival descending to FL070) was tactically vectored clear of the unknown target maintaining the required separation. During this situation another a/c had called, was advised to remain outside CAS, but was identified inside CTA-8 airspace as an infringement (Occurrence 201412058). Two commercial departures were delayed on the ground at Bristol due to the PA28. Direction finding traces indicated that the PA28 was the most likely cause of the jamming experienced on
201412056	07/09/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTR	SCHEIBE	Reciprocating	1	Infringement of the Luton CTR (Class D) by two motorgliders resulted in delays to commercial traffic.	I was on duty as Luton Radar controller. At approximately 1118 I noticed a primary radar return enter the NE corner of the Luton CTR. The return continued past the Graveley flying area and was heading towards a 3nm final for R/W26 at Luton. I advised the Tower and asked if they could get visual. I also told Essex Radar. Two a/c were given delaying holding vectors for about 8 minutes as a result of the intrusion. One a/c was held by Essex. The tower reported visual and said the intruder was a pair of motor gliders. PA28 out of EGLG requested CTR transit from North to South. VFR clearance was given which took the PA28 towards the unknown return. Traffic info was passed and I asked if he could help identify the intruding a/c. He acquired visual contact and subsequently got one of the registrations at an estimated altitude of 1200ft. By this time the intruders had passed through the extended centreline 3 1/2 nm East of Luton Airport and continued to leave the zone to the South at 1130. Departures from Luton Airport were stopped as a precaution from 1126-1131. Both motorgliders landed at North Weald at roughly 1155. Appropriate CAA action is being taken as a result of this incident.
201412056	07/09/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTR	SLINGSBY	Unknown	1	Infringement of the Luton CTR (Class D) by two motorgliders resulted in delays to commercial traffic.	I was on duty as Luton Radar controller. At approximately 1118 I noticed a primary radar return enter the NE corner of the Luton CTR. The return continued past the Graveley flying area and was heading towards a 3nm final for R/W26 at Luton. I advised the Tower and asked if they could get visual. I also told Essex Radar. Two a/c were given delaying holding vectors for about 8 minutes as a result of the intrusion. One a/c was held by Essex. The tower reported visual and said the intruder was a pair of motor gliders. PA28 out of EGLG requested CTR transit from North to South. VFR clearance was given which took the PA28 towards the unknown return. Traffic info was passed and I asked if he could help identify the intruding a/c. He acquired visual contact and subsequently got one of the registrations at an estimated altitude of 1200ft. By this time the intruders had passed through the extended centreline 3 1/2 nm East of Luton Airport and continued to leave the zone to the South at 1130. Departures from Luton Airport were stopped as a precaution from 1126-1131. Both motorgliders landed at North Weald at roughly 1155. Appropriate CAA action is being taken as a result of this incident.
201412058	30/08/2014	EGTT : London (FIR)	CTA-8		D	CTA	SOCATA	Reciprocating	1	Infringement of the Bristol CTA-8 (Class D) airspace by a TB20. Standard separation maintained.	At the time of this infringement, I was operating Radar 1 & 2 combined with support from ATCO RAD 2 position and ATSA, whilst dealing with another nfringement (Occ 201412052) and frequency jamming on 125.65Mhz. TB20 contacted me on, I believe to be 136.075Mhz whilst I was problem solving the above mentioned frequency jamming. The pilot was advised twice to remain outside CAS but was shortly identified approximately 2nms inside CTA-8 at FL050. (At the time of initial contact, I observed a 7000 transponder code entering CTA-8 at FL049). Once identified I cleared the aircraft to continue its planned track southbound through CAS VFR at FL050. There was no loss of separation or other traffic with-in CTA-8. EGGD WX 0920 26013KT 9999 SCT013 15/11 Q1016.☐ Supplementary 30/08/1☐ I was on a IFR flight and as I approached WOTAN I called Glos Approach for frequency change and called Bristol Radar on 125 65 as usual. It quickly became clear that there was a problem with that frequency and so I called Glos Approach again who called Bristol and then came back with alternative 136.075. I immediately established contact on this frequency and was given a squawk and told to ROCS. By this time I was very close and had expected a rapid clearance as usual. However it turned out that there was an infringer (unknown) and so controller workload was high. I began an orbit as a precaution, thinking I would be outside CAS routing over Colerne and asked the controller if he was happy for me to route that way at present altitude. Unfortunately I had forgotten about the wedge of CAS base 4500 to the North of the zone and so was already infringing. The controller quickly cleared me to track
201412065	30/08/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	10N	D	CTR	PIPER	Reciprocating	1	Infringement of the Gatwick CTA (Class D) and LTMA (Class A) by a PA28 indicating 2300ft. Loss of separation.	Supplementary 02/09/14:I apologise profusely for this error of navigational judgement and I am taking appropriate mitigation steps to ensure this does not happen again. ☐ Supplementary 15/12/14: Separation was lost at 14.20.58. The rate of closure between the two a/c was medium (155kts). Minimum separation occurred at 14.21.52. The KK FIN controller was not able to detect the conflict or formulate a plan because this was a CAS infringement by unknown traffic. The pilot of the PA28 made a navigational misjudgement. This resulted in the pilot inadvertently entering CAS by more than 800ft. The incident was resolved by the GS Airports (Group Supervisor Airports) telephoning Biggin Hill ATC, who in turn advised the pilot of the PA28 of his location within CAS, PA28 then turned left and began a descent, leading to separation being restored at 14.22.11.☐ CAA Closure: The pilot was not aware of local procedures at Biggin, the root cause of this incident being lack of situational awareness. Further training being undertaken to improve skills and situational awareness issues. ☐ Supplementary 27/01/2015: The KK FIN controller was not able to detect the conflict or formulate a plan because this was a controlled airspace infringement by unknown traffic. The pilot of the PA28 made a navigational misjudgement. This resulted in the pilot inadvertently entering controlled airspace by more than 800ft. The incident was resolved as the A320 continued the approach and lateral separation increased. The GS Airports (Group Supervisor Airports) telephoned Biggin Hill ATC, who in turn advised the pilot of PA28 of his location within controlled airspace, PA28 then turned left and began a descent, leading to

201412095	31/08/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	7.9nm Bearing 342	D	CTA	VANS	Reciprocating	1	Infringement of Solent CTA (Class D) by a RV8 at 4300ft.	At 1643 I observed a contact inside CAS at 4300ft over Winchester. The Mode S indicated it was RV8. The a/c had been tracking towards CAS but as it was primary only I had believed it to be low level and below CAS. I put out multiple blind calls, the Finals ATCO put out multiple calls and we phoned Farnborough and Bournemouth but we were not able to establish two way communication with the a/c. The a/c remained inside CAS descending to 3800ft and leaving at the NW corner of the CTA. Appropriate CAA action is being taken as a result of this incident.
201412097	31/08/2014	EGTT : London (FIR)	SAM	Bearing 175 Range 11nm	D	CTA	ROCKWELL	Reciprocating	1	Infringement of the Solent CTA (Class D) by a Rockwell 114 squawking 7000 indicating 2400ft. Traffic info and avoiding action given.	At 1625z I observed a contact at Cowes squawking 7000 tracking West indicating 2.4A. This a/c is believed to be a Rockwell 114 from Mode S. I put out multiple blind calls and received no response. The a/c entered CAS and then tracked SW at 2.2A until leaving at 1629. Inbound a/c from the South was issued avoiding action of heading 290, then continued the left turn until the infringer left CAS.☐ Supplementary 23/10/14:☐ The a/c entered the Solent Control Area without a clearance resulting in 'avoiding action' being passed promptly by the Solent Radar Controller to a commercial air transport a/c inbound to Southampton, which ensured there was no 'Loss of Separation'☐ CAA Closure:☐ Lack of situational awareness. Insufficient pre-flight preparation. Failed on-line test. Interviewed. Warning letter sent.
201412097	31/08/2014	EGTT : London (FIR)	SAM	Bearing 175 Range 11nm	D	CTA	BRITTEN NORMAN	Reciprocating	3	Infringement of the Solent CTA (Class D) by a Rockwell 114 squawking 7000 indicating 2400ft. 201412110	30/08/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	SE	D	CTR	CESSNA	Reciprocating	1	Infringement of the Luton CTR (Class D) by a C172 at 2500ft. Standard separation maintained.	C172 out of LG entered the zone to the SE climbing 2500 feet. The Essex controller called LG for me and advised them of this and they said the aircraft in question was going to TR.
201412112	31/08/2014	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD		D	CTA	AVIONS ROBIN	Reciprocating	1	Infringement of the Doncaster Sheffield CTA (Class D) by DR400 at 2800ft. Traffic info given. Standard separation maintained.	DR400 entered CTA2 class D from the west wearing 1177 squawk, no Mode C. London Info stated that they had lost R/T contact with the aircraft and didn't know its height. VFR traffic was being vectored for a right hand ILS 02 and was given traffic on what was believed to be aircraft below controlled airspace. I spoke to EGNE to see if they were working the aircraft they stated that aircraft was at alt 2.8. I gave updated traffic to the aircraft being vectored who stated they were visual. No separation was lost as traffic were VFR but the closest they came were 2 miles with 1 aircraft not on frequency.

201412113	31/08/2014	EGTT : London (FIR)	EGNR : Hawarden		G	ATZ	VANS	Reciprocating	1	Alleged infringement of the Hawarden ATZ (Class G) by a formation of 3 RV7 a/c, a fourth remained outside of the ATZ.	Three primary contacts were observed on the ATM to the SE of Hawarden, tracking NW. One aircraft was squawking 7000 with a Mode C indication of 1600'. A blind transmission was made on 124.950 to see if the aircraft were listening, there was no answer. All three were observed from the VCR and appeared to be RV7 type aircraft. The ATM indicated that the aircraft transited the 22 climb out lane at a range of approximately one and a half miles and an altitude of 1600'. A fourth primary contact was observed by the radar controller passing further to the SW, outside of the ATZ.. Following a telephone conversation with ATC at Sywell (EGBK), four RV7 aircraft had departed there at 1010z, destination Newtownards (EGAD).
201412113	31/08/2014	EGTT : London (FIR)	EGNR : Hawarden		G	ATZ	VANS	Reciprocating	1	Alleged infringement of the Hawarden ATZ (Class G) by a formation of 3 RV7 a/c, a fourth remained outside of the ATZ. A fourth primary contact was observed by the radar controller passing further to the SW, outside of the ATZ.. Following a telephone conversation with ATC at Sywell (EGBK), four RV7 aircraft had departed there at 1010z, destination Newtownards (EGAD).
201412113	31/08/2014	EGTT : London (FIR)	EGNR : Hawarden		G	ATZ	VANS	Reciprocating	1	Alleged infringement of the Hawarden ATZ (Class G) by a formation of 3 RV7 a/c, a fourth remained outside of the ATZ.	Three primary contacts were observed on the ATM to the SE of Hawarden, tracking NW. One aircraft was squawking 7000 with a Mode C indication of 1600'. A blind transmission was made on 124.950 to see if the aircraft were listening, there was no answer. All three were observed from the VCR and appeared to be RV7 type aircraft. The ATM indicated that the aircraft transited the 22 climb out lane at a range of approximately one and a half miles and an altitude of 1600'. A fourth primary contact was observed by the radar controller passing further to the SW, outside of the ATZ.. Following a telephone conversation with ATC at Sywell (EGBK), four RV7 aircraft had departed there at 1010z, destination Newtownards (EGAD).
201412113	31/08/2014	EGTT : London (FIR)	EGNR : Hawarden		G	ATZ	VANS	Reciprocating	1	Alleged infringement of the Hawarden ATZ (Class G) by a formation of 3 RV7 a/c, a fourth remained outside of the ATZ. 201412116	05/09/2014	EGTT : London (FIR)	Manchester		D	CTA	PIPER	Reciprocating	1	Infringement of Manchester CTA (Class D) by a PA28.	I was operating as the Approach South controller during busy (but not particularly complex) traffic conditions, 7 on a 1-10 scale for traffic loading, 4 for complexity. I was vectoring IFR traffic from all three stacks as well as having a Cat A transiting the CTR approx 2nm to the West of the airfield. At approximately 11:40 hours I saw an AIW alert for an aircraft in the Barton low flying area that appeared to be climbing through 2500ft (7000 squawk, unverified). At this time RT loading was high and there were two aircraft North of it, having left MIRSI on an Easterly heading. The first was a A321, the second A320 both at or near FL60. Due to the fact that the Barton area was very busy the AIW alert was garbled with a number of other returns and so I could not be certain which aircraft was subject to the alert. I turned both the A321 and A320 onto a heading of approximately 060 whilst I tried to access which aircraft was the subject of the AIW alert. This immediately increased the distance between the IFR aircraft and the unknown traffic. At the same time my colleague in final director was calling Barton in order to ascertain the identity of the aircraft. Scottish also called me to check that I had seen the alert and informed me that Mode S data. I did not issue avoiding action because I deemed the risk to passenger safety during an emergency avoiding action turn greater than the risk caused by the unknown aircraft. Equally when I first clicked on the return of the AIW subject and then used the ERBM to ascertain distance it appeared to be 6nm (albeit this may have been one of the other returns garbling in the area) and either was certain that there was no chance of a collision. I believe at least 5nm separation existed at all times. Shortly afterwards the pilot of the PA28 called on frequency

201412132	29/08/2014	EGTT : London (FIR)	EGVN (BZZ): Brize norton		D	CTR	PIPER	Reciprocating	1	Infringement of the Brize Norton CTR (Class D) by a PA28 at 2000ft.	PA28 called on the BZN Zone frequency 119.0 at 1424z, he was told to remain outside CAS and standby, while I gave Redlands Para clearance to procedurally climb into CAS. PA28 was asked to pass his details. At this point the DF led me to believe that he may be just inside the CTR and I asked him to squawk 3701 to confirm. I also questioned him if he was aware if he was inside the CTR, he responded at the same time as squawking that he wasn't sure and if he was would turn away immediately. He was at 2000' just inside so I turned him on to North and asked him to climb to 2300', obtained a clearance from the RA controller and then gave him a BZN CTR VFR crossing clearance.
201412175	07/09/2014	EGTT : London (FIR)	Farnborough	2nm NW	G	ATZ	PIPER	Reciprocating	1	UK AIRPROX 2014/163 - Tecnam P2002 and a PA28, 2nm Northwest of Farnborough in Class G airspace.	This AIRPROX has been subject to a separate review by the United Kingdom AIRPROX Board (UKAB). AIRPROX Board (UKAB) information indicates that this AIRPROX was due to the PA28 pilot flying close enough to cause the Tecnam P2002 pilot concern. Contributory Factor: The PA28 pilot inadvertently entered the Blackbushe ATZ without permission.
201412175	07/09/2014	EGTT : London (FIR)	Farnborough	2nm NW	G	ATZ	TECNAM	Reciprocating	1	UK AIRPROX 2014/163 - Tecnam P2002 and a PA28, 2nm Northwest of Farnborough in Class G airspace.	This AIRPROX has been subject to a separate review by the United Kingdom AIRPROX Board (UKAB). AIRPROX Board (UKAB) information indicates that this AIRPROX was due to the PA28 pilot flying close enough to cause the Tecnam P2002 pilot concern. Contributory Factor: The PA28 pilot inadvertently entered the Blackbushe ATZ without permission.
201412194	04/09/2014	EGTT : London (FIR)	EGSC (CBG): Cambridge		G	ATZ	GROB	Reciprocating	1	Infringement of the Cambridge ATZ (Class G) by a Grob G115 squawking 7001 indicating an altitude of 500ft.	Appropriate CAA action is being taken as a result of this incident.☐ Supplementary 14/10/14:☐ The incident happened at the end of a navigation sortie. Towards the end of the sortie the route was planned to fly to the E of the Cambridge ATZ from a point 6nms to the SE of Cambridge heading roughly 350deg, then once clear of the ATZ to track to the WNW direct to Wyton. The weather was good with excellent visibility. After landing at Wyton I was informed by Wyton operations that I had been observed by Cambridge to have infringed their ATZ. I tried to phone Cambridge ATC at 1620Z to discuss the matter but there was no reply as ATC were closed. At the following mornings met briefing I publicly confessed my mistake to make a learning point to our students and to make our staff aware of the incident. After the briefing I phoned Cambridge ATC at 0730Z to "own-up" and discussed the incident with one of the Cambridge ATC staff. As to why it happened, well there was excellent visibility and Cambridge was clearly visible so I was eyeballing my distance from Cambridge rather than using GPS to get an accurate range and I was confident that I would remain outside the ATZ and I could see that Cambridge had no traffic at the time and so I did not see the need to give them a call. With hindsight a quick call and/or the use of GPS in near airport mode would have prevented the infringement.
201412222	07/09/2014	EGTT : London (FIR)	EGSL : Andrewsfield	3 NE	G	Restricted area	PIPER	Reciprocating	1	Infringement of the Stansted TMZ1 (Class G) possibly by a PA22.	At 1417 an unknown radar contact squawking 7000 conspicuity but without any altitude readout entered the Stansted Transponder Mandatory Area (1) 3nm NE of Andrewsfield tracking NW. No R/T contact from the pilot, therefore Mode 'C' altitude is mandatory. About 1 minute later the transponder squawk disappeared altogether leaving a primary only contact. Blind calls to see if the pilot was listening out on the Essex Radar frequency were unsuccessful. The aircraft left the TMZ 2nm West of VRP Haverhill and continued on a Northerly track passing to the East of Cambridge Airport.

201412224	09/09/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	6 W	D	CTR	SCHLEICHER	Reciprocating	1	A/c apparently about to infringe the Luton CTR (Class D) led to controllers giving traffic info and avoiding action to Luton inbound traffic.	At 15.20z an unknown aircraft entered Luton CTR North of Dunstable tracking in a southerly direction. Secondary Cait provided us with the callsign of an ASH 25 glider. A Falcon 2000 was established on the ILS at 7 miles and still on GW INT frequency. Avoiding action was given twice and the a/c took the avoiding action on second attempt and turned right heading 250deg. It was told to maintain 3A but started to climb to 5A, which put it into conflict with a CPT departure. The a/c was told to maintain 4A. CL300 was downwind for R/W08 and had to be taken outside CAS due to potential conflicts with further inbounds and outbound traffic if I had given it a turn. A Traffic Service was given. A GLF5, also downwind for 08, was given extended vectors. The unknown a/c landed at Dunstable gliding club. We attempted to establish contact with the gliding club but there was no answer on the phone. After the unknown aircraft had landed the inbounds were repositioned for an approach.☐ Supplementary 12/09/14:☐ Dunstable had been given the airspace (SFC-3500'). The ASH 25 remained within the confines of the gliding area and did not infringe the Luton CTR. As the glider displayed the characteristics of an aircraft possibly about to infringe CAS (foreign registration, Mode S displayed, g120kts, tracked on a constant heading from well outside Luton Airspace), the GW INT controller took defensive controlling action. Therefore, under the circumstances of this report, the controllers actions were prompt, affective and appropriate. London Gliding Club were contacted and the GM/CFI reported that the pilot had become aware of the infringement once on the ground and was "mortified and embarrassed". It transpired the pilot
201412224	09/09/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	6 W	D	CTR	DASSAULT	Turbofan	2	A/c apparently about to infringe the Luton CTR (Class D) led to controllers giving traffic info and avoiding action to Luton inbound traffic. 201412225	07/09/2014	EGTT : London (FIR)	BNN	10nm NW	D	CTA	CESSNA	Reciprocating	1	Infringement of the Luton CTA (Class D) by a C152 in climb to 3300ft. Traffic info given.	Zone infringement by C152 causing delays on the ground a precautionary turn and a monitored SID departure. 26 in use. At 1703 C152 infringed the Luton CTA to the NE of Halton climbing to 3300 feet I immediately warned TC NW as they had traffic. At the same time after putting a check on I worked a CPT departure, an A319. I took a precautionary turn onto 170 climbing to 5000 feet as separation was not compromised-shortly back to 260deg straight to London. Then the offender left CAS only to re-enter I put a check all on as a CLN was rotating. I did not want to give avoiding action as the CLN was below terrain safe levels and the SID took it away from the contact so I let the tower keep and kept them on the phone. The separation was 6 miles so I decided to QSY to LONDON when turning away (6 miles separation maintained throughout). I kept everything on the ground until C152 definitely tracked away. I did have a request on a CPT to get radar vectors after departure which I refused planning to take it over the top of the field as a left turn out. However shortly after C152 went back to intended destination.

201412225	07/09/2014	EGTT : London (FIR)	BNN	10nm NW	D	CTA	AIRBUS	Turbofan	2	Infringement of the Luton CTA (Class D) by a C152 in climb to 3300ft. Traffic info given.	Zone infringement by C152 causing delays on the ground a precautionary turn and a monitored SID departure. 26 in use. 201412326	02/09/2014	EGTT : London (FIR)	D129		G	Danger area	PIPER	Reciprocating	1	Infringement of Danger Area D129 (Class G) by a PA32 at FL42.	I was the Lower Airspace Radar Service controller when the Oxford Approach controller phoned through to notify me of an a/c, squawking 7000 who was about to fly through D129 (Weston-on-the-Green) in the direction of RAF Brize Norton. He stated that he was not controlling the ac however Mode S indicated that the callsign. I was working without SSR so couldn't observe the squawk or Mode C information however did observe a primary contact which matched the position and heading given by the Oxford controller. D129 had been notified earlier as active up to FL80 with the paradrop a/c departing RAF Brize Norton and working Brize App whilst airborne. At this time, the a/c was believed to be on the ground. Shortly after the phone call from Oxford, the PA32 called on the LARS frequency (124.725) requesting a Traffic Service at 4500ft AMSL. SSR was now showing but hadn't been officially handed back as serviceable so I assigned a squawk of 3717 and using the turn method I identified the PA32 as the previously primary-only contact which had flown through D129, now showing FL042- on Mode C. On being informed on frequency that he had infringed on D129, the pilot of the PA32 replied that he had been working Cranfield and they hadn't told him it was active. After a short pause, he then asked if the paradrop a/c was even airborne, before following up by stating that he had made multiple blind calls on the drop zone safety frequency with no reply.
201412349	13/09/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	8	D	CTA	BAC	Unknown	1	Infringement of Stansted CTA (Class D) and TMZ (Glass G) by a Jet Provost climbing through 1500ft to 1800ft.	At approximately 1635 an unknown contact was observed squawking 7010 climbing through 1500 to 1800 feet in CAS. I was vectoring B737 downwind for R/W04. I turned the inbound towards the ILS which kept it clear of the 7010 infringer and passed traffic info. The infringer descended but then switched off the transponder so it was now infringing the TMZ. I spoke to North Weald as the infringer had departed from their zone and they believed the traffic could be the Jet Provost enroute to Duxford. The infringing aircraft was observed to join the circuit at Duxford.☐ CAA Closure:☐ Pilot had turned off transponder en-route. Pilot error. Interviewed, passed on-line test and flight with Staff Training Inspector.
201412349	13/09/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	8	D	CTA	BOEING	Turbofan	2	Infringement of Stansted CTA (Class D) and TMZ (Glass G) by a Jet Provost climbing through 1500ft to 1800ft. I turned the inbound towards the ILS which kept it clear of the 7010 infringer and passed traffic info. The infringer descended but then switched off the transponder so it was now infringing the TMZ. I spoke to North Weald as the infringer had departed from their zone and they believed the traffic could be the Jet Provost enroute to Duxford. The infringing aircraft was observed to join the circuit at Duxford.☐ CAA Closure:☐ Pilot had turned off transponder en-route. Pilot error. Interviewed, passed on-line test and flight with Staff Training Inspector.
201412350	02/09/2014	EGTT : London (FIR)	EG D036		G	Danger area	OTHER	Reciprocating	1	Infringement of Danger Area EG D036 by a Foxbat.	I was controlling on LARS East. An aircraft on a 7377 (Bournemouth conspicuity) squawk Mode C 037, was seen tracking toward D036. I called Bournemouth and they said they would put out a blind call as they were not sure who the a/c might be. They said it might be a Foxbat, that they had sent to London Info. I asked London Info if they were working the aircraft and they said they were, so I requested they to send it to my VHF frequency. We later received a call from London Info saying that they were having trouble raising the a/c. The 7377 squawk entered D036 at approximately 1540 in position 50 22 N 001 22 W and exited at 1555 position 50 00 N 001 22 W, appearing to following the VFR route that goes through D036. At the time there was an exercise taking place in the Portsmouth Danger Areas with 2 Falcons. Traffic info was passed to the a/c by the TAC controller.

201412386	02/09/2014	EGTT : London (FIR)	EGXT : Wittering		G	ATZ	ROBINSON	Reciprocating	1	Infringement of the Wittering ATZ (Class G) by an R44.	Following the the incident I spoke to the student pilot of the R44 who explained the course of events from his point of view, leading up to his airspace infringement. The student pilot had been under a BS from RAF Wittering as he transited from Leics to Peterborough. Believing that he was overhead Deenethorpe (an old RAF airfield approx 8nms SW of Wittering) he had called changing frequency to Peterborough Conington. This call to RAF Wittering ATC confirmed that he was outside of the MATZ and the Wittering controller told the R44 to freecall Conington. The R44 had infact misidentified his location and was in fact overhead Spanhoe, (an old RAF airfield approx 6 nms WSW of Wittering) and under the western stub of the Wittering MATZ. Having called Peterborough Conington and informing them of his intentions, the R44 started to make his approach to Wittering R/W26 believing it was Conington. On final approach R44 noticed that he was not at Conington and turned North climbing to 2000'. He flew East to West, North of the Wittering centreline and proceeded to Rutland Water where he regained his bearings and then set out for Peterborough Conington again. He was contacted on arrival at Conington. The R44 operator has been procative in regard to this incident. □ Supplementary 16/09/14:□ A full and comprehensive report has been received from the students instructor which states that distraction due to readability issues and overconfidence could have been factors in this incident.
201412388	13/09/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTR	CESSNA	Reciprocating	1	Infringement of Luton CTR (Class D) by a C152.	An a/c squawking 7000 without Mode C infringed the Luton control zone three times. The pilot of an inbound a/c identified the infringer as a C172 or similar flying low level.□ Supplementary 07/10/14:□ This was the fourth and last flight of the day. I used the same route in all of my previous flights that day, but on different airplanes which were not equipped with GPS. I simply took a southerly track on South of Hemel Hempsted. During this flight I probably relied too much on the GPS and simply thought my position to be the SouthWesterly corner of Luton CTA(2500-3500), this along with my lack of thorough knowledge of the local area, (as I had just started to work in Elstree) lead to this infringement.□ CAA Closure:□ Pilot error. Failed on-line test. Interviewed, will be observed conducting ground navigation training by Staff FE.
201412456	08/09/2014	EGTT : London (FIR)	EGLD : Denham	4nm SW	A	CTR	CESSNA	Reciprocating	1	Infringement of the London CTR (Class A) by an unknown aircraft squawking 7000. Aircraft identified as a C172. Departures were stopped. C172 was partial RT fail during the occurrence and mistakenly used the hijack squawk. Standard separation maintained.	At approx 1403, I noticed a 7000 squawk leaving the Denham ATZ, tracking westbound. Initially, I expected the traffic to leave the zone to the NW, without further incident, however it became apparent that the infringement was more serious. I contacted Denham to try to identify the traffic, and after an initial mis-ident, it was established that the aircraft was a C172 and known to Denham. C172 was partial RT fail and not receiving Denham's transmissions. C172 entered a left hand orbit, within CAS and therefore departures were stopped, with a northbound departure being taken off the SID, straight ahead. NW deps were notified of this. Departures were stopped between 1405 and 1412. During the event, C172 squawked HIJACK, possibly mistakenly instead of RTFAIL. C172 was eventually seen to enter the LD LFT, and therefore departures. were resumed. C172 was positively identified by Denham as the subject aircraft. □ CAA Closure:□ Pilot became distracted and the infringement occurred. Pilot debriefed by Staff FE, pilot has decided to stop flying.
201412488	05/09/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	NE	D	CTA	PIPER	Reciprocating	1	Infringement of the Gatwick CTA (Class D) by a PA28 squawking 3767 at 2300ft. Inbound aircraft broken off approach. Separation lost.	Whilst working KK INT / FIN bandboxed CAIT alerted me to the presence of a 3767 squawk (Redhill conspicuity), in the KK CTA at 2.3A (above the KR LFA). I called KR to see if they were working the aircraft. KR controller advised he was unsure if it was on frequency. I therefore broke off the inbound A319. I do not believe separation was lost. The 3767 squawk was observed to descend into the KR LFA, and I continued vectoring aircraft to the 26L ILS. KR later advised the identity of the aircraft. LTCC subsequently confirmed that a loss of separation had been recorded. □ Supplementary 12/09/14:□ The pilot subsequently rang Redhill ATC and apologised, stating that he had not set the DI with compass before departure.□ CAA Closure:□ No response from aircraft owner. Closed due to elapsed time.
201412488	05/09/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	NE	D	CTA	BOEING	Turbofan	2	Infringement of the Gatwick CTA (Class D) by a PA28 squawking 3767 at 2300ft. Inbound aircraft broken off approach. Separation lost.	Whilst working KK INT / FIN bandboxed CAIT alerted me to the presence of a 3767 squawk (Redhill conspicuity), in the KK CTA at 2.3A (above the KR LFA). I called KR to see if they were working the aircraft. KR controller advised he was unsure if it was on frequency. I therefore broke off the inbound A319. I do not believe separation was lost. The 3767 squawk was observed to descend into the KR LFA, and I continued vectoring aircraft to the 26L ILS. KR later advised the identity of the aircraft. LTCC subsequently confirmed that a loss of separation had been recorded. □ Supplementary 12/09/14:□ The pilot subsequently rang Redhill ATC and apologised, stating that he had not set the DI with compass before departure.□ CAA Closure:□ No response from aircraft owner. Closed due to elapsed time.

201412493	04/09/2014	EGTT : London (FIR)	EGLC (LCY): London city	E	A	TMA	CIRRUS	Reciprocating	1	Infringement of the LTMA (Class A) by an unknown aircraft squawking 7000 at 2700ft, resulting in loss of separation with an outbound HS125. Aircraft identified as an SR22. Traffic info and avoiding action given.	HS125 departed Rwy 09 on a LYD 5U, 6000ft was coordinated with north and early climb given. An unknown aircraft entered controlled airspace east of London city up to 2700ft. Avoiding action had to been given to HS125 to try and achieve 5nm. Departures were ceased by SVFR. The infringing aircraft subsequently left controlled airspace and contacted Farnborough LARS east where details were followed up and the altitude verified.☐ CAA Closure:☐ SR22 pilot advised that he entered cloud shortly after take-off and engaged the autopilot, which did not act as expected due to previous pilot reversing the route. The pilot was distracted for a short period while he re-programmed the autopilot and, during this time, the aircraft briefly climbed above 2500ft. The aircraft's transponder tends to over-read by approximately 100ft, so the pilot suspects that he was not as high as 2700ft. On realising the situation, the pilot descended immediately to 2300ft to remain below the LTMA. Pilot has learnt from the incident, apologised for any inconvenience caused and will be more vigilant in future.
201412493	04/09/2014	EGTT : London (FIR)	EGLC (LCY): London city	E	A	TMA	HAWKER SIDDELEY	Turbofan	2	Infringement of the LTMA (Class A) by an unknown aircraft squawking 7000 at 2700ft, resulting in loss of separation with an outbound HS125. Aircraft identified as an SR22. Traffic info and avoiding action given.	HS125 departed Rwy 09 on a LYD 5U, 6000ft was coordinated with north and early climb given. 201412501	05/09/2014	EGTT : London (FIR)	EGTK (OXF): Oxford/Kidlington		G	ATZ	PIPER	Reciprocating	1	Infringement of the Oxford ATZ (Class G) by a PA28 at 1600ft.	Whilst on duty as the Oxford Radar controller, at time 1015 I observed an aircraft squawking 7000, NW of EGTK tracking toward the ATZ. The aircraft was identified on Mode S and several blind transmissions were made on 127.750 (Oxford Radar) and 125.325 (Oxford Director) in an attempt to establish two way communication. I advised the tower controller of the aircraft and he also attempted to make contact with the aircraft on 133.425 (Oxford Tower). The aircraft entered the Oxford ATZ at 1017 at 1600ft (based on QNH of 1017) and was then observed to slowly climb to 2200ft before disappearing into the radar overhead. Traffic information was passed to a PA34 in the OX hold at 3500ft due to being seen to climb in the overhead. The aircraft continued to track south east, was again seen to descend and eventually was seen to squawk 3602 apparently having called Benson Zone. Cotswold RPS 1013. EGTK 050950Z 35006KT 320V030 8000 FEW008 16/14 Q1017=.
201412502	05/09/2014	EGTT : London (FIR)	KEGUN	3 S	A	TMA	CESSNA	Reciprocating	1	Infringement of the TMA (Class A) by a C182 at 3600ft. Standard separation maintained.	A 7000 squawk was observed 3nm south of Kegan at 3600ft therefore infringing the delegated Class A airspace. At that point the C182 called on frequency reporting his position, indicating that he was the 7000 squawk. The aircraft was identified and the pilot informed that he had infringed Class A controlled airspace and that the base was 3000ft. The pilot reported that he would descend below CAS. No other traffic was affected.
201412510	05/09/2014	EGTT : London (FIR)	EGTK (OXF): Oxford/Kidlington		G	ATZ	UNKNOWN	Reciprocating	1	Infringement of the Oxford ATZ (Class G) by two microlights at 2000ft.	At 1524 I observed two non squawking contacts, apparently in formation, NW of Enstone aerodrome aircraft tracking SE toward the Oxford ATZ. As the contacts passed 5nm from EGTK, I attempted to establish two way communication with the aircraft on the Oxford primary frequency of 127.750 (Oxford Radar) and our "as directed" frequency of 125.325 (Oxford Director) due to numerous recent episodes of pilots calling on the incorrect frequency. I advised the tower controller of a possible ATZ infringement and continued attempts to establish two way communication. The contacts crossed the ATZ Boundary at 1529 and the tower controller subsequently reported visual with two flexwing microlights tracking SE at approximately 2000ft. As The contacts appeared to be tracking toward the Brize CTR, I warned the Brize zone controller of the observed track of the aircraft and that they were not in contact with us. At the time, a DA42 had recently completed an IFR approach using the NDB(I)/DME 099 procedure, through which the contacts had flown and Brize were vectoring a large transport aircraft in the eastern part of their CTR. The contacts were seen to track SE along the Eastern edge of the Brize CTR before fading from radar in the vicinity of Compton VOR. EGTK 051520 32005kt 290v350 9999 ovc042 20/14 q1015=.

201412510	05/09/2014	EGTT : London (FIR)	EGTK (OXF): Oxford/Kidlington		G	ATZ	UNKNOWN	Reciprocating	1	Infringement of the Oxford ATZ (Class G) by two microlights at 2000ft. 201412513	04/09/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	7.9nm Bearing 348deg	D	CTA	BEECH	Reciprocating	1	Infringement of the Solent CTA (Class D) by a Beech 36 at 2600ft. Traffic info given. Standard separation maintained.	I had just taken over the Solent Radar position when the off going controller pointed out a 7000 squawk approaching the NW boundary of CAS indicating 2600ft. The contact entered the CTA bearing 345/8nm SAM at 2600ft where the base of CAS is 2000ft, AIW alarmed. The contact then turned the right and shortly left the CTA. Blind calls were made using the callsign provided by Mode S, but no reply was forthcoming. The contact subsequently changed to a Bournemouth squawk permitting confirmation of the callsign.□ Supplementary 16/09/14:□ This is a route I fly a lot and I believe the reason for the infringement was routing to close to Southampton CTA and then drifting into Southampton CTA because of concentrating on changing iPad function and not on my position. □ Supplementary 23/10/14:□ The a/c entered the northern extremity of the Solent Control Area without clearance.The pilot acknowledged the infringement and apologised for the incident, which he feels was caused by his distraction as he was preparing for an instrument approach at Bournemouth. However, he was unable to explain why he would not contact Solent Radar for a service when operating so close to the CTA boundary.
201412527	06/09/2014	EGTT : London (FIR)	EGGP (LPL): Liverpool	9 SE	D	CTR	CESSNA	Reciprocating	1	Infringement of the Liverpool CTR (Class D) by a C182 at 1100ft. Standard separation maintained.	A 7000 squawk was observed inside controlled airspace approximately 2nm North/North West of the Oulton Park VRP at altitude 1,100ft. At the same time C182 called. He was instructed to squawk 4362 and identified as the zone infringer. C182 was informed he had entered controlled airspace without authorisation but was cleared to continue on track. No other aircraft were affected at the time.
201412528	06/09/2014	EGTT : London (FIR)	Haydock VRP	2 W	D	CTR	CESSNA	Reciprocating	1	Infringement of the Liverpool CTR (Class D) by a C182 at 800ft. Standard separation maintained.	A 7000 squawk was observed 2nm West of Haydock Park VRP. C182 called on frequency. He was instructed to squawk 4366 and was identified as the zone infringer. C182 was informed he had entered CAS without authorisation but was cleared to continue on track. No other aircraft were affected at the time.
201412540	07/09/2014	EGTT : London (FIR)	DTY	4 W	A	CTA	SLINGSBY	Reciprocating	1	Infringement of the Daventry CTA (Class A) by a Slingsby T67 at 5000ft. Standard separation maintained.	At 1012z the AIW was activated by a 4520 squawk at 5000ft to the West of DTY VOR, tracking NE. I telephoned TC to advise them of the infringer & to stop the next inbound at FL100 to maintain 5000ft separation. TC were aware of the infringer as the traffic had routed through the Hinton parachuting area which was active. Mode S identified the aircraft. A telephone call was made to Oxford to advise them that the aircraft was inside CAS. Oxford stated they would tell the aircraft to descend below CAS, which it did shortly afterwards.

201412582	07/09/2014	EGTT : London (FIR)	London CTR		A	CTR	PIPER	Reciprocating	1	Infringement of the London CTR (Class A) by a PA28. Standard separation maintained.	I had recently plugged in on LARS West, the frequency was busy. PA28 called on frequency at 1431, at the time I was providing a Traffic Service to another aircraft inbound to Windsor and my scan was concentrated to the SE quadrant of the radar screen. I had also been in the process of getting information from Farnborough Approach on inbound LF traffic that affected the other aircraft. The AIW had activated, I did not notice it immediately as it had been constantly activating for different alerts mostly non LF related. This is not unusual and has sanitised the alert to most LF controllers over the summer. SVFR called and highlighted the traffic now wearing my squawk inside the London CTZ. I scanned ahead of the aircraft and turned it West informing the pilot that he was inside CAS I providing the pilot with a RCS whilst inside the zone. The pilot exited CAS and continued his flight outside CAS.
201412609	07/09/2014	EGTT : London (FIR)	EGGD (BRS): Bristol/Lulsgate		D	CTA	CESSNA	Reciprocating	1	Infringement of the Bristol CTA 6 (Class D) by an unknown aircraft with a FIS squawk, indicating 5000ft. Aircraft identified as a C182. Standard separation maintained.	Acting as Rad 1 with Rad 2 open I spotted a FIS squawk approaching CTA6 from the East indicating F050. I pointed this out to Rad 2 and asked the ATSA to ring FIR South and ask them for information and to put the aircraft to us on 125.650. The aircraft finally called Rad 2 when inside CAS at A050 and was informed that he had infringed and asked to ring back at a later date.☐ CAA Closure:☐ Pilot error, spatial awareness issue. Warning letter sent. German LBA advised.
201412611	08/09/2014	EGTT : London (FIR)	TOBID	5 SW	A	CTA	EVEKTOR AEROTECHNIK	Reciprocating	1	Infringement of the Daventry CTA (Class A) by an EV-97 Eurostar at 5400ft. Standard separation maintained.	An unidentified aircraft was seen at an indicate altitude of 5400ft about 5nm or so SW of TOBID. The return was magenta which highlighted the infringement and the aircraft registration was indicated as an EV-97. No other aircraft under my control were anywhere near the infringer at the time. The aircraft appeared to be tracking toward EGBT and left CAS about 5 minutes or so after I became aware of the infringement.
201412615	06/09/2014	EGTT : London (FIR)	Warrington	NW	D	CTR	CESSNA	Reciprocating	1	Infringement of the Liverpool CTR (Class D) by a C172 at 1500ft. Standard separation maintained.	Manchester Approach Controller advised the 7351 squawk entering CAS NW of Warrington. The Manchester controller was extremely busy so I told him to free call the a/c across. I had no traffic in the area at the time, so thought this was the best option. The C172 called on frequency and advised he was weather avoiding. He continued north bound and returned towards the low level corridor. I contacted Perth aerodrome and requested the Pilot contact me after landing. I spoke to the pilot, he was avoiding weather. The cloud base was low and he was concerned about the high ground further North. I told him he could have requested a zone transit. I spoke to Manchester Tower supervisor. The Controller was busy at the time hence the late call to me. I hadn't had time to call them as I was focused on a climb through to the West of the field.
201412632	08/09/2014	EGTT : London (FIR)	EGVA (FFD): Fairford	NNW 4nm	D	CTR	FLY BUY ULTRALIGHTS	Reciprocating	1	Infringement of the Brize Norton CTR (Class D) by a C42. Standard separation maintained.	C42 requested a Basic Service on the LARS frequency at 1438z, routing from Kemble to Windrush Airfield. I gave him a Basic Service and asked him to squawk 3714. I then noticed a 7000 squawking a/c just entering the Brize CTR 4nm NNW of Fairford airfield. As the C42 hadn't yet put the 3714 sqk on I began to ask his exact position, at the same time 3714 appeared on the CTR infringer. I then informed the a/c that he was in the CTR and suggested a northerly track to exit, which he took and then apologised about the infringement. He had been trying to route via North Leach VRP so I passed him traffic info on the VRP in relation to him and confirmed he now was aware of his position. There was no other traffic around him to affect.

201412637	18/09/2014	EGTT : London (FIR)	LON	10nm W	A	TMA	PIPER	Reciprocating	1	Infringement of the LTMA (Class A) by an unknown aircraft showing as a primary contact only resulted in loss of separation against multiple aircraft. ATC initiated a go-around to a B777. Aircraft identified as a PA28, who was lost. Traffic info given.	I was working as FIN controller when I observed a primary CAIT contact to the north of final approach. I then received a phone call from SVFR informing me that they were also tracking the contact. I asked an aircraft on final approach if they could see anything, and they replied saying that they couldn't. B777 was on final approach approximately 3-4 miles from the contact and they were going to pass very close to one another. I decided that the sensible course of action was to discontinue the approach of the B777 and reposition the aircraft. I told the aircraft to stop descent and turn right heading 180. This was acknowledged by the aircrew but no action took place for a period of time. I then asked the B777 to confirm that they were turning south as the radar returns were getting very close to merging. I did notice that the B777 had stopped descending at 2500', and I had also passed traffic information. The B777 then commenced a turn to the south just ahead of the primary CAIT, I climbed the aircraft back up to 3000' and turned it to the SW to stay ahead of the contact. I then repositioned the aircraft downwind and commenced a normal approach. I was later informed the primary CAIT was an aircraft and had been operating at 1500'. Supplementary 19/09/14: I was working as the SVFR controller at the time of the incident. At approximately 1515 a primary return, showing as magenta was spotted southbound in the north west portion of the CTR. It was steadily moving south towards the 09L approach. The wind was 090deg and I felt the potential of the return to be an actual aircraft to be high. I called FIN to highlight them to the return, further monitoring showed a slight deviation but nothing major and the return
201412637	18/09/2014	EGTT : London (FIR)	LON	10nm W	A	TMA	BOEING	Turbofan	2	Infringement of the LTMA (Class A) by an unknown aircraft showing as a primary contact only resulted in loss of separation against multiple aircraft. ATC initiated a go-around to a B777. Aircraft identified as a PA28, who was lost. Traffic info given. 201412643	09/09/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	110 Deg 8.8nm	D	CTA	VANS	Reciprocating	1	Infringement of the Solent CTA (Class D) by an RV9 at 3000ft. Standard separation maintained.	The AIW alerted 8nm E of EGHI as a London FIS squawk was showing 3A. I phoned them immediately and they advised of an a/c that it could be which was at 2.8A. I asked if I could work it as not only was it just below CAS, it was going to infringe on its track into the 2.5A portion of the CTA. The a/c did infringe and then called as it left CAS at which time I identified it and provided it with a BS. Supplementary 24/12/14: The a/c entered the Solent Control Area without a clearance, after departing a private site close to the Solent CTA. The pilot has acknowledged that it would have been beneficial for the a/c to contact Solent Radar for a service after departure.
201412664	09/09/2014	EGTT : London (FIR)	Glossop		D	CTR	EVEKTOR AEROTECHNIK	Reciprocating	1	Infringement of the Manchester CTR (Class D) by an unknown a/c squawking 7000. Aircraft identified as an EV97. Traffic info given. Standard separation maintained.	At 10.12 UTC an a/c squawking 7000, no altitude information available, was observed close to the Eastern edge of the CTR. The a/c entered the CTR in the Glossop area, tracking to the SW. No Mode S information was available to identify it, and attempts to raise the a/c on the Approach frequency were unsuccessful. IFR inbound a/c were vectored around the infringer to maintain 5nm separation. No avoiding action was given. The a/c then left the CTR to the South. Subsequently, an a/c - in the vicinity squawking 7366 - was asked to help identify the infringer, and reported the a/c callsign as an EV97.. Supplementary 04/10/14: I am both shocked and ashamed to discover that I have infringed the Manchester CTR airspace. On 09/09/2014 I was routing from Crossland Moor Airfield to Ashcroft airfield. When I left Crossland Moor the cloud base was 3,000ft and as I proceeded along my planned route I encounter another layer of intermittent cloud down to 2,250ft in places. Due to the lowered base I started to pick my way around the higher hill peaks. At one point I was aligned with the A628 just North of High Peak routing in a South South Westerly direction to avoid the High Peak themselves. It was at this point I believe that the extra workload caused me to take my focus off the GPS and pay more attention to actually negotiating my way through the hills. Several times I considered turning back to get clear of the hills but conditions didn't appear to be much better behind me. Ne xt time I fly I shall give more consideration to what an appropriate Minimum Safe Altitude should be for my intended and also consider the possibility and implications of encountering an additional layer of cloud

201412664	09/09/2014	EGTT : London (FIR)	Glossop		D	CTR	FLIGHT DESIGN	Reciprocating	1	Infringement of the Manchester CTR (Class D) by an unknown a/c squawking 7000. Aircraft identified as an EV97. Traffic info given. Standard separation maintained.	At 10.12 UTC an a/c squawking 7000, no altitude information available, was observed close to the Eastern edge of the CTR. The a/c entered the CTR in the Glossop area, tracking to the SW. No Mode S information was available to identify it, and attempts to raise the a/c on the Approach frequency were unsuccessful. IFR inbound a/c were vectored around the infringer to maintain 5nm separation. No avoiding action was given. The a/c then left the CTR to the South. Subsequently, an a/c - in the vicinity squawking 7366 - was asked to help identify the infringer, and reported the a/c callsign as an EV97.☐ Supplementary 04/10/14:☐ I am both shocked and ashamed to discover that I have infringed the Manchester CTR airspace. On 09/09/2014 I was routing from Crossland Moor Airfield to Ashcroft airfield. When I left Crossland Moor the cloud base was 3,000ft and as I proceeded along my planned route I encounter another layer of intermittent cloud down to 2,250ft in places. Due to the lowered base I started to pick my way around the higher hill peaks. At one point I was aligned with the A628 just North of High Peak routing in a South South Westerly direction to avoid the High Peak themselves. It was at this point I believe that the extra workload caused me to take my focus off the GPS and pay more attention to actually negotiating my way through the hills. Several times I considered turning back to get clear of the hills but conditions didn't appear to be much better behind me. Ne xt time I fly I shall give more consideration to what an appropriate Minimum Safe Altitude should be for my intended and also consider the possibility and implications of encountering an additional layer of cloud
201412691	08/09/2014	EGTT : London (FIR)	SAM	6.1nm bearing 148deg	D	CTR	PIPER	Reciprocating	1	Infringement of the Southampton CTR (Class D) by an unknown a/c showing as a primary contact only, squawking 7000. A/c identified as a PA28. Standard separation maintained.	At approx 1345 a primary contact was observed approaching the CTR 5 miles SE SAM. Blind transmissions were made but no reply was heard. The a/c had no Mode C but was squawking #7000. The a/c continued SW then tracked East to leave CAS. The coordinator spoke to Lee-On-Solent and managed to get the a/c to squawk #3677.☐ Supplementary 20/09/14:☐ I believe the primary cause of this incident was rushed pre-flight planning both on my part, as instructor, and my student. This resulted in a high workload locating the airfield in poor visibility (requiring orbits - at which point we drifted into the CTR). Furthermore, the reliance on map reading and deduced reckoning alone without utilising navigation aids at the time of infringement (again due to inadequate planning) contributed to the incident. I would like to apologise for this lapse on my part.☐ Supplementary 23/10/14:☐ The a/c entered the Southampton Class D Control Zone without a clearance, whilst navigating and trying to locate and identify Lee-on-Solent aerodrome. The pilot admitted that the flight planning has been rushed and had not been completed thoroughly to make use all navigational aids or air traffic services available. The pilot apologised for the incident and any inconvenience that it may have caused.☐ CAA Closure:☐ Instructor error. Rushed pre-flight planning. Passed on-line test. The Director of Flight Training at the School involved has conducted extensive remedial training with the FI.
201412720	09/09/2014	EGTT : London (FIR)	LLANON		G	Danger area	PIPER	Reciprocating	1	Infringement of Danger Area D201 (Class G) by a PA28 at 1000ft, with no impact to Danger Area activity.	I was operating as Radar 1 at Aberporth when, during my normal radar scan, I spotted a 7000 squawk with No Mode C approaching the Dovey estuary from the East. I maintained a watch on the aircraft's track as part of my defensive controlling techniques. The a/c turned left at the Dovey estuary to track southbound along the West Wales coast. As the a/c continued to track South I assessed that if he continued on his course he would infringe D201 so I made 2 blind transmissions on 119.650 to try and raise the a/c with no success. In the vicinity of Aberaeron the a/c appeared to turn South briefly but he quickly resumed his course southbound along the coast. At this point I called the admin office and requested another ATCO join me in the Ops room to help trace the a/c. I then called London Info to try and ascertain the a/c type and callsign but they had no knowledge of the a/c. I made 1 further blind transmission on 119.650 with no response and the unknown a/c entered D201 overhead Llanon in the South Eastern Corner of the Danger Area at 1129Z. The a/c continued on its track down the coast when I received a transmission from the PA28, on 119.650, requesting to cross Danger Area D202. I requested the a/c to squawk 4530 and provided a Basic Service. The squawk of the unknown a/c was observed to change and he was positively identified as the infringing a/c, a PA28 routeing from Hawarden to Haverfordwest. I provided a crossing service of D202 and the a/c left the frequency on leaving the Danger Area. No trials were taking place at the time and there was no impact to MOD activity. Before leaving the frequency the pilot was advised of his infringement and requested to call Aberporth Radar on landing.☐
201412780	10/09/2014	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD		D	CTR	CESSNA	Reciprocating	1	Infringement of the Doncaster Sheffield CTR (Class D) by an unknown aircraft squawking 7000. Aircraft identified as a C152. Traffic info given. Standard separation maintained.	Aircraft observed departing and routeing North East bound believed to be at 0.8ft (but mode C unverified) initially routeing below controlled airspace in Doncaster Sheffield CTA 2. Aircraft then turned North towards Haxey VRP entering controlled airspace. I had 2 other aircraft being vectored one IFR on climb out runway 20 (on a training missed approach) and a JS31 established on ILS 20. As the IFR climbed out I gave traffic on the unknown aircraft but no avoiding action was needed as the unknown didn't get within 5 miles. When the JS31 was on 5 mile final the unknown aircraft was 5 miles east of the runway continuing away from the runway. I kept the JS31 on radar frequency and advised the pilot of the unknown aircraft and advised the pilot that if the aircraft turns towards the approach I would need to break him of the approach. JS31 remained on my frequency until he was on the ground. Whilst trying to identify the unknown aircraft I spoke to Netherthorpe and Humberside as they have Mode S.☐ CAA Closure:☐ Pilot error. Spatial awareness. Warning letter sent.
201412780	10/09/2014	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD		D	CTR	BAE	Turboprop	2	Infringement of the Doncaster Sheffield CTR (Class D) by an unknown aircraft squawking 7000. Aircraft identified as a C152. Traffic info given. Standard separation maintained.	Aircraft observed departing and routeing North East bound believed to be at 0.8ft (but mode C unverified) initially routeing below controlled airspace in Doncaster Sheffield CTA 2. 201412807	11/09/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	5 N	D	CTR	BELL	Turboshaft	1	Infringement of the Manchester CTR (Class D) by a UH1.	<p>I was vectoring an Airbus straight in on 23R from the East when I noticed a 7000sq just South of Barton heading East. It was about to enter the CTR. The Director checked with Barton and they had been speaking to it. I checked the callsign via the 'info' on the Radar and free called the helicopter. The pilot responded and I requested his intentions. He informed me he was routing via Sale Water Park to Glossop. I gave him a squawk and requested his altitude. I instructed him to turn left to leave the CTR to the North. He appeared to be heading towards the restricted area so I gave him instructions to remain clear until I was able to give him a proper VFR clearance through the zone. He routed to the North of the restricted area and I cleared him to set course for Glossop initially not above 1500ft. When he was over the city centre I gave him not above 2000ft VFR. He transited without further event. ☐</p> <p>Supplementary 18/09/2014:☐</p> <p>There is no excuse for this infringement given, I was aware of my position at all times throughout the flight and familiar with this airspace. The circumstances of the incident are as follows:- The leg from Burtonwood to Sail Park is close to Barton airspace but does not require entry, if however a call is made directly to Manchester on leaving Liverpool the usual response from Manchester is" have you called Barton". As this was an exceptionally nice evening Barton circuit was very busy and it took some time to get two-way with them and when I did they complained of poor clarity on the box, that had been working well from Ireland and later worked with Manchester! On realising my incursion into CAS I terminated</p>
201412846	12/09/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	TMZ2	G	Other	OTHER	Reciprocating	1	Infringement of the Stansted TMZ2 (Class G) by an unknown aircraft.	<p>I was working as the SS INT controller. At approximately 0917 I observed a primary only contact enter the TMZ 2 stub. I kept a close watch on it as I had traffic downwind for runway 04. I told the A321 downwind that there was unknown traffic and I may have to give delaying vectors to avoid it. As the A321 was nearing a base leg turn I updated the pilot on the unknown traffic and asked if he was happy to continue being vectored behind it as I judged the unknown traffic to be tracking well away and continuing to track away and felt it best to continue vectoring the A321 onto final approach. The primary contact then set 0013. I made a transmission to raise the traffic, I asked Luton to do the same. It was listening out on the Luton frequency.</p>
201412849	11/09/2014	EGTT : London (FIR)	EGD406		G	Danger area	ZENAIR	Reciprocating	1	Infringement of Danger Area EGD406 (Class G) by a Zenair.	
201412859	12/09/2014	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS		D	CTR	CESSNA	Reciprocating	1	Infringement of the East Midlands CTR (Class D) by a C152 at 2300ft. Standard separation maintained.	<p>A 7000 squawk was observed in EGNX CTR 2 miles NW of the airfield indicating 2.3A mode C. Several transmissions were made to ascertain if the aircraft was on frequency with no response. No inbound aircraft were affected by the infringer, departures were stopped as a precaution. It was eventually established through a phone call the pilot was a student pilot on a navigational exercise in a C152 on Birmingham frequency 118.050. The pilot was told to call East Midlands radar on 134.175 which he duly did and was told to squawk 4552. By this time the pilot had left controlled airspace and was clearly lost. He was transferred to Director on 120.125 as radar was very busy. The pilot was then given navigational assistance and transit back through the CTR towards his home airfield of Leicester (EGBG). Visibility was 9999, cloud base of 3300ft, QNH 1024.</p>
201412914	13/09/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	17 NE	D	CTA	OTHER	Reciprocating	1	Infringement of the Manchester CTA (Class D) by a microlight at 3400ft. Standard separation maintained.	<p>I became aware of an AIW alert just North of DESIG [Class D airspace, MAN CTA-3, 3000-3500'], traffic squawking 7000 and indicating 3400' north-westbound. I suspected it might have been a microlight, who had called previously and was under a Basic Service. The pilot had been instructed to remain outside CAS, and had read this back - at that point the a/c was below radar cover in the Pennines area. In response to the AIW alert, I issued the microlight with a squawk of 7351 - shortly afterwards this confirmed the infringing aircraft. I checked his level and the pilot confirmed he was at 3400' on our QNH of 1028. I informed him that he was actually inside CAS, but as there was no other traffic to affect him, cleared him to transit CAS not above altitude 3500', and placed him under a Radar Control Service. This was read back and complied with. Shortly afterwards the aircraft left CAS to the north-eastern corner of our zone. I issued another position report to the pilot and downgraded his service to a Basic Service. Shortly thereafter he requested a change to London Information, and left the frequency. There was no impact upon operations (apart from a slight increase in controller workload whilst resolving the situation) and no loss of separation.</p>

201412915	14/09/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted		G	Other	VANS	Reciprocating	1	Infringement of the Stansted TMZ2 (Class G) by an RV9. Traffic info given.	Whilst performing my duties as the Essex Radar/Stansted Director, I observed an unknown aircraft penetrate the Stansted TMZ 2 without a corresponding Mode A/C. I immediately stopped vectoring 2 aircraft downwind for RWY04 and informed the pilots of the reason why. It was discovered by conversation with North Weald Tower that the offending aircraft was an RV9, inbound to, and in communication with North Weald. The pilot reported to North Weald that he had forgotten to switch on his SSR which he then duly did. On observing the SSR of the RV9, I recommenced vectoring the inconvenienced aircraft to RWY04.
201412916	13/09/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	TMZ2	G	Other	CESSNA	Reciprocating	1	Infringement of the Stansted TMZ 2 (Class G) by an unknown aircraft. Traffic info given.	At approximately 1742 as I was turning an A319 onto a closing heading for R/W04 and I noticed a 7010 with no Mode C. I passed traffic to the A319 and kept it coming inbound to final approach as the heading I gave took it away from the unknown traffic which was passing behind the A319. The 7010 then left the TMZ 2 to the West. At 1748 the SS FIN controller then observed another 7010 with no Mode C. This did not affect operations. FIN called SX to see if they were still working it. But it then switched to 7000. The callsign for this unknown traffic given by SX.
201412918	14/09/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted		D	CTA	PIPER	Reciprocating	1	Possible infringement of the Stansted CTA (Class D) by a PA28R, indicating 2100ft. Standard separation maintained.	Whilst performing my duties as the Stansted Final Director I observed a PA28R, identified by Mode S, enter the southerly Stansted CTA with an indicated Mode C of 2100ft. CAA Closure: Pilot error. The root cause of this incident was lack of spatial awareness. The infringement test has been passed. Warning letter sent.
201412924	13/09/2014	EGTT : London (FIR)	EGNR : Hawarden	12nm W	A	Other	FLY BUY ULTRALIGHTS	Reciprocating	1	Infringement of Airway N864 (Class A) by an Ikarus C42 at 3400ft. Standard separation maintained.	I was the duty ADI controller when Ikarus C42 called at 1042 for a Basic Service. The pilot reported approximately 12nm West of Hawarden and all additional details from the aircraft were obtained and as the aircraft had reported at Alt 3700ft, I reminded the pilot to remain outside controlled airspace (ROCAS) and informed him that the base of CAS in the vicinity of Hawarden was Alt 3000ft - the pilot acknowledged this. A 7000 SSR Code matching the position of the pilots report was unofficially observed on the ATM with no mode C displayed. At approx 1049 I asked the pilot what his current altitude was and he reported that he was at Alt 3400ft. I asked him his position and he replied that his GPS was indicating 4 miles SSW of Hawarden. I responded by informing him that based on his position and altitude report I believed he was inside CAS and that the current cloud base was BKN010. The pilot responded by informing me that he was descending accordingly and subsequently reported at Alt 1000ft approx 3 mins later. Liverpool radar was subsequently informed of the aircraft details. The weather at the time was 16009 9000 BKN010 16/13 Q1029.
201412925	14/09/2014	EGTT : London (FIR)	EGNM (LBA): LEEDS BRADFORD	17 S	A	CTR	AVIONS ROBIN	Reciprocating	1	Infringement of the Leeds CTR (Class D) by an R2160 at an indicated FL55. Standard separation maintained.	At 1720Z Leeds phoned me (the North and East combined Planner) and mentioned a 7000 squawk just 17 miles South of Leeds airfield, and displayed as a CAIT infringer on the radar, at FL50, where the base was 3.5A. Neither us or Leeds Radar knew about that traffic. The traffic continued to move North and climbing very slowly to FL55, then he turned to the NE penetrating the Leeds Area, and shortly after heading towards its destination, as later found, Sherburn-in-Elmet. The traffic was an R2160.

201412930	14/09/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	11nm 060deg	D	CTA	PIPER	Reciprocating	1	Infringement of the Solent CTA (Class D) by a PA28 at 3400ft. Standard separation maintained.	At time 1413 a 7000 squawk indicating 3400 feet was observed tracking towards the Solent CTA to the NE of Bishops Waltham. I made several blind calls to this traffic with no reply, as it entered CAS bearing 060deg from SAM at 11nm, and tracked southbound. Farnborough Radar telephoned my ATSA as the infringement occurred and asked whether that particular a/c had called us, as it was an a/c that they had been working and had asked to call Solent Radar. The aircraft's details were passed as a PA28 routing EGTB to EGHA. After the a/c left CAS I was too busy to continue to track it, however that particular callsign did call me later, wishing to track under CAS westbound. No operational impact. □ Supplementary 19/09/14: □ The route has been flown approx six previous occasions over the past five years. This was the first time with an easterly wind. I was looking into the sun in slightly hazy conditions. Due to this and a warning from Farnborough Radar of intense glider activity at Lasham, I changed course to fly West (downwind) of Lasham, the opposite side from normal. Thereafter, I applied 10deg correction to my course plus 10deg of drift for the forecast wind as per F214. Since my nav is normally very accurate, I was not at all worried about this deviation to plan. However, it did mean that features that I would normally use to confirm my track (Petersfield and the A3 dual carriageway) were not available to me. But the approaching coastline looked "normal". The sun and slight haze meant that precise features on the coastline (ie more than just land and water) were identified much later than would normally be expected. At this stage I realised I was lined up with Southsea Island instead of
201412940	14/09/2014	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	NW	D	CTR	BEECH	Reciprocating	1	Infringement of the London CTR (Class D) by a Beech 36. Standard separation maintained.	Beech 36 was seen to infringe the London Control Zone setting off CAIT. Beech 36 penetrated the north west corner of the CTR tracking east with no Mode C height information. After tracking east for a while he eventually turned to the north and left the zone before landing at Denham (EGLD). I had an inbound on frequency at FL80 in the vicinity of the Beech 36 and turned him away to ensure the contacts didn't merge.
201412943	14/09/2014	EGTT : London (FIR)	EGNE : Repton/Gamston	4 NNE	D	CTR	PIPER	Reciprocating	1	Infringement of the Doncaster CTR (Class D) by a PA28 at 2000ft. Standard separation maintained.	A 7000 squawk was observed entering CAS North of GAM at 2000ft in the portion that has a base of 1500ft. The a/c tracked towards Daneshill Lake VRP and then left CAS. EGNE were contacted as the a/c appeared to have departed from them, they said it could possibly have been a PA28. A VFR zone transit was given traffic info against the infringer. The 7000 was observed changing to a Waddington squawk, Waddington were contacted and confirmed the a/c was a PA28 that had departed EGNE. The pilot then called to apologise on the frequency.
201413064	10/09/2014	EGTT : London (FIR)	EGBO : WOLVERHAMPTON		G	ATZ	OTHER	Turboshaft	1	Infringement of the Halfpenny Green ATZ (Class G) by a military helicopter.	Circuit active, traffic info given by ATC. No RT call received. Pilot later phoned to apologise. Wx 9kms in HZ.
201413066	09/09/2014	EGTT : London (FIR)	EGHO : Thruxton		G	ATZ	GROB	Reciprocating	1	Infringement of the Thruxton ATZ (Class G) by a G115.	

201413073	16/09/2014	EGTT : London (FIR)	BPK	065 15nm	G	Other	EUROCOPTER	Turboshaft	1	Infringement of the Stansted TMZ2 (Class G) by an EC120. Traffic info given.	I was mentoring when we noticed a 7000 contact with no Mode Charlie exiting the North Weald traffic zone and tracking through TMZ2. Trainee took an effective precautionary turn on a B737 to avoid this traffic and went downwind right hand with an appropriate check initiated with the tower controller. Farnborough LARS were contacted once the 5020 transponder was observed and confirmed they were talking to the traffic with no Mode Charlie.
201413127	17/09/2014	EGTT : London (FIR)	EGD406		G	Danger area	PIPER	Reciprocating	1	Infringement of Danger Area EGD406 (Class G) by a PA28 at 300ft.	
201413158	18/09/2014	EGTT : London (FIR)	EGLM : White waltham	3nm S	D	CTR	NORD	Reciprocating	1	Infringement of the Heathrow CTR (Class D) by an unknown a/c squawking 7000 indicating 1100ft, resulting in losses of separation with Heathrow inbounds. A/c identified as a Nord 1002.	An a/c was observed on a 7000 squawk infringing the London CTR SE of White Waltham. It was on a southerly track indicating altitude 1100 ft. The a/c changed to a Farnborough LARS squawk 0430 and details of the flight were gained from phoning them.☐ Supplementary 24/09/14:☐ Nord 1002 observed to leave the White Waltham LFA tracking SSW and subsequently infringed the London CTR, with Mode C indicating 1,100 feet unverified. As the a/c was already South of and tracking away from 09L final approach no action was taken with inbounds on 09L final. The infringing a/c was subsequently observed to leave the London CTR.☐ Supplementary 25/09/14:☐ I was the Trainee Controller under the supervision of my OJTI 10 minutes after plugging in to console. I was working Farnborough Approach and Farnborough LARS West positions bandboxed working towards my Level 3 check. Whilst working light traffic, a pilot called up on the Farnborough LARS West frequency requesting a Basic Service who was currently squawking 7000 at 1.4A just departed White Waltham. Upon looking at the Radar around the White Waltham area, there was one a/c in the vicinity squawking 7000 at 1.4A about 2 miles inside the Heathrow Control Zone tracking South. Based on no other a/c being in the area at the time, I was confident that this was the a/c who had requested a service from Farnborough LARS. I informed the pilot that I believed he was inside CAS and to track West immediately in order to be outside CAS. When the radar return suggested the pilot was now

I then spoke to Farnborough who identified the a/c, who they were instructing to descend immediately. No EGSS traffic was in the area at the time, so no action had to be taken to avoid the infringement.

201413324	19/09/2014	EGTT : London (FIR)	EGDY (YEO): Yeovilton	R/W04	G	ATZ	EUROCOPTER	Turboshaft	2	UK AIRPROX 2014/180 - EC135 and a Gardan GY80 at Yeovilton, in Class G airspace. Missed approach initiated by Gardan GY80.	CAA Closure:☐ This AIRPROX has been subject to a separate review by the United Kingdom AIRPROX Board (UKAB). AIRPROX Board (UKAB) information indicates that this AIRPROX was caused by the EC135 pilot flying into conflict with the Gardan GY80. Contributory Factors: 1. The EC135 pilot flew into a promulgated and active ATZ without ATC permission. 2. The EC135 pilot did not call on Yeovilton Tower frequency. A recommendation has been raised as a result of this AIRPROX.
201413324	19/09/2014	EGTT : London (FIR)	EGDY (YEO): Yeovilton	R/W04	G	ATZ	GARDAN	Reciprocating	1	UK AIRPROX 2014/180 - EC135 and a Gardan GY80 at Yeovilton, in Class G airspace. Missed approach initiated by Gardan GY80.	CAA Closure:☐ This AIRPROX has been subject to a separate review by the United Kingdom AIRPROX Board (UKAB). AIRPROX Board (UKAB) information indicates that this AIRPROX was caused by the EC135 pilot flying into conflict with the Gardan GY80. Contributory Factors: 1. The EC135 pilot flew into a promulgated and active ATZ without ATC permission. 2. The EC135 pilot did not call on Yeovilton Tower frequency. A recommendation has been raised as a result of this AIRPROX.
201413329	19/09/2014	EGTT : London (FIR)	Danger Area EGD036		G	Danger area	PIPER	Reciprocating	1	Infringement of Danger Area EG D036 (Class G) by a PA28 squawking 7000 at 3500ft.	I was controlling an a/c conducting a target tow within the Portsmouth Danger Areas D036, 037, 038, 039 & 040 up to 8000ft Portland QNH. I noticed a 7000 squawk crossing the FIR boundary at position 5003.47N00121.12W. At the same time I received a phone call from London Info informing me that they had received a call from the a/c stating he had crossed the FIR boundary and requested clearance to cross D036, upon realising he required clearance from Plymouth Mil he then called me on VHF. Initial reactions were to climb him to a safe altitude and give him a steer of 270 to clear the DA immediately. At the time the military a/c was NW of his position at a distance of approx' 26nm therefore I was content there was no immediate risk of collision. The PA28 was continuously monitored whilst inside D036 and vacated at 1133L at position 5012.57N 00134.46W.
201413367	21/09/2014	EGTT : London (FIR)	EGGP (LPL): Liverpool		D	CTR	PIPER	Reciprocating	1	Infringement of the Liverpool CTR (Class D) by a PA28 at 1400ft. Standard separation maintained.	At 1025 a 7000 squawk was observed tracking west across the northern section of the Manchester LLR (Ashton area); its Mode C briefly indicated altitude 1400 which caused the AIW alert to trigger. Mode S data indicated the traffic to be a PA28. Shortly afterwards the squawk changed to 7366, and as the aircraft continued tracking west towards (and within a mile of) the Liverpool CTR, I called blind and obtained contact with the pilot. I advised him that his track was taking him towards the Liverpool zone, and suggested a right turn towards the north. No acknowledgement was received, but shortly afterwards the aircraft was observed to turn left and enter the Liverpool CTR. I advised the pilot that he had entered the Liverpool CTR and amended his squawk to 7356, at which point the aircraft was observed to continue the left turn to leave the Liverpool CTR back into the LLR. The aircraft entered CAS by approximately 1 mile. The squawk confirmed the aircraft ident. I telephoned Liverpool to advise them of the infringement; they advised that they had no traffic to affect. I was vectoring inbound IFR traffic from ROSUN - I kept this at FL60 to assist with separation, which based on the QNH of 1026hPa, was achieved with in excess of 5000'. The PA28 then continued (correctly) south through the LLR, before leaving and changing to Shawbury radar.
201413369	21/09/2014	EGTT : London (FIR)	MCT	Bearing 300 Range 15nm	D	CTR	PIPER	Reciprocating	1	Infringement of the Liverpool CTR (Class D) by a PA28 initially squawking 7366 at 1300ft. Standard separation maintained.	At 1025 a 7000 squawk was observed tracking West across the northern section of the Manchester LLR (Ashton area); its Mode C briefly indicated altitude 1400 which caused the AIW alert to trigger. Mode S data indicated the traffic to be a PA28. Shortly afterwards the squawk changed to 7366, and as the a/c continued tracking West towards (and within a mile of) the Liverpool CTR, I called blind and obtained contact with the pilot. I advised him that his track was taking him towards the Liverpool zone, and suggested a right turn towards the North. No acknowledgement was received, but shortly afterwards the a/c was observed to turn left and enter the Liverpool CTR. I advised the pilot that he had entered the Liverpool CTR and amended his squawk to 7356, at which point the a/c was observed to continue the left turn to leave the Liverpool CTR back into the LLR. The a/c entered CAS by approximately 1 mile. The squawk confirmed the a/c ident. I telephoned Liverpool to advise them of the infringement; they advised that they had no traffic to affect. I was vectoring inbound IFR traffic from ROSUN - I kept this at FL60 to assist with separation, which based on the QNH of 1026hPa, was achieved with in excess of 5000'. A/c then continued (correctly) South through the LLR, before leaving and changing to Shawbury radar.

