

# Training Manual Licensing Statement

## Training Manual Guidance and Checklist

The following pages have been developed as guidance to be used when producing a Training Manual, in accordance with the provisions of Space Industry Regulations 2021 Part 7; Chapter 3, to be submitted to the UK Civil Aviation Authority (CAA) as part of a licence application or whenever a change is made.

This licensing statement will guide you through the structure of the Training Manual in accordance with Schedule 3; Part 2. It includes the applicable Space Industry Regulations and Guidance Material (GM) that should be considered when writing your Training Manual.

If you choose to use alternative numbering to the one detailed in the tables below, it is important that you provide us with your numbering or cross reference in the 'Your Reference' columns. (Please see *Column Explanations* for further clarification.)

Your completed statement should be uploaded along with your proposed Training Manual to the CAA Space Regulation Portal.

This document can be iterated throughout the period of the licence and it may evolve from the version(s) submitted at application stage. Should this be the case, you will be required to complete and submit further licensing statements whenever a revision is made to your Training Manual.

<b>Applicant/Company Name:</b>		The licensing statement should be completed for each individual part of the Training Manual. The completed statement should be uploaded to the CAA Space Regulation Portal.
<b>Training Manual (TM) Date:</b>		
<b>TM Revision No:</b>		
<b>TM Version No:</b>		

### Column Explanations

**Training Manual Content:** This column describes the content required in the Training Manual, including example structure references.

**SIA, SIR or GM Reference:** This column provides the references to the relevant and applicable sections of the Space Industry Act, Space Industry Regulations or Guidance Material.

**Your Reference:** This column is for you to populate. It is important that you clearly identify where you meet the requirements.

**Licensee Comment:** This column is for you to provide further information and details of the status of your documents.

**CAA Comment:** This column is for CAA use only.

# Training Manual Licensing Statement

**The following are general requirements that must be achieved to comply with the Space Industry Regulations 2021:**

## **Part 7 Chapter 3; 66**

- (1) The licensee must –
  - (a) Compile a training manual which complies with the requirements in Part 2 of Schedule 3, and
  - (b) Apply to the regulator for approval of those sections of that training manual which relate to relevant individuals (the “relevant sections”).
- (4) At any time after the application is received and before it is determined, the regulator may require the applicant to provide it with such further information as it reasonably considers necessary to enable it to determine the application.
- (7) The licensee must ensure that each copy of the training manual is kept up to date.

## **Part 7 Chapter 3; 68**

- (1) The applicant must inform the regulator in writing as soon as possible of any material change in any of the information provided to the regulator in or with the application for approval of sections of the training manual relating to relevant individuals or in response to a requirement from the regulator under regulation 66(4).

It is important to note that the regulator will only approve those sections of the training manual that apply to “relevant individuals” (“RIs”) if a specific role is needed by the type of licence. “RI” is a term used in regulation 58 (Responsibility of licensees) as shorthand for any person fulfilling a specified role at regulation 56 or a specified capacity at regulation 57.

Specified roles (RI) at regulation 56:

- launch director
- flight termination personnel
- flight crew and remote pilots
- sub-orbital aircraft engineer
- range operations manager
- range safety manager

Specified capacity (RI) at regulation 57:

- Spaceflight participant

<b>0 ADMINISTRATION AND CONTROL OF TRAINING MANUAL</b>				
<b>0.1 Introduction:</b> <b>(a)</b> A statement that the manual complies with all applicable regulations and with the terms and conditions of the license.  <b>(b)</b> A statement that the manual contains instructions that are to be complied with by the relevant personnel.  <b>(c)</b> Explanations and definitions of terms and words needed for the use of the manual.				
<b>0.2 System of amendment and revision:</b> <b>(a)</b> Details of the person(s) responsible for the issuance and insertion of amendments and revisions.  <b>(b)</b> A record of amendments and revisions with insertion dates and effective dates  <b>(c)</b> A statement that handwritten amendments and revisions are not permitted, except in situations requiring immediate amendment or revision in the interest of safety.  <b>(d)</b> A description of the system for the annotation of pages or paragraphs and their effective dates.  <b>(e)</b> A list of effective pages or paragraphs.  <b>(f)</b> Annotation of changes (in the text and, as far as practicable, on charts and diagrams).  <b>(g)</b> Temporary revisions.  <b>(h)</b> A description of the distribution system for the manuals, amendments, and revisions.	Part 7, Chapter 3; 67 Part 7, Chapter 3; 68			
<b>0.3 Changes to the Training Manual</b> The regulator must be informed in writing of any material changes to the Training Manual as soon as possible in or with	Part 7, Chapter 3; 68

