

# FDD Discussion Feedback

- Discussion (unsurprisingly) focused on RA
  - Key point – who/what is it for? Forms the basis of the display management.
  - Perspective?
  - RA Good Practice
  - Comms = passage of understanding
- MAA assurance questionnaire – timing?
- Map guidance
- SAG engagement – one size fits all perception (regulators’)
- Hazard Database access (BBMF good practise)
- Permissions – too specific?
- Next steps in professionalising the FCC?
- Good practise for using the FCC (levels of autonomy)
- Ad Hoc Formations – how does the FDD assure himself that they are safe?  
Standardised SOPs?
- How do we reach community members outside the net?

# What Can You do for Us?

- Timeliness...
- Late requests...
- Finish on time (don't compromise safety)
- Communication, communication, communication
- Confidence through evidence