201413396	21/09/2014	EGTT : London (FIR)	EGKB (BQH): Biggin hill		G	ATZ	JODEL	Reciprocating	1	Infringement of the Biggin Hill ATZ (Class G) by a Jodel D140 squawking 7000 with no Mode C. Departures from R/W03 were stopped.	A/c was seen to enter ATZ from the East without any radio calls or permission to enter. It then routed out of the ATZ to the NW. All departures on R/W03 were stopped. The a/c showed SSR code 7000 on ATM, with no Mode C. The a/c then changed heading and routed towards EGKR and changed SSR to EGKR code. EGKR were telephoned to get a/c details.
201413427	21/09/2014	EGTT : London (FIR)	MCT	Bearing 306 Range 12nm	D	CTA	CESSNA	Reciprocating	1	Possible infringement of Manchester CTA (Class D) by a C172 squawking 7000 with Mode C indicating 2600ft. Standard separation maintained.	The AIW alert activated on a 7000 squawk which was observed to be entering CAS North of Manchester (MAN CTA-1, Class D, 2500'-3500'). The Mode C indicated an altitude of 2600' and the a/c was observed to be descending slowly towards Barton. No Mode S registration data was available, and blind calls to the traffic were made without success. I telephoned the PC WAL sector who were working an outbound a/c on a WAL1S departure, about 6 or 7 miles South of this 7000 squawk, but was advised that no AIW/CAIT alert was activating there. During the course of this call, PC advised that AIW briefly activated as the unknown traffic then appeared to enter the Manchester control zone (CTR Class D, 2000'-3500' over the Barton local flying area) indicating 2100' but descending. By this time it appeared that 5 miles separation (and increasing) had been achieved and WAL required to take no avoiding action / traffic info. I telephoned Barton and requested they allocate squawk 7350 to inbound traffic working them from the North - this was observed, and confirmed the identity as a C172. The pilot subsequently telephoned the Manchester Watch Manager to apologise for his error - however it should be noted that, allowing for +/- 200' Mode C tolerance, the a/c may have been considered to be just below CAS throughout. No loss of separation occurred and there was very little impact on controller workload.
201413427	21/09/2014	EGTT : London (FIR)	MCT	Bearing 306 Range 12nm	D	CTA	UNKNOWN	Turbofan		Possible infringement of Manchester CTA (Class D) by a C172 squawking 7000 with Mode C indicating 2600ft. Standard separation maintained.	The AIW alert activated on a 7000 squawk which was observed to be entering CAS North of Manchester (MAN CTA-1, Class D, 2500'-3500'). The Mode C indicated an altitude of 2600' and the a/c was observed to be descending slowly towards Barton. No Mode S registration data was available, and blind calls to the traffic were made without success. I telephoned the PC WAL sector who were working an outbound a/c on a WAL1S departure, about 6 or 7 miles South of this 7000 squawk, but was advised that no AIW/CAIT alert was activating there. No loss of separation occurred and there was very little impact on controller workload.
201413436	23/09/2014	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	NW	D	CTR	CESSNA	Reciprocating	1	Infringement of the London CTR (Class D) by a C152 at 1000ft. Traffic info given. Standard separation maintained.	At approximately 14:45z, the C152 was seen on radar to enter the north-western corner of the London Class D Zone at 1100ft. An R44 helicopter from EGTF was approximately 8miles South of the C152 and was told about the traffic and that it was infringing CAS and was asked if he was happy to continue his routing northbound. The pilot of the R44 reported the traffic in sight and confirmed the a/c was approximately 100ft below. Northolt Radar then informed me that the C152 had called D&D reporting he was lost. D&D then provided assistance in returning the a/c to its intended landing aerodrome of EGLD. Although I had informed EGLL Tower Supervisor of the situation, I advised him that the a/c was far enough away that separation against departures was not an issue but to monitor the traffic in case he started to route towards Heathrow.
201413444	21/09/2014	EGTT : London (FIR)	EGKB (BQH): Biggin hill		G	ATZ	SUPERMARINE	Reciprocating	1	Infringement of the Biggin Hill ATZ (Class G) and subsequent runway incursion by a Spitfire squawking 7000.	Aircraft make repeated attempts to establish 2 way communications on 129.400 however, the aircraft was suffering a receiver failure. As the pilot had not been given joining instructions it was expected that the aircraft would divert as the Airport Regulations as shown in the AIP state: "not available to aircraft unable to communicate with ATC" and the MATS Part 2 also indicates the same. The pilot then announced joining from the deadside although no mention of the runway in which he was joining for or the circuit direction was mentioned. 2 way communications was then briefly established after the aircraft had already entered the ATZ, the runway in use and QFE was passed to the pilot, at this time the pilot made mention that he had been unable to contact anyone else prior to me. The pilot was then given a "land after" as he had turned tight behind another aircraft but this was not read back as the receiver had failed again and the pilot had not heard this but landed anyway with an aircraft still on the runway. The aircraft then landed and taxied towards A4. Measures were underway to locate a ground vehicle to escort the aircraft across runway 11/29 as it was expected the pilot would not cross a runway without a clearance. The aircraft then crossed runway 11/29 without a clearance before the ground vehicle arrived. There was ample opportunity that the pilot could have shut down off of the taxiway without crossing a runway and then a vehicle could have been provided in order to escort the aircraft to its parking position or towed. At no stage was transponder code changed from 7000 to 7600 to indicate a radio failure.

201413447	21/09/2014	EGTT : London (FIR)	EGKB (BQH): Biggin hill		G	ATZ	PIPER	Reciprocating	1	Infringement of the Biggin Hill ATZ (Class G) by a PA28 at 1500ft.	The pilot made his first transmission passing altitude 1,500ft and climbing whilst already inside the ATZ. The historical track of the aircraft as shown on the ATM indicates that the aircraft had flown through the climbout runway 03/ final approach runway 21. The pilot appeared oblivious to the error.
201413501	27/09/2014	EGTT : London (FIR)	Hinton-in-the Hedges		G		MONNETT	Reciprocating	1	A/c flew through Hinton-in-the-Hedges parachute drop zone underneath two parachutists.	CAA Closure:☐ Pilot error. The root cause of this incident was poor airmanship. The pilot has been interviewed and has passed the on-line test. Warning letter sent.
201413519	24/09/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl		D	CTR	OTHER	Reciprocating	1	Infringement of the Manchester CTR (Class D) by a Steen Skybolt at 1800ft. Standard separation maintained.	Steen Skybolt infringed the top of the LLR at altitude 1800' from the North before turning toward EGCB. No other traffic was affected.☐ Supplementary 06/10/14:☐ I had been on a local aerobatic flight around Winterhill area at between 2,500ft and 3500ft and was returning to base at 1800ft QNH. Spontaneously realising that there was still a reasonable amount of daylight left before last landings, a decision was made to detour to the West via the overhead of a farm strip called Kenyon Hall Farm (which is situated just inside the low level route). A temporary loss of concentration caused me to forget that KHF is inside the LLR and so it never occurred to me to descend to 1300ft before entry into the low level corridor. On arrival back at EGCB I was asked if I would call Manchester ATC, I immediately realised what I had done.
201413521	24/09/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTA	CESSNA	Reciprocating	1	Infringement of the Luton CTA (Class D) by a C152 squawking 7000. Standard separation maintained.	A 7000 squawk set of Scait indicating 5500ft where the base of CAS is 4500ft, NNW of Luton airfield. It appeared to be performing tight orbits and was only just inside CAS. A319 was a downwind right hand release into Luton, still working TMA North. I telephoned NW coordinator pointing out the☐ infringer and suggested a heading of 100deg and to stop the descent at 6000ft, (in effect changing the 5000ft release to 6000ft). I felt this action would keep the A319 from coming too close to the infringer whilst not wanting to issue avoiding action to another controller over the phone when I did not know of their traffic, (think they were reasonably busy). The speed and relative positions of the a/c meant that they were not in conflict. Cranfield tower/approach telephoned with the details of the infringing traffic, (I am not sure how the controller knew of the infringement). The pilot telephoned the☐ GS Airports and stated that they thought they were at 4500ft. Analysis of the radar indicated that separation was maintained at all times.
201413521	24/09/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTA	AIRBUS	Turbofan	2	Infringement of the Luton CTA (Class D) by a C152 squawking 7000. Standard separation maintained.	A 7000 squawk set of Scait indicating 5500ft where the base of CAS is 4500ft, NNW of Luton airfield. It appeared to be performing tight orbits and was only just inside CAS. The speed and relative positions of the a/c meant that they were not in conflict. Cranfield tower/approach telephoned with the details of the infringing traffic, (I am not sure how the controller knew of the infringement). The pilot telephoned the☐ GS Airports and stated that they thought they were at 4500ft. Analysis of the radar indicated that separation was maintained at all times.

201413525	24/09/2014	EGTT : London (FIR)	EGLF (FAB): Farnborough civil		Other	Other	PIPER	Reciprocating	1	Infringement of Farnborough CAS-T by a PA28R at 1300ft.	Investigations indicate that the pilot was unaware of CAS(T) having failed to check NOTAMS thoroughly before flight. ☐ CAA Closure: ☐ The pilot will mark CAS(T) on charts in the area of intended flight. The on line test has been taken and passed. A warning letter has been sent.
201413525	24/09/2014	EGTT : London (FIR)	EGLF (FAB): Farnborough civil		Other	Other	CANADAIR	Turbofan	2	Infringement of Farnborough CAS-T by a PA28R at 1300ft.	Investigations indicate that the pilot was unaware of CAS(T) having failed to check NOTAMS thoroughly before flight. ☐ CAA Closure: ☐ The pilot will mark CAS(T) on charts in the area of intended flight. The on line test has been taken and passed. A warning letter has been sent.
201413533	25/09/2014	EGTT : London (FIR)	BKY	3 NW	D	CTA	CESSNA	Reciprocating	1	Infringement of the Stansted CTA/CTR (Class D) and by a C152 at 3500ft. Traffic info and avoiding action given. Standard separation maintained.	At 0853 an aircraft wearing a 7000 squawk entered the SS CTA at 3500ft indicated in the BKY area. Luton radar took avoiding action with an A319 who was in the vicinity at the time. I was acting as an OJT1 and my trainee dealt with the situation. The aircraft had Mode S and from that we obtained the registration. Blind calls were made on the Essex frequency to no avail. Check All was imposed. The aircraft then infringed the SS CTR at 1900 at Audley End and changed squawk to 7010. We called Andrewsfield and they confirmed he was inbound and on their frequency. We advised Andrewsfield of the position of the C152 and requested the aircraft leave the zone to the NE not above 1400ft. The aircraft tracked North but maintained 1600/1700ft. Inbound SS traffic received extended vectors to avoid. ☐ Supplementary 25/09/2014: ☐ I had received control of an A319 early from Essex radar. The a/c was level at 5000ft and I had turned it onto a closing heading for R/W26. At 08:53 an unknown a/c activated CAIT by entering CAS to the NW of the inbound, on a converging track. The unknown was indicating 3500ft where the base of CAS is 2500ft, with Mode S giving the callsign. I issued an avoiding action turn to the A319 and passed traffic info. The pilot stated they had the aircraft on TCAS, indicating 1600ft below. The unknown went on to further infringe the SS CTR, before eventually landing at Andrewsfield at 09:11.
201413533	25/09/2014	EGTT : London (FIR)	BKY	3 NW	D	CTA	AIRBUS	Turbofan	2	Infringement of the Stansted CTA/CTR (Class D) and by a C152 at 3500ft. Traffic info and avoiding action given. 201413557	23/09/2014	EGTT : London (FIR)	East of Tamworth Mast		D	CTA	JODEL	Reciprocating	1	Infringement of the Birmingham CTA (Class D) by a Jodel DR1050 squawking 0402 at 1700ft. Standard separation maintained.	Before takeoff I had looked at the 1/2 mill chart and decided that if I took off on R/W33 and turned right to pass North and East of the mast adjacent to the airfield, the mast being on the 1500/2000' CTA boundary. I would be NE of the 1500' section of CTA before getting to that level.....I was wrong. Fortunately I was using the 'listening squawk' procedure for Birmingham and they were able to call me and get me to descend. That said I believe I must have only just been above 1500' passing the CTR/CTA boundary. ☐ Supplementary 04/10/14:☐ 0010 squawk got airborne at 12:21 East of the Tamworth Mast (out of Shenstone) climbed 1700 feet. He was listening out and after called him identified and give him a service. He admitted the mistake and left the zone to the East and when arrived to his destination he called in with his details. Watch Manager on duty sent out questionnaire survey.
201413564	25/09/2014	EGTT : London (FIR)	Oulton Park	2nm West	D	CTR	ROBINSON	Reciprocating	1	Infringement of the Liverpool CTR (Class D) by a R44 squawking 7356 indicating 1200ft. Standard separation maintained. Pilot apologised.	7356 (Manchester ATC discreet code) squawk observed crossing the southern boundary of the Liverpool CTR approx 8n SSE of Liverpool Airport indicating 1200ft. Manchester ATC called on the direct telephone line as soon as the squawk appeared and advised that the aircraft would be turning eastbound towards the Manchester Low Level route in order to vacate the Liverpool CTR. I advised them that I had no traffic to affect the routing. Manchester ATC identified the aircraft as an R44 routeing to Blackpool who had made a navigational error. No other aircraft affected. ☐ Supplementary 03/10/14:☐ Aircraft established contact south of the Low Level Route with the intention of transiting. I subsequently lost radar contact and tried blind transmissions to ascertain his position. The squawk appeared again just inside the Liverpool zone 2 nm west of Oulton Park. I managed to re-establish communication with the pilot and instructed him to route east to enter the LLR. I asked him to call the WM on landing at Blackpool. He was very apologetic:☐ Supplementary 10/10/14:☐ Bad weather caused re-routing and incorrect re-programming of GPS noted as contributory factors.

201413565	26/09/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	7nm SW	D	CTR	PIPER	Reciprocating	1	Infringement of the Stansted CTR (Class D) and Stansted TMZ 2 (Class G) by a PA28 indicating 1900ft. PA28 entered TMZ 2 showing as a primary contact only and subsequently appeared as an RT fail. Standard separation maintained.	PA28 squawking 0013 entered CAS at the SW corner of Stansted Zone indicating 1900ft, tracking South. CHECK WEST established. PA28 continued South for 2nm entering TMZ 2 and then turned off the transponder and thus became a primary contact, once the contact was clear of the TMZ 2 the transponder appeared as a 7000 for a few moments. Next PA28 then appeared as an RT fail and orbited 3nm South of BPK. PA28 landed at destination at 16:06. Further details were given by Elstree via GS airports. Blind transmissions made by myself and Luton INT. PA28 identified using Mode S.
201413602	26/09/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	TMZ1	G	Other	SCOTTISH AVIATION	Reciprocating	1	Infringement of the Stansted TMZ 1 (Class G) by a Bulldog.	7010 squawk which was identified using Mode S entered TMZ 1 without any Mode C indication. Aircraft was tracking NE.
201413606	26/09/2014	EGTT : London (FIR)	EGCB : Manchester/Barton		D	CTA	PIPER	Reciprocating	1	Infringement of the Manchester CTA (Class D) by a PA28 squawking 7000, indicating 2300. AIW activated. Standard separation maintained.	At approximately time 1440Z the AIW alarmed in the vicinity of Barton with a return indicating 2300A and climbing. I called Barton, but due to the numerous returns in the vicinity was unable to click on the a/c to let them know its registration. DIR informed me it was PA28 and Barton said they would speak to him. The return continued to climb in the section of CTA with base 2500ft and converted to a Warton squawk. I phoned Warton and asked if they were working PA28. They were, and after a confirmation of QNH and the indicated altitude the return began to descend below 2000ft and below CAS. On coordination afterwards Warton said the pilot believed he was at 1800ft.☐ Supplementary 03/10/14:☐ A/c flying directly to me at 2,000 ft so I moved left (West) and climbed to give a good separation. I did not realise I was still in the Manchester CTA.
201413637	27/09/2014	EGTT : London (FIR)	EGVN (BZZ): Brize norton		D	CTR	PIPER	Reciprocating	1	Infringement of the Brize Norton CTR (Class D) by an unknown aircraft squawking 4520, indicating 1500ft. Aircraft identified as a PA32. Standard separation maintained.	I observed an a/c with SSR Code 4520 (Oxford conspicuity) Mode C indicating 1500ft enter the CTR and track on an easterly heading remaining inside the CTR for approximately 3 miles towards Oxford airport. I requested traffic info from Oxford and they requested that the a/c, vacate the CTR. ☐ Supervisors Narrative:☐ I was the controller involved and ATCO IC. I requested traffic info from Oxford and they requested the a/c vacate the airspace. The a/c callsign was PA32. There were no other a/c inside the CTR at the time of this occurrence.☐ CAA Closure:☐ Pilot error, spatial awareness issue. Warning letter sent, on-line test passed.
201413649	28/09/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	15.7nm bearing 195deg	D	CTA	EUROPA	Reciprocating	1	Infringement of the Solent CTA (Class D) by a Europa at 2700ft. Traffic info and avoiding action given. Standard separation maintained.	At approximately time 1035 I saw a 7000 squawk indicating 2700 feet heading for CAS, SW of Cowes. I pointed this out to the Solent Radar controller, who tried calling it with no success. As the contact entered, bearing 195 from SAM at 15nm, I gave avoiding action and traffic info to the DHC8 who was inbound to Southampton from the South, and do not believe that separation was lost. I also tried blind calling the traffic with no success. Bournemouth Radar were contacted but were not working the traffic. The contact left bearing 180 from SAM at 13nm, and was tracked for a short while tracking East along the coast. DHC8 inbound delayed by approximately 2 minutes due to the avoiding action.☐ Supplementary 09/10/14:☐ Failed to see line on chart indicating lowering of lower height limit from 3500 to 2000 ft. Change of chosen destination caused a lack of thorough flight planning. ☐ Supplementary 23/10/14:☐ The a/c entered the Solent Control Area without a clearance, which was caused by a map reading error in relation the base of the CTA.

201413649	28/09/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	15.7nm bearing 195deg	D	CTA	DE HAVILLAND	Turboprop	2	Infringement of the Solent CTA (Class D) by a Europa at 2700ft. Traffic info and avoiding action given. Standard separation maintained.	At approximately time 1035 I saw a 7000 squawk indicating 2700 feet heading for CAS, SW of Cowes. I pointed this out to the Solent Radar controller, who tried calling it with no success. As the contact entered, bearing 195 from SAM at 15nm, I gave avoiding action and traffic info to the DHC8 who was inbound to Southampton from the South, and do not believe that separation was lost. I also tried blind calling the traffic with no success. Bournemouth Radar were contacted but were not working the traffic. The contact left bearing 180 from SAM at 13nm, and was tracked for a short while tracking East along the coast. DHC8 inbound delayed by approximately 2 minutes due to the avoiding action.☐ Supplementary 09/10/14:☐ Failed to see line on chart indicating lowering of lower height limit from 3500 to 2000 ft. Change of chosen destination caused a lack of thorough flight planning. ☐ Supplementary 23/10/14:☐ The a/c entered the Solent Control Area without a clearance, which was caused by a map reading error in relation the base of the CTA.
201413650	28/09/2014	EGTT : London (FIR)	LON	18nm W	A	TMA	DIAMOND	Reciprocating	1	Infringement of the LTMA (Class A) by an unknown aircraft squawking 7000, climbing to 3000ft, resulting in loss of separation with three inbound aircraft. Infringer identified as a DA40. Traffic info given.	I was operating as the FIN controller when my INT S colleague pointed out to me that there was an infringer on about an 18mile final. A380 was going to be in conflict, so I turned it away and gave traffic info. I then vectored A380 around the infringer and made sure I kept it in CAS. I updated the traffic info as the situation developed. I am unsure if the a/c before the A380 lost separation as I had not seen the CAIT indication.☐ Additional information 30/09/14:☐ As a consequence of this event, separation was lost against three inbound a/c and a/c had to be vectored away and delayed. DA40 was identified as the aircraft involved using Mode S data. Radar pictures show DA40 within the LTMA with Mode C initially indicating 2600' (base CAS 2500'), but climbing to 3000' (initially evident as a 7000 squawk).☐ Supplementary 30/09/14:☐ I entered the EGTB QFE, but while I was looking out for other a/c around the circuit and lining up for a possible straight in approach, I failed to realise that the a/c, which was still on autopilot, was climbing due to the entering of the QFE and the fact that EGTB is Alt 510 ft. This in effect took me from just under 2500ft and clear of airspace up to 3,000 ft and into the LTMA. There was no instrument warning on the GPS. After I guess 2 minutes, still on autopilot, I reset for 1500 ft and began a 500 ft per minute descent. Neither I not my co pilot had any ideas we had infringed airspace at this time.
201413650	28/09/2014	EGTT : London (FIR)	LON	18nm W	A	TMA	AIRBUS	Turbofan	4	Infringement of the LTMA (Class A) by an unknown aircraft squawking 7000, climbing to 3000ft, resulting in loss of separation with three inbound aircraft. Infringer identified as a DA40. Traffic info given.	I was operating as the FIN controller when my INT S colleague pointed out to me that there was an infringer on about an 18mile final. 201413661	28/09/2014	EGTT : London (FIR)	EGGP (LPL): Liverpool	9 NE	D	CTR	PIPER	Reciprocating	1	Infringement of the Liverpool CTR (Class D) by a PA28 at 1500ft. Standard separation maintained.	PA28 from Barton to Caernarfon. Given a Basic Service in the Low Level Corridor but no clearance to cross CAS as I was busy with 3 IFR inbounds, Co-ordination with Hawarden on training traffic and other VFR flights. When I got back to the PA28 I noticed a primary contact orbiting NW of St Helens 3 miles inside CAS. This was identified. He was informed he had entered CAS and was given a clearance to cross not above 1500ft VFR. No other traffic was affected.
201413664	26/09/2014	EGTT : London (FIR)	R153 Hinkley Point		G	Restrict ed area	TAYLORCRAFT	Reciprocating	1	Infringement of R153 by a Taylorcraft F22A.	A/c was routing from EGHA to EGFH. The a/c called Cardiff in the Burnham-on-Sea area requesting to transit Cardiff CAS to Nash point at approx altitude 2000ft. This transit was not possible due to the proximity of this track to the R/W30 final approach and 12 climbout with pending IFR movements. The pilot was advised and alternative routings suggested either North via Cardiff City and the M4 or to the South of Cardiff CAS, remaining outside of CAS. The pilot elected to route South. The a/c was placed under a Basic Service and instructed to remain outside of CAS. At approx 1648 the DAIW safety net provided an alert that the a/c was approaching R153 (Hinkley Point) at altitude 1800ft. R153 is notified upto 2000ft altitude Wessex Regional (1021hpa). I advised the pilot and he acknowledged. However, the pilot did not appear to take corrective action and entered R153. I advised the pilot he was now inside R153 and repeatedly suggested corrective action.☐ Supplementary 08/10/14:☐ The incident will be included in the briefings to the local GA community this winter. The infringement email will be sent to the pilot.
201413785	30/09/2014	EGTT : London (FIR)	EGLC (LCY): London city	4NE	D	CTR	BEAGLE	Reciprocating	1	Infringement of London City CTR (Class D) by a B121 that lost separation with an a/c inbound to LHR and an a/c inbound to Biggin. London City departures stopped.	Unknown primary contact which had previously infringed the London City zone was 3 miles East of Brands Hatch when I took over Thames Radar. The contact made a 180deg turn and started to track back on the reciprocal route. I phoned EGLC and the AIR controller said he could see it on the ATM. The primary contact was identified by a LF LARS East aircraft as being a PA28 type at approximately 800ft. The a/c then re entered the London City zone on the Eastern edge abeam the KB 8nm ILS marker and tracked towards Belmarsh prison. As it entered CAS I confirmed departures had been stopped at EGLC and the SVFR controller applied a Check All. The contact turned North and tracked up the Eastern side of the Belmarsh Restricted Area before tracking NNE to leave the zone. EGLC confirmed it was a PA28 as it passed through final approach 2nm East of EGLC. Approximately 2nm South of EGSG the a/c turned and tracked East before turning North again. The contact was eventually lost South of EG SX. A primary contact reappeared briefly on the same track as the infringer before disappearing again approximately 1nm West of EG SX.☐ Appropriate CAA action is to be taken as a result of this incident.
201413785	30/09/2014	EGTT : London (FIR)	EGLC (LCY): London city	4NE	D	CTR	UNKNOWN	Unknown		Infringement of London City CTR (Class D) by a B121 that lost separation with an a/c inbound to LHR and an a/c inbound to Biggin. 201413799	30/09/2014	EGTT : London (FIR)	EGUW : Wattisham	22.6nm SW	D	CTR	CESSNA	Reciprocating	1	Infringement of the Stansted CTR (Class D) by a C152 flown by a student pilot who had been unsure of their position. Radar based navigational assistance was given until C152 pilot reported visual with intended airfield. Avoiding action given.	Student Pilot - Unsure of Position Approaching CAS. I was the radar controller at Wattisham when I received a telephone call from Earls Colne at approx. 12:40 informing me that they had a student on frequency, C152, on a navex that was unsure of his position and they would like me to provide radar-based navigational assistance. The pilot called at 12:41 and was identified on the Wattisham 247/22.6 at 1500', just inside of the Stansted CTR on the extended centreline of their runway. The a/c was turned immediately East and descended with his own terrain, to clear CAS. A telephone call was initiated to Essex Radar to confirm my actions and details of the a/c were passed, which were confirmed on a subsequent call. The a/c was vectored to the overhead of intended airfield and the airfield's position was called several times. Permission to enter the intended airfields ATZ at 1400' was granted. In the overhead of intended airfield, the pilot reported visual with the airfield and was transferred to freq 122.425. The 1150Z weather at Wattisham was giving 230/8, 20Km, nil, few/2000' with a 2000' wind 270/20.
201413833	29/09/2014	EGTT : London (FIR)	EGCB : Manchester/Barton	2 NNE	D	CTA	PIPER	Reciprocating	1	Infringement of the Manchester CTA (Class D) by a PA28 at 2800ft. Standard separation maintained.	AIW NNE of EGCB northbound. Mode S identified the a/c as a PA28, climbed to A28. Telephoned EGCB and asked them to instruct a/c to descend. A/c descending as it left CAS. No inbounds or outbounds affected.☐ CAA Closure:☐ Pilot error, lack of situational awareness. A warning letter has been issued.
201413834	01/10/2014	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	5.5 W	D	CTR	PIPER	Reciprocating	1	Infringement of the London CTR (Class D) by a PA24 showing as a primary contact only. Separation lost.	Shortly after taking over the position, my trainee, noticed a primary contact just South of Burnham tracking South. He alerted Heathrow tower who advised they had also noticed it and during the conversation with them they advised that they had visual contact with an a/c in that location. Departures were suspended and the a/c tracked. Attempts were made to identify it through Fairoaks. White Waltham and Denham. D&D were also informed and a blind transmission was made. The a/c at various times was East of Ascot left the zone near White Waltham, re-entered, Northbound departures suspended again and flew towards Northolt who also tried to identify the a/c before eventually leaving again to the East of Denham. Luton was informed and advised of its position. Following tracing action, I was informed by the W/S of the identity of the a/c.☐ Supplementary 02/10/14:☐ A/c on take off flew in a very erratic manner before flying through the London CTR and allegedly landing wheels up at his destination. ☐ Supplementary 01/10/14: I was the VCR Supervisor when the the Air N departures controller brought to my attention a primary contact about 6nm to the West of Heathrow. The contact seemed to be tracking South following the Burnham Ascot low level route. Departures were stopped and coordination with TC and SVFR ensued. Two flights were turned early on northbound departures. I obtained visual contact with the traffic, it appeared to be a fast moving, low level, low wing light a/c. It then turned northbound and exited the zone eventually near White Waltham. Departures resumed temporarily and were then stopped
201413834	01/10/2014	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	5.5 W	D	CTR	UNKNOWN	Unknown		Infringement of the London CTR (Class D) by a PA24 showing as a primary contact only. 201413876	02/10/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl		D	CTR	PIPER	Reciprocating	1	Infringement of Manchester CTA (Class D) by a PA28 at 2400ft. The a/c was observed to enter Manchester TMA (Class A) at 3500-3600ft (base 3500ft).	At 1440z a 7000 squawk was seen setting off the AIW system on the radar indicating 2100ft just North of Barton airfield. The a/c continued to climb to indicate 2400ft. Mode S gave the a/c as a PA28 and I advised Barton to pass on not above altitude 2000ft on Manchester QNH at the time this had no effect on the a/c. No IFR a/c were affected by the infringement. At 1447 the same a/c had moved North and set off the AIW near Rosun indicating 3500ft/3600ft after the previous infringement I turned an Embraer left 10deg to keep well clear of the PA28. I coordinated this turn with North P and advised them of the reason for it. WM was informed and EGCB were asked to get the pilot of the PA28 to call the WM after they had landed too. ☐ Supplementary 03/10/14: ☐ Normally (95% of the time) Barton operates from R/W09/27 and on this day R/W27 was indicated as in operation while preparing for the flight at Barton. Once in the a/c my initial radio call indicated that R/W20 was now in operation. R/W20 at Barton is very rarely used and I have not used this runway for many years. As R/W20 meant an initial departure to the South this placed me further South than normal so causing me to misjudge the time at which I could climb from below 2000ft to below 2500ft. ☐ CAA Closure: ☐ Pilot error, spatial awareness issue. Warning letter sent.
201413886	02/10/2014	EGTT : London (FIR)	EGSX : North Weald	270 3nm	G	Other	PIPER	Reciprocating	1	Infringement of the Stansted TMZ2 (Class G) by a PA24.	At 13.38 I became aware of a primary contact 3 miles West of EGSX tracking West. The contact was just inside TMZ2 which it left at 13.41. It was then 3.5 miles from BPK bearing 105deg. The contact then began to squawk 5020, which is a Farnborough LARS code. Farnborough informed me that the a/c was a PA24 routing EGSX to Hardwick. The infringement of TMZ2 had no effect on operations.
201413915	02/10/2014	EGTT : London (FIR)	EGGP (LPL): Liverpool	10nm North East	D	CTR	PIPER	Reciprocating	1	Infringement of the Liverpool CTR (Class D) by a PA18 squawking 4360 at 1300ft. Standard separation maintained.	Manchester Radar called us to advise that an a/c that they were providing a service to may have drifted into the Liverpool CTR in the vicinity of Warrington (approximately 10 miles NE of Liverpool, (near the Burtonwood VRP). The a/c was identified as a PA18 on a photographic survey. We elected to have the a/c contact us for the remainder of the detail, but the a/c had already completed the westernmost part of the photo survey and spent the remainder of the time on frequency outside of the Liverpool zone. No other a/c were affected.
201413953	30/09/2014	EGTT : London (FIR)	Wethersfield				CESSNA	Reciprocating	1	Infringement of the Stansted TMZ1 (Class G) by a C152 indicating 1700ft. Traffic info given.	Working as Essex Radar bandboxed, at approx 1238 I spotted C152 in TMZ1 near Wethersfield indicating 1700 feet. I called him several times and asked Farnborough LARS and SS tower to do the same but to no avail. B737 was on a left base for R/W22 but had to be turned away from the ☐ infringing a/c. The a/c continued SW bound towards the Final Approach. At approx 1242, I noticed the a/c on a Wattisham squawk and was ☐ subsequently called by them. It was a student pilot who was unaware of their position. UW turned the a/c east bound to leave the zone.
201413953	30/09/2014	EGTT : London (FIR)	Wethersfield				BOEING	Turbofan	2	Infringement of the Stansted TMZ1 (Class G) by a C152 indicating 1700ft. Traffic info given.	Working as Essex Radar bandboxed, at approx 1238 I spotted C152 in TMZ1 near Wethersfield indicating 1700 feet. I called him several times and asked Farnborough LARS and SS tower to do the same but to no avail. B737 was on a left base for R/W22 but had to be turned away from the ☐ infringing a/c. The a/c continued SW bound towards the Final Approach. At approx 1242, I noticed the a/c on a Wattisham squawk and was ☐ subsequently called by them. It was a student pilot who was unaware of their position. UW turned the a/c east bound to leave the zone.

201413961	03/10/2014	EGTT : London (FIR)	Stansted TMZ 2		G	Restricted area	CESSNA	Reciprocating	1	Infringement of the Stansted TMZ 2 (Class G) by an unknown a/c. A/c identified as a C172.	At approximately 1435 an unknown contact entered TMZ 2 SW of North Weald. I put a check all on. I called North Weald to see if they were speaking to the unknown traffic which they said no. The unknown contact entered the CTR and then turned eastbound. It then showed 7010 with Mode C. I called North Weald to get the a/c callsign and type. No other traffic was affected.
201413962	03/10/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	Bearing 280 Range 12nm	D	CTR	CESSNA	Reciprocating	1	Infringement of the Luton CTR (Class D) by a C150 squawking 7000 at 2300ft. CAIT activated. Check all restriction placed on Luton outbounds. Standard separation maintained.	At approximately 1556 I saw a 7000/C return approach the north western zone boundary at 2300 feet. Shortly afterwards, the a/c entered CAS and. CAIT activated. I placed a Check All restriction on the Luton outbounds and gave traffic info to the tower. I also agreed a course of action in the event of the a/c on final to R/W26 carrying out a missed approach. The infringing a/c stayed inside CAS for about 7 minutes, eventually leaving to the West. I had made several blind calls using the aircraft's mode S ident to no avail. My colleague telephoned Halton, as he recognised the ident, and the a/c was transferred to me. I identified it (using a 4670 code and mode S) and after ensuring he knew his present position I suggested he returned to the Halton frequency. CAA Closure: Pilot error. Pilot focussing too much on the lesson to the detriment of navigation. Extensive debrief with Staff FE. Passed on-line test, warning letter sent.
201413965	07/10/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	10nm South East	A	TMA	CESSNA	Reciprocating	1	Possible infringement of the Stansted CTR, CTA (Class D) and London TMA (Class A) by a C152 indicating 3600ft. CLN freeflows were suspended. See investigation under 201411066.	C152 indicating 3600' and turned magenta. As coordinator on NORTH I suspended CLN freeflow as a precautionary measure.The aircraft descended clear of CAS after SS tried a blind transmission on their frequency. A EGCL CLN departure was co-ordinated on a heading against this return however shortly after this was co-ordinated the infringing aircraft descended clear of CAS. No departures were delayed, and it didn't affect any other aircraft in the sector.
201413988	03/10/2014	EGTT : London (FIR)	EGBB (BHX): Birmingham	175 12nm	D	CTA	ZENAIR	Reciprocating	1	Infringement of the Birmingham CTA (Class D) by a Zenair CH601 (believed) at 4300ft. Standard separation maintained.	At 1012 observed a 7000 at 4300 feet North of Snitterfield (12nm S of EGBB) infringing the airspace. After several transmissions nobody contacted us and it was negative Mode C. Coventry and Wellesbourne haven't talked with it either. I was working another OCAS traffic in close proximity who confirmed that it is a low wing single engine aircraft. We observed the traffic, but went below radar coverage several time, so we lost his route and destination.
201413999	02/10/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	6nm North East	D	CTR	PIPER	Reciprocating	1	Infringement of the Gatwick CTR (Class D) by a PA28 at 1300ft. Separation lost with B787 on a SAM departure.	PA28 entered the Redhill zone from the North at 2300ft. Redhill was informed and the a/c was asked to descend. A check on Gatwick right turn out departures was placed. A/c continued to track southeast bound at 1300ft . At this time SAM departure B787 was just getting airborne. B787 was instructed to be given to Gatwick FIN on 118.950 and also Redhill was asked to transfer PA28 to 118.950. All other Gatwick departures were stopped until the PA28 left the Gatwick zone. Supplementary 16/10/14: Bad visibility, low cloud and mist. Interference on the radio at Redhill. CAA Closure: Pilot error, spatial awareness. Passed on-line test, interviewed, flight with Staff FE.

201413999	02/10/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	6nm North East	D	CTR	BOEING	Turbofan	2	Infringement of the Gatwick CTR (Class D) by a PA28 at 1300ft. Separation lost with B787 on a SAM departure.	PA28 entered the Redhill zone from the North at 2300ft. Redhill was informed and the a/c was asked to descend. A check on Gatwick right turn out departures was placed. A/c continued to track southeast bound at 1300ft . At this time SAM departure B787 was just getting airborne. B787 was instructed to be given to Gatwick FIN on 118.950 and also Redhill was asked to transfer PA28 to 118.950. All other Gatwick departures were stopped until the PA28 left the Gatwick zone.☐ Supplementary 16/10/14:☐ Bad visibility, low cloud and mist. Interference on the radio at Redhill. ☐ CAA Closure:☐ Pilot error, spatial awareness. Passed on-line test, interviewed, flight with Staff FE.
201414002	04/10/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	295 11nm	D	CTR	PIPER	Reciprocating	1	Infringement of the Manchester CTR (Class D) by a PA28 indicating 1900ft. Standard separation maintained.	A/c squawking 7000 infringed CTR in vicinity of Warrington (LLR) 1900ft. Mode S indicated a PA28. No traffic in vicinity, no response to blind call, Barton informed.☐ Supplementary 09/10/14:☐ I have completed this flight/route many times and usually maintain a listening watch on Manchester while squawking 7366 for identification purposes. Once I have reached Warrington town centre using the church as a land mark I then turn easterly onto a track of approximately 050 depending on wind conditions to head for Barton. Then once clear of the low level route climb to 1800 on Barton QFE to do a overhead join at Barton. I was advised by ATC that I had climbed to 1900 just to the East of Warrington. ATC also advised that there was no conflict with any other traffic. I do not recall going that high, I believe I climbed to 1800 QFE heading for Barton. I have done this many times with no issues and I am unclear as to how this happened. I do know I will take more care in future flights.
201414026	05/10/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	007 Deg 11.1nm	D	CTA	PIPER	Reciprocating	1	Infringement of the Solent CTA (Class D) by a PA32. Traffic info given. Standard separation maintained.	At approximately 1441 I noticed a 0433 squawk outside CAS to the North of the Solent CTA but on a track which would shortly infringe. I telephoned Farnborough and they advised that they would transfer the traffic to me. The contact infringed at 1442. No call was received from any a/c and so I telephoned Farnborough again, who gave me the aircraft's details and advised that they had attempted to transfer it to me. The a/c eventually called while still inside the CTA. ☐ Supplementary 24/12/14:☐ The a/c entered the Solent Class D Control Area whilst in receipt of a service from Farnborough LARS West, although at the time it would appeared the a/c was not in two-way contact with the unit. The pilot reports a GPS failure, which may have been a contributory factor towards the infringement.
201414031	05/10/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTR	DIAMOND	Reciprocating	1	Infringement of the Luton CTR (Class D) by a DA40 at 2000ft. Separation lost.	A7000 indicating C1900/2000ft altitude entered EGGW zone in the SW corner. The contact made two orbits and then left CAS to the South. I was acting as an OJTl at the time.☐ Supplementary 27/1/2015: The rate of closure between the two aircraft was medium (110kts). The loss of separation was caused when DA40 infringed the Luton CTA bringing it in to confliction with AHO468K on approach to Luton. The controller was therefore unable to detect the potential conflict, formulate and execute a plan. The pilot contacted Coventry ATC to request navigational assistance. The incident was resolved by a/c(2) turning on to the final approach track away from the DA40.
201414031	05/10/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTR	UNKNOWN	Unknown		Infringement of the Luton CTR (Class D) by a DA40 at 2000ft. Separation lost.	A7000 indicating C1900/2000ft altitude entered EGGW zone in the SW corner. The contact made two orbits and then left CAS to the South. I was acting as an OJTl at the time.☐ Supplementary 27/1/2015: The rate of closure between the two aircraft was medium (110kts). The loss of separation was caused when DA40 infringed the Luton CTA bringing it in to confliction with AHO468K on approach to Luton. The controller was therefore unable to detect the potential conflict, formulate and execute a plan. The pilot contacted Coventry ATC to request navigational assistance. The incident was resolved by a/c(2) turning on to the final approach track away from the DA40.

201414034	05/10/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTR	VANS	Reciprocating	1	infringement of the Luton CTR (Class D) by a Vans RV6 at 1900ft. Standard separation maintained.	At 1344 I was on duty as GW INT U/T with my instructor. I noticed a 7000 sqk enter the SW corner of the Luton CTR at A1.9. I called the tower to check departures. One was lined up on the runway but was held due to the check all. The 7000 sqk tracked east before realising its mistake and headed south to leave the CTR. When it left the CTR freeflow was resumed. No separation was lost and no inbounds were delayed. It was traced to EGML and landed at 1401.
201414036	05/10/2014	EGTT : London (FIR)	EGGD (BRS): Bristol/Lulsgate	210 8nm	D	CTA	SCHEIBE	Reciprocating	1	Infringement of the Bristol CTA (Class D) by an SF25 at 4600ft. Standard separation maintained.	Halesland Block A was active up to 4000ft. The SF25 infringed Bristol CAS between 4000ft and 4600ft approximately 1-2nm SW of Cheddar reservoir whilst towing gliders on a 7000 squawk. The Bristol Radar 2 controller made contact with the a/c on 125.650 and asked the pilot to call the Bristol ATC Watch manager after landing. No other a/c were affected.☐ Supplementary 14/10/14:☐ While aero-towing a glider to a pre-requested release height of 5000 QNH (Block "A" having been opened by our duty instructor) we climbed directly overhead Halesland Airfield in a westerly direction. I appreciated we were apporoaching the western limit of block "A" and turned onto a reciprocal easterly heading (via South) , navigation was a little compounded by the glider doing various exercises behind the tow, which put additional responsabilites on me. After leveling the wings I heard the Bristol ATC requesting identification of an a/c in my position and at my height. I responded to that request, for although I was monitoring the frequency I do not hold a radio licence. I contacted Bristol ATC on landing.
201414037	05/10/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	184 Deg 12.6nm	D	CTA	PIPER	Reciprocating	1	Infringement of the Solent CTA (Class D) by a PA28 at 2000ft. Standard separation maintained.	AIW alarmed for a 0452 squawk indicating 2000ft West of Cowes by 4nm. I contacted EGLF to check the level and intentions of the 0452. The EGLF ATCO confirmed that the 0452 squawk had been validated and verified and was at 2000ft. I advised the EGLF ATCO that at 2000ft the a/c was inside the Solent CTA. The EGLF ATCO said he could not see it. I asked for the details of the a/c. The 0452 squawk continued east bound and left the Solent CTA before climbing further.☐ Supplementary 09/10/14:☐ The day following my flight, I was asked to contact Southampton regarding an infringement. The conversation I had revealed to me that: When returning to Fair Oaks from the Needles, along the North coast of the IoW, approximately 1.5 to 1 nm West of Cowes, I climbed to a height of approximately 2100 feet, breaking the 2000 restriction by some 100 feet. I am aware of the restriction, and thought I was clear of the Solent CTA as I approached Cowes. Having had time to reflect on my error, I can only think I allowed myself to become distracted by another a/c - I think a PA-28 - flying below and in my 2 o'clock position, I think he was circuiting Cowes. I watched this a/c as it flew underneath and behind me, northwards towards Lee-on-Solent. I should think he was flying at around the 500 feet level, but I can't be sure. He was certainly not a problem to me; nevertheless, I wanted to keep an eye on him. This circumstance may offer some reason as to why I broke the 2000 feet restriction when approaching Cowes. I was unaware of this until my conversation with Southampton. Needless to say, I am very sorry for it. ☐
201414040	05/10/2014	EGTT : London (FIR)	EGCB : Manchester/Barton		D	CTA	PIPER	Reciprocating	1	Infringement of the Manchester CTA (Class D) by a PA24 at 2200ft. Standard separation maintained.	At approximately time 1515Z the AIW indicated a return squawking 7000 leaving Barton from the north indicating A22 and climbing. Barton were phoned immediately and when able we identified the a/c. Barton instructed the a/c he had infringed CAS at which point he began to descend to remain beneath CAS.
201414084	05/10/2014	EGTT : London (FIR)	EGBB (BHX): Birmingham	Bearing 080 Range 6nm	D	CTR	CESSNA	Reciprocating	1	Infringement of the Birmingham CTR by a C182. Check all put in place and A319 broken off approach. Traffic info and avoiding action given.	Working as OJT1 on Radar 1 I noticed a primary only contact approaching the CTR from the East tracking Westbound which I pointed out to my trainee to ensure that he was aware of a possible zone infringement. A 'check all' was put in place with the Tower and they were asked to look out for the traffic☐ once it had infringed to see if they could make out an a/c type. A blind transmission was made to ascertain whether or not the a/c was on listening out on RAD 1 frequency and a phone call made to Coventry to find out if they were working the a/c. When the a/c infringed an A319 had just turned onto the ILS which was broken off at 3000 feet and vectored out to the West along with an EMB170. The infringing a/c continued to fly towards the airfield and when SE by 2 miles looked as though it may make an approach to R/W33, however the a/c orbited and started tracking toward Coventry. An inbound A321 was inbound to Honiley and was given vectors to remain at least 5 miles away from the infringer. Coventry rang to say that the infringer had called them and was a C182 and the a/c proceeded to Coventry. Check All was lifted and inbounds vectored for approaches. Delay to the A319 and EMB170 was approximately 10 minutes, but minimal to the A321.

201414084	05/10/2014	EGTT : London (FIR)	EGBB (BHX): Birmingham	Bearing 080 Range 6nm	D	CTR	AIRBUS	Turbofan	2	Infringement of the Birmingham CTR by a C182. Check all put in place and A319 broken off approach. Traffic info and avoiding action given.	Working as OJTI on Radar 1 I noticed a primary only contact approaching the CTR from the East tracking Westbound which I pointed out to my trainee to ensure that he was aware of a possible zone infringement. A 'check all' was put in place with the Tower and they were asked to look out for the traffic: once it had infringed to see if they could make out an a/c type. 201414264	08/10/2014	EGTT : London (FIR)	EGLC (LCY): London city	315 6nm	D	CTA	PIPER	Reciprocating	1	Infringement of the London City CTA (Class D) by a PA28 at 2000ft.	On duty as LL SVFR when I noticed a EGLF LARS North a/c squawking 5020 and indicating 2000 feet on Mode turning South very close to the northern boundary of the EGLC CTA. This a/c then entered the EGLC CTA causing CAIT to activate. I rang EGLF LARS North immediately who advised that the a/c was being instructed to turn northbound to leave CAS as well as stopping departures from EGLC R/W 27 as a precaution until I had verified that the infringing a/c was under positive control and had left CAS. At the time of infringement a EGLC departure was airborne but was north of EGLC and heading away from the conflicting traffic. Supplementary 08/10/2014: I was working as the LARS North Controller on a quiet bandboxed LARS North and East Sector. PA28 was handed over to me from the LARS West controller at 1312z passing EGTB Eastbound. I changed the aircraft's squawk to 5020 and gave him the London QNH of 994HPa. The pilot informed me that he was going to be routing along the top of the London Zone and I acknowledged this. On passing EGTR the pilot told me that he was going to be turning in 3 minutes and if this was ok. I cannot remember if he mentioned a direction of turn. I replied affirm, assuming he would be turning North towards Duxford - his destination. The pilot called me again a few minutes later to say that he would be turning right towards a beacon. I asked if it was the BPK as this was the VOR to the North of him enroute to Duxford. He replied no, a gave me a 5 letter beacon that I was not familiar with. I assumed that this Beacon he wanted to turn towards was to the North on the way to Duxford so
201414267	07/10/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	14nm N	D	CTA	CESSNA	Reciprocating	1	Possible infringement of the Luton CTA (Class D) by an unknown aircraft squawking 7000, indicating 3700ft. Aircraft identified as a C172.	A7000 indicating C3700ft tracking East infringed Luton CAS where the base is 3500ft. The contact was tracked and seen to land at time 16:53 and the details of the a/c were obtained from landing airfield.

201414290	13/09/2014	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	270 10nm	D	CTR	SCOTTISH AVIATION	Unknown		Infringement of the London CTR (Class D) by a pair of ex military training a/c. Traffic info given.	I was in position as LL FIN Mentor. I became aware of pCAIT activation just South of the LW LFA. At this point, an a/c was established and descending on the ILS at about 10DME. I passed traffic info, but considered that the pCAIT return's track presented no risk to the a/c and for it to continue approach. The subsequent a/c (callsign not recalled) was advised of the traffic and that they would be broken off the approach, and to maintain 4A. Whilst coordinating with INT N and INT S as to which way to break traffic off, the pCAIT return tracked West outside the CTR and deactivated. I called the traffic to the subsequent a/c, and they reported visual, identified the traffic as a 'pair of RAF trainers, well below' and they were happy to continue approach. I continued to vector LL inbound traffic on to final approach, and advised all of the actual/potential (depending on their position at the time) traffic. A subsequent a/c reported visual with the traffic, which appeared to be flying an extended circuit at LW, again , 'well below, a pair of (ex) RAF bulldogs'. They were all happy to continue the approach. Further to the pCAIT activation, there was another CAIT activation on a light a/c doing a similar thing - flying what appeared to be large circuits at LW. I assessed the implications of all activations of CAIT and took what I considered appropriate action. If I had broken every a/c off on every single activation, the situation with LL inbounds would have been chaotic, particularly with a need to avoid the LONPARA drop area too. Support/supervisory staff endeavoured throughout to contact LW regarding the traffic.
201414290	13/09/2014	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	270 10nm	D	CTR	SCOTTISH AVIATION	Reciprocating	1	Infringement of the London CTR (Class D) by a pair of ex military training a/c. Traffic info given.	I was in position as LL FIN Mentor. I became aware of pCAIT activation just South of the LW LFA. At this point, an a/c was established and descending on the ILS at about 10DME. I passed traffic info, but considered that the pCAIT return's track presented no risk to the a/c and for it to continue approach. The subsequent a/c (callsign not recalled) was advised of the traffic and that they would be broken off the approach, and to maintain 4A. Whilst coordinating with INT N and INT S as to which way to break traffic off, the pCAIT return tracked West outside the CTR and deactivated. I called the traffic to the subsequent a/c, and they reported visual, identified the traffic as a 'pair of RAF trainers, well below' and they were happy to continue approach. I continued to vector LL inbound traffic on to final approach, and advised all of the actual/potential (depending on their position at the time) traffic. A subsequent a/c reported visual with the traffic, which appeared to be flying an extended circuit at LW, again , 'well below, a pair of (ex) RAF bulldogs'. They were all happy to continue the approach. Further to the pCAIT activation, there was another CAIT activation on a light a/c doing a similar thing - flying what appeared to be large circuits at LW. I assessed the implications of all activations of CAIT and took what I considered appropriate action. If I had broken every a/c off on every single activation, the situation with LL inbounds would have been chaotic, particularly with a need to avoid the LONPARA drop area too. Support/supervisory staff endeavoured throughout to contact LW regarding the traffic.
201414367	26/09/2014	EGTT : London (FIR)	Not specified		D	CTA	AVIONS ROBIN	Reciprocating	1	Alleged infringement of Southampton CTA (Class D) by a HR200 squawking 7377 at 2200ft.	The pilot had set the incorrect QNH (approx 3mb set incidentally too high) on the return leg which meant that he was slightly higher than the planned flight at 1900ft. He was informed by Bournemouth Radar to expedite his descent down to below 2000ft and he had infringed the Southampton CTA. Pilot was allowed to continue his flight at below 2000ft. His rate of descent meant that he was down to below 2000ft in a matter of 15secs.
201414404	11/10/2014	EGTT : London (FIR)	EGGP (LPL): Liverpool	10nm Southwest	D	CTR	ROBINSON	Reciprocating	1	Infringement of the Liverpool CTR (Class D) by a R44 squawking 7000. Traffic info and avoiding action given to B737. Standard separation maintained.	Avoiding action was given to the B737 due to an unknown a/c squawking 7000 which had entered Liverpool control zone. The B737 was descending to 2000ft down wind left hand for R/W27. It was given a turn onto North and was instructed to stop his descent at 3000ft to avoid the unknown a/c. Manchester Radar was able to provide information on the unknown a/c which they believed to be a R44, as it was previously squawking their listening watch squawk. After further investigation the a/c is believed to operate out of City Airport Manchester. A message was left at the aero club for the pilot to contact Liverpool ATC.☐ Supplementary 12/10/14:☐ Whilst downwind left hand for R/W27 B737 was given avoiding action due to an unknown infringing a/c to the West of the Oulton Park VRP. B737 was vectored to the North and instructed to stop his descent at 3000ft. As the infringing a/c was previously displaying #7366 (Manchester listening watch), I rang Manchester to find out any details they had, they believed it to be a R44. After further investigation the a/c operates out of City Airport Manchester, a message was left with the flying club for the pilot to ring.☐ CAA Closure:☐ Pilot error. Situational Awareness. Failed on-line test, retraining letter sent.
201414404	11/10/2014	EGTT : London (FIR)	EGGP (LPL): Liverpool	10nm Southwest	D	CTR	BOEING	Turbofan	2	Infringement of the Liverpool CTR (Class D) by a R44 squawking 7000. Traffic info and avoiding action given to B737. Standard separation maintained.	Avoiding action was given to the B737 due to an unknown a/c squawking 7000 which had entered Liverpool control zone. The B737 was descending to 2000ft down wind left hand for R/W27. It was given a turn onto North and was instructed to stop his descent at 3000ft to avoid the unknown a/c. Manchester Radar was able to provide information on the unknown a/c which they believed to be a R44, as it was previously squawking their listening watch squawk. After further investigation the a/c is believed to operate out of City Airport Manchester. A message was left at the aero club for the pilot to contact Liverpool ATC.☐ Supplementary 12/10/14:☐ Whilst downwind left hand for R/W27 B737 was given avoiding action due to an unknown infringing a/c to the West of the Oulton Park VRP. B737 was vectored to the North and instructed to stop his descent at 3000ft. As the infringing a/c was previously displaying #7366 (Manchester listening watch), I rang Manchester to find out any details they had, they believed it to be a R44. After further investigation the a/c operates out of City Airport Manchester, a message was left with the flying club for the pilot to ring.☐ CAA Closure:☐ Pilot error. Situational Awareness. Failed on-line test, retraining letter sent.

201414406	12/10/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl		D	CTR	PIPER	Reciprocating	1	Infringement of the Manchester CTR (Class D) by a PA28. Standard separation maintained.	Whilst operating on 05L single runway operations, PA28 infringed the control zone from the SW, and then continued northbound approximately 1nm East of the control zone boundary. While still infringing the zone, the pilot of PA28 called up on 118.575 having realised his error. As a result of the infringement, Director had to issue delaying instructions to two inbounds. APP'S' turned another a/c back towards the DAYNE hold. No avoiding action was necessary.☐ Supplementary 16/10/14:☐ We were on track at Ashcroft entering the corridor from the South. In hindsight Northwich was in cloud shadow so not highlighting the track drift to the East. Once we saw the lakes at Great Budworth 3 miles ahead we realised that we were East of not West of Northwich. We immediately turned to the WNW and attempted to call Man Radar, who first responded to another a/c and then a further a/c called. As we reached the E. edge of the LLC we did make contact with Radar, who passed us the Squawk and instructed us to remain on frequency. This we did until we requested change to Lpl Radar for transit through their zone back to Chester.
201414415	12/10/2014	EGTT : London (FIR)	ROSUN				CYCLONE AIRSPORTS	Reciprocating	1	Possible infringement of the Manchester TMA (Class A) by an unknown aircraft squawking 7000, at 3600ft. Aircraft identified as a microlight.	Infringement of Manchester TMA and Control Area. Unknown traffic observed climbing into the Manchester TMA 5nm northwest of ROSUN heading south. Unknown target had intermittent code A7000, mode C peaked at 3600Alt and mode S hex code 4013A6 (which if correct correlates to microlight). TMA North and Air1 controllers advised/warned. One inbound aircraft vectored around unknown target resulting in 5nm extra track miles to touch down. Adjacent units not in contact with microlight.
201414450	21/09/2014	EGTT : London (FIR)	EGVN (BZZ): Brize norton		D	CTR	CESSNA	Reciprocating	1	Infringement of the Brize Norton CTR (Class D) by a C152 at 2000ft.	Unknown a/c transited through Brize CTR from North to SE at 2000 feet. This a/c then called Brize Radar asking for a Basic Service, ending the message with the fact that she was completely unaware of her position. The pilot introduced herself as a student and was the only person on board. Brize Supervisor number was given and she was told to get an instructor to call when she had touched down. Keeping in mind Northampton Sywell was NE from her current position a heading had to be given because the pilot started to head NW. I was the ATCO/IC at the time working Approach, Director and Zone. At the time there was very little traffic and I noticed a Coventry Squawk tracking towards Brize indicating 2000ft. It took several attempts to get through to someone at Coventry, however once contact was gained, I was informed that they had been working the track and that because of the altitude, they were finding it difficult to regain comms with the pilot. I asked that once contact was gained, to transfer the a/c to ourselves. The a/c then tracked out of the CTR and then SE of Oxford by 5nm, at which point the pilot contacted the LARs controller. I asked him to inform the pilot to call the supervisor on landing. I later received a phone call from the instructor of the pilot and explained the situation.
201414475	12/10/2014	EGTT : London (FIR)	EGCB : Manchester/Bar ton	7 N	D	CTA	CESSNA	Reciprocating	1	Infringement of the Manchester CTA (Class D) by a C172 at 2800ft. Standard separation maintained.	AIW set off by 7000 squawk NNE of EGCB indicating 2800ft in CTA. No Mode S information. Rang EGCB and they were talking to a C172 and instructed him to descend. A/c descended into the EGCB LFA. One inbound downwind from ROSUN for 05 at FL70. No action taken.☐ Supplementary 30/10/14:☐ Called EGCB to join the circuit at Reebok VRP. I was advised to look out for another a/c who had call at Reebok for joining. Circuit direction was then changed from R/W27 RH to R/W09 LH. So considering all those things happening at the time when I should have been starting the descent under MAN CTA, I delayed my descent by mistake while looking out for the trafic as advised by FISO. After speaking to the ATC watch officer I found that i was 300 above the upper limits at alt2500. I never intended to infringe the CAS as the Mode C was on. In the Email the investigator has given my position NNE of EGCB. But iam sure I was NNW of EGCB. Nevertheless I was above the upper limit and being PIC it was my duty to stay away from CAS. So please accept my apology.
201414704	17/10/2014	EGTT : London (FIR)	THRED	Abeam	A	Other	PIPER	Reciprocating	1	Infringement of Airway Q41 (Class A) by an unknown aircraft squawking 7000, indicating FL51. Aircraft identified as a PA32. Traffic info given. Standard separation maintained.	Whilst operating as the S19-22 T I observed an aircraft squawking 7000 infringe the eastern boundary of Q41 maintaining an indicated FL51. I issued a turn to a southbound aircraft to ensure adequate separation would exist should the infringement persist. The aircraft the changed squawk to a solent radar code, who subsequently identified the track as a PA32.

201414719	17/10/2014	EGTT : London (FIR)	TABEN		A	Other	GROB	Reciprocating	1	Infringement of Airway Q41 by a G115. Avoiding action and traffic info given. Standard separation maintained.	Operating a OJT1 I observed a 2671 squawk West of Q41 at FL82. This contact tracked north-eastbound toward CPT. I made the trainee aware of the position and level of the 2671 squawk and advised that we may need to take action if the 2671 tracks any closer to Q41. Trainee issued avoiding action to a DHC8, turning left heading 120deg. As the 2671 squawk enters Q41 indicating FL083 West abeam TABEN, I measured the minimum distance to be 5.5nm. Solent coordinator coordinated with LTC and Middle Wallop.☐ Supplementary 17/10/14:☐ This MOR is being filed in response to a report from Solent Radar that they were filing an Airspace Infringement on a G115. I was the Approach controller at the time of the incident, at 12:21.50 I warned the a/c about getting close to CAS, AA turn left heading 270 to which the pilot replied turning left, returning South. Then at 12:23.51 I warned the G115 CAS 1/2m East, at this point Solent Radar rang to say they had taken avoiding action and would be filing an MOR. At no time on my Radar overlay did the a/c appear to be inside CAS.☐ Supplementary 21/10/14:☐ En route descent via PEPIS & shortly after checking in to Solent Radar were instructed to turn left immediately for avoiding actions. The autopilot was disconnected & were informed that separation of greater than 5 miles was maintained. The flight was continued without further incident.
201414719	17/10/2014	EGTT : London (FIR)	TABEN		A	Other	DE HAVILLAND	Turboprop	2	Infringement of Airway Q41 by a G115. Avoiding action and traffic info given. Standard separation maintained.	Operating a OJT1 I observed a 2671 squawk West of Q41 at FL82. This contact tracked north-eastbound toward CPT. I made the trainee aware of the position and level of the 2671 squawk and advised that we may need to take action if the 2671 tracks any closer to Q41. Trainee issued avoiding action to a DHC8, turning left heading 120deg. As the 2671 squawk enters Q41 indicating FL083 West abeam TABEN, I measured the minimum distance to be 5.5nm. Solent coordinator coordinated with LTC and Middle Wallop.☐ Supplementary 17/10/14:☐ This MOR is being filed in response to a report from Solent Radar that they were filing an Airspace Infringement on a G115. I was the Approach controller at the time of the incident, at 12:21.50 I warned the a/c about getting close to CAS, AA turn left heading 270 to which the pilot replied turning left, returning South. Then at 12:23.51 I warned the G115 CAS 1/2m East, at this point Solent Radar rang to say they had taken avoiding action and would be filing an MOR. The autopilot was disconnected & were informed that separation of greater than 5 miles was maintained. The flight was continued without further incident.
201414746	18/10/2014	EGTT : London (FIR)	Luton		D	CTR	CESSNA	Reciprocating	1	Infringement of the Luton CTR (Class D) by a C150.	At approx 1525, an unknown radar contact squawking 7000 conspicuity code but without 'Mode C' altitude readout, entered the Luton Control Zone 5nm NW of the Bovingdon VOR tracking SE in the vicinity of Berkhamstead. No R/T contact. Shortly after leaving CAS the contact reversed course and infringed the zone again crossing the southern zone boundary on the reciprocal track. Shortly after leaving CAS the contact again reversed course and entered the zone 5nm NW of the Bovingdon VOR tracking SE as previously. Transmissions on the Luton Approach frequency 129.550 to see if the pilot was listening out proved fruitless and the pilot was not in contact with Farnborough LARS. The a/c did not show an a/c identity from 'Mode S' data. The radar contact briefly manoeuvred in the vicinity of Hemel Hempstead and then proceeded to the Elstree area where the a/c was identified on radar 1nm North of their airfield by using Luton Approach squawk 4670 relayed via the Elstree radio operator who also supplied the aircraft's details.☐ CAA Closure:☐ Pilot failed to remain outside CAS. Over-familiarity with route. Failed on-line test. To be observed teaching ground navigation training by Staff FE.
201414950	22/10/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	167 8.6nm	D	CTA	CESSNA	Reciprocating	1	Infringement of the Solent CTA (Class D) by a C172 at 2500ft. Traffic info and avoiding action given. Standard separation maintained.	A contact was observed passing EGHF tracking West indicating 2.5A. This was monitored then blind calls were made with no response. Mode S indicated a callsign, which also gave no response. The a/c infringed near 8.6nm SE of SAM and continued tracking West. Avoiding action was given to an ATR72, however this was at FL70 so no actual loss occurred. EGHH were called and they advised the C172 had just called them. They advised it to leave CAS and call us which it eventually did.☐ Supplementary 27/10/14:☐ During the flight planning stage I made the error of intending to obtain a clearance for Solent airspace via the Bournemouth LARS as it was my intention to overfly Bournemouth airspace. In-flight I was in communication with Bournemouth LARS and was given the Solent frequency. It was at this point that my error became apparent and I began investigating my planning error during flight. This led me to become distracted and make a late initial call to the Solent ATSU in the vicinity of Cowes, where I was informed that I had infringed their airspace without clearance. ☐ Supplementary 24/12/14:☐ The a/c entered the Solent Control Area without a clearance due to incorrect flight planning and failure to recognise the requirement to obtain an entry clearance into CAS from the appropriate ATSU. The pilot's pre-flight briefing in respect of weather and flight planned route including a diversion route was also a contributory factor established during the investigation. ☐
201414950	22/10/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	167 8.6nm	D	CTA	ATR	Turboprop	2	Infringement of the Solent CTA (Class D) by a C172 at 2500ft. Traffic info and avoiding action given. 201415090	25/10/2014	EGTT : London (FIR)	Not specified		A	TMA	AVIONS ROBIN	Reciprocating	1	Infringement of the LTMA (Class A) by an unknown a/c squawking 7000, indicating 2800ft. A/c identified as a DR400. CAIT activated. Traffic info and avoiding action given to inbound a/c. Standard separation maintained.	Whilst working as FIN, I was alerted to the presence of an infringing a/c by CAIT. The infringing a/c was squawking 7000, and indicating Mode C of 2.8A. The infringing a/c was heading for the 26L base leg traffic. A319(1) was on base leg, descending to altitude 3A. I initially turned A319(1) left 20 deg, and stopped the descent at 4A. I advised the reason for the turn, and passed traffic info. I considered A319(1) would pass safely in front of the infringing a/c, and therefore did not issue avoiding action, and allowed A319(1) to continue on a base leg for runway 26L. I did not stop A319(1)'s descent above 4A, as I did not want to risk an unstable approach. I believe separation was lost between the 7000 and A319(1). INT was working A319(2) downwind, and this a/c was given avoiding action and was repositioned. The GS tracked the infringing a/c, and it was believed to have landed. Having spoken to believed landing airport, the GS received a phone call from a person, advising he may have been the pilot. ☐ Supplementary 28/10/14:☐ ATC instruction to turn right 90deg in order to take immediate avoiding action. While we downwind for R/W26L, being radar vectored towards final, ATC told us to take avoiding action by turning right heading 180deg immediately. the reason was due to a infringement by another a/c altitude unknown. We were in VMC conditions above a cloud layer and stopped our descent. We did not see an a/c in close proximity and after extended vectors, landed normally.
201415090	25/10/2014	EGTT : London (FIR)	Not specified		A	TMA	AIRBUS	Turbofan	2	Infringement of the LTMA (Class A) by an unknown a/c squawking 7000, indicating 2800ft. A/c identified as a DR400. CAIT activated. Traffic info and avoiding action given to inbound a/c. Standard separation maintained.	Whilst working as FIN, I was alerted to the presence of an infringing a/c by CAIT. The infringing a/c was squawking 7000, and indicating Mode C of 2.8A. The infringing a/c was heading for the 26L base leg traffic. A319(1) was on base leg, descending to altitude 3A. 201415098	26/10/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	N	D	CTA	PIPER	Reciprocating	1	Alleged infringement of the Gatwick CTA (Class D) by a PA28. Traffic info and avoiding action given.	I was working as KK INT / FIN bandboxed, when CAIT alerted me to an infringement of the KK CTA. I cannot recall the squawk the infringer was wearing, but I think it may have been a LF LARS squawk. The Mode S of the infringer showed it to be a PA28. I believe the PA28 was indicating 1.7A. As it looked like the PA28 may have been on a base leg for KR, I called KR but they were not working the traffic. I then called LF LARS and they were not working the traffic. An A320 was on final approach, and I broke it off the localiser with a turn onto 180deg, and passed traffic. I then upgraded the turn to avoiding action. LF LARS then called me and advised they were working the traffic. At this point the PA28 had turned away from CAS and turned away from the Gatwick final approach. A320 was repositioned and completed an approach to KK. LF LARS called the GS and advised that the a/c was a PA28, from Fair Oaks to Headcorn.☐ Supplementary 27/10/14:☐ I was working as the LARS West controller on a busy sector having taken over the position at the start of my shift at 1354. At about 1357 I advised a PA28, who was from Fair Oaks to Headcorn squawking 0431 and at this time North of Dorking, that he had no further level restrictions remaining outside CAS and asked him if he was routing South of Biggin Hill. The pilot replied that he was routing South of Biggin. He was tracking Eastbound well to the North of the KK CTA, so I saw no need to remind him about CAS to the South of him. He was at 1900ft at this time I believe. At about 1400 I told the PA28 to "report his squawk on first contact to Farnborough LARS East on 123.225". The pilot acknowledged this and left
201415098	26/10/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	N	D	CTA	AIRBUS	Turbofan	2	Alleged infringement of the Gatwick CTA (Class D) by a PA28. Traffic info and avoiding action given. 201415163	27/10/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	090 14nm	D	CTA	ROBINSON	Reciprocating	1	Infringement of the Stansted CTA (Class D) by an R22. Outbound A319 given traffic info and avoiding action. Standard separation maintained.	Whilst working on Stansted INT I noticed a 7000 contact entering the SW'ly portion near North Weald indicating 1900 to 2000 feet altitude-unverified. At that point an A319 was airborne on a BUZAD departure off runway 22. I gave precautionary avoiding action onto 360 degrees with clear traffic information and called when clear of conflict. Separation was not lost.
201415163	27/10/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	090 14nm	D	CTA	AIRBUS	Turbofan	2	Infringement of the Stansted CTA (Class D) by an R22. Outbound A319 given traffic info and avoiding action. Standard separation maintained.	Whilst working on Stansted INT I noticed a 7000 contact entering the SW'ly portion near North Weald indicating 1900 to 2000 feet altitude-unverified. At that point an A319 was airborne on a BUZAD departure off runway 22. I gave precautionary avoiding action onto 360 degrees with clear traffic information and called when clear of conflict. Separation was not lost.
201415165	27/10/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTR	CESSNA	Reciprocating	1	Infringement of the Luton CTR (Class D) by a C152 (believed) showing as a primary contact only. Standard separation maintained.	At 1420 I noticed a PCait activation 6nm SW Luton airport. The contact was tracking towards the airport so I called up the tower and imposed a 'Check All.' Aircraft was ready to depart on a MATCH but I had to keep in on the ground. The unknown contact, after about 3 miles, turned right to take up a southerly track to leave the control zone. I made a blind call on the frequency and also called Farnborough LARS to no avail. I watched the contact track down to Elstree, at which point Farnborough called me up to say they were fairly sure it was the C152, as one of 2 aircraft inbound to Elstree (the other of which they had been working). The contact was however, not positively identified.
201415177	27/10/2014	EGTT : London (FIR)	Syerston		G	ATZ	BELL	Turboshaft	1	Infringement of the Syerston ATZ (Class G) by a Bell 206 at 700ft.	Just before operations commenced a Jet Ranger helicopter was seen flying through the ATZ at an estimated 700ft heading 170. A radio call was transmitted on 125.425 asking the helicopter to identify, there was no response to this call. The Waddington Zone controller informed me that the a/c was a Jetranger operating between Wickenby and Leicester working East Midlands Radar. I contacted the Leicester AG Radio Operator and requested that the pilot contacted me when the helicopter had landed. When the pilot called he informed me he had seen the NOTAM about reduced radio activity at RAF Syerston and as such he had tried calling when just South of Darlton and again before entering the ATZ, as he had not had any response he continued and carried on giving Traffic Information 'blind' calls. He did not hear the call from myself asking him to identify.
201415185	26/10/2014	EGTT : London (FIR)	Netherthorpe	Overhead	D	CTR	CESSNA	Reciprocating	1	Infringement of the Doncaster Sheffield CTR (Class D) by a C172 at 3000ft. Standard separation maintained.	7000 squawk observed departing the Netherthorpe ATZ NE bound climbed to 3000ft. Aircraft traced via Mode S and tracked back into Netherthorpe. Pilot contacted and was aware on the error.