<b>4 TRAINING ASSESSMENTS AND EQUIPMENT</b>				
<p><b>4.1 Competence Assessments</b>                      A description of how the training manager or licensee, in the case of Spaceport licence holders who do not have a training manager, intends to conduct competence assessments at regular intervals.</p> <p>It is also to include detail on what process is to be followed if a relevant person fails any competence assessments and how the function will be performed in the interim whilst additional training is undertaken, and further assessments are passed.</p> <p>Competence assessments for flight crew and remote pilots can be also be carried out by one or more of the methods as mentioned in Part 7, Chapter 4; 70(3), provided they cover all phases of the assigned launch vehicles flight.</p>	Part 7, Chapter 4; 70(1), (2) and (3)			
<p><b>4.2 Emergency Situations</b>                      A description of any emergency situations that might be simulated in a launch vehicle. Providing that the only spaceflight participants are those who are authorised by the regulator to train the crew or check on any aspect of the licensee's spaceflight activity.</p>	Part 7, Chapter 4; 70(4)			
<p><b>4.3 Mission Rehearsals</b>                      This section should outline how prior to any launch, one or more rehearsal missions must be conducted to enable testing of operational procedures and to train staff in their duties.</p>	Part 7, Chapter 4; 70(5), (6) and (7)			

## Training Manual Licensing Statement

Training Manual Reference	SIA, SIR, GM Reference	Your Reference	Licensee Comment	CAA Comment
<p>Any mission rehearsals conducted, are to reproduce any intended spaceflight, spaceport and range control activities which would be carried out on the mission, including:</p> <p>(a) Normal and abnormal situations</p> <p>(b) Pre-launch, spaceflight and post launch scenarios</p> <p>(c) Any conditions in space that could affect the operator's spaceflight activity</p> <p>They may also include a spaceflight participant if necessary, to enable the participant to achieve any training objectives set or to complete any competence assessments.</p>				
<p><b>4.4 Training Equipment</b>            This section of the Training Manual is to provide detail on the training equipment that is required as part of the programme, as well as ensuring that the equipment to be used is sufficient.</p> <p>Training equipment used may include:</p> <p>(a) Devices which are capable of simulating a launch vehicle</p> <p>Any equipment or facilities which are used to carry out one or more of the licensed activities ("a simulated training device")</p>	Part 7, Chapter 4; 71(1) and (2)			
<p><b>4.5 Simulated Training Devices</b>            This section will relate to any simulated training devices that may be used within the training programme.</p> <p>Simulated training devices may only be used in the following instances:</p> <p>(a) The device accurately represents the same configuration, graphical and instrument displays and environment as the launch vehicle, equipment or facilities it is simulating</p>	Part 7, Chapter 4; 71(3)			

## Training Manual Licensing Statement

Training Manual Reference	SIA, SIR, GM Reference	Your Reference	Licensee Comment	CAA Comment
The device accurately represents conditions on the launch vehicle, equipment or facilities it is simulating as they will be experienced during the course of a licensed activity.				
<b>4.5.1 in relation to differences between equipment:</b> Any differences between the training device and actual launch vehicle, facilities or equipment it is simulating must be identified and described within the training programme.	Part 7, Chapter 4; 71(4)			
<b>4.5.2 in relation to physical effects connected with spaceflight:</b> If the licensee intends to use devices that are designed to reproduce the effects of spaceflight on the human body, a description must be provided for all the applicable effects, such as: <ul style="list-style-type: none"> <li>(a) The effects of acceleration</li> <li>(b) Disorientation</li> <li>(c) Loss of pressurisation</li> <li>(d) Any other adverse physical effects connected with spaceflight</li> </ul>	Part 7, Chapter 4; 71(5)			
<b>4.5.3 in relation to monitoring of devices:</b> A description of the intended system(s) to be used to establish and maintain the monitoring of any simulated training devices and/or any other device that is used within the training programme. <p>The system(s) must be able to:</p> <ul style="list-style-type: none"> <li>(a) Identify any changes in the capabilities or configuration of any devices used</li> <li>(b) Ensure that any such changes do not reduce the effectiveness of any training or assessment for which the device is used</li> </ul>	Part 7, Chapter 4; 71(6)