201415208	28/10/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	5nm ENE	D	CTR	OTHER	Reciprocating	1	Infringement of the Luton CTR (Class D) by an unknown aircraft at 1800ft. Aircraft identified as a gyroplane. CAIT activated. Avoiding action and traffic info given to an inbound CL300.	At 1045z I took over control as Luton Radar. At 1150z the CAIT function highlighted that an unidentified aircraft (gyroplane) had entered the Luton Control Zone without a clearance. The aircraft's transponder showed 0013 indicating it was listening out on either Luton Radar's or Essex Radar's frequency. After us both making blind calls the aircraft turned out to be on Essex Radar's frequency. The aircraft was then transferred to my frequency in order to identify it. Also on my frequency at the time was CL300 and A320, both IFR inbounds inbound to runway 26. Avoiding action and traffic information were given to CL300 and I believe separation was lost with a minimum of 4 miles between both CL300 and the gyroplane. Once the gyroplane arrived on my frequency I was able to identify it and continue the approaches for both inbounds on frequency. The gyroplane then left controlled airspace to the east and continued to his destination. I believe inbounds still being worked by Essex Radar were also delayed as a result of this infringement.☐ CAA Closure:☐ Pilot error and poor pre-flight planning. Warning letter sent, on-line test passed.
201415208	28/10/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	5nm ENE	D	CTR	BOMBARDIER	Turbofan	2	Infringement of the Luton CTR (Class D) by an unknown aircraft at 1800ft. Aircraft identified as a gyroplane. CAIT activated. Avoiding action and traffic info given to an inbound CL300.	At 1045z I took over control as Luton Radar. At 1150z the CAIT function highlighted that an unidentified aircraft (gyroplane) had entered the Luton Control Zone without a clearance. The aircraft's transponder showed 0013 indicating it was listening out on either Luton Radar's or Essex Radar's frequency. 201415237	15/10/2014	EGTT : London (FIR)	EGVO (ODH): Odiham		G	ATZ	ROBINSON	Reciprocating	1	Infringement of the Odiham ATZ (Class G) by an R44 at 800ft.	A civilian R44 free called Odiham Approach for a LARS transit to Hook. Due to Odiham working primary radar only the Approach controller freecalled the aircraft to Farnborough (FBO) LARS on 125.25 to provide a better service. The R44 then free called Approach five minutes later stating it was in the ATZ at 800' QNH. The aircraft was not approved by either Odiham App or FBO App to penetrate the ATZ. The App controller rang VCR to ensure there was no aircraft in the CCT, the Supervisor rang Farnborough App to check if they were working the aircraft. FBO stated that London were last working the aircraft known to be a R44. The aircraft was instructed to remain outside of the ATZ and they changed en route to a different frequency. An R44 freecalled Odiham ICF requesting transit south of Odiham. As the routing would not have affected Odiham traffic, the ac was instructed to freecall FBO who provide a LARS service. Two minutes later, a primary contact was observed routing east to west through the Odiham ATZ 1nm south of the overhead. I called FBO to ascertain if they were working the aircraft and they informed me that the aircraft was working London Information. Whilst the landline was open, the FBO controller then advised that R44 then freecalled FBO LARS. FBO gave traffic information of the ac as being an R44 believed to be at 800 ft (FBO QNH) 1nm south west of the Odiham overhead. No clearance had been requested for an ATZ penetration. At the time of the infringement, Odiham was working primary radar only, with two ac in the RTC. There was no risk of conflict introduced by the R44.
201415239	28/10/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTR	CESSNA	Reciprocating	1	Infringement of the Luton CTR (Class D) by a C182. Standard separation maintained.	At 16:39 an unknown aircraft squawking 7000 activated SCAIT as it entered the GW CTR about 5nm NW of BNN. It had no mode C selected, and 2 blind calls to the callsign shown from Mode S went unanswered. The aircraft proceeded towards Dunstable Downs gliding site before turning left and away to leave the CTR. A "Check All" was already in place due to a LD inbound that I was vectoring through GW airspace, and I monitored the unknown to ensure it did not come into unsafe proximity with this aircraft. Avoiding action and/or traffic information were not required. C182 was observed to land at Meppershall at 16:48.
201415246	28/10/2014	EGTT : London (FIR)	EGMC (SEN): Southend	13 N	A	TMA	AVIONS ROBIN	Reciprocating	1	Infringement of the LTMA (Class A) by an HR200 at 3900ft. Standard separation maintained.	Thames Radar called to enquire if Southend Radar was working a/c squawking 7000, 12nm North of EGMC. At this point a blind transmission was made to which the Robin responded. A/c was instructed to squawk 5064 and advised to descend immediately due to the belief that he was the infringing a/c. A/c was subsequently identified and Mode C verified. Thames Radar were informed of the a/c details.
201415308	28/10/2014	EGTT : London (FIR)	EGBP : KEMBLE		G	ATZ	PIPER	Reciprocating	1	Infringement of the Kemble ATZ (Class G) by a PA28.	PA28 entered ATZ without notification or obtaining relevant traffic info for join. Approximately 16.00z PA28 entered the ATZ and joined the circuit pattern without making any RT calls to enter an ATZ or obtain airfield/traffic info. The a/c was seen close behind another flying school a/c, PA28 on final. 210/10 9999 Few018 +17/10 QFE 995 QNH 1010.
201415350	30/10/2014	EGTT : London (FIR)	EGLF (FAB): Farnborough civil		G	ATZ	UNKNOWN	Reciprocating	1	Infringement of the Farnborough ATZ (Class G) by an unknown a/c at approx 1000ft. Traffic info given.	Possible ATZ Infringement. Working as Tower ATCO at night, visibility 7 km cloud few 1300, R/W24. Two LARS tracks were looking to enter ATZ and orbit North of the field before returning South to North. APP was working one 0450 and I was working the second 0451 as it was likely to conflict with inbound BAe146. On a routine scan of the windows to get visual with traffic I noticed there were three a/c in close proximity of the a/d. I ascertained which one I believed not in radio contact and monitored its track. It was very low level and appeared to be following one of the a/c although further South, the a/c turned toward the tower at one point before veering away again. The a/c silhouette appeared to be of a single engine piston a/c and was about 1.0A. I informed APP who stated they would pass T1 to inbound and then give me the traffic so I could monitor the situation (the infringing a/c was not painting on radar). I orbited the 0451 to S of the field to provide some room should I deem a risk of collision occurring with the infringing a/c and inbound. The infringing a/c began to climb away on a more NE track as the BAe146 was around 4nm from t/d, I continued to monitor and was satisfied that the infringing a/c had left the ATZ by the time the BAe146 was at 3nm.

201415350	30/10/2014	EGTT : London (FIR)	EGLF (FAB): Farnborough civil		G	ATZ	BAE	Turbofan	4	Infringement of the Farnborough ATZ (Class G) by an unknown a/c at approx 1000ft. Traffic info given.	Possible ATZ Infringement. Working as Tower ATCO at night, visibility 7 km cloud few 1300, R/W24. Two LARS tracks were looking to enter ATZ and orbit North of the field before returning South to North. APP was working one 0450 and I was working the second 0451 as it was likely to conflict with inbound BAe146. On a routine scan of the windows to get visual with traffic I noticed there were three a/c in close proximity of the a/d. 201415384	31/10/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	10nm N	D	CTA	PIPER	Reciprocating	1	Infringement of the Stansted CTA (Class D) by an unknown a/c squawking 7000, indicating 4000ft, resulting in loss of separation with an inbound B737. Aircraft identified as a PA28 flown by a student pilot had become lost. Traffic info given.	At approximately 1420-1425 a 7000 squawk contact was observed entering CAS approximately 12 miles North of Stansted indicating 4000ft. B737 was downwind right for R/W22 when this occurred and was turned right to be positioned downwind left. The pilot was informed of the infringing a/c with minimum separation of about 3 miles and 3500ft. The infringing a/c manoeuvred around the Audley End area for a few minutes before heading off to the NW. Four airliners were delayed as a result. The contact was tracked and at 1438 was observed changing to a 6177 squawk. Cambridge were called and the a/c was identified as PA28. We were informed that the pilot was a student who had got lost. He was not informed of his infringement so as not to distract him from the rest of his flight.☐ Supplementary 17/11/14:☐ I was conducting a student training flight from Wellesbourne to the overhead of Cambridge. The weather was clear and the wind 230/30 kts at 2000 feet. The flight had gone smoothly and I made my fix South of Poddington as expected. However I then climbed to better see in the clear weather and in doing so feel I must have rolled off course. On levelling out I believe that I misidentified Sandy as St Neots. The remainder of the leg then began to compound my error as Duxford arrived at around the time I expected Cambridge to appear but the lay out was different to my expectation. I decided to fly the remainder of my leg to the time planned. Once I had reached the time on leg I realised that I had made an error. At this point I circled and turned back toward Grafham Water to relocate myself. I then decided to return to Wellesbourne. ☐
201415384	31/10/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	10nm N	D	CTA	BOEING	Turbofan	2	Infringement of the Stansted CTA (Class D) by an unknown a/c squawking 7000, indicating 4000ft, resulting in loss of separation with an inbound B737. Aircraft identified as a PA28 flown by a student pilot had become lost. Traffic info given. 201415434	31/10/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	020 7.5nm	D	CTR	ROBINSON	Reciprocating	1	Infringement of the Southampton CTR (Class D) by an unknown aircraft showing as a primary contact only. Aircraft identified as a R22, flown by a solo student pilot Standard separation maintained.	A primary only radar contact was observed approaching the northern CTR boundary on a southerly track. Blind transmissions were made but no response was received. The primary contact eventually entered the CTR north of Winchester and continued on a south easterly track towards Bishop's Waltham. The Lower Upham AG operator telephoned the Solent controller and stated the traffic may be SFU88 (Saints 88) inbound to Lower Upham from the Chilbolton area. Blind transmissions were made using this callsign but no response was received. The Lower Upham AG operator also tried to call SFU88 to try and assist with identifying the aircraft. The operator stated he would go outside and see if they could see the traffic. Further blind transmissions were made in respect of track and geographical position. The Southampton aerodrome ATCO & ATSA were advised of the situation and the ATSA later reported the contact as a small helicopter. A helicopter inbound to Southampton airport from the east operating VFR was provided with traffic information, but did not report visual with the unknown aircraft. An inbound from the south was initially positioning for a left hand circuit for runway 20 but due to the unknown traffic the circuit direction was changed to right and kept at FL070 for a period of time before descent was given. Departing traffic from runway 20 was delayed whilst the unknown aircraft was inside the CTR. A SSR mode A code (7000) appeared as the aircraft passed Bishop's Waltham but without mode C. After the unknown aircraft left the CTR, departures were re-instated. Southampton METAR: 15005KT CAVOK 20/12 1016. The aircraft was tracked and eventually identified with the assistance of Goodwood Information (AFISO) issuing a Southampton transponder code
201415448	02/11/2014	EGTT : London (FIR)	Stretton	SSE	D	CTR	EVEKTOR AEROTECHNIK	Reciprocating	1	Infringement of the Manchester CTR (Class D) by an unknown aircraft squawking 7366. Aircraft identified as an EV97. Standard separation maintained.	At time 1255z an aircraft was seen entering the zone wearing squawk 7366. I immediately broadcast if this aircraft was on frequency, to which EV97 responded stating he was in that area but "in the low level route". I cross checked with the mode S info box that it was indeed the EV97. He was informed that he was 2-3nm within CAS and that he should turn NW to leave. He did so without delay and apologised. On leaving he stated his intentions were to turn north and return to destination at which point he was giving the approximate bearing to intended destination.☐ CAA Closure:☐ Pilot error. Situational awareness. Failed on-line test, warning letter sent.

201415487	25/10/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	Thelwall	D	CTR	CESSNA	Reciprocating	1	Infringement of the Manchester CTR (Class D) by a C182. Standard separation maintained.	I observed the AIW function activate near Thelwall viaduct and saw a 7000 squawk had entered the Manchester Control Zone. I phoned Air 1 to advise them of this, it should have been Air 2 as we were dual, the information was passed to the Air 2 controller who took avoiding action with their departure. Staffa sector asked if I was working the traffic which I advised them I wasn't. The subject aircraft then left the zone and displayed a Liverpool squawk. I traced the aircraft through Mode S and Liverpool and it was a local banner towing flight from Stretton to Stretton.
201415506	03/11/2014	EGTT : London (FIR)	MALBY	4nm South East	A	Other	PIPER	Reciprocating	1	Possible infringement of Airway L9 by a PA28 at FL67 by squawking 7000.	Bristol rang to say they noticed an a/c SSR 7000 at FL67, 4nm SE MALBY that they believed was talking to Shawbury at 1446Z. The a/c called Bristol radar at 1450Z and they told the pilot he was infringing L9 and to descend. The pilot believed the base was FL75, he was also flying on QNH, not 1013mb. The base of L9 in that location is FL65.
201415518	31/10/2014	EGTT : London (FIR)	Andrewsfield		G	Other	PIPER	Reciprocating	1	Infringement of the Stansted TMZ1 (Class G) by a PA22. Traffic info given to an inbound B737.	I observed an aircraft squawking 7000 without mode C enter Stansted TMZ 1. As I was preoccupied with another task, I was late detecting the infringer. A B737 was on a heading to intercept the localiser. Since its track was always going to keep it clear of the unknown contact, I asked the pilot if he wished to continue the approach which he did. I passed traffic information and made a blind transmission but got no reply. The infringer then turned final for Duxford, so I called them and got the aircraft's details.
201415562	04/11/2014	EGTT : London (FIR)	EGNR : Hawarden	9 WSW	A	RVSM	OTHER	Turbojet	1	Infringement of Airway N864 (Class A) by a military aircraft at 5700ft. Standard separation maintained.	Aircraft called Hawarden Radar frequency inbound for an ILS. I instructed the pilot to squawk 4602 and to remain outside controlled airspace. The aircraft was identified 9 miles WSW of Hawarden, given a traffic service and asked to report his altitude; he informed me that he was at 4200ft. I instructed the aircraft to turn on a heading of 220 degrees and then the Mode Charlie was observed to indicate 5700ft. I told the pilot the base of controlled airspace in his position was 4500ft and to remain outside controlled airspace. The mode Charlie was then seen to descend back to 4200 feet.
201415585	05/11/2014	EGTT : London (FIR)	EGGD (BRS): Bristol/Lulsgate		D	CTR	GROB	Reciprocating	1	Infringement of Bristol CTA-8 (Class D) by a Grob G115.	The reporting officer was acting as the LARS controller during the incident. A Grob Tutor, called outbound from Colene, requesting a Traffic Service for a period of GH. The a/c was identified and placed under a Traffic Service, with a request of levels required for GH. The a/c reported levels of 7500ft (Alt) with a lower level of approx 4000ft agl. The a/c was asked to report commencing general handling and reminded to remain clear of CAS due to the close proximity of the area to Bristol. Approximately 10 minutes into GH, a phone call was received from the Bristol supervisor requesting traffic info on an a/c that had penetrated CAS. The a/c was observed to be at a displayed 6500ft, inside CAS, having transited North of the area where GH originally commenced. This had taken the a/c approx 2 miles inside CAS with a base level of 4500ft. Until the call had been received from Bristol, the LARS controller had not observed the airspace infringement, having been in the process of taking a handover of an Oxford departure joining CAS with confliction, and a second a/c under TS entering confliction. The LARS controller informed Bristol that the a/c would vacate CAS immediately, and the a/c was informed of CAS penetration. A/c vacated CAS to the North and resumed GH, subsequently being reminded of the levels of CAS in close proximity. No conflicting traffic was observed during the period of airspace infringement. Supervisors Narrative: I did not witness the incident, but was informed of it shortly afterwards. Due to the distraction of a handover, the LARS controller did not spot that the a/c had manoeuvred into CAS. There were no other a/c in the vicinity inside CAS.☐ Supplementary 06/11/14:☐

201415592	05/11/2014	EGTT : London (FIR)	EGBB (BHX): Birmingham	S	D	CTA	PIPER	Reciprocating	1	Infringement of the Birmigham CTA-2 (Class D) by a PA28. D & D Rep: Lost pilot.	PA28 called D&D on 121.5 saying he was lost and requested a position fix and a steer back to Wellsbourne Mountford (EGBW) but didn't state if it was an actual or practice. There was only 1 line of DF so the D&D controller requested the a/c sqk 3305 and had to confirm if this was a practice or actual. The pilot stated it was an actual lost and once the controller located the a/c on radar the a/c was given a steer to EGBW and his altitude was checked. The a/c was found to be inside the Birmingham zone so was instructed to sqk 7700 and descended to 1500ft. A second D&D controller contacted Birmingham to inform them and they had no traffic to affect. PA28 reported visual with Wellsbourne and was instructed to sqk 7000 and change to Wellsbourne freq.
201415643	03/11/2014	EGTT : London (FIR)	UPTON	270 10nm	A	Other	DIAMOND	Reciprocating	1	Infringement of Airway L475/Manchester CTA 10nm West of Upton at FL49. Standard separation maintained.	I as the East Planner on OP30D. At 1100 I observed a CAIT return 10nm to the West of Upton on a 6160 squawk with an a/c ID at FL49. I called Doncaster, who told me the a/c was on a Basic Service, with them and they would tell him to descend. We had no traffic affected.□ Supplementary 12/11/14:□ I confess I was very much pre-occupied with remaining clear of obstacles on route across the Pennines to the extent that I failed to observe the Class A -3500 on the map. I was told by Doncaster that in order to remain clear of CAS that I should descend immediately to fl 3500 which I did. When I levelled of at fl 3500 I was told to contact Manchester which I did and then was advised by Manchester that I was at fl 3600 and needed to descend to remain clear. Thats when I realised that the Barometric setting on the autopilot was 2 Mb incorrectly set and descended immediately to fl 3500 on the correct Baro setting and resumed en-route to POL HIL VOR. □ Supplementary 12/11/14:□ Once airborne from Gamston I was pre-occupied with maintaining a good separation from the high obstacles that sit on top of the Pennines directly on route and also conscious of the the small Huddersfield gap between Manchester and the Leeds control zones through which I planned to fly. At the expence of good airmanship I completely overlooked the 3500ft max height in that area. I also had a warm feeling of being under a 'Basic Service' from Doncaster at the time who requested I descend to remain clear of CAS which I did
201415731	03/11/2014	EGTT : London (FIR)	LON	10nm W	D	CTR	OTHER	Reciprocating	1	Infringement of the London CTR (Class D) by a Cruiser at 1000ft. Heathrow departures were stopped for approx 1min. Standard separation maintained.	A/c entered the London Class D CTR East of White Waltham. Heathrow departures were stopped for approximately 1min while the a/c turned westbound and left CAS, landing back at destination.
201415732	05/11/2014	EGTT : London (FIR)	EGLC (LCY): London city		D	CTA	DIAMOND	Reciprocating	1	Infringement of the London City CTA (Class D) by an unknown a/c squawking 7000 at 1700ft. A/c identified as a DA40. Traffic info given. Standard separation maintained.	DA40 infringing the London City CTA. An a/c squawking 7000 infringed the EGLC CTA at 1700ft, resulting in a longer routing for an EMB170 at 3000ft inbound EGLC. Details of the infringing a/c were passed to us by Biggin Hill as they had worked it previously.
201415732	05/11/2014	EGTT : London (FIR)	EGLC (LCY): London city		D	CTA	EMBRAER	Turbofan	2	Infringement of the London City CTA (Class D) by an unknown a/c squawking 7000 at 1700ft. A/c identified as a DA40. Traffic info given. Standard separation maintained.	DA40 infringing the London City CTA. An a/c squawking 7000 infringed the EGLC CTA at 1700ft, resulting in a longer routing for an EMB170 at 3000ft inbound EGLC. Details of the infringing a/c were passed to us by Biggin Hill as they had worked it previously.

201415760	09/11/2014	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	10NW	D	CTR	CESSNA	Reciprocating	1	Infringement of LHR CTR (Class D) by a C152 squawking 3717. ATC Brize LARS instructed the a/c to leave the CTR. Heathrow departures were stopped for 3 minutes.	CAA Closure:☐ Pilot error. Situational awareness. Failed on-line test, retraining required.
201415761	09/11/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	136 Deg 7.1nm	D	CTA	FLY BUY ULTRALIGHTS	Reciprocating	1	Infringement of the Solent CTA (Class D) by a C42 at 2700ft.	Supplementary 11/11/2014 : ☐ Outbound from CTA. Commenced climb too soon from 2300ft inside CTA border to 3000ft for safe altitude to cross Solent Water to Isle of Wight. Using more appropriate ground reference points, pilot to ensure that a/c is well beyond CTA boundary before commencing climb to 3000ft.☐ Supplementary 24/12/14:☐ An a/c operating of a private airfield inside the Southampton CTR entered Solent CTA without a clearance whilst en-route to Sandown (Isle of Wight). The incident was caused by the pilot commencing a climb earlier than planned caused by a concern to climb to higher altitude due to a nervous passenger. The pilot apologised for his mistake.
201416194	18/11/2014	EGTT : London (FIR)	EGGW (LTN): London/Luton	12 W	D	CTR	BELL	Turboshaft	1	Infringement of the Luton CTR (Class D) by a Bell 206 at 1400ft. Traffic info given. Standard separation maintained.	I was working as the GW controller. I had vectored an A319 onto the ILS 08. I then observed a 7000 turn magenta but inside the Dunstable Downs gliding area. It indicated 1000'. It was only a secondary return but as tugs use this airspace at that level I initial ignored the traffic. I then concentrated on the downwind left traffic against a WCO release I had been given. On looking back at the A319 on final I noticed the 7000 now climbing to 1.3 and moving South. It had initial very slowly moved East towards Dunstable. I immediately stopped the descent of the A319, gave traffic and explained avoiding action left or right simply wouldn't help. I explained that I simply had to fly him over the top. The A319 stopped at 3.5, the infringer now 1.4 but unverified. The A319 reported he had it on TCAS and was happy. I reported that he was going to pass behind the infringing traffic who was now South of the extended centre line. Coordination with the tower and other agencies was taking place all the time. I then climbed the A319 to 5,000 and re positioned him downwind left for 08.
201416198	17/11/2014	EGTT : London (FIR)	EGD406		G	Danger area	CESSNA	Reciprocating	1	Infringement of Danger Area EGD406 (Class G) by a C150.	A light aircraft was observed to TWICE infringe the active Danger Area EGD406. Range staff reacted to the incursion by immediately ceasing all hazardous operations until the aircraft had cleared. MOD Eskmeals does not have any air surveillance equipment and so all sightings are made visual by range staff. Additional information was obtained from Warton ATC who held the aircraft on their radar. Warton ATC confirmed aircraft in the area.
201416257	26/10/2014	EGTT : London (FIR)	EGBB (BHX): Birmingham	170 10nm	D	CTR	ROBINSON	Reciprocating	1	Infringement of the Birmingham CTA-2 (Class D) by an R44 at 2200ft. Standard separation maintained.	AIW activated by a 7000 squawk at 1600ft to the South West of HON VOR tracking southbound. The infringer continued to climb to 2200ft before leaving CAS in the vicinity of Warwick services. I had not observed a contact transiting underneath CAS before the AIW alert, so I believed it may have departed from a location underneath the CTZ. Mode S indicated that the a/c was an R44. A call was made to Wellesbourne who confirmed they were talking to the a/c.☐ Supplementary 28/10/14: ☐ Flying as safety pilot with recently qualified student. On arrival at the site we had been very careful to avoid the 1500' CTA immediately above the hotel. On departure from a confined area, the student was focussed on being above 2000' so as to be able to request an overhead transit of Wellesbourne, a waypoint with which he was familiar. Though competent on the radio, he lacks confidence, so we were rehearsing the call. During this process, I failed to notice his enthusiastic rate of climb, and we infringed the 1500' CTA. We should have called Birmingham on lifting.

201416395	23/11/2014	EGTT : London (FIR)	EGCB : Manchester/Barton	1 S	D	CTR	PIPER	Reciprocating	1	Infringement of the Manchester CTR (Class D) by a PA28 at 1500ft. Standard separation maintained.	PA28 contacted EGCC APC for a service to operate in the EGCB overhead at 1.5A. I advised him that the airspace was delegated to EGCB and to free call EGCB for traffic info. I also advised him to remain clear of the EGCC CTR at all times to which he acknowledged. At time 1243z the AIW activated and radar derived information told me that the PA28 had infringed the EGCC CTR by approx' 1nm due South of EGCB. I immediately telephoned Barton Information and asked them to turn the PA28 North to leave the CTR. Scottish Walsy sector telephoned to query the AIW and I confirmed that the a/c was low level VFR and leaving the CTR to the North. The EGCC supervisor was also informed.☐ Supplementary 26/11/14: ☐ Passing overhead Barton with Southerly direction and then too late initiated right turn towards Irlam VRP to stop entering Manchester CTR.
201416487	23/11/2014	EGTT : London (FIR)	Burtonwood VRP		D	CTR	PIPER	Reciprocating	1	Infringement of the Liverpool CTR (Class D) by a PA18 at 1500ft. Standard separation maintained.	A 7350 squawk was observed routing westbound just to the south of the Burtonwood VRP indicating 1500ft. We spoke to Manchester via the direct line who informed us that the aircraft was now turning eastbound. The aircraft continued westbound further into the Liverpool Zone, Manchester subsequently called back to say that as the aircraft wished to remain there we would be better working it.
201416547	23/11/2014	EGTT : London (FIR)	EGBB (BHX): Birmingham		D	CTA	PIPER	Reciprocating	1	Alleged infringement of the Birmingham CTR (Class D) by a PA28 at 2500ft. Due to Mode C tolerance of +/- 200ft, a positive infringement of CAS cannot be established.	A320 inbound had left HON heading 285 descending to altitude 6000 feet. As it got to approximate 5miles West of HON I turned it heading 145 downwind, when I noticed an AIW warning of an a/c about 7 miles South of the A320 position indicating 2,500feet climbing. Base of CAS in that sector is 2500feet. I immediately turned the a/c North onto 330deg as he hadn't started his turn South yet. I did not issue avoiding action at that time as the distance was always increasing. The unknown a/c was observed turning South and descending thereafter. There was no Mode S information on the infringing a/c. My assistant called EGBW to see if they knew of any a/c operating North of them as it was seen to be heading in that direction. The FISO at EGBW that took the call is a retired EGBB ATCO and said the he knew of no a/c there but that a PA28 had just flown through the EGBW overhead at approximate 1800ft without speaking to them. Once the situation was normal and the A320 resuming vectors for an ILS to R/W33 I went back to a PA28 an inbound a/c from EGBO who I had told to stand by due to being busy and issued the squawk 0401 and the a/c we had been tracking as the infringer assigned that code.
201416552	25/11/2014	EGTT : London (FIR)	EGNR : Hawarden	7nm SE	A	Other	FLIGHT DESIGN	Reciprocating	1	Infringement of Airway N864 (Class A) by a Flight Design at 3200ft.	Unauthorised Penetration of CAS. Flight Design calls at 1120 leaving the Manchester low level corridor routing to destination, stating they would be passing SW climbing to altitude 4000ft and would be 15nm SW before reaching 4000ft. Aircraft initially given a 4601 (SSR code), a basic service and instructed to ROCAS. Aircraft was observed climbing through 3000ft, pilot was advised and positively identified using SSR code 4602. The pilot immediately descended below CAS. Both PC WAL and Liverpool ATC advised.
201416707	29/11/2014	EGTT : London (FIR)	EGLL (LHR): London/Heathrow		D	CTR	CESSNA	Reciprocating	1	Infringement of the London CTR (Class D) by an unknown aircraft at 1300ft, resulting in loss of separation with inbound traffic. Aircraft identified as a C172. Traffic info given.	Soon after I took over the FIN position I noticed an infringer start to track in to the zone from the White Waltham LFA. At the time I had fltnum 3R on a base leg from the North for RWY 09L and had just turned fltnum 333P from the South on to a northerly base leg. Having seen the infringer start to track towards the East I decided to take the fltnum 3R through the LOC and turned the fltnum 333P on to a NW heading to accommodate this. Unfortunately even though the fltnum 333P read back this instruction they needed confirmation some time later and the rate of turn was very slow. As this was now going to be an issue with the fltnum 3R going through the LOC opposite direction I told fltnum 333P to stop descent and maintain 4700' which they did and separation between them at least was maintained. I received confirmation from Thames that they had received confirmation from White Waltham that they were in contact with the infringing aircraft and that it would be tracking SW to leave the zone, I therefore started to vector for 09L again.☐ Supplementary 13/01/15: After getting airborne on runway 07, I planned to stay North of M4 until at visual reference on M4 then to track 1900 towards Blackbushe, remaining clear of controlled airspace. Prior to clearing with Waltham Radio to establish two way communications with Blackbushe and permission to transit Blackbushe ATZ. Once obtained to clear Waltham Radio and use freed up box to contact Farnborough. After departure I obviously mistook the visual reference point and turned towards Blackbushe, crossing the M4 putting me just inside the North West corner of the London CTR. I saw the wide body aircraft on approach to Heathrow and was well clear of them. Prior to departure I set the

201416707	29/11/2014	EGTT : London (FIR)	EGLL (LHR): London/Heathrow		D	CTR	UNKNOWN	Turbofan		Infringement of the London CTR (Class D) by an unknown aircraft at 1300ft, resulting in loss of separation with inbound traffic. 201416885	03/12/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	Bearing 150 Range 10nm	D	CTA	PIPER	Reciprocating	1	Infringement of the Gatwick CTA (Class D) by a PA28 squawking 3763 at 2300ft. Standard separation maintained.	Whilst mentoring my student I saw a 3763 code approaching the Gatwick CTA southern boundary. As it entered the CTA I brought it to my student's attention. A check all was implemented and we telephoned Shoreham Approach who were working the a/c. A/c contacted us as it vacated CAS. No other a/c were affected by the infringement. The a/c was initially identified using Mode S and then by Mode A code 3750.

201416909	04/12/2014	EGTT : London (FIR)	EGKB (BQH): Biggin hill		A	TMA	CIRRUS	Reciprocating	1	SR22 climbed to 3000ft instead of cleared altitude 2400ft, infringing the LTMA (Class A). Standard separation maintained.	Level Bust. SR22 was given a clearance via APP to route DET at 2400ft from runway 21 which turns right back to the overhead before routing to DET. On departure SR22 was observed to climb into controlled airspace to 3000ft. No traffic as in the vicinity to effect, therefore SR22 was allowed to maintain 3000ft until further climb could be given.
201416946	03/12/2014	EGTT : London (FIR)	Clevedon		D	CTA	PIPER	Reciprocating	1	Infringement of the Bristol CTA (Class D) by an unknown a/c squawking 7000 at 2900ft. A/c identified as a PA28. Traffic info given. Standard separation maintained.	Whilst acting as the OJT I an unknown 7000 squawk was seen entering CAS in the Clevedon area. The a/c routed towards Weston-super-Mare and then turned back North on a reciprocal track. The maximum altitude observed was 2900ft. One inbound IFR training flight was held off because of the infringement. The Mode S transponder of the unknown a/c gave the callsign PA28. Several blind transmissions and calls to other units were made but no contact was made with the a/c. We found out the a/c was outbound and on their return they were asked to contact Bristol ATC. On initial contact with Kemble ATC they believed that PA28 was on their frequency. However, they were unable to contact the a/ct the time of the infringement. ADC were informed about the infringement and became visual with the a/c. In their opinion they believed that the Mode C data from the a/c was correct.☐ CAA Closure:☐ Pilot error. Poor planning and situational awareness. Failed on-line test, retraining required.
201416946	03/12/2014	EGTT : London (FIR)	Clevedon		D	CTA	PIPER	Reciprocating	2	Infringement of the Bristol CTA (Class D) by an unknown a/c squawking 7000 at 2900ft. A/c identified as a PA28. Traffic info given. Standard separation maintained.	Whilst acting as the OJT I an unknown 7000 squawk was seen entering CAS in the Clevedon area. The a/c routed towards Weston-super-Mare and then turned back North on a reciprocal track. The maximum altitude observed was 2900ft. One inbound IFR training flight was held off because of the infringement. The Mode S transponder of the unknown a/c gave the callsign PA28. On initial contact with Kemble ATC they believed that PA28 was on their frequency. However, they were unable to contact the a/ct the time of the infringement. ADC were informed about the infringement and became visual with the a/c. In their opinion they believed that the Mode C data from the a/c was correct.☐ CAA Closure:☐ Pilot error. Poor planning and situational awareness. Failed on-line test, retraining required.
201416951	05/12/2014	EGTT : London (FIR)	EGHI (SOU): Southampton	181deg 13.2nm	D	CTA	PIPER	Reciprocating	1	Infringement of the Solent CTA (Class D) by a PA28 indicating 2900ft. Standard separation maintained.	I had recently taken over the sector when I noticed that PA28 was indicating at 2900 ft at a point 4nm SW of Cowes where the base of the CTA is 2500ft. I challenged the a/c and he confirmed that the Mode C was correct. I informed the a/c that it had entered CAS and advised him of the declared base. The a/c then replied that it was descending to 2500ft. ☐ Supplementary 09/12/14:☐ Changed planned flight due to delay in cloud clearing. Decided instead on a local flight to circumnavigate Isle of Wight. Due to the late change of plan did not plan this flight properly with reference to map and pre-planned altitudes. Therefore forgot about the CTA above 2000ft in the North-Western corner of the Isle of Wight and ascended into this from below. Suggested actions to prevent a recurrence: 1. Plan all flights, no matter how short / local, with reference to the chart and fly a properly filled-out PLOG including pre-determined altitudes. 2. Ensure I check GPS map regularly during flight, since this shows CAS. Focus on improving situational awareness. 3. Was using a portable system running on an iPad. However airspace warnings were not audible due to noise. Have now taken measures to ensure these warnings are audible.☐ Supplementary 24/12/14:☐ The a/c entered the Solent Control Area whilst in receipt of a Basic Service from Solent Radar. The pilot inadvertently climbed the a/c above the base of the CTA after a change in intended route without correct flight planning taking place.
201416968	06/12/2014	EGTT : London (FIR)	EGLC (LCY): London city	Bearing E Range 14nm	A	TMA	PIPER	Reciprocating	1	Infringement of the London TMA (Class A) by a PA18 squawking 4575 observed climbing up to 2800ft. Traffic info and avoiding action given. Separation lost.	A/c infringed CAS approx 14nm East of London City Airport, tracking SW, by climbing up to 2800ft altitude. Fltnum1YG was established on final approach to R/W27 to the West of the a/c so no action was taken. Fltnum74F was on heading 315 to intercept the 27 LOC and was SE of the infringing a/c. Fltnum74F was given vectors 335 and 350 to go approx 5 miles behind it. The pilot reported visual with PA18. A/c was wearing a 4575 Southend Radar squawk, so I contacted Southend Radar and they instructed the a/c to descend. I ascertained the details of the flight from Southend Radar. The a/c was under a Basic Service.☐ CAA Closure:☐ Pilot error. Lapse in concentration whilst trying to identify destination grass strip. Remedial training with CFI undertaken.

201416968	06/12/2014	EGTT : London (FIR)	EGLC (LCY): London city	Bearing E Range 14nm	A	TMA	UNKNOWN	Unknown		Infringement of the London TMA (Class A) by a PA18 squawking 4575 observed climbing up to 2800ft. 201416969	06/12/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	TMA	A	TMA	GROB	Reciprocating	1	Infringement of the Manchester TMA (Class A) by a G115 at 4500ft. CAIT activated. Standard separation maintained.	Whilst on duty as Wal/IoM/S29 combined T&P I noticed a Cait alert in the area between KOLID & CROFT which indicated G115 was infringing CAS at 4.5A where the base is 3.5A. Liverpool also phoned to alert me to the infringer. I had C560 on frequency inbound descending to FL60 own nav to WAL. I turned the C560 onto heading 235 away from the infringer to maintain more than 5nm. The infringer was very slow moving and in a tight orbit approx 1nm inside CAS. When I was satisfied the C560 was clear of the traffic I resumed its nav to WAL and transferred to GP radar. The infringer then left CAS back into the woodvale fillet area. Approx 5 mins after the event the LAS phoned military ATC (who confirmed they were working G115) and advised PC would be filing an MOR. It was agreed military ATC would speak to the pilot at a suitable time and advise them of the location of the event and reinforce the proximity of the Manchester TMA to their operating area.☐ Supplementary 10/12/14:☐ Infringement of CAS. Whilst undertaking turning exercises with a student NW Chorley 4000 to 4500 ft QNH in good VMC above SCT cloud with a strong W/NW wind the pilot inadvertently infringed the northern edge of CAS. No other a/c was in the vicinity. Scottish ATC notified military tower and they advised the pilot of the infringement. He was unaware that an infringement had occurred until receipt of this message from ATC.
201416969	06/12/2014	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	TMA	A	TMA	CESSNA	Turbofan	2	Infringement of the Manchester TMA (Class A) by a G115 at 4500ft. CAIT activated. Standard separation maintained.	Whilst on duty as Wal/IoM/S29 combined T&P I noticed a Cait alert in the area between KOLID & CROFT which indicated G115 was infringing CAS at 4.5A where the base is 3.5A. Liverpool also phoned to alert me to the infringer. I had C560 on frequency inbound descending to FL60 own nav to WAL. He was unaware that an infringement had occurred until receipt of this message from ATC.
201416971	06/12/2014	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	North West Corner	D	CTA	OTHER	Reciprocating	1	Infringement of the Gatwick CTA (Class D) by a CTWSW at 2200ft. SAM and BOG departures suspended.	A/c was observed to have infringed the NW corner of the EGKK CTA at altitude 2200ft for approx 2mins at 1237 UTC. As the a/c was wearing a squawk from EGKR, I called them to take action but although they said the a/c was on their frequency they could not contact him. I then called EGKK TWR to suspend SAM and BOG deps as I felt there may be an issue with the infringer if they were allowed to continue. After approx 3 mins, a/c was observed descending rapidly below the CTA and turning left to exit to the West.

201416977	06/12/2014	EGTT : London (FIR)	EGMC (SEN): Southend	8nm NNW	A	TMA	UNKNOWN	Unknown		Infringement of the Southend RMZ (Class G) and the LTMA (Class A) by an unknown a/c squawking 7000 at 4000ft. Traffic info given. Standard separation maintained.	Infringement Southend RMZ. Possible infringement LTMA Class A airspace. WX Southend 1250z 28006kt 250v320 CAVOK 06/M00 Q1027 (Regional pressure not available at time of writing). 1253:24 unknown a/c return appeared tracking eastbound. The Mode Charlie then indicated 3600'. The unknown contact was observed manoeuvring in tight patterns East of Stow Maries Airfield up to altitude 4000' indicated. Thames Radar were informed by Southend Director of the infringement, but not in contact with Southend ATC. Several blind transmissions made on 128.950 MHz (Southend Director) and 130.775MhZ (Southend Radar) North Weald Aerodrome contacted for potential tracing action. A transiting PA28 passed West abeam the contact at a similar indicated altitude reported the a/c as either an Me109 or a Spitfire. Traffic info passed to inbound A319 R/W24 under a Deconfliction Service, but deconfliction minima maintained. Thames Radar had no traffic affected.
201416977	06/12/2014	EGTT : London (FIR)	EGMC (SEN): Southend	8nm NNW	A	TMA	PIPER	Reciprocating	1	Infringement of the Southend RMZ (Class G) and the LTMA (Class A) by an unknown a/c squawking 7000 at 4000ft. 201416982	05/12/2014	EGTT : London (FIR)	BEL	7.5nm ENE	D	CTR	ROBINSON	Reciprocating	1	Infringement of the Aldergrove CTR (Class D) by an R44 squawking 7000.	At approx 1505, whilst working in the INT position, ADC advised of a helicopter just east of the CTR and wishing to fly through. The a/c had initially called the Unit on ADC's frequency and was told to remain outside CAS by them. As the a/c was about to cross the boundary into Class D airspace and hadn't called, I made a blind call to it with no response. Pilot called approx 7.5nm from BEL, inside the Aldergrove CTR.
201416993	05/12/2014	EGTT : London (FIR)	BNN	SE	A	TMA	CIRRUS	Reciprocating	1	Possible infringement of the LTMA (Class A) by an SR22.	SR22 infringes CAS SE of BNN. At approximately T1645, SR22 was observed to infringe CAS, SE of BNN, at 2.7A. The aircraft maintained that level for a short while before descending and leaving CAS. The aircraft infringed CAS again afterwards, but for a shorter period of time. At the time of the first infringement, Falcon 2000 (on a CPT departure) was given a right turn off the SID to ensure the aircraft maintained separation.

201416993	05/12/2014	EGTT : London (FIR)	BNN	SE	A	TMA	DASSAULT	Turbofan	2	Possible infringement of the LTMA (Class A) by an SR22.	SR22 infringes CAS SE of BNN. At approximately T1645, SR22 was observed to infringe CAS, SE of BNN, at 2.7A. The aircraft maintained that level for a short while before descending and leaving CAS. The aircraft infringed CAS again afterwards, but for a shorter period of time. At the time of the first infringement, Falcon 2000 (on a CPT departure) was given a right turn off the SID to ensure the aircraft maintained separation.
201417022	08/12/2014	EGTT : London (FIR)	SAM	7nm NW	D	CTA	OTHER	Turboshaft	1	Infringement of the Solent CTA (Class D) by an unknown a/c squawking 2676, indicating 2300ft. AIW activated. Infringer identified as a military a/c. Traffic info and avoiding action given to an inbound DHC8. Standard separation maintained.	Infringement by 2676 squawk. R/W02, QNH 1020, WX 9999 FEW020. At 1137 I was operating as Solent Radar when I noticed a 2676 squawk approximately 7nm NW of SAM eastbound approaching CAS, indicating Alt2.2 climbing. Mode S indicated the Callsign might be military a/c, so I put out a blind call using the Callsign, geographical position and level. There was no reply so I tried again stating the squawk. With no reply I tried the VP line but it flagged up as u/s. I therefore continued with a further blind call whilst asking the radar ATSA to try phoning VP instead. At approximately 1138, the 2676 squawk entered CAS climbing I believe to Alt2.3A and causing AIW to alarm. An inbound DHC8 was on a heading of 180deg maintaining FL70, SE of PEPIS and was told to maintain the heading for avoiding action. No LOS. The radar ATSA established contact with VP who said although the 2676 was not identified to them, they believed it was military a/c and would get it to turn away to the North. Shortly afterwards the 2676 squawk slowly turned to the North and had left by 1140. DHC8 continued for the F/D02 and made a normal approach and landing.□ Supplementary 18/12/14:□ Whilst on duty as Wallop Approach I received a phone call from Southampton who asked me if I was controlling fltnum703. I replied he was under a Basic Service from me but didn't know his position as I was not monitoring him. They informed me he was about to enter their airspace and asked if I could turn him North so I complied with the request. On the R/T I said to 703 I believe you're about to enter Southampton Airspace turn left onto North, as far as I remember. I observed a 2676 Squawk, which I believed to be 703 clip the edge of
201417022	08/12/2014	EGTT : London (FIR)	SAM	7nm NW	D	CTA	DE HAVILLAND	Turboprop	2	Infringement of the Solent CTA (Class D) by an unknown a/c squawking 2676, indicating 2300ft. AIW activated. Infringer identified as a military a/c. Traffic info and avoiding action given to an inbound DHC8. Standard separation maintained.	Infringement by 2676 squawk. R/W02, QNH 1020, WX 9999 FEW020. 201417329	13/12/2014	EGTT : London (FIR)	Elstree	3nm NW	A	TMA	VANS	Reciprocating	1	UK AIRPROX 2014/228 - Vans RV6 and a PA28, 3nm NW of Elstree in Class G airspace. Vans RV6 infringed the LTMA (Class A) due to taking aggressive avoiding action.	This AIRPROX has been subject to a separate review by the United Kingdom AIRPROX Board (UKAB). AIRPROX Board (UKAB) information indicates that this AIRPROX was caused by a late sighting by the Vans RV6 pilot and effectively a non-sighting by the PA28 pilot.
201417329	13/12/2014	EGTT : London (FIR)	Elstree	3nm NW	A	TMA	PIPER	Reciprocating	1	UK AIRPROX 2014/228 - Vans RV6 and a PA28, 3nm NW of Elstree in Class G airspace. Vans RV6 infringed the LTMA (Class A) due to taking aggressive avoiding action.	This AIRPROX has been subject to a separate review by the United Kingdom AIRPROX Board (UKAB). AIRPROX Board (UKAB) information indicates that this AIRPROX was caused by a late sighting by the Vans RV6 pilot and effectively a non-sighting by the PA28 pilot.

201417340	12/12/2014	EGTT : London (FIR)	EGGP (LPL): Liverpool	9nm SE	D	CTR	PIPER	Reciprocating	1	Infringement of the Liverpool CTR (Class D) and Manchester CTR (Class D) by an unknown aircraft squawking 7000 at 1400ft. Aircraft identified as a PA28. Standard separation maintained.	7000sq spotted infringing Liverpool CTR 9 miles SE of Liverpool tracking southwest bound at A014. Aircraft then did a 180 and infringed again going in the opposite direction. Aircraft then Infringed Manchester CTR. No other aircraft affected. Tried to blind call the aircraft. Aircraft finally called in on Manchester frequency and identified as (PA28). 1220Z 250/09KT 9999 SHGS FEW011 SCT020CB 05/01 Q0994.
201417352	13/12/2014	EGTT : London (FIR)	EGGP (LPL): Liverpool	15nm NW	D	CTA	PIPER	Reciprocating	1	Infringement of the Liverpool CTA (Class D) by a PA28 at 2600ft. Standard separation maintained.	PA28 infringement of Liverpool controlled airspace. PA28 was on a basic service and had reported at 1.3A, the routing and altitude would keep the aircraft below controlled airspace. The aircraft was later observed at 2.6A inside CAS, 15nm NW of Liverpool. The pilot was asked to confirm his altitude, the reply was 1.3A. The pilot was asked to reset, the pilot then replied that he had been reading his altimeter wrong and was now descending. The pilot was advised he had infringed CAS but by this point was back below CAS again so no clearance was given. No other aircraft were affected.
201417393	13/12/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	10nm SSE	D	CTA	OTHER	None	1	Infringement of the Stansted CTA (Class D) by an unknown aircraft squawking 7010, indicating 1900ft. Aircraft identified as a gyroplane.	7010 observed 10nm South of Stansted indicating 1900ft, the contact landed at intended destination. 'Check All' used and B737 on a CLN departure turned early. Gyroplane identified using mode S.
201417393	13/12/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	10nm SSE	D	CTA	BOEING	Turbofan	2	Infringement of the Stansted CTA (Class D) by an unknown aircraft squawking 7010, indicating 1900ft. Aircraft identified as a gyroplane.	7010 observed 10nm South of Stansted indicating 1900ft, the contact landed at intended destination. 'Check All' used and B737 on a CLN departure turned early. Gyroplane identified using mode S.
201417395	13/12/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	14nm NE	A	TMA	OTHER	Reciprocating	1	Infringement of the LTMA (Class A) by an unknown aircraft squawking 7000, indicating 3700ft. CAIT activated. Aircraft identified as a Pioneer 300.	A7000 indicating 3700ft infringed CAS 14nm NE of Stansted, CAIT activated, the contact later climbed to 4000ft. Pioneer 300 was tracking SE and then turned East. Two inbound a/c were delayed as a result. Pioneer 300 was identified using mode S.

201417466	13/12/2014	EGTT : London (FIR)	EGSS (STN): London/Stansted	TMZ	D	CTA	JODEL	Reciprocating	1	Infringement of the Stansted TMZ 2 (Class G) and CTA (Class D) at Andrewsfield by an unknown aircraft showing as a primary contact only. Aircraft identified as a Jodel D150.	Working as FIN. A primary contact entered TMZ 2 south west of North Weald at 1257. Target proceeded through North Weald circuit, and continued NE parallel to the Stansted CTA boundary. I managed to keep tabs on it, and as it was approaching Andrewsfield rang them to warn of potential infringement. I rang North Weald to ask if a/c had called them, they said negative, they just saw a white C42 microlight fly through. As primary target made turns in Andrewsfield circuit I rang them again to see if they had a microlight in the circuit. They had three so was unable to identify the one I had followed. At time 1309 a 7000 squawk indicating 2000 entered the North Weald circuit from the East. I rang North Weald who said Jodel D150 (the callsign displayed on the data block on my radar) had just called.
201417497	15/12/2014	EGTT : London (FIR)	Gamston	5nm W	D	CTR	CESSNA	Reciprocating	1	Possible infringement of the Doncaster CTR (Class D) by a C182. Traffic info given.	Civil Aircraft infringement of Doncaster controlled airspace. C182 called Waddington LARS for a basic service. Believed to be departing Netherthorpe ATZ to the east. Reported climbing to 1800ft. C182 was instructed to squawk 3603 and remain clear of controlled airspace. The Airspace above the region the aircraft was believed to be in has a base of 2000ft based on Doncaster QNH. C182 was then given the regional Barnsley pressure of 1004Hpa and asked to confirm altitude, which was reported as 2200ft. The Doncaster QNH was 1011Hpa. C182 was advised that it was inside controlled Airspace and was suggested to descend immediately and track south to leave controlled airspace as soon as possible, which they complied with. The suggested turn to the south also kept the aircraft clear of Gamston ATZ which it was heading towards. Once safely clear of Controlled Airspace the Callsign, Squawk and Type and time of infringement was passed to Doncaster ATC. Supervisors Narrative I witnessed the above incident and am content that the report above is accurate.
201417540	16/12/2014	EGTT : London (FIR)	WOD		A	TMA	PIPER	Reciprocating	1	Possible infringement of the LTMA (Class A) by an unknown a/c squawking 0442, indicating 2700ft. A/c identified via Farnborough as a PA28. Standard separation maintained.	I was working at the GS South when it was reported to me that an a/c had infringed the base of CAS in the WOD area. The base is A2500ft and the a/c was showing at A2700ft. The TC SW controller turned fltnum 135 onto a heading of 245deg in order to avoid the area of the infringer. The a/c called Farnborough who then turned and descended it clear. The a/c was identified by Farnborough as a PA28.
201417576	16/12/2014	EGTT : London (FIR)	HON	2-3nm SW	D	CTR	DIAMOND	Reciprocating	1	Infringement of the Birmingham CTR (Class D) by an unknown a/c at 1300ft. Aircraft identified as a DA40 flown by a solo student pilot who subsequently accepted vectors for a visual recovery to intended destination. Standard separation maintained.	I was operating as the APS controller at Coventry when at approximately 13:55 my ATSA was alerted by Birmingham ATC to an a/c on our conspicuity squawk entering the Birmingham CTR approximately 2 - 3 nm SW of HON VOR. At the time I was busy taking the details of multiple transit flights requesting services from Coventry. When I was able to take the information about the infringement from my ATSA I guessed that the most likely of the local flights I had at the time to be the subject a/c was a DA40. I asked the pilot (a solo student) his position, which he believed to be 5 mile SW of Leamington Spa. However the VDF trace indicated that he was in fact West of Coventry airfield and corresponded with the subject a/c. I instructed the pilot that I believed he was just entering CAS SW of Honiley and to turn South immediately. I then instructed the pilot to squawk 4363. Once positively radar identified the pilot was informed of his exact position which was now approx. 4 nm WSW of HON VOR at 1300' Alt. and again instructed him to turn South immediately as he had not yet initiated a turn as observed on the radar display. Once the a/c was clear of the Birmingham CTR I offered the pilot vectors towards their intended airfield for a visual recovery, which he accepted. He was vectored towards a downwind left hand position and passed his position in terms of prominent ground features on the way. The pilot got intended airfield in sight when about 6 nm SW and continued on his own navigation towards the downwind join for R/W23 and landed without further incident. Birmingham ATC were passed the a/c details and they requested the pilot and/or instructor contacted them. Flight training company were passed details of the infringement and were requested to contact Birmingham ATC.☐
201417603	16/12/2014	EGTT : London (FIR)	EGBE (CVT): Coventry	3nm S	D	CTA	PIPER	Reciprocating	1	Infringement of the Birmingham CTA 2 and 8 (Class D) by an unknown a/c squawking 7000, indicating 2500ft. A/c identified as a PA28 on a cross country qualifier who had become lost and called D&D.	Working as Radar 1, R/W33 Ops, a 7000 squawk was observed Northbound from South of Coventry indicating 2500. As the a/c approached Coventry Airport and infringed CTA2 Coventry were called to see if the a/c was working them. It was not but a further call indicated that the a/c was a PA28. As the a/c continued into CTA8 it descended slowly. On leaving CAS to the NE of Coventry the a/c squawked 3305, a D&D squawk. The a/c was PA28 on a cross country qualifier and had become lost, calling D&D once the pilot realised. No other traffic was affected, a precautionary check South was placed whilst the a/c was in the CTA. The pilot subsequently called Birmingham ATC, was thanked for calling D&D once lost. ☐ Supplementary 22/12/14:☐ Winds lighter than forecast. Some drift from desired track. Last positively check point identified = Chipping Norton. Key check point (Banbury) mis identified probably due to reading map to ground, causing significant further variation from intended track. Not aware lost until in the vicinity of EGBE. Pan: 121.5 called immediately. ☐ Supplementary 24/12/14:☐ At 1342 PA28 declared a PAN on 121x5 Mhz advising that he was lost and requesting a position fix and assistance to Sywell. Utilising DF he was given his position as overhead Coventry and a steer for Sywell. PA28 was offered a radar service until he was comfortable with his position and was identified and placed under TS. Navigational assistance was provided until he reported happy to continue visual at Sywell Lakes. The a/c was transferred

201417611	16/12/2014	EGTT : London (FIR)	WOD		A	TMA	PIPER	Reciprocating	1	Possible infringement of the LTMA (Class A) by a PA28, indicating 2700ft.	Infringement of the London TMA by PA28. I was working as the Approach and LARS West Controller bandboxed as there was no approach traffic in the next 20 minutes and medium LARS traffic. At 1236, a PA28 called on frequency. I gave him the squawk 0442, the QNH 1016 and a Basic Service. He was subsequently validated and verified. During my scan at about 1244 I noted that PA28 was about 4nm West of WOD at 2500ft tracking North East but did not consider that he was a risk at that time. Approximately 1 minute later the AIW sounded and I saw the PA28 was about 1nm West of WOD indicating 2700ft. I asked PA28 to confirm his altitude on the QNH 1016 and he replied 2600ft. I then told him to descend immediately to 2400ft and turn westbound as he was infringing controlled airspace. The pilot complied in a timely manner and I informed him when he had left controlled airspace and reminded him of the airspace base in the vicinity of WOD.
201417622	10/12/2014	EGTT : London (FIR)	EGWU (NHT): Northolt		D	CTR	CESSNA	Reciprocating	1	Infringement of the London CTR (Class D) by an unknown aircraft squawking 7000, indicating unverified 1500ft. Aircraft identified as a C152. Standard separation maintained.	Northolt - London Class D infringement. I was working solo as Northolt Approach bandboxed when I witnessed a 7000 squawk depart Denham ATZ and track westbound into the London Class D airspace. I contacted Denham ATC to attempt to identify the aircraft and provide a solution, Denham identified the aircraft as C152 and the pilot was told to route northbound immediately, which they did. The aircraft tracked approximately 3 miles west of Denham and 2 Miles south of Beaconsfield before the instruction to turn was given, the highest altitude witnessed from the Mode C was 1500' unverified.☐ CAA Closure:☐ Pilot error, situational awareness. Passed on-line test, warning letter sent.
201417670	16/12/2014	EGTT : London (FIR)	BHX	12nm S	D	CTA	CESSNA	Reciprocating	1	Infringement of the Birmingham CTA (Class D) by an unknown a/c squawking 7000 at 3000ft. A/c identified as a C152. STCA and AIW activated. Traffic info given. Standard separation maintained.	I was OJTI to a trainee with 200+ hours training on Radar. PA34(1) had completed a LOC/DME approach and Go Around to R/W33 and had been placed on its own navigation to destination at 3000' with the condition that the a/c would turn no further left than hdg 150. As the PA34(1) would be leaving CAS traffic info was given on a 7000 contact to the South. The PA34(1) pilot reported visual. The STCA alert was flashing. As the a/c got closer it was confirmed again that the pilot was still visual. The 7000 infringed CAS (the AIW warning was initially missed due to the STCA already flashing) and the PA34(1) passed behind. At the same time clearance had been given for a non-transponding a/c to cross Birmingham CAS and 2 a/c were being vectored inbound. The second inbound was a PA34(2) who was given hdg 340 as the 7000 continued to penetrate CAS eastbound.☐ Supplementary 19/12/14:☐ Take off with QFE = 1012, QNH = 1015, R/W18 right hand. Freq 124.025. Straight climb out past noise abatement then right turn out to follow planned route. Climbed to 2500' on QFE then changed to QNH and climbed to 3000'. I turned late and further North of Worcester than usual, tracking me more northerly but on a parallel course. My usual landmarks were not visible and I decided to check my heading using the VOR facility which I have used as a back up in the past for information only. The VOR was already set to Daventry on 116.400 so I changed the OBS to fix a radial of 090. The needle immediately swung to the left and the 'TO' flag showed. I was surprised as it suggested I was too far South. I assumed winds aloft may have drifted me although there was nothing on the ground to confirm this (smoke
201417670	16/12/2014	EGTT : London (FIR)	BHX	12nm S	D	CTA	PIPER	Reciprocating	2	Infringement of the Birmingham CTA (Class D) by an unknown a/c squawking 7000 at 3000ft. A/c identified as a C152. 201417736	19/12/2014	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	SW CTR	D	CTR	CESSNA	Reciprocating	1	Infringement of the Heathrow CTR (Class D) by a C182 at 2400ft. AIW activated. Standard separation maintained.	At 1154z C182 called on frequency requesting a basic service. The pilot was issued with a squawk of 0435 and given the QNH and a basic service. A primary contact was observed North of Blackbushe still inside the ATZ and I believed this to be C182 resetting the squawk. The first time I saw the 0435 squawk was when the AIW warning alerted me to the infringement and C182 was issued with an immediate turn to the West to leave CAS. Once clear of the CTR C182 was given his position in relation to the WOD NDB and he confirmed that he was happy to continue with his own navigation. On my next scan I noticed that his current track looked likely to infringe the North West corner of the CTR and so I suggested a left turn of 10 degrees to remain clear. Whilst in the process of handing over position C182 reported that he would like to continue on a heading of 360 degrees, I acknowledged this and informed him that the Wycombe Air Park ATZ was ahead by 5NM, C182 replied that he would request a change to Wycombe Air Park soon. Whilst still handing over I then observed that C182 was about to enter the Wycombe Air Park ATZ and so I transferred him to the Wycombe Air Park frequency.
201417751	19/12/2014	EGTT : London (FIR)	LCY	4nm SW			AEROSPATIALE	Turboshaft	1	Infringement of the London City CTR/CTA (Class D) by an unknown a/c squawking 7000. A/c identified as an AS350. CAIT activated. Standard separation maintained.	At approximately 1319hrs I observed a 7000 contact tracking NE towards the City Control Zone. The contact was travelling at a reasonable speed and shortly afterwards entered the Zone on a track towards the Isle of Dogs and London City Airport activating the CAIT tool. City were operating on R/W27 so I contacted the Tower and informed them to stop departures. Whilst this conversation was taking place the contact was observed to make a left turn onto a south Westerly track. Shortly afterwards the contact appeared to manoeuvre in the vicinity of the CTR boundary and AS350 came onto my frequency requesting a joining clearance. I asked the pilot if he had just been inside the Control Zone but I did not fully understand his reply, (he made some reference to Farnborough LARS instructing him to 'continue', but I could not ascertain the full context). I issued AS350 with a clearance to enter CAS and made the necessary coordination with City Tower. AS350 proceeded to Helicopter Landing Site and departed on a reciprocal track about 15 minutes later.
201417756	20/12/2014	EGTT : London (FIR)	LOREL		A	TMA	DIAMOND	Reciprocating	1	Infringement of the Stansted CTA (Class D) and the LTMA (Class A) by a DA40 at 3000ft. AIW activated. Standard separation lost. Avoiding action and traffic info given to a B737.	Infringement of CAS near LOREL. I was working LARS North (LARS East split) with about 12 a/c on a busy frequency. DA40 called at 1200 requesting a Basic Service which was agreed and was instructed to squawk 5030. Shortly afterwards the Airspace Infringement alarm went off and I observed a 5020 squawk indicating 3000ft in the TMA near LOREL where the base is 2500ft. I advised the corresponding aircraft to descend before realising it was DA40 on the wrong squawk and then advised him to descend below CAS. During this time my colleague on LARS East phoned Luton Radar to let them know the details and advised them that the a/c was now leaving CAS.☐ Supplementary 23/12/14:☐ At time 1202 an unknown contact entered CAS at 3000ft around the BKY area travelling East. A B737 was on an westerly track travelling through the Luton gate. The B737 was given avoiding action to the North. The unknown contact shortly afterwards displayed a Farnborough squawk who were contacted and the infringing a/c was identified.☐ Supplementary 26/05/2015:☐ The a/c was observed to enter the SS CTA at 3.0A. B737 was out of 6.5A in the descent to 5.0A the LF LARS controller reported that:☐ DA40 called at 12:00 requesting a Basic Service which was agreed and was instructed to squawk 5030. Shortly afterwards the Airspace Infringement alarm went off and I observed a 5020 squawk indicating 3000ft in the TMA near LOREL where the base is 2500ft. I advised the corresponding aircraft to descend before realising it was the DA40 on the wrong squawk

201417757	20/12/2014	EGTT : London (FIR)	EGVN (BZZ): Brize norton	W	A	Other	SCHLEICHER	Reciprocating	1	Infringement of Airway L9 (Class A) by a glider at FL92. Standard separation maintained.	Airspace infringement during glider flight in wave. During a recreational soaring flight the aircraft was in touch with Brize Norton Approach while searching for lift in wave above cloud. The aircraft entered L9 airway for approximately 2min 30s to a maximum of 350m due to pilot error. When the penetration was noticed the airspace was vacated without delay. The flight continued to the West of this position, close but outside L9 which was continually monitored on the GPS flight instruments. This was a temporary loss of concentration by two experienced pilots, both of whom express their sincere apology and regret for the infringement and any inconvenience caused. □ Supplementary 22/12/14: □ Glider penetrated L9. Working as the S23T between 1100 and 1210 my planner pointed out a trail that was apparently a glider that Brize Norton had lost contact with and was last known at FL80. We watched it for all of the session that we were plugged in with no issues. Later in the shift working as the S23P (between 1240 and 1330) this trail which was squawking 3737 came inside L9 at about 1255 indicating FL92 and was approximately 4nm north of MALBY. This was on WKS 345, as it travelled further west Bristol were informed the info we had on it. At 1318 it was seen inside L9 at the edge of the LACC and Bristol airspace at FL83 (base is FL75 here). AT 1321 Bristol rang to say they were now speaking with the glider and they would get the pilots info in case we required it, they changed its squawk to 5063. □ Supplementary 16/01/2015: I was controlling in Approach band boxing Zone, when an ac free called the Approach frequency callsign Glider 13 requesting a BS. The ac was
201417759	20/12/2014	EGTT : London (FIR)	EGGD (BRS): Bristol/Lulsgate	11nm ENE	D	CTA	PIPER	Reciprocating	1	Infringement of the Bristol CTA-3 (Class D) by a PA28 at 2700ft. Standard separation maintained.	On duty as RAD1 working one inbound A319 from EXMOR downwind LH for R/W27. I noticed a Bristol 5065 squawk entering Bristol CAS 11nm ENE of the BRI, tracking SW with Mode C A027 - base of CAS at that point A020. I alerted the RAD2 ATCO who advised the pilot and the a/c left CAS with a left turn to the SE. At the time I noticed the infringement I turned the inbound A319 slightly to the right downwind as a precaution but as the infringer was known traffic, the relative distance was approximately 9nm and only descending to 4000'alt I did not consider avoiding action to be necessary at that stage. The infringing a/c left CAS before a base leg turn was commenced and there was no loss of separation. □ Supplementary 22/12/14: □ I had just taken over on the Radar 2 position and at the time the a/c in question PA28 was on a navigation exercise and was manoeuvring outside of CAS to the North of Bath racecourse VRP. At time 1402 I was attempting to transfer communication for another a/c which was experiencing radio problems. I then was called by an a/c departing Bristol VFR to the South and replied to his call. My colleague on Radar 1 who was vectoring an a/c downwind for R/W27 alerted me to the fact that PA28 had by now entered CAS by about half a mile but was at 2700ft, the base in that part of the CTA is 2000ft. I then instructed the a/c to remain outside of CAS and that he appeared to be just inside at 2600ft. The pilot confirmed that he would remain outside CAS and was turning towards Bath. The a/c was seen to turn onto a south-easterly course. I restated that he should remain outside CAS and that traffic was being vectored downwind for R/W27. The a/c then continued away from the
201417759	20/12/2014	EGTT : London (FIR)	EGGD (BRS): Bristol/Lulsgate	11nm ENE	D	CTA	AIRBUS	Turbofan	2	Infringement of the Bristol CTA-3 (Class D) by a PA28 at 2700ft. Standard separation maintained.	On duty as RAD1 working one inbound A319 from EXMOR downwind LH for R/W27. I noticed a Bristol 5065 squawk entering Bristol CAS 11nm ENE of the BRI, tracking SW with Mode C A027 - base of CAS at that point A020. I alerted the RAD2 ATCO who advised the pilot and the a/c left CAS with a left turn to the SE. At the time I noticed the infringement I turned the inbound A319 slightly to the right downwind as a precaution but as the infringer was known traffic, the relative distance was approximately 9nm and only descending to 4000'alt I did not consider avoiding action to be necessary at that stage. The infringing a/c left CAS before a base leg turn was commenced and there was no loss of separation. □ Supplementary 22/12/14: □ I had just taken over on the Radar 2 position and at the time the a/c in question PA28 was on a navigation exercise and was manoeuvring outside of CAS to the North of Bath racecourse VRP. At time 1402 I was attempting to transfer communication for another a/c which was experiencing radio problems. I then was called by an a/c departing Bristol VFR to the South and replied to his call. My colleague on Radar 1 who was vectoring an a/c downwind for R/W27 alerted me to the fact that PA28 had by now entered CAS by about half a mile but was at 2700ft, the base in that part of the CTA is 2000ft. I then instructed the a/c to remain outside of CAS and that he appeared to be just inside at 2600ft. The pilot confirmed that he would remain outside CAS and was turning towards Bath. The a/c was seen to turn onto a south-easterly course. I restated that he should remain outside CAS and that traffic was being vectored downwind for R/W27. The a/c then continued away from the
201417933	24/12/2014	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	080 10nm	D	CTA	VANS	Reciprocating	1	Infringement of the East Midlands CTA (Class D) by a Vans RV7. Avoiding action given to inbound B737.	During the final stages of vectoring the B737 for the ILS I observed an unknown contact outside CAS bearing 060deg from EGNX, range 12nm and indicating 2,200ft. It was squawking 7000 with Mode C and heading on a south-westerly track. I thought the traffic might be inbound to Tollerton but I continued to monitor its progress and warning the B737 about the traffic and advised them I may have to break them off the approach. I then noticed the unknown contact turn onto a southerly track. I immediately warned the B737 and gave avoiding action, issuing a left turn onto 180deg and an instruction for him to maintain 3000ft (a/c had been cleared down to 2000ft). I then observed the unknown contact enter CAS, CTA 2 (base 1500ft) without a clearance, on a bearing of 080deg, a range of 10nm and indicating 1800ft descending. The a/c was not in contact with East Midlands Radar and therefore not receiving a service from East Midlands. At time 1050 I received a call from the RV7. The D/F matched the bearing of the unknown contact so I immediately issued a squawk to try and identify the a/c. The a/c was finally identified and left CAS on a bearing of 110deg range 14nm, indicating 1700ft.

201417933	24/12/2014	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	080 10nm	D	CTA	BOEING	Turbofan	2	Infringement of the East Midlands CTA (Class D) by a Vans RV7. 201417992	28/12/2014	EGTT : London (FIR)	EGSX : North Weald	2nm E	D	CTA	VANS	Reciprocating	1	Infringement of the Stansted CTA (Class D) by a Vans RV4 indicating 2200ft. Traffic info given. Standard separation maintained.	Infringer Vans RV4. Vans RV4 outbound activated CAIT indicating 2200ft within CTA. SB2000 orbited downwind at 3000ft to remain clear. After phone call to North Weald it transpired that they were talking to the aircraft.
201417992	28/12/2014	EGTT : London (FIR)	EGSX : North Weald	2nm E	D	CTA	SAAB	Turboprop	2	Infringement of the Stansted CTA (Class D) by a Vans RV4 indicating 2200ft. Traffic info given. Standard separation maintained.	Infringer Vans RV4. Vans RV4 outbound activated CAIT indicating 2200ft within CTA. SB2000 orbited downwind at 3000ft to remain clear. After phone call to North Weald it transpired that they were talking to the aircraft.
201418053	30/12/2014	EGTT : London (FIR)	EGCB : Manchester/Bar ton	14nm NW	D	CTA	EVEKTOR AEROTECHNIK	Reciprocating	1	Infringement of the Manchester CTA (Class D) by an unknown aircraft with Mode C showing a maximum of 3000ft. Aircraft identified as an EV97. AIW activated. Standard separation maintained.	CAS Infringement. A radar contact was seen leaving departure airfield to the north-west. AIW activated and mode C showed a maximum of 3000ft (base of CTA is 2500ft). Mode S aircraft ID was EV97. No separation issue with other traffic. No RT contact. Departure airfield advised by telephone.
201418159	29/12/2014	EGTT : London (FIR)	Oulton Park		D	CTR	UNKNOWN	Unknown		Infringement of the Liverpool CTR (Class D) by an unknown light aircraft. Traffic info given. Standard separation maintained.	CAS infringement by non-squawking a/c. After just taking over the Liverpool ADI position I noticed a non-squawking ac appearing to route across CAS approximately 2nms north of Oulton Park. My colleague had previously cleared a micro-light to enter CAS at Oulton Park to cross towards Aintree and the infringing ac was seen to route approximately 1.5nms through its 12 o'clock. I called the infringing ac to the micro-light who saw it and reported it as a light fixed wing ac at approximately 1A. I intended to track the ac on radar so as to take further action, however the ac disappeared from radar almost immediately after being seen by the micro-light. A non-squawking ac did appear briefly in the low level corridor but I could not confirm that it was the ac in question. After the incident I reported the radar performance to Tels who agreed that the return, if at 1A, would be at the limits of radar coverage but would pull the recording and investigate.

201418159	29/12/2014	EGTT : London (FIR)	Oulton Park		D	CTR	CYCLONE AIRSPORTS	Reciprocating	1	Infringement of the Liverpool CTR (Class D) by an unknown light aircraft. Traffic info given. 201418288	12/12/2014	EGTT : London (FIR)	EGVN (BZZ): Brize norton		D	CTR	AEROSPATIALE	Turboshaft	1	Infringement of the Brize Norton CTR by an AS350 at 1400ft. Avoiding action given. Standard separation maintained.	Brize Norton CTZ Infringement. Controlling in the TC(RA) position and working one track on the Director frequency and one track on the Zone frequency. I received a free call on the Zone frequency from a second aircraft, AS350 who was told to "standby" while I transmitted to the aircraft on the director frequency. Having finished transmitting to the aircraft on the Director frequency I told the aircraft on standby to "pass message". The aircraft passed its message and indicated that it was two miles west of Oxford City requesting to transit the zone. The aircraft I believed it to be was one mile from entering Brize Controlled airspace without permission so I issued a squawk with a reminder of "remain outside of controlled airspace". The aircraft made an avoiding action turn to the north east but still entered Brize Norton controlled by one mile. I also had to issue an avoiding action turn to my aircraft on Director to achieve standard separation.☐ Supervisors Narrative: The RA controller was working a SA365 down wind in the radar pattern when I noticed a 7000 squawk heading straight for the eastern end of the CTR. At the same time an ac was calling Zone for a CTR transit. The ac was told to remain outside CAS and standby; the DF trace did not go through the ac. As the ac approached the edge of the CTR it was clear that it was going to be an inadvertent penetration of CAS so I instructed RA to avoid the ac with his SA365; this he duly did. As the ac entered the CTR the return faded and then returned in a northerly direction and then easterly indicating the ac had gone into a right hand orbit. The ac was positively identified and then given a VFR transit of the CTR. The SA365 continued with his radar vectored ILS.

201500030	02/01/2015	EGTT : London (FIR)	BIG	8nm E	A	TMA	COMMANDER	Reciprocating	1	Infringement of the LTMA (Class A) by a Commander 114 at 2800ft. Standard separation maintained.	Commander 114 TMA Infringement No LOS. At approximately 12:46 Commander 114 entered the London TMA east of Biggin Hill by 8nm tracking east- south-eastbound at 2800ft. EMB190 inbound was given a none optimal routing to avoid the infringer.☐ Supplementary 19/01/15 - Pilot Report:☐ I departed Stapleford (EGSG) at 13:00 UTC with one passenger to make a short flight to Brands Hatch, Leeds Castle and back to Stapleford. The weather was cold, bright and clear, once airborne I was surprised to find how turbulent the conditions were. I headed south east from Stapleford and crossed the Thames near the QE2 bridge, I was aware of an aircraft approaching London City from the east, I checked my altitude at this time which was showing 2400 ft. As I crossed into Kent the turbulence became worse, my intention was to make an orbit around Brands Hatch (8nm east of BIG) and the to proceed to Leeds Castle, as I completed my orbit I checked my altitude which showed 2600ft descending, it seems I became preoccupied with the orbit in turbulent conditions and allowed the a/c to climb. I have resolved to increase the safety margins in all flight conditions, 200ft below Airspace for normal flying increasing as conditions demand. This has bought home to me that after 20 years experience I could still slip up. I will also resolve to concentrate on due diligence to prevent this happening again.☐ CAA Closure:☐ Lesson learned, pilot will allow a greater margin for error in future.
201500030	02/01/2015	EGTT : London (FIR)	BIG	8nm E	A	TMA	EMBRAER	Turbofan	2	Infringement of the LTMA (Class A) by a Commander 114 at 2800ft. Standard separation maintained. 201500035	04/01/2015	EGTT : London (FIR)	EGCF : Sandtoft	3nm E	D	CTA	PIPER	Reciprocating	1	Infringement of the Doncaster CTA 5 (Class D) by an unknown aircraft squawking 7000 at 4000ft. Aircraft identified as a PA28. Standard separation maintained.	Infringement of Doncaster CTA-5 by PA28. At 10:40 I observed a #7000 squawk to the south east of Sandtoft aerodrome tracking towards Doncaster controlled airspace at 4000 feet. A blind call was made to the aircraft to determine if it was on the Doncaster radar frequency but no response was received. Soon after entering controlled airspace the aircraft's squawk was observed to change to #4274, a Humberside radar discrete squawk. I contacted Humberside Radar who were unaware that their #4274 squawk was inside Doncaster's controlled airspace. Humberside passed me the aircraft's details (PA28) and instructed PA28 to contact me. On contacting Doncaster Radar PA28 was advised that he had entered controlled airspace without a clearance but as there was no conflicting traffic PA28 was cleared to continue inside controlled airspace maintaining VFR.
201500082	04/01/2015	EGTT : London (FIR)	EGCB : Manchester/Barton		D	CTA	EVEKTOR AEROTECHNIK	Reciprocating	1	Infringement of the Manchester CTA (Class D) by an EV97. AIW activated. Standard separation maintained.	EV97 infringing CAS. I noticed the AIW had activated in the lateral confines of the Barton flying area. The transponder was indicating 2.3A and climbing where the a/c should be operating below 2A. The a/c tracked north bound where it entered the lateral confines of the CTA and was now indicating 2.7A and climbing where it should have been operating not above 2.5A. Radar derived information told me the a/c was an EV97. I contacted Barton who were still in communication with the a/c and they asked the pilot to descend below controlled airspace.
201500199	07/01/2015	EGTT : London (FIR)	Hunsdon		D	CTR	OTHER	Reciprocating	1	Infringement of the Stansted CTR (Class D) by a Skyranger 912, resulting in loss of separation with an outbound B737. CAIT activated. Avoiding action given.	At about 14.23z SCAIT picked up a contact climbing out of Hunsdon and identified it. The TWR were just rolling B737 on a DET. I called the TWR and elected to work the departure against the apparent infringer. When he called I gave him avoiding action against Skyranger 912, turning him east. Skyranger 912 stayed within the Hunsdon delegated airspace and appeared to be doing circuits. The TWR delayed the next departure while we tried to contact Hunsdon.☐ CAA Closure:☐ Pilot error. Situational awareness. Passed on-line test. Warning letter sent.

201501033	24/01/2015	EGTT : London (FIR)	Coventry	S	D	CTA	TECNAM	Reciprocating	1	Infringement of the Birmingham CTA 4 (Class D) by an unknown aircraft squawking 7000 at 4000ft. Aircraft identified as a Tecnam P2002 flown by a solo student pilot. Traffic info given. AIW activated. Standard separation maintained.	Infringement of CTA4 by Tecnam P2002. I was Radar1 when I noticed a 7000 squawk approaching the edge of CTA4 it was indicating 3900ft. I checked its Mode S and got the callsign of Tecnam P2002. I made several blind calls on the frequency and asked the ATSA to call Coventry to see if they were in contact with the aircraft. There was no response on the frequency and Coventry said they were not working it. As the Aircraft was at 3900ft the AIW started to flash as soon as it crossed the line but we still could not raise the aircraft on the frequency. I asked a colleague to keep an eye on the aircraft in the Rad2 position and I had 1 inbound (fltnum 5469) who I kept out of the way to the south. My colleague recommended speaking to Wellesbourne which we did and they told us that it was a student pilot on a cross country navex. When I was happy that the aircraft was continuing on its track and would leave CAS I vectored the fltnum 5469 back onto the Loc for Rwy33 and it landed with no further delay. We later noticed that the aircraft wore a Coventry squawk after it had left CAS. We then asked Coventry to pass on our telephone number and get the pilot to call when he was on the ground. When the pilot called I spoke to him as Watch Manager and asked him if he had realised that he had infringed. He said that he was very sorry and he had become slightly distracted as he had tried to call Coventry but could not get through initially and when he did the reception was very poor and he struggled to hear what they were saying. During this he lost track of his altitude and inadvertently climbed to 4000ft. He descended once he'd realised but he had not realised he had infringed until told by Coventry.

201501033	24/01/2015	EGTT : London (FIR)	Coventry	S	D	CTA	UNKNOWN	Unknown		Infringement of the Birmingham CTA 4 (Class D) by an unknown aircraft squawking 7000 at 4000ft. Aircraft identified as a Tecnam P2002 flown by a solo student pilot. Traffic info given. AIW activated. Standard separation maintained.	Infringement of CTA4 by Tecnam P2002. 201501231	01/02/2015	EGTT : London (FIR)	EGCB : Manchester/Barton	3nm North	D	CTA	PIPER	Reciprocating	1	Infringement of the Manchester CTA (Class D) by a PA28 squawking 7000 indicating 2400ft and climbing. AIW activated.	At time 1112z the AIW was activated overhead Barton and I noticed an a/c indicating 2.4A and climbing. I telephoned EGCB who transmitted a blind message to all a/c on their frequency to check their levels. The a/c in question descended and the AIW alert stopped. □ Supplementary 02/02/15:□ I was ascending out of Barton after take off and I thought I was clear of the Manchester CTA overhead South Bolton. Barton informed me of contact from Manchester in which I immediately descended to 1800 feet. Another aircraft had left Barton before me and I can only think that I went above 2000ft to keep separation as he was at 2200 overhead the Reebok stadium as I was heading to the Reebok myself. From this point on I will be staying at or below 1800 feet around Barton and Manchester CTAs, this will ensure I won't infringe the airspace. It was a shock when I landed to hear this and extremely sorry if I infringed the CTA. I have always flown safely and aware of controlled airspace and from now I will be even more aware.
201501290	02/02/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	7nm North	D	CTR	PIPER	Reciprocating	1	Infringement of the Stansted CTR (Class D) and TMZ (Class G) by a PA28 squawking 7000 with no Mode C. Traffic info given.	At approximately 1108 UTC a 7000 squawk with no Mode C entered the Stansted Control Zone to the north east of Stansted, heading straight towards the airfield. As he had no Mode C he was already a TMZ infringer, but he then continued on his south westerly track entering the control zone. I immediately called the tower to point out the infringer as they had a CPT departure on the roll (B737). I asked them to pass the traffic information to the B737 and to get it to make an early left turn to maximise the distance from the infringer. At around this time the infringing aircraft, who by now was approximately 1.5nm inside the zone, appeared to realise his mistake and executed a 180 degree turn to leave controlled airspace to the north east. The tower called to request permission for an eastbound departure who was already lined up, which I allowed them to depart as the infringing aircraft was by now leaving the control zone. Apart from an early turn off the SID for the B737, fortunately no other aircraft were affected. The infringing aircraft was monitored as it passed 1nm east of Andrewsfield on a southerly track and then on towards Southend. Andrewsfield were contacted but the unknown aircraft did not communicate with them. It did eventually contact Southend and the details were obtained. The infringing aircraft was PA28, a Cherokee. At the time these details were obtained from Southend the PA28 was 5nm north west of Southend, on a southerly track, at a reported altitude of 2200 feet.

201501381	22/01/2015	EGTT : London (FIR)	EGLD : Denham	3nm West of Denham ARP	A	CTR	CESSNA	Reciprocating	1	Infringement of the London CTR (Class A) by a C206 with Mode C indicating 900ft.	An aircraft showing code callsign conversion C206 turned pink on my radar display, indicating that it was inside controlled airspace without approval. The aircraft appeared to depart the Denham circuit to the west, mode C A09, into the Northolt Radar Manoeuvring Area, for approximately 30 seconds before moving back towards the Denham ATZ. The aircraft did not speak to me but was on frequency with Denham ATC. The Denham controller was telephoned and asked to instruct the aircraft to vacate the NRMA. There was no traffic to affect at the time but an aircraft had not long landed at Northolt and we were operating rwy07. This was the second instance of unauthorised infringement of airspace by a Denham aircraft that I had seen in 2 days.
201501392	04/02/2015	EGTT : London (FIR)	MCT	12nm SW	D	CTR	PIPER	Reciprocating	1	Infringement of the Manchester CTR (Class D) by an unknown aircraft squawking 7366, climbing above 1300ft. Aircraft identified as a PA28. AIW activated. Standard separation maintained.	Zone Infringement PA28. On duty as Approach South Controller I was alerted by an AIW warning at the southern end of the Low Level Route. The 7366 squawk was climbing above 1300. At the time I was vectoring several aircraft, none of which were within 5 miles of this contact. I attempted to call the aircraft who identified himself as PA28. I eventually managed to get the aircraft to squawk a Manchester SSR code and identified the aircraft. I informed PA28 that he had climbed before exiting the LLR. Once clear of the CTZ the aircraft changed frequency. ☐ Supplementary 11/02/15:☐ Flying down the LLC at the south end and monitoring the Manchester Approach frequency, I spotted Oulton Park the LLC southerly VRP on the nose, convinced I was out of the LLC, I started to climb from 1200ft for 2000ft. I was eager to get altitude as I know the Oulton Park VRP can get busy as the entry point for Liverpool CTR and entry to LLC. Shortly after I started the climb I was hailed by Manchester Approach and informed I started my climb inside the CTR. He instructed me to climb and maintain 2000ft. I complied to this instruction. After a few minutes I requested and changed to Radar frequency for the MATZ transition. In future I will maintain altitude below 1300ft until overhead Oulton park VRP plus I will use all NavAids available to me to improve position awareness.

201501425	04/02/2015	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	5nm SE	D	CTR	CESSNA	Reciprocating	1	Infringement of the East Midlands CTR (Class D) by an unknown aircraft at 1900ft. Aircraft identified as a C152, with compass issues. C152 was given navigational assistance to locate intended airfield. Traffic info given. Standard separation maintained.	Alleged Infringement of East Midlands CTR. I was on duty as APR at East Midlands when I noticed a radar contact tracking towards CAS from the south. I warned ADC of the contact as it appeared to be continuing into the CTR while there was a B757 in the left-hand visual circuit runway 27. I attempted to contact the aircraft on the approach frequency but elicited no response. The contact continued northbound ahead of the B757 who elected to climb 200ft to increase separation before visually acquiring the target. The unknown contact tracked north through 3nm final approach runway 27 descending to 1200ft Mode C before turning west. It then proceeded to apparently enter Derby's ATZ, before turning north. At this point C152 called on 134.175MHz declaring that he was en-route & was having issues with his compass. He was allocated a squawk & identified as the unknown contact that had infringed the CTR. C152 was given navigational assistance to locate intended destination airfield before being transferred. I telephoned intended destination & spoke to the Duty Instructor while C152 was being positioned to inform him that C152 was having navigation issues & was receiving radar assistance. C152 had previously reported that he was unsure of his position on his outbound leg & had received assistance from East Midlands APR. □ Appropriate CAA action is to be taken as a result of this incident.
201501425	04/02/2015	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	5nm SE	D	CTR	BOEING	Turbofan	2	Infringement of the East Midlands CTR (Class D) by an unknown aircraft at 1900ft. 201501450	18/01/2015	EGTT : London (FIR)	EGVN (BZZ): Brize norton		D	CTR	CESSNA	Reciprocating	1	Infringement of the Brize Norton CTR (Class D) by an unknown aircraft at 3000ft. Aircraft identified as a C152. Standard separation maintained.	CTR Violation. C152 called requesting a Basic Service and a transit at 3000ft. At the same time Oxford ATC called which was answered by the LARs controller stating that this aircraft was instructed to stay outside CAS before they released it to the zone frequency. Looking at the radar picture there was an aircraft inside CAS 2.5 NM southwest of Oxford tracking southeast. Knowing the aircraft was very close to the CTR it was given an immediate VFR transit through the CAS. Identification confirmed that the aircraft which had already violated the CTR was C152. This aircraft was clearly inside the CTR before requesting to transit. When outside of the CTR the aircraft was requested to call the ATC Supervisor after landing. At the time of the incident there were no other aircraft inside the CTR with no notified departures or arrivals from Brize Norton.
201501498	07/02/2015	EGTT : London (FIR)	EGHI (SOU): Southampton	11.2nm NE	D	CTA	MD HELICOPTER	Turboshaft	1	Infringement of the Solent CTA 7 (Class D) by an MD500 at 3800ft. Traffic info and avoiding action given to an inbound DHC8. Standard separation maintained.	Infringement of the Solent CTA-7 by MD500. A Farnborough squawk of 0432 was observed climbing towards the edge of CAS (Solent CTA-7), I asked my coordinator to contact Farnborough to ascertain the intentions of the aircraft, Mode S detailed the callsign as MD500. Farnborough provided the details and agreed to transfer MD500 to Solent. I made blind calls with no response to MD500 as they had not appeared to transfer frequency, an inbound from the north (DHC8), still inside Q41 was given a heading to ensure there would be no loss of separation if the MD500 entered CAS. The coordinator contacted Farnborough again and there appeared to be an issue with getting the pilot to transfer frequency, shortly afterwards MD500 entered CAS without clearance, avoiding action and traffic information given to the DHC8, but there was never any risk of a loss of separation, closest distance was over 7NM. MD500 did call and was given transit clearance. MD500 entered the Solent CTA-7 at time 1352, bearing from SAM 052 11.2NM A038. Left Solent CTA-7 at time 1355 SAM 018 11.0NM. □ Supplementary 17/02/15:□ The aircraft entered the Solent Control Area (Solent CTA-7) without a clearance, whilst in receipt of a Basic Service from Farnborough LARS West. Farnborough attempted to inform the pilot of his position and need to deviate so as to avoid the Solent CTA. The aircraft contacted Solent Radar after the infringement occurred and was provided with a crossing clearance as requested by the pilot.

201501606	07/02/2015	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD	2nm W	D	CTR	PIPER	Reciprocating	1	Infringement of the Doncaster Sheffield CTR (Class D) by a PA28 at 1200ft. Standard separation maintained.	PA28 zone infringement. PA28 on a basic service routing via a disused airfield, reported there at 12:14. was then observed tracking east towards Doncaster. No traffic inside CTR to affect. PA28 continued into the CTR without clearance. I informed the pilot he had infringed controlled airspace and instructed him to leave the zone to the west. Upon leaving the zone, I suggested he follow the A1 northbound as this would keep him outside CAS and towards his destination. On leaving my frequency after crossing the M62, I asked him to telephone once inside the flying club. Pilot called shortly after landing and offered apologies. He believes that the forecast upper winds were significantly different than the actual upper winds and this caused his gross navigational error. He asked me what track he was taking when the zone infringement occurred. I informed him that from the overhead of the disused airfield, he took up an ENE track, but a northerly track would have been the correct one to fly as this points direct towards their destination.
201501607	08/02/2015	EGTT : London (FIR)	EGCF : Sandtoft	2.5nm SW	D	CTR	UNKNOWN	Unknown		Infringement of the Doncaster Sheffield CTR (Class D) by an unknown aircraft squawking 7000 at 1000ft. Traffic info and avoiding action given.	CAS Infringement by traffic in Sandtoft circuit resulting in Avoiding Action for Doncaster Sheffield traffic. C152 was executing a Missed Approach from runway 02 after a training ILS approach, climbing straight ahead to 3A, when a 7000 squawk was observed tracking SE approx 2.5NM SW of Sandtoft at 1A, inside CAS. C152 was asked if he could see the infringing aircraft, and on replying that he could not, Avoiding Action was issued to C152 to fly heading 340deg. C152 was subsequently asked whether he was still flying under IFR, to which he replied negative, that he was VFR. Avoiding Action was therefore cancelled and C152 was instructed to continue Own-Nav as the infringing a/c was turning back into the Sandtoft ATZ. Sandtoft A/G was contacted by telephone and asked to instruct a/c in the cct to fly tighter patterns. It was impractical to attempt to ascertain the identity of the infringing a/c at that time due to workload.

201501697	08/02/2015	EGTT : London (FIR)	EGTR : Elstree	10-17nm E	A	TMA	PIPER	Reciprocating	1	Infringement of the LTMA (Class A) by a PA28. Standard separation maintained.	Class A Airspace infringement by VFR flight. PA28 departed at 15:33 with 2 pob heading east and then for a general flight around the south east. Approximately 10miles east of departure airfield when attempting to switch to Farnborough Radar I encountered issues with switching radio frequencies. I continued to try and attempt to change stations as I was aware that I was not being covered by Radar and almost out of range of departure airfield, who were aware that I was having radio issues throughout. As I reached 17miles east of departure airfield I decided to turn the aircraft around and return to airfield to investigate the radio issue. Throughout the incident I was aware that I should be flying the aircraft and I thought I was doing so, however due to the distraction and the admittedly the "stress" level, I did not stay focused on my altitude as often I should have and am now aware that I exceeded maximum permitted altitude and entered Class A airspace for a number of minutes. For information I was using QNH 1037 given to me by departure airfield and at the point when I noticed that I was flying high, my aircraft showed 2500ft and I immediately descended back to 2300(planned altitude). Upon return to airfield I was made aware that there had been a reported airspace infringement by an aircraft at 2900ft. I am not aware that my aircraft recorded 2900ft at any point. I was using a secondary navigation aid. however this only recorded my altitude at 2628ft at the highest I assume the navigation equipment uses 1013hpa as a standard measure. Upon investigation, it turned out that the radio was incorrectly labelled and the active radio was on the GPS unit which I was unfamiliar with. As I was made aware of the infringement I attempted to contact the ATSU to inform them of my
201501799	13/02/2015	EGTT : London (FIR)	EGNR : Hawarden		A	Other	CIRRUS	Reciprocating	1	Infringement of Airway N264 by an SR22 at 3400ft. Standard separation maintained.	Aircraft was identified on departure and reported on frequency after departing Rw22 requesting a Basic Service(BS). A BS was applied and the Hawarden QNH given to the pilot along with instructions that there was No Altitude Restriction but to Remain Outside Controlled Airspace (ROCAS); the pilot correctly read this back. As the aircraft tracked to the South East, the Mode C climbed to indicate 031 and the pilot was asked to confirm his altitude on the Hawarden QNH of 993Hpa; the pilot replied 3400ft which was also confirmed by the Mode C which now indicated 033. The pilot was subsequently informed that the base of controlled airspace in the vicinity of Hawarden was Alt 3000ft to which he apologised and informed me that he was descending. METAR 131550 14011KT 9999 FEW012 BKN020 08/06 Q0993
201501834	08/02/2015	EGTT : London (FIR)	EGVN (BZZ): Brize norton	5.3nm NNE	D	CTR	CESSNA	Reciprocating	1	Infringement of the Brize Norton CTR (Class D) by an unknown aircraft squawking 4520. Aircraft identified as a C172.	CTR Infringement. I was the RA controller working RA, Zone and DIR frequencies. I had two AC on the Zone frequency. I noticed an AC Brize 032 5.3 miles squawking 4520 (Oxford conspicuity squawk) on the edge of the Brize CTR, it proceeded to enter so I called Oxford who informed me the AC was C172 and was meant to be on a procedure but had strayed from it. Oxford were procedural therefore not operating Radar. The Oxford controller called the pilot and told him to turn away from Brize which he did. After landing the pilot called and was rebriefed. He didn't realise he had strayed into CAS until it was too late. There was no traffic to effect so no perceived risk.☐ CAA Closure:☐ Pilot error. Situational awareness. Passed on-line test, warning letter sent.
201501947	17/02/2015	EGTT : London (FIR)	Thames RMA	Eastern Boundary	A	TMA	CESSNA	Reciprocating	1	Infringement of the LTMA (Class A) by an unknown aircraft squawking 4572, indicating 3000ft, resulting in loss of separation with an inbound EMB170. Aircraft identified as a C172. CAIT activated. Traffic info and avoiding action given.	Infringement of CAS leading to LOS. I was on duty as Thames/City Radar. I was watching a 4572 Southend squawk indicating 3A approach the Thames RMA. At 1535, just before this return reached the RMA boundary Southend rang and advised they were not working it. PCAIT activated and I issued avoiding action to EMB170 who was about to establish on the ILS for 27. Shortly afterwards the 4572 squawk descended, PCAIT deactivated and changed first to a 7000, then to the Biggin Hill conspicuity code 7047. ID was confirmed by mode S and the details of the flight were passed to me by Biggin Hill. EMB170 was turned towards the ILS and landed without further incident.☐ Supplementary 22/02/15: The route for the flight was Beccles, Clacton VOR, Abberton Reservoir, East of the QE Bridge, overhead Biggin and then through the Ockham corridor to Popham. I was flying the aircraft accompanied by a fellow Flying Group Member, who also has a PPL and several hundred hours of time. I was handling the aircraft, my companion was handling the radio, and we were both navigating. I was PIC. Before we left Beccles, we briefed the route and noted the need to descend below 2500' shortly after reaching Abberton Reservoir. We flew the first portion of the route at 3000'. When we reached Abberton Reservoir we became distracted and forgot to descend as we had briefed. At that time we were trying visually to identify the QE Bridge, as this was important for our horizontal navigation to keep outside the controlled airspace. The bridge was difficult to see as we were looking into a low sun. We were also trying to contact Farnborough North for a basic service. The Farnborough North frequency was very busy and, after making two calls and

201501947	17/02/2015	EGTT : London (FIR)	Thames RMA	Eastern Boundary	A	TMA	EMBRAER	Turbofan	2	Infringement of the LTMA (Class A) by an unknown aircraft squawking 4572, indicating 3000ft, resulting in loss of separation with an inbound EMB170. 201501951	17/02/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	Bearing 330 Range 5nm	D	CTR	CESSNA	Reciprocating	1	Infringement of the Stansted and Luton CTR (Class D) by a C150 squawking 7000 at 2000ft. Stansted departures suspended. Standard separation maintained.	A 7000 at 2000 feet entered the Stansted zone to the NNW tracking southwest. As soon it entered I stopped departures. GS called another controller back to split as there was a lot of traffic coming. It continued on a South-westerly track and I elected to let my 2 aircraft on final continue. I had a 3rd inbound on a heading which I vectored wide and told him the situation and he was delayed. I did a blind transmission and got no reply.GS had allowed east bound departures to go and I was happy but then the 7000 turned left and I stopped them before anything departed. The 7000 changed to a 5020 and LF LARS turned it away and descended it. I believe he was lost. It was a C150. At no point was separation lost against any traffic.☐ Supplementary:☐ An aircraft set of the AIW alarm infringing SS CTR NE of VRP Puckeridge. I tried to call the aircraft repeatedly using position fixes, track and level readouts. The aircraft finally responded once it changed direction and i gave a further track report. The aircraft C150 first asked for a position report, so was obviously lost. I directed him to the west and to descend out of CAS. I gave him a further position report and he went enroute to his destination with no further issues. I called their destination to see if it was a student on their own doing a NAV-X, but was informed it was a student and instructor. I received a call from Luton asking for the details, believing he had infringed their airspace also.☐ CAA Closure:☐ Pilot error. Situational awareness. Passed on-line test, warning letter sent.
201501952	17/02/2015	EGTT : London (FIR)	EGHI (SOU): Southampton	Bearing 332 Range 6.9nm	D	CTR	PIPER	Reciprocating	1	Infringement of the Southampton CTR (Class D) by a PA24 squawking 7000 at 1700ft. Standard separation maintained.	I observed a 7000 squawk to the north west of the Solent CTA (Solent CTA1) heading towards the CTA. The Mode C was indicating 1700ft and was not unusual in this position. The contact continued towards the CTA and entered the Solent CTA(1) at 1700ft. I made blind calls but there was no response. As I made blind calls the Mode C started to descend. The contact then I believe infringed the Southampton CTR in a left hand turn on to a westerly heading. The contact then faded from primary and secondary radar cover and was last seen descending towards its destination. At the time of the infringement I was coordinating a release with the Tower ATCO. I told the Tower ATCO that I would have to hold the departure due to the infringement and possibly break an arrival off the approach for runway 02. As the unknown contact made its left turn away from CAS and descended I called the tower and released the departure. Once the departure was airborne the unknown had faded from radar cover. I asked the VCR ATSA if they could call the landing site and see if they had anything landing with them. The person there advised the VCR ATSA that the aircraft was just landing with them.☐ Supplementary 23/04/15:☐ The aircraft entered the Solent CTA-1 without a clearance whilst descending and positioning overhead **** airfield, prior to landing.
201501952	17/02/2015	EGTT : London (FIR)	EGHI (SOU): Southampton	Bearing 332 Range 6.9nm	D	CTR	UNKNOWN	Unknown	2	Infringement of the Southampton CTR (Class D) by a PA24 squawking 7000 at 1700ft. 201502040	18/02/2015	EGTT : London (FIR)	EGBB (BHX): Birmingham	9.2nm E	D	CTA	ROBINSON	Reciprocating	1	Possible infringement of the Birmingham CTA 8 (Class D) by an unknown aircraft squawking 7000 at 2100ft. Aircraft identified as an R44. AIW activated.	Infringement of Birmingham CTA-8 by R44. I first noticed a 7000 squawk at 1800 as it approached Coventry from the south. I noted that mode S was present should it be required. After the contact had passed through the Coventry 23 approach it continued in a NNW direction beneath CTA-8. At 0844, 2 miles south of the Bedworth VRP the contact was seen to climb and peaked at 2100ft which in turn alerted our AIW system. A Check North was applied to prevent any potential departures getting airborne towards the infringer. Several blind transmissions were made which went unanswered and a call made to Coventry to ascertain whether they had spoken to the aircraft. They hadn't. The aircraft was seen to descend again so northbound departures from runway 15 were allowed to recommence. A few minutes later when the contact was nearing Tamworth I received a call from East Midlands asking if I could see a contact to the East of me. R44 had been in receipt of a Basic Service from East Midlands but the controller had been unaware of their exact location until that point. I informed the controller that the aircraft had infringed Birmingham CAS and asked if she could pass on our Watch Managers phone number for the pilot to call in once landed.
201502060	19/02/2015	EGTT : London (FIR)	LTMA		A	TMA	CESSNA	Reciprocating	1	Infringement of the LTMA (Class A) by a C172 at 4000ft with possible radio/electrical issues. C172 diverted. Once on ground pilot explained they had experienced airframe icing and had lost airspace indicator when in CAS. Standard separation maintained.	C172 Controlled Airspace infringement. Received a call from Thames radar detailing C172 not complying with instructions (possible radio/electrical issues) inside LTMA at A040 abeam Stansted routing North-bound. Aircraft supposed to be routing SE via DVR. Aircraft decided to divert as could not comply with instructions. Radar provided vectors to RWY 24 and A/C landed safely at 1716Z. Though it was not official night, upon being visual with the A/C at 1.5nm from the TDZ, it was identified that the A/C did not have any lights on. Once on the ground and manoeuvring on the TWY the navigation and anti-collision beacon started working. When queried if he had any electrical issues the pilot explained that he experienced airframe icing and had lost his airspace indicator when in controlled airspace. METAR 191650Z 20014KT 9999 -RA SCT016 BKN036 07/04 Q1017=. ☐ Supplementary 24/02/15: I was working as the North East/ Lorel controller. At 16.35 the C172 called onto the frequency co-ordinated into my sector at FL90. I asked him to confirm he was maintaining FL90 as the radar mode C for his aircraft read FL86. He stated that he could not maintain FL90 and needed descent. I instructed him to descend to FL80 and to maintain FL80 on reaching. After a couple of minutes the C172 called on to say that he could not maintain FL80 and needed further descent. He was instructed to descend to FL70. He also said that he wanted to drop outside controlled airspace. I told him at he needed to maintain FL70 and I would try and help him leave controlled airspace when it was suitable. The sector was fairly busy and the aircraft was just south of BKY, the pilot said he was heading 150 degrees but made several turns away from that heading without informing me.
201502095	20/02/2015	EGTT : London (FIR)	DENBY	Bearing 080 Range 7nm	A	TMA	AVIONS ROBIN	Reciprocating	1	Infringement of the Manchester TMA (Class A) by a squawking 7000 climbing to 3700ft. Standard separation maintained.	At 1700 I sat in the North Planner position. At 1702 I observed a 7000 squawk approximately 7nm West of DENBY indicating A3.6. The base of CAS in this area is A3.5. I pointed this out to my Tactical as we had an aircraft in the vicinity inbound to EGGP. I then observed the 7000 squawk climbing to A3.7. I spoke to EGCC APC as this was just to the East of their RMA and there was an aircraft about to be turned onto a Right Base about 10nm from the infringer. EGCC APC had no information about the contact. I selected my Mode S information panel and observed that the aircraft identity. I contacted EGNM APC to see if they knew who the aircraft was. EGNM knew about the aircraft but he was meant to be remaining beneath CAS and was going to be routeing POL-EGNH. My Tac and I had a discussion about the separation against unknown traffic in CAS, 5nm or 5000ft provided the returns are not allowed to merge. Once to the North of the RMA the aircraft turned towards EGNH and selected the squawk to advise they were monitoring the EGCC APC frequency. Shortly after this the aircraft selected a squawk to show they were working EGCC APC.

201502095	20/02/2015	EGTT : London (FIR)	DENBY	Bearing 080 Range 7nm	A	TMA	UNKNOWN	Unknown		Infringement of the Manchester TMA (Class A) by a squawking 7000 climbing to 3700ft. Standard separation maintained.	At 1700 I sat in the North Planner position. At 1702 I observed a 7000 squawk approximately 7nm West of DENBY indicating A3.6. The base of CAS in this area is A3.5. 201502122	21/02/2015	EGTT : London (FIR)	EME	N	D	CTR	AERONCA	Reciprocating	1	Infringement of the East Midlands CTR (Class D) by an Aeronica, which was not transponder equipped. Pilot declared they did not understand the instruction to leave CAS and that their radio was not good. Standard separation maintained.	Infringement of controlled airspace. Aeronca entered controlled airspace without clearance. Aircraft was a Aeronica and was not transponder equipped. It crossed through controlled airspace from North of EME until after initial contact being instructed to leave controlled airspace which it did by turning east. Throughout the infringement the pilot declared that he did not understand the instruction to leave controlled airspace, then that his radio was not particularly good and at one point on being again informed that he was inside controlled airspace without a clearance, transmitted several seconds of static. No inbound aircraft were affected by the infringement.☐ Appropriate CAA action is to be taken as a result of this incident.

201502128	21/02/2015	EGTT : London (FIR)	EGNF : NETHERTHOR PE	ESE	D	CTA	PIPER	Reciprocating	1	Infringement of the Doncaster CTA (Class D) by PA28 at 2500ft.	Zone infringer Doncaster CAS. PA28 requested a basic service inbound to destination. The aircraft was observed approaching CAS from the west at 2500, but was observed turning south over Netherthorpe to avoid the CAS. The Aircraft then turned eastbound towards the over head of intended destination. The Pilot reported changing to destination. I asked him to confirm his altitude. He was at 2500ft QNH. The Pilot contacted me after landing and was aware of his error.
201502131	21/02/2015	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD		D	CTA	CESSNA	Reciprocating	1	Infringement of the Doncaster CTA (Class D) by a C150 at 4000ft. Pilot was allegedly disorientated, lost and in general need of assistance. Standard separation maintained.	C150 zone infringer. C150 climbing to A4 VFR. Aircraft asks for a bearing, at which point I realise that he is 6 nm southwest of Doncaster, possibly inside CAS (he could have been underneath). I obtain an IDENT and get a level report, and the pilot is at A4 inside CAS. After the ident I gave a clearance to transit and carefully monitored the aircraft, continually monitoring its position. I asked if the pilot was happy with his position several minutes later, as he was approaching Doncaster, to which he replied that he was near Sheffield (which he was not). The pilot was clearly disorientated, lost, and in general need of assistance. Following some guidance on position he made his way safely back to intended destination. No other aircraft affected.☐ CAA Closure:☐ Situational awareness. Pilot error, poor visibility, lost. Failed on-line test, retraining letter sent.
201502132	21/02/2015	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD		D	CTR	PIPER	Reciprocating	1	Infringement of the Doncaster CTR (Class D) by a PA28 at 2000ft. Standard separation maintained.	PA28 zone infringer. PA28 departs tracking south westerly and calls on frequency requesting to cross CAS direct to destination. Before I could issue the clearance the aircraft was already inside CAS. I issued the clearance and informed the pilot what had happened. No other aircraft affected. 02 270/10 9999 Nil SCT/4000.
201502220	20/02/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted		D	CTA	CESSNA	Reciprocating	1	Infringement of the Stansted CTA (Class D) by an unknown aircraft squawking 7000, indicating 2600ft. Aircraft identified as a C152, flown by a solo student pilot.	Infringement of Stansted CTA. Operating INT/FIN boxed. At time 0947 I observed a 7000 squawk without mode C routing towards SL. The squawk disappeared as the a/c entered Stansted TMZ 1. Almost instantly Wattisham ATC rang ESSEX to say they had a student pilot that they believed had entered Stansted CAS. The controller asked if squawk 4510 had come up. It did. And was indicating 2600. At the time I had no inbounds to Stansted so when they asked did I want to speak to the a/c I declined and just asked them to get it outside CAS, which they did. I called them back a little while later to ask if everything was okay, and to get the flight details. C152 piloted by a student, who had opted to go straight back to departure airfield.
201502254	21/02/2015	EGTT : London (FIR)	EGXU (HRT): Linton-On-Ouse	0.5nm E	G	ATZ	AEROSPATIALE	Turboshaft	1	Infringement of the Linton-On-Ouse ATZ (Class G) by an unknown aircraft squawking 7000, at approx 1000ft. Aircraft identified as an AS350.	ATZ Infringement. A 7000 (no mode C displayed) was seen to be passing N-S at half a mile East of the overhead at an unknown height. The controllers in the ACR heard the ac passing nearby and the ADC was tasked to ascertain its approximate height. It was judged to be at about normal Linton visual cct height (1000ft QFE). It is believed that no attempt was made to contact this unit for permission to enter the ATZ, there were 2 other ac using the Zone frequency (118x550) and it was serviceable. The ac was tracked as it flew South through the Sherburn in Elmet ATZ. Sherburn radio were contacted by me to ascertain the ac callsign, and he had contacted Sherburn Radio, for permission to transit 'below their zone'. They could not remember the ac callsign. When the ac was 3 NM NW of GOLES the 7000 (no mode C) transponder code changed to 6162 (with mode C), this was at 1546. Doncaster Radar was contacted to ascertain the ac details. The callsign was for an A3650 registration.

201502441	27/02/2015	EGTT : London (FIR)	EGLC (LCY): London city	5nm N	A	TMA	PIPER	Reciprocating	1	Potential infringement of the LTMA (Class A) by an unknown aircraft squawking 7000 at 2500ft. Aircraft identified as a PA28. Inbound EMB190 received/complied with TCAS RA to monitor V/S. Traffic info given.	Working as TC NE Deps, EMB190 got airborne on a BPK. Just after it checked in I noticed a 7000 on his right hand side who had been up to 2500, so I gave traffic to the flyer. I was unable to climb it at that time due to other airways traffic. When I was able to climb the aircraft he reported that he had responded to a TCAS RA. I think the infringing aircraft was showing a callsign of PA28. It then dropped back outside controlled airspace before climbing back in the vicinity of Northolt.☐ Supplementary 03/03/15:☐ TCAS RA. Flying outbound on the BPK5T departure talking to Thames radar on 118.825. Radar control informed the crew that there was an aircraft going to be passing 500ft below. The crew had this aircraft in sight and on TCAS. ATC then told us to climb to 4000ft. Shortly after starting the climb we had a TCAS RA with monitor vertical speed. ATC were informed of a TCAS RA and shortly after we were clear of conflict. TCAS RA followed to SOP's.☐ Supplementary 11/03/2015:☐ It is not possible to say with absolute certainty that the PA28 entered CAS. However, aircraft with mode C indicating an unauthorised penetration into CAS should be avoided if deemed to be in an unsafe proximity to other aircraft. At no time did CAIT activate, a high level STCA was activated.
201502441	27/02/2015	EGTT : London (FIR)	EGLC (LCY): London city	5nm N	A	TMA	EMBRAER	Turbofan	2	Potential infringement of the LTMA (Class A) by an unknown aircraft squawking 7000 at 2500ft. At no time did CAIT activate, a high level STCA was activated.
201502445	27/02/2015	EGTT : London (FIR)	R313		G	Restrict ed area	THRUSTER	Reciprocating	1	Infringement of active restricted Area EG R313 (Scampton) by an unknown aircraft showing as a primary contact only. Aircraft was identified as a T600, flown by a solo student pilot who was lost. Red Arrows display training was halted. Traffic info given.	T600 infringed R313 during Red Arrows display. I was the TC(App) controller having just taken the task, on frequency I had only 1 speaking unit which was the Red Arrows. R313 was hot and the Red Arrows were display training. When I first took control I was working without Primary radar (PSR) which had been declared U/S the Red Arrows had been advised that they would only receive Traffic Information on aircraft with Transponders which they acknowledged. At around 1210 I was informed that the PSR was F/S so I switched it back on. Very shortly after the Red Arrows asked me if I could see a contact overhead their position which was SE of Scampton just inside R313, initially I said no but shortly after I could see a primary contact, tracking North within the confines of R313. I passed them Traffic Information and they asked for regular updates which I provided, the aircraft spent at least 11 minutes inside R313 before finally vacating to the North. During this time display practice had to be stopped and I was asked by the formation leader to track the aircraft and obtain details. I tracked the aircraft and as the contact faded from radar we asked Humberside and D&D for help and eventually tracked the aircraft to a site and managed to obtain the registration which was a T600. The aircraft was piloted by a student and we were contacted by his instructor who we briefed on the incident he stated that the student was supposed to land at a specific Aerodrome but had become lost and returned to base. He also stated when asked why he was not speaking to any ATC unit that his student had turned his radio down by accident and that this was something he had done before. I asses this to be quite a serious incident especially as we believe the aircraft may have been in
201502485	01/03/2015	EGTT : London (FIR)	EGLC (LCY): London city	9nm E	A	TMA	CIRRUS	Reciprocating	1	Possible infringement of the LTMA (Class A) by a SR20 at 2700ft. Standard separation maintained.	C560 Infringement of TMA. C560 was 1st noted when south-east of London city as his level was 2400/2500ft as he tracked northbound under final approach for London City. Although this was outside controlled airspace I decided it was best to give a less expeditious early turn to a C560 (at 3000ft) so that the returns would pass well clear of each other, with my aircraft routing behind the unknown. I also requested early climb from TMA North in order to climb to 6000ft (instead of 4000ft usually) in order to further deconflict the traffic. After the departure had made the turn C560 then indicated 2700ft (base 2500ft) before descending again, and climbing back to 2700ft sometime later. I believe 5mile separation was just maintained.
201502485	01/03/2015	EGTT : London (FIR)	EGLC (LCY): London city	9nm E	A	TMA	CESSNA	Turbofan	2	Possible infringement of the LTMA (Class A) by a SR20 at 2700ft. Standard separation maintained.	C560 Infringement of TMA. C560 was 1st noted when south-east of London city as his level was 2400/2500ft as he tracked northbound under final approach for London City. 201502534	02/03/2015	EGTT : London (FIR)	EGLD : Denham	W	D	CTR	ROBINSON	Reciprocating	1	Infringement of the London CTR (Class D) by an unknown aircraft squawking 7000, indicating u/t immediately informed TC NE Coord of the infringing ac. My u/t then telephoned Air South, informing him of the infringer and instructing him to sup send Northbound deps. One ac departing on a Woburn SID was taken off the SID by the Tower Controller. At this point, the pilot of R44 called for a zone transit initially stating that he was south of Beaconsfield. R44 was identified and verified and departures were recommenced. The pilot of R44 then stated that he believed himself to be 5nm NE of Cookham. A transit clearance was issued and the flight continued without further incident.☐ CAA Closure:☐ Pilot error. Situational awareness. Passed on-line test. Warning letter sent.	Infringement of London CTR by R44. Whilst mentoring a u/t on SVFR, I noticed an infringing aircraft enter the London CTR West of Denham on a SW track with a mode C of 1400ft. My u/t immediately informed TC NE Coord of the infringing ac. My u/t then telephoned Air South, informing him of the infringer and instructing him to sup send Northbound deps. One ac departing on a Woburn SID was taken off the SID by the Tower Controller. At this point, the pilot of R44 called for a zone transit initially stating that he was south of Beaconsfield. R44 was identified and verified and departures were recommenced. The pilot of R44 then stated that he believed himself to be 5nm NE of Cookham. A transit clearance was issued and the flight continued without further incident.☐ CAA Closure:☐ Pilot error. Situational awareness. Passed on-line test. Warning letter sent.
201502720	04/03/2015	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD	Vicinity of Gamston	D	CTA	CESSNA	Reciprocating	1	Infringement of the East Midlands CTA (Class D) by a C152 squawking 7000 at 3800ft.	7000SQ observed infringing CAS in the vicinity of Gamston at A38. Aircraft finally traced through East Midlands. No other aircraft affected.☐ Supplementary 06/03/15:☐ Tried to blind call aircraft and use Mode S. Finally identified who the aircraft was via East Midlands. Spoke to pilot who said that they were unfamiliar with the area and caught out by the wind.
201502760	06/03/2015	EGTT : London (FIR)	NANTI	East	A	TMA	HUGHES	Reciprocating	1	Infringement of the Manchester TMA (Class A) by a Hughes 369 squawking 7000 indicating 700. CAIT activated. Standard separation maintained.	Working as IOM/WAL Planner at 1308 I noticed an aircraft had activated CAIT alert. Aircraft was on a 7000 squawk indicating 700feet to the East of Nanti. The aircraft was tracking North approximately one and a half miles east of the Low Level corridor. I contacted Manchester approach who were unaware of the traffic. We had 2 WAL departures pending and as the aircraft continued to track north I contacted Manchester tower. They informed me that a B 737 was ready to go therefore I asked for it to depart on a runway heading. The aircraft continued north until de-activating CAIT when it entered the Low Level corridor abeam Liverpool.☐ Supplementary 09/03/15:☐ My attention was alerted by the AIW alarm activating just east of Northwich on a 7000 squawk. WAL P then rang asking if I knew anything about the traffic. I managed to raise the pilot who replied that his GPS was u/s and apologised. The track of the a/c had taken it into the zone by about half a mile, eventually re-entering the low level route at Stretton. I asked the pilot to phone the WM when he landed. There were no separation issues.☐ Supplementary 11/03/2015: When I took off I was following my GPS planned route, The GPS malfunctioned, I was switching across to my map, when I took the north heading I was 1mile further east than I thought, which marginally infringed on Manchester Airspace.
201502760	06/03/2015	EGTT : London (FIR)	NANTI	East	A	TMA	BOEING	Turbofan	2	Infringement of the Manchester TMA (Class A) by a Hughes 369 squawking 7000 indicating 700. CAIT activated. 201502970	10/03/2015	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	13SE	D	CTA	CESSNA	Reciprocating	1	Infringement of East Midlands CTA-3 by a C177 at 3000ft. Avoiding action issued to a B737. Loss of separation.	B737 was being descended and vectored for R/W27; when a 7000 squawk was observed tracking NNE from Leicester indicating 3000ft. B737 was descended initially to 4500ft (in anticipation of the 7000 squawk establishing 2-way). The projected track indicated the 7000 squawk would infringe CAS; several calls were made on 134.175 without response, so a turn was given to the B737 avoid that contact. The 7000 squawk entered CAS, CTA-3 base level 2500ft on East Midlands QNH, without a clearance and tracked NNE before turning north along the eastern edge of CTA-2, base level 1500ft. The squawk changed to a 3601 squawk, and I received a call from Waddington ATC as the aircraft had called them. The a/c was identified. B737 was vectored for a shorter final than normal and landed safely. CAA Closure: Pilot error. Situational awareness. Passed on-line test, warning letter sent.

201502970	10/03/2015	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	13SE	D	CTA	BOEING	Turbofan	2	Infringement of East Midlands CTA-3 by a C177 at 3000ft. Avoiding action issued to a B737. Loss of separation.	B737 was being descended and vectored for R/W27; when a 7000 squawk was observed tracking NNE from Leicester indicating 3000ft. B737 was descended initially to 4500ft (in anticipation of the 7000 squawk establishing 2-way). The projected track indicated the 7000 squawk would infringe CAS; several calls were made on 134.175 without response, so a turn was given to the B737 avoid that contact. The 7000 squawk entered CAS, CTA-3 base level 2500ft on East Midlands QNH, without a clearance and tracked NNE before turning north along the eastern edge of CTA-2, base level 1500ft. The squawk changed to a 3601 squawk, and I received a call from Waddington ATC as the aircraft had called them. The a/c was identified. B737 was vectored for a shorter final than normal and landed safely.☐ CAA Closure:☐ Pilot error. Situational awareness. Passed on-line test, warning letter sent.
201502975	10/03/2015	EGTT : London (FIR)	EGHI (SOU): Southampton	12nm N	D	CTA	OTHER	Turboshaft	1	Infringement of Solent CTA Class D Airspace.	A contact was observed tracking westbound. Initially it was indicating 2.3A then started climbing to 2.7A. This made it inside the Solent CTA 5. It was squawking 7000. Blind calls were made with no response. When it left CAS, it was observed at 2.9A. Boscombe Down were called and they eventually worked it.☐ Supplementary 24/03/2015:☐ The helicopter pilot was aware of his geographical position and entered the Solent CTA-5 without a clearance by operating on the Portland Regional Pressure setting rather than the Southampton QNH.
201502993	10/03/2015	EGTT : London (FIR)	BARTN	Bearing 270 Range 5nm	D	CTR	CESSNA	Reciprocating	1	Infringement of the Manchester CTR (Class D) by a C150 squawking 7000. CAIT activated.	Working as Wal/IOM Planner, observed CAIT alert above the Manchester low level corridor approx. 5mls west of BARTN, callsign indication a C150. I informed Tactical controller who had also observed it. The aircraft went up to A1.5 (possibly A1.6). No avoiding action required for any aircraft on frequency. Was subject to a CAIT alert for about 3mins before descending below. Aircraft changed from 7000 to 3643 (Warton Radar).
201503202	14/03/2015	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD	5nm NE	D	CTR	PIPER	Reciprocating	1	Infringement of the Doncaster Sheffield CTR (Class D) by an unknown aircraft squawking 7000 at 1300ft. Aircraft identified as a PA28. Standard separation maintained.	Zone infringement. 7000 squawk observed leaving departure airfield ATZ into the Doncaster Sheffield CTR. The aircraft turned northbound about 1/2 nm east of a 5 mile final RWY20. After leaving the CTR, PA28 called on frequency and was identified as the infringing aircraft. No Doncaster Sheffield traffic was affected. Departure airfield were contacted and requested they ask the pilot to call Doncaster Sheffield radar after landing.
201503204	14/03/2015	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD	Eastern portion	D	CTR	MAINAIR	Reciprocating	1	Infringement of the Doncaster Sheffield CTR (Class D) by an unknown aircraft squawking 7000. Aircraft believed to be a Mainair Blade microlight. Standard separation maintained.	Zone infringement Doncaster Sheffield. 7000 squawk observed entering Doncaster Sheffield CTR from the south east. The contact gets to 1nm from Doncaster Sheffield ATZ boundary and the transponder appears to be switched off. At the ATZ boundary the contact turns to the east, leaves the zone and tracks northbound towards the Elvington area. ADC report the infringing aircraft is a high wing aircraft. Aircraft was observed by another aircraft in the vicinity who believed the registration to be a Mainair Blade microlight.

201503215	14/03/2015	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	8nm	D	CTR	FLY BUY ULTRALIGHTS	Reciprocating	1	Infringement of the Manchester CTR (Class D) by an Ikarus C42, squawking 7366. Standard separation maintained.	Infringement. At 1359 during the hand over I noticed a 7366 squawk 2 to 3 miles inside CAS on about an 8 mile final 05L. No aircraft were in the immediate vicinity. I called and it identified itself as an Ikarus C42. He asked what to do. I told him to 180 and leave into the LLR. The aircraft downwind was continued toward Chester.☐ Supplementary 17/03/2015: ☐ The main cause I believe was due to selecting the next radio frequency I would change to consequently taking my eyes of the compass and the visual reference ahead. When I looked back through the canopy I became unsure of my precise location and began to fear I was being blown into Liverpool air space, seeing a larger town I mistook for Winsford, (on the chart there is a railway line passing to the east of Winsford in the direction of my ongoing journey), I took the heading to this town which also has a railway line to the east, unfortunately I now believe it was Middlewich, thereby infringing Manchester CTR. As a novice pilot I have been told to listen only to Manchester radar, not talk. however I believe we should be told if in the low level area and become disorientated they should be the first contact we make thus preventing any infringements and any problems this creates. I am aware there is a lost procedure but did not believe flying round in circles was appropriate in the low level area and the obvious, buy and use of a GPS I also intend to take further training in navigation techniques.☐ CAA Closure:☐ Pilot was asked to complete the online infringement form. Pilot became distracted when
201503215	14/03/2015	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	8nm	D	CTR	UNKNOWN	Unknown		Infringement of the Manchester CTR (Class D) by an Ikarus C42, squawking 7366. Standard separation maintained.	Infringement. At 1359 during the hand over I noticed a 7366 squawk 2 to 3 miles inside CAS on about an 8 mile final 05L. No aircraft were in the immediate vicinity. I called and it identified itself as an Ikarus C42. He asked what to do. I told him to 180 and leave into the LLR. The aircraft downwind was continued toward Chester.☐ Supplementary 17/03/2015: ☐ The main cause I believe was due to selecting the next radio frequency I would change to consequently taking my eyes of the compass and the visual reference ahead. I am aware there is a lost procedure but did not believe flying round in circles was appropriate in the low level area and the obvious, buy and use of a GPS I also intend to take further training in navigation techniques.☐ CAA Closure:☐ Pilot was asked to complete the online infringement form. Pilot became distracted when
201503216	15/03/2015	EGTT : London (FIR)	Not specified		D	CTR	PIPER	Reciprocating	1	Infringement of the Manchester CTR (Class D) by an unknown aircraft squawking 7000 at 1900ft. Aircraft identified as a PA28.	Zone infringement. Aircraft squawking 7000 entered CTR LLR from north indicating 1900ft. Identified by Mode S. Barton were working the aircraft and instructed to descend and to contact Manchester WM. No other traffic in vicinity to affect. ☐ Supplementary 17/03/15:☐ Was returning back to airfield via Leigh Flash. Flew at altitude of 1800ft as is normal for entering the circuit overhead. Short lack of awareness led to entering the low level route which has a maximum altitude of 1300ft. Have ensured to study the charts I own to understand exactly how I got into this situation. Will also look to get a recap about the surrounding area's control zones from flying instructors
201503231	15/03/2015	EGTT : London (FIR)	EGGP (LPL): Liverpool	8nm SSW	D	CTR	PIPER	Reciprocating	1	Infringement of the Liverpool CTR (Class D) by an unknown aircraft squawking 7000 at 1500ft. Aircraft identified as a PA28. Standard separation maintained.	PA28 enters Liverpool CTR without clearance. PA28 call up to request a basic service outside of CAS - the pilot was asked if he required a zone transit, he replied that he would remain outside cas. Pilot reports being 3.5 miles from an airfield, to which he had just departed. A/c was given a basic service as requested. 7000 squawk observed entering CAS SSE NESTON, once the a/c squawk changed it became apparent that the a/c was PA28 and the pilot was advised that he was already 3 miles within Liverpool controlled airspace. As he was already inside CAS, a clearance was given through CAS direct to intended destination.
201503477	18/03/2015	EGTT : London (FIR)	EGVN (BZZ): Brize norton		D	CTR	CESSNA	Reciprocating	1	Infringement of Brize Norton CTR (Class D) at 3000ft.	At 1804Z an ac return was observed on radar to enter the CTR. The controller contacted London FIS and confirmed that they were working the ac but were not aware of the pilot's intentions. The pilot reported unable to contact Brize LARS. This would have been because there was an automatic transmission on the frequency being tried advising pilots that the LARS service was closed and that ac wishing to transit the CTR should contact the Brize Zone frequency. The ac crossed the departure lane; fortunately there were no departures at the time.☐ Supplementary 23/03/15:☐ At 1753 a/c checked on frequency from EGBJ - EGSL 4nm E Cheltenham. After providing initial flight details the pilot asked who could provide him with a radar service, I advised EGVN and confirmed the frequency 124.275. The pilot replied he had already tried EGVN and that they were closed. I requested the A/C squawk 1177c and confirmed basic service. The routing was then given as EGTR then EGSG. The pilot did not discuss a zone transit or intention to transit EGVN. I handed over position at 1800. At approximately 1806 EGVN controller called the FIS saying they were filling on the A/C who was just leaving the Zone having infringed. The A/C was then transferred to EGUB at 1808. Our radar data analysis showed a/c appeared to enter the EGVN CTR at 17:59:57 displaying an FIS squawk of 1177, indicating altitude 3000ft and exited EGVN CTR at 18:05:28.

201503484	20/03/2015	EGTT : London (FIR)	EGBP : KEMBLE		G	ATZ	PIPER	Reciprocating	1	UK AIRPROX 2015/032 - PA28 and a Thruster T600 at Kemble in Class G airspace. PA28 pilot had been lost and infringed Kemble ATZ.	This AIRPROX has been subject to a separate review by the United Kingdom AIRPROX Board (UKAB). AIRPROX Board (UKAB) information indicates that this AIRPROX was caused by the PA28 pilot entering the Kemble ATZ and flying into conflict with the Thruster T600. Contributory Factor: The PA28 pilot was lost.
201503484	20/03/2015	EGTT : London (FIR)	EGBP : KEMBLE		G	ATZ	THRUSTER	Reciprocating	1	UK AIRPROX 2015/032 - PA28 and a Thruster T600 at Kemble in Class G airspace. PA28 pilot had been lost and infringed Kemble ATZ.	This AIRPROX has been subject to a separate review by the United Kingdom AIRPROX Board (UKAB). AIRPROX Board (UKAB) information indicates that this AIRPROX was caused by the PA28 pilot entering the Kemble ATZ and flying into conflict with the Thruster T600. Contributory Factor: The PA28 pilot was lost.
201503493	21/03/2015	EGTT : London (FIR)	EGHI (SOU): Southampton	8nm SE	D	CTR	GRUMMAN	Reciprocating	1	Infringement of the Solent CTR (Class D) at 1300ft.	At c.1112 the controller observed an aircraft approaching Calshot VRP from the southwest indicating 1300A. The Controller attempted to make a number of blind calls to the aircraft without any success. At c.1113 the aircraft entered the CTR at 1300A heading north, before leaving CAS to the east. ☐ Supplementary 23/04/15:☐ The pilot was fully aware of his geographical position and altitude at all times as he positioned into Lee-on-Solent. However, the pilot entered the Southampton CTR by approximately 300 metres, whilst trying to visually acquire traffic apparently reported in the visual circuit ahead on runway 05 at Lee-on-Solent.
201503498	20/03/2015	EGTT : London (FIR)	Motram Hall Hotel		D	CTR	AEROSPATIALE	Turboshaft	1	Infringement of the Manchester CTR (Class D) by an SA341. Pilot had not thought it necessary to prenote the flight to ATC and had also blocked the ATC frequency on two occasions during the incident.	Unauthorised flight inside CAS. At a 1503hrs I was operating as the approach south controller. Traffic was light. The frequency became blocked on two occasions by what sounded like a helicopter. A short time later SA341 contacted me to inform me it was him who had blocked the frequency and was airborne for a local flight. I had no details of this flight and was advised by the pilot it had not been pre noted to us as he didn't think it was not necessary. I instructed him to land back at departure location and contact the watch manager. I recall a LISTO 2S departure getting airborne during this conversation and passing a primary return in the vicinity. Owing to the short time scale of the events I did not have time to speak to the tower and stop departures.
201503501	21/03/2015	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	15nm NW	D	CTR	PIPER	Reciprocating	1	Infringement of the Manchester CTR (Class D) by an unknown aircraft squawking 7000, indicating 2000ft. Aircraft believed to be a PA28. AIW activated. Standard separation maintained.	CAS infringement. A 7000 squawk entered the north end of the Low Level Route with mode C indicating 2000ft. The AIW was activated. I checked the mode S aircraft ID and called PA28. There was no reply but the SSR data disappeared leaving only a primary return. The aircraft then turned 180degrees and left the Low Level Route to the north. The primary return then disappeared from radar, but a few minutes later a primary return appeared on base leg for Barton. No other primary only returns were in the area at the time.☐ CAA Closure:☐ Unserviceable transponder reported by PIC. Passed on-line test, spoken to by Staff FE, warning letter sent.

201503515	22/03/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	12nm SW	D	CTA	PIPER	Reciprocating	1	Infringement of the Stansted CTA (Class D) and CTR (Class D) by an unknown aircraft at 2200ft, resulting in loss of separation with inbound traffic. Aircraft identified as a PA28 flown by a student pilot. Traffic info and avoiding action given.	Infringement in CTA and CTR. An unknown a/c squawking 5022 was observed tracking eastbound at 2.2A towards the Stansted CTA. I called Farnborough LARS to clarify if it was expected to turn and they advised that they had given an avoiding turn and to descend below the Stansted CTA. Despite this action, the unknown a/c entered the Stansted CTA and I gave traffic information to B737(1) who was downwind and an avoiding turn. The unknown a/c then left the CTA. A few minutes later the unknown a/c entered the Stansted CTR and I gave avoiding action and traffic info to B737(2) who was downwind. Farnborough LARS were called again and they advised that it was a student pilot and that they were leaving the Stansted CTR. They then called again and gave the a/c details as a PA28. Appropriate CAA action being taken as a result of this incident.
201503515	22/03/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	12nm SW	D	CTA	BOEING	Turbofan	2	Infringement of the Stansted CTA (Class D) and CTR (Class D) by an unknown aircraft at 2200ft, resulting in loss of separation with inbound traffic. 201503516	22/03/2015	EGTT : London (FIR)	EGKR (KRH): Redhill	4nm W	D	CTR	CESSNA	Reciprocating	1	Infringement of the Gatwick CTR (Class D) by an unknown aircraft squawking 7000. Aircraft identified as a C152. Investigation ascertained that a loss of separation occurred.	Infringement of Gatwick CAS. At 11.17 an aircraft entered the Gatwick CTA initially at 2.0A 4 miles west of Redhill on a southerly track. There was an aircraft on short final working the tower and B747 was on the Tower frequency established on the ILS at 6 miles. Subsequent aircraft were established further out. I phoned Redhill to ascertain whether it was working them, when they confirmed it was on their frequency I instructed them to descend it immediately. I phoned the tower and said the B747 may have to be broken off due to the infringer. They said they'd speak to the aircraft and see what it wanted to do. The infringing aircraft started to descend to 1.4A but continued on the southerly track and infringed the Gatwick CTR. I phoned Redhill again and instructed them to turn it away immediately, which it then did. The Tower phoned and said they were visual with the infringer, the B747 was going to continue and they were going to launch a departure. The infringer then orbited on the edge of the Redhill local flying area for a short time before commencing an approach to land. No other aircraft were affected. Redhill gave the details of the infringing aircraft.
201503516	22/03/2015	EGTT : London (FIR)	EGKR (KRH): Redhill	4nm W	D	CTR	BOEING	Turbofan	4	Infringement of the Gatwick CTR (Class D) by an unknown aircraft squawking 7000. 201503541	22/03/2015	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD		D	CTR	CESSNA	Reciprocating	1	Infringement of the Doncaster Sheffield CTR (Class D) by an unknown aircraft squawking 7000 at FL105. Aircraft identified as a C172. Traffic info given. Standard separation maintained.	Zone infringement RHADS CTR. Whilst controlling on RHADS APS, I noticed a 7000 squawk approximately 0.5nm north of Daneshill Lakes tracking westbound with no mode C. I made a blind broadcast to the ac to make itself known to me The ac did not reply, The RHADS controller called me and, noticing that I was extremely busy, asked if I would like him to contact Netherthorpe to try and trace the identity of the ac as it appeared to be making an approach, to the airfield, The ADI controller called me a few minutes later and said that Gamston believed the ac was C172, and had asked the pilot to call RHADS radar. Approximately ten minutes later, the captain of C172 called me to apologise and I said that the member of staff who dealt with zone infringements would be calling him in due course.
201503595	22/03/2015	EGTT : London (FIR)	London CTR	North West Corner	D	CTR	CESSNA	Reciprocating	1	Infringement of the London CTR (Class D) by a C152 squawking 7000 at 1800ft. Aircraft subsequently re-entered the CTR. Traffic info given.	I noticed an ac's data block turn pink, indicating that it was inside CAS without permission to be. I transmitted blind but received no response. The data block informed me the ac was a C152. After talking to TC SVFR, they had done the same with no response. The ac cut the NW corner of the NRMA, travelled SSW and vacated at Cookham. A few minutes later Heathrow Director called and said that he would hold a military aircraft at the Ockham stack as there was an infringer that he could not vector towards. I had no traffic on frequency and had not seen that the C152 had re-entered at Cookham and was routing NE. I rang Denham and the Tower controller informed me that the ac had called up and been advised to contact D&D on 121x5. The ac took up a northerly track, picked up a D&D squawk and vacated the NRMA. Military aircraft had suffered minimal delay and there was no traffic within the NRMA affected by the infringer but as Northolt was operating to rwy 07, had there been an ac being vectored for GCA at the time it would have been in confliction. I do not know if the ac was lost, suffering an emergency or just unfamiliar with procedure for operating within and around the LCTR, but he infringed twice in 10 minutes.☐ Supplementary 24/03/15:☐ I was on duty as the LL SVFR controller mentoring a trainee. At time 1439 a 7000 squawk was observed entering the north western side of the Heathrow CTR tracking south. Mode S gave the registration as a C152. My trainee made blind calls in an attempt to establish communication and also telephoned Northolt whose RMA was active. The Northolt controller stated that she had tried making blind transmissions to the aircraft as well. As Heathrow
201503595	22/03/2015	EGTT : London (FIR)	London CTR	North West Corner	D	CTR	OTHER	Unknown		Infringement of the London CTR (Class D) by a C152 squawking 7000 at 1800ft. 201503721	25/03/2015	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD	12nm SE			CESSNA	Reciprocating	1	Infringement of the Doncaster Sheffield CTA (Class D) by an unknown aircraft squawking 7000, indicating 3000ft. Aircraft identified as a C172. Standard separation maintained.	Zone infringement. A 7000 squawk was observed entering the Doncaster CTA SE of Netherthorpe by 5nms. It was on a Northerly heading indicating 3000ft. It entered by approximately 1nm before turning left and leaving to the South. Radar called and identified the aircraft as C172 who was previously working them and was inbound to their intended destination.☐ CAA Closure:☐ Pilot error. Situational awareness. Passed on-line test. Warning letter sent.
201503722	21/03/2015	EGTT : London (FIR)	EGGP (LPL): Liverpool	15nm W	D	CTA	PIPER	Reciprocating	1	Infringement of the Liverpool CTA (Class D) by a PA28 at 2500ft. Standard separation maintained.	Liverpool CTA infringement, PA28, 15nm West Liverpool Airport. PA28 called Liverpool Radar while apprx 15nm NW of Liverpool Airport, intending to route via Point of Ayre Southbound. Issued with the Liverpool conspicuity code (4360), given a basic service & Liverpool QNH. PA28 later identified as having infringes the Liverpool CTA (2400', base 2000').
201503766	25/03/2015	EGTT : London (FIR)	Not specified		D	CTR	DE HAVILLAND	Turbofan	1	Infringement of the Stansted CTR (Class D) by an unknown aircraft in climb squawking 7000, at 2000ft, resulting in loss of separation with an inbound aircraft. Aircraft indentified as a Vampire. CAIT activated.	Very brief infringement. On duty as Stansted INT bandboxed. At approx. 1613 fltnum 8267 was turned to establish on the ILS. Shortly afterwards a 7000 contact appeared heading NE quickly and climbing. At 1614 just as the fltnum 8267 was about to establish the 7000 entered the CTZ and triggered CAIT. The contact then stopped and I briefly thought it was a reflection. It then went back the other way descending, having reached 2000ft very briefly. Because it happened so quickly and the contact was so "agile" (and both a/c diverging quickly) I didn't consider any action such as breaking the fltnum 8267 off necessary or appropriate. North Weald were called and reported the a/c as being a Vampire. They said that they were expecting a call from us and stated that after departure the aircraft had performed a "wingover" at approx 2000ft. The aircraft radio was allegedly poor. The aircraft tracked away to the NW under the CTA and at approx 1619 changed from 7000 to 5030. At 1621 Farnborough LARS confirmed that the 5030 was the Vampire.
201503766	25/03/2015	EGTT : London (FIR)	Not specified		D	CTR	UNKNOWN	Turbofan		Infringement of the Stansted CTR (Class D) by an unknown aircraft in climb squawking 7000, at 2000ft, resulting in loss of separation with an inbound aircraft. Aircraft indentified as a Vampire. CAIT activated.	Very brief infringement. On duty as Stansted INT bandboxed. At approx. 1613 fltnum 8267 was turned to establish on the ILS. Shortly afterwards a 7000 contact appeared heading NE quickly and climbing. At 1614 just as the fltnum 8267 was about to establish the 7000 entered the CTZ and triggered CAIT. 201503801	27/03/2015	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTR	CESSNA	Reciprocating	1	Infringement of the Luton CTR (Class D) by an unknown aircraft squawking 7000, between 1600ft and 2400ft, resulting in an inbound A320 being broken off approach. Aircraft identified as a C152. Traffic info given. Standard separation maintained.	Alleged infringement of Luton CTR by C152. I was on duty as Luton radar controller. I observed a 7000 squawk heading towards the Northern Luton CTR boundary. At 1123 it entered CAS about 1.5nm East of Pirton tracking approximately 165. As it entered CAS the 7000 squawk activated CAIT and Mode S identified the a/c as C152. As a precaution, and to maintain 5nm separation from the unknown return, A320 was broken off the 26 ILS and vectored to the North. Another aircraft (who had been accepted DW R/H) was re-routed to LOREL resulting in extra track miles for this a/c as well. When about 1nm North of the Luton extended centre-line the unknown return turned right and tracked North, then North-East before leaving the Luton CTR at 1127. While in the CTR its mode C was reading between 1.6A and 2.4A. Multiple blind calls were made on 129.55MHz to C152 but no reply was received.☐ Supplementary 13/04/15:☐ As discussed, London ATC has submitted a safety report (MOR) concerning an infringement of the Luton CTR by a C152. As a consequence of this event, a Luton arrival was vectored away from C152 but no loss of separation was recorded. C152 was identified as the aircraft involved following positive identification by the activation of CAIT (controlled airspace infringement tool). I have inserted a radar picture that shows C152 within the CTR with Mode C indicating 2000ft (base CAS SFC).
201503801	27/03/2015	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTR	AIRBUS	Turbofan	2	Infringement of the Luton CTR (Class D) by an unknown aircraft squawking 7000, between 1600ft and 2400ft, resulting in an inbound A320 being broken off approach. Aircraft identified as a C152. Traffic info given. Standard separation maintained.	Alleged infringement of Luton CTR by C152. I was on duty as Luton radar controller. I observed a 7000 squawk heading towards the Northern Luton CTR boundary. At 1123 it entered CAS about 1.5nm East of Pirton tracking approximately 165. As it entered CAS the 7000 squawk activated CAIT and Mode S identified the a/c as C152. As a precaution, and to maintain 5nm separation from the unknown return, A320 was broken off the 26 ILS and vectored to the North. Another aircraft (who had been accepted DW R/H) was re-routed to LOREL resulting in extra track miles for this a/c as well. When about 1nm North of the Luton extended centre-line the unknown return turned right and tracked North, then North-East before leaving the Luton CTR at 1127. While in the CTR its mode C was reading between 1.6A and 2.4A. Multiple blind calls were made on 129.55MHz to C152 but no reply was received.☐ Supplementary 13/04/15:☐ As discussed, London ATC has submitted a safety report (MOR) concerning an infringement of the Luton CTR by a C152. As a consequence of this event, a Luton arrival was vectored away from C152 but no loss of separation was recorded. I have inserted a radar picture that shows C152 within the CTR with Mode C indicating 2000ft (base CAS SFC).
201503810	27/03/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	S	D	CTA	CIRRUS	Reciprocating	1	Infringement of the Stansted CTA (Class D) by an unknown aircraft squawking 7010, indicating 2100ft. Aircraft identified as an SR22.	Infringement of Stansted CTA. At time 1146 7010 squawk entered Stansted CTA from the south, south west en route. Mode C was 2.1. A/c was an SR22. I called SX ATC and asked them to get the a/c to descend.
201503811	27/03/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	S	D	CTA	OTHER	Reciprocating	1	Infringement of the Stansted CTA (Class D) by an unknown aircraft squawking 7010 at 1700ft. Aircraft identified as a gyroplane.	Infringement of Stansted CTA. At time 1206 7010 squawk again entered Stansted CTA from the same direction. It was 1700as it passed the line, descended to 15 and then climbed again to 1900 as it turned downwind to North Weald. A/c was a gyroplane. I called ATC to ask them to get the a/c to descend.
201503829	27/03/2015	EGTT : London (FIR)	Not specified		D	CTA	PIPER	Reciprocating	1	Infringement of the Birmingham CTA (Class D) by an unknown aircraft squawking 7000, resulting in loss of separation with a DHC8 and a PA34. Aircraft identified as a PA38.	Infringement PA38 Birmingham CAS. LOS DHC8/PA34. At apprx 1145 a 7000 squawk was approaching from the south west (no mode C). DHC8 was downwind for R33 descending to 4000' and PA34 was abeam the DHC8 heading 170 at 3000'. A blind transmission was given to the 7000 to warn of the CAS ahead. No reply was received, I expected the infringer to turn away using the VRP as a turning point. The infringer entered CAS 1 mile behind the DHC8. Separation was lost between the infringer and DHC8 and the infringer and the PA34, but as the infringer was behind both the DHC8 and PA34 I felt no avoiding action was required. The DHC8 descent was stopped at 6000' and was extended downwind, the infringer turned and left CAS to the west. The infringer was tracked and landed at Wellesbourne at 1216 and identified as PA38.☐ Supplementary 31/03/15:☐ It was a practice cross country. The planned trip was EGCW to Ludlow to Worcester to EGBW. Until reaching Worcester all the planning was right, the times and the headings were perfect. Upon leaving Worcester the student selected a heading of 060 and I asked what was the planned heading and the student replied 085 but he was aware of this initial correction due to have made the turn later than planned. He kept on going without coming back to the original heading and as we approached Birmingham CTA I asked where we were and what altitude we needed to be at that point. He said we were approaching Stratford-Upon-Avon (it was Redditch). He then changed the radio from London info to EGBW and descent from 3000ft to 2000ft on QFE. As we reached Redditch I asked him what visual

201503829	27/03/2015	EGTT : London (FIR)	Not specified		D	CTA	DE HAVILLAND	Turboprop	2	Infringement of the Birmingham CTA (Class D) by an unknown aircraft squawking 7000, resulting in loss of separation with a DHC8 and a PA34. Aircraft identified as a PA38.	Infringement PA38 Birmingham CAS. LOS DHC8/PA34. At apprx 1145 a 7000 squawk was approaching from the south west (no mode C). DHC8 was downwind for R33 descending to 4000' and PA34 was abeam the DHC8 heading 170 at 3000'. A blind transmission was given to the 7000 to warn of the CAS ahead. No reply was received, I expected the infringer to turn away using the VRP as a turning point. The infringer entered CAS 1 mile behind the DHC8. Separation was lost between the infringer and DHC8 and the infringer and the PA34, but as the infringer was behind both the DHC8 and PA34 I felt no avoiding action was required. The DHC8 descent was stopped at 6000' and was extended downwind, the infringer turned and left CAS to the west. The infringer was tracked and landed at Wellesbourne at 1216 and identified as PA38.☐ Supplementary 31/03/15:☐ It was a practice cross country. The planned trip was EGCW to Ludlow to Worcester to EGBW. Until reaching Worcester all the planning was right, the times and the headngs were perfect. 201503832	12/03/2015	EGTT : London (FIR)	BHX	10.7nm SSE	D	CTA	AVIONS ROBIN	Reciprocating	1	Infringement of the Birmingham CTA 2 by an unknown aircraft squawking 7000 at 1600ft. Aircraft identified as a Robin R2160. Standard separation maintained.	Infringement of Birmingham CTA-2 by Robin R2160. At 1606 a 7000 squawk climbed into CTA-2. I had previously noticed the aircraft in the vicinity of CTA-2 and had already established the callsign using Mode S. Once the aircraft climbed to 1600ft I tried to contact him with blind transmissions. These went unanswered. The ATSA spoke to Coventry but they were not working the aircraft. A minute or so later Coventry rang back and confirmed they were now speaking to the pilot. He subsequently rang in and it was explained to him to use 0010 and monitor the frequency.
201503849	28/03/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted		D	CTA	ROBINSON	Reciprocating	1	Infringement of the Stansted CTA (Class D) by a R44 at 1900ft. Traffic info and avoiding action given. Standard separation maintained.	R44 triggered primary CAIT in the NE corner of the SS CTA at 1.9A. I had two B737's being turned on to finals, one descending to 2A and the other 4A both east of the final approach track. I gave avoiding action to both even though by the time I gave avoiding action to the second R44 and descended to 1.3A outside CAS. I was unsure of the R44's intention and therefore decide to avoid and continue with my original plan with one going south and the other east, both climbing to stay inside CAS. Separation was not lost. R44 then contacted me on frequency and I identified him. He informed me that he may have been late in the decent and I informed he had and that 737's had been broken off the approach and that I would have to file. He continued on my frequency under a basic service until he decided to change frequency on route to his destination.
201503849	28/03/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted		D	CTA	BOEING	Turbofan	2	Infringement of the Stansted CTA (Class D) by a R44 at 1900ft. Traffic info and avoiding action given. 201503853	24/01/2015	EGTT : London (FIR)	BZN	Bearing 045 Range 5.8nm	D	CTR	CESSNA	Reciprocating	1	Infringement of the Brize Norton CTR (Class D) by a C172 squawking 4520 at 2000ft. Standard separation maintained.	On Saturday I was the approach/zone controller. I was observing a transit of a zone crosser when I noticed an aircraft just entering the Brize CTR (BZN 045 degrees 5.8nm). The aircraft was squawking 4520 (Oxford conspicuity sqk) and was heading north west bound. I rang Oxford to obtain the aircraft's callsign and was informed that he was last reported at 2000ft on 1027. The aircraft was told by Oxford to remain outside Brize CTR 3 times and then changed frequency to Gloucester at 1412. Oxford were not working the aircraft when I rang. I proceeded to ring Gloucester and was told that the aircraft was not speaking to them yet. I asked Gloucester to ask the pilot to ring the ATC Sup on landing. At 1418 I received a phone call from Gloucester telling me that the aircraft had just spoken to them on frequency by which time, the aircraft had left Brize CTR. Supervisors Narrative. I was the ATCO I/C at the time of the event but also the approach/zone controller who submitted the report. I spoke to the pilot and informed him of his actions and what to do next time he is transiting the area.
201504042	01/04/2015	EGTT : London (FIR)	Damyns Hall	1.5nm W	D	CTR	BELL	Turboshaft	1	Infringement of the London City CTA (Class D) by a B206 at 1600ft, resulting in loss of separation with an inbound C510. Traffic info and avoiding action given.	B206 infringed London City zone. A B206 from a private site routed around the north and east of the city zone. B206 was at 1.4A to route beneath the London City CTA. At 0945z, about a mile and a half to the west of Damyns Hall, B206 climbed to 1.7A. The AIW went off as B206 climbed to 1.6A, and as I was instructing B206 to descend immediately to not above 1.4A, B206 briefly climbed to 1.7A before descending to 1.4A. SVFR East called, and I said it was already descending, but they called back around 3/4 minutes later to request details (most of which they already had because they worked B206 out of the London Zone initially) because SVFR were working an aircraft within 5000ft as B206 infringed. B206 did drop immediately outside of CAS, and shortly after, went en-route to destination.☐ Supplementary 07/04/15:☐ Loss of separation due to an infringing aircraft. I was acting as an OJTI with a high hours trainee when an aircraft infringed the London City CTA, causing an immediate lose of separation with a London City inbound. Traffic information and avoiding action were issued to the inbound jet even though the infringer was in its seven o'clock as there was less than 5miles or 5000ft separation. The infringing aircraft was working Farnborough LARS east and had been verified.

201504200	06/04/2015	EGTT : London (FIR)	REXAM	1nm S	A	TMA	CESSNA	Reciprocating	1	Infringement of the Manchester TMA (Class A) by an unknown aircraft indicating 5000ft. Aircraft identified as a C172. Standard separation maintained.	Infringement at Rexam. At 11:12 myself and the Wal Planner noticed an infringer on the radar at REXAM indicating 5A where the base of controlled airspace is 4.5A. It had a squawk that indicated it was receiving a service with London Information. My planner called London information who I believe spoke with the pilot who then descended under the base of controlled airspace. Using the Mode S information we saw the aircraft registration was C172.☐ Supplementary 10/04/15:☐ Aircraft infringed CAS. Aircraft called on 124.75 for Basic Service at 1047z. A/C called at 1050z. Was given the Holyhead and Barnsley RPS. Scottish called to say A/C appeared to be infringing CAS at a point south of Wrexham. A/C was given Manchester QNH and asked to report altitude and position. He reported South of Wrexham returning to intended destination.☐ Supplementary 23/04/15:☐ The weather to the east was cloudy but very good to the west. I followed the river Dee and turned south as i had done on previous flights. I had trained in the area. I was higher than i had been previously in the area and caught the edge of airspace as I turned back to Welshpool. I should have noticed the controlled airspace was 4500 ft but did not. I had very recently passed my PPL so have only flown a few flights since qualifying. I tried to stay in contact with London information by giving them position and height reports. The incursion was due to my inexperience leading me not to see the need to drop below 4500 ft to avoid
201504205	06/04/2015	EGTT : London (FIR)	SAM	8.5nm NNE	D	CTR	FLY BUY ULTRALIGHTS	Reciprocating	1	Infringement of the Solent CTA 3 (Class D) by an unknown aircraft indicating 2300ft. Aircraft identified as an Ikarus C42 microlight. Standard separation maintained.	Infringement of Solent CTA 3. A contact was observed 13nm North of Southampton tracking south indicating 2.5A. It descended to 2.2A and continued south. The Mode C then indicated 2.3A in the Solent CTA 3 area where the base is 2A. Blind calls were made as soon as it was spotted 13nm N with no answer. The Mode S indicated the registration is for an Ikarus C42 microlight. The a/c continued SE bound then appeared to land at an airfield. I could not issue a release to an outbound a/c and as a result it had to be taken off the runway.
201504205	06/04/2015	EGTT : London (FIR)	SAM	8.5nm NNE	D	CTR	UNKNOWN	Turbofan		Infringement of the Solent CTA 3 (Class D) by an unknown aircraft indicating 2300ft. Aircraft identified as an Ikarus C42 microlight. Standard separation maintained.	Infringement of Solent CTA 3. A contact was observed 13nm North of Southampton tracking south indicating 2.5A. It descended to 2.2A and continued south. The Mode C then indicated 2.3A in the Solent CTA 3 area where the base is 2A. Blind calls were made as soon as it was spotted 13nm N with no answer. The Mode S indicated the registration is for an Ikarus C42 microlight. The a/c continued SE bound then appeared to land at an airfield. I could not issue a release to an outbound a/c and as a result it had to be taken off the runway.
201504233	06/04/2015	EGTT : London (FIR)	EGBB (BHX): Birmingham	12.5nm South			PIPER	Reciprocating	1	Infringement of the Birmingham CTA (Class D) by a PA28 squawking 7000 climbing to 2800ft.	I was working a Radar 1 controller when I noticed a 700 squawk infringe CAS south of Birmingham airfield, rangr of 12.5 miles. The A/C was climbing through 1700ft - base of CAS 1500ft - heading westbound. I had no inbound traffic due but I was working several VFR tranit A/C. I made several blind transmissions as the A/C climbed to 2800ft and continued westbound. A pilot replied and was identified but was not the A/C concerened. No IFR traffic was affected. I followed the traffic to Shobdon, called them, and identified the A/C as a PA28 and asked them to pass on our phone number. The pilot phoned and spoke to the Watch Manager, and identified himself.
201504269	05/04/2015	EGTT : London (FIR)	EGCB : Manchester/Barton		G	ATZ	UNKNOWN	Unknown		Infringement of the Manchester Barton ATZ (Class G) by an unknown aircraft.	Pilot of C152 when on climbing on crosswind following a practice EFATO reported that an aircraft had flown underneath him, within the ATZ at approx 200ft AGL. Nothing was observed from the VCR and Manchester Approach advised that nothing was visible on radar other than the reporting aircraft (The only other aircraft airborne from EGCB at the time was a helicopter that was off frequency in the Rochdale area). The FISO suggested that the aircraft seen may have been a radio controlled model from a club located to the W of the ATZ, however this was discounted by the reporting aircraft who was certain that the aircraft was full sized. After the C152 landed the instructor visited the VCR and advised that the aircraft was a blue and white aircraft which appeared to be heading North East.

201504269	05/04/2015	EGTT : London (FIR)	EGCB : Manchester/Barton		G	ATZ	CESSNA	Reciprocating	1	Infringement of the Manchester Barton ATZ (Class G) by an unknown aircraft.	Pilot of C152 when on climbing on crosswind following a practice EFATO reported that an aircraft had flown underneath him, within the ATZ at approx 200ft AGL. Nothing was observed from the VCR and Manchester Approach advised that nothing was visible on radar other than the reporting aircraft (The only other aircraft airborne from EGCB at the time was a helicopter that was off frequency in the Rochdale area). The FISO suggested that the aircraft seen may have been a radio controlled model from a club located to the W of the ATZ, however this was discounted by the reporting aircraft who was certain that the aircraft was full sized. 201504284	27/03/2015	EGTT : London (FIR)	EGBB (BHX): Birmingham	South West	D	CTA	SOCATA	Turboprop	1	Infringement of the Birmingham CTA (Class D) by a TBM700 squawking 7000 at 3000ft.	After departing runway 18, and leaving the circuit area, I preceded northwest to destination under VMC, via an initial routing towards Cosford, to remain beneath the CTA west of Birmingham. My aim was to climb to 4500 feet, and remain clear of the CTA by flying beneath controlled airspace (FL65/FL145) west of Birmingham which runs parallel to a lower segment of CTA (2500/FL145). I climbed too early and inadvertently infringed on the CTA in the SW corner of Birmingham airspace (25/FL145). Upon realization, I descended clear and turned away. Prevention: I was using VFR charts; however, in this case with high workload was over reliant on the airspace boundaries provided by the integrated avionics suite.
201504293	06/04/2015	EGTT : London (FIR)	DTY	10nm N	A	TMA	WASSMER	Reciprocating	1	Possible infringement of the LTMA (Class A) by an unknown aircraft squawking 4572 at 4600ft. Aircraft identified as a Wassmer.	Wassmer, squawking 4572, was observed to have infringed upon Midlands a/s. The aircraft reached a maximum altitude of 4600' where the base is 4500'. Birmingham approach advised that the aircraft was listening out with East Midlands approach. East Mids were contacted and advised that they had notified the aircraft. Wassmer was then observed to descend outside CAS.
201504303	05/04/2015	EGTN : London (FIR)	EGCN : DONCASTER SHEFFIELD	7nm West	D	CTR	EUROPA	Reciprocating	1	Infringement of the Doncaster CTR (Class D) by an Europa squawking 7000 at 2900ft. Standard separation maintained.	I observed a 2677 squawk to the north west of Wadworth tracking towards CAS. The squawk then changed to 7000 and the aircraft is observed entering CAS to the south of Wadworth tracking south east. Shortly afterwards an Europa reports on frequency stating his position as to the west of EGCJ and requesting a basic service and CAS transit. On issuing a 6160 squawk to aircraft I observed the 7000 squawk change to 6160 inside CAS. Having identified the infringer I advised him of his correct position and informed him that he had entered controlled airspace. As there were no other a/c affected I have the aircraft a VFR clearance to leave controlled airspace to the south not above 3000ft. Pilot apologised for his navigation error.
201504368	06/04/2015	EGTT : London (FIR)	EGGD (BRS): Bristol/Lulsgate		D	CTA	PIPER	Reciprocating	1	Infringement of the Bristol CTA (Class D) by a PA28 at 5000ft. Bristol departures were stopped and a check all imposed.	

201504387	07/04/2015	EGTT : London (FIR)	Syerston		G	ATZ	PIPER	Reciprocating	1	Alleged infringement of the Syerston ATZ (Class G) by a PA28 at approx 500ft AGL.	At the above time a PA28 was observed flying overhead the airfield at a low height on a Westerly heading. The exact height was unknown but was estimated to be approximately 500ft AGL. The registration could be seen underneath the aircraft by several observers on the ground. Several attempts to contact the aircraft via R/T were unanswered. Waddington LARS were contacted who stated that the aircraft had a XPDR code of 4556 and was therefore talking to East Midlands. East Midlands were contacted who stated that the pilot was lost and was receiving a talkdown from the radar console.
201504411	08/04/2015	EGTT : London (FIR)	EG D202		G	Danger area	CESSNA	Reciprocating	1	Infringement of Danger Area EG D202 (Aberporth) and West Wales RA(T) by an unknown aircraft squawking 7000 at 2000ft. Aircraft identified as a C172.	C172 infringed EG d202 and West Wales Airport ATZ. Whilst working an RPAS aircraft within D201 I observed an aircraft squawking 7000 approaching the Aberystwyth area from Mid-Wales. Throughout the period of this report I had primary and secondary radar contact with no mode C. When the aircraft was overhead Aberystwyth I made a blind call to advise D201 and D202 were open and for the aircraft to report its intentions, there was no reply. The aircraft tracked southwest along the coast. I made a further blind call when the aircraft was overhead Llan-on, with no response. The aircraft turned southwards at Llan-on remaining outside D201. I continued to monitor the track which appeared to remain clear of D202. At 1137 the aircraft was in the vicinity of Flostrasol when it commenced a turn to the West. The aircraft entered D202 7NM SE of West Wales. I made another blind call and called the West Wales Airport AFISO to warn him of the infringer. The aircraft tracked towards West Wales Airfield. I continued to update the AFISO of its position. The AFISO became visual with the aircraft when it was south abeam West Wales Airfield, he made several blind calls to the aircraft with no response. The aircraft also infringed the West Wales Airfield ATZ. The AFISO reported that the aircraft appeared to be similar to a Cessna 172 and was at approximately 2000 ft. At 1146 the aircraft left D202 6.5NM SW of West Wales Airfield. It tracked towards STU and then Haverfordwest. I called Haverfordwest who advised that the aircraft was a C172. I requested that the pilot contact Aberporth ATC. At no time was there any impact on trials activity or any loss of safety. The pilot subsequently phoned and was debriefed by the Manager ATS. The pilot said that he had mistakenly
201504428	08/04/2015	EGTT : London (FIR)	BPK		A	TMA	SOCATA	Turboprop	1	Departing Socata TBM850 climbed to 1900ft, infringing the LTMA (Class A). Pilot had called ATC stating remaining outside CAS climbing to1900ft, however the pilot should have climbed to 1400ft to remain outside CAS. Standard separation maintained	Airspace Joiner Infringement. Socata TBM850 departing North Weald called on frequency beneath the Stansted RMA on track BPK stating remaining outside controlled airspace climbing 1900ft. The aircraft would have had to be climbing to 1400ft to be remaining outside in its present position, initially I read back Basic Service outside controlled airspace and then registered he had said 1900ft. Instead of issuing a descent clearance for him to leave again I prioritised calling Essex who had an aircraft at 3000ft which could descend imminently. They said they were maintaining 3000ft and turning away. After then seeing Socata TBM850 was no longer in conflict with any other aircraft I checked the rest of my sector in case I had overlooked anything. By this time he was almost outside again as 1900ft is outside at BPK. I decided against getting into a discussion with the pilot about him infringing on the RT and simply issued him with a joining clearance on track BPK at this point.
201504460	12/04/2015	EGTT : London (FIR)	DTY	5nm E	A	CTA	PIPER	Reciprocating	1	Infringement of the Daventry CTA (Class A) by a PA28 at FL86. CAIT activated. Separation lost.	Infringement of DTY CTA PA28. PA28 observed by CAIT in DTY CTA at FL86 climbing where the base is FL75. Inbounds were given vectors to maintain 5nm 5000 feet. Aircraft called Nottingham East Midlands and they informed aircraft routing details. ☐ Supplementary 15/04/15:☐ Due to poor weather conditions and poor radio contact / partial failure of DME tracking to DTY 116.40. I increased my altitude due to poor weather conditions and whilst sorting apparent radio failure and LED malfunction on Distance and Frequency on the DME display I infringed Daventry CTA. At reaching safe altitude at FL090 above cloud under IMC I immediately reassessed my location via different DME and chose Gamston DME 112.80 verifying my location to the South of East Midlands Airspace c.10nm S of Leicester. I made successful communications and intentions immediately to East Midlands Approach whom advised me that I had infringed Daventry Airspace and would be receiving papers. I accept responsibility for the infringement and acknowledge a lack of correct position and altitude leading to the infringement due partial failure of squelch of radio / volume turned down, LED failure of DME and due to weather conditions decided to increase altitude to open air. ☐ Supplementary 30/04/2015:☐ PA28 infringing TC WELIN Airspace for a period of over seven minutes. The aircraft climbed to over 3400ft inside CAS. CAIT activated as the PA28 entered CAS at 16:49:17 (base of CAS 5500 feet). Separation eroded between the PA28 and an aircraft inbound to EGGB at 16:49:47. The pilot of the PA28 continued the climb to 8900ft and track in a North East
201504460	12/04/2015	EGTT : London (FIR)	DTY	5nm E	A	CTA	UNKNOWN	Unknown		Infringement of the Daventry CTA (Class A) by a PA28 at FL86. CAIT activated. Separation lost.	Infringement of DTY CTA PA28. 201504512	10/04/2015	EGTT : London (FIR)	Golborne		D	CTA	PIPER	Reciprocating	1	Infringement of the Manchester CTA (Class D) by a PA28 squawking 7000 at 2000ft. Standard separation maintained.	I am a new PPL and have purchased skydeamon which I was intending to use on this flight (with chart as well). At the time of flight the weather conditions were not good enough to allow my original route so I plotted an alternative. I set off from Barton and discovered that the Skydeamon was not working. Il flew off track whilst not concentrating on flight path due to trying to work out why the skydeamon was not operating. I flew further south than I thought and whilst expecting to be above Wigan found myself in the Low Level Corridor at an excessive height. I was contacted by Barton Information at this point and informed of my error. I immediately descended to 1200 ft and altered course to Wigan where I resumed my flight path. I put this down to errors on my part. My low hours on this aircraft and becoming distracted by a non working nav aid.☐ Supplementary 11/04/15:☐ 7000 infringed the Manchester CTA in the area of Golborne. I hadn't noticed this until the WAL Planner rang and asked about it because we had an inbound (still with PC) routing to Mirsi and they were not sure whether to take avoiding action. I rang Barton who raised the pilot who apologised and descended. I rang EGCB back and told them to instruct the aircraft to ring the EGCC WM when on the ground.
201504579	09/04/2015	EGTT : London (FIR)	D125 Salisbury Plain		G	Danger area	CESSNA	Reciprocating	1	Infringement of Danger Area EG D125 (Salisbury Plain) by a C210 squawking 5057 at 4500ft.	I was the Bristol LARS/Radar 2 Controller at the time of this event. C210 called west of Yeovilton at 1431, having been transferred by Exeter ATC, flying at 5100 feet, requesting a Traffic Service (TS), tracking to Compton VOR. Due to the allocated SSR code being incorrectly code-call-sign converted, I deleted this and reallocated another SSR code. Aircraft passed north-abeam Yeovilton at 1436. My required radar-scan and workload was moderate/high throughout my time in the position. Whilst providing a TS to the aircraft, I was also providing TS and Basic Service to numerous aircraft within a 30nm radius of Bristol, including CTA/CTR transits, aircraft to/from other military airfield and an aircraft joining N864 at MULIT from Bournemouth. These required appropriate co-ordination with Cardiff and/or Bristol Radar 1. On observing the aircraft crossing the western boundary of D123 near Warminster at approx. 1442, I asked the pilot if he had checked on the activity state of the Salisbury Plain danger areas. He replied "I was told by Exeter they were closed- for Easter". I briefly looked up from the radar display at the faxed activity sheet for the Salisbury Plain ranges for that day and for part of the subsequent day (displayed above the console) and commented to him that I thought that was largely the case, as I took account of the altitude at which aircraft was flying: I believe that I noted either no activity or no activity above 3000 ft in the ranges, which was hand-written on the paper sheet. I failed to note that D125 was active to 30,000 feet (until 2359 that day). Shortly thereafter, aircraft requested descent to 2500 feet, which I acknowledged, with a caution to the pilot to take his own terrain clearance, it being almost certain that the aircraft would cross the northern boundary of D125 above
201504585	11/04/2015	EGTT : London (FIR)	LLR		D	CTR	ROBINSON	Reciprocating	1	Infringement of the Manchester CTR (Class D) by an unknown aircraft squawking 7000, indicating 1600ft. Aircraft identified as an R44. Standard separation maintained.	Airspace infringement. Whilst working as the Approach South controller I spotted the AIW alert in the LLR with a 7000 squawk indicating 1.6A. I had just been working an R44 helicopter and assumed that it was the same traffic. I phoned Walsy sector to make them aware and also Liverpool approach to see if they were working any traffic in that area. Using Mode S, I ascertained the aircraft registration as a R44. I obtained a telephone number for Aintree and enquired as to whether they were in communication with the subject traffic. They informed me that they were air/ground only and had spoken to a helicopter but only with their own assigned callsign. I gave them the subject aircrafts registration and the WM phone number as they said they would try to contact the pilot and get them to ring in.
201504591	11/04/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	CTA N	D	CTA	CESSNA	Reciprocating	1	Infringement of the Stansted CTA (Class D) by a C210, indicating 2300ft, resulting in loss of separation with an inbound CRJ2. CAIT activated. Traffic info given.	Infringement. SCAIT alerted me to an infringer through Stansted CTA indicating 2300ft and callsign (via Mode S) of C210. I tried contacting the pilot several times. CRJ2 was stopped off at FL70 and given traffic information. 5000ft and/or 5Nm was not kept but there was no immediate danger and confines of airspace made avoiding action difficult. The pilot was informed and stated he was happy to continue without avoiding action. Eventually C210 did call on frequency, (via Cambridge and a phone call to them from Luton). I put him on a squawk of 7402 and identified him and also provided QNH. He stated he was at 2300ft. I passed him back to Cambridge as he was passing their overhead.☐ Supplementary 26/04/15:☐ I had flown the route before in the same aircraft last year. The day before I had planned the route using Skydemon. The route was as last year EGKB-Southend-Earls Colne-Newmarket Heath- Gamston- Doncaster-Sherburn. This had worked out fine. However, when I got to Biggin Hill to pick up the N-reg 210 I changed the route in the GNS 430 to Earls Colne- Cambridge. This was the route the other C210 was taking to Sherburn. When I changed frequency to Earls Colne they were quite busy so I told them I would pass them to the West of their ATZ. This of course took me closer to the Stansted CTA. A little while after passing Earls Colne I saw another aircraft at about 2/3 miles crossing from left to right across my track at a similar height. I then turned to the left to pass behind the aircraft and had not noticed in doing so that I would infringe the CTA. I would estimate the other aircraft's track as something like 075/085 and had probably come through the CTA at a similar height to
201504591	11/04/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	CTA N	D	CTA	CANADAIR	Turbofan	2	Infringement of the Stansted CTA (Class D) by a C210, indicating 2300ft, resulting in loss of separation with an inbound CRJ2. CAIT activated. Traffic info given.	Infringement. SCAIT alerted me to an infringer through Stansted CTA indicating 2300ft and callsign (via Mode S) of C210. I tried contacting the pilot several times. 201504595	12/04/2015	EGTT : London (FIR)	SAM	Bearing 274 Range 9nm	D	CTA	AVIONS ROBIN	Reciprocating	1	Infringement of the Solent CTA (Class D) by a DR40 squawking 3660 at 2800ft. Standard separation maintained.	7000 squawk observed 12nm west of SAM tracking south-eastbound indicating 2800ft. Mode S indicated the callsign to be a DR40. Blind calls were made with no response received. Coordinator phoned Bournemouth who received a call from the aircraft and transferred aircraft entered Solent CTA-4 indicating 2800ft, and then called Solent. Aircraft identified and continued south-eastbound CTA-2 (above the CTR)-CTA-2, before leaving the CTA. No other traffic was affected.
201504623	10/04/2015	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD		D	CTR	ROBINSON	Reciprocating	1	Infringement of the Doncaster CTR (Class D) by a R22 squawking 7000. Traffic info given. Standard separation maintained.	Whilst controlling as RHADS APs I had details of a circuit PA31, who wished to depart on a heading t(160/4AVFR) after his final approach. As the ac was turning finals with ADC I noticed a 7000 squawking ac enter controlled airspace approximately 5nm of EGNF. I made several calls to the infringing ac to make himself known to me, without success. I then told ADC that the ac was not under my control and passed updated traffic information to ADC as it proceeded to transfer eastbound through the climbout lane. ADC advised me they had passed it to PA31. PA subsequently checked in on my frequency and I gave him immediate traffic information and confirmed that had received information from ADC, which he had and was visual with helicopter traffic. The infringing ac appeared to pass within 1A feet of the PA31.
201504623	10/04/2015	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD		D	CTR	PIPER	Reciprocating	2	Infringement of the Doncaster CTR (Class D) by a R22 squawking 7000. Traffic info given. Standard separation maintained.	Whilst controlling as RHADS APs I had details of a circuit PA31, who wished to depart on a heading t(160/4AVFR) after his final approach. 201504800	16/04/2015	EGTN : London (FIR)	EGCN : DONCASTER SHEFFIELD		D	CTR	CESSNA	Reciprocating	1	Infringement of the Doncaster CTR (Class D) by a C150 at 2000ft. Standard separation maintained.	Aircraft calls Doncaster radar after departing but is already inside controlled airspace. VRP. I informed the pilot that he had entered controlled airspace and asked the pilot to call us on landing. No other aircraft were affected.
201504829	17/04/2015	EGTT : London (FIR)	EGBE (CVT): Coventry	2nm South West	D	CTA	PIPER	Reciprocating	1	Infringement of the Birmingham CTA (Class D) by a PA28 with Mode C indicating 2000ft.	At approximately 12:55 UTC the Airspace Infringement Warning on the radar display alerted me to an aircraft squawking 4360 and Mode C indicating 2000 feet entering Birmingham controlled airspace approximately 4-5nm miles SW of Coventry airport. I immediately rang the Coventry Tower phone line and requested that their aircraft be descending to 1500 feet or lower. I observed the aircraft to be descending through 1800 feet at this point. I assessed the situation that the Oxford training aircraft I was working was at FL70 and therefore did not require any avoiding action to be given.
201504829	17/04/2015	EGTT : London (FIR)	EGBE (CVT): Coventry	2nm South West	D	CTA	UNKNOWN	Unknown		Infringement of the Birmingham CTA (Class D) by a PA28 with Mode C indicating 2000ft.	At approximately 12:55 UTC the Airspace Infringement Warning on the radar display alerted me to an aircraft squawking 4360 and Mode C indicating 2000 feet entering Birmingham controlled airspace approximately 4-5nm miles SW of Coventry airport. I immediately rang the Coventry Tower phone line and requested that their aircraft be descending to 1500 feet or lower. I observed the aircraft to be descending through 1800 feet at this point. I assessed the situation that the Oxford training aircraft I was working was at FL70 and therefore did not require any avoiding action to be given.

201504848	17/04/2015	EGTT : London (FIR)	EGBE (CVT): Coventry	10nm South West	D	CTA	DIAMOND	Reciprocating	1	Infringement of the Birmingham CTA (Class D) by a DA40 squawking 4360.	Aircraft infringed Birmingham airspace near the Warwick VRP. I observed an aircraft squawking 4360 approaching the vicinity of Warwick VRP (approx 10nm SW of Coventry) indicating 2800ft descending. I rang the Coventry Tower line and there was no answer. The Airspace Infringement Warning activated once the aircraft infringed the 1500ft stub of controlled airspace , and the aircraft kept descending and eventually turned to the right. No Birmingham traffic was affected. Coventry informed the radar assistant that the aircraft was a DA40.
201504885	18/04/2015	EGTT : London (FIR)	EGBB (BHX): Birmingham	16nm NW	D	CTA	PIPER	Reciprocating	1	Infringement of the Birmingham CTA (Class D) by an unknown aircraft squawking 7000, climbing through 3700ft, resulting in loss of separation with inbound traffic. Aircraft identified as a PA24. Avoiding action given.	Working two inbounds from the North, I observed an aircraft squawking 7000 from the general direction of Wolverhampton. The aircraft was indicating 3400ft, just below controlled airspace, and I attempted to call him several times, having used Mode S information to get the callsign. The aircraft was then observed to keep climbing through 3600 then 3700 feet. BE200 was heading away from the infringer, approx 4nm increasing, and approx 1300 feet above. I concentrated on trying to give avoiding action to the second inbound ATR76 - I rang Scottish and tried calling him on my frequency. As soon as the aircraft answered I gave avoiding action to turn him away from the infringer. ATR76 was at FL80, and had approx 3.5nm lateral, and approx 4000 feet vertical separation from the infringer. PA24 was later observed to descend outside controlled airspace.
201504885	18/04/2015	EGTT : London (FIR)	EGBB (BHX): Birmingham	16nm NW	D	CTA	ATR	Unknown		Infringement of the Birmingham CTA (Class D) by an unknown aircraft squawking 7000, climbing through 3700ft, resulting in loss of separation with inbound traffic. Aircraft identified as a PA24. Avoiding action given.	Working two inbounds from the North, I observed an aircraft squawking 7000 from the general direction of Wolverhampton. The aircraft was indicating 3400ft, just below controlled airspace, and I attempted to call him several times, having used Mode S information to get the callsign. The aircraft was then observed to keep climbing through 3600 then 3700 feet. BE200 was heading away from the infringer, approx 4nm increasing, and approx 1300 feet above. I concentrated on trying to give avoiding action to the second inbound ATR76 - I rang Scottish and tried calling him on my frequency. As soon as the aircraft answered I gave avoiding action to turn him away from the infringer. ATR76 was at FL80, and had approx 3.5nm lateral, and approx 4000 feet vertical separation from the infringer. PA24 was later observed to descend outside controlled airspace.
201504885	18/04/2015	EGTT : London (FIR)	EGBB (BHX): Birmingham	16nm NW	D	CTA	BEECH	Turboprop	2	Infringement of the Birmingham CTA (Class D) by an unknown aircraft squawking 7000, climbing through 3700ft, resulting in loss of separation with inbound traffic. Aircraft identified as a PA24. Avoiding action given.	Working two inbounds from the North, I observed an aircraft squawking 7000 from the general direction of Wolverhampton. The aircraft was indicating 3400ft, just below controlled airspace, and I attempted to call him several times, having used Mode S information to get the callsign. The aircraft was then observed to keep climbing through 3600 then 3700 feet. BE200 was heading away from the infringer, approx 4nm increasing, and approx 1300 feet above. I concentrated on trying to give avoiding action to the second inbound ATR76 - I rang Scottish and tried calling him on my frequency. As soon as the aircraft answered I gave avoiding action to turn him away from the infringer. ATR76 was at FL80, and had approx 3.5nm lateral, and approx 4000 feet vertical separation from the infringer. PA24 was later observed to descend outside controlled airspace.
201504886	18/04/2015	EGTT : London (FIR)	SAM	Bearing 170 Range 6nm	D	CTR	PIPER	Reciprocating	1	Infringement of the Solent CTR (Class D) by a PA28 squawking 3661 at 1500ft. Standard separation maintained.	At 1205z I observed a contact tracking towards the CTR squawking 7000 with mode C. The Mode S gave callsign of the aircraft. I made multiple attempts to contact the aircraft but received no response. The aircraft entered CAS north of Calshot tracking NW, when it reached Hamble it turn right to leave CAS. Aircraft called me shortly after and I was able to identify the aircraft as the one which had infringed. The pilot was aware of the infringement.☐ Supplementary 16/07/15:☐ The aircraft departed and entered the Southampton Control Zone without a clearance. The pilot was aware of his departure route and had made a turn to avoid the Fleetlands Aerodrome Traffic Zone but in doing so entered the Southampton CTR, after having misidentified the CTR boundary at Hamble rather than junction 9 of the M27.

201504890	17/04/2015	EGTT : London (FIR)	Daventry	5nm West	A	CTA	CESSNA	Reciprocating	1	Infringement of the Daventry CTA (Class A) by a C150 squawking 7000 at 5100ft. Traffic info and avoiding action given.	At the time of the incident, I was working as Radar 1. At approximately 0918z, TC Midlands transferred aircraft 2 to me 'standard' towards HON descending to FL90. As I spoke to the aircraft on initial contact, I noticed the return of an aircraft squawking 7000 approximately 5nm SW of DTY at 5100' altitude. The 7000 was tracking northbound and infringed CAS, showing an AIW warning. I broke off my transmission to the aircraft 2 giving avoiding action with a right turn onto 340 degrees and passed traffic information. I made a blind call to the 7000 (who showed no information on Mode S) with no response. Separation was maintained throughout, at its worst achieving 5.7nm (using ERBM tool). I explained the situation in more detail to BEE9HR, who advised they would not be requiring anymore information from me. The 7000 then descended below CAS to 3200' altitude and after spending some time west of DTY, proceeded south towards Hinton. The 7000 then landed at approximately 0935z. I made a phone call to Hinton, who transferred me to the pilot of the aircraft.. He advised me that the registration was a C150. He also advised that the maximum altitude that the flight reached was 2500'. I advised that the aircraft had shown on Radar as altitude 5100' and that I had given avoiding action to a Birmingham Inbound. He reiterated that he had not being above 2500' and advised that the same aircraft had experienced transponder problems within the last week. Below are the pilot's details. The instructor phoned back a few minutes later to advise that he was to get airborne again and fly roughly the same route. I asked him to freecall Birmingham Radar to check his transponder. I was operating as Radar when he called, and the Mode C readout showed FL80 when the aircraft was level at 2500' altitude. I
201504890	17/04/2015	EGTT : London (FIR)	Daventry	5nm West	A	CTA	EMBRAER	Unknown		Infringement of the Daventry CTA (Class A) by a C150 squawking 7000 at 5100ft. 201504910	19/04/2015	EGTT : London (FIR)	SAM	14.5nm SE	D	CTA	PIPER	Reciprocating	1	Infringement of the Solent CTA 2 (Class D) by an unknown aircraft squawking 7000 at 2500ft. Aircraft identified as a PA28. AIW activated. Traffic info and avoiding action given.	Infringement of the Solent CTA (CTA-2). At approx. 1213 a 7000 squawk was seen approaching the CTA boundary. The mode S downlink callsign indicated it was PA28. Blind calls were made to try and establish contact without success. The coordinator contacted Bournemouth but they were not working the aircraft. The aircraft did then infringe the Solent CTA(CTA-2) at 2500ft(base 2000ft). The aircraft made a right turn and left the Solent CTA.□ Supplementary 23/04/15:□ At time 12:44 an aircraft was observed entering the Solent CTA-2 West of Cowes, squawking 7000 initially indicating 2500ft, before climbing to 2800ft. The point of entry was SAM 186R 13.6 DME. The Airspace Infringement Warning was activated. Before entry, blind calls were made for the aircraft using the Mode S downlink callsign PA28. DHC8 was giving avoiding action approx. 15 miles to the Southwest of the traffic. The aircraft continued Westbound before turning South climbing to 3000ft at time 1247 and leaving controlled airspace. At 1250 the aircraft reported on frequency, was identified and provided with a basic service.□ Supplementary 17/07/15:□ After not flying for a just over a month due to airfield being water logged, I went up with an instructor the day before for a couple of hours, just as a safety measure, as PA28 is a retractable I was a bit rusty on slowing the aircraft down for lowering the under carriage and final approach, so the instructor suggested I go out the next day and pick a flight level and practice slowing the air craft and keeping the same altitude, This I did and spent 1.5 hours
201504910	19/04/2015	EGTT : London (FIR)	SAM	14.5nm SE	D	CTA	DE HAVILLAND	Turboprop	2	Infringement of the Solent CTA 2 (Class D) by an unknown aircraft squawking 7000 at 2500ft. Aircraft identified as a PA28. AIW activated. Traffic info and avoiding action given.	Infringement of the Solent CTA (CTA-2). At approx. 1213 a 7000 squawk was seen approaching the CTA boundary. 201504916	19/04/2015	EGTT : London (FIR)	SAM	Bearing 034 Range 8nm	D	CTA	PIPER	Reciprocating	1	Infringement of the Solent CTA (Class D) by a PA28 squawking 7000 at 2400ft. Standard separation maintained.	At approximately time 1419 I observed a 7000 squawk at 2500 feet approaching the Solent CTA area 5, and from Mode S obtained the callsign. As this aircraft is locally based at Lee on Solent, and showed as descending to 2400 feet (below the base in this area) I initially monitored the aircraft. As it approached area 3 (where the base is 2000 feet) I made blind calls to see whether the aircraft was on frequency with no reply. At time 1421 the aircraft entered area 3 bearing 034 from SAM at 8nm and tracked eastbound climbing slowly to 2600 feet indicated. At time 1423 it left controlled airspace bearing 060 from SAM at 8.6nm. I made multiple calls to the aircraft with no reply. My assistant spoke to Lee on Solent airfield who were expecting the aircraft, and requested that the pilot telephone upon landing. (As of yet no call received). No loss of separation.□ Supplementary 20/4/15:□ Pilot stated that they usually have two GPS's in the cockpit one that outlines where controlled airspace is the other outlines both controlled airspace and relevance to towns. This second one had been taken out and is the GPS that usually issues the audible warning. I believed to be away from Solent Airspace and as it was thermal day weather wise I was aiming for 2000ft when tracking but subsequently climbed to 2300ft. I didn't think this was an issue as where I looked the closest airspace was at 2500ft and I seemed to have clipped where the base went down to 2000ft.

201504919	19/04/2015	EGTT : London (FIR)	SAM	3.3nm ENE	D	CTR	STAMPE	Reciprocating	1	Infringement of the Southampton CTR (Class D) by an unknown aircraft showing as a primary contact only, resulting in loss of separation with an outbound Trislander. Aircraft identified as a Stampe SV4. Traffic info and avoiding action given.	Infringement of Southampton CTR. At time 1344 a primary contact was observed 3.3DME ENE SAM. Departure Trislander was given avoiding action. The contact then turned Eastbound 050R SAM 2.2DME, and continued back into previous flying area. After co-ordination with Lower Upham and Roughay, the contact was strongly believed to be a Stampe SV4 inbound to intended destination. □ Supplementary 10/08/15:□ The pilot was visiting the private strip and despite having been brief as to local arrival and departure procedures failed to comply with the requirement to remain within the permitted lateral boundary, resulting in an excursion of the BWFA delegated airspace whilst positioning into the visual circuit. Appropriate advice has been passed to the airfield operator. The airfield operator is reported to have discussed the incident with the pilot, in the event the pilot wishes to visit the private site in the future.□ CAA Closure:□ Pilot error. Situational awareness. Failed on-line test, retraining required.
201504919	19/04/2015	EGTT : London (FIR)	SAM	3.3nm ENE	D	CTR	BRITTEN NORMAN	Reciprocating	3	Infringement of the Southampton CTR (Class D) by an unknown aircraft showing as a primary contact only, resulting in loss of separation with an outbound Trislander. Aircraft identified as a Stampe SV4. Traffic info and avoiding action given.	Infringement of Southampton CTR. At time 1344 a primary contact was observed 3.3DME ENE SAM. Departure Trislander was given avoiding action. The contact then turned Eastbound 050R SAM 2.2DME, and continued back into previous flying area. After co-ordination with Lower Upham and Roughay, the contact was strongly believed to be a Stampe SV4 inbound to intended destination. □ Supplementary 10/08/15:□ The pilot was visiting the private strip and despite having been brief as to local arrival and departure procedures failed to comply with the requirement to remain within the permitted lateral boundary, resulting in an excursion of the BWFA delegated airspace whilst positioning into the visual circuit. Appropriate advice has been passed to the airfield operator. The airfield operator is reported to have discussed the incident with the pilot, in the event the pilot wishes to visit the private site in the future.□ CAA Closure:□ Pilot error. Situational awareness. Failed on-line test, retraining required.
201504928	17/04/2015	EGTT : London (FIR)	EGNE : Repton/Gamston		D	CTA	GROB	Reciprocating	1	Infringement of the Doncaster CTA (Class D) by a Grob G115 squawking 7000 at 3200ft. Standard separation maintained.	A #7000 squawk was observed climbing out of EGNE up to 3200ft, entering the Doncaster class D CTA as it passed 2000ft. It changed to a #2633 squawk passing 2500ft. I spoke with Cranwell who informed me it was this aircraft. I subsequently spoke with the pilot who was aware of his infringement and apologised.
201504961	20/04/2015	EGTT : London (FIR)	SAM	Bearing 316 Range 5.8nm	D	CTR	PIPER	Reciprocating	1	Infringement of the Southampton CTR (Class D) by a PA28. Traffic info and avoiding action given. Separation lost.	A primary contact was observed NW of Romsey tracking toward's the Zone. Several a/c had just called on the frequency, but their positions didn't match□ the contact. Blind calls were made with no response. The contact entered the zone just east of Romsey. Just before it did, avoiding action was given to a PA34 who was approximately 5nm NW of SAM. Separation was lost as soon as the unknown entered. I continued to make blind calls and got a response from the aircraft who was 2nm NW of the runway. This was an a/c that had called just before the infringement but had reported at Salisbury at the time. The a/c continued east bound and left CAS at Bishops Waltham.□ Supplementary 12/06/2015:□ I reported in to Southampton and requested transit through the airspace. I was given a squawk code and I entered it. It is possible that I didn't reselect alt after entering the code. I was asked press ident, which I did, but if they could see me it was more likely because it was still on standby. I failed to mention that I was a student pilot. I was on radio navigation exercise and therefore no using GPS. I was struggling to use the system and that may have affected the timing of when I radioed in for permission to transit. However most critically I didn't listen out for my clearance. I should started orbiting while waiting for clearance before I entered controlled airspace. This was basic student pilot error. I won't be making the same mistake again. Next time I ask for permission I will start an orbit at a safe distance until I distinctly hear my clearance. I will also make sure that I set my transponder back onto ALT.
201504961	20/04/2015	EGTT : London (FIR)	SAM	Bearing 316 Range 5.8nm	D	CTR	PIPER	Reciprocating	2	Infringement of the Southampton CTR (Class D) by a PA28. Traffic info and avoiding action given. Separation lost.	A primary contact was observed NW of Romsey tracking toward's the Zone. Several a/c had just called on the frequency, but their positions didn't match□ the contact. Blind calls were made with no response. The contact entered the zone just east of Romsey. Just before it did, avoiding action was given to a PA34 who was approximately 5nm NW of SAM. Separation was lost as soon as the unknown entered. I continued to make blind calls and got a response from the aircraft who was 2nm NW of the runway. This was an a/c that had called just before the infringement but had reported at Salisbury at the time. The a/c continued east bound and left CAS at Bishops Waltham.□ Supplementary 12/06/2015:□ I reported in to Southampton and requested transit through the airspace. I was given a squawk code and I entered it. It is possible that I didn't reselect alt after entering the code. I was asked press ident, which I did, but if they could see me it was more likely because it was still on standby. I failed to mention that I was a student pilot. However most critically I didn't listen out for my clearance. I should started orbiting while waiting for clearance before I entered controlled airspace. This was basic student pilot error. I won't be making the same mistake again. Next time I ask for permission I will start an orbit at a safe distance until I distinctly hear my clearance. I will also make sure that I set my transponder back onto ALT.

201504994	14/04/2015	EGTT : London (FIR)	EGVN (BZZ): Brize norton	3nm NE	D	CTR	CESSNA	Reciprocating	1	Infringement of the Brize Norton CTR (Class D) by a C152 at 2000ft. The pilot had become disorientated due to hazy weather conditions. Standard separation maintained.	Infringement of Class D Airspace. I was the Approach controller based at Brize. I received a call from Farnborough North ref; an aircraft that had just infringed our airspace to the north east having just transited through the Oxford ATZ. I was given the details of the aircraft; callsign, C152 and was told the aircraft had been instructed to free call Brize Zone on 119.0. By this point the aircraft had infringed approximately 2.5 - 3 miles inside CAS. I informed the Tower controller who had a light aircraft in the visual circuit before speaking to the controllers based in Benson who had not spoken to the aircraft. At this point the aircraft turned on to a northerly heading. I spoke to the tower controller at C152's intended destination and requested they ask the pilot to call the Brize Supervisor when on the ground to discuss the incident.☐ Supervisor's Narrative:☐ There was no traffic in the Brize radar pattern to effect and just 1 light Air system in the visual cct. The pilot became disoriented in the hazy weather conditions and free called D&D for a position report when he was 4nm north of Witney clear of the CTR.
201504995	17/04/2015	EGTT : London (FIR)	EG D123	Imber	D	CTR	DIAMOND	Reciprocating	1	Infringement of active Danger Area EG D123 (Imber) and Brize Norton CTR (Class D) by an unknown aircraft, squawking 7000. Aircraft identified as a glider. Standard separation maintained.	Infringement of Active Danger Area. Danger Area D123 was active to 17,000 ft amsl for RPAS, when a 7000 squawk was observed coming through the Keevil overhead at an indicated height of 2200ft travelling at 95knts. The aircraft was on a heading of 186deg, it continued on this heading and straight through the active Danger Area. The aircraft was observed landing at an airfield, flight ops at the airfield were notified and the pilot requested to contact military Ops. The pilot on speaking to the duty Air Ops Officer stated he had just set a heading and went on this heading, he had travelled from departure airfield to destination airfield and was totally oblivious to the Danger Area and also Keevil Airfield, which was very active. Pilot showed very little understanding of both the Keevil airfield area and of the active Danger Areas. Supervisors Narrative: Clearly the pilot was unaware of the Danger Areas boundaries and the significance of them.☐ Supplementary 28/04/15:☐ Unauthorised Infringement of Airspace. Whilst monitoring the air picture an Air System was observed entering the CTR to the west of the airfield tracking NE. The Air System appeared to maintain FL020 and tracked for over 3nm through the CTR. Track ident was maintained on the violator which was seen descending and fading from surveillance cover overhead an airfield. The airfield was called on the landline and traffic information was requested on any Air system that was flying in their vicinity or had just landed. A glider had just landed and the pilot was requested to call the ATC Supervisor at Brize Norton. A conversation with the pilot confirmed that the glider had been the CTR infringement Air System. The pilot was very
201504998	20/04/2015	EGTT : London (FIR)	EGGP (LPL): Liverpool	R311	D	CTR	PIPER	Reciprocating	1	Infringement of the Liverpool CTR (Class D) and Capenhurst Restricted Zone R311 by a PA38 at 3000ft.	PA38 infringes Liverpool CTR on departure R/W04. GBLWP departed Runway 04 at time 1432Z. He came on to the radar frequency and asked for a Basic Service, which I gave him. I told him that although he was not identified, traffic believed to be him was south of the Liverpool CTR by half a mile tracking northbound and I told him to remain outside controlled airspace. The return believed to be him then continued to track northbound into the Liverpool CTR and Capenhurst R311 zone. I advised PA38 of this and advised he turned left immediately to leave the zone. I then instructed him to change squawk to 4602 to positively identify him and informed Liverpool Radar. PA38 then tracked southbound leaving the Liverpool CTR, he reported at 3000ft and then reported descending to 1500ft.
201505024	20/04/2015	EGTT : London (FIR)	51 08 14 N / 000 39 02 W		A	TMA	PIPER	Reciprocating	1	Infringement of the LTMA (Class A) by a PA28 at 3000ft. Avoiding action given. Standard separation maintained.	PA28 TMA Infringement at 3000ft. I was working as the LARS West controller, I was co-ordinating with the Approach controller when I received a phone call from Gatwick INT pointing out an aircraft about to infringe the TMA toward their final approach. I identified the aircraft as PA28 and advised the pilot to turn west and descend which was carried out.
201505025	21/04/2015	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	6nm ENE	A	TMA	AVIONS ROBIN	Reciprocating	1	Infringement of the LTMA (Class A) by an aircraft, believed to be a DR400, at 3100ft, resulting in loss of separation with two airliners. Traffic info and avoiding action given.	Infringer. Aircraft believed to be DR400 climbed to A26 6NM E of MAY and proceeded to climb to A31 in the next 10nm tracking westbound. Eventually he descended again to A25 but still hovered around the fringe of controlled airspace. I vectored a SFD outbound to avoid it and put a check on SFDs until the infringer was well clear. The inbounds were not affected on my frequency. Having tried to identify the aircraft through various different units, it appears that no one was talking to him. The only identification I have been able to do was to note the sCAIT callsign. I believe the aircraft is being tracked.☐ Supplementary 27/04/15:☐ Subsequent GPS information indicates that at this point in the flight I experienced severe rough engine running whilst trying to correct this I did not control the altitude of the aircraft and allowed it to climb into controlled airspace exceeding flight level 2500. I had actually thought that this occurred earlier in the flight and not between Crowborough and the Mayfield VOR. I intend to become more familiar with the GPS and in future not to fly as close to the given height limit for the airspace to provide a safety buffer in the event of any future problems. It clearly is a serious mistake on my part and I do not intend for it to happen ever again. I also plan to get the Transponder checked as soon as possible. ☐ Supplementary 29/06/15:☐ There was no requirement for the Gatwick FIN controller to detect the conflict prior to DR400 entering controlled airspace. There was no requirement for the controller to have a plan concerning potential infringements. The loss of separation was caused when DR400

201505025	21/04/2015	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	6nm ENE	A	TMA	AIRBUS	Turbofan	2	Infringement of the LTMA (Class A) by an aircraft, believed to be a DR400, at 3100ft, resulting in loss of separation with two airliners. Traffic info and avoiding action given.	Infringer. Aircraft believed to be DR400 climbed to A26 6NM E of MAY and proceeded to climb to A31 in the next 10nm tracking westbound. Eventually he descended again to A25 but still hovered around the fringe of controlled airspace. I vectored a SFD outbound to avoid it and put a check on SFDs until the infringer was well clear. The inbounds were not affected on my frequency. Having tried to identify the aircraft through various different units, it appears that no one was talking to him. The only identification I have been able to do was to note the sCAIT callsign. I believe the aircraft is being tracked.☐ Supplementary 27/04/15:☐ Subsequent GPS information indicates that at this point in the flight I experienced severe rough engine running whilst trying to correct this I did not control the altitude of the aircraft and allowed it to climb into controlled airspace exceeding flight level 2500. It clearly is a serious mistake on my part and I do not intend for it to happen ever again. I also plan to get the Transponder checked as soon as possible. ☐ Supplementary 29/06/15:☐ There was no requirement for the Gatwick FIN controller to detect the conflict prior to DR400 entering controlled airspace. There was no requirement for the controller to have a plan concerning potential infringements. The loss of separation was caused when DR400
201505037	21/04/2015	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTR	CESSNA	Reciprocating	1	Infringement of the Luton CTR (Class D) by a C172 squawking 7000 at 2100ft, possible loss of separation with an inbound A320. ATC broke off A320's approach to R/W08. Traffic info given.	C172 - possible infringement. C172 entered the Luton CTR from the SW squawking 7000. I tried several times to contact him. A320 was descending to 3000ft cleared ILS, I passed traffic information and stopped descent at 4000ft. Initially I thought the A320 would stay well ahead, (could not turn left as Dunstable were gliding up to 4500ft). However I quickly decided to climb A320 back up to 5000ft and broke off the approach. Farnborough LARS telephoned and said they had made contact with C172 and that he was leaving the CTR.☐ Supplementary 12/05/2015:☐ CAIT activated at 12.27.55 when an aircraft, identified by mode S, entered the Luton zone. The aircraft was tracking north eastbound towards final approach. A320 was descending to 4000ft and was not issued with further descent. A320 was instructed to climb to 5000ft and broken off the approach. There was no associated loss of separation. Farnborough later informed the controller that they had made contact with the pilot and had turned it out of controlled airspace. The aircraft left the confines of CAS at 12.30.22.
201505037	21/04/2015	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTR	AIRBUS	Turbofan	2	Infringement of the Luton CTR (Class D) by a C172 squawking 7000 at 2100ft, possible loss of separation with an inbound A320. ATC broke off A320's approach to R/W08. Traffic info given.	C172 - possible infringement. C172 entered the Luton CTR from the SW squawking 7000. I tried several times to contact him. A320 was descending to 3000ft cleared ILS, I passed traffic information and stopped descent at 4000ft. Initially I thought the A320 would stay well ahead, (could not turn left as Dunstable were gliding up to 4500ft). However I quickly decided to climb A320 back up to 5000ft and broke off the approach. Farnborough LARS telephoned and said they had made contact with C172 and that he was leaving the CTR.☐ Supplementary 12/05/2015:☐ CAIT activated at 12.27.55 when an aircraft, identified by mode S, entered the Luton zone. The aircraft was tracking north eastbound towards final approach. A320 was descending to 4000ft and was not issued with further descent. A320 was instructed to climb to 5000ft and broken off the approach. There was no associated loss of separation. Farnborough later informed the controller that they had made contact with the pilot and had turned it out of controlled airspace. The aircraft left the confines of CAS at 12.30.22.
201505080	22/04/2015	EGTT : London (FIR)	EXMOR	5nm E	D	CTA	PIPER	Reciprocating	1	PA32 infringed Cardiff CTA (Class D) whilst receiving a service from military ATC Radar. Military ATC believed the PA32 had been outside CAS. Standard separation maintained.	Infringement - PA32. At the time of the alleged infringement I was the Cardiff Radar ATCO. Radar was boxed and the ATSA was present. Workload was medium. At approx. 0917 I noticed at target approx. 5nm east of EXMOR with SSR code 4371, tracking towards EXMOR indicating altitude 4400ft Cardiff QNH1031. This is inside Cardiff CTA by approx. 1nm. The aircraft ID obtained from Mode S indicated PA32 and the SSR code indicated it was working military ATC. I attempted a blind call to the aircraft, without response. The ATSA immediately call military ATC who confirmed they were working the aircraft, believed to be at altitude 4200ft. Military ATC were informed that the aircraft was inside the Cardiff CTA. Military ATC offered the aircraft to Cardiff and this was declined, instead military ATC were asked to leave CAS as soon as possible. The military ATC Supervisor in a later conversation stated that on their radar, the contact was tracking along the boundary and then below the CAS stub south of EXMOR.☐ Supplementary 28/04/15:☐ Whilst PA32 was receiving a service from military ATC Radar it infringed Cardiff controlled airspace. However according to the military ATC controller the aircraft was outside controlled airspace.
201505121	17/04/2015	EGTT : London (FIR)	EGSH (NW!): Norwich		D	CTA	CESSNA	Reciprocating	1	Infringement of the Norwich CTA (Class D) by a C150 squawking 7000 at 2700ft. Traffic info and avoiding action given. Standard separation maintained.	A SSR code 7000 NMC was seen approaching the western edge of the Norwich Class D CTA. Aircraft did not call and was assumed to be outside of the confines of the Class D airspace. A second aircraft was inbound to Norwich for radar NDB to RW09 under a DS outside of CAS and RC inside. TI on the unknown traffic was passed and the course adjusted to ensure it did not overfly the unknown aircraft by adjusting the course 20 degrees to the left from a Hdg of 180 degrees. At approx 1616 UTC C150 a C150 called on 119.350 MHz and from the information passed and the DF trace it was obvious this was the unknown traffic, it reported level at 2700ft, and was approx 1.5NM inside the western edge of the Norwich CTA. The aircraft was instructed to descend to 1500ft and turn onto north. Avoiding action turn left to 120degrees was given to the second aircraft with further TI. After the CPA the second aircraft was turned right to 130 degrees and intercepted the FAP track for the RW 09 NDB and was transferred to ADI. After i worked some other traffic C150 was given permission to resume own navigation and informed of the incident. The pilot of C150 contracted me after landing and was very apologetic, he did not have GPS and assumed he had made a mistake with his position as he thought he was just outside the confines of the Class D airspace, he had been about to call. I explained the situation to him he was aware of his error and apologised. I explained I would be filing as I had been required to issue avoiding action to a Public Transport IFR flight. I offered advice that an early call to Norwich APS 10 miles earlier would have allowed all parties to continue with their respective tracks without incident and suitably separated. I also advised early calls to ATC in all instances

201505121	17/04/2015	EGTT : London (FIR)	EGSH (NW!): Norwich		D	CTA	UNKNOWN	Unknown		Infringement of the Norwich CTA (Class D) by a C150 squawking 7000 at 2700ft. Traffic info and avoiding action given. Standard separation maintained.	A SSR code 7000 NMC was seen approaching the western edge of the Norwich Class D CTA. Aircraft did not call and was assumed to be outside of the confines of the Class D airspace. A second aircraft was inbound to Norwich for radar NDB to RW09 under a DS outside of CAS and RC inside. I also advised early calls to ATC in all instances
201505123	22/04/2015	EGTT : London (FIR)	SAM	Bearing 160 Range 8nm	D	CTA	PIPER	Reciprocating	1	Infringement of the Southampton CTA (Class D) by a PA32 squawking 7000 at 2500ft. Standard separation maintained.	At 1638z I was alerted by the AIW to an aircraft at 2.5A area CTA6 tracking North squawking 7000. I put out a general call and received no response. Mode S was set and when called by his callsign the pilot responded. The aircraft climbed from 2.5A to 3.0A and reported at 3.2A in area CTA7 without having requested a transit clearance. I identified the aircraft and cleared the pilot to transit VFR. The pilot informed me he was aware the base of CAS was 3.0A when he had reported at 3.2A. Solent had been pre-noted the aircrafts details. ☐ Supplementary 30/4/15:☐ Called solent radar on freq, 120-225 immediately upon departure LOS in the climb stating; callsign, level passing, squawk 7000 requesting zone transit for NQY, with no reply at first. After repeating call, I received a broken reply which I mistakenly assumed was my clearance. Shortly after this I received a broken transmission from the controller asking if I was aware that I had entered controlled airspace, to which I answered YES. She also informed me that my readability was 1.It was at this point that I realised I had comms problems and had climbed into controlled airspace without clearance to do so. This threw me into a some confusion (as a single pilot at the time) as my transmissions were clearly poor unreadable. I engaged the auto-pilot with alt hold and changed headsets. This seemed to solved the problem as my readability improved to 5. I was then cleared through the zone enroute.
201505135	22/04/2015	EGTN : London (FIR)	EGCN : DONCASTER SHEFFIELD		D	CTA	PIPER	Reciprocating	1	Infringement of the Doncaster CTA (Class D) by a PA28 squawking 7000 at 3000ft. Standard separation maintained.	7000 squawk observed routing northwestbound climbing. Aircraft climbed through 2.6A, infringing CAS base 2.A. Aircraft changed squawk to 4530. I contacted Linton and the aircraft was identified. CAVOK RWY20.
201505190	23/04/2015	EGTT : London (FIR)	LBA	14.9nm S	A	TMA	PIPER	Reciprocating	1	Possible infringement of the Manchester TMA (Class A) by an unknown aircraft squawking 7000 at 3600ft. Aircraft identified as a PA28. Traffic info and avoiding action given.	B777 avoiding action against unknown traffic. B777, descending FL100, enroute to BURNI, when unidentified 7000 squawk (PA28) activated CAIT at 3.6A. B777 given avoiding action, left heading 260 degrees, with traffic information. This heading was subsequently amended to 230 degrees to prevent the blips from merging.
201505190	23/04/2015	EGTT : London (FIR)	LBA	14.9nm S	A	TMA	BOEING	Turbofan	2	Possible infringement of the Manchester TMA (Class A) by an unknown aircraft squawking 7000 at 3600ft. Aircraft identified as a PA28. Traffic info and avoiding action given.	B777 avoiding action against unknown traffic. B777, descending FL100, enroute to BURNI, when unidentified 7000 squawk (PA28) activated CAIT at 3.6A. B777 given avoiding action, left heading 260 degrees, with traffic information. This heading was subsequently amended to 230 degrees to prevent the blips from merging.

201505343	25/04/2015	EGTT : London (FIR)	EGTF : Fairoaks	N	D	CTR	CESSNA	Turbofan	1	Infringement of the Heathrow CTR (Class D) by a C560 at 2400ft.	I was training a student SVFR band boxed when we received a call from Farnborough, this led me to look towards Farnborough and I noticed an infringing aircraft over Fairoaks going north at 2.4A. The priority line from Farnborough then went off, I cancelled it because my priority was to phone Heathrow tower to stop departures. Heathrow tower informed me that they had a MID rolling and they would suspend departures after it was airborne. I then used the priority line to TC south to inform them of the infringing aircraft. I am not aware if there was a loss of separation as I was not in control of any of the aircraft involved.☐ CAA Closure:☐ No action taken. Closed due elapsed time. Situation will be monitored.
201505356	22/04/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	5nm W	D	CTA	PIPER	Reciprocating	1	Infringement of the Stansted CTA (Class D) by an unknown aircraft at 2000ft, resulting in loss of separation with inbound traffic. Aircraft believed to be a PA28. Traffic info given.	Infringement of Stansted CTZ. An unknown contact entered the Stansted CTZ at 2A and tracked SSW until descending beneath the southern CTA and entering the circuit at north weald. Traffic was passed to an inbound on 04 although the infringer was passing well behind. Traffic was also passed to a VFR a/c on a basic service who advised that they were visual. The infringer was written down as a PA28 as identified on Mode S, however this was noted after the event and needs to be verified.☐ Supplementary 13/07/15:☐ INT controller detected the confliction at the point of PA28 infringement, however there was no requirement for the controller to detect the potential confliction before PA28 entered the Stansted CTR and therefore the controller was not required to formulate or execute a plan. The loss of separation was caused when PA28 infringed the Stansted CTR, placing the aircraft into confliction with inbound traffic. The loss of separation between PA28 and inbound traffic was resolved by the relative position and track of the aircraft, following the decision by INT controller to continue the approach of the inbound traffic.☐ CAA Closure:☐ Pilot error. Situational Awareness. Failed on-line test, retraining letter sent.
201505356	22/04/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	5nm W	D	CTA	UNKNOWN	Unknown		Infringement of the Stansted CTA (Class D) by an unknown aircraft at 2000ft, resulting in loss of separation with inbound traffic. Aircraft believed to be a PA28. Traffic info given.	Infringement of Stansted CTZ. An unknown contact entered the Stansted CTZ at 2A and tracked SSW until descending beneath the southern CTA and entering the circuit at north weald. 201505480	28/04/2015	EGTT : London (FIR)	Burnham		D	CTR	CESSNA	Reciprocating	1	Infringement of the London CTR (Class D) by an unknown aircraft showing as a primary contact only at 2000ft, resulting in loss of separation with outbound traffic. Aircraft identified as a C172. CAIT activated. Traffic info given.	Infringement on Heathrow northerly departure route. At 11:40 whilst on NE Deps. A possible infringer was pointed out to us on north in the BUR area. 2 departures were airborne before it was confirmed and it was at that time that A320 called on to my frequency just about a mile and a half to the north of the infringer with the gap increasing. There was nothing I could have done to improve the situation but I did turn the A/C earlier in the direction of BPK. The infringer never showed itself in the magenta colour on our radars which slowed the identification process.☐ Supplementary 29/04/15:☐ Primary CAIT infringer in the London CTR. I was the SVFR controller on duty. The sector was split from Thames. At 1139, I noticed a primary CAIT return enter the zone, west of Denham, tracking southbound. It wasn't going 'with the wind', so I informed GS Air and initially stopped north bounds and CPTs. The return then disappeared and I restarted departures. The tower had cleared a subsequent BPK for departure, and then the primary reappeared on RADAR. I rang the tower back and stopped all departures again. I then rang TMA north and told them about the infringer, which affected their departure. The infringer then tracked down towards Burnham and Ascot, before turning south-west towards Farnborough. Just before it reached the zone boundary, it wore a Farnborough squawk 0432. It left the zone south of White Waltham and departures were restarted at 1151. The aircraft was identified with Farnborough as a C172. ☐ Supplementary 30/04/15:☐
201505480	28/04/2015	EGTT : London (FIR)	Burnham		D	CTR	BOEING	Turbofan	4	Infringement of the London CTR (Class D) by an unknown aircraft showing as a primary contact only at 2000ft, resulting in loss of separation with outbound traffic. Aircraft identified as a C172. CAIT activated. Traffic info given.	Infringement on Heathrow northerly departure route. At 11:40 whilst on NE Deps. 201505490	28/04/2015	EGTT : London (FIR)	DTY	5nm NE	A	TMA	PIPER	Reciprocating	1	Possible infringement of the LTMA (Class A) by an unknown aircraft squawking 7000 at 5600ft. CAIT activated. Standard separation maintained.	CAS Infringement around DTY. I was coordinator on TC Midlands when an infringing aircraft was observed approximately 5 miles to the NE of DTY VOR above the 5500ft base. The CAIT alert indicated the infringer was aircraft PA28 and on a 7000 squawk. The radar controller commenced appropriate instructions for separation standards and I informed the GS. After attempting to locate the infringer we eventually found the aircraft was talking to Turweston Tower. The pilot was advised to remain below 4000ft to ensure they remained clear of CAS.
201505519	28/04/2015	EGTT : London (FIR)	BZN	Bearing 075 Range 9.9nm	D	CTR	PIPER	Reciprocating	1	Infringement of the Brize Norton CTR (Class D) by a PA28 squawking 4520 at 2500ft.	Oxford reported a PA28 entering Brize CTR at BZN 075 9.9nm. The aircraft was on Oxford's frequency and cleared the CTR to the North after clearing Oxford's area the aircraft called Brize LARS. The aircraft was en route There was no Brize traffic to effect.
201505527	21/04/2015	EGTT : London (FIR)	EGVP : Middle wallop		G	ATZ	ROBINSON	Reciprocating	1	Aircraft departed a private landing strip inside Wallop ATZ without clearance.	Aircraft departed a private landing strip inside Wallop ATZ without clearance. I was the AOC at the time of the Incident, Boscombe Approach rang to say R44 had called them airborne from a private site within the Wallop. The aircraft was obscured visually by Danebury Hill but, was displayed on the ATM. The aircraft then appeared from behind Danebury Hill. Boscombe asked if Wallop Tower wished to control the aircraft, as there was no traffic to affect and the aircraft would shortly be outside the ATZ. I said no. Boscombe were unsure of the departure or destination airfield. I asked Boscombe to check whether the pilot was aware he should have called 118.6 prior to departure, he apologised.
201505529	22/04/2015	EGTT : London (FIR)	EGVP : Middle wallop		G	ATZ	PIPER	Reciprocating	1	Infringement of the Middle Wallop ATZ (Class G) by a PA28 squawking 3663 at 1500ft. Traffic info given.	I was the ADC at the time of the incident. There was a military helicopter carrying out local training to the south of the main runway. I noticed a 3663 squawk on the tower ATM. This squawk appeared to be tracking from the South West towards our overhead. As the contact approached the ATZ boundary it was indicating a height of 1500ft. As it appeared to enter the ATZ I passed traffic information to the helicopter who was positioned on the ground at that time. I was then able to see the aircraft as it entered the ATZ. It proceeded to transit the ATZ at approximately 1500ft, south west to south east, through the Southern half of the ATZ. My colleague in the control tower contact Solent Radar to request the aircraft be given instructions to leave the ATZ by the quickest possible means. Solent confirmed that the pilot was a student who had got lost and gave the registration and type.
201505529	22/04/2015	EGTT : London (FIR)	EGVP : Middle wallop		G	ATZ	UNKNOWN	Unknown		Infringement of the Middle Wallop ATZ (Class G) by a PA28 squawking 3663 at 1500ft. Traffic info given.	I was the ADC at the time of the incident. There was a military helicopter carrying out local training to the south of the main runway. I noticed a 3663 squawk on the tower ATM. This squawk appeared to be tracking from the South West towards our overhead. As the contact approached the ATZ boundary it was indicating a height of 1500ft. My colleague in the control tower contact Solent Radar to request the aircraft be given instructions to leave the ATZ by the quickest possible means. Solent confirmed that the pilot was a student who had got lost and gave the registration and type.

201505562	29/04/2015	EGTT : London (FIR)	EGGP (LPL): Liverpool	1nm Burtonwood	D	CTR	BELLANCA	Reciprocating	1	Infringement of the Liverpool CTR (Class D) by a CH7B squawking 7000 at 1500ft. Standard separation maintained.	7000 squawk observed infringing CAS 1 mile North of Burtonwood heading North West with no altitude information. Identified as a CH7B. On an air test via a blind transmission of aircraft squawking 7000 near Burtonwood are you on frequency?. Pilot informed that he had mistakenly entered CAS. I issued a squawk of 4361 and asked if he was requesting to enter CAS. He informed me not yet and I provided him with a position report and that he had entered CAS and to route outside to report when ready for rejoin. No traffic affected
201505595	27/04/2015	EGTT : London (FIR)	BIG	Bearing 090 Range 10nm	A	TMA	OTHER	Reciprocating	1	Infringement of the London TMA (Class A) by an aircraft squawking 4575 indicating up to 2800ft. Standard separation maintained.	Aircraft entered the LTMA around Wrotham Mast east of Biggin-Hill indicating up to 2800ft. The aircraft was displaying the Southend conspicuity squawk of 4575. Southend was called and advised the pilot to descend, which he did. There was no aircraft in the vicinity to affect.
201505638	30/04/2015	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD	South West portion	D	CTR	CESSNA	Reciprocating	1	Infringement of the Doncaster CTR (Class D) by a C152 squawking 7000. Standard separation maintained.	7000 squawk observed infringing southwest portion of EGCN CTR before turning towards and landing at their destination. Pilot range and apologised, saying he was avoiding a rain shower.
201505663	01/05/2015	EGTT : London (FIR)	Danger Area EG D123	South of Keevil	G	Danger area	PIPER	Reciprocating	1	Infringement of active Danger Area D123 (Salisbury) by a PA28 squawking 5062 at approx 3000ft.	Aircraft was given a traffic service at 13:06, and was informed that D123 was active to 17,000ft. At approximately 13:15 just as I completed a pre-note to Cardiff, I observed aircraft enter D123. I immediately informed them that they were inside an active danger area and that they should immediately turn north to exit. My colleague (CP) on Radar1 attempted to call Salisbury Ops however they were calling us at the same time. Aircraft details were passed to Salisbury Ops and the aircraft was informed that they could expect paperwork.☐ Supplementary 05/05/15:☐ As the duty Air Ops Officer, at approx 1415 local I noticed that a 5062 squawk appeared to be tracking towards D123 from the north. The track continued past Keevil ATZ and penetrated D123 at approximately 3000 feet. D123 was active at the time to 17,000ft AMSL with UAV flying. Recognising 5062 as a Bristol SSR code I rang Bristol ATC. I was put through to Radar 2 who were providing a service to the aircraft. The callsign was confirmed - a PA28. The controller said he had issued a warning to the pilot that the Danger Area was active and to route around. By this time, aircraft was approximately 3 - 4 miles inside the range before it turned on to a North Westerly track and departed in the Keevil area.☐ Supplementary 06/05/15:☐ Before take-off the flight student was briefed by the supervising flight instructor. Route was planned quite close to D123. Until Chippenham navigation without problems. From then on missed to change to the correct heading and wind seemed to be less then forecasted. We were expecting Trowbridge in front of us but unfortunately it was not visible. When realising
201505666	01/05/2015	EGTT : London (FIR)	Syerston				ROBINSON	Reciprocating	1	Alleged infringement of the Syerston ATZ (Class G) by a R44 at 1000ft.	A helicopter was observed transiting through the ATZ at approx 1000ft on a Southerly heading; attempts to contact the helicopter via R/T were unanswered. Waddington LARS were contacted and the helicopter was identified as a R44. Although they were talking via R/T to Waddington (XPDR 3604), they had already stated that they had attempted to contact Syerston and had received no response. Waddington informed the R44 that Syerston was active. I had been in range of the Air Ground Radio during this time and had heard no R/T calls. At the time of the incident there were no aircraft airborne; however, a crew were preparing to crew in for departure.

201505677	30/04/2015	EGTT : London (FIR)	SAM	Bearing 250 Range 11nm	D	CTA	CHAMPION	Reciprocating	1	Infringement of the Solent CTA (Class D) by an aircraft squawking 7000 at 2400ft. Traffic info given.	At approximately 1625 a 7000 squawk entered the Solent CTA-2, triggering an AIW alert. The contact showed up on Mode S. Bournemouth were contacted but were not working it, blind calls were made but another aircraft responded who was in a different geographical position. This aircraft was working Solent and was turned away from the infringer, although avoiding action was not issued. The 7000 squawk eventually descended beneath the CTA. Supplementary 07/05/15: Routing on first leg of x country trip had climbed out from EGHO and was at 1900ft on the Portland QNH. The leg took me below the Soton zone provided I was below 2000ft. I was looking out for a visual fix when I then scanned the Altimeter and saw that my Height had crept up to 2300ft and that I had entered the zone. I corrected my height immediately and continued my flight towards the IOW. I estimate that I had entered the controlled airspace for less than half a minute.
201505677	30/04/2015	EGTT : London (FIR)	SAM	Bearing 250 Range 11nm	D	CTA	UNKNOWN	Unknown		Infringement of the Solent CTA (Class D) by an aircraft squawking 7000 at 2400ft. Traffic info given.	At approximately 1625 a 7000 squawk entered the Solent CTA-2, triggering an AIW alert. The contact showed up on Mode S. Bournemouth were contacted but were not working it, blind calls were made but another aircraft responded who was in a different geographical position. This aircraft was working Solent and was turned away from the infringer, although avoiding action was not issued. The 7000 squawk eventually descended beneath the CTA. Supplementary 07/05/15: Routing on first leg of x country trip had climbed out from EGHO and was at 1900ft on the Portland QNH. The leg took me below the Soton zone provided I was below 2000ft. I was looking out for a visual fix when I then scanned the Altimeter and saw that my Height had crept up to 2300ft and that I had entered the zone. I corrected my height immediately and continued my flight towards the IOW. I estimate that I had entered the controlled airspace for less than half a minute.
201505678	01/05/2015	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	12nm SW	D	CTA	CESSNA	Reciprocating	1	Infringement of the Gatwick CTA (Class D) by an unknown aircraft squawking 7000 at 2200ft, resulting in loss of separation with an inbound A319. Aircraft identified as a C152. Traffic info and avoiding action given.	Infringement of Gatwick CTA. I was mentoring a trainee when I saw a 7000 code approaching the CTA SW boundary. My trainee was carrying out a co-ordination with INT regarding spacing when the 7000 code entered the CTA at 2200 feet into conflict with A319. I immediately instructed the A319 to stop its descent at 6000 feet and then gave a turn. I did not use avoiding action phraseology simply because it would have made no difference to the achieved separation. The A319 was repositioned towards final. The infringing aircraft eventually called Farnborough LARS and was identified with a squawk of 0442.
201505678	01/05/2015	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	12nm SW	D	CTA	AIRBUS	Turbofan	2	Infringement of the Gatwick CTA (Class D) by an unknown aircraft squawking 7000 at 2200ft, resulting in loss of separation with an inbound A319. 201505680	30/04/2015	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD	South East portion	D	CTA	CESSNA	Reciprocating	1	Infringement of the Doncaster CTA (Class D) by a C150 squawking 7000 at 2400ft. Standard separation maintained.	7000 squawk observed departing and climbing to 2400ft into CTA. When outside CAS the squawk changed to 4275. Humberside radar confirmed the aircraft identity. The pilot rang and said he was at 1900ft, below the CTA, and will get his Mode C checked.

201505700	30/04/2015	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	NW corner CTZ	D	CTR	AEROSPATIALE	Turboshaft	1	Infringement of the Heathrow CTR (Class D) by an AS350. All Northbound departures were stopped. CIAT activated.	Infringement of the Heathrow Control Zone. I was the Heathrow INT South Director at the time of the infringement. AS350 was observed on sCAIT infringing the north west corner of the Heathrow control zone. As this was in the northbound departure tracks. I immediately called the tower and instructed them to stop all northbound departures until advised. AS350 was subsequently observed to disappear low level from radar. The GS subsequently informed me they had landed at destination.☐ Appropriate CAA action being taken.
201505770	04/05/2015	EGTT : London (FIR)	Chew Valley VRP		D	CTR	EVEKTOR AEROTECHNIK	Reciprocating	1	Infringement of the Bristol CTR (Class D) by an unknown aircraft showing as a primary contact only. Aircraft identified as an EV97 at 2600ft. Standard separation maintained.	Infringement EV97. I was on duty as RAD1 when I noticed a primary radar contact approaching the CTR approximately west of Chew Valley VRP area tracking 010. I called the TWR to see if they could see anything in the area which they replied they could. I made a blind call on 125.650 to see if the aircraft was on frequency. EV97 said that he was in that area and non squawking tracking NE. I asked him what his altitude was and the response was 2600ft. I reminded him that the airspace level was 1500ft and told him he could transit not above 2000ft VFR as there was no inbound traffic to affect.
201505774	04/05/2015	EGTT : London (FIR)	Gateway Port VRP/CTR		D	CTR	OTHER	Reciprocating	1	Infringement of the Southend CTR (Class D) by an unknown aircraft showing as a primary contact only at 1500ft. Aircraft identified as a Dynamic WT9. Traffic info and avoiding action given. Standard separation maintained.	Southend CTR infringement. Unknown Primary contact observed tracking Southwest towards the CTR boundary. A blind transmission was made by Southend Radar 130.775 and Southend director when it became apparent the contact would enter the CTR. DA42 was on climb out climbing straight ahead from runway 24 to altitude 2000' requesting to route via DET altitude 3000' IFR. Vectors given to avoid the unknown contact and prescribed separation standards maintained. A mode A then Mode S return then appeared on the unknown traffic and a subsequent squawk of 1177 was observed whilst inside the CTR. London FIR South were contacted and the details were obtained, the aircraft then left the CTR in the vicinity if Sheerness VRP and LONDON FIR retained control ensuring the Aircraft did not re-enter Southend CAS without a clearance.
201505774	04/05/2015	EGTT : London (FIR)	Gateway Port VRP/CTR		D	CTR	DIAMOND	Reciprocating	2	Infringement of the Southend CTR (Class D) by an unknown aircraft showing as a primary contact only at 1500ft. Aircraft identified as a Dynamic WT9. Traffic info and avoiding action given. Standard separation maintained.	Southend CTR infringement. Unknown Primary contact observed tracking Southwest towards the CTR boundary. A blind transmission was made by Southend Radar 130.775 and Southend director when it became apparent the contact would enter the CTR. DA42 was on climb out climbing straight ahead from runway 24 to altitude 2000' requesting to route via DET altitude 3000' IFR. Vectors given to avoid the unknown contact and prescribed separation standards maintained. A mode A then Mode S return then appeared on the unknown traffic and a subsequent squawk of 1177 was observed whilst inside the CTR. London FIR South were contacted and the details were obtained, the aircraft then left the CTR in the vicinity if Sheerness VRP and LONDON FIR retained control ensuring the Aircraft did not re-enter Southend CAS without a clearance.
201505780	05/05/2015	EGTT : London (FIR)	Napps Field		D	CTA	CIRRUS	Reciprocating	1	Infringement of the Southend CTA (Class D) by an unknown aircraft squawking 7000 at 2800ft. Aircraft identified as a SR22. Standard separation maintained.	Class D CTA infringement by unknown a/c. Unknown Aircraft SR22 - Callsign ident from MODE S - Infringes Southend CAS. The aircraft enters CTA 4 via Napps Field at 2,800ft at 1350z then remaining inside CAS tracks North Eastbound and climbs to 3,100ft. Blind Transmission were made during the infringement. The Aircraft then leaves Southend CAS CTA 5 via CTA 9 at 3,000ft at 1356z. The aircraft was observed tracking westbound to the south of Stapleford ATZ before radar contact was lost.

201505792	04/05/2015	EGTT : London (FIR)	EGBJ (GLO): Gloucestershire	2km East	G	ATZ	UNKNOWN	Unknown		C150 downwind for R/W18 LH circuit reported sighting of two drones at circuit height.	At 1214Z The C150 was downwind in the runway18 left hand circuit when the instructor reported seeing two "suspicious" drones just west of GCHQ at circuit height. The pilot did not see the drones on further circuits but I informed other local traffic. The incident was reported to the police, incident number 202.

Unknown contact infringed TMZ 2 at 1315. Primary only.☐ CAA Closure:☐ Pilot error. Situational awareness. Passed on-line test. Warning letter sent.
201505870	02/05/2015	EGTT : London (FIR)	Not specified		G	Restricted area	OTHER	Reciprocating	1	Infringement of the Stansted TMZ 1 (Class G) by an unknown aircraft showing as a primary contact only. Aircraft identified as a Forney F1A.	Forney F1A infringed TMZ 1 at 1305. Initially primary only then squawking.
201505872	13/05/2015	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS		D	CTR	THRUSTER	Reciprocating	1	Infringement of the East Midlands CTR 1 (Class D) by an unknown aircraft at 1200ft. Aircraft identified as a Thruster T600. Inbound traffic was delayed until the Thruster T600 was clear of R/W27 approach path. Standard separation maintained.	I was the approach radar controller at East Midlands Airport and at 1118 I received a phone call from the tower controller pointing out a radar contact in the north east corner of the CTR1. This could not be correlated with any of my traffic. The radar contact was tracked. The radar director telephoned Nottingham airfield to see if they had any traffic departed recently southbound. They advised a Thruster T600 departed them southbound. The aircraft was still on Nottingham's frequency and at 1132 reported to them that he was north of Loughborough (which is in East Midlands CTR1, 5 miles south east of East Midlands airport) at 1200ft. At 1133 the radar contact was seen to leave CTR1 and turn south. The aircraft was asked to squawk 4560 and contact me on East Midlands radar frequency which he did at 1137 but no squawk was observed. H reported his position. At 1138 I asked his position again when he reported "15 miles from Leicester 1200ft 10 miles from Nottingham". This would put him outside controlled airspace. No further contact was made with the aircraft. Once the unknown aircraft was seen to enter CTR1 with runway 27 in use inbound ILS approaches were stopped as the aircraft was in the approach area for this runway. Two inbound aircraft, a DHC8 and an ATR42 were given delaying vectors for about 10 mins and a Boeing 737 and a business jet were put in hold for about 10 mins until the infringer was clear of the approach path. This frequency was already busy with ATC services to aircraft outside controlled airspace as well as inbound IFR traffic. Later the Thruster T600 was found to have landed at intended destination and was asked to phone East Midlands Air Traffic but failed to do so. There was no Airprox and standard separation was maintained. ☐
201505908	22/03/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	Bearing 075 Range 9nm			CESSNA	Reciprocating	1	Infringement of the Stansted TMZ1 (Class G) by a C170, initially with no Mode C, indicating 1100ft.	0013 in TMZ 1 with no Mode C, within a short time Mode C indicated 1100ft. This contact was identified using Mode S.
201505914	04/05/2015	EGTT : London (FIR)	Warrington		D	CTR	JODEL	Reciprocating	1	Infringement of the Manchester CTR (Class D) by a Jodel D117 at 1800ft. Standard separation maintained.	Infringement - Jodel D117 4nm North of Warrington. FPS already in display when I took control of the sector. A/c on 7366 squawk. Called aircraft several times but no reaction. When I mentioned that an aircraft was showing 1800ft in the LLR the 7366 immediately began to descend. Pilot eventually called. I identified the aircraft(7350 squawk) and told him about the infringement and asked him to call the Manchester WM on arrival at destination. No separation issues.

201505917	04/05/2015	EGTT : London (FIR)	Leigh		D	CTA	PIPER	Reciprocating	1	Infringement of the Manchester CTA (Class D) by a PA28 at 2200ft.	Infringement at Leigh. PA28 2200ft (and then climbed to 2700ft(??) as it approached Manchester Barton. I rang Barton and asked them to tell the pilot to contact the Manchester WM when on the ground.
201505985	02/05/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	8nm SE	D	CTA	PIPER	Reciprocating	1	Infringement of the Stansted CTA (Class D) by an unknown aircraft squawking 7000 at 2200ft. Aircraft identified as a PA28.	Infringement PA28. A7000 indicating altitude 2200ft entered Stansted CAS. The contact was 3nm SE of Stansted tracking Southeast. The contact climbed to 2400ft inside CAS before leaving CAS. The contact was identified using mode S.
201506019	07/05/2015	EGTT : London (FIR)	Romsey VRP		D	CTR	VANS	Reciprocating	1	Infringement of the Southampton CTR (Class D) by a RV8 squawking 2605 at 2000ft. Traffic info given. Standard separation maintained.	At approximately 1124 a 2650 squawk was observed tracking eastbound towards the Southampton CTR near Romsey VRP. Boscombe were contacted but were no longer working the aircraft and could not provide a callsign. Blind calls were made with no response. One aircraft was on final approach to Southampton at the time but was allowed to continue as this was deemed safer than breaking it off the approach. The 2650 squawk briefly infringed the CTR before turning NW and exiting the zone. Boscombe telephoned later to say that they believed the aircraft had been an RV8.
201506019	07/05/2015	EGTT : London (FIR)	Romsey VRP		D	CTR	UNKNOWN	Unknown		Infringement of the Southampton CTR (Class D) by a RV8 squawking 2605 at 2000ft. Traffic info given. Standard separation maintained.	At approximately 1124 a 2650 squawk was observed tracking eastbound towards the Southampton CTR near Romsey VRP. Boscombe were contacted but were no longer working the aircraft and could not provide a callsign. Blind calls were made with no response. One aircraft was on final approach to Southampton at the time but was allowed to continue as this was deemed safer than breaking it off the approach. The 2650 squawk briefly infringed the CTR before turning NW and exiting the zone. Boscombe telephoned later to say that they believed the aircraft had been an RV8.
201506071	07/05/2015	EGTT : London (FIR)	EGNR : Hawarden		G	ATZ	BELL	Turboshaft	1	Infringement of the Hawarden ATZ (Class G) by an unknown aircraft squawking 1177 at 700ft. Aircraft identified as a B206.	ATZ Infringement B206. I was on duty as the ADI controller at Hawarden. At 0945 I observed via the ATM a 1177 squawk approaching and then entering the ATZ with mode C indicating 700ft. The aircraft was then spotted from the control tower. I made blind calls to the aircraft but got no response. As the aircraft descended into its heliport destination I lost visual reference with it and subsequently an EMB145 departure runway 04 was delayed. The ATSA spoke to the Heliport who informed us that a callsign had just landed but gave no further details. At 0951 the aircraft was observed leaving, it was still showing a 1177 squawk. The APS controller rang London information and asked the aircraft to call him. The pilot contacted Hawarden radar, he was aware that he should have made contact with Hawarden radar and was extremely apologetic. The pilot was advised of the correct procedures for his next flight.

201506167	10/05/2015	EGTT : London (FIR)	EGGW (LTN): London/Luton	5nm SW	D	CTR	EVEKTOR AEROTECHNIK	Reciprocating	1	Infringement of the Luton CTR (Class D) by an unknown aircraft squawking 7000, indicating 2400, resulting in loss of separation with an outbound A300. Aircraft identified as an EV97.	Infringement of Luton CTR. I observed a 7000 squawk indicating 2400' entering the Luton CTR at the SW corner. The contact was on a North Easterly track. It initially looked as if a turn away to the SE was being made but when it became apparent that this was not the case I telephoned Luton TWR and stopped departures. A300 on a DVR departure was already airborne and was shortly to be transferred to the departure frequency. The one inbound aircraft was retained on frequency until it became clear no further threat was posed before transferring to the TWR for a normal landing. Within a couple of minutes or so the infringing contact turned away to the NW and slowly headed out of the CTR. I made a call to the London Gliding Club but they were unable to see the contact despite it being within approx. 2nm of them. I later learned that the aircraft was subsequently identified after landing at destination as an EV97. □ Supplementary 15/05/15:□ Infringer in vicinity of Luton. While working as NE Deps. A300 got airborne on a DET departure. An aircraft believed to be EV97 was in the area originally garbling with another outbound. I did not notice this and took no action. Minimum separation was 2.8nm and 3200 ft. Luton app had spotted this traffic and informed the tower but no one told me.□ CAA Closure:□ Pilot error. Situational awareness. Failed on-line test, retraining required.

201506351	13/05/2015	EGTT : London (FIR)	SAM	11nm SSW	D	CTA	DE HAVILLAND	Reciprocating	1	Infringement of the Solent CTA 2 (Class D) by a DHC1, resulting in possible loss of separation with an inbound DHC8.	Infringement of Solent CTA-2 by DHC1 with possible loss of separation with DHC8. During a very busy session I called a free caller, DHC1 back for his details, he reported that he was a Chipmunk aircraft routing via Lee on Solent and then announced that he was 3000 feet. There was a primary only contact in that area which previously I had assumed to be underneath the base of controlled airspace (below 2000ft). I informed the pilot that if he was at the position at that level he was actually inside of controlled airspace without a clearance. I issued a VFR clearance below 3000ft. The pilot replied that he hadn't been able to get a word in on the frequency as it was so busy. I asked him to report abeam of Calshot. At 1125 I received a south of Calshot at 2200ft. Before the pilot left the frequency I reiterated that the base of controlled airspace between Stoney Cross area and Calshot is 2000ft and the importance of receiving a clearance prior to entering. The pilot said again that the frequency was too busy to get a word in and so he just came through. I'm unsure as to whether I had a loss of separation at any point prior to establishing contact with DHC1 with inbound DHC8 which was vectored downwind left hand runway 20 from the south, descending to 4000ft.☐ Appropriate CAA action is to be taken as a result of this incident.

Subsequently went on to MC Squawk 5061 but we do not have a direct line from airfield Fin Position, so got GS Air to ring and get the details.☐ CAA Closure:☐ Pilot error. Situational awareness. Failed on-line test, retraining required.

201506356	13/05/2015	EGTT : London (FIR)	EGCB : Manchester/Barton		D	CTR	MAULE	Reciprocating	1	Infringement of the Manchester CTR (Class D) by a Maule M5 in climb to 2700ft. AIW activated. Standard separation maintained.	Maule M5 infringement. At time 1314z the AIW alerted in the Barton overhead. I contacted Barton who said they would ask the pilot to descend. The a/c continued to climb to 2.7A. The a/c left the Barton flying area and tracked east bound. North also called to find out who was working the a/c.
201506468	13/05/2015	EGTT : London (FIR)	EGCF : Sandtoft	2nm South	D	CTR	PIPER	Reciprocating	1	Infringement of the Doncaster CTR (Class D) by a PA28 squawking 7000 indicating 1500ft. Standard separation maintained.	A 7000 squawk was observed entering Doncaster controlled airspace to the south of Sandtoft Aerodrome and tracking south at an indicated altitude of 1500ft. The aircraft subsequently contacted Doncaster Radar on 126.225 and was identified on a squawk of 6161 3nm east of Doncaster Airport. The pilot was informed that he had entered controlled airspace without a clearance but was allowed to continue southbound maintaining VFR not above altitude 1500ft. Gamston aerodrome was contacted to request the pilot to telephone Doncaster Radar after he had landed.
201506477	13/05/2015	EGTT : London (FIR)	EG D201	Aberporth	G	Danger area	CESSNA	Reciprocating	1	Infringement of active Danger Area EG D201 (Aberporth) by an unknown aircraft squawking 2575 at 1600ft. Aircraft identified as a C152. Traffic info given.	Danger Area Infringement. I was conducting an air to surface sortie within EGD201 as RAC1. I was being supported by RAC2. Radar 1 was conducting a RPAS sortie within EGD202. There was a ship 7200 squawk operating within the Western side of D201. At time 1136 I became aware of a 2575 squawk, Indicating altitude 1600 feet tracking North Easterly towards the warship. Believing it to possibly be a helicopter inbound to the ship I asked RAD1 to contact Shannon to see if they were working the aircraft. Multiple calls were made to Shannon, London FIR and Dublin to identify the aircraft. These calls were carried out by RAD1, RAC2 and the ATSA 4 who was also present in the ops room. Marine control were asked to contact the ship, who advised that the aircraft was not related to them. The aircraft infringed at 1141, at VATRY tracking North easterly. The trial was at minus 1 min from weapon release. I terminated the run and advised the 2 military aircraft that the range had been infringed and would be foul for the next 10 minutes. I instructed the aircrew to climb to endure. Dublin advised that the aircraft was a Cessna 152 and had worked Shannon. Shannon had been passed the Aberporth FIS 119.650 frequency by London Info, but EINN had been unable to pass the frequency before they lost two way comms. I asked the aircrew of the military aircraft to try to contact C152 on guard frequency, which they did with no success. Radar 1 made blind calls on 119.650 and eventually became two way with C152 when he was mid way through the range. C152 was identified and instructed to leave the range to the NE. At 1156 C152 vacated the range and I continued with the sortie. The infringement created a 15 minute delay to the trial. At no time was safety impacted as the
201506570	15/05/2015	EGTT : London (FIR)	Mayfield	North	D	CTA	CESSNA	Reciprocating	1	Infringement of the Gatwick CTA (Class D) by a C152 squawking 3767 indicating 1900ft. CAIT activated. All right hand turns out of Gatwick suspended.	Whilst on duty as the Gatwick INT director I was alerted by CAIT to an infringer north of Mayfield VOR. The traffic was on a 3767 squawk so immediately phoned Redhill tower to enquire as to whether the traffic they may be working was still working their frequency. I suspended all right turn out departures from Gatwick whilst I worked to identify the unknown aircraft. The traffic was indicating 1900ft 3 to 4nm north of Mayfield manoeuvring but predominantly n a westerly track. I asked Redhill tower to ask them to call me on 126.825. When they came on frequency I gave them a Gatwick squawk of 3750 and asked for all their details which was a round robin navigation flight. Once identified and verified they were given a basic service and told to remain outside controlled airspace and asked to report leaving the frequency. I did advice them that they had entered controlled airspace north of Mayfield.☐ Supplementary 22/05/2015:☐ I am sorry to report that I misidentified the lake south of East Grinstead as Bewl Water and failed to double check my bearing before turning towards it. The reasons were a) over-familiarity with the route and b) a distracting student, neither of which are sufficient and I can only apologise for my error and make sure it doesn't happen again.☐ CAA Closure:☐ Pilot error. Situational awareness. Passed on-line test, warning letter sent.
201506585	15/05/2015	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	9nm E	D	CTA	BELL	Turboshaft	1	Infringement of the East Midlands CTA 2 by an unknown aircraft squawking 7000, indicating 1900ft. Aircraft identified as a B206. Traffic info given.	Infringement of East Midlands Controlled Airspace by B206. An unknown aircraft squawking 7000 was observed approaching the eastern control area (CTA 2) where the base is 1500ft. At the time there was a busy sequence of arrivals with a DH8D routing downwind right hand over Beeston. The 7000 was northbound indicating 1900ft. A blind transmission to the unknown aircraft in the vicinity of Melton Mowbray was made but no response was received. DHC8 was informed of a possible zone infringement. The aircraft was vectored onto a slightly tighter than normal final approach to maintain at least 5nms separation from the unknown aircraft. The 7000 squawk was continually observed and was seen crossing the southern edge of the control area at 1800ft. The aircraft subsequently descended another 100ft and transited through the control area at 1700ft. Subsequent arriving aircraft in the sequence were not affected by the unknown aircraft. The unknown aircraft was monitored as it continued northbound eventually leaving the control area in the vicinity of Nottingham Tollerton Airfield. The aircraft subsequently called Doncaster ATC and, following co-ordination with them, it was confirmed that the aircraft was B206.☐ Supplementary 08/06/2015: Appropriate CAA action is being taken as a result of this incident.

201506590	13/05/2015	EGTT : London (FIR)	EGGW (LTN): London/Luton	10nm South East	A	TMA	FLY BUY ULTRALIGHTS	Reciprocating	1	Infringement of the London TMA (Class A) by an aircraft squawking 7000 at 2900ft, resulting in loss of separation. Aircraft identified as an Ikarus C42 microlight. CAIT activated. Traffic info and avoiding action given. Check all imposed on outbounds.	I observed a A7000 squawk climbing into the LTMA approximately 8nms NE of Elstree on a northeasterly track. Mode S indicated the callsign. I made blind transmissions as did my colleague on TC Essex but with no response. Maximum altitude indicated 2,900 at which point the aircraft appeared to start a slow descent. I placed a Check All restriction on Luton outbounds and my colleague on Essex started vectoring inbounds to runway 04 at Stansted away from the infringing aircraft. The contact then appeared to descent back to 2400 ft at which point both sectors started to resume normal ops. I released an aircraft on a MATCH departure but shortly afterwards the infringer was observed to climb again into the LTMA abeam Welwyn Garden City. I issued avoiding action to my outbound aircraft and I heard Essex initiate vectoring to avoid the track again. Aircraft eventually selected a Farnborough North squawk and was observed to descend beneath CAS on track toward Duxford. Subsequent investigation revealed that the pilot was on his qualifying cross-country flight. I spoke with the pilot's instructor, who explained that he had spoken to the pilot already who had described mis-reading the altimeter. I confirmed that his track to Duxford appeared to be good and his instructor was confident in authorising the student to complete the flight back. The student pilot then called me and without elaborating on the earlier incident I checked he was comfortable with the base of CAS and suggested he work Farnborough LARS throughout his return leg.☐ Supplementary 14/07/15:☐ The loss of separation was caused when the student pilot of Ikarus C42 microlight misread

201506595	11/05/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	Bearing 090 Range 12nm	D	CTA	PIPER	Reciprocating	1	Infringement of the Stansted CTA (Class D) by a PA28 squawking 7000 indicating 2200ft. Standard separation maintained.	CAIT activated by A7000 indicating C2200 ft. The contact was in CAS briefly as it turned NE. The contact was identified using Mode S, further details were given by Wattisham approach after the contact was seen with A4504.

201506633	16/05/2015	EGTT : London (FIR)	SAM	Bearing 192 Range 24nm	A	Airway - ATS Route	PIPER	Reciprocating	1	Infringement of Airway Q41 by a PA28 squawking 3675 at FL63. Traffic info and avoiding action given. Standard separation maintained.	I was operating as the Solent ATCO bandboxed, medium traffic. I observed a FIS squawk tracking west at F063 toward the boundary of Q41. An IFR inbound to Bournemouth was given avoiding action and traffic information, but the contact turned away from the airway approximately 1nm prior to entering it, and normal vectoring was resumed although I continued to watch the contact. I had already telephoned London FIS advising them that the contact was in close proximity to Q41. Shortly afterwards the aircraft again turned towards the airway and this time it infringed. Avoiding action was issued to fltnum2AT but I believe separation was maintained as the aircraft had already passed abeam each other. I telephoned London FIS and asked for the aircraft to be transferred to me. Aircraft called and was identified, advised of his infringement and given instructions to leave the airway by turning to the SE. The pilot stated that his route was KATHY-ORTAC at FL60. This route infringes Q41. I advised that KATHY-ORIST would be a more suitable route as it is wholly outside CAS at FL60. As the aircraft was now off its planned route I arranged for Jersey Control to provide further navigational assistance to the pilot and transferred the aircraft to them. □ Supplementary 18/05/15: □ Planned route (via ORTAC) took me into Q41 airspace. During flight planning I misread Q41 base level restriction as 35 thousand feet rather than 35 hundred feet. London Info instructed frequency change to Solent radar, who then gave vectors to clear area Q41. Now understood to have infringed by about 1 nm. When clear of Q41 I resumed course, crossing
201506633	16/05/2015	EGTT : London (FIR)	SAM	Bearing 192 Range 24nm	A	Airway - ATS Route	UNKNOWN	Unknown		Infringement of Airway Q41 by a PA28 squawking 3675 at FL63. 201506642	17/05/2015	EGTT : London (FIR)	EGHI (SOU): Southampton	17nm S	D	CTA	OTHER	Reciprocating	1	Infringement of the Solent CTA 2 and possibly the CTA 9 (Class D) by an unknown aircraft indicating 3400ft. Aircraft identified as a Dynamic WT9. AIW activated. Traffic info and avoiding action given.	Infringement of Solent CTA 2 and likely infringement of CTA 9 by a Dynamic WT9. At approximately 0920z I was operating as Solent radar with a trainee. We had recently taken over the position and had a Trislander inbound IFR from the south abeam THRED for V/D02 at FL50. I noticed a FIS squawk approximately 10 S of BIA eastbound indicating Alt3.4A and realised it potentially could become an infringer if it climbed slightly or indeed continued on that track entering CTA 2. The trainee phoned London FIS twice holding on for 8-10 rings each time with no reply. We then asked another ATCO to phone London FIS to hang on until they answered. I took the frequency temporarily to make some blind calls but no reply. The unknown was now approaching the Needles still eastbound indicating Alt3.4A and then Alt3.5A. An avoiding action turn of 295 was issued to Trislander by the trainee as a precaution and as this transmission was completed AIW began alarming. The other ATCO had asked for Dynamic WT9 to be transferred to Solent and after a further blind call contact was established and the aircraft reported at Alt 3.4A but on a QNH of 1024, I believe. A transit clearance was then issued not above Alt4A VFR on Solent QNH 1027 as the aircraft was in CTA 2. The aircraft left to the East and was transferred to London FIS East at 0933. I believe separation of greater than 5 nm was maintained against the Trislander throughout.

A transit clearance was then issued not above Alt4A VFR on Solent QNH 1027 as the aircraft was in CTA 2. The aircraft left to the East and was transferred to London FIS East at 0933. I believe separation of greater than 5 nm was maintained against the Trislander throughout.
201506664	17/05/2015	EGTT : London (FIR)	Sevenoaks		A	TMA	CIRRUS	Reciprocating	1	Infringement of the LTMA (Class A) by a SR20 climbing to 2800ft, resulting in loss of separation with an inbound B737. STCA and CAIT activated.	Airspace infringement. SR20 on squawk 4575 observed tracking south at 2600 feet activated CAIT in vicinity of Sevenoaks and subsequently climbed to 2800feet - B737 was positioning on left base leg for Runway26L and was turned away from SR20 to establish on localiser - Southend Radar were contacted on different console and SR20 was instructed to leave CAS - B737 landed without further incident. □ Supplementary:26/05/2015. □ I was flying on my planned track towards SFD, and my intended altitude of 2300ft, having engaged the autopilot. Not long before the stated incident I disengaged the autopilot for hand flying. I kept my attention to my heading, which I confirmed with the PFD and the GPS track. When I got aware to the fact that I had climbed to over 2700ft, I immediately initiated my decent back to 2300ft. The autopilot had put the plane into a trim, causing the plane to climb, once AP was disengaged. I trimmed the plane for straight and level flight, while at 2300ft and continued on my route.To prevent this from happening in the future, I will check and adjust the trim more thoroughly, when disengaging the AP and monitor my instruments more frequently. Additionally I might leave a bigger buffer zone between the aircraft and controlled airspace.

201506664	17/05/2015	EGTT : London (FIR)	Sevenoaks		A	TMA	BOEING	Turbofan	2	Infringement of the LTMA (Class A) by a SR20 climbing to 2800ft, resulting in loss of separation with an inbound B737. No separation lost and rang PA28's intended destination and got the details.
201506674	17/05/2015	EGTT : London (FIR)	EGHI (SOU): Southampton	6nm South East	D	CTR	ROBINSON	Reciprocating	1	Infringement of the Solent CTR (Class D) by a R66 squawking 3673.	At approx. 1550 I received a call from the aircraft getting airborne from a private site. I gathered the aircraft details and issued #3673 Basic Service QNH1023. I further ascertained that the private site was within the Solent CTR in the vicinity of the River Hamble. I issued clearance not above 2000 altitude VFR and observed an intermittent contact to the South East of EGHl by approx. 6 miles. After some time I managed to convince the pilot to route east to leave controlled airspace. Some discussion was had regarding clearance to lift and trying to accommodate aircraft transiting controlled airspace although I think the pilot failed to grasp the importance of this task
201506677	17/05/2015	EGTT : London (FIR)	EGHI (SOU): Southampton	5nm N	D	CTR	UNKNOWN	Turbofan		Infringement of the Solent CTR (Class D) by an unknown aircraft showing as a faint primary contact only. Traffic info given. Standard separation maintained.	At 1735 I observed a faint primary contact entering the CTR near Winchester tracking SE. I put out blind calls but received no response. I adjusted the heading on DHC8 who was departing to the North. I passed traffic to PA28 who was transiting North VFR. PA28 could see the aircraft and described it as low wing, modern composite with tricycle gear.☐ Supplementary 15/06/15:☐ Heading adjusted due to infringement of the Solent CTR. ☐ Supplementary 16/07/15:☐ The aircraft entered and departed the Southampton Control Zone without a clearance. It has not been possible to identify the aircraft as it faded below radar coverage. No further action is deemed possible.

201506677	17/05/2015	EGTT : London (FIR)	EGHI (SOU): Southampton	5nm N	D	CTR	DE HAVILLAND	Turboprop	2	Infringement of the Solent CTR (Class D) by an unknown aircraft showing as a faint primary contact only. 201506679	16/05/2015	EGTT : London (FIR)	EGSH (NW!): Norwich	7nm South West	D	CTA	NAVION	Reciprocating	1	Infringement of the Norwich CTA (Class D) by an aircraft at 1000ft. Traffic info given. Standard separation maintained.	I had just taken over as APS ATCO. At 1541 a unknown aircraft appeared on the radar 10NM SW of EGSH. At 1543 the contact was observed entering the lateral limits of the Norwich CTA 6NM SW of EGSH tracking NW. The aircraft past west abeam EGSH at 4NM and adjusted its course to directly overfly Felthorpe aerodrome. A visual acquisition was made from the VCR and the traffic was estimated to be approximately 1000ft. It appeared to be a largish low wing WW2 type monoplane and was making a groundspeed of approximately 120knots. The infringer then continued NE and exited the lateral limits of the CTA at 1549 to the west of Aylsham VRP. IFR traffic departing EGSH was given appropriate headings and TI to avoid/become visual with the traffic and one of the helicopters concerned obtained a visual and reported the traffic at 2000ft. The infringer them manoeuvred to the west of Aylsham making a brief re entry into the CTA before departing to the SW within the lateral limits of the western half of the CTR and eventually faded from contact 6NM north of Lakenheath at 1620. I checked with the RAF Lakenheath controllers and they were not talking to the traffic. Further investigation after talking to staff at EGSV provided information that a Navion had departed EGSV at 1638A(1538UTC) towards Oulton (3NM West of Aylsham) before intending to return to Eaton Bray Airfield. The type of aircraft is an exact match with that from the visual observation from the VCR. I rang the listed contact number for Eaton Bray Fisheries & Airfield and the respondent confirmed there was a Navion based at Eaton Bray. I requested the contact details for the pilot he rang me today. He was unaware of the Norwich Class D airspace despite he assures me of having the latest map
201506686	17/05/2015	EGTT : London (FIR)	EGSH (NW!): Norwich		G	Other	CESSNA	Turboprop	1	UK AIRPROX 2015/070 - C208 and a Heinkel HK72, overhead Beccles in Class G airspace.	
201506686	17/05/2015	EGTT : London (FIR)	EGSH (NW!): Norwich		G	Other	OTHER	Unknown		UK AIRPROX 2015/070 - C208 and a Heinkel HK72, overhead Beccles in Class G airspace.	

201506701	15/05/2015	EGTT : London (FIR)	BIG	5nm North East	A	TMA	ROBINSON	Reciprocating	1	Infringement of the London TMA (Class A) by an R44 indicating 2700ft. Standard separation maintained.	An intruder was observed 5miles NE of BIG. Indicating 2700ft I had to turn one of my o/b EGLL departures to not let the blips merge.☐ Supplementary 26/05/15:☐ The radar data has been viewed. CAIT activated at 08.17, and aircraft identified by Mode S data, when climbed to 2800ft (base 2500ft) The controller acted correctly by turning a Heathrow departure, as the intentions of the infringing aircraft were unknown. The aircraft descended soon after out of controlled airspace. Separation was not lost.
201506701	15/05/2015	EGTT : London (FIR)	BIG	5nm North East	A	TMA	UNKNOWN	Unknown		Infringement of the London TMA (Class A) by an R44 indicating 2700ft. Standard separation maintained.	An intruder was observed 5miles NE of BIG. Indicating 2700ft I had to turn one of my o/b EGLL departures to not let the blips merge.☐ Supplementary 26/05/15:☐ The radar data has been viewed. 201506763	16/05/2015	EGTT : London (FIR)	EGTK (OXF): Oxford/Kidlington	ATZ	G	ATZ	ROBINSON	Reciprocating	1	Infringement of the Oxford ATZ (Class G) by an R44 at 700ft. R44 had been using old approach frequency 125.325 instead of current correct frequency 127.750.	ATZ Violation. A helicopter was noticed to the West of the aerodrome at low level and cross checking of the ATM confirmed a 7000 squawk at 700ft tracking North to South on the Western ATZ boundary. Aircraft was confirmed as a R44 helicopter with binoculars and seen to start manoeuvring. Blind calls were made on 127.750 and 133.425 (Tower and Approach) to which the aircraft did not reply. With the aircraft now at least one mile inside the ATZ a further blind call was made on 125.325 (the old Approach frequency) to which the aircraft replied. Retrospectively the aircraft asked for ATZ entry and with no traffic to effect, that was approved. Once the aircraft had cleared the ATZ the pilot was advised to check his briefing materials as the frequency he was on is no longer routinely monitored by Oxford as the designated ICF changed from that frequency to 127.750 over three years ago.

201506784	25/05/2015	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	Bearing East Range 13nm	D	CTA	PIPER	Reciprocating	1	Infringement of the Gatwick CTA (Class D) by a PA28 squawking 7000 at 2600ft. Traffic info given. Standard separation maintained.	CAIT activated showing aircraft at 2600ft East of Gatwick. Aircraft descended to 2.4 Two aircraft were held off. Several aircraft were held in Willo and Timba

201506792	21/05/2015	EGTT : London (FIR)	EGTK (OXF): Oxford/Kidlington	1.5nm South	G	ATZ	AGUSTA	Turboshaft	2	UK AIRPROX 2015/075 - Infringement of the Oxford ATZ (Class G) by an Agusta109 squawking 3701 at 1800ft. Visual circuit active with multiple aircraft.	Appropriate CAA action is being taken as a result of this incident. ☐ Supplementary 27/05/2015:☐ Whilst on duty as the Oxford Radar controller and at time 1041, the Brize Norton Zone controller called with traffic information on a 3701 squawk transiting his CTR via Farmoor Reservoir to Bicester. On assessing the track, I asked the Brize controller if the helicopter would be routing to the east of D129 in anticipation of a confliction with the Oxford runway 19 climb out. The Brize Zone controller confirmed that the aircraft would be "routing east of Weston". As the routing from Farmoor Reservoir to east of D129 would keep the A109 outside of the Oxford ATZ, I passed traffic information to Brize on a departing Seneca and ended the call. I subsequently passed traffic information to Oxford Tower regarding the helicopter. After a period of track observation of the 3701 squawk, it was clear that the subject helicopter was not changing course and was heading directly for the Oxford overhead at 1700ft as displayed on Mode C. A telephone call to Brize Zone was initiated immediately to ascertain the intentions of the traffic and I was advised that Brize had instructed the traffic to route to the east. Traffic information was passed to the Brize controller that the Oxford visual circuit was active with multiple aircraft, which was acknowledged. The 3701 squawk was observed to continue towards the Oxford ATZ and so further traffic information was passed to Oxford Tower as the intentions of the helicopter were now unknown. The 3701 squawk was observed to enter the Oxford ATZ at 1044 at 1800ft as displayed on Mode C, into direct conflict with OXF47 who was climbing upwind in
201506792	21/05/2015	EGTT : London (FIR)	EGTK (OXF): Oxford/Kidlington	1.5nm South	G	ATZ	CESSNA	Reciprocating	1	UK AIRPROX 2015/075 - Infringement of the Oxford ATZ (Class G) by an Agusta109 squawking 3701 at 1800ft. 201506834	20/05/2015	EGTT : London (FIR)	Danger Area EG D125	Salisbury Plain	G	Danger area	CIRRUS	Reciprocating	1	Infringement of live Danger Areas EGD125 and EGD123 by a SR22 squawking 7266 at 4300ft. Check fire imposed. Traffic info given.	Working as OJTI on S05/23T aircraft called on frequency within the confines of EGD125 (Salisbury Plain Danger Area) passing altitude 4,300', indicating 4,100' on radar. My trainee instructed the pilot to squawk ident and issued a Basic Service whilst our Planner telephoned Salisbury Plain Range Controller to ascertain if they were aware of the aircraft within their area. My trainee informed aircraft that he was presently within an active danger area up to 30,000' which he replied that he had been told it was only active up to 3,000' and asked for any advice. My trainee instructed aircraft to continue on his present track to leave the danger area quickest. I then spoke to the pilot to inform him of his position and the activity within the current and adjacent danger area. I advised the pilot to continue on a north-easterly track to leave the danger area most expeditiously which was acknowledged. I then passed traffic information as I observed aircraft passing FL67 against A7000 indicating 3,300' in his 1 o'clock position, 2 miles. Aircraft acknowledged this and informed me he was turning left to avoid a 'fast jet' he had observed to which I passed further traffic information regarding a primary radar return 2 miles east. Aircraft cleared EGD125 on a northerly track, was informed when he had cleared the active danger area and then released on own navigation to KENET with a deconfliction service.☐ Supplementary 20/05/15:☐ My assistant received a call from the FIR about an outbound from EGHS looking to join controlled airspace at KENET. I provided the FIR with the following clearance: Cleared o/t KENET FL100 A7266 134.750. After I had given this clearance, a couple of minutes later we
201506837	21/05/2015	EGTT : London (FIR)	SAM	13nm S	D	CTA	UNKNOWN	Unknown		Infringement of the Solent CTA 2 (Class D) by an unknown aircraft squawking 7000, indicating 2300ft. Traffic info given. Standard separation maintained.	Infringement of Solent CTA by unknown aircraft. Unknown aircraft squawking 7000 observed in the vicinity of COWES tracking South westbound indicating A025, several blind calls made with no response. No mode S data. Bournemouth have no known traffic. VFR transit aircraft PA32 advised of unknown traffic. Unknown traffic continues on South-westerly track entering the Solent CTA-2 at 1020, indicating A023. Unknown traffic tracked to Freshwater bay before turning back towards COWES. PA32 updated on unknown and reported visual but unable to give any further information on aircraft type or markings. After turning at Freshwater the contact faded from radar for a short period before reappearing indicating A015 at COWES. Unknown tracked along the Isle of Wight coast before fading from radar cover. No loss of separation.

No loss of separation.
201506838	21/05/2015	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	Bearing SE Range 12nm	D	CTA	CESSNA	Reciprocating	1	Infringement of the Gatwick CTA (Class D) by a C152 squawking 3767 at 2000ft. Traffic info and avoiding action given. Separation lost.	At 09:50 an unknown aircraft was observed to enter the EGKK CTA at 2.0A. It was tracking southbound and wearing a 3767 squawk. A319 (1) was downwind dropping to 4.0A. I told the aircraft about the unknown aircraft and turned it right heading 180 degrees. She questioned me so I gave an avoiding action turn. She read back left, not right. I corrected her but she had started the left turn before correcting to turn right and the turn was larger than it should have been, taking the aircraft into a worse position. A319 (2) was in trail downwind and I stopped his descent at 6.0A. I informed the GSA and then obtained the aircraft's details from Redhill, a C152 on a local flight. The aircraft left controlled airspace to the east at 2.0A and the inbound aircraft were repositioned for their approaches.☐ CAA Closure:☐ Pilot error, situational awareness. Warning letter sent.

201506844	21/05/2015	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	4.5nm S	D	CTA	PIPER	Reciprocating	1	Infringement of the Manchester CTA (Class D) by a PA28, flown by a solo student pilot, resulting in loss of separation with IFR departures. Position fix and steers given by ATC until pilot reported visual with intended destination. Outbounds stopped.	Zone infringement PA28. PA28 called on frequency, saying he wasn't sure of his position and could I assist. I issued a squawk of 7355, and looked to the south of the zone. Fin Dir and I then spotted the squawk 7355 approximately 4.5nm due south of Manchester. I had not previously seen any primary contact within the zone. (Later Fin Dir also said he had not seen anything on radar either) I told the pilot to take up an orbit, gave the QNH and asked the pilot his level. He said he was at 1000 feet. I asked if he had good contact with the ground and said he could climb higher if he needed to. He said that he was a solo student on a cross country exercise. He sounded a bit frightened and very unsure, so I wanted to get the pilot to where he wanted to go quickly and without delay. I stopped all the outbounds, gave all my traffic to Fin Dir and asked Fin Dir to hold off traffic. An aircraft had to enter the hold at DAYNE. I asked the pilot where he wanted to land. I co-ordinated with Air 1 that I was going to take the aircraft through the over head to intended destination and keep it on my frequency as I didn't want to give any unnecessary frequency changes. I cancelled the check all when the aircraft was north of 23R. Air 1 reported the aircraft visual and continuing northbound. I contacted intended destination to alert them that PA28 was returning inbound to land and why. I asked the pilot if he was visual with Manchester airport, which he said he was. I gave him a track to fly of 330deg to take him towards intended destination and re-iterated that it was a track and he was to maintain VFR and clear of cloud and in sight of the surface. I did not want him to think he was on a radar heading. I then asked the pilot to report visual with intended destination. When he did so, I then transferred him to the airfield.

201506856	21/05/2015	EGTT : London (FIR)	Chippingham VRP	1nm N	D	CTA	PIPER	Reciprocating	1	Infringement of the Bristol CTA 8 by an unknown aircraft squawking 2653 at FL48, resulting in loss of separation with an inbound A321. Aircraft identified as a PA28. Traffic info and avoiding action given.	Infringement of Bristol CAS - CTA8 by PA28. A Boscombe Down squawk 2653 was observed in proximity to Chippenham VRP at FL048 (5100ft) tracking towards Bristol CTA8 (Base 4500ft). Radar1 OJTI and trainee discussed this contact and took this into consideration in their plan and gave a precautionary vector to A321 to track away from it, expecting it to remain outside controlled airspace. As the contact (PA28) continued to track towards controlled airspace I contacted Boscombe Down ATC to obtain details and get the aircraft to move away, however Boscombe Down reported that they were not in contact with any such aircraft. Brize Norton also reported not in contact with the aircraft. I attempted a number of blind transmissions to the contact (PA28). At 12:09 the contact entered controlled airspace and Radar 1 took avoiding action against it with A321. Minimum separation was approximately 3275ft and 3nm at the time of infringement. Boscombe called back to say that the aircraft was PA28 and that it had been instructed to contact 125.650 at which point it did. I informed PA28 that they had infringed CAS and that I would be filing on the event. Boscombe Down called back later to advise that PA28 had been on their frequency but had selected an incorrect squawk, therefore they were not aware of a 2653. They made a blind call and PA28 identified himself to them, at which point they transferred the aircraft to Bristol. ☐ Supplementary 27/05/15:☐ This was my first flight with a none aircraft familiar passenger. Generally when flying from airfield I am very aware of airspace boundaries it that area. In flying away from what I

201506920	23/05/2015	EGTT : London (FIR)	DIPSO	7nm North West			GULFSTREAM	Reciprocating	1	Infringement of the East Midlands CTA (Class D) by a Gulfstream squawking 4570 indicating 6000ft. Standard separation maintained.	Appropriate CAA action is being taken as a result of this incident.
201506921	28/05/2015	EGTT : London (FIR)	EGGW (LTN): London/Luton	Bearing 270 Range 12nm	D	CTR	GROB	Reciprocating	1	Infringement of the Luton CTR (Class D) by a Grob G115 squawking 7000 at 3000ft. Standard separation maintained.	At 1400z I received a handover and assumed the position of Luton Radar. As part of the hand over it was pointed out to me that an aircraft was infringing Luton controlled airspace west of Luton Aerodrome. At roughly 1405z the aircraft begun infringing London TMA airspace as it tracked southbound at 3000'. The previous controller informed me that the aircraft had entered Luton controlled airspace at 1357z. She tried blind calling the aircraft receiving no reply. She phoned Farnborough however they were not in control of it. She phoned TMA NW to warn them. Shortly after taking over I noticed an aircraft with the listening squawk 0013 in the same general area of the infringing aircraft and requested ssistance in recognising the type and registration of the aircraft. The pilot informed me it was a light fixed wing, single engine aircraft.During this time departures were suspended from Luton. After co-ordinating with TMA N, it was agreed I would allow a Luton CPT departure, Falcon 2000, to be released. After Falcon 2000 was released, and subsequently airborne, the infringing aircraft turned back northbound, in the vicinity of Luton's airspace. I don't believe separation was lost between Falcon 2000 and the infringing aircraft.The infringing aircraft continued northbound in the direction of Cranfield.I phoned Dunstable both to warn them about the aircraft's proximity to them, and to ask for assistance in identifying the registration, however they were unable to help. I received advice from a colleague that the infringing aircraft was believed to be a Grob G115. This information came from the mode-S data available to us on our radar screen. Shortly after 1420z I received a phone call from Farnborough informing me they had been in contact with Cranfield and they confirmed they

201506928	22/05/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	Bearing 225 Range 6.5nm	D	CTR	DE HAVILLAND	Reciprocating	1	Infringement of the Stansted CTR (Class D) by aircraft at 1400ft. Check all imposed. One aircraft sent around and another delayed. Traffic info given.	I was working as Essex radar with the sector bandboxed, vectoring aircraft for runway 22. I noticed a primary radar contact on a easterly track in the WARE VRP area that appeared like it was not going to turn away before infringing the Stansted TMZ 2. Soon after it infringed Stansted's Control Zone I phoned Stansted Tower, pointed out the primary contact to them and instigated a check all against departures. A BUZAD departure - B737 (1) was lined up on the runway waiting for departure so as a result the tower controller and I agreed to execute a missed approach/go-around with B737 (2) who was number one to land on final approach. A left turn away from the infringer was agreed so it routed away from the infringer's position. As a result B737 (3) was also delayed by about 5 minutes whilst I sorted out the other aircraft on frequency. The infringing traffic's track took it through Hunsdon airfield, south east bound through a 6 mile climb out then on towards North Weald airfield. The Luton radar controller got into contact with the Farnborough LARS unit, who believed they were talking to the aircraft in question and were just performing procedural turns in order to fully identify it. I removed the check all with the tower and put a check east only in place of it, by this time B737 (1) had been routed off the runway so there was no delay to the other traffic on final approach. Soon after, it was ascertained that LF LARS did have control of the aircraft, it was at altitude 1400ft and it was routed west towards BPK and left the Stansted CTA. Freeflow on departures was reinstated and both B737 (2) and B737 (3) were vectored without further delay. A FIN controller was requested and arrived quickly however the incident resolved itself quickly enough that no split was ever necessary.□

201506928	22/05/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	Bearing 225 Range 6.5nm	D	CTR	BOEING	Turbofan	2	Infringement of the Stansted CTR (Class D) by aircraft at 1400ft. A BUZAD departure - B737 (1) was lined up on the runway waiting for departure so as a result the tower controller and I agreed to execute a missed approach/go-around with B737 (2) who was number one to land on final approach. A left turn away from the infringer was agreed so it routed away from the infringer's position. As a result B737 (3) was also delayed by about 5 minutes whilst I sorted out the other aircraft on frequency. The infringing traffic's track took it through Hunsdon airfield, south east bound through a 6 mile climb out then on towards North Weald airfield. The Luton radar controller got into contact with the Farnborough LARS unit, who believed they were talking to the aircraft in question and were just performing procedural turns in order to fully identify it. I removed the check all with the tower and put a check east only in place of it, by this time B737 (1) had been routed off the runway so there was no delay to the other traffic on final approach. Soon after, it was ascertained that LF LARS did have control of the aircraft, it was at altitude 1400ft and it was routed west towards BPK and left the Stansted CTA. Freeflow on departures was reinstated and both B737 (2) and B737 (3) were vectored without further delay. A FIN controller was requested and arrived quickly however the incident resolved itself quickly enough that no split was ever necessary.☐
201506928	22/05/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	Bearing 225 Range 6.5nm	D	CTR	BOEING	Turbofan	2	Infringement of the Stansted CTR (Class D) by aircraft at 1400ft. Check all imposed. One aircraft sent around and another delayed. Traffic info given.	I was working as Essex radar with the sector bandboxed, vectoring aircraft for runway 22. I noticed a primary radar contact on a easterly track in the WARE VRP area that appeared like it was not going to turn away before infringing the Stansted TMZ 2. Soon after it infringed Stansted's Control Zone I phoned Stansted Tower, pointed out the primary contact to them and instigated a check all against departures. A BUZAD departure - B737 (1) was lined up on the runway waiting for departure so as a result the tower controller and I agreed to execute a missed approach/go-around with B737 (2) who was number one to land on final approach. A left turn away from the infringer was agreed so it routed away from the infringer's position. As a result B737 (3) was also delayed by about 5 minutes whilst I sorted out the other aircraft on frequency. 201506987	25/05/2015	EGTT : London (FIR)	Not specified		D	CTA	CESSNA	Reciprocating	1	Infringement of the Worthing CTA (Class D) by a C172 with Mode C indicating between FL190-FL200. Squawk alternated between 7000 and 0000. Suspected faulty transponder.	Whilst operating as the DVR group planner at approx 0950z, I observed a mode C intruder, indicating between f1190-f1200, the squawk alternating ☐ between 7000 and 0000. Whilst I suspected the flight to have a faulty transponder we still provided 5nm/5000'. investigation on watch determined that the aircraft was likely to be a member of 3 x C172 operating at 2000 feet. Selection of individual radar sources confirmed that the flight was operating below 10000.
201506990	21/05/2015	EGTT : London (FIR)	EGGW (LTN): London/Luton	15nm N	D	CTA	CESSNA	Reciprocating	1	Infringement of the Luton CTA (Class D) by an unknown aircraft squawking 7000, climbing to 3800ft. Aircraft believed to be a C177, however positive identification has not been made. Standard separation maintained.	A7000 infringement North of Luton. A7000 infringed Luton CAS 15nm North of Luton, the contact climbed to 3800ft at a point where the base is 3500ft, the contact was tracking West. The contact passed over Cranfield. I phoned Cranfield, and it is believed that the contact was a C177. However, a positive identification was not made.
201506996	25/05/2015	EGTT : London (FIR)	Not specified		A	TMA	GRUMMAN	Reciprocating	1	Infringement of the Manchester TMA (Class A) by an unknown aircraft squawking 7000 at 5700ft. Aircraft identified as a Grumman AA5. Standard separation maintained.	Infringement in WAL sector. Acting as WAL/IOM planner a infringer was spotted west of KEGUN tracking SE at 5.7A. Liverpool APC called regarding traffic as it was unknown to them. I called the FIR, who said they had spoken to the aircraft over North Wales outside CAS. Aircraft was showing as FIS on radar. Base of airspace varies between 3A and 4.5A. The aircraft subsequently infringed CAS in the Stafa area.
201507001	23/05/2015	EGTT : London (FIR)	BRI	Bearjng 355 Range 5nm	D	CTR	PIPER	Reciprocating	1	Infringement of the Bristol CTR (Class D) by a PA28 squawking 5074 at 2500ft. Standard separation maintained.	I was on duty as the Radar 2 LARS ATCO when at about 1530 aircraft called north of Bristol inbound, from Shobdon. I passed the relevant airfield☐ information and instructed the aircraft to squawk 5074 which I then validated. I expected the aircraft to remain outside controlled airspace until transferred to Tower for onward clearance. It was a busy afternoon with a lot of other traffic, including gliders, gliding blocks active and planned balloon launches and a Para-Drop at Bath. At about 1540 a call came through to me as Watch Manager, to co-ordinate the planned para-drop at Bath. I had a brief discussion with the pilot on the telephone and then briefed Radar 1 of the conversation. I may have also been distracted by another transit aircraft. ☐ It was then I noticed that the known aircraft was entering CAS at 2500 feet without clearance and without co-ordination with the Tower ATCO. There was no traffic near-by, so I instructed him to orbit while I co-ordinated his onward clearance with the Tower ATCO. This was achieved quickly and I then transferred the aircraft to Tower frequency at 1544. (The Tower ATCO had received a FPS with the aircraft squawk on so was known traffic to the Tower ATCO.) Later I contacted the aircraft operator and explained the situation of the aircraft entering CAS without a clearance and that an MOR needed to be filed. Wx: 1550 300/09 VRB270/340 9999 Few032 19/11 Q1024.☐ Supplementary 24/05/15:☐ My request was for a rejoin and inbound clearance to land at Bristol expecting to join VFR via the M5 Bridge VRP. Air Traffic replied with Information Juliet current, QNH 1024 and the

201507020	25/05/2015	EGTT : London (FIR)	EGTK (OXF): Oxford/Kidlington				PIPER	Reciprocating	1	Infringement of the Oxford ATZ (Class G) by a PA18 squawking 7000 at 1800ft. Traffic info given.	A 7000 squawk was observed tracking north along the eastern edge of the Brize Control zone toward Oxford. Callsign was established via Mode S and several blind transmissions were made on both 127.740 and 125.325. The aircraft did not reply and flew into the ATZ indicating 1800ft, cutting the corner of the Brize CTR and vacating the ATZ to the west. Traffic information was passed to a transiting aircraft that was routing via the overhead 1.5nm lateral from the aircraft.☐ Supplementary 26/5/15:☐ Such routing is common with aircraft transiting the imaginary gap between the Brize CTR and Oxford ATZ such a gap does not exist as the ATZ and CTR overlap.
201507020	25/05/2015	EGTT : London (FIR)	EGTK (OXF): Oxford/Kidlington				UNKNOWN	Unknown		Infringement of the Oxford ATZ (Class G) by a PA18 squawking 7000 at 1800ft. Traffic info given.	A 7000 squawk was observed tracking north along the eastern edge of the Brize Control zone toward Oxford. Callsign was established via Mode S and several blind transmissions were made on both 127.740 and 125.325. 201507031	25/05/2015	EGTT : London (FIR)	EGTK (OXF): Oxford/Kidlington	2nm South West	G	ATZ	PIPER	Reciprocating	1	Infringement of the Oxford ATZ (Class G) by a PA18 squawking 7000 slowing climbing to 2000ft based on Mode C. Traffic info given.	Appropriate CAA action is being taken as a result of this incident.
201507045	23/05/2015	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD	10nm S	D	CTA	CESSNA	Reciprocating	1	Infringement of the Doncaster CTA 6 (Class D) by a C172 in climb at 2500ft. Standard separation maintained.	Infringement of regulated airspace. C172 was observed climbing into Doncaster CTA-6 without a clearance. I advised C172 that he had entered controlled airspace without a clearance but allowed him to continue maintaining VFR but not above altitude 3000 feet. No other aircraft were affected. C172's arrival airfield were contacted to request they ask the pilot to call ATC upon landing, which he did do and he apologised for the infringement.
201507061	22/05/2015	EGTT : London (FIR)	Langar		G	Other	AVIAT	Reciprocating	1	Infringement of the Langar parachute drop zone (Class G) by an aircraft operating between 2500ft and 3000ft. Aircraft came into close proximity with 13 free fall parachute drop zone active with 13 free fall parachutists.	Appropriate CAA action is being taken a result of this incident.

201507069	22/05/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	Bearing 170 Range 12nm	D	CTA	PIPER	Reciprocating	1	Infringement of the Stansted CTA (Class D) by a PA28 showing 2000ft on Mode C. Standard separation maintained.	A/c observed departing from North Weald climbed to 2000 on mode C and tracked south east. On telephoning North Weald it was confirmed that it did <input type="checkbox"/> depart from them and was enroute to LFAT, he left the frequency with out saying goodbye.
201507177	25/05/2015	EGTT : London (FIR)	EGVN (BZZ): Brize norton		D	CTR	CESSNA	Reciprocating	1	Infringement of Brize Norton CTR (Class D) by unknown aircraft squawking 7000 at 1500ft. Identified as C152. Pilot unsure of position and requested vectors to a specific airfield. Position fix and steers given until pilot visual with specified airfield.	Infringement of Brize Norton CTR - C152. A return was seen on radar to approach Brize Norton from the west, squawking 7000 with no Mode C. At approximately 3nm west of the aerodrome the return turned onto a north easterly heading. I then received a call on the LARS frequency from the pilot of C152, stating that he was unsure of his position and requesting a vector for a specific airfield. The return was identified, still inside the Brize CTR and the pilot reported that he was at an altitude of 1500ft. The return then left the CTR under a Basic Service and navigational assistance was provided until the pilot became visual with the specified airfield. There were no other aircraft to affect at the time, but one was taxiing for departure from RW 26.
201507253	27/05/2015	EGTT : London (FIR)	EGD125	East of Devies	G	Danger area	PIPER	Reciprocating	1	Infringement of Danger Area EGD125 (Class G) by a PA28 squawking 5064 at 2800ft.	A PA28 on a Basic Service and assigned squawk 5064 was on a navigation exercise out of Kemble and was operating in the area to the east of Devizes. At time 1025 I notices the aircraft turning onto a south westerly track and approaching D125 from the north east. As this Danger Area was notified as being active up to 30000ft I advised the aircraft to be cautious of the Danger Areas. The pilot didn't answer on the first call, on the second call two aircraft replied and I reiterated the advice. The pilot was right on the edge and said that he would divert to the north to avoid it. I told him that he was just outside and to continue the right turn. The aircraft was displaying A028 and the contact was slightly intermittent for about 30 seconds. I asked the pilot to clarify that he was turning north as this wasn't apparent. I told him he was just inside the Danger Area and he then stated that he was actually heading south. I then told him to confirm his position as he was inside the Danger Area and needed to turn northbound. He then said that his GPS says that he was 3nm SSW of "Lideway. I then told him again to turn northbound which he said he was doing. I then told him to turn north immediately and that we were informing the authorities to "check fire". The aircraft then left the Danger Area and I told him to operated well away from it. The aircraft then continued his detail without event. <input type="checkbox"/> Supplementary: <input type="checkbox"/> I was on duty as Deputy Training Safety Officer(Air) on the morning when a controller from Bristol Filton rang to report that a PA28 had just infringed EG D125. The aircraft was airborne from Kemble and was receiving a Basic Service from Bristol squawking 3/A5064.
201507321	06/06/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	Bearing NW Range 5nm	D	CTR	PIPER	Reciprocating	1	Infringement of the Stansted CTR (Class D) by a PA28 squawking 7000 at 1900ft.	At approximately 0955 I observed a 7000 squawk enter the SS CTR indicating 1900feet. I made a broadcast but got no response. The aircraft continued steadily through the CTR and CTA and turned southeast. The aircraft was identified by London FIR as a PA28. No Stansted traffic was affected by the event at any time. <input type="checkbox"/> Supplementary 06/06/15: <input type="checkbox"/> I was working as the NE/Lam/Lorel controller band boxed. The Coordinator made me aware of a an aircraft, believed to have entered controlled airspace about 3 miles NE of BPK, unverified at 2000ft. At the time of the CAIT alert it was too late to obtain 5 miles separation with an aircraft inbound to EGLC, but I vectored it round the CAIT alert to pass as far behind it as possible and maintained the 4000ft separation that we had at the time. <input type="checkbox"/> CAA Closure: <input type="checkbox"/> Pilot error. Situational awareness. Failed on-line test, retraining required.
201507321	06/06/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	Bearing NW Range 5nm	D	CTR	BAE	Turbofan	4	Infringement of the Stansted CTR (Class D) by a PA28 squawking 7000 at 1900ft.	At approximately 0955 I observed a 7000 squawk enter the SS CTR indicating 1900feet. I made a broadcast but got no response. The aircraft continued steadily through the CTR and CTA and turned southeast. The aircraft was identified by London FIR as a PA28. 201507333	25/05/2015	EGTT : London (FIR)	WHI NDB		D	CTR	PIPER	Turboprop	1	PA46 failed to comply with ATC instructions whilst being vectored for a LH pattern ILS to R/W27 at 2500ft and subsequently infringed Manchester CTR (Class D). Standard separation maintained.	PA46 enters Manchester controlled airspace in the vicinity of WHI NDB. PA46 whilst being vectored for a left hand pattern ILS to runway 27 and whilst positioned to the north west of WHI on an easterly heading was, for spacing, given a right turn the long way round on a heading of 010 degrees for left base. The pilot readback this instruction but was observed continuing in a east south easterly direction. Once it became obvious that the aircraft was continuing east I asked the pilot to confirm he was turning, as instructed, onto 010 degrees. The pilot replied that he was but sill appeared to be tracking approximately 110 degrees. As PA46 was inevitably going to enter Manchester's airspace I telephoned Manchester Radar to inform them of the infringement and to assure them that the aircraft would be turned away. PA46 was then vectored in a westerly direction and subsequently onto the ILS for runway 27.
201507366	07/06/2015	EGTT : London (FIR)	EGNR : Hawarden		A	Airway - ATS Route	BEAGLE	Reciprocating	1	Infringement of Airway N864 (Class A) by a Beagle B121. Standard separation maintained.	Airspace infringement. I was the aerodrome controller at Hawarden. At 1113 Beagle B121 called me for a basic service 2 miles to the east of the airfield reporting at 3500ft. I advised him that the base of controlled airspace around Hawarden was 3000ft and suggested that he descend immediately. The aircraft descended to 2900ft and was reminded to remain outside controlled airspace.
201507370	18/04/2015	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD		D	CTR	CESSNA	Reciprocating	1	Infringement of the Doncaster Sheffield CTR (Class D) by an unknown aircraft at 2000ft. Aircraft identified themselves as a C150. Traffic info given. Standard separation maintained.	RHADS Zone Infringement - C150. During a busy radar session, I noticed an ac routing southbound towards Haxey and inside the RHADS CTR. At the same time I had notification from ADC of PA28, which had just departed towards Haxey also. The infringing ac then called me and identified themselves as C150 routing on a local flight. On acknowledgement, I advise C150 that he had entered controlled airspace without a clearance and that he should vacate immediately as I had traffic routing towards Haxey also. C150 appeared to continue southbound so I asked him to squawk IDENT and instructed him to immediately take up an easterly track to vacate. At this point PA28 called on the frequency and I passed him traffic information on the infringing ac.
201507370	18/04/2015	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD		D	CTR	PIPER	Reciprocating	1	Infringement of the Doncaster Sheffield CTR (Class D) by an unknown aircraft at 2000ft. Aircraft identified themselves as a C150. Traffic info given. Standard separation maintained.	RHADS Zone Infringement - C150. During a busy radar session, I noticed an ac routing southbound towards Haxey and inside the RHADS CTR. At the same time I had notification from ADC of PA28, which had just departed towards Haxey also. The infringing ac then called me and identified themselves as C150 routing on a local flight. On acknowledgement, I advise C150 that he had entered controlled airspace without a clearance and that he should vacate immediately as I had traffic routing towards Haxey also. C150 appeared to continue southbound so I asked him to squawk IDENT and instructed him to immediately take up an easterly track to vacate. At this point PA28 called on the frequency and I passed him traffic information on the infringing ac.
201507371	21/04/2015	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD		D	CTA	CESSNA	Reciprocating	1	Infringement of the Doncaster Sheffield CTA (Class D) by a C120, indicating 2100ft. Standard separation maintained.	RHADS Zone Infringement - C120. Whilst OJT I on RHADS I noticed an ac, which we were controlling, enter the RHADS CAS after stating he would remain clear. The ac, C120, was seen to enter CAS routing Eastbound at 2100ft on a QNH of 1037. I asked the pilot if he had requested a crossing clearance, which he said he had not and I asked him to squawk IDENT. After identification I told the pilot that the base of CAS in this vicinity was 1.5A and that he was indicating 2.1A on 1037. He said he was below that, although his Mode C suggested that he was commencing a descent. The ac continued towards intended destination without further incident.

201507400	08/06/2015	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	12nm NW	D	CTR	CESSNA	Reciprocating	1	Infringement of the Manchester CTR (Class D) by an unknown aircraft squawking 7000, indicating 1900ft. Aircraft identified as a C172. AIW activated. Standard separation maintained.	CAS Infringement. AIW activated entering low level route west of Barton indicating 1900ft. I informed AIR2 departures to ensure separation from traffic just airborne and then called Barton. They transferred the aircraft to me and I checked the altitude (mode C correct) and identified the aircraft. No loss of separation.☐ Supplementary 28/07/15:☐ I was flying from **** towards Southport in an area with a ceiling height of 2000.'I clipped the NE edge of the low level corridor where the ceiling height is 1300'.
201507410	08/06/2015	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	Bearing 300 Range 13nm	D	CTR	CESSNA	Reciprocating	1	Infringement of the Manchester CTR (Class D) by a C172 squawking 7000 at 1600ft. Standard separation maintained.	AIW activated as 7000 squawk entered LLR indicating 1600ft. An aircraft then called which corresponded to the mode S ID of the infringer. I identified the aircraft and checked the mode C (which was correct). I instructed the aircraft to descend and follow the LLR.☐ Supplementary 09/06/15:☐ I requested a VFR zone transit from Liverpool radar routing Formby point direct to TNT VOR. Transit through the Liverpool zone was given at altitude 1500 feet Liverpool QNH. Although Liverpool ATC suggested a transit through Manchester might not be granted as Manchester had just changed runways, at no point was this confirmed by Liverpool. Whilst overhead Burtonwood and still inside CAS at 1500 feet, Liverpool Radar told me to squawk 7000 and freecall Manchester for transit through the Manchester CTR. On contacting Manchester I was refused zone entry, told I had infringed and told call them on landing. My preferred West - East routing was given to Liverpool well in advance (over the Irish Sea) and my desired track through Liverpool was agreed. Liverpool had cleared me through their zone and I was expecting them to liaise with Manchester and relay a clearance (or not) through the Manchester zone. Liverpool did give me my location when handing over, told me that I might be expected to have to use the low level corridor, but they had not asked me to descend to remain clear of controlled airspace and instead of passing my details to Manchester they asked me to freecall. I appreciate how hard ATC work is but my understanding is that it should have been obvious from my Mode C readout that I was still inside controlled airspace and Liverpool should not have asked me to freecall Manchester. I had confirmed my altitude
201507486	08/06/2015	EGTT : London (FIR)	EGNJ (HUY): Humberside		G	ATZ	WESTLAND	Turboshaft	1	An unknown aircraft, showing as a primary contact only, infringed the Humberside ATZ (Class G) and landed on grass at Humberside without ATC clearance. Aircraft identified as a Gazelle with fuel problems. Traffic info and avoiding action given.	ATZ Infringement by an unknown landing helicopter. At 1458 a contact was observed by the APS Controller 3 miles NW of Humberside tracking directly towards the airfield. There was no SSR code observed. The APS Controller telephoned me and I then saw the A/C - a Gazelle helicopter infringing the ATZ from the NW at 2 miles AT APPROXIMATELY 1000FT. At approximately 1 mile from the ARP the aircraft turned right downwind, descended and then turned left and left again to position for a 1/2 mile final for Runway 02. No contact was made with the aircraft on any frequency. The helicopter air taxied along the runway a short way before turning left across the grass above and between 3 vehicles carrying out grass cutting on the western side of the airfield. The helicopter crossed runway 26/08 and then landed on the light aircraft park between two rows of fixed wing aircraft at 1502. I made several calls on the tower frequency and flashed the runway edge lights but to no avail. Once the aircraft had shut down the engine, the Airfield Operations Manager and a member of ATC approached the aircraft. There was 1 person on board and he stated that he had departed from a private site near London Gatwick and was enroute to destination when he became short of fuel. He did not attempt to call the tower frequency or use the emergency frequency or display and emergency SSR code.☐ Supplementary 09/06/15:☐ ATZ Infringement. I was on duty as the APS controller with 4 VFR aircraft on frequency in the vicinity of Humberside Airport; additionally, I was vectoring an IFR EMB135 with 3 crew and 7 passengers from the west for an NDB approach to runway 02. I noticed a primary

201507519	27/05/2015	EGTT : London (FIR)	EG R002	Devonport	G	Danger area	CESSNA	Reciprocating	1	Infringement of Danger Area EG R002 (Devonport) by an unknown aircraft squawking 7000 at 1500ft. Aircraft identified as a C172.	Unauthorised penetration of EG R002. Whilst controlling on Mil LARS West I noticed an aircraft squawking 7000 approx 10nm W of EG R002 indicating 1500' proceeding on an easterly track. Having monitored the track for a few moments it appeared that the aircraft's track would take it very close to the northern boundary of R002. An aircraft then called Mil LARS E on 124.150 and gave a position report overhead Saltash at 1500'. Looking again at the 7000 squawk previously mentioned the aircraft was now clearly on a track that would take it through R002. The aircraft that had free-called LARS E was instructed to contact LARS W due to its geographic location. It then became apparent that it was the 7000 squawk now in R002. The aircraft called up on the LARS W freq of 121.250. The aircraft, a C172 reported he was at 1500' on the Wessex QNH 1015 and overhead Devonport. The aircraft was out of Bodmin aerodrome and routing to South Hams. By the time the aircraft had made contact it was well established within the R002 complex on an Easterly track. The aircraft was also observed from the ground by an off-duty ATCO and from visual references was judged to be within the boundaries of R002. When asked whether the pilot was aware that he had flown through a restricted area he replied that he assumed he was clear to the North and was unaware that he had flown through the restricted area. The aircraft then vacated the area on an easterly track toward South Hams without further incident.

201507524	09/06/2015	EGTT : London (FIR)	SAM	Bearing 055 Range 7nm	D	CTR	MAULE	Reciprocating	1	Infringement of the Southampton CTR (Class D) by a MX7. Traffic info given. One aircraft sent around. Second aircraft held on the ground. Standard separation maintained.	Primary contact observed in BWFA around Roughay Farm which I asked my coordinator to keep an eye on. Primary contact then disappears from radar. Outbound JS31 (1) had previously been released heading 020, A030. Inbound JS31 (2) had been transferred to Tower on a visual approach rwy02. I was about to transmit to another aircraft when I observed (along with my coordinator) the primary contact leaving the BWFA to the NE and entering the Solent CTR without permission. I immediately called the Tower and requested if the JS31 (1) had started his take off, he had not, so I instructed the Tower ATCO to hold the JS31 (1) and send JS31 (2) around. The JS31 (2) was on approximately a 3nm final and was instructed to fly 020 degrees climb to A030. I deemed it unnecessary to pass the instruction for JS31 (2) as avoiding action due relative positions (approx. 10nm) and pilot workload, the primary contact was still tracking north bound. My intention was to vector the JS31 (2) DWLH rwy02 once back on my frequency. Whilst this was happening the coordinator called Lower Upham who had no known traffic, he then called Roughay who advised that MX7 had departed and tracked northbound. Roughay tried to call him but were unable to get communication to warn him that he may infringe. JS31 (2) called as he approached SAM and was turned left and advise the reason for sending them around. JS31 (2) was still visual so he was cleared for a visual approach DWLH rwy02. The unknown traffic left the Southampton CTR 055/7.5nm at Approx 1034 and tracked towards New Alresford before turning Southbound passing abeam of BWAL then coasted out abeam of Lee-on-Solent. The primary contact was observed changing to a London FIS squawk so the coordinator called

201507539	06/06/2015	EGTT : London (FIR)	EGBB (BHX): Birmingham		D	CTA	PIPER	Reciprocating	1	Infringement of the Birmingham CTA 2 (Class D) by an unknown aircraft in climb squawking 0010, resulting in loss of separation with an inbound PA34. Aircraft identified as a PA28. AIW activated.	Infringer PA28 in CTA 2 against PA34 establishing on the ILS 33. While controlling PA34, a training flight inbound to Birmingham, I noticed a 0010 squawk tracking north towards controlled airspace from the Wellesbourne direction. At the time it indicated 1600FT in the climb and my Mode S advised me of the callsign PA28. At this time PA34 was already ahead of PA28 and going away. Fltnum 53A called me during this and by the end of his transmission PA28 was observed at 2000FT. The time was approximately 1024Z. I called PA28 and advised him that he had infringed controlled airspace and that he needed to track south and descend to exit controlled airspace as soon as possible. I did not issue any avoiding action to PA34 as it was already going away from PA28 and the separation could not been increased any further. I have contacted the pilot and he says it was a navigational error on his part.

201507545	09/06/2015	EGTT : London (FIR)	Danger Area EGD 201		G	Danger area	CYCLONE AIRSPORTS	Reciprocating	1	Infringement of Danger Area EGD201 (Class G) by three Microlights, two of which were squawking 7000.	During the opening of radar 1 position I observed a 7000 squawk indicating altitude 2500 feet with associated primary return in the vicinity of Llandysul. The D201 and D202 complexes were opening at 0900, therefore I made a blind call to the aircraft with no response. At 0845 the aircraft was 5NM E of West Wales airport, tracking along the edge of D202. I made a blind call to advise that D201 and D202 would become active at 0900. I called the West Wales AFISO and asked if he was working any traffic in the area. He was not. Watchkeeper RPAS was starting and I advised the AFISO that I would not pass a clearance to the Watchkeeper until the aircraft was clear of D202. I requested assistance in the ops room from a colleague. At 0852 the aircraft had climbed to altitude 4000 feet. I became aware of a primary return approximately 2 miles in trail of the first aircraft. I made a blind call advising that the danger areas would become active at 0900, no response received. At 0901 the first aircraft infringed D201 at New Quay tracking NE along the coast indicating altitude 2900 feet. The second aircraft was approximately 2 miles in trail and appeared to have another primary contact in formation with it. At 0903 the second aircraft infringed D201 at New Quay tracking NE along the coast. It was a primary only contact, with a second aircraft in formation. The second aircraft (referred to as 3rd aircraft) remained outside of D201 throughout. 0908 1st aircraft left D201 5NM SW of Aberystwyth tracking NE. 0911 2nd aircraft left D201 5NM SW of Aberystwyth tracking NE. 3rd aircraft remained outside throughout. 0915 2nd aircraft now displaying 7000 squawk. The aircraft orbited at Aberystwyth, all 3 joining in formation, then tracking North along the coast. My colleague

201507606	10/06/2015	EGTT : London (FIR)	EGCB : Manchester/Barton	3nm W	D	CTA	JODEL	Reciprocating	1	Infringement of the Manchester CTA (Class D) by an unknown aircraft at 2300. Aircraft identified as a Jodel DR100. AIW alerted. Standard separation maintained.	Airspace infringement. Jodel DR100 left the CTR from departure airstrip wearing 7373 squawk assigned by telephone via the VCR. This IFR squawk resulted in an instant MSAW alert and on first contact the pilot was given 7000 and a basic service. He elected to remain on listening watch and departed on an air test. At about 13:15 a 7000 AIW alert (no mode s) was observed west of Manchester Barton climbing through 2300ft into the CTA. I asked Manchester Barton FISO to check his traffic (negative result) as PC WAL sector telephoned me asking if it was our traffic. I called Jodel DR100 for a level check which corresponded with that of the unknown and issued 7350. The aircraft was identified, the pilot stated he was having issues with the aircraft and requested immediate return to departure airstrip. I advised him he was in CAS and he confirmed he could descend to leave which he did. A direct clearance to airstrip VFR was issued and the aircraft disappeared as expected over intended airstrip about 13:25. I was not aware of any conflicting traffic after establishing the identity of the infringer.
201507608	10/06/2015	EGTT : London (FIR)	Not specified		D	CTR	EUROCOPTER	Turboshaft	1	Infringement of the Manchester CTR (Class D) by a helicopter squawking 7366. Possible loss of separation with inbound aircraft.	At approximately 1430 I noticed a 7366 squawk in the vicinity of Lymm tracking towards the CTZ boundary. Using Mode S I could see the callsign. I free called the aircraft and issued squawk 7350. By the time the aircraft was identified it was inside controlled airspace by 1nm. I instructed the aircraft to turn right to enter the LLR. There was a possible loss of separation with an inbound on 05R ILS which had already passed the position of the aircraft, the next inbound was not turned towards the ILS until a/c was identified.☐ Supplementary 14/07/15:☐ Unfortunately I took the eastern line of the aircraft corridor as being the entire corridor and there is no difference in shading so assumed one side of it was Manchester CTR and the other Liverpool but now realize it is actually 4 miles wide. Clearly I was a little off the line. Should have set gps up to take in 2 reporting points of Leigh and M56 and compared it closely with my 1 000 000 map and then could have stayed in the middle freeing up the controllers time for his primary traffic.
201507608	10/06/2015	EGTT : London (FIR)	Not specified		D	CTR	UNKNOWN	Unknown		Infringement of the Manchester CTR (Class D) by a helicopter squawking 7366. 201507612	11/06/2015	EGTT : London (FIR)	Not specified		A	TMA	CESSNA	Reciprocating	1	Infringement of the LTMA (Class A) by a C172, resulting in loss of separation with an inbound A320. CAIT activated. Traffic info and avoiding action given.	Infringement of Heathrow Control Zone by C172. I was the Heathrow Final Director at the time of the infringement. Whilst A320 was on a base leg from the south for 09L, pCAIT activated with an aircraft in his twelve o'clock. I immediately passed avoiding action with a left turn and passed traffic information. A320 was taken through the localiser and subsequently vectored back onto the ILS for 09L. ☐ Supplementary 02/09/15:☐ The loss of separation was caused when C172 climbed into controlled airspace, without authorisation, into conflict with A320. The incident was resolved by avoiding action being issued to the pilot of A320 followed by C172 descending outside of controlled airspace.
201507612	11/06/2015	EGTT : London (FIR)	Not specified		A	TMA	AIRBUS	Turbofan	2	Infringement of the LTMA (Class A) by a C172, resulting in loss of separation with an inbound A320. CAIT activated. Traffic info and avoiding action given.	Infringement of Heathrow Control Zone by C172. I was the Heathrow Final Director at the time of the infringement. Whilst A320 was on a base leg from the south for 09L, pCAIT activated with an aircraft in his twelve o'clock. I immediately passed avoiding action with a left turn and passed traffic information. A320 was taken through the localiser and subsequently vectored back onto the ILS for 09L. ☐ Supplementary 02/09/15:☐ The loss of separation was caused when C172 climbed into controlled airspace, without authorisation, into conflict with A320. The incident was resolved by avoiding action being issued to the pilot of A320 followed by C172 descending outside of controlled airspace.

201507616	11/06/2015	EGTT : London (FIR)	SAM	Bearing 050 Range 11nm	D	CTA	PIPER	Reciprocating	1	Infringement of the Solent CTA (Class D) by a PA28 indicating 3900ft and climbing. Aircraft indicated 4200ft before leaving CAS. Standard separation maintained.	Whilst operating as Solent Radar, the Coordinator pointed out a contact, identified on mode S as a PA28, approaching the NE controlled airspace boundary. A series of blind calls were made and the A/C entered the CTA-7 at 1403 (SAM 050/11nm) indicating 3900ft and tracking NW whilst slowly climbing. The A/C entered the CTA-6 at 1404 indicating 4200ft before leaving controlled airspace at 1405(SAM030/12nm). Mode S indicated airframe number as 400bdf. The contact was tracked to the NW until it was observed to have selected a Brize Radar squawk, with a subsequent call from the coordinator confirming the callsign of the infringing A/C.☐ Supplementary 19/06/15:☐ Departed 06 and turned on track to next waypoint. Had a problem with landing gear and had very slow climb rate and thus IAS. I was a little pre-occupied with landing gear and indeed the prevailing winds at the time did blow me CLOSE to the Solent CTA but I believe not into it. I didn't get any alarms or noticed on 2 x GPS devices that I had actually entered Solent Radar CTA. Suggested Actions to Prevent a Recurrence: Plot a track further East and allow for the increased in forecast winds. I think the Radar coverage doesn't reconcile with the available GPS guidance at the time. Will contact Solent Radar next time into destination well in advance even if remaining outside their CTA boundaries. I will check my VFR chart and GPS devices that the CTA boundaries and charts are the same.
201507618	10/06/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	10nm SSW	G	Restricted area	CESSNA	Reciprocating	1	Infringement of the Stansted TMZ 2 (Class G) by an unknown aircraft squawking 7000. Aircraft identified as a C150. Traffic info and avoiding action issued to an inbound B737 against the C150 resulted in loss of separation with an inbound B757.	Loss of separation B737 vs B757 due to infringing aircraft. Whilst on duty as the Essex Radar controller, I was in the process of handing over when the oncoming controller pointed out a non mode C ac infringe the Stansted TMZ2. I gave avoiding action to B737, which at that time was on a closing heading for RWY04 of 020deg to take the aircraft away from the infringer. Due to the strong easterly wind, the assigned heading was not sufficient to maintain standard separation against B757 which was being positioned downwind behind B737. Mode C was subsequently observed on the infringing ac, subsequently identified as C150. The two inbound aircraft were then vectored without further incident.☐ Supplementary 12/08/15:☐ Alleged Stansted TMZ 2 Infringement. There was an extremely strong wind from the north so I came back at 1500 feet give me a better ground speed. I tracked around the M25 spoke to Stapleford on 122.80 descended to 1400 feet on 1029 QNH (I believe this was the local QNH trying to recall the fine details of the flight) and contacted North Weald on 123.525 to pass overhead the airfield and below the Stansted TMZ as I have done many times before. When I was clear of North Weald and passing over the SW edge of Harlow I changed frequency to Essex Radar on 120.625 but they were extremely busy with inbound traffic, so I didn't make contact with them and as I was below 1500 feet and squawking 7000 mode 'C' I thought it would be OK. I left the area below the TMZ between Ware and Puckeridge and continued on to Sibson at 1500 feet. I don't know why my mode 'C' wasn't seen on radar. I always have my mode 'C' on, and at no time was I above 1500 feet on the local QHN so
201507618	10/06/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	10nm SSW	G	Restricted area	BOEING	Turbofan	2	Infringement of the Stansted TMZ 2 (Class G) by an unknown aircraft squawking 7000. Traffic info and avoiding action given.	I observed an aircraft squawking 7010 without mode C infringe Stansted TMZ 2. As a result I had to give avoiding action and pass traffic information to inbound B737. I didn't consider the two aircraft to be in unsafe proximity. I tracked the infringer and obtained its details by phoning Elstree aerodrome.
201507645	10/06/2015	EGTT : London (FIR)	EGSX : North Weald		G	Restricted area	BOEING	Turbofan	2	Infringement of the Stansted TMZ (Class G) by a C172 squawking 7010. Traffic info and avoiding action given.	I observed an aircraft squawking 7010 without mode C infringe Stansted TMZ 2. As a result I had to give avoiding action and pass traffic information to inbound B737. I didn't consider the two aircraft to be in unsafe proximity. I tracked the infringer and obtained its details by phoning Elstree aerodrome.
201507646	08/06/2015	EGTT : London (FIR)	Not specified		G	Restricted area	PIPER	Reciprocating	1	Infringement of the Stansted TMZ 2 (Class G) by an unknown non-transponding aircraft. Aircraft identified as a PA28.	Infringement of Stansted TMZ 2. I observed a non-transponding aircraft infringe Stansted TMZ 2 from the north-west. I phoned North Weald to establish the aircraft's identity and get the pilot to turn his transponder on.
201507691	11/06/2015	EGTT : London (FIR)	EGKK (LGW): London/Gatwick		D	CTR	DIAMOND	Reciprocating	1	Infringement of the Gatwick CTR (Class D) by an unknown aircraft squawking 3767, resulting in loss of separation with traffic. Aircraft identified as a Diamond H36.	G/A due 3767 squawk entered Gatwick CTR. While working as AIR controller, INT PTY rang to advise me of an unknown a/c, SQ 3767 which was west of the Redhill LFA heading south, I was instructed to send around A320 who was on a 2nm final. I also elected to cancel the conditional line up clearance which had been issued. A320 was instructed to fly 180/3000ft, the previous departure was on a SFD SID, this a/c I held onto until I was assured separation between the a/c, this was never compromised. The 3767 squawk was observed turning onto final for 08 at an airfield and entered their ATZ, after coordination with Gatwick radar, normal ops were resumed.☐☐ Supplementary 16/06/15:☐ At 1242 I was working INT / FIN boxed. A 3767 squawk was observed to enter the CTZ, approximately 4nm west of Redhill heading South towards the Gatwick Final Approach. A320 was on final approach. I called Redhill to ask if they were working the aircraft, and they said not. I rang Gatwick AIR on the priority line and advised them Redhill were not working the aircraft, and asked them to break A320 off to the south and climb to altitude 3A. I believed at the time, the 3767 was in an unsafe proximity to A320, and thought this was the safest action. I subsequently called Redhill back and asked them if they were now working the aircraft to the West of them, and at this time the 3767 was tracking towards Redhill. Redhill confirmed they were working the aircraft, and had been the whole time. They said I had asked them about an aircraft to the East of them, not the West. I thought I had asked about an aircraft to the west of them tracking towards the Gatwick Final Approach. A320 was

201507692	11/06/2015	EGTT : London (FIR)	BIG	Bearing 090 Range 3nm	A	TMA	GRUMMAN	Reciprocating	1	Infringement of the London TMA (Class A) by an aircraft at 2800ft. Standard separation maintained.	Aircraft was cleared via EGKB APP for a DVR departure to 2400ft to remain outside controlled airspace. On departure the aircraft checked in initially started to say his level as 2800ft which corresponded with his Mode C, but paused mid sentence realising his error and reported 2400ft as he started to descend. He was then Identified and told to climb to 4000ft. I called EGKB APP to confirm what clearance had been given to the pilot and they reported that 2400ft had been given and read back by the pilot. No other traffic was in the vicinity to affect the level bust/infringement.
201507720	10/06/2015	EGTT : London (FIR)	EGBJ (GLO): Gloucestershire		G	ATZ	PIPER	Reciprocating	1	Possible infringement of the Gloucester/Staverton ATZ (Class G) by a PA28. Avoiding action taken by military aircraft.	A military aircraft was carrying out instrument training and had entered the GST hold at 3.0A at 09:20. Shortly after entering the hold, the pilot reported that he was taking avoiding action against other traffic. He advised that he was climbing to 3.5A and I acknowledged this and advised that I had no known traffic in that area. A PA28 had departed runway 09 to the west at 09:16 and I checked his altitude which he reported as being 2.3A. There was no other IFR traffic to affect the military aircraft's climb to 3.5A and he continued in the hold at this level until ready to commence the instrument approach. Upon speaking to the military afterwards, he advised that he was at the base of the cloud and had been concerned that there may have been other unknown traffic in the cloud. His on board flight equipment had shown another aircraft less than 1 mile away hence why he climbed, but he did not notice the height of the aircraft indicated on his equipment. He advised that he would be completing a DASOR military report. METAR 0920Z 05007KT 9999 BKN028 12/06 Q1031=

201507730	10/06/2015	EGTT : London (FIR)	Salisbury Plain	EG D123	G	Danger area	AVIONS ROBIN	Reciprocating	1	Infringement of Danger Area EG D123(Salisbury Plain) by an aircraft squawking 5076 at 2700ft.	At 1508 Local Bristol ATC telephoned to inform us that a civilian aircraft receiving a basic service (sqk 5076) from them had strayed into EGD D123 at 2700ft AMSL whilst conducting a navex. Bristol had advised the aircraft that he had entered the danger area upon which he turned west to vacate. EDG D123 was active to 5000ft AMSL at the time in support of a rotary wing trial and Warminster Danger Area was live firing to 2500ft AMSL. Due to a high workload at the time neither myself or my colleague spotted the aircraft infringe the danger area until the phone call from Bristol was received. My colleague, who took the phone call from Bristol noticed the aircraft overhead the Warminster Danger area heading west to vacate. On speaking with the pilot who phoned approximately 90 minutes later, he was very apologetic and explained that he was conducting a navex from Bournemouth to Bristol. At the point where he entered EGD 123 he was on a leg from Tisbury to Frome having planned to avoid the SPTA Danger Areas altogether, but due to strong winds he was pushed off course in an north easterly direction taking him overhead Warminster then into EGD D123. Convinced that he was still on track and overhead Frome, it was not until he was advised by Bristol that he had entered an active Danger Area did he realise his navigational error. He then headed west to vacate EGD D123. □ Supplementary 16/06/15:□ Whilst operating the Radar 2 position I was contacted by R2100 requesting a Basic Service. I instructed the pilot to squawk 5067 and identified him inside D123 at 3000 feet. The Danger Area was active up to 5000 feet. I instructed the pilot to leave the area immediately to the
201507753	04/06/2015	EGTT : London (FIR)	Freshwater Bay	Isle of Wight	D	CTA	PIPER	Reciprocating	1	Infringement of the Solent CTA (Class D) by a PA28 squawking 7377 reported to have climbed to 3300ft.	At approx. 13.40 my coordinator observed a #7377 squawk routing northeast bound climbing through 2000 altitude in the vicinity of Freshwater Bay, Isle of Wight. Neither EGHH nor blind transmissions were able to raise contact with the aircraft. Subsequently aircraft called in the vicinity of Portsmouth and was provided with a Basic Service. This was the aircraft that was believed to have infringed controlled airspace.□ Supplementary 15/6/15:□ It is noted that the aircraft operating on a local flight is reported to have climbed to 3300ft whilst tracking eastbound along 'The Solent'. The incident has also highlighted a potential safety issue regarding the serviceability of the aircraft's transponder as it did not appear to working continuously, although the owner says there is nothing wrong with it. □ Supplementary 16/07/15:□ The airspace infringement was caused by the pilot climbing into the Solent CTA without a clearance.
201507760	13/06/2015	EGTT : London (FIR)	LAPRA	W	A	TMA	PIPER	Reciprocating	1	Infringement of the LTMA (Class A) by an unknown aircraft indicating FL98. Aircraft identified as a PA24. Standard separation maintained.	Infringement on FIS frequency. West of LAPRA, PA24. As TC East Controller I observed an infringing FIS code indicating FL98 to the west of LAPRA. This was in close proximity to an inbound fltnum 81TF, which was then turned away and stopped at FL120. The FIR were then called to ask about the infringing aircraft and advised that the aircraft needed to descend to below FL65 (the base of CAS it would eventually fly into). They then passed the information onto the pilot. The infringing aircraft was still apparent a few minutes later as it transited at FL85. On a second telephone call to the FIR they stated they had been having difficulty with the pilot of the aircraft. It was re-iterated that the aircraft would have to descend below FL65 and that infringing reporting action would be taken. The GS South then spoke with the FIR to obtain details of the infringing aircraft. The FIR reported the aircraft should now be descending to FL 64.□ Supplementary 16/06/15:□ Infringement to East CLN. Was working PA24 at 5000' initially. Pilot asked for Flight plan activation, which was done. Pilot reported climbing 6000' to be VFR above cloud. FISO told pilot climb at his discretion. Then FISO continued working other traffic. Sometime later a call was received by FISO support from Terminal Control to confirm PA24 was infringing controlled airspace near Wattisham at FL094. UCE took frequency momentarily to advise PA24 of the base of Controlled Airspace in that area (FL085) and also base further along route of FL065.Advised pilot that A/C should be FL64 or below to be outside controlled airspace. AC continued to maintain altitude for some considerable time after radio call was
201507760	13/06/2015	EGTT : London (FIR)	LAPRA	W	A	TMA	UNKNOWN	Unknown		Infringement of the LTMA (Class A) by an unknown aircraft indicating FL98. Aircraft identified as a PA24. 201507779	23/05/2015	EGTT : London (FIR)	REXAM		A	Airway - ATS Route	OTHER	Reciprocating	1	Infringement of Airway N864 (Class A) by an unknown aircraft squawking 7000, indicating FL60. Aircraft identified as a Eurofox 912. CAIT activated. Standard separation maintained.	Aircraft infringed WAL airspace. Working as WAL Tac (OP29C). At 1455 a CAIT return alerted myself and the WAL planner to an infringing a/c in WAL airspace. The a/c showed a 7000 squawk but the 'aircraft data' tab showed his call-sign to be a Eurofox 912 and he indicated FL60. He infringed SE of REXAM by 4nm and transmitted across the airway N864 in a NW direction. The sector was quiet, workload was light and there was no conflictions. The sector controllers continued to monitor the aircraft who later changed to a squawk of its intended destination. Intended destination supervisor was phoned and asked if he could ask the pilot to phone the LAS W2 desk when he landed. Working as LAS W2. At 1600 the pilot of Eurofox 912 phoned the W2 desk. He explained that he was travelling from departure airfield to intended destination. He had his maps in front of him and he believed he transited slightly south of his actual track were the base was FL65. I explained that he was actually further north than he'd anticipated were the base was 4500'A. He was very apologetic and said he wouldn't let it happen again.

201507791	13/06/2015	EGTT : London (FIR)	BIG	4nm S	A	Restrict ed area	DIAMOND	Reciprocating	1	Infringement of the Red Arrows RA(T) at Biggin Hill by an unknown aircraft squawking 3767 at 1400ft. Aircraft identified as a DA20. Traffic info was given to the Red Arrows.	I was providing a discrete traffic service to the Red Arrows who were displaying. A return was observed in the southern part of the RAT squawking 3767 (Redhill conspicuity). At no point did the a/c infringe CAS, only the RAT was penetrated. I passed traffic to the Red Arrows and asked Redhill to instruct the traffic to leave immediately (through Gatwick initially for speed - I then called them myself when I had time to find the phone line, which is not normally used on the SVFR phone panel). The a/c was identified as a training flight from a flying school. <input type="checkbox"/> Supplementary 18/06/2015: <input type="checkbox"/> The flight was a re-familiarisation training flight for a student who has not flown since 6/12/14. The runway in use was 26L at Redhill. After checking Notams and noting the air display at Biggin Hill we check the chart and saw we would pass along the Southern edge of the RAT. Planning to fly East then down towards Bough Beech reservoir and towards training area in the Bewl water area. The departure route given by Redhill tower was to fly vfr towards Godstone, a route commonly used as it is a vrp. Looking at the chart we were then going skirt the edge of the RAT & head towards Oxted then South Westerly away from the RAT towards Bough Beech avoiding any inbound traffic who usually route Bough Beech, Eden Bridge, South Godstone station, Redhill along the North side of the railway line, which is our normal separation inbound/outbound traffic. <input type="checkbox"/> I now realise that the course given was directing us towards the RAT and we should of immediately changed from Redhill tower on departure to Farnborough East LARS and risked
201507794	07/06/2015	EGTT : London (FIR)	EGSG : Stapleford	3nm NNW	D	CTA	DIAMOND	Reciprocating	1	Infringement of the Stansted CTA (Class D) by a DA40 at 2400ft, resulting in loss of separation with an inbound A319. Traffic info given.	I was PIC en route when I infringed Stansted CTA at 10:37. Departure airfield has two runways, 04 and 22. Typically I used runway 22 however on this day runway 04 was in use. I took off and followed standard procedure climbing to 1000 ft before making a left turn towards my first way-point which was N514255 W0002308. As is apparent in the radar images I have misjudged my distance from Stansted CTA and rather than turn correctly downwind and continue climbing, I have extended my turn and infringed Stansted CTA. What is clear is that my judgement was incorrect. I believe this was due to my lack of familiarity with using Runway 04 and also not fully appreciating just how close the Stansted CTA is to the departure airfield ATZ. I am deeply concerned at the error that I've made and have put into action the following: I am spending time reviewing the airspace in question and specifically the proximity to departure airfield when taking off from Runway 04. I have reviewed the correct turn out, I will ensure I remain below 1500ft and I have further familiarised myself with the specific ground features to make the turn correctly and avoid any risk of infringement. I have also sought some further training from an Instructor to seek advice about making better use of the ATC at Farnborough Lars North and to practice the turn out so that in future I am fully confident of the distance at which I can extend safely and so not repeat the error. And lastly, I have added a further pre-flight check to ensure that the alert function on GPS is active. Unfortunately, the airspace warning alert on GPS was not turned on. <input type="checkbox"/> Supplementary 25/08/15: <input type="checkbox"/>
201507794	07/06/2015	EGTT : London (FIR)	EGSG : Stapleford	3nm NNW	D	CTA	AIRBUS	Turbofan	2	Infringement of the Stansted CTA (Class D) by a DA40 at 2400ft, resulting in loss of separation with an inbound A319. Traffic info given.	I was PIC en route when I infringed Stansted CTA at 10:37. Departure airfield has two runways, 04 and 22. Typically I used runway 22 however on this day runway 04 was in use. 201507809	03/06/2015	EGTT : London (FIR)	Danger Area EG D118	Pembrey Sands	G	Danger area	AVIONS ROBIN	Reciprocating	1	Infringement of Danger Area EG D118 Pembrey Sands (Class G) by a DR400. Traffic info given.	At about 1200Z a light aircraft was seen approx 2nm East of Pembrey Range Control tower at low level, it appeared to be on finals for Pembrey Airfield. Two military aircraft were using the Range at the time of the incident and had reported seeing the light aircraft. It was subsequently discovered that the DR400 pilot had misidentified Pembrey airfield for Swansea and was making calls to Swansea Radio believing to be on finals there. At some point during final approach, he presumably realised his error, abandoned the approach to Pembrey and departed to Swansea. An effective lookout by the military pilots active on the range at the time of the infringement resulted in them sighting the DR400 in good time.
201507810	09/06/2015	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	16nm E	A	TMA	PIPER	Reciprocating	1	Infringement of the LTMA (Class A) by an unknown aircraft squawking 7000 at 2700ft, resulting in loss of separation with an inbound A319. Aircraft identified as a PA28. CAIT activated. Traffic info and avoiding action given.	Avoiding action. I was working on Fin, when a secondary CAIT alerted me to a 7000 return at 2500 which was in tolerance and I decide to take no action, however the very next sweep it when to 2700ft so I took avoiding action with the A319 and passed traffic information. I 7000 was subsequently seen to put on a 3603 squawk, so military ATC was contacted and it was identified as a PA28.
201507810	09/06/2015	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	16nm E	A	TMA	AIRBUS	Turbofan	2	Infringement of the LTMA (Class A) by an unknown aircraft squawking 7000 at 2700ft, resulting in loss of separation with an inbound A319. 201507814	15/06/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	7nm East	D	CTA	CESSNA	Reciprocating	1	Infringement of the Stansted CTA (Class D) by a C182 squawking 5023 at 2000ft. Departures suspended.	At approx 1345 I was alerted by SCAIT (controlled airspace infringement tool) to an aircraft entering Stansted controlled airspace (base 1500ft) at an indicated altitude of 2000ft in the vicinity of Andrewsfield aerodrome, tracking north west toward the runway 04 climbout. The squawk code associated with the radar contact was 5023, a Farnborough LARS North code. A telephone conversation with the Farnborough LARS controller revealed that he'd transferred the pilot to Andrewsfield radio, but would be regaining R/T contact after the aircraft had crossed their ATZ. After a couple of minutes he rang again to say that he now had contact and was descending the aircraft. An identical situation occurred approx 5 mins earlier with another German registered aircraft displaying Farnborough LARS code 5022, but departing aircraft were fortunately not delayed. Stansted departures were suspended for approx 3 mins whilst the aircraft was inside controlled airspace without clearance and at least one aircraft was delayed. I believe both aircraft landed at Duxford.☐ Supplementary 16/06/2015☐ C182 flying from LFQQ to EGSC came on frequency routing east around the Stansted Control Zone not above altitude 2A. I warned him that Andrewsfield ATZ was ahead of him and suggested speaking to Andrewfield to transit their ATZ. C182 free called Andrewsfield whilst still south of their ATZ and at 1.9A tracking Northbound. A/c then returned on Farnborough LARS North frequency when approximately 2 miles north of the Andrewsfield ATZ maintaining 1.9A still tracking North. I had already spoken to Essex when the C182 was speaking with Andrewsfield and warned them that the C182 may infringe upon leaving the
201507817	15/06/2015	EGTT : London (FIR)	MAY	Bearing 235 Range 20nm	A	TMA	VANS	Reciprocating	1	Infringement of the London TMA (Class A) by an aircraft squawking 7000 at 3300ft. Traffic info and avoiding action given. Separation lost.	I was working a busy session bandboxed which was soon to tail off so in my professional judgement I felt there was no need for a FIN director at that time especially as the traffic was weighted heavier from the East with only one confliction from the West. Suddenly a 7000 appeared in the SW quadrant class A airspace at 3300feet. I immediately gave avoiding action to B787 with traffic I did not allow the blips to merge at any time. Farnborough quickly rang as I watched the traffic leave controlled airspace. I then called clear of traffic. I immediately requested assistance to split the sector but subsequently did not require it. Farnborough identified the traffic and route.

201507817	15/06/2015	EGTT : London (FIR)	MAY	Bearing 235 Range 20nm	A	TMA	BOEING	Turbofan	2	Infringement of the London TMA (Class A) by an aircraft squawking 7000 at 3300ft. 201507934	23/05/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	Bearing W Range 15nm	D	CTA	CYCLONE AIRSPORTS	Reciprocating	1	Infringement of the Stansted CTA (Class D) by a Microlight at 1500ft. Traffic info given.	Background: Aircraft was inbound to Hunsdon, a Microlight site which Essex radar have a good working relationship with and one which we would all like to maintain given its close proximity to the SS CTA - this particular event in our opinion was cleared up on the day but I have been asked to file this report after the investigations department queried it. Event: As far as I can recall I took over as SS Fin and noticed a contact tracking towards the SS CTA in the vicinity of Hunsdon. It seemed to me that he was more than likely about to enter the CTA so I gave an inbound flight a very early warning that I would most likely be repositioning him for a down wind right hand pattern to avoid the contact until we established its intentions. When the contact entered controlled airspace myself on SS FIN (136.2) and SS INT (120.625) put out blanket calls for the aircraft in an attempt to gather his intentions. Shortly after the aircraft selected the 0013 monitoring squawk for Essex and talked to SS Int on 120.625. I cannot be sure what was said on this frequency, but it was established that he has been distracted in the cockpit, was fully aware of his error and was making an immediate descent to correct this through coordination with my SS INT colleague. Given this I continued to vector inbound aircraft as normal as the infringer was now known traffic and we were all happy that the situation as safe. We called the supervisor over at the time and asked him what we should do with regards to reporting action given the chain of events, which we classed as a very brief and non consequential infringement of the CTA although there was a very small margin of delay to the inbound flight In discussion we all agreed little would be gained from an MOR and that the infringer had quite clearly suffered from a

201507951	16/06/2015	EGTT : London (FIR)	SAM	Bearing 039 Range 12.5nm	D	CTA	OTHER	Reciprocating	1	Infringement of the Solent CTA (Class D) by two microlights in close formation squawking 7000 at 3500ft.	At approximately time 0845 I noticed two contacts in close formation passing Popham tracking south east bound towards New Arlesford. They both indicated 7000 at 3400 feet. I continued to monitor them and as they approached the Solent CTA Area 5 made blind calls to both of the Mode S indicated callsigns. Neither responded. At time 0851 both aircraft entered the Solent CTA Area 5 at 3500 feet setting off the AIW, bearing 039 from SAM at 12.5nm. The aircraft tracked southeast, entering Area 7 briefly, before leaving controlled airspace at time 0852. Both aircraft were seen to be descending in the vicinity of Goodwood at time 0913. □ Supplementary 22/06/15: □ The GPS trace show that we NEARLY entered controlled airspace. This near infringement was probably caused by me as the pilot of microlight (1). We were flying in close formation with microlight (2). We were concentrating on making the most of the ideal conditions to take some air to air photos. The pilot of microlight (2) would have been concerned with maintaining straight and level and may have not noticed the proximity of the CTA and I, as the pilot of microlight (1), was concentrating on maintaining separation from microlight (2). Having taken some photos I glanced at my GPS and noticed how close we had got to the CTA and moved further away. The solution is easy to comprehend, we should not have been taking air to air photos whilst so close to a CTA. I accept full responsibility for any problems caused by either aircraft and I will endeavour to never repeat the situation. □ Supplementary 10/08/15: □

201507953	16/06/2015	EGTT : London (FIR)	EGCC (MAN): Manchester/Intl	Northern End of LLR	D	CTA	GROB	Reciprocating	1	Infringement of the Manchester CTA (Class D) by a Grob G115 squawking 7375 at 2000ft. Departures stopped.	AIW tool highlighted a zone infringement at 2000ft 7375 code in the northern portion of the LLR. The aircraft appeared to be tracking towards EGCB via Leigh Flash. I attempted to identify the aircraft by telephone calls to EGCB and EGGP. Neither units knew about the traffic. The aircraft then turned at Leigh Flash and headed south in the LLR at 2000ft. Calls were made on the approach frequency and departures from EGCC were stopped and those already airborne had amended routing's to avoid. Mode S info gave a callsign, a free call to the aircraft was made on approach and the aircraft answered. At this point the aircraft had descended to 1200ft and I placed it on a Manchester squawk. □ Supplementary 16/6/15: □ The transit route from Woodvale to Cranwell included transit of the Manchester Low VFR Route (southbound) at a planned altitude of 1200ft on the Manchester QNH (1025HPa). The planned route included descent from 2000 ft QNH to 1200 ft QNH prior to passing the M6 J26 VRP, which is 6nm WNW of the start of the VFR route. Due to pilot error, the descent was not commenced until 2nm south of the Leigh Flash VRP when a 'post-HAAT; check was carried out. As a result, approximately 6nm of Class D airspace at the north end of the VFR route was infringed. During communication with Manchester Radar and shortly after descent to 1200 ft was completed (just before crossing the M62), the crew was advised to contact Manchester ATC by landline after landing. I contacted Manchester ATC by landline, was advised that an ATC MOR was to be raised and passed my name, email and mobile number. I am expecting an email directing me to the CAA website to complete an
201507954	16/06/2015	EGTT : London (FIR)	SAM	7nm SSE	D	CTR	PIPER	Reciprocating	1	Infringement of the Southampton CTR (Class D) by an unknown aircraft showing as a primary contact only. Aircraft believed to be a PA28. Traffic info given. Standard separation maintained.	Infringement of Southampton CTR. At 0930 a primary contact was observed tracking into the Southampton CTR in the vicinity of Calshot (Northbound). There was no traffic affected. Shortly after, primary radar was taken OOS for maintenance, so radar contact was therefore lost with the aircraft in the vicinity of the Hamble river. Blind calls were made for the aircraft, the tower was asked if they could see anything (nothing seen), Bournemouth Radar were asked if they were working the traffic (they weren't). The Solent Co-ordinator called Lee On Solent airfield, they believed the aircraft to be a PA28 which joined their circuit at 0937 and was later confirmed to be on the ground. □ Supplementary 14/07/15: □ In order to enter for circuit for Runway 23, and being unsure of the position of the airfield, I veered too far to the north and thereby entered restricted airspace. In order to find the airfield, it was suggested that I should aim for an inlet to the north of the airfield and I mistook the Hamble for this feature. Cockpit pressure was quite high at that time knowing that I was close to Restricted airspace and at the same time trying to locate the airfield. I have since attend a presentation by Southampton ATC and have learned that it in a situation where there is a possibility coming close to restricted area then it is wise to speak with the relevant ATC to advise them of my intentions. □ Supplementary 10/08/15: □ The pilot entered the Southampton Control Zone without a clearance after passing Calshot whilst trying to identify and position for Lee-on-Solent. Although the pilot was aware of the

201507980	12/06/2015	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD	8nm S	D	CTA	CESSNA	Reciprocating	1	Infringement of the Doncaster CTA (Class D) by a C152 at 1800ft. Traffic info given. Standard separation maintained.	Zone infringer at Doncaster. When questioned, C152 reported flying at 1800' QNH 1012 where the base of controlled airspace is 1500'. C152 was informed that he was inside controlled airspace and provided with traffic information on a PA28 IFR on the procedural NDB approach. Traffic information was issued to PA28 (IFR on approach) but no avoiding action was required as C152 promptly left controlled airspace.
201507980	12/06/2015	EGTT : London (FIR)	EGCN : DONCASTER SHEFFIELD	8nm S	D	CTA	PIPER	Reciprocating	1	Infringement of the Doncaster CTA (Class D) by a C152 at 1800ft. Traffic info given. Standard separation maintained.	Zone infringer at Doncaster. When questioned, C152 reported flying at 1800' QNH 1012 where the base of controlled airspace is 1500'. C152 was informed that he was inside controlled airspace and provided with traffic information on a PA28 IFR on the procedural NDB approach. Traffic information was issued to PA28 (IFR on approach) but no avoiding action was required as C152 promptly left controlled airspace.
201507984	15/06/2015	EGTT : London (FIR)	BNN	Bearing 350 Range 4nm	D	CTR	CESSNA	Reciprocating	1	Infringement of the Luton CTR (Class D) by an aircraft at 2200ft. Check all placed.	I was vectoring on to rwy 08 when an FIS cait appeared. I looked at the mode s which showed a/c identity. I called FIS to confirm the level and intentions of the a/c. It seems Essex were contacted about them. The assistant behind me gave me a note from fir with details on I9401. I was on the phone with FIS. They said the a/c were weather avoiding and they were transferred to me. A (possibly Italian) pilot called but was unable to understand my requests. I placed a check all on as he could not confirm he was going to leave the zone. I passed the details on to SVFR.☐ CAA Closure:☐ No action taken. Closed due elapsed time. Registration will be monitored.
201508074	17/06/2015	EGTT : London (FIR)	CPT		A	TMA	BEECH	Turboprop	2	Infringement of the London TMA (Class A) by an aircraft squawking 7000 at 5000ft. Aircraft identified as a BE300. Traffic info given. Separation lost.	I was working as the SW deps controller working a SR22 who was outside controlled airspace airborne from EGTB, routing towards CPT looking for a join. I advised aircraft that it was a Basic service outside controlled airspace and climbed him initially to 5000'. I had already given the aircraft traffic information on one aircraft outside controlled airspace when I noticed another A/C outside of controlled airspace west of CPT by about 10 miles tracking east at 5000'. I again gave SR22 traffic information on this aircraft and continued his climb to FL100. This unknown traffic west of CPT was initially squawking 37..? but soon after changed to 7000 and as a result was filtered out of my radar. Because the unknown aircraft continued in a easterly direction, as it passed CPT it changed to magenta as CAIT picked it up as an infringer, because it was still at 5000'. I believe I gave traffic information again to the SR22, as he was passing to the east of CPT heading south, but gave no avoiding action as SR22 was at this time at 6000' and climbing and the infringer was passing behind. I was then advised by my coordinator that Farnborough radar was talking to the infringer and were descending the aircraft out of controlled airspace. (I was told at some stage the identity of the unknown aircraft. ☐ Supplementary 29/06/2015:☐ After leaving the Daventry RC and descending to 5000ft on the RPS, a LARS was established with RAF Brize Norton requesting a handover to Farnborough Radar when available. An Easterly radar heading (095, if memory serves) was established approx 10NM West of CPT VOR and a short time later we were instructed to freecall Farnborough Radar.
201508074	17/06/2015	EGTT : London (FIR)	CPT		A	TMA	CIRRUS	Reciprocating	1	Infringement of the London TMA (Class A) by an aircraft squawking 7000 at 5000ft. Aircraft identified as a BE300. 201508085	04/06/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted		D	CTA	GROB	Reciprocating	1	Infringement of the Stansted CTA (Class D) by an unknown aircraft squawking 7000 indicating 2100ft, resulting in loss of separation with an inbound B737. Aircraft identified as a G115. Traffic info and avoiding action given.	G115 infringed the Stansted CTA. B737 was downwind for R22 descending to 4000 feet. As I looked up to turn him onto base leg I realised that an unknown aircraft had entered the Stansted CTA indicating 2100 feet. I gave B737 avoiding action, stopped his descent at 6000 feet and gave him traffic information. The unknown aircraft soon left CAS and was tracked to an airfield who identified him as G115.
201508085	04/06/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted		D	CTA	BOEING	Turbofan	2	Infringement of the Stansted CTA (Class D) by an unknown aircraft squawking 7000 indicating 2100ft, resulting in loss of separation with an inbound B737. Aircraft identified as a G115. Traffic info and avoiding action given.	G115 infringed the Stansted CTA. B737 was downwind for R22 descending to 4000 feet. As I looked up to turn him onto base leg I realised that an unknown aircraft had entered the Stansted CTA indicating 2100 feet. I gave B737 avoiding action, stopped his descent at 6000 feet and gave him traffic information. The unknown aircraft soon left CAS and was tracked to an airfield who identified him as G115.
201508086	05/06/2015	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	8nm ENE	D	CTA	CESSNA	Reciprocating	1	Infringement of the Gatwick CTA (Class D) by a C152 at 1700ft, resulting in loss of separation with inbound aircraft. Traffic info and avoiding action given.	C152 outbound infringed. C152 infringed the CTA at A17 and separation was lost between an inbound. I gave avoiding action to A319 and B737 to try to regain separation. The infringer was identified by the GS by calling C152's departure airfield. C152 left controlled airspace to the East.
201508086	05/06/2015	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	8nm ENE	D	CTA	AIRBUS	Turbofan	2	Infringement of the Gatwick CTA (Class D) by a C152 at 1700ft, resulting in loss of separation with inbound aircraft. Traffic info and avoiding action given.	C152 outbound infringed. C152 infringed the CTA at A17 and separation was lost between an inbound. I gave avoiding action to A319 and B737 to try to regain separation. The infringer was identified by the GS by calling C152's departure airfield. C152 left controlled airspace to the East.
201508086	05/06/2015	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	8nm ENE	D	CTA	BOEING	Turbofan	2	Infringement of the Gatwick CTA (Class D) by a C152 at 1700ft, resulting in loss of separation with inbound aircraft. Traffic info and avoiding action given.	C152 outbound infringed. C152 infringed the CTA at A17 and separation was lost between an inbound. I gave avoiding action to A319 and B737 to try to regain separation. The infringer was identified by the GS by calling C152's departure airfield. C152 left controlled airspace to the East.

201508121	18/06/2015	EGTT : London (FIR)	Not specified		D	CTA	CESSNA	Reciprocating	1	Infringement of the Gatwick CTA (Class D) by an unknown aircraft, resulting in loss of separation with an inbound A320. Aircraft identified as a C177.	Gatwick CTA infringement. Whilst working as INT, I noticed an aircraft in an airfield's circuit flying downwind right for RWY36. Inbound IFR traffic for Gatwick was at 3.5nm and 10nm respectively with more in the pattern. The aircraft in the circuit was seen to infringe Gatwick CAS and make a late base turn. The infringing aircraft was observed to be at approximately 3nm from A320 at a similar height. I used the TWR priority line to instruct the tower to pass essential traffic information to the A320 that had been on the tower frequency for quite some time. If the infringing aircraft had carried on its original track it would have passed behind the A320. I therefore decided that it was safer to continue A320's approach and not break it off the ILS. From mode S data, the infringing aircraft was observed to be C177.☐ CAA Closure:☐ Pilot error. Situational awareness. Failed on-line test, retraining letter sent.
201508121	18/06/2015	EGTT : London (FIR)	Not specified		D	CTA	AIRBUS	Turbofan	2	Infringement of the Gatwick CTA (Class D) by an unknown aircraft, resulting in loss of separation with an inbound A320. 201508128	18/06/2015	EGTT : London (FIR)	EGLM : White waltham	SE	D	CTR	DE HAVILLAND	Reciprocating	1	Infringement of the London CTR (Class D) by an unknown aircraft showing as a primary contact only. Aircraft identified as a DHC1. Heathrow departures stopped. Traffic info given. Standard separation maintained.	Infringer of London CTR. I was the SVFR controller on duty. The sector was split from Thames. At 1433, I noticed a primary contact leave the White Waltham LFA and enter the London CTR. I immediately stopped departures at Heathrow and informed TMA South. I then called White Waltham and asked them to make a broadcast to any aircraft that were operating to the south-east of their ATZ to track westbound. The aircraft then spent the next 7 minutes flying around the western half of the CTR before leaving at 1440 by Cookham. The aircraft then proceeded to fly through the Booker circuit without talking to them and they were able to identify the aircraft as a DHC1 but couldn't get a registration. The aircraft then carried on towards its destination and landed at 1453. The aircraft was identified as being on a base leg for runway 07 by the airfields FISO.
201508131	18/06/2015	EGTT : London (FIR)	Syerston		G	ATZ	BELL	Turboshaft	1	Alleged infringement of the Syerston ATZ (Class G) by a B206 at 800ft.	Suspected ATZ infringement. I entered the crew briefing room and could hear a helicopter approaching the airfield. The helicopter came into view approaching the airfield from the south. I made contact with the helicopter using the Syerston A/G frequency. He identified himself as a B206. I asked him if he had made contact with anyone at Syerston. He said that he had attempted to make contact and said that he thought the airfield was closed. This conclusion was from the active NOTAM. I suggested that he should have read the NOTAM more carefully as the NOTAM says that the ATZ is closed at weekends. He altered course overhead the airfield and departed in a north-westerly direction. I estimated that he overflew the airfield at 800 feet AGL. There were no Syerston based flying operations in progress at the time.☐ Supervisors Narrative:☐ I will make contact with the pilot to ascertain why he entered the ATZ without establishing positive two way communication.
201508159	01/06/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	12nm SW	D	CTA	VANS	Reciprocating	1	Infringement of the Stansted CTA 2 (Class D) by an unknown aircraft squawking 7000. Aircraft identified as a Vans RV4. Standard separation maintained.	Infringement Stansted CTA 2. An a/c squawking 7000 entered the Stansted southern CTA at 2A without a clearance. Luton Radar advised that they had last worked it and that it had called a destination. I called the destination and asked them to ask the pilot to descend to leave CAS which the pilot did. I also called TMA north who were working a DET departure out of Stansted to advise them that the infringer was leaving CAS. The infringer was previously identified by Luton as Vans RV4.

201508167	16/05/2015	EGTT : London (FIR)	WHI		D	CTR	CESSNA	Reciprocating	1	Infringement of the Liverpool CTR (Class D) by an unknown aircraft indicating between 1500 and 1800ft. Aircraft identified as a C152. CAIT activated. Standard separation maintained.	C152 Liverpool Zone infringement (PC actions). C152 activated our CAIT alert once west of the Manchester LLR and infringed Liverpool Zone near WHI by about 0.5nm. Mode C indicated between 1.5A and 1.8A during the alert. We phoned Liverpool to see if it was known traffic to them and it was not. As a result, due to our need to 'take 5' against unknown traffic that is a CAIT alert, we put a Take Off Subject Radar (TOSR) restriction on A319 on a NANTI2T departure. This was removed when the infringer cleared the Liverpool Zone to the south. The aircraft was not delayed though.
201508167	16/05/2015	EGTT : London (FIR)	WHI		D	CTR	AIRBUS	Turbofan	2	Infringement of the Liverpool CTR (Class D) by an unknown aircraft indicating between 1500 and 1800ft. Aircraft identified as a C152. CAIT activated. Standard separation maintained.	C152 Liverpool Zone infringement (PC actions). C152 activated our CAIT alert once west of the Manchester LLR and infringed Liverpool Zone near WHI by about 0.5nm. Mode C indicated between 1.5A and 1.8A during the alert. We phoned Liverpool to see if it was known traffic to them and it was not. As a result, due to our need to 'take 5' against unknown traffic that is a CAIT alert, we put a Take Off Subject Radar (TOSR) restriction on A319 on a NANTI2T departure. This was removed when the infringer cleared the Liverpool Zone to the south. The aircraft was not delayed though.
201508168	03/06/2015	EGTT : London (FIR)	BARTN		D	CTA	PIPER	Reciprocating	1	Infringement of the Manchester CTA (Class D) by an unknown aircraft squawking 7000 at 4700ft. Aircraft identified as a PA28. AIW activated. Northbound departures were suspended. Standard separation maintained.	Noticed magenta 7000 squawk, A4700, at BARTN tracking to the NW. Planner phoned Manchester to see if they knew anything, as a result deps to the NORTH sector were cancelled till a/c had vacated to the NW. □ Supplementary 19/06/15: □ An unknown aircraft triggered the AIW indicating approx. FL50. Northbound departures were suspended, coordination was effected with north and Walsy sectors and blind calls were made without success. An aircraft inbound was passing downwind to the north of the infringer's position. The aircraft tracked towards Winter Hill and appeared to slowly descend. Following coordination with Barton the aircraft was believed to be a PA28 at 2700ft.
201508169	03/06/2015	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	11nm E	D	CTA	GROB	Reciprocating	1	Infringement of the East Midlands CTA (Class D) by an unknown aircraft squawking 2612 at 2100ft. Aircraft identified as a G115. Inbound DA42 affected. Traffic info given. Standard separation maintained.	DA42 broken off wide left base due unknown traffic infringing CTA. DA42 was being vectored for the ILS on a wide left base in the descent to 3000ft when unknown traffic was seen approx 4miles SE of Nottingham airfield southbound, indicating 2100 ft and about to infringe the CTA-2 11 miles east of East Midlands. It subsequently entered controlled airspace at 2100ft without a clearance. I vectored DA42 to the NW and then downwind right hand. MOD ATC advised that due to high workload they were unaware of the aircrafts position.
201508169	03/06/2015	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	11nm E	D	CTA	DIAMOND	Reciprocating	2	Infringement of the East Midlands CTA (Class D) by an unknown aircraft squawking 2612 at 2100ft. Aircraft identified as a G115. Inbound DA42 affected. Traffic info given. Standard separation maintained.	DA42 broken off wide left base due unknown traffic infringing CTA. DA42 was being vectored for the ILS on a wide left base in the descent to 3000ft when unknown traffic was seen approx 4miles SE of Nottingham airfield southbound, indicating 2100 ft and about to infringe the CTA-2 11 miles east of East Midlands. It subsequently entered controlled airspace at 2100ft without a clearance. I vectored DA42 to the NW and then downwind right hand. MOD ATC advised that due to high workload they were unaware of the aircrafts position.

201508175	04/06/2015	EGTT : London (FIR)	EGSX : North Weald	1nm N	D	CTA	ROBINSON	Reciprocating	1	Infringement of the Stansted CTA (Class D) by an unknown aircraft at 1900ft. Aircraft identified as a R44. Standard separation maintained.	At the time of the incident, I was the controller on NE Departures. The sector was complex three airfields on easterlies and two others on a westerly configuration. At around 07:30(z), I noticed a CAIT activation to the south of Stansted, namely R44 tracking in a westerly direction. DHC8 was inbound via BPK and was tracking towards BPK descending to altitudes. I judged that R44 was slow moving and that the only avoiding action I could give to DHC8 to try and achieve 5nm separation would take DHC8 into the path of the Heathrow climb out, thus potentially making the situation worse. I decided that R44 was going behind DHC8 and that monitoring the aircraft would be a reasonable course of action. At some point during the incident, my co-ordinator told me that R44 was now working Thames. I therefore now assumed that the mode C readout of R44 was correct. Also during the incident I avoided turning a second inbound to Lambourne as it would have been in conflict with R44 and by co-ordinator declined a request for a release from Luton Air due to the infringer.☐ Supplementary 19/06/15:☐ Stansted CTA infringement R44. At approx. 0735z, unknown traffic appeared in the North Weald overhead tracking westbound, which climbed to 1900ft. The traffic was wearing a Farnborough squawk, but had not been coordinated into Stansted Airspace. I was not plugged in at the time. The radar controller D. Hendley coordinated a stop on Stansted departures to prevent a loss of separation against departing traffic. I helped with the coordination with adjacent sectors. It is unclear at present which agency was working the R44 (details form Mode S data), but it appears to be either North Weald or Farnborough
201508175	04/06/2015	EGTT : London (FIR)	EGSX : North Weald	1nm N	D	CTA	DE HAVILLAND	Turboprop	2	Infringement of the Stansted CTA (Class D) by an unknown aircraft at 1900ft. 201508179	04/06/2015	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	8nm NE	D	CTA	PIPER	Reciprocating	1	Infringement of the East Midlands CTA 1 by an unknown aircraft squawking 6160 at 4700ft. Aircraft identified as a PA28. Standard separation maintained.	Infringement PA28. At 1602z I observed a 6160 squawk entering CTA1, 8nm north east of East Midlands at 4700ft (base of cta 2500ft). Aircraft continued on a south westerly track into the CTA and climbed to 5000ft. When it was 6.5nm north east of East Midlands it turned 180 degrees onto a north easterly track and exited the CTA at the same point where it had entered at 1605z. Doncaster radar were contacted and they then identified the aircraft on a 6162 squawk and confirmed it was at 5000ft. Doncaster confirmed the aircraft was a PA278.
201508194	22/04/2015	EGTT : London (FIR)	EGVN (BZZ): Brize norton		D	CTR	SCHEIBE	Reciprocating	1	Infringement of the Brize Norton CTR (Class D) by an unknown aircraft showing as a primary contact only. Aircraft believed to be a SF25. Traffic info given.	CTR Infringement - SF25. SF25 was on the LARS VHF frequency, in receipt of a Basic Service. The aircraft was not transponder equipped, and as such could only be tracked by primary radar. As the service provided was a BS service, the aircraft had not been identified and its position was only generally known. A primary contact was seen to appear, approximately 1 mile inside the southern edge of the CTR boundary transiting East. This contact was suspected to be SF25, and a radio check was carried out in order to gain a DF bearing. The subsequent DF trace pointed to the primary contact, and SF25 (whilst still not officially identified) was advised that the controller believed the aircraft to be inside controlled airspace. The radar pattern to RW08 was active which would have brought SF25 into conflict with an aircraft climbing out and starting a right hand turn to the downwind leg. SF25 was advised to the traffic, and advised to adopt a SE heading to vacate controlled airspace. The primary contact appeared to alter to a SE heading and vacate controlled airspace. On clearing controller airspace, the flight continued without further incident.
201508197	05/06/2015	EGTT : London (FIR)	EGMC (SEN): Southend		D	CTA	BEAGLE	Reciprocating	1	Infringement of the Southend CTR and CTA 1 (Class D) by an unknown aircraft squawking 7000 at 1800ft. Aircraft identified as a Beagle B121. Traffic info and avoiding action given to an outbound ATR42.	Infringement of Southend CTR & CTA 1.At 17:39 Beagle B121 (based on mode s callsign id) #7000 infringed Southend CTA 1 at 1800ft and then left CTA 1 tracking south west. Blind calls made but no answer and phoned Rochester air ground but no answer on the landline. At 17:52 Beagle 121 #7000 re-entered CTA 1 at 1800ft and continued north east to infringe the CTR between 1800 and 2000ft before leaving southbound. ATR42 airborne rwy 24 on a LYD pdr given avoiding action. standard separation maintained.

201508197	05/06/2015	EGTT : London (FIR)	EGMC (SEN): Southend		D	CTA	ATR	Turboprop	2	Infringement of the Southend CTR and CTA 1 (Class D) by an unknown aircraft squawking 7000 at 1800ft. Aircraft identified as a Beagle B121. Traffic info and avoiding action given to an outbound ATR42.	Infringement of Southend CTR & CTA 1.At 17:39 Beagle B121 (based on mode s callsign id) #7000 infringed Southend CTA 1 at 1800ft and then left CTA 1 tracking south west. Blind calls made but no answer and phoned Rochester air ground but no answer on the landline. At 17:52 Beagle 121 #7000 re-entered CTA 1 at 1800ft and continued north east to infringe the CTR between 1800 and 2000ft before leaving southbound. ATR42 airborne rwy 24 on a LYD pdr given avoiding action. standard separation maintained.
201508197	05/06/2015	EGTT : London (FIR)	EGMC (SEN): Southend		D	CTR	BEAGLE	Reciprocating	1	Infringement of the Southend CTR and CTA 1 (Class D) by an unknown aircraft squawking 7000 at 1800ft. Aircraft identified as a Beagle B121. Traffic info and avoiding action given to an outbound ATR42.	Infringement of Southend CTR & CTA 1.At 17:39 Beagle B121 (based on mode s callsign id) #7000 infringed Southend CTA 1 at 1800ft and then left CTA 1 tracking south west. Blind calls made but no answer and phoned Rochester air ground but no answer on the landline. At 17:52 Beagle 121 #7000 re-entered CTA 1 at 1800ft and continued north east to infringe the CTR between 1800 and 2000ft before leaving southbound. ATR42 airborne rwy 24 on a LYD pdr given avoiding action. standard separation maintained.
201508197	05/06/2015	EGTT : London (FIR)	EGMC (SEN): Southend		D	CTR	ATR	Turboprop	2	Infringement of the Southend CTR and CTA 1 (Class D) by an unknown aircraft squawking 7000 at 1800ft. Aircraft identified as a Beagle B121. Traffic info and avoiding action given to an outbound ATR42.	Infringement of Southend CTR & CTA 1.At 17:39 Beagle B121 (based on mode s callsign id) #7000 infringed Southend CTA 1 at 1800ft and then left CTA 1 tracking south west. Blind calls made but no answer and phoned Rochester air ground but no answer on the landline. At 17:52 Beagle 121 #7000 re-entered CTA 1 at 1800ft and continued north east to infringe the CTR between 1800 and 2000ft before leaving southbound. ATR42 airborne rwy 24 on a LYD pdr given avoiding action. standard separation maintained.
201508245	18/06/2015	EGTT : London (FIR)	EGGP (LPL): Liverpool		D	CTR	PIPER	Reciprocating	1	Infringement of the Liverpool CTR (Class D) by an unknown aircraft squawking 3641 at 2100ft. Aircraft identified as a PA28. Standard separation maintained.	Liverpool CTR infringement. Whilst OUTI on Liverpool APS I noticed an ac. squawking 3641, at the top of the Manchester low level corridor, indicating A014. I thought this worthy of note but as the upper limit of the corridor is A013, the ac was within limits. However, the ac then began to appear to climb and route westbound into the Liverpool CTR. I took over the landline communications from my trainee and called Warton, who confirmed that the ac was working them under a basic service. Warton identified the ac to me as a PA28 and said that they would be telling him to exit CAS immediately.
201508258	20/06/2015	EGTT : London (FIR)	CDF	7.2nm NW	D	CTR	OTHER	Reciprocating	1	Infringement of the Cardiff CTR (Class D) by an unknown aircraft squawking 7000 at 2300ft. Aircraft identified as a microlight. Standard separation maintained.	Microlight Airspace Infringement. Prior to this infringement I had noticed a lot of activity to the NW and Western edge of the CTR. At 14:12hrs I notice a 7000 squawk inside the zone approx. 7 Dme and bearing approx 310 degrees from the CDF. Having transmitted blind several times no reply was received. Actions: I continued to monitor the aircraft Rang the VCR ATCO and stopped departures (although no aircraft were delayed) FIR were contacted by the WM, they were not working the aircraft. Further blind transmissions made, no contact established. ATSA used Mode S to determine call sign as microlight. Aircraft seen to leave the zone 11.8d bearing 301 at time 1422 hrs. ATSA asked to ring Swansea, probable aircraft was in contact with them. Requested pilot ring Cardiff ATC.

201508263	21/06/2015	EGTT : London (FIR)	Not specified		D	CTR	PIPER	Reciprocating	1	Infringement of the London CTR (Class D) by an unknown aircraft squawking 7000, indicating 2000ft. Aircraft identified as a PA28. CAIT activated.	Infringer at White Waltham. At 15:15 I observed a CAIT infringer to the East of White Waltham indicating 2000' unverified inside controlled airspace. The aircraft was observed to turn right onto a Westerly track and descend outside CAS. On contacting White Waltham airfield we requested that the aircraft suspected to be the infringer asked to display a squawk of 5002 for identification purposes. The suspect aircraft was identified by the squawk and the registration confirmed as PA28. White Waltham were then requested to ask him his altitude which he replied was 1300', which coincided with the indicated level on Radar - the Mode C was verified at 15:18. The aircraft proceeded to land at intended destination. □ Supplementary 23/06/15:□ I was not using the GPS and relying solely on my map and knowledge of the local area. I had planned to take a friend flying. I was running late that afternoon and arrived at the airfield an hour behind schedule. I was still hoping to complete the original itinerary I had planned. By the time we were airborne, it became clear that we would not have the time to make all the route, sign off and leave again before operations shut. I decided to stay in the local area. I was frustrated and disappointed at not being able to complete the originally intended itinerary. At some point, I lost focus and by the time I regained my bearings realized I might have infringed on controlled airspace. After receiving a radio call from White Waltham Radio confirming this was the case, I rejoined the circuit and landed. Back on the ground, I debriefed with our DCFI on the incident. I accept full responsibility for what
201508265	21/06/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	TMZ 2	G	Restricted area	PITTS	Reciprocating	1	Infringement of the Stansted TMZ 2 (Class G) by an unknown aircraft showing as a primary contact only. Aircraft identified as a Pitts S1.	Infringement of Stansted TMZ 2. I observed a primary only return infringe Stansted TMZ 2 at 1524. The aircraft then squawked 4671 and I obtained the details from Luton radar.
201508294	20/06/2015	EGTT : London (FIR)	EGXW (WTN): Waddington		G	ATZ	ROBINSON	Unknown	1	Infringement of the Waddington ATZ (Class G) and multiple other ATZs by an unknown aircraft squawking 7000, indicating 1000ft. Aircraft identified as a R66.	Civil Helicopter infringement of multiple ATZ's. Whilst manning the Approach position and monitoring WAD's frequencies in anticipation of a departure I received a call on 127.35 (Lars) from helicopter R66. The call contained no details and WAD Lars service was closed, but as the DF trace went through an AC squawking 7000 approximately 2nm south of Barkston Heath (BKH) and was tracking North (potentially affecting WAD's departing AC) I answered the call and received no response. I continued to monitor the AC as it continued North. Its mode C indicated 1000ft and I applied a Call for Release with the VCR controller on a taxiing CAT B flight. The AC went through BKH and Cranwell's ATZ's and then took a direct track for WAD overhead, still indicating 1000ft. I continued to try to raise the AC and continued to receive no response. Approximately 4nm south of WAD overhead the AC transmitted it's callsign again on 127.35. I responded immediately and once again received no reply. The VCR controller confirmed the AC came directly through the overhead at 1803Z . Also confirmed were the fact that it was a rotary AC and was at approximately 1000ft. I asked if they could make out its registration but they were unable to. The VCR controller also reported that the Rotary AC crossed the active runway West to East once north of the VCR. Once safely past the climb out lane I issued a release call on the awaiting CAT B flight which was on the runway and ready for departure. I called Humberside at 1805Z and requested they continue to track it. They confirmed it was R66 as it was displaying this on Mode S. I continued to track the AC as it continued North and saw it also infringe the Scampton ATZ at 1807Z, again believed to be at 1000ft. Shortly after this Humberside called to say the AC
201508378	19/06/2015	EGTT : London (FIR)	Warrington	N	D	CTR	FLY BUY ULTRALIGHTS	Reciprocating	1	Infringement of the Manchester CTR (Class D) by an unknown aircraft squawking 7000, at 1500ft in climb. Aircraft identified as an Ikarus C42 microlight. Standard separation maintained.	AIW warning. At about 12:13 I was alerted by 7000 squawk AIW warning, of traffic north of Warrington 1500ft climbing eastbound into the Barton local flying area. Mode s indicated callsign Ikarus C42 microlight. I contacted Barton FISO who confirmed the traffic was on his frequency, I requested he remind the pilot of the base of CAS. No loss of separation was observed.
201508395	21/06/2015	EGTT : London (FIR)	EGXW (WTN): Waddington				OTHER	Unknown	1	Infringement of the Waddington ATZ (Class G) and multiple other ATZs by an unknown aircraft squawking 7000, indicating 1500ft. Aircraft identified as a R66.	infringement of multiple ATZ's. I was the LARS controller when I received a call from Humberside passing traffic information on an AC squawking 7000. The AC was approximately 3nm to the North of the SCA MATZ. They advised me it was displaying the callsign R66 on mode S and that it had just flown through Hibaldstow paratropping site. Both I and Humberside were aware of the AC as it had been involved in an incident of similar type. The AC was indicating 1500ft and appeared to be following the reverse route of its previous sortie. I passed traffic information to CWL advising them of a suspected upcoming infringement, particularly due to their high traffic levels at the time. R66 called me when inside SCA MATZ but did not respond to my reply, as per the previous incident. As expected the AC proceeded to infringe on SCA,WAD,CWL,BKH and WIT ATZ's. CWL were able to avoid an incident by keeping their AC clear and confirmed that R66 had not spoken to them. Due to the high traffic levels at the time this incident had more effect than the previous days.□ Supplementary 27/06/2015:□ At 0900Z, I received a call from the RAF Waddington Approach controller, providing traffic information on a 7000 squawk in the RAF Scampton overhead. It was indicating 1500 ft and tracking south. I was told that this aircraft had caused issues the day before by flying north through the ATZs of RAFs Barkston Heath, Cranwell, Waddington & Scampton without any calls to ATC. I monitored the traffic and it seemed to be making the same trip in reverse. It continued south through Waddingtons ATZ. I contacted the glider club, who were active on

201508428	18/06/2015	EGTT : London (FIR)	Not specified		D	CTA	ROBINSON	Reciprocating	1	Infringement of the Gatwick CTA (Class D) by a R44.	Circuits done, tracked slightly wide on circuit. Suggested Actions to Prevent a Recurrence: Adhere close to airfield pattern.
201508479	24/06/2015	EGTT : London (FIR)	GAM	4nm SSW	D	CTA	ROBINSON	Reciprocating	1	Infringement of the Doncaster CTA (Class D) by an unknown aircraft squawking 7000, climbing to 2700ft. Traffic info given. Standard separation maintained.	Doncaster Zone Infringement SW of Gamston. A 7000 squawk was observed in a slow climb approx 8nm WSW of GAM VOR, tracking towards GAM. initially at 2000ft. The contact continued to climb to 2700ft. A blind transmission was made to try to identify the aircraft. No response. I was also speaking to an aircraft tracking through Doncaster zone towards the GAM area, which I passed traffic information to. No avoiding action required due to low speeds and sufficient spacing of both aircraft. I telephoned Gamston who confirmed they had 2 way contact with a helicopter. Have tried to speak with the pilot via telephone but unable to reach him at this time.
201508565	25/06/2015	EGTT : London (FIR)	Danger Area EG D123	Warminster	G	Danger area	PIPER	Reciprocating	1	Infringement of Danger Area EG D123 (Warminster) by a PA28 squawking 7000 at approx 2000ft.	I was the duty Deputy Training Ops Officer. At approximately 1401 (local time) I observed a 7000 squawk in the Westbury area that was previously on a south-easterly track turn left into D123 and subsequently in to the Warminster Danger Area. D123 was active to 17,000ft AMSL with PA31 traffic operating (1,500 - 6,000ft AMSL) and fast jet traffic just departed. Warminster was active to 2,500ft AMSL with live firing. I requested an emergency check fire on Warminster range. The 7000 squawk continued on an easterly track at approximately 2000ft towards the centre of the Warminster range before making a sharp right turn and exited the ranges to the South. The aircraft continued south and joined the circuit to land at Compton Abbas airfield. I contacted the duty FISO at Compton who passed the registration of the aircraft - a Compton based PA28 with a club member on board. The pilot called SPTA Air Ops shortly afterwards and was very honest and apologetic about the infringement stating that he was avoiding glider activity on the corner of the range but elected to left (in to the range) to avoid rather than right. He quickly realised his location when he saw the scrub land of the range and the range flags. He turned on to southerly heading as the quickest way out of the range.
201508567	25/06/2015	EGTT : London (FIR)	EG D123	Imber	G	Danger area	ROBINSON	Reciprocating	1	Infringement of active Danger Area EG D123 (Imber) by unknown pop up squawk 2650, at approx 800ft. Aircraft identified as a R44.	Infringement of D123. I was the duty Deputy Training Safety Officer. At 1000 local I observed a 2650 (Boscombe Conspicuity squawk) squawk pop up inside D123 at about 800ft. I called the Boscombe Zone controller who confirmed the aircraft had freecalled him inside D123 tracking south. D123 was activated from surface to 17,000ft AMSL with fixed wing flying in progress. I agreed with the Boscombe controller to keep the aircraft tracking south (shortest way out of the danger areas). The aircraft details passed from Boscombe were a R44. ☐ Supervisors Narrative:☐ Clearly pilot was unaware of the location of the Danger Area; lack of route planning.
201508568	23/06/2015	EGTT : London (FIR)	Danger Areas D123/D125	Salisbury Plain	G	Danger area	CESSNA	Reciprocating	1	Infringement of Danger Areas EG D123 and EG D125 (Salisbury Plain) by a C150 squawking 5063 with Mode C indicating 1800ft.	On the afternoon I was on duty in Air Operations on SPTA, when an aircraft track was seen on our SSR display to enter D123 from the N. It was squawking 3/A5063 indicating 1800ft Mode C HDG SE. The track continued a mile or two into the danger area, before turning NE and clearing near Market Lavington. D123 was notified as active SFC-8000ft amsl, D125 SFC- 30,000ft. We contacted Bristol ATC who said they were providing a BS to the aircraft, a C150. They asked the pilot ring us on landing. When he called he admitted his error, saying that as soon as he realised his position he turned out of the airspace.

201508581	25/06/2015	EGTT : London (FIR)	DET	2nm NW	A	TMA	MOONEY	Reciprocating	1	Infringement of the LTMA (Class A) by an unknown aircraft squawking 7000, indicating 3000ft, resulting in loss of separation with two airliners. Aircraft identified as a Mooney M20. CAIT activated.	Infringement of London TMA by Mooney M20. On duty as Thames Radar when I noticed an Infringing aircraft entering controlled airspace about 2NM Northwest of DET heading Northwest bound displaying 3000 feet on mode C and Callsign Mooney M20 on Secondary CAIT mode S. With no conflicting traffic in the THAMES RMA tracing action was initiated with phone calls to Rochester Tower and Southend Approach. Southend informed me that Mooney M20 had just called them and they had instructed the aircraft to descend to leave controlled airspace. Southend confirmed that the Mode C of Mooney M20 was verified.☐ Supplementary 14 Jul 2015:☐ My cruising altitude over the Channel was 3000'. I was always on London's information frequencies, reporting at each turning point: position, altitude, and an estimated time for the next point. I started my descend to late to 2000', when the controller confirmed that the maximum altitude in this area is 2400'. First, I am not used to the information service and the basic control in England. It's very different from using in France where the controller is always informing the pilot on restricted area and altitude limitation. Second, there was a lot of traffic in London area at this time and it wasn't easy to contact the information service; Be sure, I am very sorry to find myself in this situation. I know that traffic is very heavy in London area and you should be able to expect professionalism and knowledge from all pilots. I will be more attentive in the future.☐ CAA Closure:☐ No action taken. Closed due elapsed time. Registration will be monitored.
201508581	25/06/2015	EGTT : London (FIR)	DET	2nm NW	A	TMA	UNKNOWN	Unknown		Infringement of the LTMA (Class A) by an unknown aircraft squawking 7000, indicating 3000ft, resulting in loss of separation with two airliners. 201508670	26/06/2015	EGTT : London (FIR)	512327N / 0004082E	CTA	D	CTA	UNKNOWN	Unknown		Infringement of the Southend CTA (Class D) by an unknown Paramotor/glider, resulting in loss of separation with a DR400.	CAS infringement Paramotor/glider observed similar altitude inside CAS. At 1641 DR400 was transiting Southend controlled Airspace IFR at altitude 3000' when the pilot reported that they had passed very close to a parachute and asked if we (Southend) were aware of any in the area. The Pilot reported that his passenger had observed the canopy at a similar altitude descending approximately half a mile away.
201508670	26/06/2015	EGTT : London (FIR)	512327N / 0004082E	CTA	D	CTA	AVIONS ROBIN	Reciprocating	1	Infringement of the Southend CTA (Class D) by an unknown Paramotor/glider, resulting in loss of separation with a DR400.	CAS infringement Paramotor/glider observed similar altitude inside CAS. At 1641 DR400 was transiting Southend controlled Airspace IFR at altitude 3000' when the pilot reported that they had passed very close to a parachute and asked if we (Southend) were aware of any in the area. The Pilot reported that his passenger had observed the canopy at a similar altitude descending approximately half a mile away.

201508673	24/06/2015	EGTT : London (FIR)	EGGW (LTN): London/Luton		D	CTA	PIPER	Reciprocating	1	Infringement of the Luton CTA (Class D) by a PA28.	Poor navigation. No excuse. There were two PPLs on board who have flown out of departure airfield for over 35 years each. The flight had been prepared and we believed we were just clear of Luton's airspace. (How we got it so wrong in such a short distance has been the cause of much debate). Inexcusable. Suggested Actions to Prevent a Recurrence: Check route and heading more thoroughly. Contact Farnborough north for advisory service.
201508677	26/06/2015	EGTT : London (FIR)	EGTK (OXF): Oxford/Kidlington	2nm South West	G	ATZ	BELL	Turboshaft	1	Infringement of the Oxford ATZ (Class G) by a helicopter squawking 3706 at 1300ft. Traffic info given.	Appropriate action is being taken as a result of this incident.
201508695	27/06/2015	EGTT : London (FIR)	Guildford		A	Restricted area	DE HAVILLAND	Reciprocating	1	Infringement of RA(T) Guildford by an unknown aircraft squawking 7000 on both outbound and inbound flights. Aircraft identified as a DH82. Traffic info given.	RA(T) Infringement. I was working as the Approach controller and controlling authority for the RA(T). I had on frequency a police helicopter and an Islander who was about to drop parachutists. I noticed a 7000 squawk with no Mode 'C' appear from the north western edge of the RA(T) which was mapped on my display console. I passed traffic information to the police helicopter and he informed me it was a biplane, passing underneath and he was unable to see a callsign. The infringing aircraft exited the RA(T) to the south east and got no closer than approx 2nm to the Islander. I got a colleague to track the aircraft and it landed at an airfield. The Supervisor then made contact with the airfield to ascertain the aircraft and pilot information.☐ Supervisors Narrative:☐ The Approach controller alerted me to an ac infringing the RA(T). The Police helicopter identified it as a 'bi-plane'. A spare controller followed the ac SSR code (unusual for an ac of this age) until it lined up at an airfield. I contacted the airfield and they confirmed that a DH82 was finals at their airfield, they asked 'has he flown through your RA(T) then?'. I passed contact details and asked the pilot to ring me. Shortly afterwards the pilot rang. After initially being economical with his flight details, I highlighted the tracking of his SSR code and the fact that the Police helicopter was above him in the RA(T). Resistance to the facts disappeared and he explained that he had a hand held GPS in an open cockpit and may of strayed into the RA(T). I explained the error of his airmanship and strongly suggested that rather than fly on a 7000 squawk near RA(T)s (which he was aware of) he should have
201508695	27/06/2015	EGTT : London (FIR)	Guildford		A	Restricted area	MD HELICOPTER	Turboshaft	2	Infringement of RA(T) Guildford by an unknown aircraft squawking 7000 on both outbound and inbound flights. 201508697	27/06/2015	EGTT : London (FIR)	Guildford		A	Restrict ed area	CIRRUS	Reciprocating	1	Infringement of RA(T) at Guildford by an unknown aircraft squawking 7000 at 2000ft. Aircraft identified as a SR22. Traffic info given.	RA(T) Infringement. At 1517 I noticed a 7000 squawk approaching the RA(T) from the north, southbound at 2000ft Farnborough QNH. The ac then flew through the RA(T) and exited at the southern boundary. It then turned around and flew back through the RA(T) at 1550 in the opposite direction. Both of it flights meant that agreed co-ordination with Farnborough was cancelled and they had to hold off until it vacated the RA(T). When the radar contact was final at an airfield the Supervisor rang them for the ac details. All displaying ac were warned by me and operated below 2000ft. Both reported visual with it.☐ Supervisors Narrative:☐ I was acting as ATCO i/c at the time of the incident and witnessed the infringement whilst writing another DASOR in the approach room. After seeing the ac short finals at an airfield I rang the Twr FISO who believed the ac to be a SR22. The pilot was requested to call me when able. The pilot telephoned me at approx 1630Z and confirmed that he had followed the route as described and had been aware of some kind of airspace active but not fully aware of the RA(T)'s existence. He stated that he had expected to free call Farnborough for a service on departure but they had been too busy; he had also been distracted by the testing of new NDB. The pilot was very polite and apologetic throughout.
201508747	25/06/2015	EGTT : London (FIR)	EGXT : Wittering		G		UNKNOWN	Unknown		Infringement of RAF Wittering ATZ (Class G) by an unknown aircraft at approx 1500ft, showing as a primary contact only. Aircraft described as a microlight. Traffic info given to a Spitfire performing a flypast.	ATZ Infringement. I was the approach controller for a flypast. The flypast consisted of a 4-ship Tutor formation followed by a Spitfire . The Tutor flypast completed without incident. As the Tutors completed 'Spitfire' who was in contacted with me on 119.675 transferred to Tower VHF 127.975 to speak to the Tutors and Tower. As the Spitfire commenced his run in SATCO, who was at the event and in contact with me, advised me of a microlight. I then observed a faint primary contact on radar and on the radar clearance line immediately told the ADC who relayed this information to the Spitfire, including the 15000' approx hgt. The pilot asked if it was over the flypast area and again on the radar clearance line I stated in 12 o'clock at 3 miles moving south, updating again at 2 miles. The microlight continued south and the flypast continued without incident. I continued to monitor the primary contact and it moved to 7 miles south. I asked D&D if they could monitor it but it was too low for them to see any return.☐ Supervisors Narrative:☐ I was the sole controller in the approach room, but an assistant was in place on switchboard and an assistant and controller were in Tower. The incident is described accurately above. I was working with capacity to spare, with equipment and frequencies required F/S.
201508747	25/06/2015	EGTT : London (FIR)	EGXT : Wittering		G		OTHER	Reciprocating	1	Infringement of RAF Wittering ATZ (Class G) by an unknown aircraft at approx 1500ft, showing as a primary contact only. Aircraft described as a microlight. Traffic info given to a Spitfire performing a flypast.	ATZ Infringement. I was the approach controller for a flypast. The flypast consisted of a 4-ship Tutor formation followed by a Spitfire . The Tutor flypast completed without incident. As the Tutors completed 'Spitfire' who was in contacted with me on 119.675 transferred to Tower VHF 127.975 to speak to the Tutors and Tower. As the Spitfire commenced his run in SATCO, who was at the event and in contact with me, advised me of a microlight. I then observed a faint primary contact on radar and on the radar clearance line immediately told the ADC who relayed this information to the Spitfire, including the 15000' approx hgt. The pilot asked if it was over the flypast area and again on the radar clearance line I stated in 12 o'clock at 3 miles moving south, updating again at 2 miles. The microlight continued south and the flypast continued without incident. I continued to monitor the primary contact and it moved to 7 miles south. I asked D&D if they could monitor it but it was too low for them to see any return.☐ Supervisors Narrative:☐ I was the sole controller in the approach room, but an assistant was in place on switchboard and an assistant and controller were in Tower. The incident is described accurately above. I was working with capacity to spare, with equipment and frequencies required F/S.
201508896	02/07/2015	EGTT : London (FIR)	EGCB : Manchester/Barton		D	CTR	CESSNA	Reciprocating	1	Infringement of the Manchester CTR (Class D) and Leeds CTR (Class D) by a C152. Standard separation maintained.	Airspace Infringement. I was on duty as the APR controller in light traffic conditions. I received a call from a C152 requesting a Basic service and transit on a local flight. I allocated a squawk of 3641 and provided the aircraft with a Basic service and MATZ transit. I did not initially see the squawk as I was looking for the aircraft NW of Barton but after a couple of minutes noticed the squawk in the Manchester zone. I advised the aircraft of this and suggested they turn Northbound to exit the zone ASAP. I telephoned Manchester Approach and appraised them of the situation. The aircraft continued North Eastbound but comms were proving difficult, and the aircraft had no Mode Charlie showing. I lost 2 way comms with the aircraft but since it was heading generally towards Leeds I telephoned them, identified the aircraft, and advised them that I had no comms and to keep a close eye on it. Shortly after I lost radar contact with the aircraft, but telephoned Leeds to confirm it was still visible to them, which it was. The aircraft reappeared close to Leeds overhead, so I again telephoned Leeds, and they advised it had infringed their airspace and flown close to the airfield. I managed to re-establish comms with the aircraft and once confirming good VFR ground contact, suggested the aircraft take up a westerly track as they were in Leeds airspace. After exiting Leeds zone the aircraft had further minor navigational issues but landed safely. The aircraft was not advised about reports being filed whilst airborne as I felt this would be distracting to their flying. My colleague spoke to a flying instructor where the C152 was based to appraise him of the situation and confirm he would speak to the pilots concerned.☐
201508911	03/07/2015	EGTT : London (FIR)	ASPEN		A	Airway - ATS Route	CESSNA	Reciprocating	1	Infringement of Airway Q41 (Class A) by a C182 at FL50. Standard separation maintained.	Infringement of controlled airspace on sector 21. C182 squawking 1177 working London information was tracking southbound adjacent to Q41 at FL50 but penetrated S21 airspace 5 miles SW of aspen.☐ Supplementary 07/07/15:☐ Infringement of Q41. Notified by S20 planner that C182 had infringed Q41. A/c had previously been advised to remain outside controlled airspace in particular the airway Q41.☐ Supplementary 04/07/2015:☐ C182 departs Prestwick Airport 08:56 on a VFR flight to Jersey.After leaving the Prestwick ATZ he was given a Basic Service and climb to 5500 feet and was instructed to "remain clear of Controlled Airspace" The aircraft was prenoted to Flight Information Service and then transferred to Scottish Information on 119.875MHz whilst outside CAS. Subsequently Scottish LAS called to advise that the C182 had activated their CAIT SE of Prestwick (airspace base 5500 feet) whilst working Scottish Information and they would be filing a report

201508917	04/07/2015	EGTT : London (FIR)	Not specified		A	TMA	AVIONS ROBIN	Reciprocating	1	Infringement of the LTMA (Class A) by a DR400 at 6500ft. Traffic info given. Standard separation maintained.	Infringement of CAS to East of DVR. FIR bandboxed with initially light traffic. DR400 called mid channel at 0821 at 6,500 ft. (He had previously called twice but couldn't establish good 2 way). On initial call I instructed him to confirm he was remaining outside CAS due to his reported altitude, giving him the base of CAS in that area. He was given the Chatham QNH. He acknowledged these. As he routed West of DVR I then asked him to confirm he was ROCAS and that the base to the west of DVR was 5,500ft. I also told him that Lashenden/Headcorn had Para Activity and that the base of CAS in this area was 3,500ft and again asked to confirm he would be descending to remain outside. He acknowledged this. At approx. 0830 another FISO came back and plugged in as the 2nd FISO. DR400 was then transferred to London Control at their request (134.9) at 0841. ☐ Supplementary 07/07/15:☐ Infringer west of DVR. At 08.39 a 1177 squawk was seen to show FL63 west of DVR where the base is 5500ft. The FIS advised the aircraft was DR400 and he had been told to remain clear of controlled airspace. He remained inside CAS so was transferred to S15 on 134.9 and told to vacate. Once identified (using the turn method), DR400 was informed the base at his current position was 5500ft and that in 6 miles the base was 3500ft. DR400 was given a basic service outside controlled airspace and advised Lashenden/Headcorn were paradropping in his 11 o'clock at approx 8 miles. DR400 eventually descended and left CAS. At time 08.39 DR400 was transferred to Farnborough LARS for further service outside.
201508925	11/06/2015	EGTT : London (FIR)	Not specified		D	CTR	DIAMOND	Reciprocating	1	Infringement of the Gatwick CTR (Class D) by a motor glider squawking 3767 at 900ft. Inbound aircraft broken off approach.	At 1242 I was working KK INT / FIN bandboxed. A 3767 squawk was observed to enter the KK CTZ, approximately 4nm west of Redhill heading South towards the KK Final Approach. An Airbus was on final approach. I called Redhill to ask if they were working the aircraft, and they said not. I rang KK AIR on the priority line and advised them Redhill were not working the aircraft, and asked them to break aircraft off to the south and climb to altitude 3A. I believed at the time, the 3767 was in an unsafe proximity to inbound aircraft and thought this was the safest action. I subsequently called Redhill back and asked them if they were now working the aircraft to the West of them, and at this time the 3767 was tracking towards Redhill. Redhill confirmed they were working the aircraft, and had been the whole time. They said I had asked them about an aircraft to the East of them, not the West. I thought I had asked about an aircraft to the west of them tracking towards the Gatwick Final Approach. Inbound aircraft was repositioned for another approach to KK runway 08R. The GSA called KR to obtain the details of the infringing aircraft.
201508925	11/06/2015	EGTT : London (FIR)	Not specified		D	CTR	AIRBUS	Turbofan	2	Infringement of the Gatwick CTR (Class D) by a motor glider squawking 3767 at 900ft. Inbound aircraft broken off approach.	At 1242 I was working KK INT / FIN bandboxed. A 3767 squawk was observed to enter the KK CTZ, approximately 4nm west of Redhill heading South towards the KK Final Approach. An Airbus was on final approach. I called Redhill to ask if they were working the aircraft, and they said not. I rang KK AIR on the priority line and advised them Redhill were not working the aircraft, and asked them to break aircraft off to the south and climb to altitude 3A. I believed at the time, the 3767 was in an unsafe proximity to inbound aircraft and thought this was the safest action. I subsequently called Redhill back and asked them if they were now working the aircraft to the West of them, and at this time the 3767 was tracking towards Redhill. Redhill confirmed they were working the aircraft, and had been the whole time. They said I had asked them about an aircraft to the East of them, not the West. I thought I had asked about an aircraft to the west of them tracking towards the Gatwick Final Approach. Inbound aircraft was repositioned for another approach to KK runway 08R. The GSA called KR to obtain the details of the infringing aircraft.
201508928	15/06/2015	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	16nm W	A	TMA	PIPER	Reciprocating	1	Infringement of the LTMA (Class A) by an unknown aircraft squawking 7000, climbing to indication of 3100ft, resulting in loss of separation with an inbound A320. Aircraft identified as a PA28. CAIT activated. Traffic info and avoiding action given.	Loss of separation. Unverified Mode C data of unknown traffic (squawk 7000) indicated it was underneath the base of controlled airspace but subsequently indicated a climb into and infringement of the TMA into conflict with A320, which was turning onto a closing heading for 09L. CAIT alert activated. A320 was in the descent to altitude 4000' and passing 5300'. The unknown traffic was indicating 2600' and continued climbing to an indication of 3100'. A320 was instructed to stop descent at 4500' and traffic was passed. The pilot of A320 reported they had the traffic on TCAS and it was 'passing underneath'. The aircraft were head-on, opposite direction and an avoiding turn onto heading 110 degrees did not prevent the blips merging. The unknown aircraft continued to track to the west, and the confliction with the next inbound on a base leg from the south was resolved by stopping descent at altitude 5000' and turning the aircraft in to establish for 09L. The Mode C of the unknown aircraft continued to indicate altitude 3000', and it then tracked into an area where the base of controlled airspace is 3500'. The unknown aircraft was then believed to be outside controlled airspace and so no further action was taken. The unknown aircraft continued to track west (further into areas with higher bases of CAS) and was observed to change squawk to 3601.
201508928	15/06/2015	EGTT : London (FIR)	EGLL (LHR): London/Heathrow	16nm W	A	TMA	AIRBUS	Turbofan	2	Infringement of the LTMA (Class A) by an unknown aircraft squawking 7000, climbing to indication of 3100ft, resulting in loss of separation with an inbound A320. 201508937	05/07/2015	EGTT : London (FIR)	WCO	12nm NE	A	TMA	PIPER	Reciprocating	1	Infringement of the LTMA (Class A) by an unknown aircraft squawking 7000 with Mode C indicating 4900ft-5900ft, resulting in loss of separation with three IFR aircraft. Aircraft identified as a PA28. Traffic info and avoiding action given.	Infringement of class A airspace by possibly PA28. Whilst working Luton Radar I noticed a 7000 contact (no mode sierra) infringing to the North West climbing to 6200 unidentified. I quickly called NW TC and implemented a Check North fairly soon after. NW turned traffic away from the contact which was verified on the phone. At this stage I am certain the contacts did not merge. After numerous blind calls I boxed the contact and tracked it where it appeared to land. I called the airfield at 1520 from the Supervisor Airports position on the right hand panel. I attempted to see if the controller could get the traffic to squawk 7407, or ident. However, the controller quite sensibly asked the pilot if he had an instructor aboard. He didn't so I sensibly did not follow this line of identification at no time did I enforce the application of these procedures, merely enquired. From the picture it appeared the traffic was possibly PA28 (just landed). At this point the controller asked if I could talk to the instructors downstairs at which suggestion I declined and mentioned we would have to take reporting action on an infringement. At this he mentioned that we could if we wanted to but would get nowhere with it.☐ Supplementary 08/07/15:☐ As a consequence of this event, separation was lost against three IFR aircraft which had to be vectored away. PA28 was identified as the aircraft involved following a positive identification on the pilot's return flight. Radar pictures show PA28 within the LTMA with Mode C indicating 4900-5900' (base CAS 4500'). ☐ Supplementary 10/07/15:☐

201508962	30/06/2015	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	6/7nm N	D	CTA	CESSNA	Reciprocating	1	Infringement of the East Midlands CTA 1 (Class D) by an unknown aircraft squawking 7000 at 2800ft. Aircraft identified as a C172. Traffic info and avoiding action given to an inbound B737. Standard separation maintained.	B737 visual circuit traffic given avoiding action against one holding at the boundary. Just after handover of the R1 position, the primary radar failed, and we were subsequently trying to stabilise the picture, and during this time there were moments when the picture was lost/distorted. There was a light aircraft wanting to enter the airspace from the north already (and on watching the radar pictures the contact believed to be C152 was already inside controlled airspace without clearance at handover). B737 came to radar from the visual circuit to be vectored for a wider approach to give tower a gap for a departure. When the B737 called I turned him onto 090 downwind, I had still not registered the displayed altitude of the contact to the north. I then dealt with a few other aircraft and then looking up to the B737 (which was squawking 4570 but not converting), I saw that the 7000 ahead of him was indicating 300ft below. I gave B737 the traffic and then gave avoiding action to climb, as the contact wasn't climbing and was believed to be the C172. The B737 took the climb and then when I updated the traffic he called visual (the 7000 contact was then descending and heading to the airfield), so he was given the option to return to 3000ft and turn right to carry on with vectors for the ILS, which he did, and the C172 continued into the zone.☐ Appropriate CAA action is to be taken as a result of this incident.

201508962	30/06/2015	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	6/7nm N	D	CTA	BOEING	Turbofan	2	Infringement of the East Midlands CTA 1 (Class D) by an unknown aircraft squawking 7000 at 2800ft. The B737 took the climb and then when I updated the traffic he called visual (the 7000 contact was then descending and heading to the airfield), so he was given the option to return to 3000ft and turn right to carry on with vectors for the ILS, which he did, and the C172 continued into the zone. □ Appropriate CAA action is to be taken as a result of this incident.
201508965	29/06/2015	EGTT : London (FIR)	EGCV : Sleep		G	ATZ	PIPER	Reciprocating	1	Infringement of the Shawbury ATZ (Class G) by an unknown aircraft. The aircraft made an approach to R/W23 before departing to the West. Military ATC emergency declared. Aircraft identified as a PA28 which had misidentified airfield. Traffic info given.	Unknown ac entered the ATZ and made an approach to Rwy 23. Unknown ac entered the ATZ and made an approach to Rwy 23. I was the ADC controller when I noticed an unknown ac enter the ATZ from the SW, I advised the Supervisor immediately and asked for him to if he was aware of the ac. The ac appeared to be conducting a left hand circuit for either Rwy 23 or 18. An Emergency State 2 was declared in case the ac was suffering from an emergency but unable to communicate this to ATC. At the time I had 2 aircraft conducting Under Slung Load (USL) training, 2 helicopters taxiing out and cleared to cross Rwy 23 for a westerly departure and a helicopter Taxiing out to depart VFR south from the Lazy Lane intersection of Rwy 18. I made an all stations broadcast on both studs 2 and 3 instructing all ac to hold and remain clear of Rwy 18 believing the ac might make an emergency landing on Rwy 18. The unknown ac then turned left base final for Rwy 23 and eventually went around and departed to the west. Once the unknown ac had left the Shawbury ATZ I broadcast on studs 2 and 3 for ac to resume normal operations. □ Supervisors Narrative: □ I was the Sup for the incident in question. Whilst sat in the ACR, I received a call from the ADC asking who the fixed wing was joining the cct. I was unaware of any fixed wing that would be near the airfield and, after checking with the RA and Zone controllers, proceeded immediately to the VCR. On entering the VCR the ac was pointed out to me, which appeared to be flying downwind for Rwy 18 (left hand). On seeing the ac bank towards the airfield, I immediately instructed the ADC to clear all surfaces and I called a state 2 on the crash
201508995	26/06/2015	EGTT : London (FIR)	ABBOT	E	A	TMA	CIRRUS	Reciprocating	1	Infringement of the LTMA (Class A) by an unknown aircraft with an FIS squawk at 5400ft. Aircraft identified as a SR22. CAIT activated. Traffic info and avoiding action given to an inbound B737.	Infringement of LTMA East of Abbot - SR22. I was working as INT/FIN Bandboxed. At approximately 1036z, an unknown radar return wearing an FIS squawk was observed to be inside LTMA at 5400', which activated CAIT. This was in confliction with a B738 which had been given descent clearance to 6000' being vectored for runway 22. B737 was given an immediate right turn onto 310, and then further right onto 180. Descent was stopped at FL70. Adjacent colleagues helped with the coordination and confirmed that London FIR were working the traffic, SR22 and advised that they would request that the pilot leaves controlled airspace. After further telephone calls, SR22 was transferred to my frequency, 120.625, and confirmed he was level at 5400' on QNH1017. SR22 was advised that he was inside controlled airspace without a clearance and instructed to descend immediately below 3400' or turn right to vacate controlled airspace. SR22 elected to descend. Once outside controlled airspace, I suggested SR22 free call Cambridge 123.6 due to their circuit being active. B737 was vectored behind the infringing traffic to runway 22 and passed on his thanks before landing. London FIR gave the details of the aircraft as an SR22 aircraft. □ Appropriate CAA action is to be taken as a result of this incident.
201508995	26/06/2015	EGTT : London (FIR)	ABBOT	E	A	TMA	BOEING	Turbofan	2	Infringement of the LTMA (Class A) by an unknown aircraft with an FIS squawk at 5400ft. Aircraft identified as a SR22. CAIT activated. Traffic info and avoiding action given to an inbound B737.	Infringement of LTMA East of Abbot - SR22. I was working as INT/FIN Bandboxed. At approximately 1036z, an unknown radar return wearing an FIS squawk was observed to be inside LTMA at 5400', which activated CAIT. This was in confliction with a B738 which had been given descent clearance to 6000' being vectored for runway 22. B737 was given an immediate right turn onto 310, and then further right onto 180. Descent was stopped at FL70. Adjacent colleagues helped with the coordination and confirmed that London FIR were working the traffic, SR22 and advised that they would request that the pilot leaves controlled airspace. After further telephone calls, SR22 was transferred to my frequency, 120.625, and confirmed he was level at 5400' on QNH1017. SR22 was advised that he was inside controlled airspace without a clearance and instructed to descend immediately below 3400' or turn right to vacate controlled airspace. SR22 elected to descend. Once outside controlled airspace, I suggested SR22 free call Cambridge 123.6 due to their circuit being active. B737 was vectored behind the infringing traffic to runway 22 and passed on his thanks before landing. London FIR gave the details of the aircraft as an SR22 aircraft. □ Appropriate CAA action is to be taken as a result of this incident.
201508996	06/07/2015	EGTT : London (FIR)	Not specified		D		CIRRUS	Reciprocating	1	Infringement of Stansted CAS (Class D) by a SR22. Standard separation maintained.	Infringement of Stansted Zone. SR22 called up at 1806. He was asked to report at CLN at which he was given the London QNH and told that the base of CAS after Colchester drops to 4,500 feet and to confirm that he would ROCAS, which he acknowledged, stating he was routing towards Haverhill VRP. Essex radar called at 1829 stating that my 1177 was going to infringe CAS in 1.5 miles. The Essex radar controller told me the A/C needed to descend. I advised the controller that I couldn't issue an executive instruction and would he like the A/C transferred to his frequency, to which he replied he knew this but requested I told the pilot that he would infringe controlled airspace in 1.5 miles. I relayed this to the pilot, who then stated he was now descending to 3,500 ft. I then re-iterated to the pilot that the base of CAS was 3,500ft, and the pilot then stated he was descending to 3,400ft.

201509013	23/06/2015	EGTT : London (FIR)	EGLS : Old sarum		G	ATZ	UNKNOWN	Unknown		Infringement of the Old Sarum ATZ (Class G) by an unknown glider. PA28 took evasive action.	Infringement of ATZ by Glider. During a circuit training flight, at the start of the downwind leg at 800ft using Runway 24 with a left hand circuit, a glider was observed orbiting at similar height at the midpoint of the downwind leg, by the commander of PA28. Repeated radio calls to the glider from PA28 did not produce any response. PA28 the reversed direction and flew up the downwind leg in order to avoid a collision, and then flew a low close circuit to land, avoiding the glider. The glider was then seen to continue the orbiting inside the ATC for the next 20 minutes before leaving, the A/G radio operator later reported no calls received from the glider during before or after the period the glider was observed to be in the ATZ. Later investigation indicated the glider may have originated its flight from a specific airfield, but no positive identification could be obtained.
201509013	23/06/2015	EGTT : London (FIR)	EGLS : Old sarum		G	ATZ	PIPER	Reciprocating	1	Infringement of the Old Sarum ATZ (Class G) by an unknown glider. PA28 took evasive action. 201509062	04/07/2015	EGTT : London (FIR)	EGBV : Silverstone	6nm S	A	Restrict ed area	CESSNA	Reciprocating	1	Infringement of the Red Arrows RA(T) at Silverstone by an unknown aircraft squawking 7000. Aircraft identified as a C152. Traffic info given.	Whilst working as the controller for the Red Arrows display at Silverstone, I noticed a 7000 squawk tracking northbound towards the RAT. I called the traffic to the Red Arrows from about 10 miles as it approached. When the a/c got to about 5.8 miles from the centre, the it made a right turn and tracked north east bound. The a/c was just inside the RAT at the time and it remained inside for a number of minutes. Using the A/C Data function on Node the a/c was identified as C152. The Red Arrows eventually became visual with the traffic when they had completed their display and they were leaving the RAT.☐ Supplementary 21/07/15:☐ I was the pilot of the aircraft, a C152 that infringed the RAT. That morning, as is our usual procedure the duty instructor gave a brief of the weather, all NOTAMs and relevant AICs, and general operational information. During this briefing the temporary airspace at Silverstone was highlighted and I was aware of its existence. On the flight in question I was teaching in-flight diversions to my PPL student. Aware of the restriction at Silverstone, I had asked the student to plan towards the area, with the intention of diverting to the north east before getting too close to the restricted airspace. This, seemed to me, had the benefit of creating a "realistic scenario" for the student. There were many NOTAMs on the day and my student and I had talked about them and the areas that we were to avoid - this was a good teaching point for him and an ideal time to reinforce the importance of reading and understanding the NOTAMs. I believed at the time that the planned turning point (Buckingham) would not only keep our aircraft clear of the r! restricted area but also provide
201509063	04/07/2015	EGTT : London (FIR)	Sheerness	5nm S	D	CTA	AVIONS ROBIN	Reciprocating	1	Infringement of the Southampton CTA 7 (Class D) by a DR400 at 3100ft. Avoiding action given. Standard separation maintained.	Controlled airspace infringement. DR400 was observed heading towards Southend CTA 7 at 3A. As the aircraft passed 5nm to run to the boundary I called London Fir and asked them to tell the pilot to remain outside controlled airspace and to contact me. The pilot did not call me until he was 7nm inside controlled airspace at 3a. I tried to educate the pilot about Southend airspace but his English was to poor.☐ CAA Closure:☐ No action taken. Closed due elapsed time. Registration will be monitored.
201509066	05/07/2015	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	NE CTA	D	CTA	HUGHES	Turboshaft	1	Infringement of the Gatwick CTA (Class D) by a Hughes 369 squawking 7000 at 1800ft, resulting in loss of separation with an inbound A319. Inbounds delayed.	Infringement of Gatwick CTA. Hughes 369 infringed the Gatwick CTA causing me to delay an inbound buy several miles. ☐ Supplementary 10/07/15:☐ I was aware of the controlled airspace above me as regularly use this route. I flew in to a large rain shower and changed my route to take a more Northerly one and may of inadvertently increased my altitude. I also had a customer on his first flight and he constantly asked questions as he was excited about the experience and I delayed my call to ATC. In future I will call up the relevant ATC unit earlier. I would obviously like to apologise if it proves that I did in fact infringe controlled airspace as I pride myself on my airmanship and did not intend to cause stress or endanger anyone. ☐ Supplementary 07/09/15:☐ The loss of separation was caused by a controlled airspace infringement of the Gatwick CTA by Hughes 369. The incident was resolved because the aircraft were diverging. Hughes 369 descended out of controlled airspace.
201509066	05/07/2015	EGTT : London (FIR)	EGKK (LGW): London/Gatwick	NE CTA	D	CTA	AIRBUS	Turbofan	2	Infringement of the Gatwick CTA (Class D) by a Hughes 369 squawking 7000 at 1800ft, resulting in loss of separation with an inbound A319. 201509068	30/06/2015	EGTT : London (FIR)	EGHI (SOU): Southampton	N	D	CTA	CESSNA	Reciprocating	1	Infringement of the Southampton CTA by a C172.	Left at 16:20 (we were aware airfield closed at 16:30 so some pressure to go). The aircraft was being collected after major avionics upgrade. My colleague who flew me down tried to input the return route, generated by old GPS and converted into the new GPS but wasn't able to do so. He was also unfamiliar with new GPS. I was happy that with the Airspace Avoid, the old GPS generated PLOG and my map with the route drawn on it I could get back safely. The map on the new GPS is different to the old GPS, more IFR than VFR, so didn't want to rely on it until more familiar. However the tablet running Airspace Avoid failed just after takeoff . In trying to reboot it I lost awareness of location. When I got it restored I was in the Class D airspace to the north of Southampton. The tablet shut down on three more occasions on the return trip but by then I was using the PLOG and the track from the new gps for navigation. Should have selected listen squawk - the frequency and code 0011 were on the old GPS generated PLOG - but I had tuned to Odiham after takeoff as was going to ask for MATZ transit through their western stub. The extra facility of the new nav/com upgrade would have allowed me to do both but I was not sure how at that point. When the tablet failed I should have reverted straight away to the PLOG and GPS track - the compass hadn't been reswung after avionics fit so not reliable. Even then I could have tuned into 0011 and it may have avoided the infringement but I became distracted by trying to get the tablet to reboot. The tablet will be checked over the next non critical flights (in terms of navigation) to see if it shuts down again, and replaced if it does - I have always found the software very good (Airspace Avoid). Always have a plan if the electronics fail. I had alternatives but was

201509068	30/06/2015	EGTT : London (FIR)	EGHI (SOU): Southampton	N	D	CTA	DE HAVILLAND	Turboprop	2	Infringement of the Southampton CTA by a C172. 201509074	04/07/2015	EGTT : London (FIR)	51942 N / 000 41 11 W		A	TMA	CESSNA	Turboprop	1	Infringement of the LTMA (Class A) by a C208 at 4400ft. The C208 had been instructed to operate not above 3400ft. Standard separation maintained.	C208 infringement of LTMA. I was working as the approach controller with C208 on frequency inbound for a parachute drop. On taking the hand over I was informed by the outgoing controller that the pilot had been briefed to be not above altitude 3,400 feet, I did not confirm this with the pilot expecting him to carry out his task as briefed. At approximately 1405 I noticed C208 climbing above 3,400 feet and tried to call him twice with no response, at this point I phoned the TCSW Co-ordinator as the aircraft was passing 4000 feet and I was aware that this would affect the Heathrow departures. C208 stopped his climb at 4,400 feet and on regaining contact I instructed the pilot to descend immediately.☐ CAA Closure:☐ No action taken. Closed due elapsed time. Registration will be monitored.
201509090	05/07/2015	EGTT : London (FIR)	SAM	9.5nm ESE	D	CTA	VANS	Reciprocating	1	Infringement of Solent CTAs 6 and 7 (Class D) by a Vans RV7 squawking 7000, indicating 2500ft and climbing. Standard separation maintained.	Infringement of Solent CTA areas 6 and 7 by Vans RV7. I was operating as the Solent ATCO (120.225) when at approximately 1109 I received a free call from Vans RV7. As I was on the telephone at the time to TC I told the free-caller to standby, which he did not do - he started passing his details which I did not catch due to listening to the TC ATCO. As I hung up the phone I realised that a 7000 squawk was climbing rapidly into the CTA (area 6) tracking northbound into area 7, the Mode S displayed the callsign as Vans RV7. The aircraft entered bearing 115 from SAM at 9.5nm, indicating 2500 feet and climbing. I called the aircraft back saying that I believed that he was inside of controlled airspace without a clearance, cleared him in 'not above altitude 5000 feet VFR' and asked for his details again. I issued 3661 as a squawk and reminded the pilot of the importance of obtaining a clearance prior to entering controlled airspace. No other aircraft were affected by the infringement. The pilot reported that he was on an air-test.
201509091	06/07/2015	EGTT : London (UIR)	Near LAM		A	TMA	CESSNA	Reciprocating	1	Infringement of the LTMA (Class A) by a C152, resulting in loss of separation with an outbound DHC8. Traffic info and avoiding action given.	Infringing aircraft near LAM. I was an OJTI on Thames radar with a fairly experienced trainee when C152 infringed the LTMA forcing the trainee to give avoiding action to a DHC8 departure to achieve 5 nm separation.
201509091	06/07/2015	EGTT : London (UIR)	Near LAM		A	TMA	DE HAVILLAND	Turboprop	2	Infringement of the LTMA (Class A) by a C152, resulting in loss of separation with an outbound DHC8. 201509151	09/07/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	Bearing 050 Range 10nm	G	Restrict ed area	OTHER	Reciprocating	1	Infringement of the Stansted TMZ1 (Class G) by a Microlight squawking 7000 at 1500ft. Traffic info given.	A primary return was observed tracking northwest through the Stansted TMZ1. Fltnum508L, fltnum2601 and fltnum37PX were all in sequence to land on runway 22 at Stansted and had to be given delaying vectors before being repositioned for their approaches. During its transit through the TMZ there were 2 or 3 occasions when a squawk was displayed very briefly, during which it was able to be ascertained from mode-s that the aircraft 's identity. Blind calls were made on both Stansted FIN & INT frequencies with no answer. As the aircraft was heading in the direction of Duxford, I tried to call them, but the phone line was constantly engaged. The return was first noticed just west of Wethersfield, so I also tried to call them but no answer. After handing over the position, I also contacted Cambridge, who were not working the aircraft. I also managed to contact Duxford ATC by going through the main switchboard at IWM, but they were not working the aircraft.☐ Supplementary 10/7/15:☐ The radar data has been viewed. The primary radar return was present in TMZ 1. On three separate occasions the transponder details appeared and allowed the aircraft to be identified. The mode S data indicated that the aircraft was at 1500ft, within the confines of TMZ 1 and therefore there was no loss of separation.The controller acted correctly by issuing extended vectors to three inbound aircraft. STAR has been interrogated and there have been a total of three incidents involving this registration.☐ Supplementary 10/08/15:☐ Suspect transponder fault. In future will use RT to talk to Farnborough radar in addition to
201509151	09/07/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	Bearing 050 Range 10nm	G	Restrict ed area	BOEING	Turbofan	2	Infringement of the Stansted TMZ1 (Class G) by a Microlight squawking 7000 at 1500ft. Traffic info given.	A primary return was observed tracking northwest through the Stansted TMZ1. Fltnum508L, fltnum2601 and fltnum37PX were all in sequence to land on runway 22 at Stansted and had to be given delaying vectors before being repositioned for their approaches. During its transit through the TMZ there were 2 or 3 occasions when a squawk was displayed very briefly, during which it was able to be ascertained from mode-s that the aircraft 's identity. Blind calls were made on both Stansted FIN & INT frequencies with no answer. As the aircraft was heading in the direction of Duxford, I tried to call them, but the phone line was constantly engaged. The return was first noticed just west of Wethersfield, so I also tried to call them but no answer. After handing over the position, I also contacted Cambridge, who were not working the aircraft. I also managed to contact Duxford ATC by going through the main switchboard at IWM, but they were not working the aircraft.☐ Supplementary 10/7/15:☐ The radar data has been viewed. The primary radar return was present in TMZ 1. On three separate occasions the transponder details appeared and allowed the aircraft to be identified. The mode S data indicated that the aircraft was at 1500ft, within the confines of TMZ 1 and therefore there was no loss of separation.The controller acted correctly by issuing extended vectors to three inbound aircraft. STAR has been interrogated and there have been a total of three incidents involving this registration.☐ Supplementary 10/08/15:☐ Suspect transponder fault. In future will use RT to talk to Farnborough radar in addition to
201509151	09/07/2015	EGTT : London (FIR)	EGSS (STN): London/Stansted	Bearing 050 Range 10nm	G	Restrict ed area	UNKNOWN	Unknown		Infringement of the Stansted TMZ1 (Class G) by a Microlight squawking 7000 at 1500ft. 201509166	02/07/2015	EGTT : London (FIR)	EG D036	Plymouth	G	Danger area	BEECH	Reciprocating	1	Infringement of Danger Area EG D036 (Plymouth) by an unknown aircraft squawking 7030 at FL53. Aircraft identified as a BE33.	Airspace Infringement. A 7030 squawk was observed 5nm north of the FIR boundary within EGD036. The aircraft continued to track north towards the Isle of Wight and exit the danger area. Solent radar were subsequently contacted to establish the callsign details of the flight. No hazardous activity was taking place within D036 at the time of the incident
201509167	10/07/2015	EGTT : London (FIR)	Not specified		D	CTR	PIPER	Reciprocating	1	Infringement of the Luton CTR (Class D) by an unknown aircraft squawking 7000. Aircraft identified as a PA28. Departures stopped.	Luton Zone Infringer. I was working as INT. At approx 1111Z, a 7000 squawk entered the CTR north of M1 J8 VRP. The aircraft was identified by mode S to be PA28. Departures were stopped from Luton for a period of about 5 minutes. The tower advised that the aircraft appeared to be a fixed wing. It travelled north in the zone for approx 4 miles before turning 180 and exiting southbound. The aircraft was tracked on radar and eventually called Farnborough LARS. The GS AIR spoke to Farnborough who said the aircraft was a local flight.
201509213	09/07/2015	EGTT : London (FIR)	CDF	12nm NNW	D	CTA	BAC	Reciprocating	1	Infringement of the Cardiff CTA (Class D) by a Jet Provost at 3500ft. Traffic info given. Standard separation maintained.	CAS infringement - Jet Provost. Radar was split, workload was medium / Light. I was operating as a controller under training conducting SRAs. I completed an SRA for runway 30 with the radar range reduced from normal operations so that I could provide an accurate SRA. After the approach was completed at 2NM I adjusted the range back to 40NM and scanned through my strips & radar. As I was doing this scan Jet Provost infringed controlled airspace 12NM North West of Cardiff Airport in the Taff Ely area at 3500'. No other aircraft were compromised, the pilots intentions were sought and a clearance to operate within controlled airspace was subsequently issued. Traffic information was passed to Jet Provost on a military helicopter which was departing to the North, the vertical separation was approximately 2000', both aircraft were operating VFR so no separation minima were required. The pilot advised he had intended to route outside CAS, I advised him that for future operations the base in the area was 3000' not 3500'. The aircraft routed to the east and then conducted a VFR SRA to runway 30.
201509213	09/07/2015	EGTT : London (FIR)	CDF	12nm NNW	D	CTA	OTHER	Unknown		Infringement of the Cardiff CTA (Class D) by a Jet Provost at 3500ft. Traffic info given. Standard separation maintained.	CAS infringement - Jet Provost. Radar was split, workload was medium / Light. I was operating as a controller under training conducting SRAs. I completed an SRA for runway 30 with the radar range reduced from normal operations so that I could provide an accurate SRA. After the approach was completed at 2NM I adjusted the range back to 40NM and scanned through my strips & radar. 201509224	09/07/2015	EGTT : London (FIR)	Not specified		D	CTA	CESSNA	Reciprocating	1	Infringement of the Doncaster CTR and CTA (Class D) by an unknown aircraft squawking 7000. Aircraft identified as a C172. Standard separation maintained.	Zone infringer - RHADS. While on Doncaster radar I observed a 7000 squawk climb into the RHADS CTR/CTA to the north of Gamston. I had observed that the ac was previously wearing a Humberside squawk and they confirmed that it was C172. I called Gamston and they did not answer. Several blind calls made to the ac and again no response. The aircraft performed orbits in the area north and overhead Gamston, and further within the RHADS CTR/CTA for approximately 20 mins. I also called Netherthorpe and they confirmed that they were not working the ac.
201509224	09/07/2015	EGTT : London (FIR)	Not specified		D	CTR	CESSNA	Reciprocating	1	Infringement of the Doncaster CTR and CTA (Class D) by an unknown aircraft squawking 7000. 201509258	09/07/2015	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	8nm E	D	CTA	PIPER	Reciprocating	1	Infringement of the East Midlands CTA (Class D) by an unknown aircraft squawking 7000, indicating 3200ft. Aircraft identified as a PA28. Traffic info and avoiding action given to an inbound B737. Standard separation maintained.	Infringement of Class D airspace. B737 was given descent to alt 3000ft from the South for the ILS RWY27. I noticed a primary return passing approximately 8nm East of East Midlands southbound. There was a call from an unknown aircraft on the frequency at about this time and I instructed the aircraft to check his frequency as he was talking to East Midlands Director. (This later turned out to be the aircraft infringing CAS). I then noticed a 7000 squawk indicating alt 3200ft in that area. The contact was unknown to the APR controller. B737 was given traffic information and avoiding action to pass to the East of the contact. In the meantime PA28 called APR and was indentified. B737 was vectored through the approach to intercept the ILS from the North and completed a normal ILS approach.
201509258	09/07/2015	EGTT : London (FIR)	EGNX (EMA): NOTTINGHAM EAST MIDLANDS	8nm E	D	CTA	BOEING	Turbofan	2	Infringement of the East Midlands CTA (Class D) by an unknown aircraft squawking 7000, indicating 3200ft. 201509274	09/07/2015	EGTT : London (FIR)	Not specified		D	CTA	VANS	Reciprocating	1	Infringement of the Stansted CTA (Class D) by a RV6 squawking 0013 at 1700ft. Traffic info and avoiding action given. Separation lost.	At time 1012 an unknown aircraft squawking 0013 approached the Stansted CTA at altitude 1,700 ft where the base of controlled airspace is 1,500ft. The unknown aircraft had mode S and was identified. A transmission was made on the Stansted FIN and INT frequency to contact it but no reply was given. Inbound aircraft which was turning onto a base leg was given avoiding action and traffic information.

201509274	09/07/2015	EGTT : London (FIR)	Not specified		D	CTA	AIRBUS	Turbofan	2	Infringement of the Stansted CTA (Class D) by a RV6 squawking 0013 at 1700ft. Traffic info and avoiding action given. Separation lost.	At time 1012 an unknown aircraft squawking 0013 approached the Stansted CTA at altitude 1,700 ft where the base of controlled airspace is 1,500ft. The unknown aircraft had mode S and was identified. A transmission was made on the Stansted FIN and INT frequency to contact it but no reply was given. Inbound aircraft which was turning onto a base leg was given avoiding action and traffic information.
201509278	11/07/2015	EGTT : London (FIR)	SAM	14.5nm SSW	D	CTA	PIPER	Reciprocating	1	Infringement of the Solent CTA 2 by an unknown aircraft squawking 3671 at 2600ft. Aircraft identified as a PA28. Traffic info given. Standard separation maintained.	Airspace infringement of Solent CTA-2 by PA28. At approximately 1203 as the Solent Radar controller I observed a primary and secondary radar contact with transponder code selected to 7000 on the north-west coast of the Isle of Wight on a north-easterly track with the mode C altitude information indicating the aircraft was climbing, which appeared to level off at 2600FT. The AIW was activated. Blind transmissions were made but no response was received. Bournemouth Radar were contacted but stated they had no knowledge of the aircraft but offered to make blind transmissions. VFR traffic operating in the area were advised of the unknown aircraft, its track and altitude but the aircraft was not seen. There was no 'Loss of Separation' with IFR traffic. Approximately one minute later the Bournemouth radar controller contacted the Southampton Radar controller to advise that the aircraft was and had been on their frequency and they were in fact providing the aircraft with a service. They did not explain whether they had provided an entry clearance into CTA. The Bournemouth Radar controller asked whether we wished to work the aircraft and the aircraft was eventually transferred to the Solent frequency after it had descended below 2000Ft in the area of Cowes. The aircraft was identified by the use of Southampton 3671 transponder code and provided with a Basic Service. Prior to the aircraft being transferred to Bournemouth Radar the pilot was asked whether he was aware that he had infringed controlled airspace which he acknowledged that he was aware.
201509279	10/07/2015	EGTT : London (FIR)	Cotswold CTA	North of Salisbury DG Complex	A	CTA	CESSNA	Reciprocating	1	Infringement of the Cotswold CTA (Class A) by a Cessna208 squawking 0033 indicating FL125 to FL135.	0033 squawk at time 15.05z was observed by S23 tactical to be inside controlled airspace for S23. It indicated FL125-135, the Cotswold CTA base in this area is FL105. The unique transponder was used within G-INFO the CAA website to confirm the aircraft registration. Netheravon were spoken to by telephone and the Chief pilot advised of the penetration and that CA4114 paperwork would be submitted in relation to the infringement. He assured that the pilot in question would be spoken to at the first opportunity to ensure no further infringements were made today.
